Near the abbey James IV built a palace and this was a residence of the Scottish kings. Here Mary was married to Darnley and Elizabeth was murdered. Here Charles I was crowned and Charles Edward held a short but splendid court. The house was rebuilt by Charles II and the palace is still used for State purposes. Here the Lord High Commissioner to the Church of Scotland has his headquarters and here the Scottish representative peers are elected. Of interest are the abbey ruins and the apartments occupied by Mary. Until 1930 the abbey was a place of sanctuary.

Holy Spirit Third person of the Trinity. Gen I mentions the Spirit

of God, the Psalms and Isaiah use the epithet Holy. Gradually the spirit was differentiated as an aspect of God's being separable from His wisdom, and recognised as a separate person. The New Testament, witnessing to Christ's advent as God's incarnate Son, also emphasised the function of the Holy Spirit, described as the Spirit of Truth and, especially by St John as the Paraclete or Comforter. The early Church believed that the Holy Spirit proceeded from the Father, the insertion of *filioque*, "and the Son" in the Nicene creed caused the Great Schism between eastern and western Christendom.

Holytown Town of Lanarkshire. It is 11 m from Glasgow, and 389 m from London by the LMS Rly. Here are iron mines and collieries, also iron and steel works. Pop 9976.

Holy Week In the Christian year, the week before Easter. The ancient name the Great Week survives in the orthodox Eastern Church. It is distinct from Passion Week which properly begins on Passion Sunday. From the 3rd century on wards abstinence from flesh, wine and public business was enjoined on Christians. The Church of England and the Roman Catholic Church hold special services during Holy Week and there is a certain, but decreasing amount of abstinence from pleasure.

Holywell Market town and urban district of Flintshire. It stands on the estuary of the Dee on the LMS Rly. It is famous for its well, the waters of which are said to work miracles. Called Wilfred's Well, it is inside a chapel built in the 15th century. Near the station of Holywell Junction are the ruins of a Cistercian Abbey. Pop (1931) 3423.

Hollywood Watering place and urban district of Co. Down, N. Ireland. It is 4 m from Belfast, on Belfast Lough and has the usual seaside attractions for visitors. Pop 4000.

Homage Service due from a knight or other vassal to his lord and, therefore, the act of fealty itself. This was done by the vassal kneeling before the lord, and saying, "I become your man for the lands I hold of you and will be faithful to you against all men, saving only the fealty which I owe to my lord the king." As a ceremonial act homage is paid to day to the sovereign by the peers at his coronation, and by bishops on appointment.

Homburg Inland watering place of Germany 9 m from Frankfurt on the little River Hohe. It is famed for its waters, which being chalybeate and saline, are good for certain complaints. There is a castle here, once the residence of the landgrave of Hesse Homburg. Homburg was at one time a noted gambling centre. A soft felt hat worn by men is named after it. Pop 14 000.

Home Earl of Scottish title held by the family of Home. In 1173 Sir Alexander Home was made a Lord of Parliament. In 1605 Alexander, the 6th lord was made an earl by James I. Cospatrick the 11th earl married the heiress of the Douglas family and thus obtained estates in Lanarkshire including Douglas Castle. The old seat of the Home is Home Castle in Berwickshire where are the family estates. The earl's eldest son is called Lord Douglas.

Home Counties Term applied to the counties of Kent, Surrey, Middlesex, Berkshire, Buckingham

THE HUMAN BODY—A FIRST-AID CHART

Points at which pressure should be applied to arrest bleeding are shown in black

had dealings. Other European sovereigns signed the treaty later. It helped to keep the peace in Europe for some years after the overthrow of Napoleon.

Holycross Ruined abbey in Tipperary, Irish Free State. It is on the Suir, 4 m. from Thirls, and was founded in 1182.

Holyhead Market town, seaport and urban district of Anglesea. It is on Holy Island on the L.M.S. Rly. and is chiefly known as the port of embarkation for Ireland. The older harbour is used for fishing. Pop. (1931) 10,707.

Holy Island Name of several islands. One is off the coast of Anglesea. It covers 15 sq. m., and on it stands Holyhead.

Another Holy Island is off the coast of Northumberland, also called Lindisfarne.

Holy Land Name used by Christians especially in the Middle Ages, for Palestine.

Holyoake George Jacob, English politicalian. Born in Birmingham April 13, 1817, he became a chartist, and in 1843 was imprisoned for blasphemy. In 1854 he issued *Secularism, the Practical Philosophy of the People*. He wrote also *A History of Co-operation in England*, *The Limits of Atheism*, *Sixty Years of an Agitator's Life* and *Bygone Worth Remembering*. He died in 1906.

Holy of Holies Inner chamber of the Jewish tabernacle and temple. It was "the most holy place," with ark and mercy seat, and was separated by a veil from the outer chamber "the holy place."

Holy Orders Term denoting the status or degree of persons admitted to the Christian ministry by the laying on of hands of a bishop lawfully ordained. The Anglican Church recognises three grades: bishops, priests, and deacons. In the Roman Catholic Church the major or sacred orders included also subdeacons.

Holy Places Localities in and near Jerusalem associated with Christ's life. They include the Holy Sepulchre, Gethsemane, Olivet, Bethlehem and other sacred sites. The Pope entrusted their custody to the Franciscans in 1230 and later this authority passed to France, but the subject was complicated by the fact that the Turks were in possession. Difficulties over the custody of the Holy Places between France and Russia representing western and eastern Christianity helped to bring about the Crimean War.

Holyrood Royal palace in Edinburgh. It was originally an abbey founded in 1128 by King David I, and was so named because it possessed a piece of the true cross. It belonged to the Augustinian Canons and was destroyed in the 16th century.

Near the abbey James IV. built a palace and this was a residence of the Scottish kings. Here Mary was married to Darnley and Rizzio was murdered; here Charles I. was crowned, and Charles Edward held a short but splendid court. The house was rebuilt by Charles II. and the palace is still used for State purposes. Here the Lord High Commissioner to the Church of Scotland has his headquarters and here the Scottish representatives are elected. Of interest are the abbey ruins and the apartments occupied by Mary. Until 1850 the abbey was a place of sanctuary.

Holy Spirit Third person of the Trinity. Gen. 1 mentions the Spirit

of God; the Psalms and Isaiah use the epithet Holy. Gradually the spirit was differentiated as an aspect of God's being separable from His wisdom, and recognised as a separate person. The New Testament, witnessing to Christ's advent as God's incarnate Son, also emphasised the function of the Holy Spirit, described as the Spirit of Truth and, especially by St. John, as the Paraclete or Comforter. The early Church believed that the Holy Spirit proceeded from the Father; the insertion of *filioque*, "and the Son," in the Nicene creed caused the Great Schism between eastern and western Christendom.

Holytown Town of Lanarkshire. It is 11 m. from Glasgow, and 389 m. from London by the L.M.S. Rly. Here are iron mines and collieries, also iron and steel works. Pop. 9976.

Holy Week In the Christian year, the week before Easter. The ancient name of the Great Week survives in the orthodox Eastern Church. It is distinct from Passion Week, which properly begins on Passion Sunday from the 3rd century on, wards abstinence from flesh, wine and public business was enjoined on Christians. The Church of England and the Roman Catholic Church hold special services during Holy Week and there is a certain, but decreasing, amount of abstinence from pleasure.

Holywell Market town and urban district of Flintshire. It stands on the estuary of the Dee on the L.M.S. Rly. It is famous for its well, the waters of which are said to work miracles. Called Winifred's Well, it is inside a chapel built in the 15th century. Near the station of Holywell Junction are the ruins of a Cistercian Abbey. Pop. (1931) 3423.

Hollywood Watering place and urban district of Co. Down, N. Ireland. It is 4 m. from Belfast, on Belfast Lough, and has the usual seaside attractions for visitors. Pop. 4000.

Homage Service due from a knight or other vassal to his lord and, therefore, the act of fealty itself. This was done by the vassal kneeling before the lord, and saying, "I become your man for the lands I hold of you and will be faithful to you against all men, saving only the fealty which I owe to my lord the king." As a ceremonial act homage is paid to day to the sovereign by the peers at his coronation, and by bishops on appointment.

Homburg Inland watering place of Germany, 9 m. from Frankfurt on the little River Hohe. It is famed for its waters which being chalybeate and saline, are good for certain complaints. There is a castle here, once the residence of the landgrave of Hesse-Homburg. Homburg was at one time a noted gambling centre. A soft felt hat worn by men is named after it. Pop. 14,000.

Home Earl of Scottish title held by the family of Home. In 1173 Sir Alexander Home was made a Lord of Parliament, in 1605 Alexander, the 6th lord, was made an earl by James I. Cospatrick, the 11th earl married the heiress of the Douglas family and thus obtained estates in Lanarkshire including Douglas Castle. The old seat of the Home is Home Castle in Berwickshire where are the family estates. The earl's eldest son is called Lord Dunblane.

Home Counties Term applied to the counties of Kent, Surrey, Middlesex, Berkshire, Buckingham

Points at which pressure should be applied to arrest bleeding are shown in black

shire, Hertfordshire and Essex. They are so called because they are the counties nearest to the metropolis.

Home Office Department of the British Government. Its head is a Secretary of State, and he ranks as the senior secretary. On this account he is in special touch with the sovereign, and must be in attendance when a possible heir to the throne is born. Through him the sovereign issues proclamations and pardons. The office was created in 1782. At one time all the administration of the country was looked after by the Home Office, but as other departments were created its sphere of activity was contracted, at the same time, however, new duties were imposed upon it. This department is responsible for the administration of justice and the control of the police. By its officials, factories and mines are inspected and all matters affecting licensing and burials are supervised. Prisons and aliens are other subjects under the control of this department. The secretary is assisted by an under-secretary, who is a politician, a permanent under-secretary and a large staff of civil servants. The building is in Whitehall, London, S W.

Homer Greek poet. Little is known of his life. Indeed, some think that he never existed, being merely a legendary figure to whom poems written by a number of singers were attributed. The better opinion is, however, that he actually lived between 1200 and 850 B.C. Seven cities claimed to be his birthplace. Chios, Smyrna, Rhodes, Argos, Athens, Colophon and Salamis in Cyprus. He is believed to have been blind and to have travelled about singing his poems.

Homer wrote two of the world's greatest epics. One called the *Iliad* describes events in the concluding weeks of the Siege of Troy by the Greeks. The other called the *Odyssey* describes the wanderings of Ulysses (Odysseus) after the fall of that city. They are written in the Ionic dialect, and each is divided into 24 books. There are many English translations of both poems, notable ones being by Andrew Lang, S. H. Butcher and Walter Leaf, and older ones by Chapman and Pope. The authorship of the poems is the subject of much literature, including writings by W. E. Gladstone.

Homer Breed of domestic pigeon, used for long-distance racing and message carrying. Crossing with Antwerp carriers produced show homers, whose crossing with working homers produced exhibition flying homers.

Home Rule Name given to the movement for granting Ireland a measure of self-government. It began about 1870 and was from the first a constitutional, not a revolutionary, one. About that date members pledged to secure some measure of self-government were sent to Parliament by the Irish constituencies and soon these formed a distinct party, some 80 strong. Called Nationalists they were led in turn by Isaac Butt, C. S. Parnell and J. Redmond.

In 1885 Gladstone decided to grant home rule to Ireland and in 1886, in spite of the defection from his party of an influential group called Liberal Unionists, he introduced the first Home Rule Bill. This provided Ireland with a parliament of two houses, but it was defeated in the House of Commons. In 1893, Gladstone, again in office, introduced the second Home Rule Bill. This differed in some respects from the earlier one, it gave Ireland

its parliament, but left 80 Irish members at Westminster. This bill passed the Commons, but was defeated in the House of Lords. Its defeat was due in part to the vigorous resistance offered to it by the Ulstermen.

The third Home Rule Bill was introduced by the Liberal ministry under H. H. Asquith in 1912. Twice it was rejected by the House of Lords, but, under the terms of the Parliament Act, it became law in Sept., 1914, although serious opposition was offered to it in Ulster. By then, however, the Great War had begun, so its operation was postponed. Before more could be done the position had been entirely changed by the rise of the Sinn Féin Party, and the disappearance of the bulk of the Nationalists from Parliament in 1918. A settlement was made in 1921, by which the Irish Free State was formed as a self-governing dominion of the British Empire, and Northern Ireland remained part of the United Kingdom.

Homicide The taking of human life. It may be justifiable, when done under State sanction, excusable, when due to accident or in self defence, or felonious, whether murder, manslaughter or suicide.

Homildon Hill One of the hills of the Cheviot range, near Wooler. Here on Sept. 14, 1402, a fight took place between the English and the Scots. The Scots under the Earl of Douglas were returning from an invasion of England when they were met by an army led by the Percies. The fight was decided by the skill of the English archers who killed some hundreds of Scots as they were moving down the hill.

Homily Familiar religious address expounding a scriptural passage. The early Christians continued this practice of the Jewish synagogues as when S. Paul "talked" throughout the night at Troas (Acts xxii). Two books of homilies, 12 and 21, published in 1547 and 1563, are mentioned in the 36th article of religion in the Book of Common Prayer.

The branch of theological practice which concerns the method of preparing and delivering sermons and other religious discourses is called *homiletics*. It forms part of the normal training of students for the ministry in all Christian churches.

Hominy Maize that is hulled and crushed to make meal. It is used for porridge, puddings and in other ways.

Homoeopathy System of medicine based upon the principle that like cures like (*similia similibus curantur*). It was introduced in 1796 by Samuel Hahnemann, a German physician. In homoeopathy minute quantities of a drug are administered to produce symptoms similar to those of a disease. Many of the remedies have been adopted by allopaths, such as aconite in inflammatory complaints, and homoeopathy has had a strong influence on ordinary practice in stimulating the study of the physiological action of drugs.

There is a homoeopathic hospital in London, and societies for the promotion of homoeopathic practice. The hospital, founded in 1849, is in Great Ormond St., London, W C.

Homology Term in biology referring to the common origin of organs or parts of a plant or animal organism. Thus the arm of a man, the wing of a bird, and the foreleg of a dog are homologous structures, although in each case the function is different.

Homonym Word having the same sound as another but a different meaning. Examples are, hair and here break and brale

Honan Province of China. In the centre of the country, it is divided into two parts by the Yellow River. It covers 63,000 sq m. The soil is fertile, especially in the south. In the north are coal mines. Kaifeng is the capital.

Honduras Republic of Central America. It lies between the Caribbean Sea and the Pacific Ocean and has Nicaragua to the south and Guatemala to the north west. There are many mountains, some of considerable height and a number of rivers. Tegucigalpa is the capital. The ports are Puerto Cortez, Omon, Trujillo and Puerto Castilla on the east or Atlantic side and Amapala on the Pacific side. There were in 1932 1,119 miles of railway and some good roads. The area is 44,275 sq m. Pop. (1930) 859,761.

Honduras grows bananas, coffee, coconuts, tobacco and other tropical products. There is some mining and a few manufacturing industries. The country became an independent republic in 1821. The government is in the hands of a president elected for four years and a council of ministers who are responsible to a congress of 43 deputies. In religion the people are chiefly Roman Catholics. The gold *temprira* (~ 50 cents U.S.) became the monetary unit in 1931. The metric system of weights and measures is used.

Honduras British Colony of Central America. It has a coast line on the Caribbean Sea and covers 8600 sq m. The capital is Belize which is also the name of the chief river. The country produces mahogany and other timbers, coffee, bananas and other tropical fruits. A crown colony. It is under a governor who is assisted by an executive council and a legislative one. The unit of currency is the dollar and the chief bank is the Royal Bank of Canada. In Sept. 1931 great damage was done by a hurricane. Pop. (1931) 51,347.

Hone William. English author. Born in Bath June 3 1780, he failed as a London bookseller but soon made a name by his writings especially some political satires. For a parody on the Prayer Book he was prosecuted in 1817 but the only result was to increase his popularity and the public subscribed £3000 for him. After a period in prison for debt he started a coffee house in London but failed again. Hone became converted to Christianity and appeared as a preacher. He died at Tottenham Nov. 6 1842.

In 1817 Hone started *The Reformist's Register* and he wrote many books but to day he is best remembered by his *Everyday Book* and his *Table Book* both full of strange and interesting information.

Honesty Annual or biennial cruciferous herb (*Lunaria annua*). A native of Central and W. Asia it has toothed heart-shaped leaves and stems bearing flowers which are usually purple but sometimes white. It grows in English gardens and the silvery partitions of the ripened seed pods are useful for decorations. The perennial form has smaller flowers and seed pods.

Honey Sweet substance prepared by bees. The bees obtain the honey from flowers and store it in honeycombs where it serves as food for the young. Bees are kept for the honey they produce and the combs are taken from the hive at suitable times.

Honey consists mainly of sugar in the form of levulose and dextrose. The best, called virgin honey, is taken on from the hive before the bees swarm. Other forms are clover honey and heather honey. Honey is imported from California, New Zealand and other countries. In medicine it is used as a laxative.

The honeycomb is a mass of hexagonal cells of wax in which the hive bees store their honey and pollen as well as the young brood. In modern beekeeping the use of wax foundations and the wooden frame or section for the comb renders easier the handling of the bees and gives increased honey production.

Honeyberry Fruit of the nettles tree. It is blackish in colour, very sweet and ripens in winter. A native of the countries around the Mediterranean Sea, it belongs to the natural order *Urticaceae*.

Honey Dew Sticky sugary dew-like exudation from leaves and stems of various plants especially in warm dry weather. It may exude from punctures made in the plants by plant lice and scale insects or appear as a natural secretion exuded through water pores or broken tissues. Ants feed upon it, gardeners syringe it away. It sometimes drops in showers of manna.

Honey Eater Family of slender billed singing birds related to the sun bird. The brash like tips of their long tongues extract insects and nectar from flowers. Many are handsomely plumaged mostly in greens and yellows and in size they are about equal to the thrush. They are found in Australasia and the New Zealand tail, or parson bird is a favourite cage bird locally.

Honeysuckle Genus of erect or climbing shrubs of the older berry order (*Lonicera*). They are found in warm and temperate parts of the northern hemisphere and the flowers give out a fragrant odour. The plant is found wild but it will grow in any garden provided the soil is moderately dry, but a shady position is best.

Honfleur Seaport of Normandy, France. It stands on the estuary of the Seine, opposite Havre. There is a small harbour. The chief buildings are the pilgrim chapel of Notre Dame de Grace and the church of S. Catherine. Honfleur was once an important port and was taken by Henry V in 1415. Pop. 8700.

Hong Kong British possession in China. It consists of an island at the mouth of the Canton River about 90 m. from Canton a piece of land on the mainland called Kowloon and an area around that settlement. Properly speaking Hong Kong is the island only but the name is used for the colony as a whole. The island covers 32 sq m. and the colony 390. The island has a magnificent harbour which is a free port and one of the greatest trading centres in the East. It is also a military and naval station. The capital, Victoria, stretches along the south side of the harbour. Hong Kong was handed over to Great Britain in 1842 and Kowloon in 1860. The extension became British in 1898. The governor is assisted by an executive and a legislative council. The colony has a university and several schools. Hong Kong has some industries including sugar refining and rope making. It is the headquarters of the Hong Kong and Shanghai Banking Corporation. Pop. (civ.) 830,173. (Chinese) 821,101 (1931).

Honiton Borough and market town of Devonshire. It is on the Otter.

15 m from Exeter and 155 from London on the S Rlv. The parish church has a 15th century screen. Lace has been made here for 300 years. There is an agricultural trade and beer is brewed. The town has a Fair dating back to 1221. Pop (1931) 3008.

Honley Urban district of Yorkshire (W R). Near Huddersfield it is 185 m from London by the L N E Rlv. Woollen goods are manufactured. Pop (1931) 4611.

Honolulu City and seaport, also, since 1820, the capital of the Hawaiian Islands. It stands on Oahu Island, and is built on American lines. It is lighted by electricity and has electric tramways. The place has a good harbour and does a considerable shipping trade. Pop (1930) 137,582.

Honorius Name of four Popes. Honorius I was Pope from 625 to 638, and Honorius II from 1124 to 1130. Honorius III, Pope from 1216 to 1227, had a good deal to do with the foundation of the Franciscan and Dominican orders. Honorius IV was Pope from 1285 to 1287.

Honorius Roman emperor. He was a son of Theodosius the Great and in 395 was made Emperor of the West, his elder brother, Arcadius, ruling the East. During his reign the barbarians invaded the empire and in 410 Alaric, King of the Visigoths, captured and looted Rome. The Roman soldiers were called away from Britain and other possessions were also lost. The emperor whose full name was Honorius Flavius, could or would do nothing to arrest this decay. He died at Ravenna Aug. 27, 423.

Honour Distinction of any kind. One kind of honour is a title or distinction bestowed by the King, e.g., Companion of Honour (C.H.). Other honours are fellowships of learned societies, honorary degrees at the universities and the freedom of cities.

The bestowal of hereditary titles in Great Britain was in 1922 the subject of inquiry by a royal commission. As a result a permanent committee was set up to examine and report upon the claims of those recommended by the Prime Minister for any dignity or honour on account of political service before their names are submitted to the King.

Honour In feudal times an estate of two or more manors held by one lord. Each manor retained its separate organisation, but one court baron served for all. Two of the greatest honours in England were those of Clare and Richmond.

Honourable Title of honour. In Great Britain it is borne by the younger sons of earls and by all the sons and daughters of viscounts and barons. Judges of the high court and the sons of life peers are also honourables. The word is usually abbreviated in writing to Hon. In Australia, Canada and New Zealand all members of the legislature bear the title, as do the judges.

The higher title of right honourable is given to earls, viscounts and barons, to members of the Privy Council, to the lords justices and lords of appeal and to the lord mayors of London and York and the lord provosts of Edinburgh and Glasgow. The title of most honourable is used for marquesses.

Honourable Artillery Co. Territorial regiment of the British Army. It dates from 1537 and was formed to enable Londoners to practise with cross-bows and hand guns. In 1641 the ground in Finsbury

was given to it as a training ground and here, in City Rd., London E.C., are its headquarters called Armoury House. It consists of infantry and artillery and forms part of the Royal Regiment of Artillery. The regiment did splendid service in the Great War. In 1638 an Ancient and Honourable Artillery Company which still exists was founded at Boston U.S.A.

Honthorst Gerard van Dutch painter. Born at Utrecht, Nov. 4, 1590, he was a pupil of Bloemart but was influenced greatly by the realism of Caravaggio. His paintings cover a variety of subjects such as sacred and profane history, genre, and especially night scenes, hence he is sometimes called *Gherardo della Notte*. In later life he specialised in portraiture. His masterpiece "Christ before Pilate" is in the National Gallery, London, and specimens of his work are in most large collections. He died in Utrecht, April 27, 1636.

Hooch Pieter de Dutch painter. Born at Rotterdam in 1629, he attained little contemporary fame. He has left about 300 canvases, all of which display great art and finish. He was essentially a painter of interiors, delighting in the subtle variations of light diffused through windows and doors. He died about 1683.

Hood Battle cruiser. Successor to several earlier vessels of this name, she is 860 ft long and displaces 41,200 tons, carries eight 15 in. guns and has a speed of 31 knots. She was finished in 1919.

Hood Flexible covering for the head. It was much worn in England in the Middle Ages, especially by women, children and priests. Very often it was part of the cloak as in the case of Little Red Riding Hood.

The use of the hood by monks led to its use at the universities. Each university degree has a distinctive colour for its hood. For instance, at Oxford the M.A. wears a hood lined with crimson silk, and the B.A. one lined with white fur.

Hood Thomas English poet and humorist. Born in London, May 23, 1799, the son of a bookseller, he became a clerk, then an engraver. In 1821 he joined the staff of the *London Magazine*. In 1826 and 1827 he published *Whims and Oddities*, and then came *National Tales*. He was editor of the *Gem*, and from 1830 to 1839 issued yearly a *Comic Annual*. From 1835-40 he lived abroad. In 1840, after paying his creditors in full, he returned to become editor of the *New Monthly Magazine*. His last work was as editor of *Hood's Monthly Magazine*. He died in London, Mar. 3, 1845.

Hood's work is characterised by its unique combination of pathos and humour, as in *Faithless Nelly Gray* and *Miss Kilmessy*, and he is specially remembered for his *Song of the Shirt*, *The Bridge of Sighs* and *Eugene Aram*. He wrote *Up the Rhine* and a novel *Tylney Hall*.

Hood Tom English humorist. A son of Thomas Hood, he was born at Wanstead, Jan. 19, 1835, and was educated at Pembroke College, Oxford. He was for a time a clerk in the War Office, but later took to journalism. In 1855 he was made editor of *Fun*, and he died Nov. 20, 1874.

Hood Viscount. English sailor. The son of a clergyman, Samuel Hood was born in Dorset, Dec. 12, 1724, and entered the navy in 1741. He served in the war of 1756-63 and from 1767-1771 was commander-in-chief

in America. After a second spell of service in American waters he was made commander-in-chief in the Mediterranean and took part in the blockade of Toulon. He was an M.P. for a few years, defeating Charles J. Fox at the Westminster election of 1784. In 1782 he was made an Irish baron, and in 1790 a viscount. In Jan. 27, 1816, he died. The title is still held by his descendants.

Hood's brother Alexander saw much service in the navy and was made Viscount Bridport in 1800. A kinsman Samuel Hood, entered the navy in 1776, was at the Battle of the Nile and rose to high command. He was made a baronet and died Dec. 24, 1814.

Horace Lambert Alexander Hood, a son of the 4th Viscount Hood, became head of the naval college at Osborne in 1910. In 1914 he took command of a ship and in the Battle of Jutland he went down in the *Invincible* when in command of a squadron of battle cruisers May 31, 1916.

Hooge Village of Belgium. It is 3 m. from Ypres and around it there was much fighting during the Great War. In May 1915 the Germans destroyed here one of their earliest gas attacks and here on July 30 they used liquid fire from flame throwers for the first time. The village or what remained of it, was retaken by the British on July 31, 1917, and the Germans driven away in Sept., 1918. Hooge has been rebuilt and in it is a memorial to the Gloucestershire Regiment.

Hoogly Branch of the Ganges. One of the branches by which that river flows into the sea in the Bay of Bengal. It is 120 m. long. Calcutta stands on it. Owing to quicksands the navigation is dangerous. In 1931 a tunnel under the river was opened.

Hoogly is also the name of a town of Bengal, founded in 1537 by the Portuguese. Pop. 30,000.

Hook Theodore Edward, English writer. Born in London, Sept. 22, 1788, a son of James Hook, the composer, he was educated at Harrow. His extraordinary gifts as an improviser soon won for him a great reputation. In 1820 he started a Tory paper called *John Bull* and wrote a number of novels including *Mazrell* and *Jack Brag*, but is better known as the author of innumerable practical jokes. He died at Fulham Aug. 24, 1841.

Hookah Tobacco pipe used in India, Persia and other Eastern countries. It consists of a tobacco bowl from which the smoke passes through into a water bottle of glass, porcelain or metal and thence by a long flexible tube to the mouth. In this way the smoke is cooled.

Hooker Sir Joseph Dalton, English botanist. Born at Halesworth, Suffolk, June 30, 1817, he was the son of Sir William Hooker who was Professor of Botany at Glasgow and then Director of the Botanic Gardens at Kew. He studied medicine in Glasgow but never practised. Instead he went with Sir James Ross to the Antarctic in 1839 and in 1845 as botanist to the Geological Survey did much research work in the Himalayas. In 1855 he was made assistant director at Kew and in 1865 he succeeded his father as director. He retired in 1885 and died Dec. 10, 1911. Hooker was President of the Royal Society 1872-77 and was given the O.M. in 1907. He wrote books on the results of his journeys and a valuable *Flora of the Himalayas*.

Hooker Richard, English divine. Born in March 1564, he was sent to

Corpus Christi College, Oxford, and became a clergyman in 1581. In 1584 he was given a living in Buckinghamshire, and in 1585 was made Master of the Temple. He left London in 1591 to become Vicar of Bescombe in Wiltshire. His last living was at Bishopbourne, Kent, where he died Nov. 24, 1600.

Hooker is famous as the author of a unique *Treatise on the Laws of Ecclesiastical Polity*, which sets out the fundamental principles of Protestantism and especially of the Church of England. Equally remarkable for its stately prose and for its irresistible logic, it won for its author the epithet "judicious." Isaac Walton wrote a *Life of Hooker*.

Hook of Holland Steamer and rail. Very famous for its terminus of the Netherlands. It is 17 m. from Rotterdam and stands at the mouth of the channel called the New Waterway. There is a regular steamer service with Harwich, 120 m. away.

Hookworm Parasite causing ankylostomiasis in man. It is common in many tropical countries where the larva, entering the system by piercing the skin, commonly the foot, matures in the small intestine. Ova voided in the excreta infect the soil. Effective treatment can only be carried out on a large scale, and includes proper sanitation and the use of vermifuges.

Hooley Ernest Torah, English financier. Born in Nottingham, Feb. 5, 1859, he became a stockbroker's clerk, then a stock broker, and was concerned in floating companies at a time when this kind of business was in its infancy. He placed some very large undertakings on the market, and for a time was remarkably successful, but a sensational crash came with his bankruptcy in 1898.

Hooper John, English prelate. Born in Somerset about 1405, he went to Oxford and became a Cistercian monk. Later he joined the religious reformers and in 1539 went to Switzerland. Returning about the time of the accession of Edward VI, he was made chaplain to the Protector, the Duke of Somerset, and in 1550 was elected Bishop of Gloucester. He held also the bishopric of Worcester from 1552 until 1553, when Mary had him put into prison. On Feb. 9, 1555, having been condemned for heresy, he was burned at Gloucester.

Hoopoe Genus of birds allied to the hornbills (*Upupa*). It visits Europe and Siberia in summer and winters in Africa and India. Occasionally it breeds in England. Its golden buff head and neck bear a semi-circular crest of erect plumes with white bordered black tips.

Hoover Herbert Clark, American president. Born, Aug. 10, 1874, at West Branch, Iowa, the son of a Quaker, he was educated at the Leland Stanford University. He became an engineer and was for a time engaged in mining work in Australia, China and elsewhere. He attained a high standing in his profession and became a public figure during the war period. In 1914 he was in charge of the American relief work in Europe. Later, he organised relief measures on a much greater scale in the countries threatened with famine. This work occupied him until 1921 when he was a member of the Supreme Economic Council. A Republican, Hoover was Secretary of Commerce 1921-23, and in 1923 was elected President, defeating the Democrat, Al Smith. In July, 1931, he launched his scheme for a year's moratorium for all inter-

national war debts. He stood for re-election as Republican candidate in 1932, but was defeated by Franklin D. Roosevelt.

Hope Anthony. Pen-name of the English novelist, Sir Anthony Hope Hawkins. A son of Rev. E. C. Hawkins, he was born in London, Feb. 9 1863, and was educated at Marlborough and Balliol College, Oxford. He became a barrister, but devoted his time to writing. In 1894 he made his name with *The Prisoner of Zenda*, a novel of the romantic type, which called forth many imitations. The sequel, *Rupert of Hentzau*, and many others in the same vein followed, these including *Quisante*, *Tristram of Blent*, *Sophy of Kravonia*, *The Intrusions of Peggy* and *Captain Dieppe*. Hope secured another success with his *Dolly Dialogues* full of delicate wit. He also wrote plays, among them *The Adventures of Lady Ursula* and *Pulkerton's Peerage*. In 1918 he was knighted.

Hope Sir John. British soldier. Born Aug. 17, 1765, he was a son of the 2nd Earl of Hopetoun. In 1790 he entered the army and about 1795 embarked on a long career of active service. He was in the Netherlands and Egypt with Sir Ralph Abercrombie and in Sweden and Portugal with Sir John Moore, taking command at Corunna when his leader was killed. He commanded a division in the Walcheren expedition and in 1813 went to Spain as chief lieutenant to Wellington. There he led a division until wounded and made prisoner in April, 1814. In 1815 Hope was made a baron and in 1816 he became Earl of Hopetoun. He died Aug. 27, 1823.

Hope Town of Flintshire. On the River Allen, it is connected with Chester by the L. M. S. Rly., and is 138 m. from London. Offa's Dyke passes near and Roman remains have been unearthed. Pop. 4800.

Hopetoun Earl of. Scottish title now merged in that of Marquess of Linlithgow. Thomas Hope, a lawyer, was made a baronet in 1628 and one of his descendants, Charles, was made an earl in 1703, taking his title from his residence, Hopetoun House, Linlithgowshire. James, the 3rd earl, inherited the estates of the Marquess of Annandale. He was succeeded in 1816 by his half-brother, Sir John Hope (q.v.). In 1902 the 7th earl was made Marquess of Linlithgow. Hopetoun House stands near the Forth.

Hopper Funnel shaped wooden or metal vessel, through which loose material is discharged into a receptacle. The lower aperture is often provided with a trap door.

The term is applied also to the vat used in making an infusion of hops in a brewery.

Several insects are called hoppers. One of these is the hop flea which is very destructive to hops, another is the larva of the cheese fly.

Hoppner John. English portrait painter. Born in Whitechapel, London, April 4, 1758, of German parentage, he studied at the Royal Academy Schools and became a fashionable portrait painter. His portraits of women and children have a certain charm. The "Countess of Oxford" and "William Smith" are good examples of his work in the National Gallery, London, but his best works are in private collections. In 1792 he was elected A.R.A. and in 1795 R.A. He died in London, Jan. 23, 1810.

Hops Cone-like catkins of female flowers of the hop plant *Humulus lupulus*. They are used chiefly for giving the charac-

teristic flavour to beer. The plant is a perennial climbing herb with rough twining stems bearing either male flowers in drooping clusters or female flowers in green scaly cones. After flowering the female catkins, or hops, increase in size and develop at the bases of the scales small yellowish glands which contain the special principle of hops. Hops are used to some extent in medicine. The plant was introduced into England from Flanders in 1525.

In England hops are grown chiefly in Kent, but also in the counties of Hereford, Sussex, Worcester and Hampshire. A considerable outlay and much skilled labour are necessary before the hops are ready for picking. The chief English market is the Hop Exchange in Southwark, London, S.E.

Hor Mountain near Edom's border whereon Aaron died (Nu. x). It has been associated since Josephus with Jebel Harun, a truncated cone 4580 ft. high, between the Dead Sea and the Gulf of Akabah.

Horace Latin poet. Quintus Horatius Flaccus was born at Venusia, Dec. 8, 65 B.C., the son of a freedman who had acquired some wealth. He was educated at Rome and in Athens, and fought on the side of Brutus in the war that followed the murder of Caesar. He then entered the public service. About 38 B.C. Virgil introduced him to Maecenas, who gave him a farm on the Sabine Hills and there, or in Rome, the rest of his days were passed in writing. He died in Rome, Nov. 27, 8 B.C.

The first works of Horace were two volumes of *Satires*. These were followed by some *Epodes* and then came, in three books, his immortal *Odes*, the most perfect of their kind, yielding almost as many quotations as *Hamlet*. A fourth book followed. He also wrote some *Epistles* and the *Carmen Seculare*. There are many English translations of his works, especially of the *Odes*.

Horae Greek word meaning hours and used for the goddesses of the seasons. The daughters of Zeus and Themis, they were responsible for controlling the weather and were represented in art as beautiful maidens and temples in their honour were built at Athens and elsewhere.

Horatii Name given to three Roman heroes. They were triplets and were selected to fight three brothers from Alba. The fight took place and all were killed except one of the Horatii. On his return, his sister, whose lover had been among the slain, cursed him and he killed her.

Horatius Coclès, another Roman hero, belonged to this family. He defended, with two others, the bridge across the Tiber when the city was attacked by Lars Porsenna, as related in Macaulay's *Lays of Ancient Rome*.

Horder Lord, K.C.V.O., M.D. English physician. Born Jan. 7, 1871, he received his medical training at St. Bartholomew's Hospital, London. He joined the staff there and soon became known as a consultant, his patients including members of the royal family. He served at the front in the Great War, was knighted in 1918, made a baronet in 1923 and raised to peerage in 1933 as Lord Horder of Ashford.

Horeb In the Pentateuch an alternative name for Sinai (Ex. iii). It was the scene of Moses' experience of the burning bush, the giving of the Law, and Elijah's vision.

Horehound Name of two plants found in Great Britain and elsewhere in the temperate zones. The white

horchound has stems and leaves covered with down and bears whorls of white flowers in the summer. The black horchound has also downy and wrinkled leaves but its flowers are purple. The white horchound has an aromatic flavour and a decoction from its leaves is used as a medicine chiefly as a cure for coughs.

Horley Market town of Surrey. It is on the Mole, 25 m from London and 5 m from Reigate, on the S Rly. Pop 6100.

Hormones "Chemical messengers," substances formed in the organs of internal secretion, such as the thyroid and pituitary glands and passed on into the blood circulation. These substances stimulate the metabolism of other organs generally by increasing secretion. The activity of the thyroid has an effect upon physical and mental growth, and the pituitary upon growth in stature.

Horn Hard, pointed sheath formed over a bony core on the frontal bone of the skull of oxen, sheep and antelopes. In the case of the rhinoceros the horn consists of an agglutinated mass of horny fibres derived from the skin. The antlers of deer are not true horns, but horny outgrowths of the skull.

Horn is used for making handles of knives and forks, sticks and umbrellas, also combs, buttons, etc. It is exported from India, South Africa and South America.

Formerly many implements made of horn were called horns. These included drinking horns, hunting horns and powder horns, later came ink horns. There exist some fine old specimens of these horns.

Horn Cape of South America. On Tierra del Fuego. It is the most southerly part of the continent. It belongs to Chile and is about 1400 ft high. It was seen by Drake in 1578, but was named by a Dutch sailor who called it Hoorn from his birthplace.

Horn Brass musical wind instrument. At one time horns were much used for military and hunting purposes, only the walt horn surviving as an orchestral instrument. About 1835 this was superseded by the valve horn in F which is now universally employed. Its practical compass is about three octaves.

The player blows into a conical coiled tube twelve feet long producing tenor tone quality. Pistons effect a change of key. Music for valve horns in F is written a perfect fifth higher than actually sounded.

Hornbeam Tree of the birch order (*Carpinus betulus*). It is indigenous to Europe and W Asia and grows in Great Britain. Its dull doubly toothed leaves hairy underneath and winged fruit distinguish it from the beech. Its heavy close grained wood is difficult to split and serves for mallets, handles, laths, bench screws and cog wheels. In Great Britain it sometimes grows to a height of 70 ft.

Hornbill Family of fruit-eating birds allied to the hoopoes. They inhabit Africa, India and Malaya and have horn like helmets, hollow or solid surmounting their bills. There are ground hornbills, trumpeters and wedge-tailed forms. They may be as much as 15 in in length.

Hornblende Rock forming mineral of the amphibole group. It consists of the silicates of magnesia in lime horn and alumina and is found as grains or crystals in igneous rocks and schists in many parts of the world. Hornblende is black or greenish

black in colour and opaque except in the translucent variety, pargasite.

Hornbook Tablet used for teaching children especially in England from about 1150 till about the middle of the 18th century. Usually bearing the alphabet in capital and small letters, the nine numerals and the Lord's Prayer, it was covered with transparent horn and had a handle.

Horncastle Market town and urban district of Lincolnshire. It is 21 m from Lincoln on the L.M.S. Rly. The town is an agricultural centre and is famous for its horse fair held every August. Pop (1931) 3496.

Hornchurch Urban district of Essex. It is 2 m from Romford, on the L.M.S. Rly. The industries include the making of agricultural implements and brewing. Pop (1931) 28 417.

Horne Baron. British soldier. Born in Calne, Wiltshire Feb 19 1861, Henry Sinclair Horne was educated at Harrow and passed into the Royal Artillery. As an artillery officer he served in S Africa and in Aug 1914, he went to France in command of a brigade of artillery. In 1915 he was given a division and in 1916 he took command of an army corps which he led in the Battle of the Somme. In 1916 he was appointed to command the first army which he led throughout the advance of 1918. In 1919 he became Baron Horne of Strickoke, Calne, Wiltshire. The title became extinct when he died Aug 14 1929.

Horne Sir Robert Stevenson. British politician. The son of a minister of the Church of Scotland he was born Feb 28, 1871 and educated in Edinburgh and at Glasgow University. In 1895 he was made lecturer in philosophy at University College, Bangor, but later became an advocate in Edinburgh. In 1917 he was given an administrative position in connection with the transport of troops. He then went to the Admiralty as director of a department and later was made Third Civil Lord. In 1918, having been knighted, he entered Parliament as Conservative M.P. for the Hillhead division of Glasgow (which he still represented in 1930) and was made Minister of Labour. In 1920 he became President of the Local Government Board and in 1921 Chancellor of the Exchequer, leaving office when the coalition broke up in 1922. In business he became associated with several railway banking and other companies.

Horner One who sells horns of various kinds, a trade now extinct. The Horners' Company, however, one of the London livery companies still exists. Its hall is in Cannon St., London E.C.

Hornet British variety of wasp (*Vespa crabro*). About an inch long and distinguished from the common wasp by its ruddier hue. It builds papery nests chiefly of rotten wood in hollow trees or pendent from outhouse roofs. The hornet is found chiefly in the midland and southern counties of England.

Horning Term used in Scots law. It is a so named because at one time debtors who did not pay were declared outlaws after three blasts had been blown on a horn at the market cross in Edinburgh.

Hornsea Urban district and watering place of Yorkshire (E.R.). It is about 16 m from Hull on the coast between Spurn Point and Flamborough Head on the

L N E Rly Near is Hornsea Mere, a lake covering about 400 acres Pop (1931) 4450

Hornsey Borough of Middlesex. It is 4 m from London, but outside the county, and includes the districts of Harringay Crouch End, Muswell Hill and Finsbury Park It became a borough in 1903 In olden times there was a royal park which is mentioned by Shakespeare in *Henry VI* Pop (1931) 95,524

Horns Reef Reef off the coast of Jutland Near here the Battle of Jutland was fought, May 31, 1916 See JUTLAND

Horology Science dealing with the principles and construction of timepieces Wheel clocks came into use about the 12th century, portable clocks in the 14th, and watches with a coiled spring a century later The introduction of the pendulum in the 17th century, followed by the first escapement, was an important step and since that time steady progress has been made

Horse Hoofed mammal (*equus caballus*) of great value to man, especially the white races It is distinguished by having only one toe on each foot, and is seen in shades of red, brown, black, white and piebald Its height is measured in hands

The horse was hunted for food by primitive man, was known to the Egyptians and Assyrians, and by the time it was mentioned in the Bible it had been domesticated The Arabs showed what it was capable of in speed and beauty, and in these respects Arab horses have never been surpassed. The Roman chariot was drawn by horses and later the horse became an essential part of the knight's equipment. Until the Great War the horse played an important part in warfare

When the roads were bad goods were conveyed on pack horses and, when they became better, horses were used to draw coaches and carts over them. In agricultural work horses replaced oxen in many countries, while every gentleman, as a matter of necessity, learned to ride and made his journeys on horseback.

The invention of the steam engine reduced somewhat the demand for horses, still more the advent of the motor car To-day, even on farms, much of the work formerly done by horses is done by motor

The finest animal in existence is probably the English thoroughbred racehorse, in which there is an Arab strain For hunting, horses are carefully bred and good specimens fetch high prices For agricultural and draught purposes the chief breeds are the Shire, Clydesdale and Suffolk Punch, and for riding and driving, the Hackney and Cleveland.

In former days horse fairs were held in many centres, those of Ireland being especially famous, and these are not yet extinct, annually in August a great horse show is held in Dublin For breeding horses there are stud farms, while the breeding of racehorses is conducted in special establishments.

Wild horses are still found in Asia The mustang of South America is the wild descendant of the domesticated horse The skin, hair and other parts of the horse are commercially valuable There are restrictions on the export of old horses, and homes of rest are provided for them

Horse Chestnut Genus of large trees of the soapwort order (*Aesculus*) They are natives of Europe, India and N America. The common *A. hip-*

pocastanum bears pyramidal spikes of showy blossoms It grows to a height of 60 ft. The seeds produced much acetone and alcohol during the Great War The Indian form (*A. indica*) furnishes timber It grows to a height of 100 ft

Horse Fly Name loosely indicating two families annoying to horses (1) The large brownish-black *Tabanus bovinus*, and other blood-sucking species of the gadfly family (2) The parasitic yellowish-brown *Hippobosca equina* or horse tick, which is common in the New Forest, England See BOR FLX

Horse Guards Building in Whitehall, London; also the name of a cavalry regiment. The Whitehall structure was built in the 18th century and was at one time the headquarters of the army It is still used for military purposes Behind it is the Horse Guards Parade, where the trooping of the colours takes place

The Royal Horse Guards is one of the regiments of household cavalry It was formed in 1661 and saw much service in the 18th and 19th centuries also in the Great War It is stationed in London and at Windsor and attends the sovereign on ceremonial occasions.

Horsehair Tall and mane hair of the horse Long tail hair is woven into haircloth and used for the seats of chairs It is also plaited into fishing lines and used in violin bows The mane and short tail hair serve as a stuffing for furniture, and for brushes.

Horse Latitudes Term used by sailors for regions about 30 deg north and south of the equator There the westerly winds blow towards the pole and the trade winds towards the equator

Horse Leech Two aquatic species of blood-sucking leeches. (1) The *Haemopsis sanguisuga* is common in Europe and N Africa It sometimes clings to the pharynx of horses and cattle when drinking from pond or streams. (2) The *Aulastoma gulo* which is often confused with the leech. With three small teeth it normally feeds on earthworms, snails and other leeches

Horse Mackerel Popular name for several unrelated marine fishes, particularly a spiny-finned genus (*Caranx*) abounding in almost all tropical and temperate seas The British *C. trachurus* is also called the scad Sometimes found in vast shoals, it is split, salted and dried for food.

Horse Power Standard or unit of the power of an engine It is the force required to raise 33 000 lb one foot in one minute equivalent in electrical units to 746 watts The French unit, "force de cheval," equals 736 watts or 9863 horse power

Horse Racing Sport very popular in England, Ireland, Australia and France and to a lesser extent in other countries It is an old sport and with it the English kings have been associated for some centuries Race horses are specially bred and all are descended from Arab horses imported into England. Eclipse (1769-70) was the greatest racehorse on record and for good horses enormous prices are paid

Racing in England is controlled by the Jockey Club and the chief centre is Newmarket. Other famous courses are Epsom and Doncaster and there are many more all over the country

Races are held at several parks around London *eg.* Kempton, Sandown and Hurst. Ascot and Goodwood are race meetings especially famous for social functions. In Ireland the chief racing centres are the Curragh and Leopardstown. In France races are held at Auteuil and other places near Paris, and in Australia at Sydney and elsewhere.

Training stables are at Newmarket, Epsom, Doncaster and on the Berkshire Downs. The five classic races are the Derby and Oaks at Epsom, the St Leger at Doncaster, the Two Thousand Guineas and the One Thousand Guineas at Newmarket. These are for three-year-old horses. The courses vary from half a mile to two miles or a little more. In most races the horses are handicapped.

In addition to flat racing, hurdle or obstacle races are held at various centres. The chief of these is the Grand National. A feature of all horse races is the betting, through bookmakers or by means of the totalisator, which has been made legal in Great Britain.

Horseradish Perennial herb of the cruciferous order (*Cochlearia armoracea*). Its pungent root serves as a condiment with beef and its oil is used as an antiseptic. It is propagated by planting pieces of the root in trenches and can be grown in Great Britain.

Horse Show Show of horses held in various cities and towns specially to promote the interests of the breeding industry. Prizes are given for the best animals. The International Horse Show is held every year at Olympia, London, but more famous is the one held at Dublin every August. Other shows are devoted to the interests of a single breed *eg.* Clydesdales or Shires.

Horsham Market town and urban district of Sussex. It is 38 m. from London on the S. Ry. Its centre is called Carfax and here are stocks and the ring once used for bull baiting. The town has an agricultural trade. Pop. (1931) 13,579.

At West Horsham, about 2 m. away, are the fine modern buildings of Christ's Hospital.

A building material much used in Sussex houses is called Horsham stone.

Horsham Town of Victoria, Australia. A railway junction. It is about 200 m. from Melbourne and is the principal town of a sheep farming area. It is on the Wimmera river and has irrigation works. Pop. 1700.

Horthy Nicholas Hungarian leader. Born June 18 1868, of a noble family, Nicholas Horthy de Nagybanya was educated for the navy which he entered about 1884 and rose to command some cruisers during the Great War. He was given command of the Austro-Hungarian fleet in 1918 and made an admiral. During the troubles in Hungary that followed the War he collected a force that drove the Bolshevik Bela Kun and his followers from the country and restored order. He was chosen regent in March 1920 and held that position for the next 12 years.

Horticulture Scientific cultivation of fruit vegetables flowers and shrubs. In England it is fostered by the Royal Horticultural Society, which holds shows of flowers at its hall in Vincent Square. Westminster has gardens at Wilby in Surrey and *see a Journal*.

There are horticultural colleges at Swanley in Kent, Stull in Warwickshire, Ilphey in Surrey, and elsewhere.

Horus Egyptian falcon-headed deity. Perhaps originally the totem of a falcon clan, he became a sun god offspring of Osiris and Isis, equivalent to the Greek Apollo. He is sometimes represented as a human child the Greek Harpocrates, with finger on lips and seated on a lotus flower.

Horwich Urban district of Lancashire. It is 5 m. from Bolton, on the L.M.S. Ry. The industries include railway works, spinning mills, bleaching and dyeing works and coal mines. Pop. (1931) 15,680.

Hosanna Cry of adoration recorded in the account of Christ's entry into Jerusalem (Matthew xxi, 9) and later used in the Christian Church. It is also a Jewish liturgical term applied to the Hosanna branches used in the Feast of Tabernacles. The seventh day of the Feast of Tabernacles is Hosanna Day.

Hosea First of the twelve minor prophets in the Old Testament. A son of Beeri, a native of the northern kingdom of Israel, he prophesied under Jeroboam II and his successors. The first part of the book he wrote (I-III.) professes to relate a personal experience and compares the nation's attitude towards Jehovah with that of a faithless spouse. The second (IV-XIV) exposes and condemns Israel's idolatry and immorality. Our Lord cited Hosea's statement that God prefers mercy to sacrifice (Matthew ix).

Hosiery Word derived from hose, a covering for the legs or feet and now used for knitted goods made of wool or partly of wool. It covers stockings, vests and other forms of underwear. In England the chief centres of the industry include Leicester, Nottingham and Ilkeston. In Scotland Hawick is a centre. Germany, the United States and other countries turn out large quantities of hosiery.

Hosiery is made by machinery. The first knitting machine or frame, was invented by Rev. W. Lee of Calverton near Nottingham.

Hospice Home of rest and refuge for travellers, maintained by religious houses. Such establishments were formed by monks on some Alpine passes for aiding pilgrims to and from Rome. That on the Great St. Bernard, founded in 982, is famed for its use of trained dogs to search for and rescue travellers overcome by the cold.

Hospital Building for the care of the sick and injured. In olden times it was used for almost any charitable institution. Some were homes for the aged, such as are still seen in Warwick, Hereford and other cities and towns. Others were schools such as Christ's Hospital.

The Egyptians and the Greeks had hospitals in the modern sense but their great development came with Christianity. In London St. Bartholomew's dates from 1123. In the 19th century hospitals were built in all the large cities and towns. The largest are general hospitals called in some places infirmaries. Some are devoted to specific diseases. Other hospitals are for children or women or for maternity cases. There are also dental hospitals and hospitals for incurables. Other hospitals such as those at Woolwich and Netley are maintained for the use of soldiers and sailors. In London the great hospitals are all in the medical schools, are the London St. Bartholomew's, St. Thomas & Guy's King's College, University College and St. George's.

In Great Britain the hospitals are supported by voluntary contributions. To assist those in London there is the King Edward VII's Hospital Fund and large sums are raised by the Hospital Saturday Fund and the Hospital Sunday Fund.

Hospitals have usually an indoor and outdoor department. No fees are charged in the majority of cases, although some have started the system of fees for those able to pay.

Hospitals for fever and other infectious diseases form a different class and are maintained by local authorities.

Hospitallers Name given to the knights of the Order of S. John of Jerusalem. It was founded in 1113 to manage a hospital, or hostel, for Christian pilgrims in Jerusalem. Some of its members took vows to defend the Holy Sepulchre, and soon it became the great rival of the other military order, the Knights Templars.

The order was strong and active during the crusading period, when it made Acre, called thereafter S. Jean d'Acre, its headquarters. In 1291 the knights made Cyprus their headquarters, and in 1530 they settled in Malta. As the Knights of Malta, they ruled over that island until 1798.

Host Water consecrated at the Mass in Roman Catholic worship. It is made of unleavened bread and after consecration is revered as the Blessed Sacrament.

Host In pathology a term applied to a plant or animal which is attacked by a parasite. In the case of endoparasites, the tapeworm and liver fluke, for example, there may be an alternation of hosts, the adult stage living in the primary host and the other stages of the life cycle in a secondary host.

Hostage Person retained as a pledge for the performance or non-performance of specific acts. The practice arose in connection with treaties and terms of surrender imposed on the vanquished. Rome took the sons of tributary princes as hostages and educated them. The last occasion between civilised states when a treaty was thus secured was at Aix-la-Chapelle in 1748.

Hostel Old name for an inn, surviving in the form of hostelry. It is used to-day for halls in connection with the newer English universities where students reside and also for residential institutions for nurses, social workers and young men and women in business life. The Hostel of God, at Clapham, houses the dying.

Hotbed Contrivance used by gardeners as an aid to the cultivation of plants. It consists of a heap of fermenting manure or other material, thus utilising the heat of fermentation for forcing plant growth.

Hotchkiss Benjamin Berkeley American inventor. Born Oct. 1, 1826, he was employed in a gun factory when the Civil War was being fought. Among other inventions he was responsible for a machine-gun called after him, the Hotchkiss. It will fire automatically 400 rounds a minute, and is made in light and heavy forms. Hotchkiss died March 14, 1885.

Hotchpot Term used in English law. It means bringing property into a common fund to divide an estate at death. A man who has given money to one or two of his children during his lifetime may direct in his will that these sums are brought into

hotchpot, i.e., they are included in the share which those children will receive.

Hotel Word used for an inn or boarding-house that claims to be of superior character. A variant of hostel, it came into use in the 19th century with the advent of railways. The hotels in London, New York, Paris and other capitals are large and imposing buildings with every convenience and luxury.

In Great Britain most hotels sell intoxicating liquor and must therefore be licensed. Many have restaurants where others than residents can obtain meals. Some, called commercial hotels, cater chiefly for business men.

In London, to look after hotel interests, there is a paper, *The Hotel Review*, and an association, the Hotel and Restaurant Proprietors' Association.

The Hôtel Dieu, a French institution, is a home for the old or infirm.

Hotel de Ville French and Belgian equivalent for town hall, the German word being Rathaus. Some date from mediæval times, as those at Orleans and Antwerp. That in Paris is modern.

Hothouse Glazed structure similar to a greenhouse, but provided with heating apparatus. In it may be grown tender plants naturally growing in warmer climates. Some plants like the palms require moist heat. Cacti and other succulents require dry heat, while grapes, peaches, melons, etc., need a more temperate heat.

Hotspur Name given to Sir Henry Percy. A son of the 1st Earl of Northumberland, he led a revolt against Henry IV. and was killed in battle at Shrewsbury in 1403.

Hottentot Primitive people living in South Africa. With a negroid strain in them they are also allied in blood to the Bantus and the Bushmen. They lived at one time in the north of the continent, but were driven south, where they settled. Their huts are shaped like beehives and they have their own religious rites in which the witch doctor figures. They number, perhaps, 60,000, but many of them, known as the Cape Hottentots, are half-breeds.

Houdin Robert French conjurer. The son of a clockmaker, he was born Dec. 6, 1805, at Blois, and baptised Jean Eugène Robert, but on his marriage took his wife's name of Houdin. In 1815 he opened a theatre of magic in Paris and there he gave some remarkable performances, as he did later in England and Germany. In 1856 the French government sent him to Algiers to counteract the influence of the native sorcerers, which his skill enabled him to do successfully. He died at Blois in 1871. Houdin wrote books which have been translated into English as *The Secrets of Conjuring and Magic* and *Card Sharpping Exposed*.

Houdini Henry American entertainer. Born in Wisconsin, April 6, 1873, he became a locksmith. His extraordinary skill in freeing himself from handcuffs, locks and other impediments soon led him to give exhibitions on the variety stage in London, New York and elsewhere. He died Oct. 31, 1926. In 1931, a book, called *Houdini's Escapes*, explained how some of his feats were performed.

Houghton Village of Norfolk. It is famous for its hall and its associations with the Walpoles. Sir Robert

Walpole, who was born here, built the enormous hall Houghton is now the seat of the Earl of Hockliffe, but the pictures collected by Walpole have been sold. In the park is the village church, which contains the tombs of Walpole and his famous son, Horace.

Houghton Baron English scholar and politician. Born in London. June 19 1809, Richard Moncton Milnes was a son of Robert Pemberton Milnes, a Yorkshire landowner. While still at Cambridge he displayed distinct talents as a scholar and a wit. In 1837, having travelled in Europe he entered Parliament as M.P. for Pontefract and remained a member until 1863, when he was made a peer. He married Annabel, daughter and heiress of Baron Crewe and later his only son became Marquess of Crewe. Houghton died Aug. 11, 1885.

Dickie Milnes, as he was called, was one of the most popular men of the day, a champion of liberal ideas and a friend of Tennyson, Carlyle and most of the great literary men of his day. He was the Mr. Vavasour of Disraeli's novel *Tancred* and himself wrote several volumes and some graceful verse.

Houghton William Stanley English dramatist. He was born in Manchester in 1881 and educated at the local grammar school. He entered business life but at the same time served as dramatic critic for *The Manchester Guardian*. Then he began to write plays and his *Handle With Care* 1912, a powerful study of Lancashire life made him widely known. Others of his plays are *The Younger Generation*, *The Master of the House*, *Trust the People* and *The Perfect Cure*. He died Dec. 13, 1913.

Houghton-le-Spring Urban district of Durham. It is 6 m. from Durham and is a centre of the coal and iron industries. Pop. (1931) 10,492.

Hougoumont Chateau on the battle field of Waterloo. With its grounds it was occupied by the British when the French opened the battle. It was defended by the Guards and in spite of desperate efforts the French failed to take it.

Houndsditch Street in the city of London. It extends from Bishopsgate to Aldgate. At each end is a church dedicated to St. Botolph. A Jewish centre since the 16th century it is famous for its second hand clothes shops. The name refers to the fact that the city ditch was here.

Hounslow District of Middlesex. It is 12 m. from London on the Southern Rly. It is in the Heston and Uxbridge urban district. There are many market gardens. Hounslow Heath, now only a fragment of its former size, is famous for its relations with highwaymen.

Hour Measure of time equal to sixty minutes, or the twenty-fourth part of a day. Hours are counted from midnight to the following noon and from noon to the following midnight but in the astronomical day the hours are counted up to 24 hours from noon to noon.

A book containing plates for the different hours is called a book of hours. Some of the best are for royal persons and wonderfully illustrated are beautiful and costly works of art. There are examples in the British Museum and other collections.

Hour To Mohammedans a black-eyed damsel of faceless youth health and beauty. She is promised in the Koran to the devout Moslem when he enters paradise. He may expect the companionship of many such nymphs as well as of his earthly wives.

House Dwelling of a permanent kind. Houses were at first very primitive structures. To day they usually contain one or more living rooms for meals and daily life with sleeping rooms on the upper storey or storeys. In the western world brick or stone are the materials chiefly used, but timber, or half timber houses are occasionally seen.

The older houses were dark and ill ventilated to day much more attention is given to the supply of light and air. Houses are known as halls, villas, cottages, and so on. The money paid for the hire of a house is called rent.

A family is known as a house so we have the house of York and the house of Windsor. The word is also used for an assembly such as the House of Commons and the House of Representatives. Business firms are called houses and some of them have their own papers called house journals. Steamship lines have their own flags called house flags. At Oxford Christ Church is called 'the House'.

A houseboat is a kind of barge fitted up as a river residence.

House Edward Mandell American politician. Born at Houston, Texas, July 26, 1858, he was educated at New Haven and at Cornell University. Known as Colonel House, he became an influential figure in the political life of Texas, but never held office. In 1914, as an intimate friend of President Wilson, he was sent to Europe to collect information and in 1917, when the United States entered the war he represented his country in Paris. He attended the Peace Conference, but retired into private life after Wilson's death. In 1926 there appeared *The Intimate Papers of Colonel House*.

House Fly Two winged insect of a subfamily including blowflies or blowflies (*Musca domestica*). It has a sucking proboscis and walks on ceilings and windows by sucker like feet. Its eggs produce in a day legless maggots which reach adult life in a month. It is a carrier of disease germs. The fly is found in all parts of the world.

Household Name used for all the inmates of a house. It is used in a special sense for the king's or royal household, which includes in addition to the royal family and the servants the officials of the court such as the Lord Chamberlain.

The Household Cavalry is the name given to the regiments that have a special connection with the royal household. Formerly there were three of these regiments, but since the Great War there have only been two the Royal Horse Guards and the Life Guards. The 1st and 2nd Life Guards having been amalgamated. During the Great War an infantry battalion was formed from reserve regiments of the Household Cavalry. The kings of France had their household troops until 1789.

House Leek Genus of succulent herbs or undershrubs of the stonecrop order (*Sempervivum*). They are natives of Europe, Asia and North Africa. The British hardy perennial *S. telekium* frequently forms rosettes of fleshy leaves on cottage roofs and walls. It has spread to

America Several species are cultivated in rockeries and others in greenhouses.

Housemaid's Knee *Painful swelling of the pad or sac over the lower part of the knee cap* It arises usually from much kneeling on hard substances, but sometimes from rheumatism or gout. It is a chronic inflammation caused by fluid collecting in the sac or by thickened sac-walls. Rest is essential, with fomentations, blistering or tapping as a remedy.

Housing Provision of houses, especially in populous areas. The question of providing houses became acute early in the 19th century owing to the rapid increase in the population and the growth of new industrial areas, the growing interest of the masses in economic and political matters, the demand for higher standards of life and, above all, the realisation that millions of men, women and children were living under conditions of filth, poverty and overcrowding.

In 1843 a royal commission inquired into the matter and laws were passed providing that new houses should be of a certain standard in respect of sanitation and the like, but private enterprise was regarded as equal to the task of providing them.

In 1884 another royal commission was appointed and as a result a measure passed in 1890 gave local authorities power to clear slum areas, to close insanitary dwellings and to erect new ones. But the housing of the people, as a whole, remained far from satisfactory. In 1909 another measure was passed which dealt also with town planning, but the Great War brought about a complete cessation of this work.

A new era in housing began in 1919 when an important Act was passed allowing the gift of public money to aid individuals to build houses, provided these came up to a certain standard and did not exceed a certain cost. In spite of the high cost of building materials a good deal was done. In 1923 another Act promised financial aid to local authorities undertaking housing schemes. Other measures followed, the amount of the housing grant being altered from time to time. Large housing estates were laid out by the London County Council and the corporations of Glasgow, Birmingham, Liverpool, Manchester and other large cities. Slum areas were cleared and the standard of housing in Great Britain was raised. In 1931 a measure was introduced to aid the building of houses in rural areas, where the conditions although different, were in some ways as bad as those of the towns.

Housman *Alfred Edward* English scholar and poet. Born March 26, 1859, he was educated at Bromsgrove School and St John's College, Oxford. Professor of Latin in University College London, from 1892, he was in 1911 made Fellow of Trinity and Professor of Latin at Cambridge. He has published two volumes of unique poetry, *The Shropshire Lad* (1896) a series of 63 ballad-like poems on country life, and *Last Poems* (1922), both marked by their flawless style, economy of diction, melody and unflinching realism. He has also edited some volumes of classical works.

Housman *Laurence* English author and artist. Born July 18, 1865, he studied art and won a reputation by his book illustrations. In 1893 he published a book on William Blake. A great number of

volumes, both prose and verse, followed and he became known as a writer of graceful poetry and fanciful fiction. The best known of his books are *An Englishwoman's Love Letters*, published anonymously in 1900, *Bethlehem a Nativity Play*, *Prunella, or Love in a Dutch Garden*, *Angels and Ministers*, *A Doorway in Fairyland*, *The New Child's Guide to Knowledge* and *The Heart of Peace*. Recent books are *Cornered Poets*, *War Letters of Fallen Englishmen* and *Turn-Again Tales*.

Houston City and port of Texas. It is in the SE of the state, 48 m. from Galveston, and is an important railway junction. There are many churches and schools, including the Rice Institute. Houston is a market for cotton, rice, sugar and other products and has engineering works and flour mills. By means of a ship canal, 50 m long, the city has become a prosperous port, especially for cotton. Pop (1930) 292,352.

Houston *Samuel* American politician. Born in Virginia, March 2, 1793, he entered the army, but soon turned to politics, was elected to Congress and in 1827 was made Governor of Tennessee. Two years later he settled among the Cherokee Indians. In 1835, when Texas revolted against Mexico, he was chosen as the leader of the Texan army, and in April 1836, he won a crushing victory. This made Texas independent and Houston was its president until 1845, when it was annexed by the United States, then represented it in the Senate. In 1859 he was appointed governor, but he was deposed in 1861 because he would not support the movement for secession. He died July 26, 1863.

Hova Name used for the inhabitants of Madagascar. They came probably from Malaya in the 15th century and in the 19th became the dominant people. Their number (1911) 910,000, or about a quarter of the population, but their language is spoken by many more. The word means "freeman".

Hove Borough and watering place of Sussex. It is to the west of Brighton and 51 m. from London, on the S Rly. The borough possesses a fine promenade and famous lawns, and here the Sussex Cricket Club has its grounds. The area of the borough was extended in 1928. Pop (1931) 54,994.

Howard *Noted English family*. Its early members lived in Norfolk, where several became of importance. Sir Robert Howard married a daughter of Thomas Mowbray, Duke of Norfolk, and in 1483 his son, having inherited the Mowbray estates in Sussex and elsewhere, was made Duke of Norfolk. Since then this title has been held by the Howards: the Earl of Carlisle, Earl of Suffolk and Berkshire, Viscount Fitzalan, Lord Howard of Glossop and Lord Howard of Penrith, formerly Sir Esme Howard, British ambassador in Washington also are members of this family.

Howard *Catherine* Wife of Henry VIII. A daughter of Lord Edmund Howard, who was a son of the 2nd Duke of Norfolk, she was born about 1522. On July 28, 1540, Henry married her secretly as his fifth wife. Almost at once she was accused of misconduct before her marriage, found guilty and on Feb 13, 1542, beheaded.

Howard *John* English philanthropist. Born in London, Sept. 2, 1726, he inherited an estate in Bedfordshire in 1742 and there lived the life of a country gentleman.

In 1773, when high sheriff, he noticed the terrible condition of the prisons and of the prisoners, many of whom were innocent of crime, and entered upon the work for which he is famous. He visited prisons, not only in England, but in France, Germany and elsewhere and wrote *The State of the Prisons* which drew public attention to the matter and led to considerable reforms. He died at Kherston, Jan 20, 1790. A Howard Society has been formed to carry on his work.

Howard de Walden Baron English title dating from 1507. The 1st baron was Lord Thomas Howard afterwards Earl of Suffolk a son of the 4th Duke of Norfolk. From 1688 until 1784 the title remained in abeyance and in 1797 it passed to the Earl of Bristol, a descendant of the 1st lord, thence, in 1803, to Charles Augustus Ellis, a diplomat. Ellis married a daughter of the 3rd Duke of Portland, whose valuable London property, inherited from her brother the 4th duke, passed to her son and thence to her grandson. The latter Thomas Evelyn Scott Ellis, who succeeded in 1809 is known for his interest in art and music. He is also Baron Scaford and his London residence is Scaford House.

Howard of Effingham, Baron English title borne by the family of Howard. The 1st baron was William Howard, a son of the Duke of Norfolk. He was born about 1510 and served Henry VIII and his three children. He was Lord High Admiral, 1554-73 and Lord Chamberlain under Elizabeth. He died Jan 12, 1573. His son, Charles, the 2nd baron, also Lord High Admiral, was born in 1536 and led the fleet that defeated the Spanish Armada. He was created Earl of Nottingham in 1596 and died Dec 14, 1624.

Howden Market town of Yorkshire (E. R.). It is 21 m from Hull on the L.N.E. Ry. There is an aerodrome here. Roger of Howden who wrote a chronicle of English history from 732 to 1201, was born here. Pop 2050.

Howe Earl. English title borne in turn by the families of Howe and Curzon. The 1st earl was the famous seaman, Richard Howe who was made an earl in 1788. He left no sons. A daughter married Assheton Curzon and their son inherited from his paternal grandfather the title of Viscount Curzon and in 1821 was made Earl Howe. Richard Curzon Howe the 4th earl (1861-1929), was succeeded by his son Francis. When Viscount Curzon, the latter was a Unionist M.P. 1918-29, and famous as a racing motorist. The earl owned land in Buckinghamshire and Leicester-shire but much has been sold. The earl's eldest son is known as Viscount Curzon.

Howe Earl. English sailor. Richard Howe a younger son of the 2nd Viscount Howe was born in London March 8, 1726. Entering the navy he made a reputation during the Seven Years War notably in Quillson Bay and in 1778-80 he was in command of a fleet that operated against the French off the North American coast. In 1782 Howe relieved Gibraltar and in 1794 he gained a great victory over the French on the Glorious First of June.

Between his spells of active service he was Treasurer of the Navy and First Lord of the Admiralty. In 1788 on his brother's death he became an Irish viscount. In 1782 he was made an English viscount and in 1788 an earl.

In 1797 he suppressed the mutiny at Spithead and he died Aug 5, 1799.

Howells William Dean American novelist. Born in Ohio, March 1, 1837, he was the son of a printer. While working in his father's office he began to write for the press and also published a *Life of Lincoln*. From 1861-65 he was consul in Venice from 1872 to 1881, editor of *The Atlantic Monthly* from 1886 to 1891, editor of *Harper's Magazine*. He died May 11, 1920.

Howells wrote a great number of novels dealing in a realistic way with American life. They include *Their Wedding Journey*, *The Undiscovered Country*, *An Indian Summer*, *The World of Chance* and *The Landlord of the Lion's Head*. He also wrote short stories, poems and a volume called *Venetian Life*.

Howitt William English writer. The son of a farmer, he was born at Hleanor, Derbyshire, Dec 18, 1792 and educated at Ackworth, Yorkshire, in a Quaker school. He was apprenticed to a huddler, then became a chemist. Later he spent some time in travelling visiting Australia in 1852-54. He became a spiritualist and died in Rome, March 3, 1870. Howitt's works include *The Boy's Country Book*, *Rural Life in England* and *An Illustrated History of England*.

Howitt's wife, Mary Botham a Quakeress from Uttoxeter, whom he married in 1831, also wrote a good deal, her *Tales for Children* being extremely popular. The two collaborated to write *The Book of the Seasons* and several others. Mary Howitt joined the Church of Rome and died in Rome, Jan 30, 1888.

Howitzer Form of cannon adapted for discharging shells or heavy projectiles. It has a short barrel, a large bore, low muzzle velocity and high trajectory, and is used for firing over earthworks or other obstacles, and for the destruction of buildings.

Howth Watering place and urban district in Co. Dublin. It is to the north of Dublin, on Dublin Bay with a station on the G.N. (Ireland) Ry. The Hill of Howth, over 550 ft. high, is a prominent landmark. Pop 4000.

Hoxton District of London. In the borough of Shoreditch. It includes De Beauvoir Town. The chief industry is cabinet making.

Hoy One of the Orkney Islands. It covers 53 sq. m. There is a harbour on the south coast called Loag Hopo. Natural features are the pillar rock called the Old Man of Hoy and the Dwarfie Stone mentioned by Scott in *The Pirate*. Ward Hill, 1560 ft. high, is of interest to botanists.

Hoylelake Watering place of Cheshire. On the Irish Sea 0 m from Birkenhead on the L.M.S. Ry. It is noted for its golf links. It forms part of the urban district of Hoylelake and W. Kirby. Pop (1931) 16,628.

Hubert Frankish saint the patron of hunters. He was born in 652 of noble family. The story goes that when hunting he met a stag, bearing a cross between its horns. This converted him and he became a monk. Later he was made a bishop and having preached Christianity in the district of the Ardennes he died in 727. His feast is observed on Nov 3.

Huckleberry Fruit of several small shrubs indigenous to N. America. They resemble whortleberries and

cranberries. The most esteemed is the common black huckleberry, *Gaylussacia resinosa*.

Hucknall Torkard Urban district and market town of Nottinghamshire. It is 132 m. from London by the L.M.S. and L.N.E. Rlys., and 8 m. from Nottingham. The chief building is the church of S. Mary Magdalene, containing the tomb of Lord Byron who lived at Newstead Abbey. There are hosiery works and collieries. Here is an aerodrome. Pop. (1931) 17,338.

Huddersfield County, borough and market town of Yorkshire (W.R.). It stands on the Colne, 190 m. from London and 16 from Leeds, and is served by the L.M.S. Rly. and by canals. The making of woollen goods is the principal industry; there are also dyeworks, cotton mills and engineering works. Huddersfield has an important association football club, which won the Association Cup in 1922, and reached the final in 1928 and again in 1930. Pop. (1931) 113,467.

Hudson River of the United States. It rises in the Adirondack Mountains and flows through the state of New York to the Atlantic in New York Bay. The Mohawk is one of its tributaries, and Albany is the chief town. Towards its mouth the Hudson flows between New York and New Jersey, and on both sides are wharves and docks for steamers. It is crossed by tunnels and ferries which connect New York with Hoboken and other places in New Jersey.

The Hudson, which is navigable for 150 m., is connected by canal with Lake Erie and Lake Champlain. It is named after Henry Hudson, and its valley, now traversed by a main railway line, was the chief trading route between New York and Canada. It was important, too, during the War of American Independence.

Hudson Henry. English seaman. He was born in Queen Elizabeth's reign and made several voyages. On the third voyage he explored the Hudson River. In 1610, in the *Discoverie*, he reached Greenland and entered Hudson Bay. During the winter the crew mutinied owing to want of food. Hudson was put in a small boat with eight companions and set adrift (June 23, 1611), and nothing more was heard of him.

Hudson Bay Sea of Canada. It covers 567,000 sq. m. and is 1300 m. long and 600 broad. Several channels connect it with the Arctic Ocean and Hudson Strait with the Atlantic. Its southern part is called James Bay. It receives many Canadian rivers including the Churchill, Nelson, Rupert, Albany and Severn. During a good part of the year its navigation is impeded by ice. Churchill and Nelson are the chief ports.

Hudson Bay Company Trading company in Canada. It dates from 1670 when Charles II. gave a charter to Prince Rupert and others, bestowing upon them the lands around Hudson Strait and the sole trading rights therein. They formed the Hudson Bay Company which for 200 years owned vast tracts of land in the N.W. of Canada. Posts or trading stations were built and a trade in furs was carried on with the Indians. In 1749 the company's land was defined as all that was watered by the streams flowing into Hudson Bay. In 1821 it was united with a rival company and received a new charter. By this the company secured the sole right of trading with the Indians in

British Columbia. The area under its control was about 2,300,000 sq. m.

In 1869 the new Dominion of Canada decided to take over the vast area of land owned by the company. Terms were arranged and the company retained some 18,000,000 acres, and received a sum of money. It then became a limited liability company. Its business consists chiefly of collecting furs. Its headquarters are in London and it has large stores at Winnipeg and elsewhere.

Huggins Sir William. English astronomer. Born Feb. 7, 1824, in 1855 he built an observatory at Tulse Hill, London, and there did most valuable work. He was the founder of the science of astrophysics and his discoveries about the spectra and the physical qualities of the nebulae were of the highest importance. His wife, Margaret Lindsay Murray, helped in this work. Huggins, who died May 10, 1910, was President of the Royal Astronomical Society, 1876-78, of the British Association, 1891 and of the Royal Society, 1900-05. Made a K.C.B. in 1897, he was given the Order of Merit in 1902. Lady Huggins died March 24, 1915.

Hugglescote Town of Leicestershire. It is a mining centre, 6 m. from Ashby de la Zouche and 113 from London, on the L.M.S. Rly. Pop. 5600.

Hugh English saint. Born about 1135 at Avalon in France, he became a monk. He crossed over to England and was made head of a Cistercian monastery in Somerset. In 1186 he was made Bishop of Lincoln and he died Nov. 16, 1200. He was canonised in 1220 and his day is Nov. 17. Hugh is remembered in English history for his refusal to send knights to serve Richard I. abroad.

Hughenden Village of Buckinghamshire. It is 2 m. from High Wycombe. Disraeli lived and died here. He bought the estate in 1848 and on his death it passed to his nephew Coningsby Disraeli.

Hughes Charles Evans. American politician. Born April 11, 1862, the son of a Baptist minister he was educated for the law and began to practise in New York. From 1891-93 he was Professor of Law at Cornell University. In 1907 he was chosen Governor of New York, and three years later was made a judge. A candidate for the Presidency in 1916, he was beaten by Wilson. From 1921-25 he was Secretary of State under Harding and presided over the Armaments Conference at Washington in 1921. He became Chief Justice in 1930.

Hughes David Edward. English inventor. Born in London, May 16, 1831, he went to the United States as a boy. Educated in Virginia he was for a few years Professor of Music and then of Natural Philosophy at a college in Kentucky. In 1855 he invented a type printing telegraph which was taken up in most of the countries of Europe. His later inventions included the microphone and the induction balance. He died Jan. 22, 1900, and in May, 1931, the centenary of his birth was celebrated.

Hughes Hugh Price. British preacher. Born at Carmarthen, Feb. 8, 1847, the son of a doctor, he took his M.A. degree at London University. Later he entered the Wesleyan ministry where his almost boundless energy and preaching power quickly made him prominent. In 1887 he started the

W London Mission in S. James's Hall Piccadilly where he preached to great audiences. He travelled over the country speaking on temperance and other causes. In 1885 he founded the *Methodist Times* which he edited until his death Nov 17 1902

Hughes Richard Fennell's writer born in 1900. In 1922 his first play *The Sisters Tragedy* was produced. He also wrote *A Comedy of Good and Evil* several plays for broadcasting purposes and many poems. In 1929 his successful novel *A High Wind in Jamaica* was published and in 1931 *The Spider & the Palm* (stories for children).

Hughes Thomas English writer Born at Uffington Berkshire Oct 20, 1822 he was educated at Rugby and Oriel College Oxford. He became a barrister and in 1852 was made a county court judge. From 1865 to 1874 he was a Liberal MP and he was associated with Kingsley and Maurice in the Christian Socialist movement. He died March 22, 1896.

Hughes is immortal as the author of *Tom Brown's School-days* published in 1857 and largely autobiographical of his own life at Rugby. He also wrote *Tom Brown at Oxford* and *The Scouring of the White Horse*.

Hughes William Morris Australian politician Born in Wales Sept. 25 1864 the son of a joiner he became a teacher, but in 1881 emigrated to Australia. There he worked on a sheep farm before settling in Sydney where he became associated with the waterside workers. Prominent during the great strike in 1896 he organised a trade union of which he became secretary and then president. In 1891 he was elected to the legislature of New South Wales. In 1901 he was elected a member of the first Commonwealth Parliament and in 1904 was made Minister for External Affairs. In the Labour Government in 1908 having been a barrister since 1903 he was made Attorney General a post he filled until 1909 and again from 1910 13, and from 1914 21.

In 1915 Hughes succeeded Fisher as Prime Minister and he filled that post through the years of the war. He attended the Peace Conference in Paris where he forcefully upheld Australia's case. In 1923 he resigned office but retained his seat in Parliament. In 1929 he formed what was called the Australian Party, which came to an end in 1931. Entered the reconstructed cabinet of Mr Lyons Oct 1934 and retained his post in the Coalition Government until Nov 1935, when he was obliged to resign on account of divergent views on sanctions. He rejoined the Federal cabinet however in Feb 1936 as Minister for Population after indicating adherence to the Government's policy. In 1929 he published his book *The Splendid*

volumes of verse were produced regularly, the best being *Les Voix Intérieures* also books dealing with the events of his own time, such as *L'Histoire d'un Criminel* and *Napoleon le Petit*. Others were of an autobiographical nature, yet others were humanitarian in tone.

Appart from his writings Hugo lived an eventful life. He married in 1822 but his wife soon preferred the society of Sainte Beuve, and he lived with an actress, Juliette Drouet. He took an active part in politics. First a royalist, he gave his support to Louis Napoleon until 1818. In that year and 1819 he was elected to the constituent and the legislative assemblies and in 1851 having opposed the designs of the future emperor, he fled the country. He went to Brussels, whence he was expelled and then to Jersey before making his home at Hantoville House Guernsey where he passed much of his later life. The life and scenery of Guernsey gave colour to his later books. In 1870 71 he was in Paris and in 1876 he was chosen a member of the Senate. He died May 22 1885.

Huguenots Name used for the French people who accepted the reformed religion. They came into existence in the 16th century and included many nobles. Until his conversion, Henry IV was a Huguenot. The Huguenots were persecuted and their resistance led to religious wars. In 1598 by the Edict of Nantes they were granted civil and religious liberty, but the Edict was revoked in 1685 and many Huguenots emigrated to England the Netherlands and Germany. In 1789 the restrictions on their worship were removed.

Hull City and seaport of Yorkshire (E.R.) In full, Kingston upon Hull. It stands on the Humber, just where the River Hull falls into the estuary, and is 172 m from London. It is on both the L.N.E. and L.M.S. Rlys., and a steam ferry connects it with New Holland in Lincolnshire.

Hull owes its prosperity to its position. The docks cover 250 acres and a large trade passes through the port. Much timber is imported and the fisheries are important. Steamers go from here to ports on the Continent. The city has large flour mills cement works chemical works, and seed crushing mills and here Reel it and Sons have their works. There is a university college, opened in 1928 and a technical college. It has an aerodrome at Hedon. The museums include one named after William Wilberforce and there is a fine art gallery. Pop (1931) 313 366.

Hull City of Quebec Canada On the Ottawa river. It is 119 m from Montreal and is served by the C.P.R. and a system of electric railways. Bridges connect it with Ottawa. Hull is a centre of the lumber industry and its activities include the making

collieries Pop (1931) 7878 The other two are Middle and Over Hulton

Humanism Term used for learning, especially a knowledge of literature It arose at the time of the Renaissance and the early humanists included Sir Thomas More and Erasmus

Humanitarian Word used loosely for a philanthropist. It meant originally one who did not believe in the divinity of Christ

The Royal Humane Society at 4 Trafalgar Square, London, W.C., is concerned with rewarding those who save life, especially at sea

Humber Estuary of the east coast of England It is formed by the rivers Trent and Ouse which unite near Goole It is about 38 m in length There is a ferry between Hull and New Holland in Lincolnshire, and it is proposed to build a bridge

Humbert I. King of Italy Born in Turin, March 14, 1844, he was the eldest son of Victor Emmanuel, who became king of united Italy in 1870 He took part in some of the fighting of the period, and in 1878 became king, reigning until he was killed at Monza by an anarchist, July 29, 1900 He was succeeded by his son, Victor Emmanuel III

Humble Bee Widespread genus of bees (*bombus*). Humble bees live in communities and are found in the warmer parts of the world The females and the neuters help to construct the irregular nest, where honey is stored for the females, who alone survive in the winter The common *B. terrestris* forms nests of carded moss, the stone humble bee, *B. lapidarius*, forms nests in cavities They are sometimes called bumble bees.

Humboldt Baron von German scientist. Born in Berlin, Sept. 14, 1769, Friedrich Heinrich Alexander Humboldt, the son of aristocratic parents spent his early years in study and travel, afterwards becoming a mining official In 1799 he went to S America exploring and ascended 19 000 ft up Chimborazo In 1829 he explored in Asia. In 1845 he published the first volume of his influential *Cosmos* Three other works followed and their appearance marks a stage in the history of the scientific knowledge of the earth He also wrote 30 volumes on his travels in S America, besides books on other subjects His last years were passed in Berlin. He died May 6 1859

Humboldt's elder brother Karl Wilhelm von Humboldt, became a diplomat and represented Prussia in Rome and Vienna From 1808-10, he was Minister of Education and he was responsible for the foundation of the University of Berlin A great student, especially of language and literature he died April 8, 1835

The Humboldt current is a current that flows from Valparaiso to Ecuador along the coast of S America

Hume David Scottish writer and thinker Born in Edinburgh, April 26 1711 he was educated there and in France by the Jesuits He was trained for the law, but turned to literature and in 1737 wrote *A Treatise of Human Nature* *Essays Moral, Social and Political* followed, and in 1751 *Inquiry into the Principles of Morals* In 1752 he was appointed librarian to the Advocates Library, Edinburgh and wrote his famous *Political Discourses*, then, between 1754 and 1762, his *History of England*, which gave him a great reputation He died in Edinburgh, Aug 25, 1776

Hume's writings exercised a great deal of influence, although they were suspect to many Christians In philosophy he was a utilitarian and he put forward the doctrine of Free Trade which was taken up by Adam Smith

Hume Joseph British politician. Born in Montrose, Jan 22, 1777, he became a doctor and served in the army After a period as a surgeon under the East India Co., in which he made a fortune, he returned to England in 1808 In 1812 he was elected M P for Weymouth and he sat in the House of Commons for the remainder of his days, representing Montrose from 1842 He died Feb 20 1855 Hume was one of the first of the Radicals and advocated reform of almost every kind, financial legal and economic

Humerus Upper bone of the arm It articulates with the scapula or shoulder blade, forming the shoulder joint, and with the radius and ulna at the elbow The shoulder joint, held in a fibrous capsule, forms a ball and socket joint which, in man, allows a great swing of movement of the arm.

Humidity In meteorology the state of the atmosphere as regards the degree of moisture it contains Low humidity is when the air is dry and high humidity when excessive water vapour is present The humidity of the British Isles varies greatly between day and night, but seasonal variation is relatively small The amount of water vapour in the atmosphere is measured by the hygrometer (q.v.), and expressed in inches of mercury as absolute humidity

Humming Bird Large family of American birds allied to swifts They make a humming sound when vibrating the wings in rapid flight. There are about 500 species, found in tropical regions Many have brilliant plumage, but little or no song They feed mostly on insects which they collect from flowers by their long tongues

Humogen Form of humus It is prepared by the inoculation of peat by certain forms of aerobic bacteria causing decomposition of the peat into a material consisting largely of ammonium humate When humogen is applied to soils, nitrogen fixing bacteria are introduced and the soil is rendered more fertile by the action of these micro-organisms

Humour Sense of fun, appreciation of anything that is comical or witty Its early meaning was different The ancients believed that in man there were four humours, blood, choler, phlegm and melancholy A man was sanguine, or bilious, or phlegmatic, or melancholy, according as one or the other predominated in his constitution.

When the word began to be used in its modern sense the word humorist was given to a man of letters who was able by his writings to amuse. Rabelais and Dickens are among the world's greatest humorists Tom Hood was another, and many have been associated with *Punch* The word also came to be applied to artists who possessed the same power, prominent among whom was John Leech

Thackeray in his *English Humorists* gave a somewhat wider meaning to the word A humorist should be distinguished from a wit. Sydney Smith was a wit, but hardly a humorist.

Humperdinck Engelbert German composer Born at Siesburg, Sept. 1, 1854, he studied at Munich and in Italy, and helped Wagner to produce

Parsifal He became professor of composition at Frankfurt, moving to Berlin in 1900. His works are frequently based on peasant music, notably his delightful children's opera, *Hansel and Gretel*. He died Sept. 27, 1921.

Hunchback Deformity sometimes seen in men and women. It is due to a curvature of the spine, which in turn arises from tuberculosis. It is incurable, although treatment may prevent it from getting worse. There are many hunchbacks in legend and fairy lore. In real life Richard III was notable.

A variant of the word is humpback. A kind of whale black in colour and valued for its oil, is called the hump-back whale on account of its shape.

Hundred Name used for a division of many English counties. It goes back to Anglo-Saxon times when we hear of hundred courts and hundred men. These lasted until the end of the Middle Ages, but until 1886 the hundred was liable for damage done to property by rioters. The hundreds still exist and the word is occasionally used.

In Lincolnshire and other parts of England where Danish influence was strong the equivalent is wapentake. In Sussex and Kent it is rape or latho, and in Northumberland and Cumberland it is ward. The name may have meant that 100 families lived in the district or that it contained 100 hides of land.

Hundred Days Name given to the period between Napoleon's escape from Elba and his surrender after Waterloo. It lasted from March 20, when he entered Paris to June 28, 1815.

Hundred Years' War Struggle between England and France. It began in 1338 when Edward III claimed the throne of France. The English won victories at Crecy and Poitiers and in 1360 peace was made at Breigny. By this Edward secured much of France, but not the crown. The war began again in 1369 and lasted with intervening truces until 1396. By the treaty of 1396 the English lost a good part of their possessions.

Another period of warfare began in 1403. In 1415 Henry V claiming the throne of France made it a more serious affair. He won the Battle of Agincourt, conquered Normandy and in 1420 by the treaty of Troyes was recognised as Regent and future King of France. However, part of the nation objected to English rule and the war went on until 1429 when the tide turned on the arrival of Joan of Arc. The English then steadily lost ground and the struggle ended in 1453, all France, except Calais, being lost.

Hungary Kingdom of Europe. In its present form it dates from 1919 when it was separated from Austria. Its area is 38,875 sq. mi. and it lies between Austria, Czechoslovakia, Rumania and Yugoslavia. The Danube, the chief river, flows from north to south. Balaton is the largest lake. The capital is Budapest. The next largest places are Szeged and Debreczen. About 90 per cent. of the people are Magyars.

The surface is almost uniformly level and with a fertile soil agriculture is the main industry. Wheat, maize, rye, barley and potatoes are grown in large quantities. Coal is mined and there are considerable forest areas. The country has a good system of railways. Its outlet to the sea is along the Danube, on which there are river ports.

The throne being regarded as vacant till the people shall be freed from external pressure Hungary is governed by a regent with a legislature of two houses. There is an army, limited by treaty to 35,000 men, but no navy or air force. Pop. (1930) 8,688,349.

HISTORY Hungary became a kingdom about 1000, Stephen, who was made its patron saint, being the first king. For 500 years it was ruled by his successors, much of their time being passed in warfare with the Turks. In 1526 King Louis was killed in battle, and Ferdinand, Archduke of Austria, who had married his sister, became king. This united Hungary with Austria and from 1867 till 1918 the two formed the dual monarchy, or empire, of Austria-Hungary. In 1918 the Emperor Charles was deposed and a republic was proclaimed. The Bolsheviks became supreme, but were soon driven out, and after much trouble the present system of a monarchy without a monarch, was established.

In the 19th century Hungary covered 120,000 sq. mi. The Treaty of Trianon, however, gave much of this to neighbouring states, leaving the new Hungary less than a third the size of the old one. The losses included a coast line. On the other hand Hungary was made a homogeneous state. Previously the rivalries between Magyars and Germans had been a source of trouble. The reduction of Hungary's area, however, has caused much unrest.

Hungerford Market town of Berkshire. It stands on the River Kennet, 26 mi. from Reading, on the G.W. Rly. At Hockliffe, the second Monday or Tuesday after Easter, an annual festival is held. The town has an agricultural trade and is a fishing centre. Pop. 2784.

Hungerford Name of a famous English family. Sir Walter Hungerford was made a baron in 1426. The title was held later by the earls of Huntingdon and the marquesses of Hastings. It fell into abeyance in 1808 and again in 1920. Since 1921 it has been held by Viscountess St. Davids.

The family had a house near Charing Cross and in the grounds a market was built in 1009. It was called Hungerford Market and lasted until 1802. The bridge across the Thames here is called Hungerford Bridge.

Huns Horde of Asiatics who invaded Europe in the 4th century, doing great damage. After a career of conquest under Attila they were defeated in 451 at Châlons by Theodoric, King of the Visigoths. Soon afterwards they disappeared. They gave their name to Hungary.

Hunstanton Watering place and urban district of Norfolk. It stands on the Wash, 112 mi. from London on the L.N.E. Rly. Near is the village of Old Hunstanton with a fine church. The hall has been for centuries the seat of the family of Le Strange. Pop. (1931) 3131.

Hunt Name used for a body of men, with accompanying dogs that hunt wild animals. The chief are the fox that hunt the fox, but there are also hunts for stags and otters. The chief English hunts include the Quorn, Weymouth, Cottingham, Pychley and Belvoir. Each has a master (M.F.H.), a chief whip and other whips and a pack of hounds. The expenses are usually met by subscriptions, but a few hunts are maintained by individual noblemen.

Hunt James Henry Leigh, English writer. Born at Southgate, London, Oct. 19,

1784, the son of Isaac Hunt, a clergyman from Barbados, he soon began to write, and in 1808 became editor of the *Examiner*, a paper started by his brother. In it he gave utterance to advanced views, and for a libel on the Prince Regent, whom he called "a corpulent Adonis of 50," he was sent to prison for two years in 1813. In 1821 he went to Italy to visit Shelley and Byron, and was there when Shelley was drowned. With Byron he started a quarterly magazine called the *Liberal*, but it soon died. With his wife and seven children he returned to London in 1825, and lived in poverty there until his death at Putney, Aug. 28, 1859.

Hunt was friendly with most of the great literary figures of his day. He himself wrote essays, poems and novels, as well as *Lord Byron and Some of his Contemporaries* and an *Autobiography*. *The Feast of the Poets*, *The Story of Rimini*, *Wat and Humour*, and *Imagination and Fancy*, contain some of his best work.

Hunt

William Holman. English painter. Born in London, April 2, 1827, he was a clerk before entering the Royal Academy schools. Soon he began to exhibit and in 1848 he assisted D. G. Rossotti, John E. Millais and others to found the Pre-Raphaelite brotherhood, on which, many years afterwards, he wrote a book. In 1905 he was given the Order of Merit and he died in London, Sept. 7, 1910.

Holman Hunt's best picture, though perhaps over elaborate, is "The Hireling Shepherd" in Manchester. "The Light of the World" is in Koble College, Oxford, and a copy is in St. Paul's Cathedral. "The Triumph of the Innocents" is in Manchester, and "The Finding of Christ in the Temple" in Birmingham. Others are in the Tate Gallery, London.

Hunter

John Scottish surgeon. Born in Lanarkshire at Long Calderwood, Feb. 13, 1728, he was for a time in business in Glasgow. About 1745 he followed his brother, William, to London, where he studied at the hospitals and assisted in his brother's surgical work. He became a surgeon at St. George's Hospital and gained further experience as an army doctor between 1760 and 1763. In 1763 he began to practise in Golden Square, London, and was soon one of the leading surgeons of the day, being made surgeon extraordinary to George III, and deputy surgeon general of the army. He was elected an F.R.S. He died Oct. 16, 1793, and is buried in Westminster Abbey.

Few names stand higher in the medical profession than that of Hunter. His operation for aneurism made him known, but he was much more than a skilled surgeon. He made an anatomical collection and his 10,000 specimens, for which he built a museum in Leicester Square, London, were bought and given to the Royal College of Surgeons. He also wrote books on geology and other branches of science. In 1813, in his honour, the College of Surgeons founded the Hunterian Oration, which is still given annually. He is also remembered by the Hunterian Society.

William Hunter (1718-83) was physician to Queen Charlotte and Professor of Anatomy at the Royal Academy. He, too, formed a collection and built a museum, which became the property of the University of Glasgow.

Hunter

Sir Archibald. British soldier. Born, Sept. 6, 1856, he was educated at Glasgow Academy, and entered the army. In 1884 he went to Egypt, where he became associated with Kitchener. In 1895 he was given command of the Frontier Field Force.

In 1898 he led a division at the Battle of the Atbara and was in command of the British division at Omdurman, being then made Governor of that place. He was knighted in 1898. In 1900-01 he commanded a division in S. Africa, in 1901-03 he was commander-in-chief in Scotland, and from 1904-09 he was in India, first at the head of an army corps and then of the southern army. From 1910-13 Hunter was Governor of Gibraltar. During the Great War he held high command at home until he retired in 1918. From 1918-22 he was Unionist M.P. for the Lancaster division.

Hunter's Moon

Month after the harvest moon, which is the full moon nearest the autumnal equinox. The hunting season succeeds harvest time.

Huntingdon

Borough and market town of Huntingdonshire, also the county town. It stands on the Ouse 60 m. from London on the L.N.E. Rly. Notable buildings are the George Inn with its gallery in the courtyard and Cromwell House, a reminder of the town's association with the Protector's family. Pop. (1931) 4108.

Huntingdon

Countess of. Selina, daughter of Earl Ferrers, was born in 1707 and in 1728 married the Earl of Huntingdon. About 1739 she became a follower of John Wesley. She made George Whitefield her chaplain, and soon after her husband's death began to build chapels. Later she formed a separate denomination called the Countess of Huntingdon's Connexion, and founded a college for training ministers at Talgarth. When she died, June 17, 1791, there were 64 chapels in her Connexion. This is now part of the Congregational denomination.

Huntingdon

Earl of. English title held by the family of Hastings. For a long time the earldom of Huntingdon was held by the kings of Scotland, but this arrangement ended about 1330. In 1529, George, Baron Hastings, was made earl and the title still remains with his descendants. The earl's eldest son is called Viscount Hastings.

Huntingdonshire

County of England. After Rutland, it is the smallest in the east of the country. Its area is 366 sq. m. The land is flat and the soil fertile, wheat and barley being grown. Huntingdon is the county town, other towns are St. Neots, St. Ives and Godmanchester. The chief river is the Great Ouse, the Nen forms the northern boundary. The railways are the L.M.S. and L.N.E., and the county is traversed by the Great North Road. Pop. (1931) 56,204.

Huntingtower

Village of Perthshire. It is on the River Almond, 3 m. from Perth, and is famous for its castle. This was originally Ruthven Castle, and from it James VI. was taken forcibly by the Earl of Gowrie and his associates in 1582. The name of the castle was then changed. Now partly a ruin it is open to visitors. Huntingtower gives its name to a novel by John Buchan. The village has bleaching yards.

Huntly

Market town of Aberdeenshire. It is 41 m. from Aberdeen, at the union of the rivers Deveron and Bogie, on the L.N.E. Rly. The castle, once a seat of the Gordons, is in ruins. The district around Huntly is called Strathbogie. Huntly is an agricultural centre. Pop. 3750.

Huntly

Marquess of. Scottish title held by the family of Gordon. In 1449

Alexander Seton a grandson of Sir Adam Gordon was made Earl of Huntly, and took the name of Gordon. The succeeding earls, who had extensive lands in Aberdeenshire and lived at Huntly Castle, were persons of note in Scottish history. Two of them being Lord Chancellor. In 1599 George Gordon, the 6th earl, was made a marquess. George, the 2nd marquess was executed in 1649 for his loyalty to Charles I. In 1661 George, the 4th marquess, was made Duke of Gordon. This title became extinct in 1836, when a distant kinsman, George Gordon, became Marquess of Huntly. The title still remains in his family. The seat of the marquess is Aboyne Castle in Aberdeenshire and his eldest son is called the Earl of Aboyne. The marquess ranks as the premier marquess of Scotland.

Hunyadi Janos Hungarian statesman and general. Born about 1387 he won renown in the Hussite Wars and for some time governed his country as regent. From 1441 onwards he won brilliant victories against the Turks and was largely instrumental in saving Constantinople and maintaining Hungarian independence. He died in harness, Aug. 11, 1456.

Huonpine Evergreen tree of the natural order *coniferae*. Allied to the yew. It grows to a height of 100 ft. The wood is close grained and has an aromatic odour. It is found chiefly in Tasmania.

Hurdle Interlaced frame of twigs or sticks. Hurdles are used to make pens for sheep and for other such purposes or for games. Formerly prisoners were dragged to execution tied to a hurdle.

Races over hurdles are events at most athletic sports. The usual lengths are 120, 220 and 440 yds. Hurdle races for horses are also held.

Hurlford Town of Ayrshire. Near Kilmarnock. It is situated on the Irvine, and is 389 m. from London by the L.M.S. Ry. There are coal mines near, and worsted is made. Pop. 3825.

Hurlingham District of London. It is in the borough of Fulham adjoining the Thames. In 1867 the club called the Hurlingham Club was formed here. It bought Hurlingham House and grounds and was for some time a centre of pigeon shooting. Later it took up polo and is now the recognised authority on this game.

Hurley Irish ball game often called hockey which has developed from it. The implements are a ball and stick with ends much wider and flatter than those of a hockey stick. The game is played usually by 15 a side and a goal is scored when the ball is driven into the net as at association football. A goal counts three points. If the ball is sent over the goal post but between the uprights one point is scored. The players may in addition to kicking the ball carry it on the blade of the stick.

Huron One of the five great lakes of N. America. It covers 23,200 sq. m. and is 207 m. long. Partly American and partly Canadian it includes Georgian Bay and Saginaw Bay. It is connected with Lake Superior by the Sault Ste. Marie Canal to Lake Erie by the St. Clair and Detroit rivers and to Lake Michigan by the Strait of Mackinac. The largest island in it is Grand Manitoulin which is on the Canadian side. The ports include Bay City, Sarnia and Goderich. The

name Huron is that of a group of Indian tribes once living in Ontario.

Hurricane Violent tropical storm accompanied by sudden changes of the wind. It is common in the W. Indies, chiefly during August and September. Hurricanes seldom occur in the S. Pacific and are unknown in the S. Atlantic. They are generated as small cyclones of slow motion with steep gradients along the polar margin of the Equatorial belt.

Hursley Village of Hampshire. It is 5 m. from Winchester. Hursley Park, long the seat of the Heathcote family, is the successor of the house in which Richard Cromwell lived.

Hurst Castle Building in Hampshire. It stands at the western end of the Solent 4 m. from Lymington, and is the property of the Admiralty. It was built in the 16th century to guard the Solent. On the promontory is also a lighthouse and a signalling station. Charles I. was imprisoned here in 1648.

Hurstonceaux Village of Sussex. It is 12 m. from Eastbourne. Its feudal castle, long a ruin, was restored in the 20th century. All Saints is an old church with memorials to the families of Fionnes, Daere and Haro.

Hurst Park Racecourse in Surrey. It is at Molesey. Hurst on the Thames. Opposite to it, on the Middlesex side of the river, is Hampton.

Hurstpierpoint Village of Sussex. It is 8 m. from Brighton and 2 from Hassocks, its station on the S. Ry. Holy Trinity Church is a fine modern building. Here is St. John's College, a public school for boys.

Husband Married man. Until recent times husband and wife were in very different positions before the law of England, as they were, and to some extent are, in other countries. To day they are in many respects equal. Since 1870 a married woman's property has been distinct from that of her husband. The grounds on which divorce can be obtained are now the same for both sexes. Until 1923 a wife could not obtain a divorce for adultery unless it was accompanied by cruelty.

A husband is responsible for his wife's debts, as far as they are for household necessities, and for maintaining her in her station in life. Husbands can, however rid themselves of this responsibility by making an announcement to tradesmen, usually through the Press, to that effect. A husband is responsible for damage if his wife libels or slanders any one.

The word husbandman is sometimes used for a farmer and farming is called husbandry. A ship's husband is a man who looks after the fittings, etc. of the ship.

Huskisson William. English statesman. Born in Worcestershire. March 11, 1770, he entered Parliament in 1790, and in 1801 Pitt made him Secretary to the Treasury. In 1814 he was made Commissioner of Woods and Forests. In 1823 President of the Board of Trade, and in 1827 Secretary for the Colonies. He left office in 1828 and was killed Sept. 15, 1830, at the opening of the Liverpool and Manchester Ry. Although a Tory, Huskisson was something of a Free Trader. He brought about the removal of certain import duties and the relaxation of the navigation laws.

Huss John Bohemian reformer. He was born about 1370 the son of a

peasant, and was named after his birthplace, Husinetz. He became a priest and in 1402 was made Rector of Prague University. His strong character made him a champion of the Czechs against the Germans, but he is better known for his reforming zeal. His preaching of Wycliffe's doctrines aroused the anger of the authorities, and he was charged with heresy. However, he had by now a numerous following and, in spite of a Papal interdict on the city and his own excommunication, he continued to preach. Gradually his position became more difficult and in 1412 he retired from Prague and wrote his chief work, *De Ecclesia*. In 1414 the Emperor Sigismund gave Huss a safe conduct to attend the Council of Constance. He went and was at once arrested as a heretic, was tried, condemned on July 5, 1415, and on the next day was burned. See HUSSITES.

Hussar Name given to certain kinds of cavalry. It is a Hungarian word meaning a freebooter and the first hussars were Hungarian soldiers. They wore a busby, which is still worn by the hussar regiments in the British, German and other armies.

Before the Great War there were 12 regiments of hussars in the British Army, now there are only nine. These are the 3rd, 4th, 7th, 8th, 10th, 11th, 13th and 18th, 14th and 20th, 15th and 19th, the last mentioned three being amalgamations.

Hussein King of the Hejaz. He was an Arab chief and as grand sheriff ruled the district around Mecca as a vassal of Turkey. In 1916, assisted by Great Britain, he declared himself independent. His troops, under his son, Faisal, entered the war against Turkey, and soon Hussein was recognised as King of the Hejaz. His rule lasted until 1924, when Mecca was taken by the Wahabis and he abdicated. He died June 4, 1931.

Another Hussein was the first Sultan of Egypt. A son of Ismail Pasha, he was made sultan in 1914 when Egypt passed under British protection. His reign ended with his death, Oct. 9, 1917.

Hussites Followers of John Huss. After his martyrdom in 1415, his followers, already formidable, became important politically. Under John Zizka and other leaders they made war for several years on the Emperor Sigismund. In 1431 peace was made by the Calixtines, one of the two parties into which they were divided, the other, the Taborites, refused to come to terms until some years later. They are now known as the Bohemian Brethren.

Hustings Platform used in England at elections before the introduction of secret voting. It was erected in front of the town hall and from it the candidates delivered speeches when nominated. The scene before the hustings is described by Dickens in *The Pickwick Papers* and pictorially by Hogarth.

Hutchinson John. English soldier. A son of Sir Thomas Hutchinson of Owthorpe, Nottinghamshire, he was born in Sept. 1615. In 1642 after studying law, he joined the Parliamentary forces and was made Governor of Nottingham Castle, which he defended until the end of the struggle. He was M.P. for Nottingham in the Long Parliament, was one of the judges of Charles I., and a member of the first Council of State. He was less prominent during the Commonwealth period, but was a member of Parliament in

1659 and 1660. In 1683 he was arrested in connection with a plot against Charles II., and he died in prison, Sept. 11, 1684.

Hutchinson is known through the delightful *Memoirs of Colonel Hutchinson*, written by his wife, Luov, daughter of Sir Allen Apsley. In this he is represented as the ideal Puritan gentleman.

Hut Circle Remains of a prehistoric round dwelling. Many British examples survive. At Glastonbury there are 90 with centre posts supporting thatched roofs. Grimspound, on Dartmoor, has 21. Carn Bree, Cornwall, has 100. Ty Mawr, Holyhead, includes more than 50. There are many in Anglesey.

Huth Library Collection of books formed by Henry Huth (1815-78), and augmented by his son Alfred Henry Huth (1850-1910), members of a firm of London bankers. It contained early printed English, Spanish and German Bibles, books of voyages and poetry, besides MSS. and prints. The son bequeathed to the British Museum a choice of 50 items. Alexander Cochrane purchased for the Yale University Elizabethan Club 43 Shakespearean folios and quartos, reputedly for £50,000. The remainder were auctioned in 1911-20, and realised large sums.

Huthwaite Urban district of Nottinghamshire. It is 3 mi. from Mansfield and electric tramways link it with Sutton-in-Ashfield. It is a coal mining centre. Pop. (1931) 5092.

Hutten Ulrich von. German writer. Born April 21, 1488, and educated at the abbey of Fulda, he studied law at Bologna and was secretary to the Archbishop of Mainz. He began to write against the Roman Catholic Church and had to seek refuge with the Protestants. Hutten is best known by his *Epistolae Obscurorum Virorum* (Letters of Obscure Men), satires on the ignorance of the monks, and his *Dialogues*, attacks on the Pope and the Church. He died Aug. 28, 1523.

Hutton Richard Holt. English journalist. He was born in Leeds, June 2, 1826, and educated at University College, London, and abroad. In 1851 he became editor of the *Enquirer*. Later he was joint editor of the *National Review*, and assistant editor of the *Economist*. At the same time (1856-1865) he was Professor of Mathematics at Bedford College, London. In 1860 began his long connection with the *Spectator*, which he helped to control until his death, Sept. 9, 1897.

He wrote on theological subjects and contributed to the *Spectator*.

Huxley Aldous Leonard. English novelist. Born July 26, 1894, he was a son of Leonard Huxley, editor of the *Cornwall Magazine* and grandson of T. H. Huxley. He was educated at Eton and Balliol College, Oxford, and soon began to write for the Press. In 1916 a novel, *The Burning Wheel*, appeared and others followed. Perhaps the best known are *The Defeat of Youth*, *Chrome Yellow*, *Little Mexican*, *Jesting Pilate* and *Point Counterpoint*, and his essays, *Music at Night*. In 1932 appeared *Brave New World*.

Huxley's elder brother, Julian Sorell Huxley, was born June 22, 1887, and educated at Eton and Oxford, becoming a scientist. He was in the United States 1912-16 and in 1919 was made Fellow and Lecturer at New College, Oxford. From 1925-27 he was Professor of Zoology at King's College, London, and in

1926 was made Tullerian Professor of Physiology at the Royal Institution. He succeeded Sir Peter Chalmers Mitchell as Secretary of the Zoological Society. Huxley has done extremely valuable work in biology.

Huxley Thomas Henry English scientist. Born at Ealing May 4, 1825, he became a medical student. In 1846 he secured an appointment as assistant surgeon on H.M.S. *Rattlesnake* was engaged for three years on surveying work in Australian waters, and on his return published some papers recording his discoveries about ocean life. In 1851 he was made an F.R.S., and in 1854 Professor of Natural History at the Royal School of Mines. In 1863 he was made Professor at the College of Surgeons and the Royal Institution and from 1881-85 he was Inspector of Salmon Fisheries. He was President of the British Association and other learned societies, and in 1892 was made a Privy Councillor. He died June 29, 1895.

Huxley wrote a number of scientific works also some popular books on scientific subjects. These included *Lay Sermons and Essays on Contradictory Questions*. An authority on animal life and a champion of evolution, Huxley was one of the foremost scientists of the 19th century.

Huysmans Joris Karl French novelist of Dutch extraction. Born in Paris Feb. 5, 1848 he was a stern realist, as is shown in his early works notably *La Merveille* (1881) but his later works display a transition from Satanism towards religiousism in *Durtal* a character who appears in *La Bas* and *L'Obélisque*. He was much influenced by the de Goncourts who admitted him to their academy. He was converted to Catholicism and died a mystic, May 13 1907.

Huyton Urban district of Lancashire called Huyton with Roby. Huyton is 5 m. from Liverpool and is a junction on the L.M.S. Rly. Near its Knowsley the seat of the Earl of Derby. Pop. (1931) 5198.

Hwang Ho River of China sometimes called the Hoang Ho. It rises in Tibet and flows through China to the Pacific Ocean in the Gulf of Chihli where it enters the sea by a great delta. Its chief tributary is the Wei ho. In many places the river is above the level of the surrounding country. Its waters being confined by embankments. On several occasions the river has changed its course.

Hyacinth Hardy bulbous herb of the lily order. It has been cultivated especially in Holland since the 16th century for its sweet scented flowers. It was derived from a Levantine plant *Hyacinthus orientalis*. Growers have produced single and double blooms in red blue purple yellow and white both for indoor and bedding culture. Single and double forms also occur.

Hyacinth Transparent red variety of the mineral zircon or silicate of iron. It is known also as jacinth and is valued as a gem stone. Its colour probably being due to traces of iron oxide. It is found in sands and gravels in Ceylon and Central France and is a decomposition product of granitic rocks.

Hyacinthus In Greek mythology the son of Amvelas and a Spartan king. He was very beautiful and was loved by Apollo. He was killed when the two were playing together and the story goes that the flower called after him the hyacinth sprang

from his blood. A festival called the Hyacinthia was held in his honour in Sparta.

Hyades Maidens in Greek mythology. Zeus entrusted them with the care of Dionysus and they were afterwards placed among the stars. The name is now that of seven stars. The word means rain.

Hyaena Family of carnivorous mammals allied to the civets. They are slagger, with powerful jaws and short tails. The hind limbs are shorter than the fore limbs and all are four-toed. The striped, or laughing, hyaena is found in Asia and Africa. The brown and spotted in Africa. Hyaenas feed at night on carrion.

Hyalite Transparent colourless and glassy variety of opal. It occurs as small botryoidal or mammillary incrustations in cavities in basalt. Fine specimens occur at Walsch in Bohemia.

Hybrid Term applied to an animal or plant produced by crossing two different species or varieties. Usually among animals the hybrid is sterile, although the result of the first crossing of different breeds or races is commonly great sturdiness or 'hybrid vigour' shown in greater strength, size, and often resistance to unfavourable conditions. In 1932 an experiment in hybridism was successfully carried out on an island antelope being mated with a domestic cow.

Hydaspes Old name for the Indian river Sutlej. On its banks Alexander the Great won a famous victory.

Hyde Borough and market town of Cheshire. It is on the river Tame, 181 m. from London and 7½ from Manchester, on the L.M.S. Rly. Here are engineering works and also hat factories and cotton mills. Pop. (1931) 32,066.

Hyde Park Park in London. It lies between Park Lane, Knightsbridge, Kensington Gardens and Bayswater Road. In it are the Serpentine, an artificial lake used for bathing and boating, Rotten Row, used for riding, and a bird sanctuary. Another feature is the garden called the Dell. The flower beds are very beautiful. The park covers 360 acres and is entered at the eastern end by five gateways, one at Hyde Park Corner and another called the Marble Arch. Near the Marble Arch open-air meetings of all kinds are held throughout the week and especially on Sundays.

The park was once part of the Manor of Hyde. Henry VIII made it into a deer park, and it has since been crown property. At one time races were held here and in 1851 it was the scene of the great International exhibition for which the Crystal Palace was erected.

Hyderabad City of India and the capital of the state of Hyderabad also spelled Haidrabad. Some beautiful buildings include the Nizam's palace, the Jama Masjid Mosque and the Char Minar, built in 1591. The inner city is surrounded by walls 6 m. in circumference. Beyond is the outer city called Brum the whole covering 50 sq. m. There is railway connection with Secunderabad and other places. Pop. (1931) 166,891.

Another Hyderabad is a town in Bombay. Pop. 82,000.

Hyderabad Native state of India. It is in the Deccan and consists of two parts. Marathwara and Telangana. Its area is 82,695 sq. m. and the ruler is the Nizam who is entitled to a salute of 21 guns. Hyderabad is the capital. Having been part

of the Mogul Empire, Hyderabad became independent in 1724. In 1766 a treaty was made with the East India Company, and since then friendly relations with the British Empire have been the rule. Pop. (1931) 14,436,148.

Hydra In Greek legend, a nine-headed monster haunting the Lerna marshes. Its destruction formed one of the labours of Hercules. As each head was removed two others replaced it, the central one being immortal. Aided by Iolaus, Hercules burned their roots with firebrands, and then severed and buried the central head.

Hydra Small freshwater organism or "polyp." Belonging to the class *hydrozoa*, it is common in ponds and streams, where it attaches itself by a sticky secretion to weeds, etc. The hydra consists of a soft tubular body, $\frac{1}{2}$ to $\frac{1}{4}$ inch in length, with a circle of six to eight hollow tentacles round the mouth.

Hydrangea Genus of flowering shrubs of the saxifrage order. The flowers are white, blue or pink. Several are grown in Great Britain, notably *H. paniculata* and *H. hortensis*, the former being much the hardier of the two. They like a sheltered position in sandy loam and the soil should be well manured. They can be planted in March or October. The hydrangea is also suitable for pots and for forcing in a hothouse.

Hydrant Appliance for drawing water off from a main, usually in a street. The common fire hydrant consists of an upright hollow cylinder furnished with a nozzle for the attachment of a hose and with a valve and waste pipe near the main. When the valve is closed, the waste pipe opens to allow escape of water.

Hydrate Chemical compound in which water combines with other substances, salts, etc., without alteration of the arrangement of the atoms in the water. The presence of water affects the crystalline form of the compound and may cause change of colour. The combined water is readily removed by moderate heat.

Hydraulics Subdivision of engineering. It consists of the application of the laws of hydrodynamics to the transmission of power by means of water pressure. A head of water, natural or artificial, may be used as a source of energy for driving machinery, such as presses, lifts, cranes and also turbines.

Hydrocarbon Compound composed of carbon and hydrogen in various proportions. These compounds are numerous, and are obtained chiefly from petroleum, a complex mixture of hydrocarbons, and from the dry distillation of coal and similar substances. Unsaturated hydrocarbons are those which combine with other elements by addition, while saturated hydrocarbons only combine by substitution. Of the former type are the olefine series, while the saturated type are represented by the paraffins or fatty hydrocarbons.

Hydrocephalus Pathological condition popularly known as water on the brain. It is due to an inflammatory condition of the membranes surrounding the brain causing an accumulation of serous fluid in the brain cavities or it may be congenital and developed during uterine life. It is characterised by enlargement of the head accompanied often by mental deficiency.

Hydrochloric Acid Aqueous solution of the gaseous compound hydrogen chloride (HCl). It was formerly called muriatic acid. It has long been known and at the present day enters into a number of industrial processes. It is prepared by heating common salt with sulphuric acid, the gas being collected in water, and on a commercial scale the acid forms a by-product of soda-ash manufacture. The crude impure acid is often termed spirits of salt and is used for cleaning metal work.

Hydrocyanic Acid Highly poisonous acid, also known as prussic acid. It is found in combination with other substances in bitter almonds and laurel leaves. Its chemical formula is HCN, and with bases it forms a series of salts known as cyanides. The acid is prepared by the distillation of potassium ferro-cyanide with sulphuric acid. It is very volatile and has a characteristic smell of bitter almonds. Its poisonous action is very rapid, causing death even in dilute solutions.

Hydrogen Lightest known gaseous element. It occurs in nature combined with oxygen, forming water, and uncombined in small quantities in volcanic gases. Its symbol is H, atomic weight 1.008, and boiling point -252°C . Hydrogen is colourless, inodorous, tasteless and inflammable, burning with a non-luminous flame. It is made commercially by the electrolytic decomposition of water or other methods, and is used for inflating airships, for the hardening of oils, and in the production of the oxy-hydrogen flame.

Hydrogenation Industrial term for adding hydrogen in certain chemical processes by the use of catalysts which enable hydrogen to enter certain compounds not already "saturated" as regards that element. It is used in the "hardening" of vegetable oils producing solid fats which can be used as substitutes for animal fats, in the production of synthetic nitrogenous fertilisers and in the production of petrol from coal, etc.

Hydrography Section of physical science dealing with the study of the oceans and other surface waters of the earth. The charting of the oceans is essential for navigation and for this work a government department is responsible. Hydrographical research is concerned also with the sounding of the depths, the distribution of temperature, salinity and many other problems.

Hydrokinetics Branch of hydro-mechanics dealing with water or other liquids in motion, which in its practical application is known as hydraulics (*qv*). Theoretically the fluids are supposed to be devoid of viscosity or friction, and the laws based upon them are modified to a large extent when dealing with water which possesses viscosity.

Hydrolysis Term used in chemistry for the change which takes place in a substance by the addition of the elements of water. An example is in the change from ethyl chloride to ethyl alcohol.

Hydromechanics Science dealing with the motion and equilibrium of fluids. It includes hydrostatics, hydrodynamics and hydraulics, the branch of engineering dealing with the motion of liquids.

Hydromel Drink made of honey and water. It was drunk by the Greeks and Romans, and resembled the mead.

of the Anglo Saxons. It was often fermented and flavoured with spices or hops.

Hydrometer Instrument used for determining the relative densities of liquids. The usual type consists of a glass or thin metal bulb attached at the top to a graduated stem and below to a small loaded bulb to maintain an upright position in the liquid. The hydrometer is floated in the liquid, and the depth to which it sinks is shown on the graduated scale. Several scales are in use, chiefly those of Beaumé and Twaddell.

Hydropathic Term applied to appliances and methods appertaining to hydropathy (*qv*). At hydropathic establishments various forms of baths are used in addition to the usual hot and cold ones, such as hot air and vapour baths for rheumatic and nervous disorders, also douches medicated and shower baths.

Hydropathy System of treatment of disease by means of water applied externally or internally. Although some form of water cure was used by the Greeks and Romans the systematic treatment of disease by this method did not gain ground until the 15th century in France and the 17th in England. Hot and cold baths, cold compresses and packs and the douche bath are external applications in hydropathy, while internally hot or cold water are employed. Hydropathy forms a valuable adjunct to ordinary medical treatment, especially in the reduction of high fever, the alleviation of local pain and general inflammatory conditions.

Hydrophobia Disease of bacterial origin also known as rabies. It occurs in certain animals and is transmissible to man. While the dog is most liable to the disease it may occur in cats, horses, pigs and cattle. In man the disease has been combated successfully by the Pasteur inoculation treatment, in which the bacterial poison is weakened by the introduction into the body of an attenuated virus causing only a mild sickness. The success of this treatment depends upon the very long incubation period of rabies. It is carried out in Paris and at St. Thomas's Hospital, London.

Hydrophone Instrument devised to detect sounds beneath the surface at sea. It was invented during the Great War for use against submarines. The receiver of the instrument is placed in the water and the sound waves are transmitted by a flex to earphones worn by the operator. A trained listener by this means was able to hear the sound of a submarine's propellers and to distinguish between a British and an enemy vessel.

Hydroplane Type of boat constructed to skim over the surface of water when driven at a high speed. The hull is lightly constructed and the bottom is somewhat flattened.

Hydroscope A simple form of water clock or clepsidra used formerly for measuring intervals of time by the flow of running water. It consisted of a cylindrical vessel with a conical base in which was a small opening. The vessel was filled with water which was allowed to trickle slowly through the aperture the falling level being shown by graduations on the side of the cylinder. Little bells indicated the lapse of time.

Hydrostatics Branch of hydro-mechanics dealing with the action of forces

Its fundamental law is that a liquid at rest transmits pressure equally in all directions, acting with the same intensity on all surfaces in contact with it and in a direction at right angles to those surfaces. This principle is applied in the action of the piston of a force pump or in the action of the hydraulic press. Hydrostatics also deals with pressure upon submerged surfaces, whether plane, curved or irregular, horizontal or otherwise, also with the problems of buoyancy of a body immersed in a liquid in relation to displacement.

Hyeres Town and watering place of France. It is 15 m. from Toulon and about 3 from the Mediterranean. About 5 m. to the east is Salins d'Hyères famous for its salt works. Pop. (1931) 22,915.

Hygieia Goddess of health in Greek legend. She was regarded as the daughter of Aesculapius and was worshipped by the Greeks and Romans. She is represented in art with a staff on which is the figure of a serpent. Our word hygiene comes from her name.

Hygiene Science dealing with the preservation of health personally and public. It includes such matters as diet, exercise and other methods of maintaining the normal health of the body. Public hygiene is concerned with the problems of suitable water supply, efficient drainage and other matters of sanitation, the housing question, the prevention of infectious diseases, inspection of foods and many other questions relating to the health and welfare of the community.

There is an Institute of Hygiene at 28 Portland Place, London W.1. The subject is also studied at the London School of Hygiene and Tropical Medicine, Endsleigh Gardens, Euston, London, W.1.

Hygrometer Instrument used for the measurement of water vapour in the atmosphere. The commonest form consists of two thermometers placed side by side, one having the bulb covered with muslin kept wet by a thread dipping into water and owing to evaporation registering a lower temperature than the dry thermometer.

Hyksos Confederation of people, probably Syrian Bedouins, dominant in ancient Egypt about 1850-1550 B.C. Josephus states that these so-called shepherd kings ruled for 511 years. They were skilled archers and used horsed chariots. Their camps at Tell el Yehudiyah and elsewhere have been excavated.

Hylas Figure in Greek mythology. He was a beautiful youth who went with Hercules on the expedition of the Argonauts. He landed and was drawing water from a well when he was drawn into it by the Nymphs and was never seen again.

Hymans Paul Belgein statesman. He was born in Brussels in 1865 and, having attained distinction as a lawyer, was for a time professor in the University of Berlin, and wrote several books. In 1900 he was elected to the Chamber of Representatives and in 1915 was sent as ambassador to London. In 1918 he became Foreign Minister and represented Belgium at the Peace Conference of 1919. In 1920 he was chosen President of the first assembly of the League of Nations. In 1924-25, 1927-29 and 1929-31 he served Belgium again as Foreign Minister.

Hymen Marriage song of the Greeks. From its subject matter and Hymen personified the god of fruitfulness. In mythology Hymen is variously conceived as the son of Bacchus and Venus, or of Apollo and a

mouse In art he is represented as a beautiful youth, a torch bearer at nuptials

Hymenoptera Large order of insects Possessing four membranous wings, and mouth parts adapted for biting and sucking, they are represented by the ants, bees, wasps and gall flies The head is short and broad, and in most cases there is a deep constriction between the thorax and abdomen In the female the abdomen is provided with an ovipositor or a sting

Hymn Song of praise and thanksgiving to God Hymns were introduced into Christian worship at an early date and developed from the Psalms The earliest were in Latin and some of these, thanks largely to John Mason Neale, are found in translations in English hymn books, of which one of the best known is the collection known as *Hymns Ancient and Modern*.

Notable hymn writers include Bernard of Clairvaux, Martin Luther, Charles Wesley, Isaac Watts, George Herbert, Milton, Cowper, Newton, Keble, Toplady, Horatius Bonar, Lytton, Newman, Baring Gould, and Rudyard Kipling Useful works on the subject are Julian's *Dictionary of Hymnology*, and Moorsom's *Historical Companion to Hymns Ancient and Modern*

Hyndman Henry Mayers English socialist He was born in London, March 7, 1842, the son of a wealthy barrister Educated at Trinity College, Cambridge, he spent some years in journalism and in travel in Australia and America In 1881 he helped to found the Social Democratic Federation and for the next 30 years was a prominent leader of the movement Three times he stood for Parliament, but without success He died Nov 22, 1921 Hyndman wrote many books advocating his ideas, and also *The Record of an Adventurous Life*, 1911

Hyogo Former capital of Japan In 1886 it was absorbed by the port of Kobe (q v)

Hyoscyamine Poisonous alkaloid present in the henbane belladonna and other allied plants It is an isomer of atropine and consists of minute snow-white odourless crystals, which have the power of dilating the pupil of the eye It is used as a sedative in nervous diseases

Hypatia Female philosopher, mathematician and astronomer She was born in Alexandria about 370 and killed by the mob in 415 because she was thought to have incited the prefect of the city to persecute the Christians Her story forms the subject of a romance by Charles Kingsley

Hyperion Figure in Greek mythology He was one of the Titans and father of Helios, Selene and Eos Keats wrote an unfinished poem called *Hyperion*

Hypermetropia Condition of the eye commonly called long sight It is remedied by using convex lenses

Hypersthene Rock-forming mineral composed of silicate of magnesium and iron It is found in certain andesites, dolerites and basalts With labradorite it forms a principal constituent of the rock norite, or hypersthene, occurring in Scotland and North America It is brownish-green, brown or black in colour and has a pearly or metallic lustre

Hypertrophy Excessive growth or enlargement of an or-

gan of the body This may be general, as in the case of persons of abnormal stature, or partial, when a part of the body is enlarged owing to increased use

Hypnotics Drugs which induce sleep or relieve acute pain Those in general use are opium and its derivatives such as morphine and codeine, chloral, sulphonal and its allies trional and tetralol, also the bromides

Hypnotism Method of inducing a trance-like sleep Usually the subject is asked to look fixedly at a bright object placed at a short distance above the level of the eyes, causing a fatigue of the nerves While in the hypnotic state he responds to suggestions made by the operator, the effects of these suggestions usually remaining after a return to the normal state The power of suggestion has been utilised successfully in the treatment of nervous disorders, especially insomnia, defects of speech, drug habits and alcoholism

Hypocaust Device for heating baths and houses adopted by the Romans, especially in Britain It consisted of a series of channels or earthenware pipes carried under the floors and in the thickness of the walls to convey hot air from a charcoal furnace In many cases the hypocaust formed a large chamber beneath the floor of a room

Hypochlorite Salt formed by the action of hypochlorous acid upon metallic hydroxides or of chlorine upon cold solutions of alkalis The most important hypochlorite is bleaching powder, or chloride of lime

Hypochondriasis Morbid condition characterised by exaggerated and unfounded anxiety regarding one's state of health Sometimes it accompanies trivial abdominal derangements It may take the form of an anxiety, neurosis, or be a manifestation of melancholia Treatment necessitates psychological investigation

Hyposulphuric Acid Acid, also called hydrosulphurous acid, formed by the action of zinc upon dilute sulphurous acid It is a very unstable yellow liquid having the formula H_2SO_3 and with greater bleaching power than sulphurous acid, a property shared by its salts, the hyposulphites Ordinary hyposulphite of soda or "hypo" is, however, a thiosulphite

Hypsipyle In Greek legend a daughter of Thoas, King of Lemnos When the Lemnian women, who were neglected by their husbands for Thracian slaves, in revenge slew the Lemnian men, Hypsipyle saved her father When the Argonauts arrived she bore twin sons to Jason, and one of these, Leneus, sent provisions to the Greeks in Troy

Hypotenuse Side of a right angled triangle opposite the right angle The square of the length of the hypotenuse is equal to the sum of the squares of the other two sides

Hypsometer Instrument for measuring altitudes by determining the temperature of boiling water at a given height It is used for checking the readings of an aneroid barometer It consists of a cylindrical vessel in which water is boiled Above this vessel is a jacketed cylinder to receive the steam, and in the centre is a thermometer

Hyrax Order of tailless quadrupeds allied to the hoofed mammals They

are about the size of a rabbit and have short fur. The toes are padded, not hoofed, and the upper lip, as in some rodents, is cleft. They are found in Africa and Asia. One species inhabits Arabia and Palestine. In the authorized version of the Bible this is called the coney; the revised version calls it, marginally, the rock badger (Lev. xi).

Hyrcanus Johannes Maccabean ruler of the Jews. He succeeded his father, Simon, as high priest and is mentioned in the first book of the Maccabees. He was besieged in Jerusalem by Antiochus VII, who conquered him. When his overlord died he overran Samaria, destroyed the rival temple on Gerizim, reduced and Judaized the Idumaeans and consolidated his father's alliance with Rome. He then established the dynasty which preceded the Herodian. He died 105 B.C. His sons Aristobulus and Alexander and his grandson, Hyrcanus II, bore the title of king.

Hyrieus In Greek legend, the reputed King of Hyria near Aulis in Boeotia. He employed Agamemnon and Trophimus sons of the neighbouring King of Orchomenos to build him a treasure house, into which they introduced a secret opening to facilitate robbery. Hyrieus, however, proved too clever for them and the end of both was disastrous.

Hyssop Small perennial aromatic plant (*Hyssopus officinalis*) with bluish flowers and lance-like leaves. Though a native of the Mediterranean it is not the hyssop of the Bible, which was probably a species of thyme.

Hystaspes Persian prince. A son of Darius I, he lived in the 6th century B.C. Relinquishing his claims to the Persian throne, he was provincial governor of Parthia under his son, as recorded at Behistun. He is sometimes confused with the earlier semi-legendary

Bactrian King Vishtaspa, Zoroaster's patron, who figures as Kai Gushtasp in Firdausi's *Shah Nameh* and other mediaeval romances.

Hysteria Functional nervous affection involving no recognisable diseased change. It may be marked by uncontrolled desire for attention and sympathy, convulsive seizures, spasms and contractions, paralyses, partial losses of sensation and derangements simulating various organic diseases. It may result from mental or physical shock or be encouraged by hereditary predisposition. It is more prevalent in Latin than northern races, and occurs in women 20 times oftener than in men. Treatment by sympathetic firmness is more serviceable than drugs.

The condition known as **Hysterics** occurs in persons of a highly nervous temperament who are sometimes subject to fits of hysterical weeping, rage or laughter, or the fit may simulate fainting though the face does not usually become pale nor the pulse feeble. The patient should receive as little encouragement as possible, and may usually be left to recover by herself, though sometimes a sharp reprimand may be sufficient to restore balance. Radical treatment is by psychoanalysis.

Hythe Borough and watering place in Kent. It is 67 m. from London and 4 from Folkestone on the S. Rly. St Leonard's church has a raised chancel and a crypt containing a huge collection of human skulls. There are two old hospitals, St John's and St Bartholomew's. Hythe, in the Middle Ages was one of the Cinque Ports. The harbour has become partially blocked. The British army school of musketry, which was here for many years, is now the School of Small Arms. A canal built for military purposes flows through the town. Pop. (1931) 8397.

Another Hythe is in Essex. It is 3 m. from Colchester and serves as its port. A third Hythe is a Hampshire village, 6 m. from Southampton.

IACCHUS Another name of Bacchus, the god of wine. It is derived from the cry of rejoicing used by his worshippers.

Iambic Verse form based upon metrical feet, each containing a short or unaccented and a long or accented syllable. Characterising the hexameters of Greek tragedy, it occupies a high place in English poetry. Notable examples include Pope's five-syllabled rhymed heroic verse, Shakespeare's unrhymed blank verse, and Tennyson's four-syllabled measure in *In Memoriam*.

Iapetus In Greek legend one of the Titans. With the others he was defeated by Zeus and imprisoned in Tartarus. Iapetus is also the name of one of Saturn's moons. It was discovered in 1871, and takes 79 days to travel round the planet.

Iberia Greek name for the peninsula of Europe, now comprising Spain and Portugal, and still designated the Iberian peninsula. A range of mountains in Spain is called the Iberian Mountains.

Ibex Wild goat of the Alps, also called the steinbok or bouquoin. It has long, curved horns and its average measurement is about 4 ft. Naturalists recognise allied forms called Himalayan, Arabian and Abyssinian ibex; sportsmen extend the name loosely to Pyrenean, Nilgiri and other wild goats.

Ibis Family of slender billed wading birds related to the spoonbills and storks. They have bald, black heads and necks and are found nearly all over Africa. Allied species live in Japan and Australia. There is a European form which sometimes strays to Britain. The bird is about 30 in long. It was sacred to the Egyptians.

Ibn Sa'ud Arabian monarch. Born about 1880, Abdul Aziz Ibn Sa'ud, having recovered Riyadh, the capital of the Nejd, from the Turks in 1901, developed the Bedouins from wandering tribes into settled agricultural communities. By 1914 he had taken further territory from the Turks and the balance of the country fell to him as leader of the Wahhabis during and after the Great War. He now rules the kingdom of Saudi Arabia (the Hejaz and Nejd). In 1935 an attempt was made to assassinate Ibn Sa'ud and his son, the Crown Prince, at Mecca.

Ibrahim Pasha Egyptian general. Son of Mahommed Ali Pasha, ruler of Egypt, he was born in 1798. Accorded a triumphal entry into Cairo in 1809 on returning from a successful campaign in Arabia against the Wahhabis, he was successful against the Greeks in 1825 and against the Turks in Syria in 1832, where he remained as governor until European powers intervened. He died Nov. 10, 1848.

Ibsen Henrik, Norwegian author. Born March 20, 1828, he was a son of Knud Ibsen, a merchant. His father fell on evil days and the son was apprenticed to a chemist. Soon he began to write, and in 1850 his first play, *Catiline*, was published. By then he was living in Christiania and he was soon earning a livelihood by his pen. In 1851, having taken a keen interest in the theatre, he was made director of one at Bergen, and in 1857 he

was chosen to direct the national theatre just opened at Christiania. For these he wrote his early plays. After a few years there he was in a position, state help being now given to him, to travel, and he passed some years abroad, chiefly in Germany. In 1891 he returned to Norway and he lived there, mainly at Christiania, until his death, May 23, 1906.

As a dramatist Ibsen ranks with the greatest. Bernard Shaw did much to make him known in England, and his plays have been translated into English by William Archer. The best of these are *The Warriors in Helgeland*, *Brand*, *Peer Gynt*, *The Pillars of Society*, *A Doll's House*, *Ghosts*, *An Enemy of the People*, *The Wild Duck*, *Rosmersholm*, *Hedda Gabler*, *The Master Builder*, and *When We Dead Awaken*.

Icarus Figure in Greek legend. He was a son of Daedalus who took him with him on his flight from Crete. As they were passing over the sea Icarus fell and was drowned.

Ice Solid state of water. It is a colourless substance crystallising in the hexagonal system, of which hoar frost, snow and hail are forms. The temperature 0° C (32° F) is defined as the temperature of melting ice, when saline impurities are present the melting point is lower. Water expands when freezing and ice floats on cold water. Artificially prepared ice is largely used industrially. See REFRIGERATION.

Ice Age Period of intense cold occurring after the deposition of the Tertiary beds. It was marked by the prevalence of great ice sheets and glaciers over the greater part of Britain and north-west Europe. Glaciation spread also to parts of Southern Europe and over the northern area of North America. The deposits of this period are boulder clays and tills, including stones and boulders polished and scratched by ice-action. There are indications that man was contemporary with the later part of the ice age.

Iceberg Mass of ice which has become detached from the ends of great glaciers in the Polar regions. Although icebergs in the Arctic are usually of great height, only one ninth of the volume of ice floats above water.

Ice Breaker Special type of steamer used for opening a passage for navigation of ice bound waters. It is employed particularly in the Baltic Sea, Lake Balkal, and parts of the Arctic Ocean. The steel-clad bows slope upwards so as to slide over and crush the ice by the weight of the vessel.

Iceland Island in the Atlantic Ocean. It lies about 200 m south-east of Greenland and covers 39,709 sq m. Much of it is mountainous and a good proportion is covered with snowfields. The highest mountain is over 6000 ft high, and there are some active volcanoes, notable Hekla. Iceland is also famous for its hot springs, or geysers. In the north-west is a peninsula and on the south are the Vestmanna Islands.

Iceland is a sovereign state under the King of Denmark. A union with Denmark grants certain privileges to citizens of both countries, but this is only temporary. The parliament is called the Althing and is divided into two houses. Members of the lower house are elected by all men and women who are over 25 years

old. A ministry of three under a president, orms the executive. For local government purposes the country is divided into 16 provinces and there are eight municipalities. Iceland has a judicial system with a court of appeal in the capital. The people are Lutherans. There is a university at Reykjavik, the capital. There is neither army nor navy.

The inhabitants are chiefly engaged in agriculture and fishing. The chief crop is hay and the fisheries are mainly cod and herring. Sheep and horses are kept. There are no railways, but some good roads. Iceland has a national bank. The money weights and measures are the same as in Denmark. Pop (1930) 108,870.

From 930 to 1261 Iceland was an independent republic. In 1261 it came under the rule of the king of Norway and the two passed together to Denmark in 1381. In 1918, after a long agitation, it was granted its present position of independence.

Iceland Moss *Ichon (celtraria islandica)* growing abundantly in Arctic and Antarctic climates and in the higher mountain regions of Britain. It is a brownish or greyish moss-like plant and grows about 3 in high. It forms a starch used for making. When boiled to a jelly and deprived of its bitter purgative principle, it is an agreeable foodstuff.

Iceni Tribe living in Britain when it was invaded by the Romans. Their homes were in Norfolk and Suffolk. They revolted with Boudicca.

Ice Pack Mass of broken fragments of ice derived from the disintegration of icebergs or floes in the Arctic and Antarctic Oceans. The pack ice in the Arctic is dense enough to prevent navigation except in the Greenland White and Barren Seas and near the northern coastline.

Ice Plant Annual herb of the fig marigold order. It is indigenous to the Mediterranean region, the Canary Islands and S. Africa. It is a half-hardy dwarf trailer whose fleshy stem and leaves are sprinkled with pellucid watery vesicles stimulating ice granules. In Great Britain it is grown chiefly in greenhouses. The Canaries export its ash for glass-making.

Ichabod Son of Phinehas and grandson of Eli (1 Sam. iv). His mother hearing that her husband and father-in-law were dead, Israel deserted and the ark taken exclaimed as she was giving birth to the child at the cost of her own life. *Ichabod the glory is departed from Israel.* Whittier's poem *Ichabod* was inspired by the anti-slavery agitation.

Ichang River and treaty port of China. It stands on the Yangtze Ichang nearly 1000 m from its mouth and is 270 m from Hankow. Pop. (1930) 107,940.

Ich Dien Motto on the arms of the Prince of Wales. It means *I carry* and is placed beneath the device of three ostrich feathers. It has been borne by the Princes of Wales for some 600 years.

Ichneumon Small carnivorous mammal common in the valley of the Nile. It preys on snakes and has a partly lit for crocodiles' eggs.

The Ichneumon is a small insect belonging to the hymenoptera. It is parasitic in its larval stage upon caterpillars. The eggs are deposited in the body of the host by the adult insect.

Ichor Word used by the Greeks for the fluid that ran in the veins of gods, the equivalent of blood in human beings. In

medicine it describes a watery discharge from a wound or ulcer.

Ichthyology Branch of the science of zoology, dealing with the study of fishes. It is concerned especially with the classification, distribution and habits of living species. See *Fish*.

Ichthyosauria Order of extinct reptiles found in strata ranging from the Upper Trias to the Upper Cretaceous in many parts of the world. Some were small, others up to 40 ft in length. The Ichthyosaurus had a fish-like body, no neck, large head with teeth, long tail and paddle-like limbs.

Icknield Way Early English name for a prehistoric British trackway, over the Boreham Downs and Chiltern Hills from Wantage to Dunstable. The supposition that it continued into Norfolk lacks evidence. Another road system, running from Stow on the Wold through Lichfield, Leicester and Chesterfield towards Aldborough, was called by earlier antiquaries, Icknield Street.

Icon Painting or bas-relief used in the Greek Church. They depict sacred subjects. Icons are carried on the person or may be found in the iconostasis or rood screen, of churches.

Iconoclast Image breaker. It refers specifically to one who was hostile to the use of pictures and images in Christian worship as tending to idolatry. Violent controversies on this subject arose after the 4th century. In 726 the eastern emperor, Leo III, began a campaign for over throwing images which Constantine V followed up with a decree. The Puritans who destroyed many of the ornaments of the churches in the 17th century are sometimes called iconoclasts.

Idaho State of the United States. In the north-west of the country, it covers 83,888 sq m. The Rocky Mts enter it. The chief river is the Snake. A good deal of the soil is devoted to crops and there is also much mining. Large irrigation works have been made to overcome the natural dryness. Boise is the capital, but there are no large towns. The state legislature consists of two houses. Two senators and two representatives are sent to Congress. Pop. (1930) 415,032.

Idesleigh Earl of English politician. Stafford Henry Northcote was born Oct. 27, 1818, and educated at Eton and Oxford. He entered political life as private secretary to W. E. Gladstone. In 1851 he became a baronet. In 1855 an M.P., and in 1859 he was financial secretary to the treasury. In 1866 he was president of the board of trade, and in 1867 68 secretary for India. In 1874 he was made chancellor of the exchequer, and in 1876 he succeeded Disraeli as leader of the House of Commons. In 1880 he left office, but he continued to lead the party until 1885 when he was made an earl. He had represented North Devon since 1866. He was first lord of the treasury for a short time in 1885, and in 1886 foreign secretary. He resigned just before his death which took place suddenly in Downing Street, Jan. 12, 1887.

Idesleigh was succeeded by his eldest son who died in 1927. As the latter's son Viscount Cyres, the historian had predeceased him, he was succeeded by a nephew as third earl. The family seat is Pyrcy Exeter, and the earl's eldest son is called Viscount Cyres.

Idealism In metaphysics a doctrine that the only real existence

is the idea, the intellectual perception, and that the material substance is dependent upon the idea. The idea may be defined as the image of an external object formed by the mind. The theory was enunciated by Plato and elaborated by Descartes with his famous dictum, *I think, therefore I exist*. Adopting this central principle, a school of philosophers arose, among whom Berkeley and Hegel were prominent and they gave the idealistic philosophy the dominance which it retained throughout the 19th century. Idealism is also used, generally, for a state of perfection.

Ides One of the divisions of the month in the Roman calendar. The Ides begin on the 15th of the month in March, May, July and October, and on the 13th in the other months.

Idiot One deficient in intellect. The accepted difference between an idiot and a lunatic is that the idiot is feeble minded at birth, whilst the lunatic becomes so. Both, however, are dealt with under the lunacy laws. See LUNACY.

Idle River of Nottinghamshire. A tributary of the Trent, it rises in Sherwood Forest and flows across the county to West Stockwith on the Lincolnshire border. Its length is 40 m.

A district of Bradford is called Idle.

Idolatry Worship of images or other objects as representing superhuman personalities. More advanced than animism and nature worship, it is absent from some primitive cultures, e.g., Eskimo. In the Old Testament the term denotes the worship of any representation, whether of Jehovah or of the false gods of the non-Jewish world. Modern Judaism, Christianity and Islam regard as idols all objects of worship, public, family or personal, in polytheistic systems, whether they are the abodes of subsidiary or departed spirits, e.g., negro fetiches or Maori images or personified deities, e.g., Vishnu, Siva or religious leaders, e.g., Buddha. See IMAGE WORSHIP.

Idomeneus In Greek legend, the son of Crete. Fighting for the Greeks in the Trojan war, he encountered a storm when returning home, and vowed to sacrifice to Poseidon, if saved, whatever he first met on landing. The victim was his own son, on whose death plague visited the island.

Idris Figure in Welsh tradition. He is believed to have been a king and to have had his seat or throne on the mountain called after him, Cader Idris, in Merionethshire.

Idyll Originally a short poem picturing pastoral life. It is now used for a poem written in simple graceful style and dealing with pastoral subjects.

Ifley Village of Oxfordshire. It is on the Thames, 2 m from Oxford. It has a famous Norman church.

Iglou Primitive type of dwelling built by the Eskimos for residence during the winter. Usually dome-like in shape, the igloo is constructed with pieces of ice or frozen snow.

Ignatius Saint and father of the Church. He was born in the 1st century A.D., but little is known of his life. He may have been associated with S. John. He became Bishop of Antioch, but at some date between 107 and 138 he was taken as a prisoner to Rome. Tradition says he was thrown to the lions as a Christian.

Ignatius Father. Anglican monk and preacher. Born at Barking.

Nov 23, 1837, his name was Joseph Leycester Lyne. In 1860 he was ordained in the Church of England, and although remaining in that church he founded a house for Benedictine monks at Llanthony in South Wales. He won fame, however, by his preaching, which was extraordinarily powerful and attracted vast crowds. He denounced modern tendencies in theology and all departures from the old-fashioned orthodoxy. He died Oct 16, 1908.

Ignis Fatuus Faintly luminous flame which hovers sometimes over marshy places or where decomposition of organic matter under water occurs. It is popularly called Jack o' Lantern or Will o' the Wisp.

Ignorantines Religious order in the Roman Catholic Church. It describes the Brothers of the Christian Schools, an order founded at Rheims in 1680. The Brothers take monastic vows, but are not priests. They devote themselves to the education of boys and many schools are under their control. Their headquarters are at Mountrath in Queen's County, Ireland, and one of their largest schools is at Norwood, London. They were called Ignorantines because no theologically educated priest could enter their order.

Iguana Large family of lizards, mainly American, but represented in Madagascar and Fiji. The tropical American *I. tuberculata*, with spiny crest along the back and large dewlap, is an herbivorous tree dweller. It is about 6 ft long, and its flesh and eggs are edible. Other iguana-like reptiles are basilisks and horned lizards, the Galapagos Archipelago has marine forms.

Iguanodon Extinct reptile of the group of dinosaurs. Its remains are found in Jurassic and Wealden strata. It ranged in length from 14 to 30 ft, and supported itself on its hind limbs and massive tail like a kangaroo. The jaws were provided with serrated teeth like those of the iguana.

Iguassu River of Brazil. It is chiefly in the State of Parana, and flows into the Atlantic Ocean. It is noted for its falls, among the finest in the world. They are used for generating electric power.

Ilchester Market town of Somerset. It stands on the Yeo, 5 m from Yeovil, and was the birthplace of Roger Bacon (1214). Ilchester was made a chartered town in the Middle Ages and until 1832 sent two members to Parliament. For many years it was the county town of Somerset. Its corporation was dissolved in 1886. Pop 500.

The title of Earl of Ilchester is borne by the family of Fox-Strangways. The 1st earl was Stephen Fox, M.P., a younger son of Sir Stephen Fox, who was created an earl in 1756 and took the additional name of Strangways. Henry Fox, Lord Holland, was his older brother and a later earl inherited Holland House, Kensington. His seat is Melbury House, Dorchester, and his eldest son is called Lord Stavardale.

Ile de France Name used at one time for a district round Paris. It was so called because it was bounded by the Seine and other rivers. Later it became a province and so it remained until the Revolution. The French gave this name to the Mauritius when it was in French possession between 1715 and 1815.

Ile du Diable Island of French Guiana. Forming with two other

small ones the Safety Islands, it lies 27 m off the coast near Cayenne. Part of the penal settlement, it is used for the more serious cases. Droytus was here for a time.

Ilex Large genus of shrubs and trees of the holly order. It is widely distributed in both hemispheres especially in S America. The most important economically is *I. paraguensis* which yields maté, or Paraguat tea of which much is exported. The common holly is *I. aquifolium*, others in cultivation are the inkberry and winterberry of N America and several from Japan. See HOLM OAK.

Ilford Borough of Essex. Part of Greater London, it is 8 m from the city. S Mary's Hospital, founded as a leper house was later an almshouse. Ilford was made a borough in 1926, and sends one member to Parliament. Photographic materials are manufactured here. Pop (1931) 131 046.

Ilfracombe Watering place, market town and urban district of Devon. It is in the British Channel 225 m from London and 12 from Barnstaple, and is reached by the S Rly. There is a harbour and a little shipping but the place is chiefly visited for the beautiful scenery around Capstone Hill and Lantern Hill overlook the town. Pop (1931) 9174.

Iliad The Poem by Homer. It deals with the events that occurred during the 10th and last year of the siege of Troy, of Ilium, by the Greeks. It begins with the wrath of Achilles who refuses to take any further part in the fighting. Led by Hector the Trojans are successful until Achilles changes his mind and again enters the field. The Iliad is in 24 books and there are many English translations.

Ilkeston Borough of Derbyshire. It is situated on the Erewash, 9 m from Derby on the LMS and L.N.E. Rlys. Lace and hosiery are manufactured and there are coal mines. It was made a borough in 1887. Pop (1931) 32 809.

Ilkley Urban district and watering place of Yorkshire. It is on the Wharf 16 m from Leeds on the LMS and L.N.E. Rlys. It is visited for its mineral springs and also for the surrounding scenery. Beauty spots near include Wharfedale and Bolton Abbey. Pop (1931) 9721.

Illampu Mountain of Bolivia. It is 60 m from La Paz and overlooks Lake Titicaca. The highest point of the eastern Cordillera. The height of its chief peak is 21 490 ft. It has been climbed.

Illawarra District of New South Wales. It lies along the coast, about 40 m to the south of Sydney and is a fertile area given over largely to dairy farming. A railway runs along it to Illawarra Lake, aagoon connected by a channel with the sea. In the district are two urban centres, North Hawarra (Pop 7000) and Central Illawarra (Pop 6000).

Illegitimacy Opposite of legitimacy. It is generally used for children born out of wedlock and from time to time statistics of illegitimacy are issued. In England it is now possible as has long been the case in Scotland for children to be made legitimate by the subsequent marriage of the parents. See LEGITIMACY.

Illinois State and river of the United States. In the north of the country, the state lies to the west of Lake Michigan and is 56 060 sq m in area. Springfield

is the capital, but Chicago is the largest place. Other cities are Peoria, East St. Louis and Rockford. Its rivers are the Mississippi, Ohio, Illinois and Wabash and the land is very fertile. Coal is the chief mineral produced. It sends two senators and 27 representatives to Congress. Illinois became a state of the union in 1818, and is sometimes called the prairie state. Pop (1931) 7,630,654. The river after which the state is named is a tributary of the Mississippi.

Illiteracy Condition of ignorance, generally inability to read or write. The spread of education has almost abolished illiteracy in Great Britain, France, Germany and North America, but there is still a good deal in the southern and eastern countries of Europe, also in Asia, Africa, and South America. In 1931, for instance, it was stated that well over 50 per cent of the inhabitants of Portugal were illiterate.

Ilorin Town of Nigeria. It is 250 m from Lagos and is a prosperous trading place. There are also manufactures. Pop 73,000.

Illumination Term applied in art to the ornamentation of manuscripts or books by miniature paintings or designs. In the early Middle Ages, missals, gospels, and other manuscripts were enriched by illuminated initials usually in gold, purple and red, in addition to designs or small groupings of figures of men or animals forming marginal scrolls to the page. The invention of printing with its mechanical multiplication of copies, however, brought the golden age of illumination to a close.

Illustration In rhetoric an illustration is a means of explaining or rendering clear a statement made. In art the illustration of written or printed matter takes the form of pictures, diagrams, photographs, or in the older manuscripts by illumination.

Illustration of books by woodcuts dates from the end of the 14th century, and line engraving on copper and other metals followed in the first part of the next century. Steel engraving lasted until the middle of the 19th century, when this process along with woodcuts was superseded gradually by the modern and cheaper process methods of preparing illustrations for books and periodicals.

Illyria Province of the Roman Empire. In south-eastern Europe it covers the district now known as Bosnia, Herzegovina, Dalmatia and Montenegro. It was inhabited by a warlike race, who for a few years were under the kings of Macedonia. In 229 B.C. the Romans conquered them and in 168 included their land in the Empire but the province of Illyria was not formed until A.D. 9. After the fall of the western empire the name was lost but from 1815 to 1848 there was a province of Illyria in Austria.

Ilmenite Titaniferous iron mineral forming the principal ore of the metal titanium. It contains iron and titanium oxides in varying proportions and occurs as iron black scales or in large veins in igneous rocks in Norway and Canada. As an alluvial black sand it is found in N. Zealand.

Ilminster Urban district and market town of Somerset. It is 5 m from Chard and 140 m from London by the G.W. Rly., and is situated on the river Isle. Bricks are made and it is a centre of the flax trade. Pop (1931) 232.

Image Term used in optics for the optical counterpart or picture of an object produced by reflection from a mirror or by refraction by a lens. An image may be either real or virtual. In the former case rays of light come from the points of the image, while in a virtual image they only appear to do so.

Image Worship Homage rendered in worship to graven, pictorial or other representations of sacred persons or things. The Roman Catholic Church permits the veneration of images of Christ, the Virgin Mary, and the saints. The Orthodox Eastern Church applies the same principle to icons and pictures. Protestants to-day are inclined to recognise representative art where no idolatrous intention is involved. The Jews and Mohammedans exclude it altogether. See **ICONOCLAST**.

Imago Final adult stage in the metamorphosis of an insect. The imago is provided usually with wings and its life is devoted to reproduction.

Imam Arabic word for guide. It was employed for various Mohammedan princes, such as the early caliphs, and is still used for the Imam of Yemen, the 12 leaders of the Shi'ah sect and the four great doctors of the orthodox sects. It applies also to the person who leads the Friday prayers in the mosque.

Imari Seaport of Japan. It is 35 m from Nagasaki and is chiefly famous because it gives its name to a kind of porcelain. This was made in the 17th century and was taken by Dutch traders to Europe. On it were painted designs in blue, red and gold.

Imbros Island of Greece. It is in the Aegean Sea, near the entrance to the Dardanelles. It covers about 100 sq m and the chief town is Castro. The island was long a Turkish possession, but was assigned to Greece in 1920, and restored (demilitarised) to Turkey by the Treaty of Lausanne (1923). Pop 10,000.

Immaculate Conception

Dogma that the Virgin Mary was conceived without original sin. St Bernard repudiated the sinless view in 1131, and Duns Scotus and the Franciscans maintained it, 1307. Aquinas and the Dominicans took the contrary view. The Council of Trent left it unsettled, but Pope Pius IX declared it a dogma of faith in 1854. The Roman Catholic Church celebrates the feast of the Immaculate Conception on Dec 8, the Eastern Church, rejecting the Western dogma, celebrates the Conception of S. Anne, the Virgin's mother, Dec 9.

Immanence Pantheistic theory that the creative and intelligent power of the universe is indwelling within the universe itself and not above or beyond it.

Immanuel Hebrew proper name meaning *God is with us*. It was given to a child foretold in prophecy (Is. vii), and was applied to the child Jesus (Matt. i). A variant spelling is *Emmanuel*.

Immigration Entrance of people into another country for the purpose of settling there, it is thus the opposite of emigration. There was a great deal of immigration into the North American continent in the 19th century, but towards the end of that period steps were taken to restrict it. The restrictions were at first directed to

keeping out the coloured races whose standard of living was lower than that of the white man. Australia, Canada and the United States took steps to restrict the number of coloured immigrants, these amounting in some cases to almost total exclusion.

The difficulty of finding employment was one of the reasons that led certain countries to restrict the immigration of the white races, and now almost every country takes measures to keep out all who are considered undesirable, either on grounds of poverty or disease. The restrictions in the different countries vary, but, in general, intending immigrants must possess a certain amount of money, pass a medical test and also prove literacy.

Since 1921 the United States has had a system of quotas in its immigration policy. Each year a quota, based on the number already in the country, is fixed for each nation. Provided they pass the tests immigrants up to that number are allowed to enter, but as soon as it is reached immigration from that particular country is stopped for the year. The number allowed varies. In 1929, for instance, it was 65,721 for Great Britain and 25,957 for Germany. The figures are, of course, exclusive of those who visit the country for business or pleasure.

In Great Britain there were practically no restrictions on immigration before 1905, and a great number of aliens, many of very low character, made their homes in the country and were responsible for reducing the standard of life in certain industries and areas. In 1905 restrictions were placed on their entry and there is now a branch of the Home Office charged with the duty of keeping out undesirable aliens. See **EMIGRATION**.

Immingham Seaport of Lincolnshire. It is 5 m from Grimsby, and was made a port in the 20th century, when the Gt. Central Rly. built docks here. These cover 56 acres and belong to the L.N.E. line. Much coal is shipped. Pop 2700.

Immortality Condition or quality of being exempt from death or annihilation. Confidence in the continuance of human existence beyond the grave is almost universal, and is traceable to primeval man. It is incapable of proof, but speculation has endeavoured throughout human history to pierce the veil. The pantheistic view of reabsorption in the universal life, as through the Buddhist nirvana, and the positivist view of corporate rather than individual survival, do not satisfy those who regard immortality as essentially involving perpetuation of the personal consciousness.

This idea of personal immortality finds support in the aspirations of the human mind in its capacity to project itself beyond the present life and time, and in the belief that the purpose of the created universe cannot be fulfilled without it. On the other hand science gives no credence whatever to the idea, although it does not rule out some kind of corporate immortality, of an absorption into an eternal and omnipresent mind. Spiritualism, it must be said, has not thrown much light on the question. The Christian doctrine looks for fellowship with the Eternal through the resurrection of Jesus Christ.

Immunity Term applied to the power of resistance in the bodies of animals to disease. This immunity is either natural or acquired. In natural immunity the blood develops anti-toxins which neutralise the bacterial toxin, immune bodies which

destroy microbes, and leucocytes which devour the germs. Vaccination and inoculation are methods adopted to acquire immunity.

Impaling In heraldry to place two coats of arms on one shield. They are usually placed, or marshalled side by side. The chief occasions for impaling arms were marriages.

Impeachment In Great Britain a prosecution by the House of Commons before the House of Lords as the supreme court of law. It is now practically obsolete but the power to impeach remains.

Impeachment was confined to persons of rank who had committed an offence against the state. The first recorded impeachment was that of Lord Latimer in 1376—the most famous that of Warren Hastings. The last case was in 1806 when Henry Dundas Viscount Melville, was impeached. The United States has a similar form of procedure the House of Representatives prosecuting before the Senate.

Imperial College of Science and Technology Educational centre at South Kensington London. It dates from 1907 and consists of the Royal College of Science, the Royal School of Mines and the City Guilds (Engineering) College. It has a strong staff of professors and lecturers and its equipment is of the most modern kind. It is a school of the university of London.

Imperial Conference Meeting of representatives of the various self governing parts of the British Empire. The first was held in 1887, and for some time these were called Colonial Conferences. Since 1907 (except for the war years) they have been held every four years, the last being in 1930. The conferences are held in London, the Secretary for the Dominions being chairman. They are attended usually by the premiers and other ministers of state. In addition to these meetings conferences on particular subjects e.g. defence and economics are held from time to time.

Imperial Economic Committee British government committee. First appointed in 1925 in accordance with proposals at the Imperial Economic Conference 1923 and continuing from one conference until the next its duties are to investigate the development and marketing of empire produce suitable for the British market. The Empire Marketing Board was founded as its executive body.

Imperial Defence Defence of the British Empire in time of war. The necessity of framing some joint policy for the defence of the British Empire led to the association of the Dominions with the mother country in consultation and action. The matter was discussed at Imperial conferences and a committee of Imperial defence was set up in London. This is concerned with the activities of the three arms—army, navy and air force throughout the world. Its offices are in Whitehall Gardens London S.W.1.

Imperial Institute Building in South Kensington London. A fine edifice in the Renaissance style. It was erected to mark the jubilee of Queen Victoria's reign in 1887. It was opened in 1893 and in 1909 became the property of the Government. It is controlled by a corporation of 120 and is the national repository of the Secretary of the Dominions and has a director

and a staff. Since 1925 the Imperial Mineral Resources Bureau has been incorporated with it. The work of the Institute is to make known the products of the various parts of the Empire and to conduct researches into their respective uses and values. Part of the building is the temporary headquarters of the university of London.

Imperial Preference British political

economic conception. The movement began in Canada, where in 1898 the administration of Sir W. Laurier (qv) abandoned general reciprocity in trade for a policy of British preference in the granting of tariff concessions. Development of this policy, which was implemented at the Imperial Conference of 1902, had been slow pending the change (1931-32) in the British fiscal system from free trade to protection. Some progress was made, however, during the Great War, and British preferences were enlarged under the Safeguarding of Industries Act, 1921. Apart from primary foodstuffs, motor cars of Canadian manufacture for instance enjoyed preferential rates, while under the Safeguarding Act of 1925 Imperial preference was attached to such products as cotton, silver and silk, the Dominions meanwhile continuing to enlarge the preferential range.

Imperial preference should not be confused with Empire Free Trade, a political slogan introduced in 1939, expressing an ultimate aim, but ignoring the immediate need of the Dominions to protect their growing industries—a consideration which tends to limit the indefinite expansion of Imperial preference.

Imperialism Term used for the movement that aims at the strengthening of the British Empire. It was much used towards the close of the 19th century, its opposite being Little Englander. Lord Beaconsfield was regarded as a great Imperialist. Sir J. H. Seeley helped the movement by writing *The Expansion of England*. Its opponents regard Imperialism as involving aggression and, perhaps, injustice towards weaker peoples.

Imperial Service Order

British decoration given to members of the civil service. It was established in 1902 and enlarged in 1912. It is given to members of the administrative and clerical branches of the civil service. The number of members must not exceed 700. Of these 250 are for the home services, 250 for the services of the Dominions, colonies and protectorates and 200 for the Indian services, the 200 are divided into 100 for Europeans and 100 for Indians. The ribbon of the order is crimson with a blue centre.

Imperial War Museum

London museum. It was opened at the Crystal Palace in 1920 and was removed to its present home in Imperial Institute Road, South Kensington in 1924. The collection includes naval and military trophies and relics, ordnance, small arms and ammunition, ships and other models, and a set of art photographs, films, books and pamphlets. The historical collection is in the Science Museum.

Imports Name given to the goods that come into a country by way of trade. They are thus the opposite of exports. In Great Britain and most other countries, the value of the imports is calculated by

officials at the ports of entry and figures are issued from time to time giving the totals. Most countries levy duties on imported goods.

Imports may be divided into manufactured goods, raw materials and foodstuffs. In Great Britain the value of the imports is always considerably greater than the value of the exports. The difference is the balance of trade as it is called. This is paid by invisible exports, such as shipping dues and insurance charges, whilst part of it consists of goods, which are in effect interest on money lent abroad.

Nearly all countries tax imports, Great Britain joining the number in 1932 with taxes on certain manufactured goods and foodstuffs. See BALANCE OF TRADE, TARIFF

Imposition Something placed on a person or thing. It is most often used for a tax, especially a tax that is regarded as unjust. Duties on certain imports levied by James I in 1606 were called impositions, and were resisted by a merchant called Bate and others. In 1610 Parliament declared impositions illegal.

The word is also used for a task given to a schoolboy, as a punishment, as well as in printing.

Impostor One who seeks to obtain something by pretending he is someone else. There are historical impostors such as Perkin Warbeck (died 1499) and those who pretended to be the son of Louis XVI of France. More recent impostors are the German who called himself the captain of Kopenick and De Rougemont. Another class of impostor consists of those who pass off the writings of others as their own.

Impotence Lack of power. It is usually applied in cases where husband or wife is unable to consummate a marriage. In English law a marriage can be annulled if impotence is proved.

Impressionism Modern school of painting. It originated in France in the latter part of the 19th century, and is associated with the names of Edouard Manet and Claude Monet. Other painters of this school were Boudin, Degas, Renoir, Pissarro, Mornet, Cézanne and Sisley. The Impressionists claimed freedom from all artistic tradition with its conventional methods of lighting and composition, and they attempted to portray the truth of their impressions of nature by the use of pure colour and luminosity. They used pure primary colours and obtained their effects by placing small spots of colour side by side. Exhibitions of impressionist paintings were held in Paris in 1867, and in London in 1882 and 1889.

Imprisonment Detention in a gaol, or prison, for an offence against the law. In English law there are three kinds of imprisonment. Penal servitude is a punishment for serious offences and may be for life, which in practice is 20 years. Imprisonment with hard labour is for less serious offences, it cannot exceed 10 years. Ordinary imprisonment for minor offences is of three kinds. The person sentenced may be a first, second or third division prisoner. First and second division prisoners have an easier term than ordinary prisoners.

In-Breeding Method of breeding by mating nearly related subjects. It is contrasted with line breeding, in which individuals mated are within a single line of descent, and with out-breeding, or the

mating of unrelated subjects. In-breeding is resorted to in order to establish or fix certain desired characters, although it involves ultimately certain disadvantages such as deterioration, diminished resistance to disease, and sterility.

Inca Name meaning a member of the ruling class in Peru in the 13-16th centuries, but applied more generally to their wonderful civilisation. The Inca Empire, created about 1230, covered the modern Peru and part of Bolivia and Chile, an area 2000 m long and some 500 wide. Its capital was Cuzco. It lasted until 1533 when Pizarro overthrew it. Its history has been recorded by a Spaniard, Garcilaso de la Vega.

The remains of the Inca civilisation are very wonderful. They include the ruins of palaces and temples, as well as statues and sculptured decorations. The Incas made good roads and had considerable knowledge of agriculture. They irrigated and manured the soil, and their social and economic life was far from primitive. They worshipped the sun.

Incantation Form of words of supposedly supernatural power, chanted or intoned ceremonially. Incantations are common to all primitive beliefs. The earliest known examples are Babylonian, the best known survivals occur in folk song and jingles used as charms.

Incarnation (Latin *caro*, flesh) Act of embodying in flesh, but specifically the assumption by the Godhead of human form and nature in the person of Jesus Christ. Our Lord's own claims, S. Paul's association of His grace with God's love and the Spirit's fellowship, and S. John's view that the Word co-existed with God eternally, led to the doctrine of the Trinity. The early church sought to define this mystery in the Nicene creed, and alternative views gave rise to heresies. Modernist thought urges that in becoming flesh the Incarnate Son accepted human limitations, and does not regard belief in that event as necessarily involving the acceptance of a miraculous birth.

Ince-in-Makerfield Urban district and market town of Lancashire. It is 204 m from London by the L M S Rly, and is near Wigan. There are coal mines, and cotton mills, and railway stock is manufactured. The county division of Ince returns a member to Parliament. Pop (1931) 21,763.

There is another Ince in Cheshire. This is a village 7 m from Chester. Pop 330.

Incense Blend of sweet smelling spices burned in a thurible and symbolic of ascending prayer. It is generally used in the Roman Catholic Church, but only by a few high churchmen in the Church of England. It is chiefly made from frankincense, myrrh and benzoin.

Incest Intercourse between persons so closely related that they are debarred from contracting legal marriage. An Act of 1908 made it a misdemeanour for a male to have intercourse, or attempt to procure it, with his mother, sister, daughter or grand-daughter. The terms "brother" and "sister" include also a half-brother or half-sister whether in wedlock or not. The penalties are penal servitude for 3 to 7 years, or imprisonment up to 2 years. A female over 16 who, knowing the relationship, permits such intercourse, is liable to like penalties.

many races and speaks many languages. Two hundred and twenty-two of these have been recognised and they are grouped into seven families—Western Hindi, Bengali, Telugu, Marathi, Tamil, Panjabi and Rajasthani. Hindustani is the literary language, and perhaps 3,000,000 people speak English. In religion the Hindus are the most numerous, about 239,195,140 (1931), the Mohammedans number about 77,677,545, and there are 12,786,806 Buddhists. Many of the inhabitants are gathered in the great cities of which the largest are Calcutta and Bombay. Other populous centres are Madras, Hyderabad, Rangoon, Delhi, Lahore, Ahmedabad, Lucknow, Bangalore, Karachi, Amritsar, Cawnpore and Poona. The caste system prevails and is still strong.

The most convenient division of India is into British provinces and native states which retain a certain amount of independence but are under British protection. The former cover 1,318,346 sq. m. The largest province is Burma, which in some ways stands apart from India and which it is proposed to separate from it. Next comes Madras, one of three old presidencies of British India, and the third is another presidency, Bombay. The United Provinces of Agra and Oudh, the Panjab, and the Central Provinces and Berar are all about the same size. Next in area are Bihar and Orissa, Bengal, Assam and Baluchistan, while much smaller are the North West Frontier provinces, Ajmer Merwara and Coorg. The Andaman and Nicobar Islands form a province and another is Delhi, the capital of the empire. Bombay, it may be said, includes Sind and Aden. The larger provinces are under governors, the smaller ones under chief commissioners.

The native states of which there are some hundreds, cover 400,000 sq. m. Each with its own ruler, the largest are Hyderabad, Kashmir, Mysore, Gwalior and Baroda, the others are grouped together into agencies.

India is governed by a Governor General, or Viceroy, who is responsible to the Secretary of State for India in London. He is assisted by a legislature of two houses. One of these is the Council of State and the other is an elected legislative assembly which was created in 1921. In addition, under the important scheme of 1919 there are legislative councils in the provinces, the members of these being partly elected and partly official, the former in a majority.

The actual work of the government is controlled by the viceroy's executive council and by executive councils in the various provinces. Each member of the central executive council has charge of a department of state, and its duties are discharged all over the land by members of the Indian Civil Service. To discuss the affairs of the native states there is a chamber of princes and residents representing the central government at their courts. In London there is a council of India to advise the Secretary of State. It consists of 12 members, two must be natives of India. There is also a high commissioner with offices at India House, Aldwych, a fine building opened in 1930.

Agriculture is the main industry of the Indian people, though many are employed in the ancient crafts and an increasing number in manufactures, especially of cotton. Rice, wheat and cotton are the chief crops, others are jute and sugar. Coal and oil are produced, as are moderate quantities of gold and silver.

Vast areas are still under forest and to look after these there is an Indian Forest Service.

The country has a fairly good railway system and several large seaports. The unit of currency is the rupee worth about 1s. 6d. The chief bank is the Imperial Bank of India. For defence there is an Indian army largely officered by Britishers and British regiments, about 70,000 strong, are stationed in the country. There is also an air force and a navy. A civil police of some 200,000 men keeps order.

HISTORY India was conquered, in part at least by the Greeks and the Scythians before the Mohammedans began a series of invasions about 1000. For about 300 years this continued and in time they reached the Deccan. In 1303 the land was wasted by Tamerlane, and in 1526 the great Mogul empire was founded. After a period of great glory this declined in the 18th century when part of the land was conquered by Persia and the Marhatta kingdom became independent in the south.

At the end of the 15th century the Portuguese began to trade with India and soon had settlements there. The Dutch, French and English followed their example and each formed a company for this purpose, the English East India Company dating from 1600. The wars of the 18th century, and other causes gave the supremacy to the English Company. The English made extensive conquests in India and before 1850 much of the peninsula was under their control.

After the Mutiny of 1857 (q.v.) the system of governing India which, with certain alterations, exists to day, was established. The East India Company was abolished and its territories placed directly under the crown. In 1877 Queen Victoria was made Empress of India, and for many years the defence of the Indian frontier, which led to a war with Afghanistan 1878-79 and to many smaller expeditions, was one of the main concerns of British policy. Indian troops fought for the Allies in the Great War, especially in Mesopotamia and East Africa.

In the 20th century a serious agitation for independence for India began. After the Great War there were some unpleasant incidents and Gandhi the most prominent native instituted a boycott of British goods, and took other steps to undermine British rule. But before this, to meet the Indian demands, the British government made certain changes. Indians were given a greater share in the government of their country and in 1922 the Government of India Act established a representative body in the legislature. In 1927 a royal commission under Sir John Simon was appointed to report upon the whole question of the future government of India. In 1930 the recommendations of this body were published, one being the separation of Burma. Another proposal was the extension of the franchise to include 6,600,000 women.

The Round Table Conference met in London (1930-33) and decided upon a federal organisation for India and a committee drafted a federal constitution. The Government proposals for constitutional reform were issued in a White Paper in March, 1933. In 1935 an Act was passed embodying these proposals, viz., an All India Federation with provincial autonomy, the separation of Burma and the disassociation of Aden from India.

Indiana State of the United States. In the centre of the country. It lies south of Lake Michigan and covers

36,350 sq. m. The chief rivers are the Wabash and the Ohio, and agriculture is the main industry. Indianapolis is the capital and the largest city. Others are Fort Wayne, Evansville, South Bend, Terre Haute and Gary. It sends two senators and 13 representatives to Congress. Pop. (1930) 3,238,503.

Indianapolis City and chief town of Indiana. It is 110 m. from Cincinnati and is an important railway centre. The industries are chiefly connected with the provision of food. Pop. (1930) 364,161.

Indian Civil Service Service that carries on the work of governing India. It is open to Britishers and Indians alike, and to enter its candidates must be successful in a competitive examination held every summer. For this the age limits are 21 and 24. The successful candidates must pass one or two years in study in England, and pass a further examination before they take up an appointment in India. The pay begins at about £540 a year and candidates can secure high positions as judges and administrators. After 25 years of service a pension of not less than £1000 a year is given. Full particulars of the examination can be obtained from the Civil Service Commission, Burlington Gardens, London, W 1.

Indian Ink Ink of an intense black colour used by artists and draughtsmen and sometimes called China ink when made in sticks or cakes. It is prepared from lampblack or carbon black mixed with weak glue or other ingredients. Ordinary Indian ink is not waterproof, but special waterproof preparations are now made.

Indian Millet Cereal grass yielding, after rice, the most extensively grown grain in the Old World. It is derived from *sorghum vulgare*, and innumerable varieties produce durra in Egypt and the Sudan, and Guinea and Kaffir corn in Africa. Other sorghums yield broom corns and Chinese sugar cane. It is indigenous to Asia, but is now grown in North America.

Indian Mutiny Revolt against British rule in India in 1857-58. It is usually attributed partly to an order stating that in future Bengal soldiers were liable to service overseas, but still more to the act of serving out to the native soldiers cartridges greased with the fat of pigs and cows, the one an unclean and the other a sacred animal.

There were, however, other causes of discontent, although those mentioned played their part. Western ideas were being introduced and native customs suppressed, thus giving rise to vague, but none the less real feelings of dissatisfaction. After some sporadic outbreaks at Barrackpur and elsewhere, the mutiny proper began at Meerut on May 10. There some native regiments murdered their officers with their women and children, marched to Delhi, 40 m. away, and restored the old Mogul Empire in the person of Bahadur Shah. Other centres of revolt were Cawnpore and Lucknow, and at both places British garrisons, aided by some loyal sepoys, were besieged. On June 27, Cawnpore surrendered and, in spite of a safe conduct all men, women and children were murdered by order of Nana Sahib. In the residency at Lucknow the British held out.

Sir Henry Havelock fought several battles on his way to Cawnpore, which he entered too

late to save the garrison. From there he marched towards Lucknow which he reached on Sept. 23. By now his force was very much reduced in strength and he could only join the besiegers and wait with them for further aid. The mutiny at Delhi had meanwhile been crushed. On August 14 the city was stormed and heavy punishment dealt out to the rebels there.

By now Sir Colin Campbell had arrived with reinforcements from Britain. He reached Cawnpore, and then with 8000 men relieved the garrison at Lucknow. The worst was over, but much remained to be done. Campbell spent some time in putting down the revolt in Oudh, whilst Sir Hugh Rose dealt with the mutiny farther south, in both areas a tedious guerilla warfare being carried on. The capture of Jhansi and Gwalior by Rose in the summer of 1858 marked the end of the major operations. The revolt was confined to Bengal, Oudh and other parts of northern and central India, and, with one or two exceptions, the native rulers remained loyal to Britain.

Indian Ocean One of the five great oceans of the world. In the southern hemisphere, it stretches from Africa to the East Indies and Australia and in the other direction from Asia to the Antarctic. India divides the northern part into two portions.

Indian Summer American name for a period of fine weather in autumn. Known in England as St. Martin's Summer, it is characterised by calms and absence of rain.

Indiarubber Name given to *ficus elastica*, a tall evergreen tree growing in the damp forests of northern India, Assam and Burma. It is distinguished by its smooth oblong leathery leaves, a character which has brought it into favour in Great Britain as a decorative pot plant. In Assam large government plantations are established for supplying rubber, which, however, is of lower grade than that obtained from *hevea*, the source of most commercial rubber. See RUBBER.

India Office Department of the British Government. It dates from 1858, and is responsible for looking after the affairs of India. Its head is a secretary of state, who is assisted by an under secretary and a staff of civil servants. There is also a consultative council. The expenses of the office are met from Indian funds. The office is in Whitehall, London, S.W.

Indictment In English law a written accusation against a person who is tried by a jury. Offences are divided into indictable and non-indictable, the latter being the minor ones. In indictable offences the accusation is put in writing and submitted with the evidence to the grand jury for consideration. If they consider it proved they return a true bill, or indictment, and the accused goes to trial. In Scots law, an indictment is the form under which an accused person is put to trial at the instance of the Lord Advocate.

Indies Term used for two districts of the globe. The East Indies consists of India, the Malay Archipelago and the districts around them. The West Indies consists of Cuba, Jamaica and other islands off the coast of Central America. See INDIA, WEST INDIES.

Indigestion Inability to digest food arising from disorder of the digestive organs. See DYSPEPSIA.

Treatment should be mainly preventive—avoidance of foods which usually cause the condition, such as strong tea, fresh white bread, sweet cakes, heavy puddings, some root vegetables (e.g. turnips), twice-cooked meat, and rich dishes cooked with fat.

A simple, wholesome diet should be adopted with meat once a day at the most, and plenty of fresh, natural foods. Three meals are sufficient, and there should be no eating between meals, though plenty of water should be drunk. One or two tumblerfuls of hot water before breakfast and at bedtime will be beneficial. To relieve an attack a pinch of bicarbonate of soda in water or a dose of bismuth may be useful in some cases. It is essential that constipation should be relieved, if necessary, with daily doses of medicinal paraffin, and regular exercise in the open air will help to restore the general health.

If the condition persists a doctor should be consulted in case there is some underlying cause. (See also FLATULENCE, HEARTBURN)

Indigo Important blue dyestuff. It is prepared from several leguminous plants of the genus *Indigofera* chiefly *I. tinctoria* and *I. arrecta*, cultivated in India, Java and Natal. The sediment from a watery extract of the plant is dried and formed into small cakes of the dyestuff, which is of a deep blue colour with a coppery tinge. Natural indigo to a large extent is superseded by the synthetic product, a derivative of naphthalene. This gives greater ease in manipulation and less cost of production.

Indium Rare metallic element having the symbol *Ind* and atomic weight 114.8. It was discovered in 1863 in zinc blende and occurs also in other zinc ores and zinc dust. Indium is a soft white ductile metal which melts at 155°C , and when heated to redness in air burns with a violet flame.

Individualism Theory in politics and economics that opposes the interference of the state in the affairs of individuals. It is thus opposed to socialism, collectivism and communism. Individualism was advocated by Adam Smith, Bentham, John Stuart Mill and Herbert Spencer and was very strong in the 19th century. Towards the end of that century, however, it became less popular and to day is almost discredited. Many reasons have contributed to this one of the most powerful being the impotence of the individual in the face of the conditions of the modern world where the tendency is to larger and larger units for production and distribution with the individual becoming more and more a mere cog in the great machine.

Indo-China Name given to a region in Asia that lies between India and China. A French possession. It consists of Cochinchina, Cambodia, Tonkin, Annam and Laos. It covers 285,000 sq. m. and is under a governor-general. The capital is Hanoi. The unit of currency is the piastre and a bank of Indo-China has been established. Pop. (1931) 21,650,000.

Indonesia Ethnological term for groups of islands in the Indian and Pacific oceans. Included are the Java group, part of the Malay Peninsula, Borneo, Celebes, the Philippines and the Pacific groups. Modern investigations in the western groups have brought to light the remains of former inhabitants who do not resemble the present races but are allied to the now inhabiting Australia and

the Pacific groups forming important evidence as to migration and the origin of the races in the latter.

Indore State of India, also the name of its capital city. The state is in the centre of the country and covers 9670 sq. m. It is ruled by a maharajah. Pop. 1,318,237.

The city of Indore stands on the River Saraswati near where it is joined by the Khan. It is the seat of the ruler and trades in cotton, corn and other commodities. Pop. 127,327.

Induction Process of thinking. In logic there are two methods of reasoning, the inductive and the deductive. In the former the argument is from a general principle to a particular case, in the latter it is the reverse. By induction a man knowing that water will always run downhill, makes his pond at the bottom of a sloping garden. See DEDUCTION.

Induction In ecclesiastical law the formal act of placing a clergyman in possession of a living. It is usually done by the bishop and until the ceremony is performed the clergyman is not legally entitled to the revenues of his office.

Induction Term used in electricity for the electrifying or magnetising of a neutral body by an electrified or magnetised body in the vicinity. In electro-magnetic induction a current is generated in a conductor by varying the surrounding magnetic field.

An induction coil consists essentially of a soft iron core surrounded by a primary coil of short thick wire and an outer coil of long thin wire. A magnetic field is formed in the core by a current passing through the primary coil and by continuous interruptions or changes of direction of flow of this current induced currents are set up in the outer coil.

Indulgence Concession or power to do something. It is chiefly used in the Roman Catholic Church for a remission from punishment for sin. Indulgences were first used to free penitents from punishment in this life, but later they were given by the Pope to free them from punishment hereafter. The theory was that there was an inexhaustible fund of grace upon which the Pope could draw for the benefit of those in purgatory. Indulgences, which are either plenary or partial are still given by the Pope. The selling of indulgences in Germany to obtain money to rebuild St. Peter's, Rome was one of the reasons why Luther in 1517 attacked the Church of Rome and started the Reformation. James II of England caused irritation by issuing declarations of indulgence to relieve Roman Catholics and Nonconformists from the penalties attached to their religion.

Indus River of India. It rises in the Himalayas in Tibet, at a height of 18,000 ft. Flowing N.W. through the Kashmir gorges, it turns S.W. near Bunji, receives the Ravi River near Attock and collects the Punjab streams at Multan below which it traverses the plain of Sind to its delta on the Arabian Sea. The fall to Attock 900 ft. about sea level below which it is navigable, causes flooding, but the extent of this has been reduced by a dam and vast irrigation works. The length of the river is 1800 m. and its drainage area is 372,000 sq. m. Its waters are used for the world's largest irrigation system consisting of the Lloyd Barrage at Sukkur and seven canals.

Industrial Court Department of the British Govern.

ment. It was set up in 1919 to deal with disputes between employers and employed. Its headquarters are at 5 Old Palace Yard, Westminster, S W 1. Disputes referred to it are decided by a court which is composed of representatives of both classes with an independent chairman. To constitute these courts there are panels of employers, employed and neutrals, from which a court can be formed.

An industrial council is a council of employers and employed which exists to deal with trade disputes. They are found in many industries and are usually known as Whitley councils.

Industrial Disease In Great Britain a disease which arises from the condition of one's occupation. Miners and those who handle wool, hair and other commodities are among those subject to these diseases. Workers with lead, mercury, arsenic and other substances are sometimes poisoned and workers in certain chemicals are liable to injury of one kind or other. A list of industrial diseases has been drawn up by the Home Office, and those suffering from one of them can claim compensation under the Workmen's Compensation Acts.

Industrial Psychology Branch of psychology which investigates the behaviour of workers. It deals with the special psychological problems involved in modern industrial employment. Among matters that come under review are hours and conditions of labour, pauses for rest, meal times, monotony, fatigue onset, etc. A section deals with vocational tests designed to aid the selection of suitable workers for particular tasks. There is a chair of Industrial Medical Psychology in London University.

Industrialism Word used for the system of industry in force to day, the production of goods in factories and works on a large scale. It is the opposite of the older system by which goods were produced by men working in their own homes, or in small workshops. Many modern evils are put down to industrialism, and some of the charges brought against it are doubtless true but it appears an inevitable development in the modern world. Indeed, it shows signs of spreading from the countries of the west, where it has been developed, to the countries of the east, where for centuries an entirely different system has prevailed.

Industrial Revolution Phrase used for the change that came over industry in Great Britain in the 18th and early 19th century. It was marked by the substitution of steam for hand labour and by the building of factories for the manufacturing processes that were previously done in the homes. It is associated with the inventions of Arkwright, Hargreaves and others, and received a great impetus when the steam engine was invented. It may be said to have begun about 1750 and to have been completed by 1850.

Industrial School Institution for the training of children who are unruly. A boy or girl can be sent to one of these by a magistrate, but he or she must not remain therein after the age of 16. They are called industrial schools because the inmates are taught trades.

Inebriate Word used for a habitual drunkard. In Great Britain such persons can be put under control and there

are institutions in which they are received. These must be licensed and are inspected by officials of the Home Office. To be put under restraint an inebriate must be certified by two medical men. There are associations for the care of inebriates, and one for the study of inebriety.

Inertia In physics, the inherent property of matter of retaining its state of rest or of uniform motion in a straight line unless acted upon externally. Rotational inertia, or moment of inertia, is the sum of the products obtained by multiplying each element of mass by its squared distance from the axis. The centre of inertia is the centre of gravity or mass. Electric inertia is that superinduced by an electric charge.

Infallibility Inability to do wrong. It is chiefly used in ecclesiastical matters. Many Christians have held, and some do hold, that the Bible, or the Church, or both, are infallible. This arises from the belief that both are of divine origin and that the Church is guided by the Holy Spirit. In 1870 the doctrine of papal infallibility was declared by a council of the Roman Catholic Church.

Infant Person under 21 years of age. In English law an infant is under certain disabilities. He or she cannot bring an action at law, but must sue, if and when it is necessary, through a next friend. A tradesman who supplies an infant with necessities can obtain payment, but he cannot do so if he supplies luxuries to an infant. The court will decide what are luxuries, having regard to the position of the infant. An infant cannot enter into a contract.

The murder of young children is known as infanticide. At one time, to deal with the surplus population, it was much practised in India. Certain primitive peoples, both in the ancient and the modern world, have resorted to it, either for the same reason, or to rid the community of weaklings.

Infant Mortality Term used for the death rate among children under one year old. At one time this was terribly high, but in the 19th century civilised countries took steps to reduce it and it has been enormously reduced. The steps taken include the provision of milk and nurses, the isolation of infectious cases, better housing, greater cleanliness, and in general all that makes for a higher standard of living. The rate varies very much between various districts, and it is still much too high where housing conditions are bad.

Infantry Word used for foot soldiers. Ever since organised warfare began the infantry have been the most numerous and the most important part of an army. It was so in the Persian, the Greek and the Roman armies and was equally so in the changed conditions of the Great War. Early armies consisted of infantry and cavalry, the latter a comparatively small body, and in the Middle Ages there were many struggles between the two, the advantage being sometimes with one and sometimes with the other. Later the artillery made a third arm, and later still came the airmen, but since about 1400 no major battle has been won without a stout body of infantry.

Infantry to-day are organised in battalions about 1000 strong and form something like three-quarters of the strength of the modern army. From early times they have been classified, usually according to their principal

weapon, and so we bear of slingers, archers, crossbowmen, pikemen, fusiliers, grenadiers, riflemen and others. Mounted infantry are infantry who use horses to aid their progress, not to fight on as do cavalry.

Infection Conveyance of disease through the entrance into the body of micro organisms which generate toxins in the blood or tissues of the patient. Many infective disease germs are carried by persons apparently healthy as in the case of typhoid fever, and a number of animals and insects are responsible for the spreading of contagious diseases.

In Great Britain the more serious infectious diseases, scarlet fever and smallpox, for instance, are notifiable, i.e., the medical officer of health must be informed, under penalty of a fine, when a case occurs. Other diseases, e.g., measles, can be made notifiable if a local authority desires it.

Inferiority Complex In psychology, feeling of inferiority, manifested by lack of confidence, dissatisfaction with one's achievements, diffidence, etc. It often leads to a reaction or swing in the other direction the subject assuming a bold, confident, self-satisfied or even pompous demeanour. Some Psychoanalysts derive the inferiority feeling from some actual physical drawback of the subject.

Infidel Word meaning without faith and denoting, more or less opprobriously, one who rejects Christianity, while accepting no other faith. It is not applicable to heathens, to those rejecting particular doctrines only, or to doubters prepared to be persuaded. Mohammedans designate Christians by similar words, *gaour*, *kafir*.

Inflammation Condition of a part of the body. It is characterised by a congestion of the blood vessels causing redness, rise in temperature, swelling and pain and is due to the presence of microbes, irritant bodies, burns, etc. The white blood corpuscles or leucocytes in the blood vessels destroy the microbes and the remains of the dead microbes and leucocytes form pus or matter. Where chronic inflammation occurs, it may be caused by such complaints as rheumatism, gout or tuberculosis.

Inflation Condition of being puffed up with air, or gas. It is used when air is pumped into motor tyres and in other such cases.

It is also used financially for an increase in the amount of money especially paper money, in circulation. There was a good deal of this in most European countries during the war period and it was suggested as a remedy for the serious depression that prevailed in 1931-32. Its effect is to raise prices. The opposite process is called deflation (*q.v.*) See **REFLATION**.

Influenza Infectious febrile disorder of short duration. It is characterised by catarrh of the respiratory and intestinal tracts and more or less prostration. It usually occurs in epidemic waves. Apparently caused by a microbe, which usually operates within 48 hours. It may sweep rapidly round the world as it did in 1918-19. The disease has a low death rate as a rule but has protracted effects upon the general health.

Treatment—To avoid risk of complications rest in bed in a warm room is essential until the temperature is normal (98.4°F). Aspirin will relieve pain and reduce temperature and a light diet should be adopted. An aperient should also be taken.

Informer In English law a person who prosecutes another for breaking the law. In 1931 there were cases of this kind and common informers brought actions against the proprietors of cinema houses for keeping these open on Sunday. In one case at least of this kind, large damages were awarded to the informer.

Another kind of informer is a criminal who comes forward to give evidence against his fellow criminals. This is usually called turning king's evidence.

Ingatstone Town of Essex, 24 m. from London, on the L.N.E. Rly. Near is Ingatstone Hall, the seat of Lord Petre. Pop 600.

Inge William Ralph. English divine. Born in Yorkshire, June 6, 1860, he was educated at Eton and King's College Cambridge. From 1880-84 he was a master at Eton and from 1889-1904 was fellow and tutor of Hertford College Oxford. In 1905 he became vicar of All Saints, Ennismore Gardens, London, and in 1907 Lady Margaret Professor of Divinity at Cambridge. In 1911 he was made Dean of St Paul's. During his years at St Paul's, Dean Inge became a very popular writer, dealing fearlessly with the problems of the modern world. His ideas are contained in *Outspoken Essays*, *The Idea of Progress*, *Lay Thoughts of a Dean*, *More Lay Thoughts of a Dean*, 1931, and other books. He has written standard books on mysticism and the philosophy of Plotinus. In religion Inge is a broad churchman with only scant sympathy with High Church ideas.

Ingelow Jean. English poetess. Born at Boston, March 17, 1820, in 1863 a volume of her verse attracted attention, and was followed in 1867 by a long poem, *A Story of Doom*. She then turned to novel writing, and published *Off the Skilings*, *Don John* and other books. She died in London, July 20, 1897.

Ingersoll Town of Ontario on the Thames 19 m. from London, on the C.P. and C.N. Rlys. The town has some manufactures and there is an export trade in farm produce. Pop 5150.

Ingersoll Robert Green. American writer. Born Aug. 11, 1833, the son of a minister, he became a lawyer. He served in the Civil War and was afterwards known as Colonel Ingersoll. In politics, having been a Democrat, he turned to the Republicans and was made Attorney General of Illinois. He was better known for his attacks on Christianity. He died July 21, 1899.

Ingleborough Hill in Yorkshire, about 3 m. from Settle in the N.W. of the county, and 2370 ft. high. On it are remains of a fort and in it is Ingleborough Cave containing stalagmites and stalactites.

Ingletton Market town of Yorkshire (W.R.), 10 m. from Settle and 216 from London on the L.M.S. Rly. Pop 2401.

Ingot Unwrought metal cast and moulded into portions of a convenient shape and size for further use. The term is applied particularly to gold, silver and steel.

Ingram Rex. Film producer. He was born in Dublin, Jan. 16, 1892. Going to the United States, he worked there as a sculptor and an actor, afterwards becoming connected with the film industry. His

productions include *The Garden of Allah* and *The Four Horsemen of the Apocalypse*

Ingres painter Born Aug 29, 1780, he was awarded the Grand Prix in 1801 after 4 years' study. Consisting chiefly of portraits and classical subjects, his work is represented in the Louvre and many European collections and at the Musée Ingres at Montauban opened in 1867. He died Jan. 14, 1867

Inhabited House Duty

Tax levied until 1924 on all inhabited houses in Great Britain over a certain yearly value. It was introduced in 1851 and was on a graduated scale, 3d, 6d, or 9d, on houses worth more than £20 a year. On farmhouses, shops and public houses it was 2d, 4d or 6d. It was abolished in 1924.

Inhibition Term meaning external restraint. In psychology it is applied to the repression of an impulse, etc., which, from its nature, is repugnant to the conscious mind. Many primitive urges are thus inhibited. Inhibition may not be complete, and the energy is then displaced on to some associated mental process not unacceptable to consciousness. See PSYCHO-ANALYSIS, REPRESSION

Initiation Introduction or admission by preliminary instruction or ceremony into an office or society. In primitive culture ceremonial introductions, whether into adult privileges and duties, the status of leadership or secret guilds, sometimes meant the effusion of blood, as by circumcision, tattooing or other mutilations.

Injection Term used in medicine for the method by which a drug or feed is introduced into the body by means of a syringe or similar apparatus. Hypodermic injection is a means of introducing drugs beneath the skin by a special form of graduated glass syringe attached to a sharp-pointed hollow needle. Another form of injection is the use of the enema for the washing out of the rectum with water in obstinate constipation or the introduction of drugs or foods into the intestinal tract.

Injector Apparatus used for causing a current of water to flow in a pipe by means of a jet of steam under high pressure. Various forms of injectors are used for feeding water to steam boilers, the earliest type being introduced by Henri Giffard in 1859. A form of the apparatus is used also for removing water from a boiler, and is termed an ejector, and another type maintains the vacuum in the cylinder of a vacuum brake.

Injunction Term used in English law. It means an order forbidding a defendant from doing something which he threatens to do. Thus, if there is an action about the ownership of some debentures, the plaintiff could apply to the court for an injunction forbidding the defendant to dispose of them until the action had been heard. Application for injunctions must be made to the High Court.

Ink Black or coloured liquid used in writing, printing, etc. Ordinary writing inks are made from ferrous sulphate and an infusion of gall-nuts with the addition of a little gum, but in blue-black inks aniline blue or indigo is added. Red ink is usually a solution of eosin dye. Copying ink is a writing ink containing glycerine to prevent

drying, and typewriter inks usually consist of a solution of merhyl violet or other aniline dyes, with oil, glycerine, etc. Printing inks are oily compounds of lampblack, paraffin, resin, etc. Marking inks are preparations of silver nitrate or aniline dye stuffs. See INDIAN INK.

Inkerman Ridge in the Crimea, the scene of a battle between the British and the Russians. The hill, which overlooks Sevastopol, was held by the British who were attacked on Oct. 25, 1854, by the Russians. On Nov. 5, during a dense fog, the Russians attacked again, and only after the arrival of British and French reinforcements were the Russians beaten off. The British lost about 2400 men, the Russians about 11,000.

Inkpen Village of Berkshire. In the neighbourhood is Inkpen Beacon, the highest point of the Berkshire Downs. It rises to a height of 959 ft at Walbury Hill. The village is 4 m from Hungerford. Pop 660.

Inland Revenue Name used in Great Britain for the revenue obtained from income tax, death duties, stamp duties and licences of various kinds. The collection of these taxes is supervised by the Board of Inland Revenue at Somerset House, London, W.C.

Inlaying Method of ornamentation of wood or metal. It consists of the insertion of small thin pieces of some material into the surface to form geometrical or other forms of designs. The materials used may be wood, ivory, pearl, tortoise-shell or metal, and inlaying is used for furniture, chessboards, small boxes, etc. In wood inlaying, thin veneers of different coloured woods are generally used to give contrasts in colour, and these veneers are glued to the surface of the object.

Inman William English shipowner. Born at Leicester, April 6, 1825, he was educated in Liverpool and entered business there. In 1849 he became a partner in a firm of merchants and in 1850 a shipowner. He founded the Inman line, and died July 3, 1881.

Inn House where travellers are accommodated. The larger inns are usually known as hotels, and all are in the eyes of the law public houses. If accommodation is available the proprietor must take in travellers who apply for accommodation. Every inn must be licensed if intoxicating liquors are sold, and for this purpose can only be open for certain hours each day.

Inns have a great historic interest. They existed in the time of the Romans. In England they are heard of in the 12th century, and from that time until the coming of the railways they played an important part in the life of the country. Some of them, such as The Mermaid in London and The Tabard at Southwark, are famous for their literary associations. Others, still standing, are famed for their age or picturesque appearance, or both. Such include The Feathers at Ludlow, the Luttrell Arms at Dunster, the Old George at Salisbury, the New Inn at Gloucester, The Maid's Head at Norwich, The Star at Alfriston and many others. The word means within, and a synonym is tavern. The Innholders' Company is one of the London livery companies. The hall is at 25 College Street, E.C. 4. See HOTEL.

Innerleithen Burgh of Peeblesshire, 0 m from Peebles, on the L N E Rly. The chief industry is the manufacture of woollen goods. The town has a mineral spring and pump room. The spring is the original of the one in Scott's *St. Ronan's Well*. Pop 2500.

Inner Temple One of the four English Inns of court. Its buildings are in the Temple, London, E.C., where it has a fine hall and library. The Society shares the Temple Church with the Middle Temple.

Innisfail Poetical name for Ireland. It means the island of destiny. Irish legends record that the Lia Fail, the stone on which Jacob slept when he saw the heavenly ladder, was brought to Ireland and placed at Tara, where it was used as a coronation stone.

Inniskilling Name formerly used for the Irish town of Enniskillen. It is borne by two regiments of the British Army. The Royal Inniskilling Fusiliers was raised in 1089 and ranks as the 28th regiment of the line. It has a fine record of service, including the Great War. The depot is at Omagh.

The Inniskilling Dragoons was raised at the same time and under the same conditions, Inniskilling having just been defended against the forces of James II and the French. After the Great War it was disbanded and the name taken by the 5th Dragoon Guards.

Innocent Name of 13 popes, the most important of whom was Innocent III (see below). Innocent I was pope from 402 to 417. He died March 12, 417, and was afterwards canonised. Innocent II reigned from 1130 to 1143. Innocent IV, who reigned from 1243 to 1254, was much occupied in the great quarrel with the Emperor Frederick II. Innocent V only reigned for a few months. Innocent VI, a Frenchman, reigned from 1352 to 1362, and Innocent VII from 1404 to 1406. Innocent VIII was pope from 1484 to 1492, and Innocent IX for a few weeks in 1591. Innocent X reigned 1644-55. Innocent XI, 1676-89, and Innocent XII, 1691-1700. Innocent XIII was pope 1721-24.

Innocent III. Pope from 1198 to 1216. The son of an Italian count and the nephew of Pope Clement III, he was born at Anagni in 1100, his name being Lothaire Conti. He was educated in Paris and Bologna and in 1181 became an official in the papal court. In 1191 he was made a cardinal, and in 1198 he was chosen pope. Innocent reigned for 18 years a period during which the papacy was at the height of its power. In Germany his influence helped Otto IV and then Frederick II to secure the imperial throne, he forced John of England to a humiliating surrender, and his authority was also exercised in France, Norway and other lands. Innocent called the council of the Lateran which in 1215 proclaimed a crusade and he was responsible for the crusade against the Albigenses. He died at Perugia July 16, 1216.

Innocents' Day The day commemorating the massacre of the children of Bethlehem (Matthew 2). The Greek Church observes it on Dec. 29 and Western Christianity on Dec. 28. In pre-Reformation days it was an occasion of public mourning in England.

Innsbruck Town of the Tirol and the capital of the district. It stands on the River Inn, 102 m from Munich, high amid the mountains, and is a popular tourist resort. Among the buildings, the first from the point of view of interest is the Franciscan church, which contains the magnificent marble cenotaph of the Emperor Maximilian I. Another famous building is a house with a roof of gilt copper tiles and a notable balcony of the 15th century. Near the town was a Roman station and later an abbey, the church of which still stands. It has a broadcasting station (283 M., 0.5 kW). Pop 56,400.

Inns of Court In England four societies that alone have the right of admitting men and women to practise as barristers. They are Lincoln's Inn, Gray's Inn, Inner Temple and Middle Temple. In Dublin there is an inn of court called the King's Inn and one has existed since 1922 for N. Ireland at Belfast. In Scotland a similar work is performed by the Faculty of Advocates.

Each inn is governed by barristers called benchers, one of whom is chosen each year to act as treasurer. Each of the four English inns has a hall, library, chapel and other buildings in London. At one time there were other inns of court in London, but these have now disappeared except that, in some cases, the name remains. Among these are Clement's Inn, Staple Inn, Serjeants' Inn, Thavies Inn and Clifford's Inn.

Inoculation Term applied to the introduction into the body by subcutaneous injection of an attenuated virus for the purpose of preventing a disease. The best known example of inoculation is that of vaccination for smallpox, but within recent years the use of anti-toxic sera and vaccines has extended the range of inoculation or vaccination to the prevention of many other diseases, such as tetanus, hydrophobia or rabies, diphtheria, typhoid and anthrax.

Inquest Inquiry of any kind. In England in mediaeval times inquests were used for a variety of purposes, but to-day the word is confined to inquiries held by a coroner. These usually concern persons who die suddenly, or by violence, in fact, every one for whom a doctor will not give a certificate stating the cause of death. The coroner also holds inquests on treasure trove. At one time a coroner had always to sit with a jury, but since 1927 he need only summon a jury if he thinks that the death was due to violence, such as murder or manslaughter, or to a street accident. See CORONER.

Inquisition Any inquiry, but chiefly the inquiry known in the Roman Catholic Church as the Holy Office. It was founded in 1248 by Pope Innocent IV for the suppression of heresy, and was directed by the members of the order of St. Dominic. The first tribunal was set up at Toulouse, and it was introduced into Italy, Spain, the Netherlands, Portugal, and taken to the countries of the New World. It lasted until the 19th century, when it was suppressed in the various countries at different dates.

The great age of the Inquisition was the 15th century, and the country where it was most active was Spain. Under an Inquisitor General, the most notorious of whom was Torquemada, it had an elaborate organisation. Before the tribunals any one suspected of heresy could be brought on the most fragile

Insanity The sittings were held in secret, and the accused knew nothing of his accuser. Torture was freely used by the officials, known as familiars, to extract confessions, and the condemned were usually burned with great ceremonial. Even allowing fully for exaggeration, the Inquisition was responsible for thousands of deaths and a vast amount of suffering.

Insanity State of having an unsound or disordered mind, being unable to control one's actions. Insanity is the result of disease of the mind, acquired or inherited, and if conduct is gravely affected, "certification" and detention in a mental hospital are necessary. The insane are protected by the Lunacy Laws, which are administered by a government department, called the Board of Control. See LUNACY.

Inscription Record of a durable character. It is inscribed upon various materials such as stone, burnt clay, wood, metal, etc., either in conventional writing, pictorial or hieroglyphic script. Our knowledge of the ancient races depends largely upon the decipherment of inscriptions upon buildings, tombs, pottery, etc. The famous Rosetta Stone with its three forms of script furnished the clue to the ancient Egyptian language, while the inscriptions on the Rock of Behistun in Persia gave the key to the cuneiform writing.

Insect Class of the arthropoda, a division of invertebrate animals. They have jointed appendages, and consist of a larger number of species than any other class of arthropods, at the same time possessing a general uniformity of structure. Insects are characterised by having the body divided into head, thorax and abdomen, with the head provided with antennae, mandibles and other appendages. The thorax bears three pairs of legs and in most cases two pairs of wings, while the abdomen is limbless but may have an ovipositor or its modification. The exoskeleton is of uncalcified chitin, which may be of considerable thickness.

Insects are air-breathers and respiration is by means of branching tracheae or air-tubes communicating with the exterior. The sexes are separate, and development is usually by a metamorphosis consisting of a larva, chrysalis or pupa, and imago, but in some it is direct. For the most part insects are terrestrial, but a few are adapted for aquatic life.

Insecticide Term applied to various chemicals or chemical mixtures used in agriculture and horticulture to destroy noxious insects. These substances may be in liquid or powder form and are either stomach poisons or contact poisons. Insecticides of the first class destroy by being taken in with the food, and consist of arsenical salts, copper sulphate or sodium fluoride and silicates. Contact insecticides enter by the respiratory pores on the insect's body causing suffocation. Examples are pyrethrum powder and tar oils.

Inskip Sir Thomas Walker Hobart, English politician. Born in Bristol, March 5, 1876, the son of a solicitor, he became a barrister and a K.C. In 1918 he was elected Unionist M.P. for Central Bristol, and in 1922 he was Solicitor-General, an office he again held in 1924-28. In 1928-29 he was Attorney-General, and in 1931 he was again Solicitor-General in the National Government, later becoming Attorney-General. In 1929 having

lost his seat at Bristol, he was returned for the Fareham division.

Insolvency Condition of being unable to pay one's debts. It is thus the equivalent of bankruptcy, though many cases of insolvency are dealt with by a deed of arrangement. See DEED, BANKRUPTCY.

Insomnia Inability to sleep, especially when chronic. Distinguishable from the sleeplessness attending many illnesses and from the occasional wakefulness caused by indigestion, it is often due to worry or overwork, but sometimes succeeds a past illness, e.g., influenza. It is believed to be due to a disturbance of the mechanism controlling the cerebral blood vessels. It is best remedied by simple dietetic measures, fresh air and avoidance of disturbing factors. Sedative drugs, except under medical advice, should be scrupulously shunned. See SLEEPLESSNESS.

Inspector One who overlooks or inspects. The Home Office has inspectors of factories and mines; the Board of Education has inspectors of schools; the Board of Inland Revenue has inspectors of income tax. Local authorities have inspectors of food and for other purposes.

Inspiration Act of drawing in breath, as opposed to expiration. Analogously the word denotes influences exerted upon the human mind and spirit, and specifically those which resulted in certain scriptures being inspired of God (2 Tim. iii, R.V.). The nature of this inspiration has been much discussed. The older view, that of verbal, plenary or mechanical inspiration, is mostly displaced nowadays by that described as dynamical, essential or vital. Under this it is held that the Bible contains the Word of God, and that the inspiration lies, not in the manner of the record, but in the value of the revelation.

Instinct Term which is defined in different ways according to the school of psychology. It may be expressed generally as an inherited or innate capacity for the performance of certain actions in response to a particular stimulus without previous inference or teaching, or it may be defined as the fulfilment of certain fundamental needs, such as the satisfying of the desire for food. Instinct is seen at its best in the activities of ants, bees and wasps.

Institute Word meaning something that is set up, a variant being Institution. There are institutes and institutions of all kinds in Great Britain, e.g., poor law institutions.

The Institute of France, established in 1795, was formed to group together the five great learned societies of that country, the French Academy, the Academy of Inscriptions and Belles Lettres, the Academy of Sciences, the Academy of Fine Arts and the Academy of Moral and Political Sciences. The number of its members is 228 and the headquarters are in Paris.

The Institut Français is an educational centre in London, its object being to promote a knowledge of France among English people. Its offices are 7 Cromwell Gardens, S.W. 11.

An institutional church is one that undertakes social and educational work of various kinds, as well as the ordinary religious activities. The first was established in Boston in 1894.

Insulation Term in electricity expressing the resistance to the

passage of an electric current by certain substances known as insulators. Dry air and gases are almost perfect insulators, while among solids, ebonite, rubber, paraffin wax, mica, porcelain and gutta serena are most used.

Insulin Extract obtained from the pancreatic glands of oxen. It is taken from islets in the pancreas, and is much used in the treatment of diabetes. It was discovered by F. G. Banting.

Insurance Method of providing by regular payments for an event, either certain, such as death, or possible such as fire. To-day insurance is an enormous business conducted by companies with vast funds and wide ramifications. In Great Britain special legislation has been passed to protect insured persons, and the affairs of insurance companies are to some extent supervised by the state. Each policy, this being the name for the contract between the insurer and the insured, must conform to certain conditions and must be stamped.

Some companies deal in only one kind of insurance, but most of them conduct almost all classes of business. This may be divided into life, fire, marine and accident, but there are other branches, the insurance of machinery and holders of aircraft and of plate glass. Each has its own conditions and its own experts. Farmers can insure their crops and their cattle. Holiday makers can insure against loss, owing to bad weather, and parents can insure against the failure of children, owing to illness to attend school. In addition unusual risks such as the failure to hold a seat at a general election, or the missing of a boat to America, can be insured against at Lloyd's.

Policies of life insurance are taken out for a fixed sum and the premiums paid at stated intervals. The sum insured for may be payable at a certain age, say 65, if the insured reaches that age, and some policies have bonuses added to them. The amount of the premium varies with the age, sex and health conditions of the insured. Practically all property is insured against fire, and many people find it convenient to take out a combined policy that covers their possible loss not only in the event of fire, but also against burglary and accident to servants.

Marine insurance is a highly specialised branch. All vessels and their cargoes are insured, and any loss is borne on the principle of average, this being worked out by average adjusters. Insurance against accident is a newer branch and much of it is concerned with motor cars. Since 1930 every motorist must be insured against third party risks.

Two other forms of insurance are very popular in Great Britain. Industrial insurance is a special branch and is controlled by special laws. Much of it is done by the friendly societies but large companies also exist for the purpose and some of these have accumulated very large reserves. The premiums are collected by paid agents every week, and the societies are thus called collecting societies. The policies are chiefly life policies, and a good many are to provide funds for burials. Life policies of this kind must not be for more than £300, and to prevent abuse no one can take out a policy on the life of a child for more than £15, and this can only be done by the parent or other near relative.

A form of insurance is conducted by some of the great national newspapers. By becoming a regular subscriber a person can be insured

against accident. The terms are laid down in the newspaper itself. Very large sums are given in case of death in a railway accident, a comparatively rare occurrence, but smaller sums for road accidents. Quite apart from this insurance work are the state schemes for insurance against ill health and unemployment, which affect over 17,000,000 workers. See HEALTH, UNEMPLOYMENT.

INSURANCE AS A CAREER The possibilities offered by insurance as a career are considerable for the man with some mathematical ability and keen commercial instincts. The four branches of insurance—fire, marine, accident and life—are usually separated. Each has many departments, and ample scope for the able man.

Insurance is entered by the post of Junior Clerk for which a secondary education is essential, and matriculation is very generally called for. When university men are employed higher starting salaries are paid. As a rule the commencing salary is anything up to some £70 or £80 per annum.

The Chartered Insurance Institute, 11 Queen Street, London, E.C. 4, holds insurance examinations, and through its local Insurance Institutes in various parts of the country arranges classes for all engaged in insurance. An associateship is conferred on a candidate who shows proficiency in any one of the four branches of insurance—fire, life, accident and marine, whilst a candidate for Fellowship must possess in addition a general knowledge of all the branches of insurance and also of the subjects Principles of Commerce, Banking and Finance, and Elements of Commercial and Company Law.

Intellect General term for the activities of the mind in reference to the power of understanding and reasoning, the power of perception and thought and of synthesising isolated sensations. The term intellect has been used by philosophers in many senses from Aristotle downwards. Pure intellect according to Kant is intellect as separate from sense.

Intelligence Term which, in the general sense, may be defined as the fundamental and inborn ability to learn by experience and to employ the means to obtain the end in view. It is used, however, with a variety of shades of meaning, some regard intelligence as equivalent to cognition, others as expressing the average mental ability indicated by various intelligence tests. Obviously there is a wide range in degree and intensity between the dawning intelligence of an ape and the matured mind of man.

Intelligence Department

Department of a navy, army, public department or business that exists to collect information. Every government keeps a secret service department which is sometimes called an intelligence department. In Great Britain this is under the Foreign Office and exists to keep the authorities acquainted with happenings in foreign countries.

The army has an intelligence department under the director of military operations and intelligence, and the air force has a similar department. In the navy there is a director of intelligence.

Intelligence Test Means of examining or measuring the amount of intelligence in an individual. Apart from ordinary examinations, several

systems of tests are in use. Generally an intelligence test consists of carefully framed questions, or a set of directions to be followed, or again tasks to be performed. In some systems, speed of response to the questions or work is important. These tests are of especial value in grading school children.

Interdict Ecclesiastical punishment pronounced by the pope or some other high official. It may be either general or local. The most famous general interdict was when Pope Innocent III placed England under one. This meant that no religious services could be held, but it was impossible to enforce it completely.

In Scotland an interdict is a legal term corresponding to the injunction of the English courts of law. See INJUNCTION.

Interest Money paid for the use of money. It is paid at a fixed rate, usually yearly, or half yearly, or quarterly, for the use of a loan. The money paid for a mortgage is interest, and when it is paid income tax must be deducted. The rate of interest is governed by the law of supply and demand, and also by the quality of the security offered. The bank rate is an indication of the interest charged on loans for short periods. Dividends are not, strictly speaking, interest on money lent, but profits on trading. Interest may be either simple or compound. Compound interest is interest on interest, and amounts up at an enormous rate. At compound interest of 5 per cent a sum of money will double itself in about 14 years.

Interlaken Pleasure resort of Switzerland, on the Aar in the canton of Berne, 17 m from Thun. It is the centre of the district called the Oberland. Near is Lake Brienz and overlooking the town is the Jungfrau. Pop 3700.

Interlocutor Term used in law. Interlocutory proceedings are those which take place between the beginning of an action and the trial. Such include interrogatories and applications in chambers. In Scotland an interlocutor is an interim judgment.

Intermezzo Short burlesque or play of a light, amusing character. It is usually given in an interlude of a performance of grand opera or drama.

In music, a brief composition to be played in the interval of a longer work, or for ordinary rendering, is called an intermezzo.

International Socialist movement in which socialists from many countries are united. There have been three such movements or internationals, and each has held several congresses.

The first international accepted a programme drawn up by Karl Marx and lasted from 1866 to 1872. The second international, in which there was a trade union element, was organised in 1882. It sought to compass the aims of socialism by constitutional, not revolutionary, action, and it held several congresses between 1882 and 1930. The third international was organised in Moscow and was revolutionary in its aims. It declared in favour of establishing communism by force.

International Labour Organisation International body, associated with the League of Nations and established at Geneva. Its centre is the International Labour Office. Repre-

sentatives of the principal industrial nations are included on the governing body. The office organises conferences, dealing with labour matters, at which governments, employers' and workers' organisations are represented, with the object of raising the standard of labour in less advanced states to the level of that in other countries.

International Law Body of law regulating the relations between nations, especially in time of war. It differs from other bodies of law in that there exists no power to enforce its decisions, but much is expected from the increasing force of public opinion.

The Romans recognised something like international law in what they called *jus gentium*, or the law of nations, and the idea never entirely died out though it had little practical value. In the Middle Ages and later certain customs were observed, and to give clarity to these, Hugo Grotius in 1625 wrote his *De Jure Belli et Pacis*, or the law of war and peace. This founded modern international law. It is contained in customs, treaties and declarations, such as the Convention of Geneva, and deals with such matters as the treatment of prisoners and wounded, contraband and blockade, the rights of neutrals and the special conditions of maritime and aerial warfare. The Hague Conferences have done something to strengthen and widen its authority. International law is administered by the prize courts and the court of international justice at the Hague, sometimes called the Hague Tribunal.

The Institute of International Law is a society founded in 1873 to study the subject. Some universities have professors, or lecturers, in this branch of law, on which a number of books have been written.

Internment Detention of soldiers and civilians of a hostile or neutral state during times of war. By international law all troops entering a neutral country must be interned or kept in that country until peace is made. The law also applies to ships which stay in a neutral port beyond the brief time allowed. There were cases of both kinds during the Great War. The British troops who escaped from Antwerp into the Netherlands were interned there, and the United States interned German ships that did not put to sea.

Interned soldiers and sailors are usually sent to a camp called an internment camp. This term therefore has come to be used for a camp in which prisoners of war are kept.

Interrogatory Term used in English law. In civil actions either party can, before the trial, seek information about the case from the other. This is put in the form of a question, or interrogatory, and must be answered on oath. The interrogatories must be relevant to the issue and the masters in chambers prevent the system from being abused.

Interregnum Time between two reigns, a period when a country has no emperor or king. There was an interregnum in Germany from 1251 to 1273. The period in Britain between 1649 and 1660 was an interregnum.

Intestate Person who dies without a will. In such cases English law provides that the property shall pass according to certain rules. If a married man or woman dies, leaving a widow or widower, and there

are no children, all the property passes to the surviving wife or husband. If there are children, the surviving husband or wife takes all the furniture and personal effects and £1000 free of death duties. The remainder is divided into two equal parts. One is put in trust and the income paid to the surviving husband or wife, passing on his, or her death, to the children. The other half passes to the children, or to the child if there is only one. If a child of the intestate has died leaving children, such children inherit their parent's share.

If an unmarried person, or a widow or widower, without children dies, the property passes to the parents. If they are dead it passes to the brothers and sisters in equal shares and if there are none to more distant relatives. If there are no relatives the estate passes to the crown.

These rules date from 1925. Before that time the real property of an intestate passed to the eldest son and the personal property to the widow or widower or children, the widow or widower receiving one third. In 1925 the distinction between real and personal property was abolished.

Intestine Lower part of the alimentary canal. It reaches from the pyloric end of the stomach to the anus and is called also the guts or bowels. Receiving the bile pancreatic and intestinal juices it completes the digestive process nutritive matters entering the blood vessels and lacteals and refuse matters being excreted. It averages in man 30 ft in length and is lined throughout with mucous membrane. It includes the small intestine, 24 ft long comprising duodenum jejunum and ileum and the large intestine 6 ft long comprising caecum, colon and rectum.

Intestinal Obstruction is usually caused by acute constipation or a diseased state of the bowel.

Symptoms—Pain, and vomiting first bilious and later 'fecal' in nature. There may be diarrhoea at first until the part of the bowel below the obstruction is emptied after which nothing will pass. The condition is very serious and a doctor should be called at once. In the meantime nothing should be given by the mouth.

Intimidation Act of causing a person to do something or to refrain from doing something by threats. In English law intimidation of this kind is an offence and an M.P. or councillor can be prosecuted if intimidation is proved against him or his agent.

Intoxication Poisoning of the body by drugs or alcohol etc. In common usage the term denotes the effects produced by alcohol (q.v.). Auto-intoxication is self poisoning by the action of toxins produced within the body. These may arise from defective metabolism or from the presence of a septic focus (e.g. in mouth, nose or bowel) and the consequent activity of harmful bacteria.

Intuition Power of perceiving a truth immediately without any kind of reasoning. Some moral philosophers hold that certain moral values are intuitive. We have an intuitive knowledge of right and wrong, they have no need to reason about it. This was taught by Francis Hutcheson and later by James Martineau. The opposite doctrine is that moral values are simply the outcome of long centuries of human experience.

Invalides Hotel des Invalides in Paris. It is on the Champ de Mars.

and was built in 1670 as a hospital for disabled soldiers. It now contains the tombs of Napoleon, Foch and other great French soldiers as well as a collection of armour and relics of Napoleon.

Invar Alloy of steel and nickel. It is much used in the making of instruments used by scientists for measuring purposes. This is because it is less liable to contraction or expansion from heat than any other known alloy.

Invention Term applied to the discovery of some contrivance or device previously unknown. It would appear that an invention may arise either as the result of numerous experiments, or exhausting all possibilities, or as a sudden inspiration. From a practical standpoint the utility and ability of the device to work is essential. To protect an invention it must be registered at the Patent Office in London.

Inventory Word meaning a list of goods or other property. Such are compiled when a furnished house is let or the estate of a dead person is wound up. An inventory of the goods concerned is generally attached to a bill of sale.

A duty formerly paid in Scotland on the personal estate of deceased persons was called the inventory duty.

Inveraray Burgh and county town of Argyllshire. It stands at the mouth of the River Aray, just where it falls into Loch Fyne, 40 m from Glasgow. Inveraray is best reached by steamer. Pop. 500.

Invercargill Town of New Zealand in South Island 140 m from Dunedin and standing on the estuary of the New River. It is the centre of an agricultural district and has some manufacturing industries. Bluff Harbour is its port. Pop. (1932) 21,350.

Inverclyde Baron Scottish title borne by the family of Burns. Sir George Burns one of the heads of the Cunard Line of steamers left a son John, who was made a baron in 1897. He died in 1905 and two of his sons succeeded in turn to the title. The younger, James Coland Burns, died Aug. 16, 1919, when his son John Alan Burns, became the 4th baron. The family seat is Castle Wemyss in Renfrewshire.

Inveresk Village of Midlothian, on the Firth. 6 m from Edinburgh, by the L.N.E. Ry. Here are large paper mills.

Inverforth Baron Scottish shipowner. Andrew Weir was born at Kirkcaldy, April 24, 1865, and became a clerk in a shipping office in Glasgow where he founded the business of Andrew Weir & Co., which became a large and flourishing firm. In 1917 Weir was engaged at the War Office with the supply of munitions to the forces. From 1919 until 1921 he was Minister of Munitions.

Invergordon Burgh and seaport of Ross and Cromarty, on Cromarty Firth 13 m from Dingwall by the L.N.E. Ry. The chief industry is shipping. During the Great War it became a naval base and is still used for that purpose. Pop. 1050.

Inverkeithing Burgh and seaport of Fife-shire on the Firth of Forth 13 m from Edinburgh on the L.N.E. Ry. During the Great War Inverkeithing was a busy naval base. Pop. 3356.

Inverlochty Village of Inverclyde shire on the River Lochy, 1 m

from Fort William Here, on Feb 2, 1645, Montrose gained one of his victories Sir W Scott describes the battle in *The Legend of Montrose*.

Inverness Burgh and market town of Inverness shire, also the county town The recognised capital of the Highlands, Inverness stands on the north side of the River Ness near where it falls into the Moray Firth It is 160 m from Edinburgh and 100 from Aberdeen, on the LMS and LNE Rlys It is also on the Caledonian Canal There are some historic houses and the Stone of the Tubs is the burgh's proudest possession The industries are distilling and railway works, and there is a large agricultural trade Inverness is a popular tourist resort Pop (1931) 22,300

Inverness Seaport of Nova Scotia, on Cape Breton Island at the mouth of the Big River The terminus of a railway line, it is 186 m from Halifax Its trade is chiefly the shipping of coal Pop 2963

Inverness-shire County of Scotland, the largest in the land It covers 4210 sq m, has an indented coast line on the west and consists of two portions, one the mainland, the other consisting of Skye, Harris, North Uist, South Uist and many other islands of the Hebrides The Caledonian Canal cuts the mainland area into two parts Inverness is the capital Other places are Fort William and Kingussie The shire, with its many lochs and valleys between the mountains, contains wild and beautiful scenery The soil is unfertile and most of it is devoted to deer forests and grouse moors, with only a small portion for sheep rearing The chief rivers are the Spey, the Ness and the Beaulv In the county are Ben Nevis and other lofty mountains It is served by the LMS Rly Pop (1931) 82,082

Inversnaid Village of Stirlingshire, on the east side of Loch Lomond, and a calling place for steamers which meet the coaches here The scenery around is very beautiful

Invertebrate General term for those animal types which are devoid of a backbone and other characters such as a dorsal tubular nerve cord, the possession of gill slits at some stage, a ventral heart, etc., seen in the vertebrate animals The invertebrates include the molluscs, arthropods, worms and lower types

Inverurie Burgh of Aberdeenshire, on the Urie and Don, at the point where the two rivers meet, 540 m from London by the LNE Rly, and 16 m from Aberdeen Cattle markets are held, and there are railway shops and paper mills Pop 4425

Investiture In feudal times the ceremony by which a lord handed property to a vassal It usually took the form of the vassal swearing an oath and then receiving something as a symbol of possession, for instance, a clod of earth

The investiture controversy, as it was called, arose when the Church forbade bishops, abbots and other holders of land to receive investitures from laymen The matter was complicated because the land went with an ecclesiastical position such as a bishopric, so that the kings and lords were investing clerics, not only with land, but with offices

In 1075 Pope Gregory VII (Hildebrand) ordered this practice to cease, and there was a bitter struggle between him and the Emperor

Henry IV Henry at length submitted, but the fight soon began again, and continued until 1122 when the Concordat of Worms was made between the Emperor Henry V and the Pope The Emperor gave up the right of investing with ring and staff, which he left to the Pope, but retained the right of investing the prelates with lands or temporalities This became the law in the case of other rulers and lords In England a similar struggle took place between Henry I and Anselm It was settled on the same lines in 1107

Invincibles Irish secret society It consisted of Fenians, and was responsible for a number of murders and other outrages between 1880 and 1885 The murderers of Lord F Cavendish in Phoenix Park in 1882 belonged to this gang

Several British battleships have been named the Invincible One was a battle cruiser sunk in the Battle of Jutland in 1916 She carried eight 12 in guns and was 555 ft. long

Io In Greek mythology the daughter of the first King of Argos She was beloved by Zeus, who turned her into a heifer to protect her from the jealousy of Hera, his wife Hera obtained the heifer and set the hundred-eyed Argus to watch her Zeus sent Hermes to kill Argus, but Hera put a gadfly on Io to torment her Io wandered far till she reached Egypt where she regained her human form and her son Epaphus, was born She is supposed to be identical with the moon goddess

Iodine Non-metallic element widely distributed in nature It occurs chiefly as iodides and iodates of sodium, potassium, calcium and magnesium Its symbol is I and atomic number 53 When isolated from its compounds it is a lustrous, bluish-black solid, which volatilises at 107°C, forming a violet coloured vapour The main supply is from the impure Chile saltpetre, or caliche, of South America, but large quantities are obtained from kelp or seaweed

Iodoform Substance used as a mild, general surgical antiseptic It is prepared by the action of iodine upon ethyl alcohol or acetone with heat in the presence of an alkali It occurs as lemon-yellow hexagonal scales having a disagreeable smell resembling that of saffron, and it is soluble in alcohol, ether and oils

Ion Term applied in electro-chemistry to electrically charged molecules or groups of molecules formed by the dissociation of an electrolyte On electrolysis the cations and anions proceed to the cathode and anode respectively The term is used also for the minute particles of a gas carrying electrical charges and produced under certain conditions, the gas becoming a conductor of electricity

Ion In Greek legend the founder of the Ionian race He was the son of Apollo, his mother being Creusa, the wife of Xanthus By chance his mother nearly poisoned him when he reached manhood His fate is the subject of a play by Euripides called *Ion*

Iona One of the Hebrides and part of the County of Argyll It is about 3 sq m in area and has a few inhabitants who farm small plots of land, or are engaged in fishing On the east side is the village of Iona

Iona is chiefly famous for its connection with Christianity About 563 S Columba landed here and founded a monastery which became very famous Later the island was made the seat of a bishop The cathedral, which was

destroyed at the Reformation, is the property of the Church of Scotland. It was partly restored in the 20th century. There are other ecclesiastical ruins on the island, including two crosses, also a cemetery in which some of the early kings were buried. On it, too, is the chapel of St. Oran.

Ionian Name of one of the chief races that settled in Greece in ancient times. They may have arrived as early as 1500 B.C. About the 11th century B.C., many of them settled on the coast of Asia Minor where a district was named after them—Ionia. For some centuries the cities here were very prosperous and homes of culture. Homer wrote in the Ionian dialect.

Ionian Islands Islands of Greece, off the west coast in the Ionian Sea. The chief are Corfu, Cephalonia, Zante and Ithaca and altogether they cover 740 sq. m. Like Greece, the islands are mountainous but in the valleys the soil is very fertile. The chief town is Corfu on the island of that name. For some time the islands belonged to Venice. From 1814 to 1864 they were under British protection being then handed over to the new kingdom of Greece.

Ionic Order One of the three orders of Greek architecture. It is characterised by having more slender proportions than the Doric, with profusely ornamented mouldings. The frieze is usually plain, and the column has fine flutings with intervening fillets or flat spaces. The base is richly moulded and the cornice adorned with volutes at the corners.

Iowa State of the United States. It lies to the west of the Mississippi and is an agricultural district, maize being the chief crop. Coal is mined. Des Moines is the capital. Sioux City and Davenport are the next largest towns. The area is 56,147 sq. m. The Missouri and the Des Moines flow through the state. Iowa sends two senators and 6 representatives to Congress. For local affairs there is a legislature of two houses. Iowa became a state in 1846. Pop. (1930) 2,479,039.

Ipecacuanha Dried knotted roots of *psychotria ipecacuanha*. It is a native of Brazil and is exported chiefly from Rio de Janeiro in the form of small pieces having a beaded appearance. The drug has an acrid bitter taste and faint odour and is used as a powerful emetic and expectorant. Its properties being due to an alkaloid emetine.

Iphigenia In Greek legend the daughter of Agamemnon and Clytemnestra. Artemis, provoked by the slaying of her favourite hart, becalmed the Greek fleet destined for Troy at Aulis. To propitiate her the soothsayer Calchas ordered the sacrifice of the princess but this was averted by the goddess substituting another victim and transporting Iphigenia to the Tauric Chersonese. There although as a priestess she was bound to sacrifice shipwrecked mariners she saved her brother Orestes and his friend Pylades. The story forms the plot of plays by Euripides.

Ipswich Town of Suffolk, also a county borough and a river port on the Orwell 69 m. from London and is served by the L.N.E.R. The gateway built by Wolsey still stands. The Great White Horse Inn is situated in *The Pickwick Papers*. With Bury St. Edmunds Ipswich gives its name to a district created in 1911. The industries include engineering works, tobacco factories

and chemical works. Clothing and agricultural implements are made. There are docks for the shipping. Pop. (1931) 87,557.

Ipswich Town of Queensland 24 m. from Brisbane by rail. It is an agricultural centre, and there are woolen manufactures and railway works. There are coal mines near. Pop. (1931) 26,253.

Iquique City and seaport of Chile. It is 150 m. to the south of Arica. The centre of the city is the Plaza Prat. There are manufactures, but the chief industry is the shipping of nitrate, guano, silver, and other metals. Pop. (1932) 40,459.

Iran Old name for Persia. Iranian is the name of a language group which includes the Persian and Zend languages and is allied to the Baluchi, Kurd, and other languages.

Iraq Country of Asia. It lies between Persia and Arabia and stretches from Syria to the head of the Persian Gulf. Its area is 177,148 sq. m. The chief rivers are the Tigris and the Euphrates. The capital is Bagdad. Other places are Basra, the chief seaport, and Mosul. The country is rich in oil and exports cotton, wool, barley, and other forms of agricultural produce. There is a railway system and some good roads. The unit of currency is the gold dinar, worth £1 and divided into 1000 fils. The country is governed by a king and a cabinet. There is a parliament of two houses—a senate and an elected assembly. A system of justice has been established with a supreme court at Bagdad. Great Britain has an air force in the country and there are some British officials. The chief languages spoken are Arabic and Kurdish.

Formerly part of Mesopotamia and included in the Turkish Empire, Iraq was made a state in 1910. It was ruled by Great Britain under mandate from the League of Nations, and in 1921 Faisal, a son of the King of Hlojaz, was chosen king. In 1927 Great Britain by treaty agreed to recognise Iraq as an independent state, and to support its entrance to the League of Nations. In 1933 King Faisal died and was succeeded by his son, the Emir Ghazi. The chief British representative is the high commissioner. Pop. 2,850,000.

Irawadi River of Asia. It rises in Assam, but most of its course is in Burma and it falls into the Bay of Bengal near Rangoon, where its several mouths form a delta 20,000 sq. m. in area. It is 900 m. long, most of its course being navigable and its main tributary is the Chindwin. Mandalay is on the Irawadi, which is sometimes spelt Irrawaddy, a name meaning great river. It is much used for the carriage of timber from the interior of Burma.

Ireland Country of Europe. Since 1922 it has been divided into the Irish Free State and Northern Ireland, each with its own government. The area of the whole country is 32,586 sq. m. and it is divided into four provinces and 32 counties. The provinces are Connaught, Munster, and Leinster. In the Free State and Ulster mainly in Northern Ireland.

Ireland has a wonderful coastline and its bays form some of the finest harbours in the world. Notable are Cork and Waterford on the south coast. Others include Belfast, Carrizford and Strangford Loughs. Along the coast are Bally Bay, Bantry Bay, Donegal Bay and Dublin Bay, the mouth of the Shannon.

and many others. The chief river is the Shannon, which is used to generate electric power. The other rivers include the Suir, Barrow, Nore and Slaney, forming one group, the Blackwater, Lee and Bandon in the south-west, and the Boyne and Foyle in the north. Others are the Liffey, on which Dublin stands, and the Erne. There are many lakes of which Lough Neagh is the largest. The few islands, chiefly off the west coast, include the Aran and Achill groups, Rathlin, Torr and Valentia.

There are several mountain ranges, but the centre of the country is a large plain. In Kerry are Macgillcuddy's Reeks, one of which is Carruntuohill or Carntual, the highest peak in the land. The mountains of Wicklow on the east side, and of Connemara on the west, are remarkably picturesque. In the north are the Mourne Mountains on one side of the land and the hills of Donegal on the other. In the centre is a good deal of bog, the bog of Allen being the largest stretch, but elsewhere the soil is fertile, and the herbage specially suitable for horses. Cereals and potatoes are grown, cattle and a large number of pigs are reared. The island has a good railway system and several canals. Dublin, Belfast, Cork and Galway are the capitals of the four provinces. The three towns next in size are Limerick, Londonderry and Waterford.

In early times Ireland was a centre of Christianity and learning, and there are still many remains of its religious houses. It was ruled by a number of kings and chiefs, who were more or less subject to a high king at Tara, and it had its own system of law, the Brehon. In the 8th century and later it suffered a good deal from the inroads of Scandinavian pirates, and their defeat at Clontarf by Brian Boru in 1014 is regarded as a decisive event.

In the reign of Henry II Ireland became definitely associated with England, and henceforward it was, in a sense, an English possession. John called himself Lord of Ireland and until Henry VIII took the title of king, Lord was the rank of the English sovereigns there. Much land was taken from the natives and given to English settlers, and there grew up side by side two distinct races, one dominant and landholding, the other servile and landless. Later, when the Reformation had done its work, the antagonism between the two was made much worse by religious antagonism, as the Irish were Roman Catholics while the English were mainly Protestants. As in England the monasteries were dissolved at this time.

The English lived within the district around Dublin called the Pale, and there filled the offices of state and controlled the parliament that had been formed on the model of the one in England. The English king was represented by a lord deputy.

The antagonism between the two races and creeds, as may be expected, grew steadily worse, and in the time of Elizabeth it came to a head. During her reign there were constant and terrible wars in Ireland, the struggle being conducted as if the combatants were wild beasts and not men. In the end the English prevailed and Ireland sullenly accepted the alien rule. In the 17th century James I settled, or planted, Scotchmen in Ulster, and Strafford, as lord deputy, did a good deal for Irish trade and commerce. The former step, however, led to a rising, and in 1642 there was another orgy of massacre and ruin, this time in the north. This was put down, and at the end of the civil war came the conquest of Ireland by Cromwell, another period of terror

leading to still more bitter memories. For a short time Ireland sent representatives to the parliament in London.

The struggle between William III. and James II. was fought out in Ireland, and when it was over a new period of Protestant ascendancy began. Roman Catholics could hold no offices whatever, nor even possess land in their own country. Equally rigorous were the restrictions on commerce, which forbade anything that might possibly compete with English traders. This state of affairs lasted for a good part of the 18th century, but after 1750 there was some relaxation. The laws against Roman Catholics were made less severe, and the trading restrictions removed. In 1782 Ireland was given legislative independence, but the right to vote and sit in Parliament was still confined to Protestants. From the intellectual and artistic point of view this age (1750-1800) was perhaps the most brilliant in Irish history.

In 1798, with Britain at war with France, there was a rising in Ireland, but this was quickly crushed at Vinegar Hill. In 1800 the parliament was abolished and the United Kingdom of Great Britain and Ireland came into being. Roman Catholic emancipation did not however, as was promised, accompany this union, but was delayed until 1829. Conditions seemed somewhat better when the terrible potato famine broke out in 1845. The population, which had grown very rapidly, was reduced by starvation and emigration to about half its former figure.

For the rest of the century the history of Ireland was one of agitation against English rule, except in Ulster, where the English connection was fiercely valued. One set of agitators—Whiteboys, Fenians, and the rest—succeeded another, and murder and outrage were common. Members, called nationalists, were elected to Parliament to work for some degree of independence for their country and, sympathising with them, Gladstone three times tried to give Ireland home rule. He failed, however, to convince the English people of the wisdom of this policy, which was opposed bitterly by the Protestants of Ulster.

In 1914 a measure of home rule was granted, but the outbreak of war prevented its operation. When the struggle ended, a new party (called Sinn Féin) dominated the country. They refused to have any connection with England and set up an Irish Republic, a step which was followed by two or three years of terrorism, as bad as anything even in the history of Ireland.

In the end a treaty was made in Dec., 1921. By this the Irish Free State was created, and the six counties that refused to be separated from Britain were formed into a separate state known as Northern Ireland.

The bulk of the Irish people are Roman Catholics. The Irish Church is under the archbishop of Armagh, three other archbishops and a number of bishops. The Protestant Church (the established church until 1869, when it was disestablished and its archbishops and bishops ceased to sit in Parliament) has two archbishops, Armagh and Dublin. Another strong church, especially in Ulster, is the Presbyterian Church of Ireland.

Irene Empress of Byzantium. Born in Athens about 752, she married the Emperor Leo IV in 769. In 780 she became regent for her son, Constantine VI. When he became old enough to rule for himself, his mother had him blinded and imprisoned, and she herself reigned as empress until 802. In

that year her enemies united against her and she was banished to Lesbos. In 803 she died. Her influence at the Council of Nicaea was directed towards the restoration of image worship. For this the Greek Church regarded her as a saint.

Ireton Henry, English soldier. Born at Attenborough, near Nottingham. He went to Trinity College, Oxford, and studied law in London. In 1642 he joined the parliamentary army, and was one of its leaders at Naseby. He was closely associated with Cromwell whose daughter Bridget he married in 1646. In 1645 he was elected an M.P., and he was one of those who tried to arrange peace between the king and his foes, and later was one of the judges of Charles signing the death warrant. In 1649 he went to Ireland and had just succeeded Cromwell as lord deputy when he died at Limerick Nov. 26, 1651. In 1660 his body was disinterred and hanged at Tyburn.

Iridium Metallic element having the symbol Ir and atomic weight 193.1. It is found in nature associated with platinum also as a natural alloy (osm Iridium) with osmium. Iridium is a white extremely hard metal which strongly resists corrosion. It is used in alloy form for tips of gold nibs of fountain pens and for electrical contacts.

Iris Character in Greek mythology. She was the daughter of Thaumas and Electra and the messenger of Hera and the gods. One story makes her the mother of Eros. The word in Greek means rainbow.

Iris Circular, coloured membranous curtain in front of the crystalline lens of the eye and having a central aperture known as the pupil. It is provided with radial and circular muscle fibres, which enable the iris to contract and enlarge thus regulating the amount of light entering the eye.

Iris Genus of hardy flowering plants. They are of two classes bulbous and non bulbous. There are many varieties of each, these being known as Spanish, Japanese, English and Dutch Irises. For the bulbous iris sandy loam with peat or leaf mould is most suitable. Marshy soil is good for the Japanese iris. The Dutch and Spanish varieties prefer a warm light soil.

Irish Free State Dominion of the British Empire. It includes all Ireland except six counties in the north-east. Its capital is Dublin and the next most important cities are Cork and Galway. The area is 26,600 sq. m. and the population 2,972,000. Irish is the national language but English is recognized. The Free State is a member of the League of Nations. The Free State came into existence in 1922.

It has a governor-general representing the king, and a parliament of two houses—the Senate and the Dáil Eireann—with a council of ministers as the executive. It is represented in London by a high commissioner and in Washington and elsewhere by ambassadors.

The system of administrative justice is largely based on the English model, as is the system of local government with county, town and urban district councils. Dublin and Cork have a paid official council the manager, as well as an elected council. There is a defence force, but naval defence is undertaken by Great Britain. Agriculture and fishing are the main industries and there are some manufactures.

The railways have been united into a single system, the Great Southern Railway. There

are several canals, and electric power is obtained from extensive works on the Shannon.

With Arthur Griffith at its head a provisional government got to work in the Free State early in 1922. Steps were taken to crush those who would not accept the new order, and in the midst of the trouble Griffith died. His successor was W. L. Cosgrave, who for ten years remained president of the executive, and in spite of certain difficulties the country made great progress. The elected members of the republican party refused at first to take the oath of allegiance, but after a time they changed their attitude and under Eamon de Valera (q.v.) took their seats and became the official opposition. Each general election, however, returned a majority for the party that supported the treaty of 1921. Various reforms were carried out and in 1925 a treaty with Great Britain relieved the Free State of its share of the national debt.

In Feb. 1932 there was another general election and a change. The republican party, by uniting with Labour and the Independent members, secured a majority in the Dáil and de Valera took Cosgrave's place as president. His ministry decided to abolish the oath of allegiance and thus refused to remit to Great Britain the interest due on the money borrowed for the purchase of land. Efforts at a settlement failed, and Great Britain in July took measures to collect the money due by taxing imports from Ireland. In return the Free State decided to tax imports from Great Britain. Mr. de Valera and his party *Finnian's Tail* were returned to power at the General Election of 1933. In 1935 they succeeded in passing a Bill for the abolition of the Senate. Their aim is independence and the development of domestic self-sufficiency in political and economic matters alike.

Irish Guards Regiment of the British Army. It was raised in 1900 and its first spell of active service was in 1914. During the next four years the regiment was in much hard fighting with the other regiments of the Brigade of Guards.

Irish Sea Arm of the sea between Great Britain and Ireland. It is connected with the Atlantic Ocean by the North or St. Patrick's Channel and the South, or St. George's Channel. Its breadth varies from 30 m. to 150 m.

Irish Terrier Breed of terrier derived from a cross between the fox terrier and a rough coated breed and introduced about sixty years ago. The formation of an Irish Terrier Club in 1879 established a standard of points for this class of dog. It weighs from 18 to 24 lb. and has a rough, wiry coat of a red brown colour.

Irkutsk City of Siberia, Soviet Russia. It is 10 m. from Lake Ballal, on the Trans-Siberian Rly. Its trade is concerned chiefly with the smelting of metals. Pop. 98,960.

Irlam Urban district of Lancashire. It includes where the Irwell falls into the Mersey, 8 m. from Manchester. Pop. 12,848.

Iron Metallic element having the symbol Fe and atomic weight 55.84 with a melting point of 1535°C. It is the most widely distributed of the metals but rarely occurs in the metallic state, being chiefly found as oxides not only as ore but also as the colouring matter of rocks and as a constituent of the blood of animals.

The principal ores are haematite or ses-

quioxide of iron, magnetite or black magnetic oxide, and limonite or hydrated sesquioxide, also chalybite, the carbonate, which forms, when impure, clay ironstone. Iron pyrites, the sulphide, is a source of iron sulphate and sulphuric acid.

Pure iron is greyish-white in colour, soft, malleable, and easily magnetised. Pig or cast iron is hard, brittle and moderately fusible, while wrought iron is malleable and has a higher tensile strength than cast iron.

The manufacture of iron from ore is an old, widespread industry, and was in England in the time of the Romans, or perhaps earlier, charcoal being used to smelt the ore. To-day pig or cast iron is made by mixing the ore with coal, coke and limestone, and passing it through a blast furnace. It comes from the furnace and is run into moulds to form pigs, as they are called, which are graded according to quality. The furnace is heated to 1200°, or even 1400° F., and about two tons of coal are required to produce a ton of pig iron.

This pig iron is much too brittle to be used for most purposes, so it undergoes further treatment in order to convert it into wrought iron or steel. Wrought iron is made by subjecting pig iron to a process called puddling. This is done in a reverberatory furnace by a process which gets rid of most of the carbon in the pig iron. As the carbon escapes, the fluid iron becomes pasty and is then brought away in large lumps. It is afterwards hammered into rude slabs called blooms, and rolled out to form bars or sheets.

This method of producing iron by the use of coal and furnaces was greatly developed in England in the 19th century. The furnaces were established where coal or iron ore or both, were easily accessible, such as the Black Country in Staffordshire, the district around Middlesbrough, South Wales, and Lanarkshire. In the United States great ironworks were established at Pittsburg, and many were erected in Belgium, France and Germany.

Great Britain, once the world's greatest producer of iron, has lost that position, and for years after the Great War the industry, except for brief spells, was in a very depressed condition. In 1931 the world's output of pig iron was 55,000,000 tons. The greatest producer was the United States, with 18,500,000 tons. Germany and France produced 9,700,000 tons and 6,000,000 tons respectively, and Great Britain only 3,750,000 tons. In the three years before the war (1911-13) the production in Great Britain averaged 9,700,000 tons. The decline is due to the tariffs imposed by foreign buyers, as well as to the partial exhaustion of the reserves of iron ore, making the industry dependent upon supplies from abroad.

The world's production of iron ore is about 60,000,000 tons. The greatest known reserves are in Sweden.

The Iron and Steel Exchange, King William St., London, E.C., is the centre for all business transactions in the iron and steel trades in Great Britain. See STEEL.

Iron Age In archaeology a cultural phase marked by the use of iron, especially for edged tools and weapons. In Europe and W. Asia it usually followed the copper-using or bronze-using phase or age, in Africa it directly succeeded the stone age. In Europe ironworking became general in the Mediterranean region about 1000 B.C., subsequently two pre-Christian periods occurred, each of about 500 years. These are characterised especially by finds at Hallstatt and

La Tène respectively. As far as is known there was no iron age in America.

Ironclad Name used for a battleship which had a protection of iron. The first ironclad was the *Warrior*, built in 1860. The ironclads succeeded the wooden ships, and were in turn succeeded by steel-clad vessels. See DREADNOUGHT.

Iron Cross Prussian order. It was founded in 1813, and is divided into a civil and military division. There are three grades.

Belgium has an order of the same name. It was founded in 1830, and is for civilians only.

Iron Gates Name given to a part of the Danube's course. It is near Orsova in Rumania, where for about 2 m. the river narrows. This causes great rapids, and to avoid these a channel for vessels was made between 1890 and 1900 at considerable cost.

Iron Mask Man in the Unknown French prisoner in the 17th century. He was put in the Bastille in Sept., 1698, and died there, Nov. 19, 1703. He wore a mask, probably of black velvet, during his imprisonment, and apparently no one saw his face. Many persons have tried to find out who he was, and a large literature has grown up on the subject. Dumas treats it in the *Comte de Bragelonne* and in *The Man in the Iron Mask*. He may have been an illegitimate son of Anne of Austria, the widow of Louis XIII., or the Duke of Buckingham, or Nicolas Fouquet (q.v.). More probably he was an Italian, Count Ercole Mattioli, but there is no certainty.

Ironmould Name given to reddish stains on cotton or linen fabrics. It is due to the action of soluble salts of iron, as in the case of ink which usually contains ferrous sulphate. The red colour is due to the presence of ferric oxide, and the stain may be removed by the use of oxalic acid.

Ironside Name given to the soldiers led by Oliver Cromwell. It dates from 1649 or thereabouts, and was given to them because of their steadiness in battle.

Ironside Sir William Edmund British soldier. Born May 6, 1880, he saw active service in South Africa, and in 1914 was a staff officer. In 1918-19 Ironside became prominent as Commander of the British forces at Archangel and later he was in Persia. He was commander of the Meerut district of India, 1928-31.

Ironstone Name given to iron ores occurring as beds, nodules in clayey deposits, or as masses filling fissures and cavities in rocks. Of these ores, haematite, limonite, and magnetite may form ironstones. Impure chalybite, or iron carbonate, in the form of clay-ironstone is common in carboniferous strata, and is a valuable source of iron.

Iroquois Confederacy of N. American Indian tribes. They included Mohawks, Cayugas, Oneidas, Onondagas and Senecas, and when they were joined by the Tuscaroras were known as the six nations. They sided with Britain in the War of Independence. To-day these tribes number about 60,000 in the United States, and 12,000 in Canada.

Irradiation Exposure to light rays. Both the luminous and the ultra-violet rays of sunlight are employed in therapeutics, and artificial sunlight is produced

by the use of the carbon arc or mercury vapour lamp. By the irradiation of inactive ergosterol (γ r) this substance becomes a powerful source of the anti rachitic vitamin D. See HELIO THERAPY, VITAMIN

Irrigation Means by which water is conveyed to arid areas from rivers or wells to increase the fertility of the land. Where rivers are the sources of the water supply, weirs (or, on a large scale barrages) are used to raise the level of the water to that of the irrigation canals. In many instances, to conserve the supply and regulate the flood waters of a river, huge reservoirs are built, as in North America Egypt the Sudan, India and Australia. In Arizona, India and Australia, artesian wells are used for transforming barren tracts into fertile areas. Examples are the use that has been made of the Murray River in Australia and the huge dams built in Bombay and at Sukkur on the Indus.

The value of irrigation as a means of making land more fertile was recognised in ancient times, and there remain evidences of its use in Mesopotamia, Egypt, Italy, Spain and other countries. Then as now the water of a great river was diverted into canals, which were cut across the infertile areas.

Irthlingborough Urban district of Northamptonshire. It stands on the Non, and is 82 m. from London. Boot making is the chief industry. Pop (1931), 1600.

Irvine Burgh, market town and seaport of Ayrshire on the river of the same name, 30 m. from Glasgow. The chief industry is the export of coal, for which there is a good harbour. There are some manufactures. Pop (1931) 12,032.

Irving Edward Scottish divine. Born at Annan Aug. 4, 1702, he went to London in 1822 and, as minister of a church in Caledonian Road, and later in Regent Square became a very popular preacher. Soon he began to preach the nearness of the second advent and in other ways gave expression to heterodox opinions. His church found him guilty of heresy, and he was deprived of his ministerial status. He then joined the group of men who founded the Catholic Apostolic Church (γ r) sometimes called after him Irvingites. He died Dec. 8, 1834. Irving is known, too, for his association with the Carlyles. Jane Welsh was his pupil at Hadlington, and he introduced her to Carlyle.

Irving Sir Henry English actor. John Henry Brodribb was born in a Somerset village Feb. 6, 1838. He took the name of Irving and soon became known as an actor of unusual gifts. In 1878 he began to play in Shakespearean and other plays with Ellen Terry, the two soon becoming the acknowledged leaders of the London stage at the Lyceum Theatre. His successes were numerous but perhaps the outstanding ones were in *The Tenth Muse*, *The Merchant of Venice*, *Macbeth*, *Ivanhoe* and *Richard III*. In 1895 he was knighted, at that time an unusual honour for an actor. He died at Bradford when on tour Oct. 20, 1905 and is buried in Westminster Abbey.

Irving had two sons both actors. Henry Brodribb Irving was born in London Aug. 5, 1870 and educated at Marlborough and New College Oxford. He was a successful actor, something in his father's style, and was for a time a manager. He also made himself an expert in criminology on which he wrote several books. He died Oct. 27, 1919.

The younger son, Laurence Sydney Brodribb Irving, wrote several plays and appeared regularly on the stage. He was drowned when the Empress of Ireland sank in the St. Lawrence, May 29, 1914.

Irving Washington American writer. Born in New York, April 3, 1783, he lived rather a desultory life, chiefly because his health was poor. He read a good deal and soon began to write. From 1829 to 1831 he was secretary in the American Legation in London, and from 1843 to 1846 he represented his country in Spain. He died at Sunnyside, near Tarrytown, Nov. 28, 1859.

Irving's writings include *Diedrich Knickerbocker's History of New York*, *The Life and Voyages of Columbus*, *The Alhambra Legends of the Conquest of Spain*, *A Life of Goldsmith*, *A Life of Washington* and many others. More popular, however, at least to English readers, are *The Sketch Book of Geoffrey Crayon, Gent.*—with its pictures of English life and of Rip van Winkle and Sleepy Hollow—and *Bracebridge Hall*. He also wrote *Tales of a Traveller*, an account of his visit to Abbotford and Newstead.

Irwell River of Lancashire. It rises near Burnley, and flows past Manchester to the Mersey. It is 30 m. long. The lower course of the river has been converted into the Manchester Ship Canal (γ v).

Irwin Baron English politician. Edward Frederick Lindley Wood was born April 16, 1881 being the son and heir of Viscount Halifax. In 1910 he was elected Unionist M.P. for the Ripon Division and in 1922 he was made President of the Board of Education. Later he went to the Ministry of Agriculture. In 1926 he was made Viceroy of India, and he remained there for five eventful years, returning home in 1931. He was made a Baron in 1926. In July, 1932 he joined the National Government as Minister for Education.

Isaac Hebrew patriarch. Abraham's only son by his wife Sarah, he was born in their old age (Gen. xxi). He married his cousin Rebekah when he was 40 years old. Their twin sons, Issau and Jacob, were born 20 years afterwards.

Isaac Name of two Byzantine emperors. Isaac I. became emperor in 1057, on the abdication of Michael VI, and was the first ruler of the Comnenus family. He reigned until his death in 1061, although after 1059 he lived in retirement. Isaac II, called Angelus, was declared emperor in 1185. His reign was troubled by wars and risings and in 1195 his brother Alexius blinded him and put him in prison. He was restored for a few months in 1203, and died in 1204.

Isaacs Sir Isaac Alfred Australian law officer, born in Melbourne, Aug. 6, 1855. In 1880 he became a barrister and from 1892-1901 he sat in the Legislature of Victoria, serving also as solicitor-general and attorney-general. In 1901 he was elected to the House of Representatives of the Commonwealth, and in 1905-06 he was its attorney-general. In 1906 Isaacs left politics to become a judge of the high court. In 1930 he was promoted to be Chief Justice of the Commonwealth, and in 1931 he was appointed Governor-General.

Isabella Queen of Edward II. of England. A daughter of Philip IV, King of France, she was born about 1292 and married to Edward in 1308 just after he had become king. The union was not happy, and about

1324, having become the lover of Roger Mortimer, she escaped to France. In 1326 they returned and secured the throne for her son, Edward III, Edward II being murdered. Until 1330 Isabella ruled the country, but in that year her son asserted himself. Isabella was sent to Castle Rising, and there she lived for many years. She died Aug 23, 1358.

Isabella Name of two queens of Spain. Isabella I was a daughter of John of Castile, and was born in 1451. In 1469 she married Ferdinand, who later became King of Aragon. The two conquered the Moors and united Spain into a single monarchy. Isabella died Nov 26, 1504.

Isabella II was a daughter of King Ferdinand VII. She was born in Madrid, Oct 10, 1830, and became queen on her father's death in 1833. In 1843 she began to reign and in 1846 married, for reasons of state, a cousin, Francis. The union was most unhappy and, after a series of insurrections, the queen was deposed in 1870, her son, Alphonso XII, becoming king. Isabella died April 10, 1904.

Isaiah Greatest of the Old Testament prophets. A son of Amoz and of high social rank, he lived in Jerusalem. According to tradition he was slain asunder under Manasseh (Heb xl).

The Book of Isaiah contains long passages of incomparable beauty. It is in two parts, of which chapters I-xxxix. were apparently rearranged to bring together the prophecies against foreign nations. Certain portions (e.g. Chapters xlii-xlv, xlv-xvii), together with the second part (chapter lvi) show post-exilic influence and therefore some modern scholars believe they were written by another hand.

Isandula Settlement in Natal, near the Tugela River, 105 m from Durban. Here, on Jan 22, 1879, a small British force, consisting of 800 men of the South Wales Borderers and a few natives, was attacked by 10,000 Zulus. After a hard fight the British force and camp were destroyed.

Isatin Basic dyestuff. It is prepared by the oxidation of indigo with nitric acid. It crystallises in reddish-yellow prismatic crystals, which dissolve slightly in cold water but more readily in hot water and in alcohol, the solution being brownish-red in colour. Isatin is the source of a number of important dyes.

Isfahan City of Persia and the former capital. It is 200 m to the south of Teheran, standing about 5000 ft above the sea. It has a considerable trade and some manufactures and there are remains of its former size and greatness. In 1917 the city was occupied by a British force. The name is sometimes spelt Ispahan and its old name was Aspadana. Pop 100,000.

Ishmael Son of Abraham and Hagar. He was exiled with his mother to the wilderness on account of Sarah's jealousy of him. He married an Egyptian, was famed as an archer and was buried in Mecca. Mahomet claimed him as an ancestor.

Ishtar Babylonian goddess, probably the same as Astarte. She was the mother of all life and the Goddess of Love and War. She was worshipped at Babylon, where there was an Ishtar gate, Nineveh and elsewhere. There is a reference to her in Jer xlv.

Isinglass Whitish gelatinous substance. It is derived from air bladders of the sturgeon and other fish, and is used in

cookery and in the clarifying of intoxicating liquors.

Isis Egyptian goddess. She was the wife of Osiris and the mother of Horus. Originally she was the earth goddess and afterwards became the moon goddess. She was also worshipped in Italy and Greece.

Isis Name given to that part of the Thames that flows past Oxford. See THAMES.

Islam Word used for the Mohammedan world. It means in Arabic *ma'ar* of peace, and appears in the Koran as a term for the religion of Mahomet.

Islands Bay of Name of two bays. One is in Newfoundland being an opening on the west coast. The other is on the east side of North Island, New Zealand.

Islay One of the Hebrides, part of the county of Argyll. It is 25 m long, covers 235 sq m, and is almost cut in half by two lochs. Bowmore is the chief town, other places are Bridgend and Port Ellen. The people are chiefly engaged in agriculture. The island is best reached by steamer from Glasgow. Islay was the headquarters of the Macdonalds, Lords of the Isles. On its most southern point is a memorial to 400 American soldiers and seamen who were drowned when the *Tuscania* was torpedoed in Feb, 1918. Pop. 6300.

The Sound of Islay, about 13 m. long, separates the island from Jura.

Isleham Village of Cambridgeshire, 17 m from Cambridge and 6 from Newmarket, on the L.N.E. Ry. Near is Isleham Fen, which was partly drained by prisoners of war in 1918-19. Pop 1650.

Isleworth Town of Middlesex. It stands on the Thames, 12 m from London, on the S. Ry. There are some manufactures. With Heston, Isleworth forms a borough (or in 1933). See HESTON.

Islington One of the 28 boroughs of the county of London. To the north of the city, it is reached by tube railways, tramways and motor omnibuses. Holloway forms the north of the borough which is the second largest in London. Abdeen Park is a residential district and Finsbury Park a great traffic centre. Pentonville, with its prison, is also in the borough. The name *Morie Islington* was given to the district because of the pleasure gardens that existed here in the 18th century. Pop (1931) 321,712.

Ismail Khedive of Egypt. A son of Ibrahim Pasha, he was born Dec 31, 1830 and educated in Paris. In 1867 he was made Khedive. Ismail is known as the Khedive who had much to do with the building of the Suez Canal. He was, however, very extravagant and this led to his abdication in 1879. He died in Constantinople, March 2, 1895.

Ismailia Town of lower Egypt. Situated on Lake Timsah it is about halfway between Port Said and Suez and 93 m by rail from Cairo. Established during the construction of the canal, it was, during the War, an important headquarters of the Allies. It is also famous as the scene of the first scientific assault on malaria.

Ismay Thomas Henry. English shipowner. Born at Maryport, Jan 7, 1837. His father was a shipbuilder and he himself entered a shipping office in Liverpool. In 1867 he bought the ships which formed the nucleus of the White Star Line, and with his

partaker, William Imrie, developed this line enormously. He died Nov 23, 1899.

Ismet Pasha Turkish statesman Bora. In 1884, he entered the army in 1903 and took part in the Young Turk revolution in 1908 and served in the Great War. Joining the national party he reorganised its forces. In 1922 he was foreign minister and since 1924, as prime minister of the now republic he has taken a leading part in the reorganisation of the country.

Isobar Term used in meteorology for a line upon a map running through places where the atmospheric pressure is the same at a stated time. Isohars are shown especially on weather maps, drawn usually for every tenth of an inch, the pressure being reduced to sea level and indicated in inches of mercury and millibars. The barometric gradient is shown by the nearness or distance between the isobars, thus where close together cyclonic weather is indicated, and where far apart anticyclonic conditions prevail.

Isocline Term used in geology for the arrangement of strata where all the beds appear to dip at a high angle in the same direction. Such beds occur in the south of Scotland.

Isocrates Greek orator. Born in 430, he was a pupil of Socrates and founded a school of oratory in Athens. Of his speeches 21 are extant. Isocrates exercised great influence on writing and oratory, both in Greece and Rome. He is said to have committed suicide after Philip of Macedonia had defeated the Athenians at Chæronea.

Isolation Medical term for the segregation of persons suffering from infectious complaints so as to prevent the spread of the disease. For this purpose special isolation hospitals away from a town or city are provided for cases of small pox and certain kinds of fever and other contagious diseases.

Isomerism Term used in chemistry for compounds which have the same number and kind of atoms but the arrangement is different in each case. Many instances of isomerism occur among the carbon compounds thus among the paraffins the formula C_4H_{10} represents two isomeric substances butane and isobutane, each having different physical properties.

Isomorphism Term used in chemistry, applied when various compounds have the same crystalline form. In some cases the compounds have the same number of atoms and are similarly combined as with the two isomorphous sulphates of zinc and magnesium, in others the number of atoms differs but the compounds have chemical analogies to each other as with ammonium and potassium chloride.

Isonzo River of Italy. It rises in the Alps and flows southwards into the Gulf of Trieste. Gorizia and Tolmino are on its banks and its length is 50 m. There was a good deal of fighting along this river between the Austrians and the Italians in 1915-1916 and 1917, and five battles of the Isonzo have been recognised by historians of the war.

The first battle took place in June, 1915 and on the whole victory remained with the Italians. The same may be said about the second battle which took place in July. The third battle a long struggle in Oct. Nov. and Dec. of 1915 was indecisive.

The fourth battle was a distinct victory for the Italians. It began on Aug. 1, 1916 and

on the 9th, Gorizia, their main objective in previous battles, was entered. The fifth and last battle took place in May, 1917, and was an Italian success. The gains, however, were lost before the end of the year, owing to the Italian defeat at Caporetto.

Isostasy Term used in physics for a state where pressure is equal on all sides of a body. An example is the case of a submerged body at rest in a liquid in a state of hydrostatic equilibrium.

In geology, the term is applied to the theory of the general equilibrium in the earth's crust.

Isotherm Line drawn upon a map passing through places where the temperature of the air is the same at a stated time. The temperatures indicated by the isotherms are corrected so as to refer to the temperature value of sea level. If these lines be regarded as the edges of isothermal surfaces meeting the earth's surface, then where the isotherms are far apart over a cold area the isothermal surface will be flat or saucer shaped, and where close together over a hot area the surfaces will be dome shaped.

Isotope Element which, chemically, is identified with another element, but which has a different atomic weight.

Isotropy Term used in crystallography for the condition met with in crystals of the cubic system. In this a ray of light entering the crystal is only refracted just as occurs with glass, such crystals being termed singly refracting or isotropic. Between the polarisers of a microscope, cubic crystals remain quite dark during rotation.

Israel Collective name for the Jews. Meaning "he that striveth with God" the name was given to Jacob on his way to the chosen land and was later applied to his descendants, the twelve tribes.

Issachar Son of Jacob and an Israelitish tribe. He was the ninth son of Jacob, the fifth by Leah. The tribe occupied land in Palestine bounded on the east by the Jordan and including the plain of Esdraelon, the scene of many decisive battles in the subsequent history of the race.

Issus Former seaport of Asia Minor, on the Gulf of Alexandretta. It is notable because here in 333 B.C. Alexander the Great defeated the Persians in one of the memorable battles of the ancient world.

Istanbul City and seaport of Turkey formerly known as Constantinople and the capital of the country. It stands on the sea of Marmora and the Bosphorus. Its harbour is formed by the Golden Horn, an arm of the sea which divides the city into two parts. On the south is the old Turkish city and on the north Galata and Pera the former being the business and the latter the foreign quarter. The Greeks, Jews and Armenians have also their particular districts and the city also includes Scutari on the other side of the Bosphorus. It is on the main railway line to Asia Minor on the air route to the East and has a broadcasting station (1200 M. 5 kW.). At one time the population was about 1,500,000 but it has now shrunk to some 600,000. In 1931 it was decided to replace the city.

Istanbul is full of interesting buildings. The most notable are the Mosque of Sophia, once a Christian church and the palaces once occupied by the sultans, one being the Yıldız Kiosk. There are many other mosques, the Christians have a number of churches and the Jews have their synagogues. There is a uni-

vorsity and several colleges. Walls and gates still surround the original city. A bridge and a bridge of boats cross the Golden Horn. The city has many manufactures and a large trade both by land and sea, but it is less prosperous than it was when it was the capital of the empire.

Istanbul, also called Stambul, stands where the Greeks built the city of Byzantium. It owes its existence and its early name to the Emperor Constantine the Great who founded it in 330. On the division of the Roman Empire it became the capital of the eastern part, and from 1204-61 was the capital of a Latin kingdom founded by the Crusaders. With the exception of this period it remained under the successors of Constantine until 1453 when it was taken by the Turks. It was the Turkish capital until after the Great War, being then replaced by Angora. It was occupied by allied troops from 1918 to 1923, when it was restored to Turkey.

Isthmian Games Festival of Greece. It was held every second year near Corinth in honour of Poseidon. It consisted not only of races and other athletic contests, but of literary competitions.

Isthmus Narrow neck of land connecting two larger land areas, or by which a peninsula is united to the mainland. The Isthmus of Suez unites the continents of Asia and Africa.

Istria District of Italy. It is at the head of the Adriatic Sea and covers 1900 sq. m., its area including certain islands. Pola is the largest town and the Quattro the chief river. Until 1919 Istria was part of Austria.

Italic Form of printed type and handwriting which slopes to the right. It was first used in 1501 for an edition of Virgil by the Italian printer, Aldus Manutius, who sought to regularise the cursive script of his time. Italic type is used nowadays for expressing emphasis, words of importance, foreign words, etc.

Italy Kingdom of Europe. In the south of the continent, it forms in the main a peninsula almost surrounded by arms of the Mediterranean Sea. It includes the islands of Sicily and Sardinia, and a district in the N.E. around Trieste and Flume that, before the Great War, was part of Austria. Its total area is 119,713 sq. m., and it has a population of 41,176,671 (1931). There are about 9,600,000 Italians in other countries. Within its borders, but outside its authority, are two little states, the Vatican and the republic of San Marino.

The country is divided into departments, but the older names for the various districts are still in use. Such are Piedmont and Lombardy in the N., Tuscany and Umbria in the centre, and Calabria and Apulia in the S. Rome is the capital. Other places with over 500,000 inhabitants are Naples, Genoa, Milan and Turin. Next in size are Palermo, Florence, Venice, Trieste, Bologna, Catania, Messina and Verona. From the historical and artistic point of view, some of these are among the most famous cities of the world, and there are many others, smaller but only a little less famous, such as Ravenna, Pisa, Parma, Modena and Mantua.

On the whole Italy is a mountainous country. In the north are the Alps and in the centre the Apennines. The rivers, although of great historical interest, such as the Adige, Tiber,

Po, Arno and Piave, are short. There is a long coastline on which are many seaports and pleasure resorts, but the harbours are not particularly good. The seaports include Genoa, Naples, Venice, Trieste, Catania, Palermo, Leghorn, Messina, Taranto, Brindisi and Flume. Some of these are naval stations, as are Pola and Spezia.

With much rich soil in the valleys, Italy is an agricultural country. It produces large quantities of fruit, as well as wheat, maize and potatoes. The fisheries are valuable, and many of the inhabitants are fishermen. The mineral wealth is not great, but the manufactures, especially in the north, have become important, and Turin and Milan are centres of industrial activity, with textile factories, engineering works and the like. The country has a good railway system and its air services are very efficient. There was an earthquake in Central Italy in 1933.

Italy is governed by a king and a council of ministers. To represent the people there is a chamber of deputies and a senate, but since the establishment of the system known as Fascism, the real power has been with the council of that organisation, and its head, Mussolini, occupies the position of a dictator.

The country has a large army, recruited on the principle of universal service, a navy and an air force. The people are mainly Roman Catholics, but there is no state church, and the relations between the government and the Pope are usually rather strained. There is a system of education for all, controlled by the state. Under this schools and colleges are everywhere. Some of the Italian universities are among the most renowned in the world. There is a system of justice at the head of which is the Court of Cassation in Rome. The unit of currency is the lira which in 1927 was stabilised at 92.46 to the £ sterling.

Italy has a large colonial empire, chiefly in Africa. It includes Eritrea, Somaliland, Tripolitania and Cyrenaica. In Europe it has the Aegean Islands.

HISTORY. Until modern times Italy was merely a geographical expression. Rome was the heart of the great Roman empire, and when Rome fell Italy was overrun by barbarians. In 800 it became part of the empire founded by Charlemagne, and it was nominally included in the Holy Roman, or Mediæval, Empire until its dissolution in 1806. In reality, however, it was divided into a number of independent, or practically independent states. Some of these were republics such as Venice and Genoa. Naples was a kingdom. In others such as Florence and Milan, members of a rich family, or soldiers of fortune, established themselves as hereditary rulers. The Papal States stretched across the Peninsula from Rome to the Adriatic.

Among the less important rulers in Italy was the Count of Savoy, who in 1416 was made a duke. In 1418 he obtained Piedmont and in 1713 his successor secured Sicily, which in 1720 he exchanged for Sardinia. At this time he took the title of king, and in 1815 the reigning king secured further territory in Italy.

In the 19th century the King of Sardinia was the centre of the movement for the union of Italy, and gradually the various districts came under his rule. Lombardy was secured in 1859, Tuscany and other areas in 1860. In 1861 Victor Emmanuel, King of Sardinia, was declared King of Italy. In 1866 he secured Venice and in 1870 the papal states,

except the Vatican itself. The difficulty with the Vatican, which remained outside the kingdom, was not adjusted until 1928. In 1900 Victor Emmanuel III became king.

In 1915, Italy, having broken away from the Triple Alliance, entered the war on the side of Great Britain and France, and carried on campaigns against Austria. After several defeats her armies were in the end victorious, and certain parts of Austria were secured at the peace treaty. The period after the war was one of great economic and social unrest which led to the march on Rome in Oct. 1922 and the establishment of a Fascist government there. Under this régime considerable economic progress was made. The Fascist government grew in power. Mussolini became dictator and assumed an ever larger degree of executive authority. Several attempts were made on his life. In 1932 he launched a scheme to rebuild Rome and in 1931 entered diplomatic relations with Austria and Hungary.

In Dec., 1934, the "Wal Wal Incident"—a clash between Italian and Abyssinian troops at Wal Wal in Italian Somaliland—caused friction which led to the Italo-Abyssinian War. Italy refused League arbitration and started to mobilise. In Oct. 1935 Italian troops invaded Abyssinia, bombed Addis Ababa and captured Addis Ababa. A few days later war was officially declared. On 28th Oct. began the long and arduous advance on Addis Ababa and Jan. 1936 saw a 3 days battle in the Tembien Heights. In Feb. 1936 the Italians claimed an important victory in the battle of Enderta. Meanwhile sanctions relating to oil, coal, iron and other key products were imposed against Italy by the League of Nations, and an embargo placed on arms and ammunition, and on financial dealings with Italy.

Itchen River of Hampshire. It rises near Alresford and flows into Southampton Water, which it enters by a tidal estuary. Winchester stands on its banks, and it is famous for its trout and for its association with Isaac Walton.

Another Itchen is a tributary of the Warlewike River.

Itchen is the name of a suburb of Southampton. Before 1920 it was a separate urban district.

Ithaca One of the Ionian Islands. 45 sq. m. in extent and almost divided into two parts by a gulf. Vathy is its capital. The people are chiefly employed in agriculture and fishing. Ithaca is famous as the home of Odysseus, being the sea-girt land so often mentioned by Homer.

Ivan Name of four rulers of Russia. The first two were Grand Dukes of Moscow who lived in the 14th century. Ivan III, called the Great, reigned from 1462 to 1505. He made his territory an independent state, extended his area, and lowered trade relations with western rulers and took as his emblem the Roman Eagle.

Ivan IV, called the Terrible, who reigned from 1547 to 1584 was the first to take the title of tsar. He carried on the work of Ivan III, but later earned the epithet of terrible by his

cruelties. In 1580 he murdered his son, Ivan. He died in 1584.

Iveagh Earl of. Born Nov. 10, 1847, he was a son of Sir B. L. Guinness, Bart. and was educated at Trinity College, Dublin. He entered the firm of Arthur Guinness, Sons & Co., and was for many years its chairman. In 1885 he was made a baronet, in 1891 a baron, in 1905 a viscount, and in 1919 an earl. He died Oct. 7, 1927, being succeeded by his son. His wife succeeded him as M.P. for Southend.

Lord Iveagh was known for his great wealth and munificent charities. He established, in 1889 the Guinness Trust, later known as the Iveagh Trust, for providing houses in Dublin and London, and gave large sums to hospitals and the like. He left one of his seats, Ken Wood, Hampstead, and some valuable pictures to the nation.

Ivory Hard white dentine of the upper incisors or tusks of the elephant. The term is also used to include a similar but inferior substance from the hippopotamus, walrus and narwhal. It is fine grained, translucent, uniform in texture and white or yellowish in colour. African ivory is the best for most purposes, the Asiatic variety being coarser and tending to become yellow on exposure. Ivory is used for piano keys, and also for carving into ornaments.

Ivory Coast District of W. Africa and the Gold Coast Colony of Great Britain, and belongs to France. Part of Upper Volta was added in 1933. Total area, 180,802 sq. in. The capital, which was formerly at Bingerville is now at Abidjan. Ports include Grand Bassam, Assinie and Sassandra. Inland towns are Abidjan, Abolisso and Bouaké. There is a railway line and many good roads. Maize, rice and rubber are grown; mahogany is cut, and palm oil and kernels are exported. Pop. (1933) 3,744,382.

Ivry Name of two places in France. One of them is on the Eure 42 m. from Paris. Here on March 13, 1590, Henry IV. gained a great victory over his enemies, the Guises and their friends. Macaulay's hall on the right is well known.

The other Ivry is a suburb of Paris. It is on the Seine about 5 m. to the south of the city.

Ivy Evergreen shrub of the order *araliaceae*. It is found in Europe, Asia and N. Africa. It climbs by means of aerial roots, and bears two kinds of leaves, the ordinary five lobed leathery leaves on the climbing shoots, and simple oval leaves on the flowering stems. The yellow-green flowers are succeeded by small black berries.

Ivybridge Urban district of Devonshire. It is 215 m. from London on the G.W. Ry. The River Erme flows past the town where are the tunnels of the Dartmoor Foxhounds. Pop. (1931) 4715.

Ixion In Greek story the king of a tribe in Thessaly. He murdered his father in law, so in order to punish him, Zeus carried him off to Olympus. There he tried to seduce Hera, so was sentenced to the nether world where he was tied to an ever moving wheel.

JABESH-GILEAD

Ancient city of Palestine. Its inhabitants rescued the bodies of Saul and his sons from the Philistines, earning David's gratitude (1 Sam. xxxi). It was in Gilead, E. of the Jordan, but the exact spot has not been identified.

Jaborandi Plant growing in Brazil and used in medicine. From it the drug pilocarpine is prepared. It is used as a hair tonic, and internally to cause perspiration.

Jaborosa Flowering plant, growing in any warm sheltered position, and bearing white, fragrant flowers. It is propagated by separating the long, creeping stems. When this is done the plant is believed to make a shrieking noise.

Jacamar Name of a family of S. American birds. With long, straight bills, they bore nesting holes in river banks, and there lay their eggs. They are expert in catching flies, keeping long, motionless watches on tree branches. Their plumage, often brilliantly bronze green, resembles that of humming birds.

Jack Word in its primary meaning a familiar or diminutive form of the name John. From its use as a general name for a boy or servant, it was applied to devices which supplied the place of a helper, as, for example, a boot-jack, a contrivance for turning a spit, a miner's wedge, and a screw or other appliance for raising heavy weights. It is also the name of the small ball in the game of bowls, up to which the bigger, wooden balls have to be bowled.

Jackal Carnivorous mammal of the dog genus. It is found in south-east Europe, Africa, and Asia. Often hunting in packs, jackals feed on living prey, carrion, and fruits. They can be tamed, and will interbreed with domestic dogs. The common jackal (*Canis aureus*) is 2 or 2½ ft. long, and 15 in. high. The North African variety is larger, and the so-called Egyptian Wolf larger still.

Jackass Male of the domesticated donkey. Its alleged lack of intelligence led to the name being applied contemptuously to stupid persons. One of the Australian food fishes is called the Jackass fish. The Jackass penguin is a S. American braying species. Several N. American prairie hares are called Jackass rabbits. See LAUGHING JACKASS.

Jack Boot Heavy riding boot, with long flap reaching above the knee, stantly protected at the instep. Troopers wore them in England in the 17th century, and they became modified into the high knee-boots of the household cavalry. The name denotes also the similar footwear of postillions, and that of modern fishermen and sewer-men.

Jackdaw Bird of the crow family. It is smaller than the rook, and may be distinguished by its white eyes, smaller beak, and grey neck. It can be easily tamed, but as a pet it is very troublesome and mischievous. It is common in Great Britain, and generally builds in holes in the masonry of church towers and other buildings. The food is mainly worms and insects.

Jacks Lawrence Pearsall. English theologian. He was born at Nottingham

in 1860 and educated at Manchester College, Oxford, Göttingen and Harvard. He entered the Unitarian ministry in 1887 as assistant to Dr. Stopford Brooke. He became editor of the *Hibbert Journal* in 1902 and was Principal of Manchester College, Oxford, from 1915 to 1931. His writings include *Legends of Smolcorer*, *The Faith of a Worker*, *Constructive Citizenship* and other books.

Jackson Andrew. American President. Born March 15, 1767, in 1796 he was elected a member of Congress and in 1798 was made a judge, but he made his reputation as a soldier. He led the American forces against the British in 1815, and in 1818 against an Indian tribe, in both cases successfully. In 1821-23 he was Governor of Florida, and in 1823-25 a member of the Senate. In 1828 he was elected President, and he was re-elected in 1832. He left office in 1836 and died June 8, 1845. To Jackson, who was a Democrat, is attributed the introduction of the spoils system into American politics.

Jackson Sir Barry Vincent. English actor-manager. Born in Birmingham, Sept. 6, 1879, he founded a company of players in 1907. In 1913 he started the Birmingham Repertory Co., to the direction of which he returned after serving in the navy during the Great War. In 1925 he was knighted. Among his productions are *Abraham Lincoln*, *The Immortal Hour*, *Back to Methuselah*, *The Apple Cart*, and several Shakespearean plays in modern dress.

Jackson Sir Francis Stanley. English politician and cricketer. Born Nov. 22, 1870, he captained the Cambridge eleven in 1893, and for many years played for Yorkshire. In 1905 he was captain of England in the test matches against Australia, and he played for the Gentlemen and in other representative matches, proving himself one of the greatest all-round cricketers of his age. Jackson served in the Boer War and during the Great War commanded a battalion. In 1915 he was elected Unionist M.P. for Howdenshire, and in 1922 he was made Financial Secretary to the War Office. In 1923 he became chairman of the Unionist organisation, and in 1927 Governor of Bengal, relinquishing the latter office in 1932.

Jackson John. English pugilist. Born in London, Sept. 23, 1769, in 1795, after defeating David Mendoza at Hornchurch, he became champion of England, a title he kept until 1803. In 1795 he set up a school of boxing in Bond St., London, which became very fashionable. He was acquainted with the Prince Regent, afterwards George IV, and his courtesy won him the name of Gentleman Jackson. He died Oct. 7, 1845.

Jackson Sir Thomas Graham. English architect. Born in London, Dec. 21, 1835, during a long professional career, he designed buildings for several colleges at Oxford and Cambridge, and for some public schools, including Harrow and Winchester. His restoration work included Winchester Cathedral, and the great churches at Bath, Malvern, and Christchurch. Jackson was elected A.R.A. in 1892 and R.A. in 1896. In 1913 he was made a baronet, and he died Nov. 7, 1924. He wrote several books on Gothic architecture.

Jackson Thomas Jonathan American soldier Born in West Virginia, Jan 21, 1821, he was after Lee, the most renowned of the southern generals during the Civil War, winning for himself the name of Stonewall Jackson After the Battle of Chancellorsville he was accidentally shot by his own men and died May 10, 1863

Jacksonville City and seaport of Florida, on the St John's river, near its mouth in the Atlantic Ocean There are large modern docks and a number of manufacturers Pop (1930) 120,910

Jacob Jewish patriarch With Esau he was the twin son of Isaac and Rebekah His deceit and his mother's won for him the birthright from Esau and the paternal blessing (Gen xxvii) He went to his uncle, Laban whom he served for 14 years receiving in return his daughters Leah and Rachel as his wives His concluding days were passed in Goshen in Egypt where his son Joseph held a high position There he died at a great age Jacob had twelve sons, from whom the twelve tribes of Israel were descended

Jacobean Name given to anything associated with the name James, the Latin for which is Jacobus The Jacobean style in furniture and architecture lasted from 1603 to 1638 Jacobean furniture is chiefly of oak, heavy in appearance but sometimes very beautifully carved Jacobean houses are plain in style but are often very graceful in appearance, with fine panelling and plaster work Charlton House, near London, and Bramshill House in Hampshire are good examples

Jacobins French political society It arose during the French Revolution and consisted of men who wished for constitutional reform of a moderate kind They were named Jacobins because they met in a building in the Rue St Honoré Paris, belonging to the Dominicans, called in France the Jacobins Later its members became more extreme in their views and carried out the reign of terror, but its power ended in 1794 with the execution of Robespierre, and attempts to revive it failed The word Jacobin was much used in Britain and Europe for the holders of extreme opinions It was to combat these that the paper called *The Anti Jacobin* was founded in 1797

Jacobite Church Christian communion named after Jacob Baradaeus missionary Bishop of Edessa (d 578) He reorganised the Syrian monophysite church which became powerful in the Middle Ages in Asia Minor and Egypt The church still exists Its head being the patriarch of Antioch

Jacobites Name given to those who after 1688 refused to acknowledge William and Mary (and afterwards the Georges) as rulers believing that James II and his descendants were the rightful kings The Jacobites were strong in Scotland and Ireland and there were a number in England until well into the 19th century but it ceased to be a serious movement after the rising of 1745 had been crushed

The few remaining believers in the claim of the Stuarts to the throne call themselves Unitarists To them Prince Rupprecht of Bavaria descended from the daughter of Charles I is the rightful king of Great Britain. They have a national and club and remem-

ber Jan 30, the day on which Charles I was executed

Jacobs William Wymark English writer Born in London, Sept. 8, 1863, he was for many years a clerk in the Post Office He soon began to write short stories and made his name with a volume called *Many Carriages*, 1896 followed by *Light Freights*, *Captains All*, *Ships Company*, *Night Watches*, *Deep Waters*, and in 1926, *Sea Whispers* He wrote longer stories in the same vein *The Skipper's Wooing*, *Dialstone Lane*, *Salthaven* and *At Sunnich Port* The stories deal mainly with the humorous adventures of seamen and bargemen Jacobs has also shown himself a master of the occult type of story, and *The Winkler's Paw* and others are masterpieces of their kind

Jacobus Gold coin It was struck only during the reign of James I (hence its name, Jacobus being the Latin for James) and its value was 2s6

Jacquard Joseph Marie Frenob in ventor Born July 7, 1752, at Lyons he followed his father's trade of weaver, and after a time invented a loom, which was a great improvement on those then in use, as it enabled figured patterns to be woven This was patented, and with improvements is still used for the weaving of silk and other textiles, as well as tapestries, carpets, and lace Jacquard died Aug 7, 1834

Jacquerie Rising of the French peasantry It occurred in 1358, when, as the result of the ravages of the English in the Hundred Years War and other circumstances, the condition of the peasants was very bad indeed It began in Normandy and spread to Paris, but was soon suppressed The name is taken from Jacques Bonhomme a term used for the French peasant

Jactitation In English law the making of a false pretension of marriage If a person pretends to be married to another, the latter may sue him, or her, for jactitation of marriage Such suits are rare

Jade Very hard compact variety of the mineral, tremolite It consists essentially of silicate of magnesia and lime Two varieties occur, white jade found in China, and green jade, or greenstone, in New Zealand A similar soda-containing mineral, jadeite, is often confused with true jade Both minerals are used as ornamental stones

Jael Wife of Hober the Kenite (Judges iv v) The Canaanites under Sisera, a general of the King of Huzor, attacked the Israelites but were routed by Barak Sisera took refuge in Jael's tent, and when sleeping was treacherously slain by her—an act lauded in the Song of Deborah

Jaffa Seaport of Palestine Anciently known as Joppa, it stands on the Mediterranean Sea 50 m from Jerusalem It has a trade in wool olive oil, and the oranges to which it gives its name In 1917 it was captured from the Turks by Australian and New Zealand troops Pop (1911) 51,366

Jagersfontein Town of South Africa, in the Orange Free State, 48 m from Springfontein It is the site of an important diamond mine in which the most perfect diamond ever discovered was found in 1895 Pop 4,000

Jaguar Animal of the cat tribe, found in both North and South America It corresponds to the leopard of the old world,

but its head is somewhat larger. It averages 4 ft in length. The colouring is a rich tan with small black spots and black-spotted rosettes, black varieties occur. It preys upon monkeys, peccaries and turtles, as well as horses and cattle, and is an agile climber, resting on tree branches in the daytime.

Jain Member of a Hindu religious sect. This cult developed from Brahmanism in the 6th century, B.C., but gave up some of the main teachings of that faith, including the caste system and the Vedas. Its own religious books date from about 500 B.C. The Jains believe in the future life for almost all animate nature and refuse to kill anything. They are found in the N.W. parts of India and number about 1,000,000, chiefly prosperous traders. The Jains have built some remarkable temples, one of the finest being at Calcutta.

Jaipur State and city of Rajputana, India. It is ruled by a maharajah and came under British protection in 1818. It covers 15,579 sq m. Pop. (1931) 2,631,775.

The city is an important railway centre. Near it is Amber, the former capital of the state.

Jaisalmir State of India. It lies to the west of Rajputana and is one of the Rajput states. Its capital is a town of the same name. The ruler is a maharajah and the people chiefly Hindus. The area is 18,060 sq m. Pop. 76,255.

Jalalabad Afghan town. It is situated on the Kabul river, near the Khyber Pass, between Kabul and Peshawar. It was the scene of a heroic defence by a British force under Sir Robert Sale during the Afghan War of 1841-2.

Jalap Swift purgative drug. First imported from Jalapa in Mexico, it is obtained from resins in the tuberous roots of several convolvulaceous plants of the genus *ipomaea*. It is rich in glucosides and is used in cases of dropsy.

Jam Indian title. The word, which is of Tartar origin, like *khan* and *oham*, means chief. It was borne by the rulers of Las Bela, a state of Baluchistan, and of Nawanagar, the latter of whom was the famous cricketer, Ranjitsinhji.

Jamaica Largest island of the British West Indies. In the Caribbean Sea, 90 m S of Cuba, it belongs to the Greater Antilles group, and was discovered by Columbus in 1494. In 1655 the English took it from Spain. A mountainous isle, with peaks reaching 7360 ft in height, it is very fertile, agriculture flourishes, and fruit, tobacco, sugar, coffee and cocoa are produced. The vegetation is rich and the climate agreeable, but the island is subject to earthquakes and hurricanes. With its dependent islands, which include the Turks and Caicos Islands and Cayman Islands, it is administered by a governor and a legislative council.

Kingston is the capital and the chief sea port. Spanish Town is the old capital. British and American currencies are used. The area is 4450 sq m, and the island is 144 m long. Pop. (1931) 1,050,687.

Jamboree Word of American-Indian origin meaning a festive gathering of the tribes. It has been adopted by the Boy Scouts for an international rally, held periodically. The first was held at Olympia, London, in 1920. *Jamboree* is also the name of a magazine for Boy Scouts, founded in 1921.

James River of Virginia, U.S.A. It is formed by the junction of the Cowpasture and Jackson rivers, and, after a course of some 450 m, empties into Chesapeake Bay through a large estuary. Richmond is at its head of navigation, which extends for 150 m. Another James River, a tributary of the Missouri, flows through Dakota.

James Saint and apostle. Son of Zebedee and Salome, he and his brother John were Galilean fishermen whom Jesus called to be his disciples. He was one of the three especially honoured by Christ and was an influential figure in the apostolic church. He was beheaded by Herod Agrippa. He is commemorated on July 25, and is the patron saint of Spain, where his shrine at Compostella was one of the most famous in Europe.

James Brother of Jesus Christ (Matt. xiii, Mk. vi). Conflicting tradition made him a son of Joseph by a former wife or by Mary after Christ's nativity. After the Resurrection he became a pillar of the church at Jerusalem and its first bishop.

James Epistle of Book of the New Testament. Its superscription ascribes it to our Lord's brother, Jerusalem's first bishop, whose regard for the Mosala law was overlaid by the law of love. He addresses the infant church wherever dispersed, not Jewish Christians only, inculcating duties of practical morality, such as abstaining from sycofancy and unruliness of speech, evidencing faith by actual works, combining in prayer, especially in seasons of suffering and sickness, and recognising the importance of the individual soul.

James I. King of Great Britain. Born in Edinburgh, June 19, 1566, the son of Mary, Queen of Scots, and Lord Darnley, he was proclaimed King as James VI in 1567. As a child he was delicate and throughout life remained ungainly, but he had considerable abilities and was very carefully educated. His minority, marked by struggles for his person between the nobles, ended in 1583, and for 20 years he ruled Scotland. His belief in episcopacy was disliked by many of his subjects, but he maintained this policy until bishops were established. He showed energy in dealing with risings of the nobles, and on the whole his reign was successful, if unpopular. His indifference to his mother's imprisonment, and especially to her death, is generally regarded as a blot on his memory.

In March, 1603, James became also King of England, and the rest of his life was passed in that country. Failing to understand the English character, he can hardly be called a popular or successful ruler. His partiality for certain worthless favourites disgusted many, and his religious ideas were heartily disliked by both Puritans and Roman Catholics. His foreign policy was neither consistent nor wise, and his quarrels with parliament had a bearing on the troubles of the next reign. He died at Theobalds, March 27, 1625.

James married, in 1589, Anne, daughter of the King of Denmark. His eldest son, Henry, died in 1612, and the second, Charles, succeeded him. From his daughter, Elizabeth, the present royal family is directly descended.

James was something of a thinker, and in his *Basiliicon Doron* and *The True Law of Free Monarchies* he set out his ideas on government. He also wrote *Counterblaste to Tobacco*, and an attack on witchcraft.

James II. King of Great Britain. The second son of Charles I., he

James I. King of Great Britain. Born in Edinburgh, June 19, 1560, the son of Mary, Queen of Scots, and Lord Darnley, he was proclaimed King as James VI. in 1567. As a child he was delicate and throughout life remained ungainly, but he had considerable abilities and was very carefully educated. His minority, marked by struggles for his person between the nobles, ended in 1583, and for 20 years he ruled Scotland. His belief in episcopacy was disliked by many of his subjects, but he maintained this policy until bishops were established. He showed energy in dealing with risings of the nobles, and on the whole his reign was successful, if unpopular. His indifference to his mother's imprisonment, and especially to her death, is generally regarded as a blot on his memory.

In March, 1603, James became also King of England, and the rest of his life was passed in that country. Failing to understand the English character, he can hardly be called a popular or successful ruler. His partiality for certain worthless favourites disgusted many, and his religious ideas were heartily disliked by both Puritans and Roman Catholics. His foreign policy was neither consistent nor wise, and his quarrels with parliament had a bearing on the troubles of the next reign. He died at Theobalds, March 27, 1625.

James married, in 1589, Anne, daughter of the King of Denmark. His eldest son, Henry, died in 1612, and the second, Charles, succeeded him. From his daughter, Elizabeth, the present royal family is directly descended.

James was something of a thinker, and in his *Basilicon Doron* and *The True Law of Free Monarches* he set out his ideas on government. He also wrote *Counterblast to Tobacco*, and an attack on witchcraft.

James II. King of Great Britain. The second son of Charles I., he

was born in London, Oct. 14, 1633, and was educated by tutors in the royal palaces. His life falls into three periods. From 1633 to 1683 he was Duke of York. From 1685 to 1688 he was king, and from 1688 to 1701 an exiled and fallen monarch. In 1649 he went to the Netherlands and saw service in the French and Spanish armies. In 1660 he returned to England and as Lord High Admiral commanded the fleet in battles with the Dutch. Later he was in Scotland engaged in suppressing the Covenanters, and throughout the reign of his brother he was prominent in public life. His conversion to Roman Catholicism led to the formation of a strong party determined to exclude him from the throne, but in 1685 he became king.

The rebellion led by Monmouth, having been crushed, James was able to carry out his ideas for making England a Roman Catholic country. Paying little heed to constitutional forms, he issued proclamations that soon raised up a host of enemies. Only three years after his accession, an invitation was sent to William of Orange to come and take the crown. So thoroughly had he alienated his people that James found himself unable to defend his throne and fled to France. In 1690 he was in Ireland, where, with French help, he made an effort to oust his rival, but the campaign failed. He then returned to France and passed the rest of his days at St Germain. He died Sept. 6, 1701.

James married Anne Hyde, daughter of the Earl of Clarendon, who bore him two daughters, Mary and Anne, both queens. His second wife was Mary, daughter of the Duke of Modena, by whom he had a son James Edward, known as the Old Pretender.

James Name of six kings of Scotland. James I., a son of Robert III., was born in July, 1394. From 1406, the year in which he became king, until 1424, he was a prisoner in England, having been captured by some English sailors when on his way to France. He returned to Scotland in 1424 and married Jane Beaufort, a daughter of the Duke of Somerset. After much trouble with his nobles he was murdered at Perth, Feb. 20, 1437. The king wrote poems, two of which still survive.

James II the only son of James I. was born Oct. 6, 1430, and became king on his father's death. During his reign the Douglas family was very powerful and troublesome. He made war on England and was killed whilst besieging Roxburgh Castle Aug. 3, 1460.

James III, the eldest son of James II., was born July 10, 1451, and reigned at first with a regency, until 1468. In that year, urged on by the nobles, his young son rebelled against him, and after a flight near Stirling the king was killed June 11, 1468. He married a daughter of the king of Denmark.

James IV was born March 17, 1473, and became king on his father's death, for which he was in a sense responsible. He married Margaret, daughter of Henry VII. and after a reign comparatively peaceful of 25 years, met his death at Flodden Sept. 9, 1513.

James V, born April 10, 1512, became king when under two years old. In 1530 he began to rule for himself but he left no mark upon his country. In 1542 the English defeated his troops at Solway Moss, and on Dec. 14 of that year he died at Falkland. James married Mary, daughter of the Duke of Guise, and their only child was Mary, Queen of Scots. Her son was James VI., afterwards James I. of Great Britain.

James Baron English lawyer. Born at Hereford, Oct. 30, 1828, Henry James was educated at Cheltenham and became a barrister. In 1868 he entered Parliament as M.P. for Taunton, and in 1873 he became Solicitor General and then Attorney-General under Gladstone. He returned to office in 1880 and was Attorney General until 1885, when he became a Liberal Unionist and M.P. for Bury. In 1895 he was made a peer, as Lord James of Hereford, and he was Chancellor of the Duchy, 1895-1902. He died unmarried, Aug. 18, 1911.

James Henry Anglo-American novelist. Born in New York, April 15, 1843, he was educated for the law at Harvard. However, he began to write and in 1876 his first successful novel, *Roderick Hudson*, appeared. This was followed by *The American*, *The Bostonians*, *The Tragic Muse*, *The Golden Bowl*, *What Maisie Knew*, *The Ivory Tower*, and many others. He also wrote criticisms of English and French literature of unusual value. In 1915 James became a naturalised Englishman, and he received the Order of Merit in 1916. He lived much at Rye, but died at Chelsea, Feb. 28, 1916.

James William American philosopher. A brother of Henry James, he was born in New York Jan. 11, 1842, and educated at Harvard. In 1881 he was made professor at that university, and he passed his life in the study of philosophy and the allied problems of psychology. He lectured in England and Scotland. He died Aug. 26, 1916.

James is regarded as one of the foremost of modern philosophers. He was the founder of the philosophy of pragmatism, and many of the problems of psychology owe a good deal to his thought which laid great stress on the results of experience. His books include *The Principles of Psychology*, *Human Immortality*, *Pragmatism*, *Varieties of Religious Experience*, *The Will to Believe*, and *The Meaning of Truth*.

James Bay Part of Hudson Bay, Canada. A south-easterly extension of the greater bay, it lies between Ontario and Quebec, and contains many islands. It is 350 m. long and 120 m. wide at its widest point, and receives the waters of several rivers, being, nevertheless, shallow and brackish.

James Edward British prince known as the Old Pretender. He was born in London, June 10, 1688, being the son of James II. and his birth had important consequences for Britain. The news that James had a son decided his enemies to act against him, and the result was the loss of the crown by the Stuarts. The young prince was sent to France and was there when in 1701 he became nominally King of Great Britain as James III. In 1708 and 1715 he went to Scotland to try to win the throne, but soon returned to France. In 1715, when peace was made between Britain and France, he was obliged to leave the latter country. He went to Bar-le-Duc in Lorraine and later to Rome where he died, Jan. 2, 1766. He was buried at St. Peter's. He married Clementina, daughter of John Sobieski, King of Poland, and had two sons, Charles Edward and Henry.

Jameson Sir Leander Starr British administrator. Born in Edinburgh Feb. 9, 1853, he became a medical man. In 1878 he went out to Kimberley where he practised and there he made friends with Cecil Rhodes who soon began to employ him.

on political work. In 1891 he was made administrator of Rhodesia, and in 1895 he led the raid on Johannesburg. For this he was tried and put in prison in England, but was soon released. In 1900 he became a member of the legislature of the Cape and from 1904-08 he was Prime Minister. In 1911 he was made a baronet, and in 1913 chairman of the British S. Africa Co. He died in London, Nov. 26, 1917.

Jameson's Raid Raid on Johannesburg in 1895-96. The Britishers in the Transvaal, badly treated by the Boers, planned a rising and obtained promises of help from Cecil Rhodes and his assistant, Dr. Jameson. The rising was postponed, but Jameson with about 500 men entered the Transvaal on Dec. 28, 1895. They were quickly forced to surrender and handed over to the British authorities. The leaders were tried and sentenced to imprisonment, and Parliament appointed a commission to inquire into the matter. Its report censured Rhodes, who lost his status as a privy councillor. The raid left a bad impression and so contributed to the war of 1899-1902.

Jamestown English settlement in the United States, the first of the kind. It is on the James River in Virginia, about 30 m. from its mouth, and dates from 1607. It was the first capital of Virginia and remained so until 1698, when, having been damaged by fire, it fell into decay. The peninsula on which it stood has been converted by the action of the river into an island, and the ruins of the buildings thereon are carefully preserved by the society that owns them. In 1907 the tercentenary of the foundation was celebrated.

Another Jamestown is the capital of St. Helena. Pop. 2500.

Jammu City of Kashmir and the winter capital of the state. It stands on a tributary of the River Chenab and has railway connection with India. At one time Jammu was the capital of an important state named after it, this is now part of Kashmir. In 1931 there was unrest in the city. Pop. 36,500.

Jamnagar City and seaport of India. It is the capital of the little state of Nawanagar and is 310 m. north-west of Bombay. Pop. 42,000.

Janissaries Corps of Turkish soldiers. Founded in the 14th century, the Janissaries were, until about 1600, mainly Christian boys taken as tribute, and brought up, under strict discipline, in the Mohammedan faith. They made very formidable soldiers and were long the backbone of the Turkish army. After a mutiny in 1825, the corps was abolished.

Jan Mayen Island Island in the Arctic Ocean. It lies between Greenland and Norway and covers 160 sq. m. It is visited by fishermen after seals and whales. Several explorers are said to have discovered the island, one being Jan Mayen, a Dutchman. In 1920 Norway acquired the island, and took possession of it in 1925. An observatory was erected in 1921.

Jannina Town of Greece. On the Lake of Jannina, it is near the frontier of Albania and is the chief town of a district named after it. It was from 1788 to 1816 the headquarters of the rebel chief, Ali Pasha, who was called the Lion of Jannina. The Turks fortified it and in 1913, during the first Balkan War, it was besieged and taken by the Greeks.

During the Great War it was taken by the Allies. Pop. 25,000.

Jansenism Term used for the teaching of Cornelius Jansen. He was a Dutchman who, in 1619, became Professor of Theology at Louvain, and later Bishop of Ypres. He died May 6, 1638.

Jansen wrote a book called *Augustinus* in which he restated the teaching of St. Augustine on predestination, the fall of man and other matters. It was published in 1640, after his death, and was taken up by a group of religious thinkers, including Pascal, who lived at Port Royal. They called themselves Jansenists. They were then members of the Roman Church, but they incurred the hostility of the Jesuits, and after a time formed a church of their own, adhering to much of the Catholic faith, but rejecting the doctrines of the immaculate conception and papal infallibility. The church still exists in the Netherlands.

Janssen Cornelius Gorman painter. He was born in London, probably in 1593, of German parents, and studied art in the Netherlands. In 1616 he returned to London and, calling himself Johnson, worked there for some years. He painted Charles I. and other notables. When the Civil War began he went back to Holland, and died, probably at Utrecht, in 1664.

Januarius Saint and martyr. A bishop of Beneventum in the days of Diocletian, he was tortured and killed during that emperor's persecution of the Christians. His body is preserved in his native city of Naples, of which he is the patron saint. His day is Sept. 19.

Janus In Roman mythology an aboriginal spirit of the doorway. This was developed by the Latin people into a double-headed deity. His arch facing east and west in the Forum, commonly called the Temple of Janus, was only closed in time of peace. He gives his name to the first month of the year.

Japan Empire of Asia. It lies off the north-east coast of the continent, from which it is separated by the Sea of Japan. It is composed of five large islands, Honshu, or Hondo, the mainland, Kishu, Shikoku, Hokkaido, or Yezo, and Formosa, or Taiwan, over a thousand smaller ones, the peninsula of Korea or Chosen, and the southern half of Sakhalin. The total area is 260,044 sq. m. and the population in 1930 was 90,396,043.

PHYSICAL FEATURES The islands are volcanic and mountainous, Fujiyama (12,395 ft.) on Honshu, being the most famous mountain. Two Formosan peaks are more lofty. The numerous rivers are all swift, of no great size and of little use for navigation. The climate is diverse, for the empire extends through many degrees of latitude, but is in general wet, with short, hot summers, and long, cold winters. Typhoons are of frequent occurrence and cause great damage, as do earthquakes and tidal waves.

The vegetation is rich and varied, and agriculture is the chief industry of the fertile country, wheat, barley, rice, tobacco and tea being the chief crops. Minerals and metals abound. Manufactures are of increasing importance, in 1932 Japan exported goods to the value of £143,936,683. The largest cities, in order of population, are Tokyo, the capital, Osaka, Nagoya, Kobe, Kyoto, and Yokohama, all on Honshu. Kobe and Yokohama are the chief ports. There is a good railway system.

GOVERNMENT Japan is ruled by an em-

was born in London, Oct. 14, 1633, and was educated by tutors in the royal palaces. His life falls into three periods. From 1633 to 1683 he was Duke of York, from 1685 to 1688 he was king, and from 1688 to 1701 an exiled and fallen monarch. In 1649 he went to the Netherlands and saw service in the French and Spanish armies. In 1660 he returned to England and as Lord High Admiral commanded the fleet in battles with the Dutch. Later he was in Scotland engaged in suppressing the Covenanters, and throughout the reign of his brother he was prominent in public life. His conversion to Roman Catholicism led to the formation of a strong party determined to exclude him from the throne, but in 1685 he became king.

The rebellion, led by Monmouth, having been crushed, James was able to carry out his ideas for making England a Roman Catholic country. Paying little heed to constitutional forms, he issued proclamations that soon raised up a host of enemies. Only three years after his accession, an invitation was sent to William of Orange to come and take the crown. So thoroughly had he alienated his people that James found himself unable to defend his throne and fled to France. In 1690 he was in Ireland where, with French help, he made an effort to oust his rival, but the campaign failed. He then returned to France and passed the rest of his days at St. Germain. He died Sept. 6, 1701.

James married Anne Hyde, daughter of the Earl of Clarendon, who bore him two daughters, Mary and Anne, both queens. His second wife was Mary, daughter of the Duke of Modena, by whom he had a son, James Edward, known as the Old Pretender.

James Name of six kings of Scotland. James I., a son of Robert III., was born in July, 1394. From 1400, the year in which he became king, until 1424, he was a prisoner in England, having been captured by some English sailors when on his way to France. He returned to Scotland in 1424 and married Jane Beaufort, a daughter of the Duke of Somerset. After much trouble with his nobles, he was murdered at Perth, Feb. 20, 1437. The king wrote poems, two of which still survive.

James II the only son of James I. was born Oct. 6, 1430 and became king on his father's death. During his reign the Douglas family was very powerful and troublesome. He made war on England and was killed whilst besieging Roxburgh Castle Aug. 3, 1460.

James III, the eldest son of James II, was born July 10, 1451 and reigned at first with a regency until 1468. In that year, urged on by the nobles, his young son rebelled against him, and after a fight near Stirling, the king was killed June 11, 1468. He married a daughter of the King of Denmark.

James IV was born March 17, 1473 and became king on his father's death for which he was in a sense responsible. He married Margaret, daughter of Henry VII and after a reign comparatively peaceful of 25 years met his death at Flodden Sept. 9, 1513.

James V, born April 10, 1512 became king when under two years old. In 1530 he began to rule for himself but he left no mark upon his country. In 1542 the English defeated his troops at Solway Moss and on Dec. 14 of that year he died at Falkland. James married Mary, daughter of the Duke of Guise and their only child was Mary Queen of Scots. Her son was James VI, afterwards James I. of Great Britain.

James Baron English lawyer. Born at Hereford, Oct. 30, 1828, Henry James was educated at Cheltenham and became a barrister. In 1868 he entered Parliament as M.P. for Taunton, and in 1873 he became Solicitor General and then Attorney-General under Gladstone. He returned to office in 1880 and was Attorney-General until 1885, when he became a Liberal Unionist and M.P. for Bury. In 1895 he was made a peer, as Lord James of Hereford, and he was Chancellor of the Duchy, 1895-1902. He died unmarried, Aug. 18, 1911.

James Henry Anglo-American novelist. Born in New York, April 15, 1843, he was educated for the law at Harvard. However, he began to write, and in 1875 his first successful novel, *Roderick Hudson*, appeared. This was followed by *The American*, *The Bostonians*, *The Tragic Muse*, *The Golden Bowl*, *What Maisie Knew*, *The Ivory Tower*, and many others. He also wrote criticisms of English and French literature of unusual value. In 1915 James became a naturalised Englishman, and he received the Order of Merit in 1916. He lived much at Rye, but died at Chelsea, Feb. 28, 1916.

James William American philosopher. A brother of Henry James, he was born in New York, Jan. 11, 1842, and educated at Harvard. In 1881 he was made professor at that university, and he passed his life in the study of philosophy and the allied problems of psychology. He lectured in England and Scotland. He died Aug. 20, 1910.

James is regarded as one of the foremost of modern philosophers. He was the founder of the philosophy of pragmatism, and many of the problems of psychology owe a good deal to his thought which laid great stress on the results of experience. His books include *The Principles of Psychology*, *Human Immortality*, *Pragmatism*, *Varieties of Religious Experience*, *The Will to Believe*, and *The Meaning of Truth*.

James Bay Part of Hudson Bay, Canada. A south-easterly extension of the greater bay, it lies between Ontario and Quebec, and contains many islands. It is 350 m. long and 120 m. wide at its widest point, and receives the waters of several rivers, being, nevertheless, shallow and brackish.

James Edward British prince, known as the Old Pretender. He was born in London, June 10, 1688, being the son of James II, and his birth had important consequences for Britain. The news that James had a son decided his enemies to act against him, and the result was the loss of the crown by the Stuarts. The young prince was sent to France and was there when, in 1701, he became nominally King of Great Britain as James III. In 1708 and 1715 he went to Scotland to try to win the throne, but soon returned to France. In 1715, when peace was made between Britain and France, he was obliged to leave the latter country. He went to Bar-le-Duc in Lorraine and later to Rome where he died, Jan. 2, 1766. He was married to S. Poters. He married Clementina, daughter of John Sobieski, King of Poland, and had two sons, Charles Edward and Henry.

Jameson Sir Leander Starr British administrator. Born in Edinburgh, Feb. 9, 1853, he became a medical man. In 1878 he went out to Kimberley where he practised and there he made friends with Cecil Rhodes who soon began to employ him.

JAMESON'S RAID

on political work. In 1891 he was made administrator of Rhodesia, and in 1895 he led the raid on Johannesburg. For this he was tried and put in prison in England, but was soon released. In 1900 he became a member of the legislature of the Cape and from 1904-08 he was Prime Minister. In 1911 he was made a baronet, and in 1913 chairman of the British S. Africa Co. He died in London, Nov. 26, 1917.

Jameson's Raid Raid on Johannesburg by the Britishers in the Transvaal, badly treated by the Boers planned a rising and obtained promises of help from Cecil Rhodes and his assistant, Dr. Jameson. The rising was postponed, but Jameson with about 500 men entered the Transvaal on Dec. 28, 1895. They were quickly forced to surrender and handed over to the British authorities. The leaders were tried and sentenced to imprisonment, and Parliament appointed a commission to inquire into the matter. Its report censured Rhodes, who lost his status as a privy councillor. The raid left a bad impression and so contributed to the war of 1899-1902.

Jamestown English settlement in the United States the first of the kind. It is on the James River in Virginia, about 30 m. from its mouth, and dates from 1607. It was the first capital of Virginia and remained so until 1696, when, having been damaged by fire, it fell into decay. The peninsula on which it stood has been converted by the action of the river into an island, and the ruins of the buildings thereon are carefully preserved by the society that owns them. In 1907 the tercentenary of the foundation was celebrated.

Another Jamestown is the capital of St. Helena. Pop. 2500.

Jammu City of Kashmir and the winter capital of the state. It stands on a tributary of the River Chenab and has railway connection with India. At one time Jammu was the capital of an important state named after it, this is now part of Kashmir. In 1931 there was unrest in the city. Pop. 30,500.

Jamnagar City and seaport of India. It is the capital of the Little state of Nawanagar and is 310 m. north-west of Bombay. Pop. 42,000.

Janissaries Corps of Turkish soldiers. Founded in the 14th century, the Janissaries were, until about 1600, mainly Christian boys taken as tribute, and brought up, under strict discipline, and able soldiers and were long the backbone of the Turkish army. After a mutiny in 1825, the corps was abolished.

Jan Mayen Island Island in the Arctic Ocean. It lies between Greenland and Norway and covers 169 sq. m. It is visited by fishermen after seals and whales. Several explorers said to have discovered the island one being Jan Mayen, a Dutchman. In 1920 Norway acquired the island, and took possession of it in 1925. An observatory was erected in 1921.

Jannina Town of Greece. On the Lake of Albania and is the chief town of a district named after it. It was from 1788 to 1816 the headquarters of the rebel chief, Ali Pasha, who was called the Lion of Jannina. The Turks fortified it and in 1913, during the first Balkan War, it was besieged and taken by the Greeks.

707

During the Great War it was taken by the Allies. Pop. 25,000.

JAPAN

Jansenism Term used for the teaching of Cornelius Jansen. He was a Dutchman who, in 1619, became Professor of Theology at Louvain, and later Bishop of Ypres. He died May 6, 1638. Jansen wrote a book called *Augustinus* in which he restated the teaching of S. Augustine on predestination, the fall of man and other matters. It was published in 1640, after his death, and was taken up by a group of religious thinkers including Pascal, who lived at Port Royal. They called themselves Jansenists. They were then members of the Roman Church, but they incurred the hostility of the Jesuits, and after a time formed a church of their own, adhering to much of the Catholic faith, but rejecting the doctrines of the immaculate conception and papal infallibility. The church still exists in the Netherlands.

Janssen Cornelius German painter. He was born in 1593 of German parents, probably in the Netherlands. In 1616 he returned to London and calling himself Johnson worked there for some years. He painted Charles I and other notables. When the Civil War began he went back to Holland, and died, probably at Utrecht, in 1664.

Januarius Saint and martyr. A bishop of Beneventum in the days of Diocletian he was tortured and killed during that emperor's persecution of the Christians. His body is preserved in his native city of Naples of which he is the patron saint. His day is Sept. 19.

Janus In Roman mythology an aboriginal spirit of the doorway. This was developed by the Latin people into a double-headed deity. His arch facing east and west in the Forum, commonly called the Temple of Janus was only closed in time of peace. He gives his name to the first month of the year.

Japan Empire of Asia. It lies off the north-east coast of the continent, from which it is separated by the Sea of Japan. It is composed of five large islands, Honshu or Hondo, the mainland, Kishiu, Shikoku, Hokkaido, or Yezo, and Formosa, or Taiwan, over a thousand smaller ones, the peninsula of Korea or Chosen, and the southern half of Sakhalin. The total area is 280,644 sq. m. and the population in 1930 was 90,396,043.

PHYSICAL FEATURES The islands are volcanic and mountainous. Fujirama (12,395 ft.) on Honshu, being the most famous mountain. The numerous peaks are more lofty. The climate is diverse, of no great size and of little use for navigation. The climate is diverse, for the empire extends through many degrees of latitude, but is in general wet with short, hot summers, and long, cold winters. Typhoons are of frequent occurrence and cause great damage, and earthquakes and tidal waves.

The vegetation is rich and varied, as do culture. The chief industry of the fertile country is wheat, barley, rice, tobacco and tea. being the chief crops. Minerals and metals abound. Manufactures are of increasing importance, in 1932 Japan exported goods to the value of £143,936,683. The largest cities, in order of population, are Tokyo, the capital, Osaka, Nagoya, Kobe, Kyoto, and Yokohama, all on Honshu. Kobe and Yokohama are the chief ports. There is a good railway system.

GOVERNMENT. Japan is ruled by an em-

poror, called sometimes the Mikado, and a cabinet of ministers. There is a parliament, or diet, of two houses, a house of peers and a house of representatives the latter elected by all adult males. There is no state church but Shintoism and Buddhism are the chief faiths of the people. Education is compulsory and there is a system of administering justice framed on European models. Japan maintains a large and efficient army recruited by compulsory service. It has a good navy.

The country possesses a good banking system set up in 1872. The standard of currency is the yen worth 2s 6d. The metric system of weights and measures is compulsory.

HISTORY The Japanese empire dates from 660 B.C. and the present ruler claims to be the direct descendant of Jimmu Tenno, its founder. From the 12th to the 19th century it was ruled by Shoguns but in 1817, after a civil war, the emperor regained his authority and a new era began. Since that time Japan, learning much from Europe, has made enormous advances in every direction and ranks as one of the great countries of the world.

In 1894 Japan was victorious in a struggle with China and in 1904-05 her armies defeated the Russians in war. An alliance with Britain was concluded and as an ally Japan entered the war against Germany. She secured a sphere of influence in Manchuria which in 1931 led to trouble with China and in Feb. 1932, the independent state of Manchukuo (Manchuria) was established under the protection of Japan. In 1933 the war broke out afresh. Japan would not accept the findings of the League of Nations on the Manchurian question and resigned from the League. During 1935 she strengthened her position in China and in Nov. her troops entered Peking and Tientsin. At the beginning of 1936 there was a prospect of improved relations between the two countries. Japan's proposals included concerted (Sino-Japanese) action against Soviet influence in N. China. In Jan. 1936 after claiming equality with Britain and America Japan decided to leave the Naval Conference. The growth of population presents a problem of increasing difficulty.

CULTURE Japan has a literature of its own but more notable is its art. A great amount of skill and taste is shown in the pottery produced by her people, whose gifts are also seen in their metal lacquer and bronze work. For painting they have distinct gifts and the native architecture in addition to being suited to the peculiar climate and other needs of the country, possesses considerable grace and beauty.

Japanning Process by which various articles of wood, metal and leather are coated with a kind of varnish and usually subjected to heat to harden the surface. In Japan a special lacquer prepared from the juices of certain trees is used. In Great Britain the black Japan consists of asphaltum, copal and linseed oil. The articles treated in this way are known as Japanned ware.

Japonica Name used for certain plants growing in Japan. In Britain gardeners use it for the Japanese quince *Cydonia japonica* but it will equally well indicate other flowering shrubs e.g. *Stimulia orientalis*. The quince which grows quite easily bears small flowers. Commercially it denotes pale catechu or gambler extract, formerly called terra Japonica.

Jarnac Town of France. In the department of Charente, 7 m. from

Cognac. It has a trade in wine and brandy. Pop. 4500.

At the Battle of Jarnac, March 13, 1569, the Huguenot army was defeated, and its leader, the Prince of Condé killed.

Jarra Reddish hardwood. It comes from the mahogany gum tree, *Eucalyptus marginata*, of Australia. Being very hard, it serves for gate posts, railings, piles and railway sleepers. The tree grows in the forests of Western Australia to a height of 150 ft.

Jarrow Borough and river port of Durham. It stands on the Tyne, 4 m. south west of South Shields, on the L.N.E. Ry. It is a mining district, the chief industries are shipbuilding yards and iron works. St. Paul's church, once the church of the monastery associated with the Venerable Bede, contains parts of the original building, and near it are some monastic ruins. Pop. (1931) 32,018.

Jasmine Large genus of shrubs of the olive order. They are natives of the warmer regions, especially Asia, but one is S. American. Two varieties grow in English gardens. One bears white flowers in summer and the other, called the winter jasmine, is an evergreen bearing yellow flowers. They do well against walls, trellises and pergolas.

Jason Hero of Greek mythology. The son of Aeson, King of Iolous, he was educated by the centaur Chiron. To get rid of him and his claim to their father's inheritance his half brother Pelias sent him at the head of the Argonauts to find the Golden Fleece. When he returned with it, he and his wife, Medea, by a ruse, secured the death of Pelias and were expelled in consequence. Jason later deserted Medea for Creusa, who was killed by the wronged wife.

Jaspar Henri, Belgian politician. He was born July 28, 1870, and became a lawyer. In 1910 he took a prominent part in the work of restoring the country's industries and the same year he was elected a deputy. He took office as Minister of the Interior and then as Foreign Minister a post he retained until 1925. Jaspar was from the first a firm supporter of the League of Nations and was a member of the Court of International Justice at the Hague. In May, 1926, he became Prime Minister and Minister of the Interior, and he remained at the head of affairs until 1931.

Jasper Impure form of silica. It consists of an intimate mixture of quartz and red and yellow iron oxides or clay, thus rendering the mineral opaque. As an ornamental stone, Jasper was known to the Greeks. One variety is deep red with concentric zones and another has parallel bands of reddish brown and green.

A ware invented by Joseph Wedgwood is known as Jasper. It is of uniform colour and is decorated with figures in the form of cameo.

Jassy City of Rumania on a tributary of the Pruthi in the department of Jassy about 200 m. from Bucharest. It has a trade in cattle, corn, oil and other products. It was at one time the capital of Moldavia and in 1917-18 was temporarily the capital of Rumania. Pop. (1930) 102,595.

Jats People of north west India. They are tall, dark skinned, regular featured and bearded and speak an Indo-Aryan tongue called Jatki. Found chiefly in the Punjab, Rajputana, United Provinces, Baluchistan and Sind they number some 7,000,000 and are

JAUNDICE

mainly farmers and cattle breeders. They have a good reputation as soldiers

Jaundice Yellow discoloration of the skin and mucous membranes and indicates a disturbance of the bile's normal flow into the intestine. It may arise from obstruction, usually denoted by darkened urine. Non obstructive jaundice may arise from increased destruction of red blood corpuscles, as in pernicious anaemia, bacterial poisoning, as in yellow fever, phosphorus poisoning, or yellow jaundice. Any of them are indicated by the presence of bile in the stools

Jaures Auguste Marie Joseph Jean Castres, Sept 3, 1859, French statesman. Born at brilliant scholar there and in Paris. He became a lecturer at the University of Toulouse. In 1883 he was elected to the Chamber of Deputies but in 1887 he was defeated and returned to his former post at Toulouse. From 1893-98 he was again a deputy and in 1902 he was once more elected to the Chamber. By this time he had definitely become a socialist, and his abilities soon made him the leader of that party and a figure in the international movement. In 1914 he worked and hoped for peace, but just as war broke out he was murdered, July 31, 1914. With Briand, Jaures founded *L'Humanité*, a journal which he edited until his death.

Java Island of the Dutch East Indies, the third largest of the group. It lies between Borneo and Sumatra and covers some 50,000 sq m. Its length is 630 m. It is mountainous and volcanic, save in the north-west. Sameru, 12,000 ft., is the highest point. The soil is fertile and there are extensive forests of sugar and various spices. The minerals are oil, tin, coal and salt. The capital is Batavia. Surabaya is the next place in importance, and these two are also the chief ports. With the rest of the Dutch East Indies, Java is under a governor-general and a council, partly elected and partly nominated. The people are chiefly Mohammedans and Buddhists. The island is densely populated and commerce is the most important of the group. Remains of early man have been found in Java, one of the oldest known human found in coming from the island. At a later date it had its own civilisation, a Hindu one. Early in the 16th century the Portuguese discovered the island, but it was soon taken by the Dutch. Pop 37,433,000

Javelin Kind of throwing and thrusting spear. It was usually about 6 ft. in length, and was used in ancient times by both infantry and cavalry. When thrown it had a range up to about 40 yds. The head of a javelin was either flat or leaf shaped, and either long, diamond or leaf shaped. Javelin throwing is an event in certain athletic sports. The record throw was made in 1932 by a Finn, M Jarvinou.

Jaw Bony framework of the mouth in which the teeth are set. The two upper jaw bones lie beneath the cheeks, completing the oyo orbits and the nose. The two lower jaw bones unite immovably in the child's second year into a single mandible. The alveolar margins of each jaw contain the tooth sockets.

Jay Family of perching birds related to the crows. The common jay of Great Britain and Europe (*garrulus glandarius*) is

709

about 14½ ins long and has blue barred wings and a black-and-white crest. It is a garrulous bird, much persecuted by gamekeepers. Another genus contains the Siberia and Canada jays, and still others the American blue jays.

Jay John American statesman. Born in New York, Dec 12, 1745, he became a lawyer there. In 1777 he was made chief justice of New York, and in 1779 he went to Spain as ambassador. Later he went to Paris where he helped to make the peace treaty with Britain in 1782-83. From 1784 to 1790 he was a secretary of foreign affairs, and from 1790-95 chief justice of the supreme court, and from then until 1801 governor of New York. In 1794 he went to London and arranged a convention (Jay's Treaty) with Great Britain. He died May 17, 1829.

Jazz Name applied to certain American dance music and certain dance types of negro origin. It is an onomatopoeic word aptly describing the noisy, percussive features of the fashionable dance bands. It also describes bizarre and inharmonious colour decoration.

Jeans Sir James Hopwood English scientist. Born in London, Sept 11, 1877, he went to Trinity College, Cambridge, and distinguished himself as a mathematician. He became a fellow of Trinity and lecturer in mathematics in the University. From 1905-09 he was professor at Princeton University, and in 1909 he returned to Cambridge as lecturer in applied mathematics. From 1919 to 1929 he was secretary of the Royal Society, and in 1928 he was knighted. Jeans has written books for students of mathematics, but he is best known for his popular expositions of recent scientific theories, as in *The Universe Around Us*, *The Mysterious Universe*, and *The Stars in their Courses*.

Jebb Sir Richard Claverhouse British classical scholar. Born, Aug 27, 1841, he was educated at Charterhouse School and Trinity College, Cambridge. He was senior classic in 1862 and, elected a fellow of Trinity, he devoted his time to tutorial work there. In 1869 he was made public orator to the university. In 1875 Jebb was chosen Professor of Greek at Glasgow, and in 1889 Regius Professor of Greek at Cambridge. In 1891 he was elected M.P. for the university. His honours were mainly academic, but in 1900 he was knighted and in 1905 was given the Order of Merit. He died Dec 9, 1905. Jebb published editions of *Sophocles* and *Aeschylus*. He was also the author of a *Life of Bentley* and a *Primer of Greek Literature*.

Jedburgh Burgh and market town of Roxburghshire, also the county town. It is 56 m from Edinburgh, on the LMS Ry. The chief industries are the making of tweed and artificial silk. Jedburgh was one of the most important of the border towns. The old name was Jethart, and the old town was about 4 m from the present one. A certain kind of battle axo was called the Jethart axe, and Jethart justice was the custom of hanging a man first and trying him afterwards. Pop 3057.

Jeddah Seaport and town of the Hejaz. Situated on the Red Sea it is 46 m from Mecca of which it is the port. It exports hides, carpets, coffee and mother-of-pearl. Long a Turkish possession, it was taken by the Hejaz forces in 1916. Pop 20,000.

JEDDAH

Jefferies Richard English writer Born in Wiltshire, Nov 6 1848 he showed early a great love of nature For a time he was a reporter, but he gave up this calling in 1867 owing to illness and passed the rest of his days in writing and studying nature His books had considerable popularity They include *The Story of My Heart*, *Amoryllis at the Fair* and *Wild Life in a Southern County* He died Aug 14, 1887

Jefferson Thomas American statesman Born in Virginia, April 13, 1743, he became a lawyer and later was one of the leaders of the movement for independence He helped to draw up the Declaration of Independence in 1776, and in 1779-81 was governor of Virginia He went to Paris to help to make the peace treaty with Great Britain in 1784, and in 1789 became secretary of state under Washington He was the leader of the party opposed to the Federalists and on this account lost his position in 1794 In 1797, however, he was elected vice president and in 1801 president He was again elected president in 1805, but he retired in 1809 Jefferson died July 4, 1826

Jeffreys Lord English judge Born near Wrexham in 1648 George Jeffreys became a barrister In 1677 he was made serjeant of the city of London, and in 1678 its recorder He made himself notorious by his attitude towards those accused by Titus Oates and then against Oates himself but more so by the severity with which he punished those implicated or said to be implicated, in the rebellion of the Duke of Monmouth when he sentenced over 300 persons to death in the bloody assize He was then Lord Chief Justice and a baron but was soon made Lord Chancellor During the reign of James II he remained in an influential position but when the king left the country he tried to follow his example He was caught when disguised as a sailor at Wapping and died in the Tower of London April 18, 1689

Jehoiachin King of Judah A son of Jehoiakim he succeeded to the throne when 18 years old He only reigned three months when Nebuchadnezzar removed him to Babylon at the first captivity After 37 years Nebuchadnezzar died his successor released the captive making him a daily allowance thereafter He lived 600 B.C.

Jehoiada High priest at Jerusalem under Ahaziah Athaliah and Joash (2 Kings xi-xii) Ahaziah's mother Athaliah usurped the throne of Israel and sought the life of her grandson Joash His sister Jehocheba Jehoiada's wife concealed her nephew Joash in the temple during Athaliah's reign At the end of six years Jehoiada placed him on the throne and conspired at Athaliah's death about 836 B.C.

Jehoiakim King of Judah He was a son of Josiah and lived about 600 B.C. The Egyptian pharaoh Necho appointed him king changing his name from Eliakim and making him pay tribute After Egypt's overthrow at Carchemish in 605 B.C. Judah became subject to Babylon but three years later Jehoiakim revolted He repelled various Chaldean and Syrian attacks but died when Nebuchadnezzar was besieging Jerusalem

Jehoshaphat King of Judah A son of Asa his alliance with Ahab King of Israel proved disastrous He aided Ahab against Benhadad of Syria

at Ramoth Gilead, but barely escaped with his life A joint trading venture to Ophir for gold resulted in the fleet's destruction at Ezion Gobar in the Akaba Gulf His campaigns against Moab and Ammon were more successful and he effected some internal reforms He died in 851 B.C.

Jehovah Principal name for the God of Israel It occurs nearly 7000 times in the Old Testament The Hebrew word, containing four consonants YHWH hence called the tetragrammaton was deemed too sacred for utterance The vowels of another word Adonai, Lord, usually inserted in the text as a hint to use that word, have been read into the tetragrammaton, giving the pronunciation Yahweh, which in English has become Jehovah According to Ex. iii, the meaning is, *I am that I am*.

Jehu King of Israel He was a son of Jehoshaphat and became famous as a soldier under Jehoram, or Jeram He was anointed king by order of the prophet Elisha, and ordered to put to death the members of the royal family He drove his chariot furiously to Jezreel, hence the name Jehu for a driver, and there put to death not only Joram, but also Ahaziah, King of Judah and many other persons He became king (842 B.C.) and reigned until 815 His story is told in 2 Kings, ix-x and his name is on a tablet of Sennacherib II, King of Assyria, now in the British Museum

Jellicoe Earl English admiral Born Dec 5, 1850 the son of a captain in the merchant service, John Rushworth Jellicoe entered the navy in 1872 He served in Egypt and China and commanded the naval brigade that took part in the relief of Peking in 1900 when he was wounded seriously, in 1893 he had escaped when the *Victoria* was sunk From 1905-07 he was director of naval ordnance and 1907-08 second in command of the Atlantic Fleet. He was then knighted and made an admiral From 1908-10 he was a lord of the admiralty and in charge of naval construction and in 1910-11 he commanded the Atlantic Fleet In 1912 he was made second sea lord a position he held when war broke out

Jellicoe was then put in charge of the Grand Fleet and he led this at the battle of Jutland In 1916 he left the Grand Fleet to become first sea lord and chief of the naval staff a post he held until 1917 In 1918 he was created a viscount and in 1919 he was awarded £50,000 for his services From 1920 to 1921 he was governor of New Zealand and in 1925 he was made an earl From 1928 to 1932 he was President of the British Legion He died in 1935 Jellicoe wrote two books *The Grand Fleet* and *The Crisis of the Naval War* See JUTLAND

Jelly Semi-solid and transparent and of the substance of the nature of a colloid Most jellies contain gelatine many food preparations being of this character Sea-weeds such as agaragar and carrageen or Irish moss also yield jellies and fruit jellies are made by boiling down fruit juices with sugar the pectin present producing a gelatinous condition

Jelly Fish Popular name given to the medusa stage of certain forms of the marine group of organisms The common jelly fish *aurilia aurilia* has a shallow umbrella like body whose soft translucent substance contains 95 to 96 per cent of water from the margin of the disc pro-

JEMAPPES

jects a fringe of short tentacles, interrupted by sense organs at intervals. At the centre of the under side of the disc is the projecting mouth bearing four large arms or tentacles. Locomotion in the medusae is by alternately contracting and expanding the disc. Many other forms of medusae exist, some of which are phosphorescent.

Jemappes Town of Belgium. It lies in the province of Hainaut, 4 m from Mons. Coal is found in the vicinity, and there are glass works. Pop (1931) 14,573.

A battle was fought here in Nov 6, 1792, between the French and the Austrians. Fighting also took place here during the Great War.

Jena Town of Thuringia, Germany. It stands on the River Saale, 56 m from Leipzig. Optical and scientific instruments are made. Pop 52,650.

The university of Jena founded in 1548 is one of the most famous in Germany.

The battle of Jena, one of Napoleon's greatest victories, was fought near here, Oct 14, 1806.

Jenghiz Khan Mongol emperor. Born in 1162, the son of a petty chieftain, he was proclaimed khan, or emperor, of Mongolia in 1206. He led his armies into China, Turkestan, Persia, India and Russia and included the two first in his vast dominions. He died Aug 24, 1227, and his empire soon fell to pieces.

Jenner Edward. English physician and discoverer of vaccination. Born at Berkeley, Gloucestershire, May 17, 1749, he was the son of a clergyman. He was apprenticed to a surgeon and later studied under John Hunter in London. He then set up in practice at Berkeley, where for 20 years he investigated the connection between cow pox and small pox. In 1796 he made his first practical experiment in inoculation. It was successful, and the practice spread rapidly in spite of violent opposition. In 1802 and 1806 Jenner was voted £10,000 and £20,000 by Parliament. He died Jan 24, 1823.

Jephthah Chieftain and judge of Israel (Judges xi, xii). Expelled by his Gileadite brethren, he led a band of robbers, but soon returned by invitation to Gilead to repel the Ammonites. He won a complete victory over them. Jephthah had made a vow that, if victorious, he would sacrifice the first thing from his house he met on his return. His own daughter met him and willingly consented to the sacrifice. He reigned for six years and gained victories over the Ephraimites.

Jerboa Sub-family of leaping rodents in Russia and Asia. The Egyptian night-feeding, burrowing jerboa has a tufted tail, and is about 8 ins long. It has short five-toed fore limbs, and three-toed hind limbs, six times as long, with which it makes kangaroo-like leaps.

Jeremiah Prophet of the Old Testament, and author of the book called after him. A son of Hilkiah, he was a priest of Anathoth near Jerusalem. His writings covered 40 years, from the time of Josiah to that of Ezekiah and the Exile. His prophecies, at first spoken, were afterwards dictated to his friend Baruch, but the roll was promptly burned by the king, Jehoiakim. A second dictation was supplemented by biographical passages from another hand, and was subsequently revised with an intro-

JEROME

ductory chapter, the prophecies against foreign nations being rearranged, as in Isaiah. In this form it appears in the Old Testament, where Jeremiah is regarded as one of the four major prophets. It is a continued warning to the people against the teaching of false prophets.

Jericho Town of Palestine. Situated in the valley of the Jordan, 17 m north-east of Jerusalem and 5 m north of the Dead Sea, it was the first Canaanite settlement reduced by the Israelites when they entered Palestine, the walls falling at the blast of the Israelite trumpets. Rebuilt by Hiel 500 years later it sheltered Elisha's college of prophets, and witnessed Zedekiah's last struggle with Babylon before the Captivity. Antony presented the region to Cleopatra. Herod built here a palace and a new city, the scene of the New Testament stories of Bartimaeus and Zacchaeus, which Vespasian destroyed. Around some mediaeval monasteries arose a third city, founded by the Crusaders, which still survives. It was captured by the British troops on Feb 21, 1918.

In 1931 the walls of the city that existed from 1600-1200 B.C. were unearthed. It is surmised that an earthquake destroyed them at the time of Joshua's attack.

Jeritza Maria. Austrian soprano. She debuted as Elsa in *Lohengrin* at Olmutz in 1909. She was a prime favourite at the Hofoper, Vienna, from 1912-21, after which she repeated her successes in New York as a member of the Metropolitan Opera Company. Her autobiography, *Sunlight and Song*, appeared in 1924.

Jeroboam Name of two kings of Israel. Jeroboam I was a son of Nebat. Solomon's suspicions of his loyalty led him to take refuge in Egypt. At Solomon's death Rehoboam's refusal to moderate his father's despotism caused the ten northern tribes to make Jeroboam, who had taken up their cause, their king. In this way there arose two Jewish kingdoms in Palestine, Israel and Judah. As centres of worship, in opposition to Jerusalem, Jeroboam set up golden calves at Dan and Bethel. He reigned from 937 to 915 B.C.

Jeroboam II was king, 781 to 740 B.C. He was a son of Joash and is chiefly known for his victories over the Syrians (2 Kings, xiv).

Jerome Jerome Klapka. English author. Born May 2, 1859, and educated in London, he was for a time a clerk and a teacher. He also did a little acting and in 1885 published *On the Stage and Off*. In 1880 Jerome made his name with *Three Men in a Boat*, a thoroughly humorous story. This was followed by the *Idle Thoughts of an Idle Fellow*. He wrote several novels including, *Paul Kelter* and *The Master of Mrs. Chivers*. Of his many plays the best known is *The Passing of the Third Floor Back*, others include, *New Lamps for Old* and *The Prude's Progress*. In 1892 Jerome helped to found a magazine, *The Idler*, and from 1893 to 1897 he edited a popular weekly called *To-Day*. He died June 14, 1927.

Jerome Saint and scholar of the Christian church. He was born of Christian parents at Strido on the borders of Dalmatia and Pannonia about 340. He went to Rome to study, and was baptised in 360 by the pope. He then lived as a hermit in the deserts of Syria and studied Hebrew. In 379 he was ordained at Antioch and in 382 began translating the Scriptures into Latin. In 395 he

made his home in Bethlehem where he built a monastery, and where he completed his translation of the Bible (*The Vulgate*). He died Sept. 30 420. Jerome was the first to distinguish between the canonical and apocryphal books of the Bible.

Jerome of Prague Bohemian reformer. Born at Prague about 1365, he studied there, at Oxford and in Paris, returning to Prague in 1407. At Oxford he came under Wycliffe's influence and later became associated with John Hus. He was arrested for heresy and, like Hus, was burned at Constance after a trial, May 30, 1416.

Jersey Earl of English title borne by the family of Villiers. Sir Edward Villiers was lord chamberlain and secretary of state under William III, who made him Earl of Jersey in 1607. The 5th earl married the granddaughter of Robert Child the banker, and since then the family name has been Child Villiers and each earl has been a partner in Child's Bank. The 7th earl was governor of New South Wales, 1800-03. The earl's oldest son is called Viscount Villiers, or Viscount Grandison, and his seats are Osterley House, Middlesex and Middleton Park, Oxfordshire.

Jersey Largest of the Channel Islands. It is 13 m from the coast of France and covers 28,700 acres. Its inhabitants are wholly Norman French by race and speak French, which is the official language. St. Helier is the capital and the chief port. Gorey, Corbierre, St. Ouen and St. Brelade are smaller places. Mount Orgueil Castle is an object of historic interest. Jersey is a popular holiday resort with a very equable climate and much picturesque scenery. The soil is fertile. Potatoes, grapes, flowers and tomatoes are grown for the English market, and its breed of cattle is famous. The island is governed by a lieutenant governor and a bailiff. The legislative body is called the States, some of its members are elected and some are permanent officials. The royal court is the court of law. Pop. 49,700.

A collar garment worn by boys and girls and also by seamen is called a *Jersey* because such were first worn by the seamen in Jersey.

Jersey City City of New Jersey. It stands on a peninsula between the Hudson River and Newark Bay. It is part of the port of New York with which it is connected by tunnels and ferries. There is a large shipping trade and the other industries are mainly connected with the preparation of food products, tobacco, chemicals, etc. Pop. (1930) 316,715.

Jerusalem Chief city of Palestine. It is situated 33 m from Jaffa. Its port with which it is connected by railway and about 15 m from the Dead Sea. Nearly 4000 ft above the level of the sea it was inhabited in the Stone Age and was the strong hold of Urusalin mentioned in the Tel-el-Amarna letters about 1400 B.C. It was captured by David about 1000 B.C. and became the national centre of the Jews. Temples were built by Solomon, Zerubbabel and Herod. At that time included in the Roman world. It witnessed the crucifixion of Christ and was destroyed by Titus in A.D. 70.

In 135 the Emperor Hadrian rebuilt the city and about 200 years later Constantine the Great built a church on the site of the Holy Sepulchre. This attracted thousands of pilgrims from Europe for whom hospices were

built and for the next 300 years it was a prosperous Christian city. In 637 it was taken by the Arabs, but for a time the pilgrims were welcomed. Later, however, there was a change of policy and to recover the Holy Places the first crusade was organised. In 1000 Jerusalem was taken and until 1187 was the capital of a Latin kingdom. The Moslems then recovered it, and in 1517 it became a Turkish possession. It remained part of the Turkish realm until British troops (in the Great War) entered it in Dec. 1917.

The modern city is surrounded by walls built in the 16th century and pierced by eight gates. Two hills, Zion and Moriah, associated with events of great interest to the Christian world are on the south overlooking the valley of Hinnom. Quarters are devoted to the Jews, Armenians, Christians and Mohammedans. The main objects of Christian veneration are the Holy Places. The mosque of Omar is the chief of several mosques. The Walling Wall is sacred to the Jews and there was trouble about it between them and the Mohammedans in 1920. The Roman Catholics, Anglicans and Greek Church have bishops in the city. The British have given it a new water supply and new official buildings. The industries chiefly centre around the providing for the wants of tourists and pilgrims. The Arabs call the city El Kuds or the sanctuary. The population which was 62,700 in 1922 had increased in 1931 to 90,500.

Jervaulx Hamlet of Yorkshire (N.R.) On the Ure, 13 m from Ripon. It is noteworthy only for the ruins of a Cistercian monastery which was founded in 1156 and dissolved at the Reformation. The remains include the ruins of a cruciform church, chapter house and cloisters.

Jervis Bay District of New South Wales, Australia. It lies 32 m south of Sydney and consists of a harbour and the adjacent land. This covers 28 sq m and belongs to the government of the Commonwealth which bought it in 1907 to serve as the port for Canberra (q.v.).

Jesmond District of Newcastle upon Tyne. Formerly a place of pilgrimage called Jesus Mount, it has still the remains of a pilgrimage chapel. Jesmond Dene is a public park.

Jesse Father of David, King of Israel. He was a native of Bethlehem and had eight sons. Isaiah's phrase "root of Jesse" suggests Christ's descent from David and Jesse (Matt. 1). This is represented in wood or stone or on a window of stained glass, or in painting or embroidery. Jesse trees, or Jesse windows, exist at Aberavonny, Wells, Christchurch, Hants, Dorchester, Oxon and elsewhere.

Jessel Sir George, English lawyer. A Jew, he was born in London, Feb. 13, 1821 and educated at a Jewish school and London University. He became a barrister in 1847 and in 1868 entered parliament as a Liberal. He was solicitor-general 1871-72 and then became master of the rolls and later president of the court of appeal. He died Mar. 21, 1883. He was the first Jew to become a judge in Great Britain.

Jessop Gilbert Laird, English cricketer. Born May 19, 1874, he was educated at Bedford and Christ's College, Cambridge. He made his reputation as a member of the Gloucestershire county team and was perhaps the hardest hitter of his day.

He was also a good bowler and a grand fieldsmen. He played for Cambridge University, in 1899 as captain, for England against Australia, and for the Gentlemen, and was the author of some sensational feats of rapid scoring. He succeeded W. G. Grace as captain of the Gloucestershire team.

Jest Book Collection of witty sayings or humorous stories. During the crusading age raconteurs brought to Europe many tales, greatly enriching the material already available. The earliest extant collection is *A Hundred Merry Tales*, which was utilised by Shakespeare. Changing taste is exemplified by Joe Miller's *Jests*, 1739, and Mark Lemon's *Jest Book*, 1865.

Jester Saver of witty things and maker of mirth. Jesters were kept in royal and noble households in mediaeval times and later. Originally a minstrel and reciter of romances, or *gestes*, he became a merry andrew or buffoon privileged, like the court fool, to play pranks and utter pungent truths. He wore a motley dress, bells, ass-eared cowl and banble. The last official court fool was kept by Charles I. The last nobleman's jester was the Earl of Suffolk's Dicky Pierce who died in 1728.

Jesuits Popular name for the religious order known as the Society of Jesus. It dates from 1543, although some years before that date Ignatius Loyola and four companions had banded themselves together and taken vows. The order soon became very influential.

Whilst retaining its original purpose of converting the heathen, its members mixed very much in political affairs and European history in the 16th and 17th centuries is full of records of their activities in this direction. In England they were prominent in the attacks on Elizabeth's throne and in Germany in the prosecution of war against the Protestants.

Meanwhile other members carried on mission work almost all over the world. Paraguay came under the rule of the order, one of the few instances in the world's history of a theocracy. In North America the labours of the Jesuits are among the most heroic in the annals of missionary work. In China, too, they were very successful.

In the 18th century the political work of the Jesuits made them suspect in several countries, and on several occasions they have come into conflict with the popes. In 1759 they were expelled from Portugal. France and Spain followed this example, and in 1773 the pope suppressed the order. It was not, however, killed, and in 1814 was revived. It has not returned, except in isolated cases, to the political field, but has been, and is, very active in the work of converting the heathen and educating the young.

The head of the order is the General, whose powers are almost absolute. Under him are the Provincials, who are heads of the various provinces. Members pass through a very rigorous training, and ten years must elapse before one can become a full, or professed member. Next in order are the coadjutors, the novitiates and finally the novices. Each member is bound to absolute obedience.

The zeal and learning of the members is unquestioned, but their methods have been sharply criticised. It has been held that they act on the principle that the end justifies the means, but this is denied by their apologists. Pascal's *Provincial Letters* were written against the Jesuits.

In England the Jesuits conduct several schools, the chief being Stonyhurst and Beaumont. In Ireland they have many. Their English headquarters are in Farm St., Belgrave Square, London, S.W. Their chief training college is in Rome where the General lives. The order is about 20,000 strong.

Jesus Christ Personal name of the central figure of Christianity. Jesus is the Greek form of the Hebrew Joshua meaning "Jehovah saves." Christ is a Greek title, "anointed," representing the Hebrew Messiah, the promised national deliverer.

Apart from S. Paul's indirect allusions, nothing is known of Christ's early life beyond what is contained in the four gospels. He was born in the stable of an inn at Bethlehem, whither His parents had gone for the census ordered by the Roman government of Palestine. His parents were Jews, Mary and Joseph, the latter a carpenter of Nazareth, but the accepted Christian belief, based on passages in the gospels of S. Matthew and S. Luke, is that Mary was a virgin, a fact that accounts for the sinlessness of Christ. The date was fixed in the 6th century at the year 1, but modern calculations have placed it in A.D. December 25 is kept as the natal day.

After a time the two, with the child who had been circumcised and presented in the Temple, settled down at Nazareth. There were other children in the household, one view being that these were children of Joseph by another wife. With them Jesus was brought up, but only one event of His boyhood is recorded. When twelve years old He went to Jerusalem with His parents and was found by them arguing with the doctors in the Temple. When old enough He began work as a carpenter and in this occupation He passed His time until He was 30 years old. During this period His reputed father died, and presumably He helped to maintain His mother.

When 30 years old Jesus entered upon His life work. He was baptised by a relative, John, in the Jordan, and passed 40 days in retirement in the wilderness, where He was tempted by the devil. He then gathered around him twelve followers or disciples and spent nearly three years teaching and preaching as the little band wandered about from place to place. Of His utterances many take the form of parables, but the longest recorded is the one known as the Sermon on the Mount. He performed many miracles, mainly deeds of healing, during His ministry. He continually attacked the official classes, known as the Scribes and Pharisees, but the common people heard him gladly. His teaching is fragmentary, but it lays stress upon the love of God to man and contains sayings of infinite wisdom and universal application. He claims for himself, without any hesitation, the position of the Son of God and the interpreter to man of the divine will.

After nearly three years of teaching the officials decided to stop His activities. He was at Jerusalem and had just taken His last supper with His disciples, when, through the agency of one of the twelve, Judas Iscariot, He was seized and tried before Pontius Pilate. He bore himself with dignity and after some hesitation Pilate sentenced him to death. He was then crucified on a hill called Calvary between two thieves, dying on a day since commemorated as Good Friday. His body was moved to a tomb by one Joseph of Arimathea.

Such are the bare facts of Christ's earthly life, but the Christian Church was not built on these alone. It holds that after two days in

the tomb. He rose from the dead and appeared from time to time to various followers. After forty days He made in their presence His final ascension into Heaven. Attempts have been made to explain these occurrences, as well as the miracles on natural grounds for it is recognised that the existence of the Christian Church forbids them to be dismissed as mere efforts of the imagination.

Jet Black lustrous form of lignite resembling cannel coal but harder and blacker. It is light in weight easily cut and takes a high polish. It is used for making ornaments and mourning jewellery. Whitby in York shire is the chief English centre of the industry. There the jet is found in shales of the Upper Lias. Jet occurs also in Bohemia, Germany, and at Oviedo in Spain. Imitation jet ornaments are made from onyx and black glass.

Jetsam In English law property that is jettisoned or thrown overboard during a shipwreck or to lighten a ship in a storm. The loss of goods thus jettisoned is divided between those interested in the vessel and her cargo. This averaging as it is called is done by average adjusters.

Jethou Island of the Channel Islands. It lies to the south west of Herm and is 4 m. from Gornsey, from which it is governed. It covers 4 acres and is a mile in circumference.

Jevons William Stanley English logician, economist and statistician. Born at Liverpool Sept. 1 1833, he went to University College London, in 1851. From 1854 to 1859 he was employed in the mint at Sydney. In 1866 he became professor at Owens College, Manchester, and in 1876 professor of political economy in London University. He was drowned whilst bathing at Hastings Aug. 13, 1882. Jevons won a reputation as the author of books on logic especially his *Elementary Lessons in Logic*. He also wrote much on political economy including *Theory of Political Economy and Money and the Mechanism of Exchange*. His book *The Coal Question*, attracted great attention when it appeared in 1875.

Jewellery Term applied to articles made of precious metals, gems and other materials for use as personal ornaments. The jeweller's craft is very ancient and was brought to a high pitch of excellence in ancient Egypt and Greece. At the present day the trade is split up into a number of specialised industries. The centre of the diamond cutting industry is at Amsterdam, Paris, Vienna and New York produce novel and expensive jewellery. In England Clifton and London is noted for its high class work while Birmingham makes not only goods of high quality but also cheap and imitation jewellery. In London and Birmingham there are schools for teaching those entering the craft, and associations of employees and employers.

Jewry Land of the Jews or the district in which they live. In the Middle Ages many cities had a Jewish quarter which was called the Jewry. There are remains of these in London in Old Jewry and Jewry Street and in Winchester, Leicester, Oxford and other cities. Another name for Jewry is Ghetto.

Jews Race of Semitic origin, now scattered all over the world. The word Jew is a corruption of Judah or of Judah. A synonym for it is Hebrew. The early history of the Jews is narrated in the Old Testament, the facts

being supplemented and occasionally corrected by other information and by the results of archaeological research. They appear to have migrated from Mesopotamia to Palestine about 2000 B.C. under the lead of the patriarch, Abraham. Some 500 years later they moved with their flocks into Egypt where after a time their lot became one of great hardship. From this under the guidance of Moses they escaped and passed 40 years wandering in the wilderness.

Entering Canaan, the modern Palestine, the Jews conquered the tribes there and made their home again in the land they had previously left. They divided it among their twelve tribes named after the sons, or grandsons, of Jacob also called Israel one of their patriarchs. The tribe of Levi undertook the duties of the priesthood. The Jews were ruled at first by judges, but later they took a king called Saul. He was succeeded by David and then by Solomon, at which time the Jewish kingdom was clearly one of considerable wealth. At Jerusalem their capital, Solomon built a magnificent temple which served as the centre of the national life. Before his time the Jews had been almost continually at war with one or other of their neighbours, but his reign was one of comparative peace.

STRIKE AND CAPTIVITY Soon after the death of Solomon the Jewish kingdom was divided into two. Judah in the south and Israel in the north, and the story of the next few centuries is one of alternate wars and alliances between them and their neighbours. The two kingdoms came to an end in 586 B.C. and 721 B.C. respectively and for a time the Jews were captives in Babylon. Again they returned to their own land and were under the dominance of the Seleucids. Later the priest kings called the Maccabees, won freedom for them and made themselves rulers. In 63 B.C. the Jews passed into the orbit of Rome and at the time of Christ, the greatest Jew of all, their land was part of the Roman Empire. In A.D. 70 the Emperor Titus destroyed their temple and soon they were driven out and scattered although it proved impossible to stamp out their virile sense of nationality.

THE DISPERSION Since the dispersion or diaspora the Jews have been found in almost every country in the world. In most of them at one time or other they have been persecuted often with great cruelty. From England they were expelled in the 12th century, but allowed to return in the 17th. In the 19th they were granted equality with other citizens, previously they had been excluded from offices of state and the privileges of citizenship. In 1919 an organised anti-Semitic campaign on a large scale was started in Germany under the leadership of Adolf Hitler the Chancellor.

Some but by no means all of the hostility that has been shown to them is due to their long association with the trade of money-lending. As moneylenders and bankers they have been unusually successful and at times it has seemed as if the world's finances have been dominated by them. They have proved themselves adept too at other trades in which bargaining plays a considerable part. The Jews have produced quite a number of artistic and other geniuses and the race that includes such diverse names as those of Berenson, Disraeli, Einstein, Heine, Mendelssohn and Piazzi has no likeliest claim to recognition among scholars and artists.

ZIONISM—In the 19th century there was a movement to get the Jews back to Palestine,

this being called Zionism and it received an impetus, when, as a result of the World War, Palestine was taken from the Turks

In 1917 the "Balfour Declaration" embodied the British government's promise to make Palestine into a "national home" for the Jews. In 1920 Britain was appointed mandatory power for Palestine. In 1921 a "national home" was actually set up, and funds instituted for the purchase of land and for general colonisation purposes. From that time the position of the Jews in Palestine has steadily improved.

At the present time there are 15,000,000 Jews in the world, but there must be many times that number with Jewish blood in their veins. In Great Britain there are about 300,000, but this does not include the many who have, nominally at least, accepted the Christian faith. They live mainly in towns as they have done all over Europe since the dispersion. Very few Jews are found in country districts, although colonies of them have been settled on the land in America.

RELIGION The religion of the Jews, one of great and elaborate ceremonial is laid down in the Old Testament and in the sacred book called the Talmud. It is, as it has always been, strongly monotheistic and attaches great importance to the subject of food, some kinds being regarded as unclean. They worship in synagogues where rabbis expound the law. They have their own ceremonial as regards weddings and burials and English law makes provision for this. They have also their own calendar. The new year begins in October and their year, 5690, was the Christian year 1929-30. They have their own names for the months, and several days, including the day of atonement and the passover, are set aside as fasts, or festivals. They have their own system of weights and measures.

The literary language of the Jews is known as Hebrew and in that they have an extensive literature. The language they speak is called Yiddish, and in it many papers are published.

Jew's Harp Small metal musical instrument. It consists of a steel tongue set in a frame the neck of which is held with the player's teeth. The tongue is vibrated by the fingers and the pitch and volume of sound is controlled by the breath.

Jezebel Wife of Ahab, King of Israel. A daughter of Ethbaal, King of Tyre she introduced Phoenician worship into Israel, persecuted the prophets of Jehovah, treacherously caused Naboth's arrest and stoning, and was destroyed by Jehu. Her name is a synonym for an abandoned and unscrupulous woman (1 Kings, xviii-xxi, 3 Kings ix, Rev ii).

Jezreel City in the plain of Esdraelon, Palestine. Situated on a knoll 11 m from Nazareth, it was Ahab's capital. Nowadays it is a stone built village called Zerin.

Jhansi City of British India. In the United Provinces it is 60 m from Gwalior. Protected by a massive wall 4½ m round and a Maratha fort, it is a trade centre. Pop 66,432.

Jib Foremost sail in a sailing craft. Triangular, it extends from the jib boom or bowsprit to the foremost head. Beyond it may be a flying jib, and in yachts a balloon jib.

Jibuti Seaport of French Somaliland. Connected by rail with Addis Abbaba, it is the chief outlet for Abyssinia's

trade, and is a free port with a good harbour. It is the seat of government for the colony. Its name is sometimes spelled Djibouti. Pop (1931) 17,000, of which 625 are white.

Jig Appliance used in ore dressing for the sifting and concentration of the materials. It works on the principle that when particles of the same size and shape are agitated in water, the heavier ones rapidly sink to the bottom. The simplest form of jig or jigger consists of a number of sieves attached to a frame, which by means of a lever are shaken up and down in water. Types of jigs include one with a fixed sieve and a plunger to force water up through it. Also a device for holding in position accurately and tightly, work to be machined.

Jig Lively dance for one or more persons. The Irish jig is the national dance of Ireland. Bach, Handel and their contemporaries included jigs, usually spelled "gignés," in their suites. They are invariably in compound time.

Jihad Religious war of Mohammedans against unbelievers. Two were proclaimed simultaneously in 1877, one in India and the other at Constantinople against the Russians.

Jinn In Arabian mythology, a class of spirits. They are the offspring of fire, and appear in human or animal form. Their influence, if evil may be averted by talismans. See GENIE.

Joab Hebrew warrior. He was a son of David's sister Zeruiah. He was made commander of the arm, and won a great reputation as a man of war. He slew Abner, Saul's former captain, Amasa and David's son Absalom, and protested against David's proposed census. By Solomon's command he was executed for conspiring with Adonijah (1 Kings ii).

Joachim Joseph Hungarian violinist. Born near Presbourg, June 23, 1831, he studied at Budaapest, where he appeared in public at the age of eight, at Vienna and Leipzig, where he met Mendelssohn. In 1844 he visited London where he later performed regularly. He held musical posts at Weimar and Hanover, and in 1869, a year after his appointment as head of a new school of music at Berlin, started his famous string quartet. He died Aug 15, 1907. Joachim composed a good deal, his most notable work being his *Hungarian Concerto* (for violin and orchestra).

Joan of Arc French heroine. Born at Domrémy, Jan 6, 1412, she was the daughter of a peasant. Devout and perhaps hysterical she imagined she heard voices telling her to save France, then under the dominion of the English. In Feb 1429, she procured an introduction to the uncrowned King Charles VII. By him she was given a troop of soldiers to lead to the relief of Orleans then besieged by the English. Her faith infused new courage into her countrymen and the siege was raised. Other victories were won and in July, 1429, Charles was crowned at Rheims. In 1430, Joan wounded in a fight, was taken prisoner by the Burgundians and sold to the English. By them she was tried at Rouen, and on May 30, 1431, having been found guilty of sorcery and heresy, was burned. In 1920 she was canonised.

An immense literature has grown up around "the maid," as Joan is often called, and G. B. Shaw has written a play, *Saint Joan*.

Joash Two kings of the Old Testament, also called Jehoash. One was king of Israel 797 to 783 B.C. He was the son and successor of Jehoahaz and recovered the lands conquered by Syria by defeating Hazael's son Benhadad (2 Kings, chli xiv). Challenged by Amaziah of Judah, he reduced the land to vassalage.

The second was King of Judah from 836 to 797 B.C. A son of Ahaziah, he obtained the throne which had been usurped by Athaliah during a revolt encouraged by Jehoahaz (2 Kings xi xiv). He assented to Jehoahaz's abolition of the worship of Baal, but reintroduced it after the death of the high priest.

Job Hero of a book of the Old Testament. The book of Job is the supreme achievement of Hebrew poetry. Its prose prologue describes an opulent Arabian emir in the patriarchal age suffering loss of his children and possessions and yet ascribing no wrong to God. The unknown author brings together three neighbouring emirs to discuss these calamities with him, presenting in verse form three cycles of argument. Each comprises six speeches one by each friend and Job's reply, although the concluding speech is apparently lacking. A younger listener, Eliphaz, interposes to reconsider whether human suffering is punitive. Job is finally abashed and humbled by God's majestic response. In the epilogue Job is restored to still greater prosperity.

Jocasta In Greek legend, the mother of Oedipus and the wife of Laius of Thebes. On her husband's death she married her own son Oedipus and bore him children but on discovering his identity hanged herself.

Jockey Rider in a horse race. Most jockeys are professionals and begin their career as apprentices in a racing stable. In Great Britain before they can ride in a race they must obtain a licence either from the Jockey Club or from the National Hunt Committee. Licences to ride are likewise essential in most other countries.

The body that controls racing on the flat in Great Britain is called the Jockey Club. It has power to suspend jockeys for infringements of its rules. Its affairs are managed by three stewards and its headquarters are at Newmarket. There are jockey clubs for like purposes in Australia, France, Ireland and other countries.

Jodhpur Native state of Rajputana, India. Also known as Marwar, it is a sandy country traversed by the Luni river and produces maize, millet and cotton. Its area is 15,016 sq. m., and its ruler is a maharajah. Pop. (1931) 2,125,982.

The capital Jodhpur, is a trading centre. Pop. 73,480.

Joel Second of the twelve minor prophets of the Old Testament. A son of Pethuel he dwelt in Jerusalem. He describes the locust plagues, sometimes regarded as symbolical and utilizes them to foreshadow the final judgement. Peter effectively quoted at Pentecost Joel's promise of the Holy Spirit. The name means *Jehovah is God* and designates also 13 other persons mentioned in the Old Testament.

Joffre Joseph Jacques Césaire, French soldier. Born Jan. 12, 1852, he entered the army in 1870 and saw active service in the Franco-Prussian War. He served too in Indo-China, 1885-88, West Africa, 1891, and Madagascar, 1896-99. In 1911

Joffre was made chief of the staff and in 1914, as arranged, he took command of the French armies on the western front. He retained that position for over two years in spite of a severe criticism. His plans failed to check the German advance and his own offensives in 1915 were not very successful, but he must be credited with some share in the victory of the Marne and he retained the affection of the rank and file. In Dec., 1916, he retired, and in 1917 was created Marshal of France, the first for many years. He was then employed on one or two ceremonial missions. Joffre died Jan. 3, 1931.

Johannesburg City of Transvaal, 957 m. from Capetown, and is an important railway junction. Its port is Lourenço Marques. It was founded in 1888 when gold was discovered and is now the largest and most populous city in the land, the municipal area covering 81 sq. m. A university was founded in 1921, but was burnt down in 1929. Johannesburg has a racecourse and facilities for outdoor sports of almost every kind. *The Star* and *The Rand Daily Mail* are published here. The industries are mainly connected with the gold mines, but there is a valuable trade in livestock. It has a broadcasting station (49.2 M., 5 kW). Pop. (1931, European) 203,273.

John Saint and apostle. A son of Zebedee and Salome, he and his brother James were Galilean fishermen whom Jesus called to be his disciples. James and John were called Boanerges, "sons of thunder," apparently because of their impulsive indignation. They formed with Peter the innermost circle of Christ's followers. John attended the trial of Christ before the Sanhedrim and Pilate, and stood by the Cross. He is commemorated on Dec. 27, and is distinguished as S. John the Evangelist, or S. John the Divine. According to tradition he lived his later life at Ephesus and died at a great age, the last survivor of the apostles. He is regarded as the author of the fourth gospel and of the book of Revelation.

John the Baptist Christian saint, a son of Zacharias, he was, through his mother, Elizabeth, a cousin of the Virgin Mary. The last of the prophets, he led an ascetic life in the wilderness beyond Jordan, preaching the coming of the Messiah and practising baptism. He baptised Jesus Christ, recognising and acknowledging His identity. He was imprisoned and executed by Herod about A.D. 28. His day is June 24, and many churches are dedicated to him.

John Name of twenty-three popes. John VIII., pope 872-82, combated the Saracens, sought the conversion of the Slavs and crowned as Emperor first, Charles the Bald, and then Charles the Fat. He died in France, Dec. 16, 882. John XII., pope 955-61, crowned Otto I. Emperor in 952. He was deposed in 963 and died May 14, 964. John XXII., pope 1316-34, made Avignon his residence. He died Dec. 4, 1334. John XXIII., an anti-pope during the Great Schism, was elected by the Pisans, 1410. He convoked, in 1414, the council of Constance which deposed him. He died Dec. 22, 1419. The others were of minor importance.

John King of Bohemia. Born Aug. 10, 1296, the son of the Emperor Henry VII, he became King of Bohemia in 1311. He neglected that country, however, and spent most of his time in France and elsewhere.

abroad. He earned a high reputation as a warrior, assisting at various times the Teutonic Knights, the Emperor Louis, and Charles IV and Philip VI, kings of France. Though becoming blind about 1340, he continued his adventurous life, and was killed at Crécy, Aug. 26 1346. His son became emperor as Charles IV.

John King of England. He was the youngest of the five sons of Henry II, and was born at Oxford, Dec. 24, 1167. In 1177 he was made lord of Ireland, and in 1185 he visited that country. Like his brothers, he revolted against his father, and when his brother Richard became king in 1189 he acted again in a disloyal fashion. In 1199 he began to reign, being crowned May 26 of that year and he reigned for 17 years, a disastrous period. A war with France ended in the loss of Normandy, a quarrel with the pope brought on an interdict and a humiliating surrender, the wrath of the barons forced him to sign Magna Charta in 1215. John renewed the war against the barons, who asked Louis of France to come to their aid. In the midst of the struggle the king died at Newark, Oct. 19, 1216.

John's first wife was Isabella, heiress of the Earl of Gloucester. He divorced her in 1200 and married a French princess, also named Isabella. He left two sons, Henry III and Richard, Earl of Cornwall.

John Name of two kings of France. John I, the posthumous son of Louis X, was seven days old when he died, Nov. 22, 1316.

John II, surnamed the Good, was born in 1319, and succeeded his father, Philip VI, in 1350. He carried on a war with England and was captured by the Black Prince at Poitiers in 1356. He was imprisoned in London from 1356 to 1360, when he was released. His son broke his parole as a hostage in 1363, so the king returned to London, and died there, April 8, 1364.

John King of Poland. A member of the famous family of Sobieski, he was born, June 8, 1624, his father being castellan of Cracow. He won renown as a soldier and was soon in command of the Polish army. In 1674 he made himself king and reigned for over 20 years. Much of his time was occupied in fighting the Turks and in 1676 he regained from them a large part of the Ukraine. His greatest exploit was in 1683 when he led his army to Vienna and won a great victory over the Turks, who were besieging that city. John died June 17, 1696.

John Augustus Edwin. English painter. Born in 1878, he studied art at the Slade School, London, and soon exhibited at the Royal Academy. His figure paintings, such as "Going Down to the Sea" and "The Orange Jacket," attracted much attention, but he is perhaps best known for his portraits. In 1921 John was elected A.R.A. and in 1928 R.A.

John Sir William Goscombe. British sculptor. Born in Cardiff in 1860, he went to London to study art. After a period in Paris, he began to work as a sculptor. His pieces include statues of King Edward VII at Cape-town, the Duke of Devonshire at Eastbourne, Viscount Wolsley in London and the Earl of Minto in Calcutta. He designed memorials to the Marquess of Salisbury in Westminster Abbey and Sir Arthur Sullivan in St. Paul's Cathedral, as well as some war memorials and the regalia and medal used at the investiture of the Prince of Wales at Caernarvon in 1911. He was knighted in that year, having been A.R.A. since 1898 and R.A. since 1909.

John Epistles of. Three letters in the New Testament. They are a homily of incomparable value, setting forth the nature of fellowship with God. The letters are usually regarded as written by St. John the Evangelist, but the second and third are contested by certain scholars who think that he wrote the first only.

John Gospel of. Fourth book of the New Testament. Assuming his readers are familiar with the synoptic gospels, the writer designs to prove that Jesus is the Christ, the son of God. No parable in the other gospels is repeated, only one miracle is common to all four gospels and four miracles mentioned are unrecorded elsewhere. The Judaean rather than the Galilean ministry is developed, and one third of the book comprises the sayings and doings of Christ's last 24 hours. The authorship of the book is attributed to St. John, but some modern scholars think it was written after his death. They date it about 140, but differ as to whether the author was one of John's disciples or a stranger.

John Name of six East Roman emperors. John Cantacuzene, the most notable, was born about 1292 and, rebelling against the infant emperor, John Palaeologus, had himself proclaimed emperor in 1341. Becoming increasingly unpopular, he abdicated and retired to a monastery in 1354. He died in 1383. He was instrumental in giving the Turks, whose aid he invoked, a foothold in Europe.

John Spanish soldier. Usually known as Don John of Austria, he was born in Ratisbon, Feb. 24, 1547, the natural son of Charles V by Barbara Blomberg. He commanded the fleet which smashed the Turks at Lepanto in 1571, and in 1576 became Governor-General of the Netherlands. He died Oct. 1, 1578.

John Bull Personification of England, or of the English. He is usually depicted as a stout, upright man, in a low-crowned hat, tall coat, breeches and riding boots. The name was originated by John Arbuthnot in a series of pamphlets, *Law is a Bottomless Pit* or *the History of John Bull*, 1712. The weekly paper, *John Bull*, was established in 1906.

John of Gaunt See LANCASTER, DUKE OF.

John o' Groat's House Spot on the north coast of Caithness, Scotland. Figuratively, but not actually, the most northerly point of Great Britain, it is $1\frac{1}{4}$ m. West of Duncansby Head, and is the site upon which a Dutchman, Groot, is said, early in the 16th century, to have built a house with eight doors. The reason of the doors was that there could be no question of precedence among the eight members of the family, each had his own door.

Johnson Andrew. American president. Born at Raleigh, North Carolina, Dec. 29, 1808, he first became prominent in Tennessee where he took part in politics and was elected to the legislature. In 1843 he became a member of Congress, and from 1853-57 he was governor of Tennessee. In 1864 he was elected vice-president and, on Lincoln's murder in the next year, he became automatically president. He followed the same policy as his predecessor, endeavouring by conciliation and concession to unite the nation together again. Serious troubles, however, arose with some of his colleagues, and he was

impeached, but was acquitted. In 1875 he was elected a senator, but died on July 31 of the same year.

Johnson Jack Negro boxer Born at Galveston, U.S.A., in 1878, he first became known in 1907 by beating Robert Fitzsimmons in two rounds at Philadelphia. He became the world's heavyweight champion in 1908, by beating Tommy Burns, and in 1910 won a celebrated battle at Reno over James J. Jeffries. In 1915 he lost the championship to Jess Willard. He published *My Combats* in 1914.

Johnson Samuel English lexicographer Born at Lichfield, Sept. 18, 1709, he was the son of a bookseller. He went to the grammar school in the city and then to Pembroke College, Oxford and acquired a great fund of miscellaneous learning due rather to a powerful memory than to sustained study. In 1721 he returned home from Oxford and assisted his father for a time, but the business was a poor one and he became a schoolmaster at Market Bosworth. In 1735 he married a widow Elizabeth Porter and opened a school at Edin. but this was a failure.

In 1737, having already done a little writing, Johnson went to London with his pupil David Garrick, and began to earn a scanty living by writing for the booksellers. He reported, or rather compiled, speeches in Parliament for *The Gentleman's Magazine* and wrote a poem called *London*. In 1747, having secured financial support he began to work on his *Dictionary*, which appeared in 1755. He earned a little money too, during these years by a poem *The Vanity of Human Wishes*, and by contributing essays to *The Rambler*. In 1759 to pay for his mother's funeral he wrote a novel *Rasselas*. In 1752 he lost his wife, whom he dearly loved and more than once he was in prison for debt.

In 1762 Johnson was granted a pension of £300 a year by the state and thenceforward in easier circumstances he wrote little but talked much. His writings during these 22 years were almost confined to *The Lives of the Poets* and *The Journey to the Hebrides*. His time was passed in London except for an occasional visit to Oxford or elsewhere and one to France and his favourite haunts were the Club, which he founded in 1764 and the house of Henry Thrale at Streatham which he frequently visited. In argument he generally disconcerted his opponents by his remarks, which were the incisive expressions of a mind of unusual power backed by a store of unusual information. He died Dec. 13, 1784 and was buried in Westminster Abbey.

A typical Englishman in many ways Johnson stands out for his hatred of Scotsmen and his love of London, his delight in talk, his strong Tory opinions, and his religious faith. His friends included Burke, Goldsmith, Itley, Gold and Windham but the most devoted of all was James Boswell whose *Life of Johnson* is considered the world's greatest biography. Without the ringing Indian cry of Boswell who transcribed every word spoken by his idol Johnson might have been forgotten.

There are many memorials to Johnson and every year his memory is honoured by a meeting of the Johnson Society at Lichfield. The house in Gough Square, London E.C., in which he lived is now a museum.

Johnson Sir Harry Hamilton British administrator, explorer and scientist. He was born June 12, 1858, and

studied art for four years at the Royal Academy. In 1889 he founded the British South African Protectorate. He served as commander-in-chief for the Uganda Protectorate and leader of many scientific expeditions into Central Africa. His published works include valuable books on travel and also a *History of the British Empire in Africa*. In his retirement he wrote several novels. He died July 31, 1927.

Johnston Thomas Scottish politician Born at Kirkintilloch in 1882 he was educated there and at the University of Glasgow. He became a journalist and founded the Socialist organ *Forward* being also a prominent member of the Town Council of Kirkintilloch and a leader of the Independent Labour Party. In 1922 he was elected Labour M.P. for West Strathclyde. In 1924 for Dundee and in 1929 for West Strathclyde again. In 1929 he was made an Under Secretary for Scotland and in 1931 he became Lord Privy Seal, his special business being to deal with unemployment. He resigned office in Aug. 1931, and lost his seat at the general election in October 1931.

Johnstone Burgh of Renfrewshire. It stands on the Black Cart in a coal mining district 19 m. west of Glasgow and 3 m. south west of Paisley on the L.M.S. Rly. It has cotton and paper mills, engineering works and foundries. Pop. (1931) 12,837.

Johore Sultanate and British protectorate of the Malay Peninsula. It lies at the south extremity and is connected by road with the Island of Singapore by means of a causeway opened in 1923-24. The sultan is assisted by an executive and a legislative council. A British adviser has, by treaty made in 1914, the right to advise him. Rubber is extensively grown and is the chief export. Johore is the chief town. The area is 7678 sq. m. Pop. (1931) 505,399.

Joinery Art of joining and making of fittings of wood for houses, etc. It is associated with carpentry. The commoner woods used by the joiner comprise deal, pine, oak, mahogany and teak and the work covers such things as the making and fitting of wood flooring, partitions, doors, window frames and casements, staircases, mouldings, and the special fittings of churches, schools and offices.

Joint In woodwork a piece of wood used to join together two other and usually larger pieces. Joints are of several kinds and bear distinctive names such as butt joint, dowel joint, mortise joint, tenon joint and housing joint.

Joints are used for one of two reasons. Either the size of the material is insufficient for the purpose or it is desirable to arrange the various components to the best advantage from the point of view of the direction of the grain of the wood and the relative proportions of the various pieces. In the former case the joint is often effected by simply gluing both pieces of the material and clamping them together before the glue sets. The second case comprises all the structural joints such as the tenon and the mortise in which one part is shaped to fit into a hole made in the other part.

Joint Term in anatomy applied to the articulations between various bones. Joints may be classified as movable or immovable, the latter type being represented by the sutures between the bones of the skull. Of the movable joints the articulations

between the vertebrae give only a very limited movement. The ball and socket joints of the hips and shoulder allow of a wide play of movement, and the hinge joint of the elbow moves in one plane only. A rotating joint is seen in the head of the radius, and a pivotal articulation in the attachment of the skull to the backbone.

Jointure Provision made by a husband for his wife in the event of his predecease. Strictly, it is an estate settled in joint tenancy on a husband and wife for their lives, and it thus provides for the wife on her husband's death. A widow cannot claim both jointure and dower.

Joinville Jean De French historian. Born in 1224, he was the head of a noble family and was the lord, or sire, of lands in Champagne. In 1248-54 he accompanied Louis IX (St Louis) on crusade. He is remembered for his *Credo*, or confession of faith, 1250, and his *Life of St Louis*, which makes him one of the three great chroniclers of Mediaeval France. The biography, which represents the king as a great Christian hero, has been translated into English. He died July 11, 1319.

Jókai Maurice Hungarian writer. Born Feb. 19, 1825, he was educated at Presburg. He adopted the career of a journalist, and in 1863 became editor of a daily paper in Budapest. He mixed, too, in political life, and from 1861 to 1897 was a member of the lower house of the Hungarian legislature. In 1897 he became a member of the upper house. Jókai's claim to fame rests on his novels and stories, many of which have been translated into English. The titles of some of these are, *Midst the Wild Carpathians*, *The Turks in Hungary*, *The New Landlord*, *Eyes Like the Sea*, and *Black Diamonds*. He died in Budapest, May 5, 1904.

Joliette Town of Quebec, Canada. It stands on the Assomption river, 36 m north of Montreal on the C.P. and C.N. Ry's. It is an agricultural and lumbering centre, and has quarries and manufactures of flour and paper. Pop. 9100.

Jolly Boat Small boat belonging to a ship. It is manned usually by three or four sailors and is used for odd work. Jolly is a slang naval term applied to a marine.

Jonah Hebrew prophet. He announced to Jeroboam II forthcoming victories over the Aramaeans (2 Kings xiv). A book of the Old Testament bearing his name professes to narrate an episode in his life. The unknown writer sought to show that divine care was not limited to the chosen race. The incident of the whale, suggested by Persian mythology, symbolised Israel's temporary absorption by Assyria.

Jonathan Name of ten persons mentioned in the Old Testament. The most important was Saul's eldest son, who aided his father in the Michmash campaign to throw off Philistine oppression, and shared his fate at Gilboa. His friendship with David inspired an incomparable elegy from the latter (2 Sam. i.).

Jones Ernest Charles English writer and Chartist. He was born in Berlin, Jan. 26, 1819, being the son of a soldier who was there in attendance on an English prince. In 1841 he wrote a story, *The Wood Spirit*, and in 1844 he became a barrister. He then joined the Chartists and, having refused a

bequest of £2000 a year to leave it, became one of the leaders of the movement. In consequence of his share in the events of 1848 he was sent to prison for two years. He tried several times to enter Parliament, but in vain. He died Jan. 26, 1869. Jones wrote *The Labourer* and other works of a social character as well as an epic, written in prison, *The Revolt of Hindostan*.

Jones Henry Arthur English dramatist. Born at Grandborough, Buckinghamshire, Sept. 28, 1851, his father was a farmer. He was educated at a local grammar school and began life as a clerk in London. He then became a commercial traveller and so remained until his first plays had been produced successfully. These were *A Clerical Error*, produced in London in 1879, and *The Silver King*, 1882. During the next 50 years, Jones wrote a regular succession of dramas. These include *Saints and Sinners*, *The Case of Rebellious Susan*, *The Liars*, *Mrs Dane's Defence* and *The Parafist*. He also wrote *Foundations of a National Drama* and other books on the subject. He died Jan. 7, 1929, and afterwards his *Life*, written by his daughter, appeared.

Jones Inigo English architect. Born in London on July 15, 1573, he started life as a joiner. He studied architecture and came under the patronage of the Earl of Pembroke, who enabled him to visit Italy and France. Jones was the first to introduce pure Renaissance architecture into England, adapting Italian ideas, especially those of Palladio, to English requirements. One of his innovations was the internal staircase. He designed the Banqueting Hall, Whitehall, and Greenwich Hospital. He died June 21, 1652.

Jones John Paul American sailor. Born in Kirkcudbrightshire, July 6, 1747, his name was John Paul, but later he added that of Jones to it. He went to sea when a boy and after some years settled in Virginia. In 1775, the colonies being at war with Great Britain, he was given command of a ship and for some years he made constant attacks on British shipping. He operated a good deal around the coasts of England and Scotland (which he knew) and was the most feared of all freebooters. His numerous exploits included a landing at Whitehaven, and the defeat of two English ships off Scarborough. After the end of the war Jones became an admiral in the Russian navy, which he led against the Turks. He died in Paris, July 18, 1792.

Jonquil Hardy perennial bulbous herb of various species of narcissus of the amaryllis order. The Spanish *Junquillo*—little rush—so called from its form and narrow half-cylindrical leaves, 8-12 in long, is primarily *N. jonquilla* which was introduced into Tudor England for its fragrance and colour.

Jonson Ben English dramatist and poet. Born in London, about 1573, he was educated at Westminster and probably Cambridge, and joined the English army in Flanders. Returning about 1592, he became an actor and hack dramatist for Henslowe, although his first comedy, *Every Man in his Humour*, 1598, was produced by a rival company. In 1603 he wrote a tragedy, *Sejanus*, and in 1604 produced the first of his 30 court masques about which he later quarrelled with Inigo Jones. He published his collected works in 1616 and was granted a pension by James I. He died in 1637 and was buried in Westminster Abbey. The greatest English dramatist after Shakespeare, his plays include *Cynthia's Revels*, *The Poetaster*, *Volpone*, and *Epicoene*.

JONSONG

Jonsong Peak of the Himalayas German mountaineers created a record by ascending to its summit (24,344 ft.) in June, 1930. This record was beaten when, in 1931, an English party climbed Mount Kamet (25,447 ft.).

Joppa Alternative name for Jaffa (q.v.), a seaport of Palestine, 53 miles north west of Jerusalem.

Jordan Irish actress Born in 1772, she first acted in Dublin, then moved to London in 1785, where she soon gained a great reputation. She acted at Drury Lane until 1809, and made her last appearance at Covent Garden in 1814. Though for 21 years the mistress of William IV, she died in obscurity at St. Cloud, France, July 3, 1816.

Jordan River of Palestine Rising on Mt. Hermon, three personnal streams unite to flow through Lake Huleh at sea level down to the Sea of Galilee. Thence the river falls precipitously for 200 m to the Dead Sea, 1300 ft. below the Mediterranean. Never navigable, it has been throughout history an effective barrier between Palestine and Transjordan. The Jews of old regarded the Jordan as a sacred river and it figures much in Christian imagery. After the Great War a scheme was put forward for using the waters of the river to generate electric power.

Jordanes Historian of the Goths. He dwelt in Moesia in the 6th century, A.D., and was a member of the German tribe of the Alani. He wrote two works, a history from the Creation to his own time, and a history of the Goths, 551.

Jordans Village of Buckinghamshire. It is about 2 m from Chalfont St. Giles. Here the Society of Friends have their most famous meeting house, and there are other buildings used by them. Adjoining is the burial ground which contains the tomb of William Penn.

Joseph Son of Jacob and Rachel. Born at Haran, his story, told in Genesis xxxvii-xl, recounts the paternal favoritism and fraternal jealousy which led to his being carried captive to Egypt, where his skill in interpreting dreams made him vizier to the king. He contrived the settlement of his father and brethren in Goshen. His two sons, Ephraim and Manasseh, gave their names to two of the twelve tribes on the return some centuries later, to Canaan.

Joseph Husband of the Virgin Mary and the foster father of Jesus. The gospels recount his betrothal to Mary and his life as a carpenter at Nazareth. He apparently died before Christ's public ministry began. Our Lord and his brothers are usually regarded as half brothers. Joseph's sons by a former wife. He is commemorated on Mar 19.

Joseph of Arimathea Rich and influential Jew mentioned in the four gospels. A secret supporter of Christ, he went to Pilate after the crucifixion and asked for the body of Jesus, with which he prepared for burial and laid in a tomb. His name occurs in medieval legends concerning the Holy Grail.

Joseph Two Roman emperors, and German kings. Joseph I, the son of Leopold I, became emperor in 1705. He was cruelly opposed to Louis XIV in the War of the Spanish Succession. He died April 17, 1711. Joseph II., the eldest son of Maria Theresa, was born Mar 13, 1741, and became emperor in

720

1765, on the death of his father, Francis I. his mother, however, remained the actual ruler until her death in 1780. Joseph then put into effect various reforms, but his home and foreign rule were alike unsuccessful. He was concerned in the partition of Poland in 1772, and fought against Turkey in 1788. He died Feb 20, 1790, being succeeded by his brother, Leopold II.

Josephine Empress of the French. A daughter of Joseph Tascher de la Pagerie, she was born in Martinique, June 23, 1763. In 1777 she married the Vicomte de Beauharnais and lived in France. In 1794 her husband was put to death, leaving a son, Eugene, and a daughter, Hortense, later Queen of Holland. In 1796 Josephine married Napoleon Bonaparte, and in 1804 was crowned Empress. In 1810 she was divorced. She died May 24, 1814.

Josephus Flavius Jewish historian. Born in 37 B.C. at Jerusalem, of a family of priests, he joined in the rising of the Jews in A.D. 60 and was taken prisoner, but was afterwards released by the Romans. He was in Jerusalem when it was taken, but afterwards lived in Rome where he was befriended by three emperors. He died about 100.

Josephus lives because of his hooks on the history of the Jews, works of very high value. As translated, their titles are *The Jewish War* and *Antiquities of the Jews*. He also wrote an autobiography and a defence of Judaism against Apion. They have been translated into English by G. W. Whiston, 1737.

Joshua Successor of Moses as leader of the Israelites into Canaan. He was a son of Nun and of the tribe of Ephraim. He was one of those sent to spy out the land of Canaan, and was closely associated with Moses during the wanderings in the wilderness. He took Jericho, defeated many of the native kings and divided the land among the tribes. He died at Mt. Ephraim at the age of 110.

The Book of Joshua, the sixth book of the Old Testament, describes the exploits of Joshua. The first 12 chapters tell how Canaan was conquered. The next nine describe the division of the land among the tribes and the last three tell of Joshua's death and burial.

Josiah King of Judah. He was a son of Amon, whom he succeeded when eight years old. He discovered in the temple a law book, apparently part of Deuteronomy, or an allied work. This led him to make drastic reforms in religious matters. When the Egyptian King Necho crossed Palestine on his Assyrian campaign Josiah opposed him and was killed at Megiddo. He reigned from 639 to 608 B.C.

Joss The popular name for a Chinese idol. The temple where it is kept is called a joss house. A joss stick is a piece of fragrant tinder mixed with clay to be burned as incense.

Joubert Petrus Jacobus Boer soldier. Born in Cape Colony Jan 20, 1834, he became prominent during the Boer War of 1880-81, when as commander-in-chief he defeated the British at Laing's Nek and Majuba Hill. When war broke out in 1899 Joubert was named commander-in-chief, but on March 27, 1900 he died at Pretoria.

Joule James Prescott English physicist. Born at Salford Dec 21, 1818, he became a student of chemistry. Taking up the subjects of electricity and magnetism, he developed theories that attracted attention.

JOULE

His great work was to investigate the problems of heat and energy, and in this field his discoveries were of immense importance. He died Oct. 11, 1889.

The joule, named after him, is a unit of electrical work or energy, practically equivalent to the work done, or heat generated, in maintaining for one second a current of one ampere against a resistance of one ohm, equal to 10,000,000 ergs.

Journal Daily record. The word is variously employed, for a daily newspaper, e.g., *Le Journal*, a French paper founded in 1892, for a book used in double entry book-keeping, a record of the proceedings of a society, or public body, and for a personal diary. In engineering, it is that part of a revolving shaft in contact with the bearings.

Journalism Profession or trade of writing and preparing material for newspapers and other periodicals. Something of the kind has existed in most civilised countries since the invention of printing, but modern journalism only dates from the 19th century, when the mass of the people learned to read, although Defoe has been called the first journalist. It is now an important and influential profession.

In Great Britain societies exist to protect the interests of the journalist. They are the Institute of Journalists, which was established in 1884, and the National Union of Journalists. There is also a Society of Women Journalists in London. The universities of London and Bristol provide courses in journalism and there is a School of Journalism at Columbia University, New York. The Press Club is a journalistic centre in London, and in 1931 steps were taken to form a London livery company for those connected with newspapers.

JOURNALISM AS A CAREER Journalism has been defined as "The writing and presentation of news, comment and opinion in newspapers or other periodical publications." It is the profession for those who can look at life and the events of the day, and write of them in such a manner as to interest, amuse, or instruct the public. It is a profession which should be entered with the eyes wide open, for the pitfalls are many, and the competition is intense.

The safest method of ensuring a steady income is to obtain a post on a newspaper or periodical, and here the openings for women are steadily increasing. Most papers require at least one woman on their permanent staff, some are staffed almost exclusively by women. A London paper, however, is averse to taking on its staff any one who has not been trained on a provincial paper, while many provincial papers recruit their staffs from boys and girls who have just left school, and train them on the paper, beginning with office work. Every paper, however, is constantly on the look-out for fresh talent.

It is nearly always necessary to have short-hand in the early stages of journalism. Practical experience provides the best, and indeed the only adequate training for a successful career in journalism.

The staff journalist on a London daily usually receives a salary something in the region of seven to ten guineas a week. The editorial staff is usually higher paid (nine guineas per week is the minimum except on the financial and sporting papers and agencies) and leader writers and editors receive anything upwards from £1500 a year. The payment on a pro-

vincial paper usually begins at three guineas a week (editorial minimum, £4 7s 6d), and rises to seven.

Free-Lance Journalism is precarious and for the people who handle "news" and "features" the opportunities are strictly limited. The outlook is more favourable in fiction writing (which cannot legitimately be described as journalism) and in certain specialised branches, but the competition is severe from the large numbers of people to whom such writing is a spare time occupation. In this kind of work a woman can compete on equal terms with her men colleagues, while she has the monopoly of certain subjects. Payment varies from 15s per thousand words to a very much higher figure, according to the value of the article and the reputation of the writer.

It is advisable for the practising journalist to become a member of either The National Union of Journalists (7 John Street, London, W C 1) or The Institute of Journalists (2 and 4 Tudor Street, London, E C 4).

Jove Alternative name for Juppiter (J v), the chief god of Roman mythology.

Jovian Roman emperor. He was born in Moesia, about 331, and was captain of the imperial bodyguard during the Persian campaign. On Julian's death he was proclaimed emperor, June, 363, when he signed a humiliating peace with Persia. He died in Bithynia, Feb., 364.

Jowett Benjamin. English scholar. Born April 15, 1817, he was educated at St Paul's School and Balliol College, Oxford, of which in 1838 he was elected fellow. He was ordained and worked at Balliol as a tutor for 28 years. In 1855 he was appointed Professor of Greek, and in 1870 was chosen Master of Balliol. He retained that position until his death, Oct. 1, 1893.

Jowitt Sir William Allen. English lawyer. Born in 1885, the son of a clergyman, he was educated at Marlborough and New College, Oxford. In 1909 he became a barrister and in 1922 he was elected Liberal M P for the Hartlepool. He lost his seat in 1924, but in 1929 he was returned to Parliament by Preston. He then joined the Labour party, was made Attorney-General and was knighted. He continued in the same office when the national government was formed in 1931, but failed to secure a seat in the House of Commons, and returned to his practice at the Bar.

Joyce James. Irish writer. Born in Dublin, Feb. 2, 1882, he was educated at Clongowes and graduated at the Royal University. He wrote some verses, a play and a volume of short stories *The Dubliners*, before he became widely known as the author of the extraordinary novel *Ulysses* which, owing to its nature, was published abroad in Paris, not in England.

Juan Fernandez Group of islands in the S Pacific, some 400 m. from Valparaiso. They belong to Chile. Of the three volcanic islands, only the largest, Mas-a-tierra, is inhabited. It was discovered about 1565 by Juan Fernandez, and was inhabited 1704-09, by Alexander Selkirk, which gave Defoe the subject for Robinson Crusoe. It was occupied by Spaniards in 1750, and later was a Chilean penal station until 1913. A wireless station is on the island.

Jubaland Province of Italian Somaliland. It lies south of the Juba River, and was a British possession, as part of Kenya, until ceded to Italy in 1925. The

country is largely unexplored and its climate tropical. Kismayu is the capital and chief port. Its area is 35 000 sq. m. Pop. 100,000.

The Jubba River rises in Abyssinia and, after a course of some 1000 m., empties into the Indian Ocean. It is navigable for small vessels for 400 m.

Jubilee Celebration of fifty years. The real jubilee is a Jewish festival commemorating the Exodus. Proclaimed by a *yobel*, or ram's horn, on the Day of Atonement every fiftieth year, slaves were freed, land left untilled, and certain alienated property restored (Lev. xxv). It lasted for a full year, but was rarely observed. Pope Boniface VIII. instituted a jubilee year in 1300.

Nowadays the 50th anniversary of any event is a jubilee, e.g., of Queen Victoria's reign. A 60th anniversary is called a diamond jubilee. The late King George V. celebrated his Silver Jubilee (25 years' reign) in 1935.

The Book of Jubilee, or Little Genesis was an apocryphal work of the 2nd century B.C. paraphrasing in 49 year periods the world's history from the creation to the lawgiving on Sinai.

Judah Fourth son of Jacob and Leah. Born at Haran, he superseded his elder brothers and the most powerful of Israel's twelve tribes bore his name. After the death of Solomon Judah was the name of one of the two kingdoms into which Palestine was divided.

Judaism The system of Jewish religious beliefs, practices and rites. Judaism is based on an ethical monotheism. At an early date the Jews abandoned polytheism for a belief in the unity and spirituality of God, linking together morality and religion. During the post-exilic period Judaism developed into that system of rigid obedience to the Law and priestly sacrificial worship, which existed in the days of Christ. The roots of Christianity are fixed deep in Judaism, and Paul, the greatest of Christian apostles, was a Hebrew of the Hebrews, who never lost his sense of the greatness of his nation's spiritual heritage.

Judas Name of several biblical persons. They include (1) A disciple of Christ, 'not Iscariot' perhaps Lebbacius or Thaddaeus and son or brother of James (Luko vi). (2) The Galilean who led a revolt (Acts v). (3) Judas Maccabaeus, Mattathias' oldest son, who gained for the Jews religious but not political independence. He died in 161 B.C. (1 Mace. iii. ix).

Judas Iscariot One of Christ's twelve disciples who afterwards betrayed him. A son of Simon of Kerioth apparently Hazer, he was the only apostle who was not a Galilean. He acted as purse-bearer to the group. The account of his remorse and suicide in Matthew xxvii differs from the one in Acts i.

Judas Tree Small tree of the leguminous order (*Cercis siliquastrum*). It is a native of the Mediterranean region. Growing irregularly, its branches produce abundantly fascicles of rose-purple pealike flowers rarely white before the smooth kidney-shaped leaves fully appear. The flowers impart an acid flavour to salads. Medicinal properties ascent Judas Iscariot as suspected from its branches.

Jude Epistle of Book of the New Testament. Its superscription attributes it to a brother of James, commonly identified with our Lord's brother. Some think, however,

that it was written at a later date by another writer also called Jude. It borrows from the Apocrypha, and most of it is practically contained in the second epistle of Peter. It consists of one chapter denouncing false teaching.

Judea District in the south of Palestine and west of the Jordan. Its boundaries towards Samaria and Idumea were ill defined and variable. In the New Testament the word is used loosely for all western Palestine.

Judge High legal official who hears cases and tries criminals. Every judicial system has its judges, who are invariably lawyers of considerable experience. Each is attached to a court, and together they form the judiciary under a chief judge.

In England as elsewhere judges are of several grades. The highest are the Lord Chancellor and the law lords who sit in the House of Lords. Then come the lords justices who form the court of appeal, and then the judges of the high court, who are knighted on appointment and receive salaries of £1000 a year. They must be barristers of at least 10 years' standing. The judges of the court of appeal are recruited from the judges of the high court and receive a somewhat higher salary. All are entitled to pensions after serving for 15 years. They are appointed by the Lord Chancellor and are addressed as my lord. As representatives of the sovereign, they are received in state when they go on circuit, and it is high treason to attack them.

There are also in England county court judges one to each circuit. These receive salaries of £1800 a year and are addressed as your honour. They must be barristers of at least seven years' standing and are appointed by the Lord Chancellor.

In Scotland judges are attached to the two houses of the court of session. Those who sit in the inner house, or court of appeal, are given the style of lord. In both parts of Ireland the courts are staffed by judges on the English model.

The Judges of the Bible were the men who ruled over the Jews before Saul was chosen king. They existed for about 450 years among them were Gideon and Samson.

The Judge-Advocate-General is an official of the British army. He acts in an advisory capacity to the crown on matters of military law, especially those concerning courts martial, all of which he or one of his assistants attends. The office dates from the 17th century. He is assisted by a deputy judge advocate general. Similar duties are performed for the navy by the judge advocate of the fleet.

Judges Book of the Old Testament. With its companion Ruth it is found between the Joshua story of Israel's settlement in Canaan and the books of Samuel and Kings concerning the monarchy. It comprises (1) An introductory survey of the conquest. (2) A narrative showing how the people's transgression led to foreign oppression and how, to end this, warrior judges notably Gideon, Jephthah and Samson, arose at intervals. (3) Certain episodes in the history of Israel and stories about various judges and other personages. Its authorship is unknown, but it was probably written in the 7th century B.C.

Judgment In law a decision of a court in civil cases. It is delivered by the presiding judge and is carried out by officers of the court. In the House of Lords

and the judicial committee of the privy council each judge reads his own judgment, the decision being that of the majority

A judgment summons is a summons taken out against one who will not pay a bill. The creditor must prove that the debtor can pay, and the judge will then make an order for the payment of a certain sum, usually by instalments. If this is not paid the creditors can apply for the debtor to be sent to prison. Technically he is sent to prison for contempt of court, not for failure to pay a debt.

Judgment The Last. The idea that God will come to the world for judgment is found in the Old Testament prophets. In the New Testament the same belief is represented in some places in dramatic fashion by means of apocalyptic imagery. Such passages are generally regarded as having symbolical value in the proclamation of the spiritual truth, that men's ultimate fate will be determined by their relation to Jesus Christ.

Judicial Committee Committee of the privy council that acts as the supreme court of appeal from the courts of the British Empire outside Great Britain and in ecclesiastical cases within Great Britain. Its members are the Lord Chancellor, the Lord Chief Justice, former Lord Chancellors and other peers who have held high judicial office and are members of the privy council, as well as any persons who are, or have been, judges of the supreme courts in any of the British Dominions.

The committee was set up in 1833, but its present constitution dates from 1928. The judges need not be unanimous in their decisions, a majority is sufficient. They sit without robes and their judgments take the form of recommendations to the sovereign. The committee's authority is not recognised by the Irish Free State.

Judicial Separation Term used in English law for a separation of husband and wife ordered by the High Court of Justice. It can be granted for adultery, cruelty or desertion for not less than two years. It is more serious than an ordinary separation order which can be made by a magistrate.

Judith Heroine of the book of Judith. This fictional work, which is in the Apocrypha, purports to narrate an episode in Jewish history recalling that of Jael. Judith, a wealthy widow, visited the besieging Assyrian camp at Bethulia and feasted with the general Holofernes. She then made him drunk and treacherously beheaded him. The theme inspired a vigorous early English poem of the 15th-16th century. This is preserved in the MS which also contains Beowulf.

Juggernaut Name, meaning "Lord of the World," of the Hindu god, Vishnu, as worshipped at Puri in Orissa. The idol is kept in a temple in that city, but on certain festivals it is taken out and dragged in a huge car through the streets. The ceremony takes several days. Fanatics sometimes throw themselves under the wheels of the car and are killed, so giving rise to the sinister associations of the word.

Jugurtha King of Numidia. His uncle Micipsa bequeathed the kingdom to his two sons and to Jugurtha who murdered both and became sole monarch. Defying Rome and resorting largely to bribery, he was taken by Marius, exhibited in his

Roman triumph, and finally killed in 104 B.C. Sallust wrote his life.

Jujube Name of a small tree, *Zizyphus vulgaris*, a native of China, but now grown in Mediterranean countries. The plant bears leathery leaves with thorny stipules and small greenish flowers followed by red or black sub-acid fleshy fruits. These were used formerly for flavouring the lozenges known as jujubes.

Ju-Jutsu or Jiu-jitsu Japanese method of offence and defence without weapons in personal encounter. It was at first a secret art practised by the nobility, but later it developed into a national system of physical culture for both sexes, especially in the army, navy and police.

Early in the 20th century schools arose in Great Britain, Europe and the United States, usually under Japanese exponents, and demonstrations of jiu-jitsu were given in music halls and other public places. The system was studied by the London police and other forces. Using anatomical knowledge the defendant seeks, by certain locks, strangle holds and twists, to divert the adversary's muscular strength to his undoing.

Julian Roman emperor. Born in Constantinople in 331, he was the nephew of Constantine the Great and was named Flavius Claudius Julianus. He studied in Athens and later abandoned Christianity, whence his name of Julian the Apostate. In 355 his cousin, the Emperor Constantine, made him joint ruler, married him to his sister, Holena, and put him in charge of Gaul. There he won several victories and gained the high regard of his troops who, in 360, revolted and proclaimed him emperor. Owing to the death of Constantine in 361 he secured the throne without trouble, but he only reigned for two years. He tried to restore the pagan religion and deprived the Church of its special privileges, although he tolerated the Christians. In 363 he organised a campaign against the Persians. Having invaded their land he was mortally wounded and died June 26, 363.

Julian Calendar Calendar as revised and modified by Julius Caesar in 46 B.C. It was in use in Western Europe until A.D. 1582, having been revised further by Pope Gregory XIII in 1582. The Julian Year was of 365½ days with a leap year of 366 days every fourth year, and the intervening three years of 365 days.

Julienne Clear soup containing herbs and vegetables cut into long narrow shreds. It was named in the 18th century after Julien, a French caterer in Boston, U.S.A.

Julius Name of three popes. Julius I was Pope from 337 to 352. Julius II. was born in Italy, Dec. 5, 1443, of the family of Della Rovere. His uncle, Sixtus IV., made him a cardinal in 1471 and he lived the life of a wealthy Italian prince, taking part in warfare and encouraging literature and art. In 1503 he succeeded Pius II. as Pope and reigned for 10 years. As a temporal ruler he was successful. He won back much of the land taken from the Church and his greatest exploits were the formation of leagues that humiliated Venice and France. He died in Rome Feb. 20, 1513. The portrait of Julius by Raphael is one of the world's masterpieces. Julius III was Pope from 1550 to 1555.

Jullundur Town of India, also spelt Jalandhar. It is 47 m. from

Amritsar and was once the capital of a Rajput kingdom. It is now the chief town of a district in which wheat is grown. Pop 71,000.

Jumna River of India. It rises in the Himalayas, and, fed from mountain snows and joined by numerous tributaries, flows through the United Provinces to join the Ganges at Allahabad. Delhi, Agra and Muttra are on its banks, its length is 850 m.

Jumping Branch of athletics. It is a feature at almost all athletic contests, including the Olympic Games. In modern times the long and high jumps are the chief forms. C. Namih (Japan) created a record in the former with 26 ft. 2½ in in 1931. W. Marty (USA) in a high jump, reached 6 ft. 9½ in in 1934. There is also a pole jump, but this is less popular.

Jumping Hare South African rodent. Called by the Beers the springhaas (*Pedetes capensis*), it averages 2 ft. in length with rather longer tail, and is a burrowing night feeder. It owes its name to its ability to jump, sometimes it covers as much as 30 ft. at a single bound.

Jumping Mouse Genus of small rodent found in North America and China. It lives in forests, feeds upon seeds and leaves, and makes its home in clefts in the rocks. About 3 in long, its jumping powers are remarkable, sometimes reaching 10 ft. It belongs to the genus *Zapus*.

Jumping Shrew Family of African insectivorous mammals also called elephant shrews. Allied to Asiatic tree shrews, they are mainly nocturnal. Their long hind legs make kangaroo-like leaps.

Juneau Capital of Alaska. In the S.E. of the country, on Gastineau Channel, it was founded in 1880 as Harrisburg and superseded Sitka as the capital in 1906. The centre of a gold mining region, it is also a fishing, lumbering and trading centre. Pop. (1930) 4043.

Jung Karl Swiss psychologist. Born at Basle, July 26, 1875, he was one of Freud's leading pupils until 1911 and shares the latter's views as to the significance of unconscious mental conflict and repression. His conception of the unconscious is, however, wider and more vital than that of Freud, nor does he give to sex quite the same importance. Recent publications include *Contributions to Analytical Psychology* (1928) and (with Richard Wilhelm) *The Secret of the Golden Flower* (1930).

Jungfrau Mountain in the Bernese Oberland, Switzerland. It is on the border between Berno and Valais and near the town of Interlaken. It was first climbed in 1811 by the Meyer brothers. It is 13,670 ft. high and is a favourite peak for climbers.

Jungle Rank and tangled vegetation, large and small, sometimes almost impenetrable, or the more or less swampy region so covered. The Anglo-Indian word first denoting such regions as the terai beneath the lower Himalayas, nowadays means any marshy thicket growth in tropical lands. Australian mound birds and brush turkeys are called jungle fowl.

Juniper Genus of evergreen trees or bushes. They grow in the temperate and colder parts of the northern hemisphere and bear fruit like berries. The common juniper grows freely in Great Britain.

To do well it needs a moist, deep loam and a sunny position.

The fruit of the juniper is used to flavour gin and as a diuretic in medicine. The wood is hard and smells of turpentine.

Junius Letters of Seneca of political letters of unknown authorship. They appeared in *The Public Advertiser* between 1767 and 1772 over the name of Junius and were published as a book in the latter year. They were attacks on the ministers of the day, including the Dukes of Bedford and Grafton and even the king, George III. The printer H. S. Woodfall, was prosecuted for printing them, but was acquitted.

The letters aroused extraordinary interest and were written by one who knew a good deal about affairs of state, both within and without, and was able to express himself in an arresting and forcible way. The secret of the authorship has never been discovered, though Sir Philip Francis is regarded as their most probable writer.

Junk Type of sailing vessel used by the Chinese and Japanese. It has a high stern and forecastle, usually with three masts having square sails of matting.

The term junk is applied to old ropes and cordage on ships, used for making cakum and mats also for lumber and the salt meat formerly supplied to ships.

Junker Name used for the landowners in Prussia and North Germany generally. Many of them entered the army, and their influence, coupled with a good deal of arrogance, made them very influential before 1914. The merchant princes of Danzig were also called junkers, the name being perpetuated there in the building called the Junkerhof. The word means a young man.

Junket Dish consisting of sweetened milk thickened with rennet into a curd. It is sometimes flavoured with brandy or liqueur and sprinkled with grated nutmeg. Devonshire junkets are served with clotted cream. In olden days merry-making at a feast or picnic was called junketing.

Juno Chief Roman goddess. Worshipped by women at all life's crises, she was identified especially in literature, with the Greek Hera, as such becoming Jupiter's sister and wife, the mother of Mars and queen of heaven. As every Roman had his genius, so every woman had her Juno, at childbirth she became Juno Lucina.

Junta Spanish word for a council. In Spain juntas were formed to manage the various departments of state and there was a supreme junta of the Inquisition. In 1808 a junta was formed to organise resistance against the French. In England the word suggests corruption or at least inefficiency.

Jupiter Largest of the outer planets of the solar system. It has a diameter eleven times that of the earth, and has the form of an oblate spheroid, that is owing to the rapidity of its axial rotation, there is a flattening at the poles with a bulging outwards in the equatorial region. Its mean distance from the sun is 483 million miles, and it has a year equal to twelve of our years and a day of 9 hr. 56 min. Of its nine satellites four are about the size of the moon, and were the first celestial objects discovered with the telescope by Galileo.

Jupiter Chief deity of the Romans, also called Jove. He was the son of Saturn and Rhea and the husband and brother

of Jnno. As the chief of the gods and the god of thunder, rain and storm, he was given many auxiliary names, such as Pluvius and Tonans. He was also regarded as the god of justice and hospitality. He was specially revered in Rome itself where his worship was celebrated with great splendour in the Capitol and elsewhere. The equivalent of the Greek Zeus, he was regarded as armed with thunderbolts and attended by eagles.

Jura Island of the Hebrides. Part of the county of Argyllshire, it is separated from the mainland by the Sound of Jura, and has an area of 160 sq. m. A rugged and bleak island, it has hills, the Paps of Jura, rising to 2500 ft. Cattle and sheep are reared, and there are deer forests. Pop. 600. The Sound of Jura is 21 m. long.

Jura European mountain range. It separates the Rhine and Rhône valleys and forms part of the frontier between France and Switzerland. About 150 m. long and 40 m. broad, the mountains have an average height of about 2400 ft., with peaks of over 5000 ft. Jura is also the name of a department of France.

Jurassic One of the larger geological systems of rocks. It derives its name from the Jura Mountains and comes between the Triassic and Cretaceous systems. The succession of strata consists of an alternation of clays and limestones with sometimes beds of sand. The system is divided into four groups; the Lias at the base with lower, middle and upper Vollic above. It was the age of giant reptiles such as the Ichthyosaurs, plesiosaurs, etc., and of the earliest bird, Archaeopteryx.

Jurat Literally a person who is acting under an oath. It was, and to some extent is still, used for certain officials. Some of the members of the legislatures of the Channel Islands are known as jurats, and formerly the aldermen of the Cinque Ports were similarly designated.

Jurisprudence Science of law. It deals, not with any particular kind of law, or the law of any particular country, but with its general principles. A great deal has been written on the subject, which was clarified by John Austin in his *Lectures on Jurisprudence*. Later writers include Sir H. Maine, Sir P. Vinogradoff and Sir T. E. Holland in England, while much valuable work has been done by French, German and American writers such as Savigny and Story. At Oxford there is an honour school of jurisprudence and there are professors and lecturers on the subject at most of the universities. See LAW.

Jury In England a body of persons chosen to give a verdict in trials of importance, both civil and criminal. Trial by jury is a very old custom in England and something of the kind existed before the Norman Conquest, although the early juries were witnesses rather than judges; they declared the law, decided the sentence.

To-day there are three kinds of jury. The grand jury consists of any number from 12 to 23. It was formerly at assizes, to examine the charges against the various accused persons and decide if they were to go to trial. However, with certain exceptions (See GRAND JURY) grand juries were abolished in England in 1933.

The petty jury consists of 12 persons and these, having heard the case, are responsible

for the verdict. It must be unanimous; if it is not, the jury is discharged and a fresh one called. In Scotland a jury can return a verdict of non-proven, in England it must be either guilty or not guilty. In civil cases the jury decides on the amount of damages, if any. Each jury has a foreman who speaks for it. A special jury, which is comprised of persons with a fairly high property qualification, is a form of the ordinary jury. The third kind of jury is the coroner's jury. At one time there was a jury for every inquest, but since 1927 it has not been necessary to have one except in cases of death by violence.

Any man or woman, between the ages of 21 and 60, with certain exemptions, such as doctors and clergymen, is liable to be called to serve on a jury and must serve unless a good reason for absence is given. A list of persons eligible is prepared by the local authorities and from this the juries are picked as required. In important cases the greatest care is taken to keep the jury from outside influences, and anyone attempting to bribe a juror can be heavily punished. Jurors receive a small fee.

Justice of the Peace In Great Britain a man or woman appointed to keep the peace and often called magistrate. These justices are appointed by the Lord Chancellor for the various counties and such cities and boroughs as have a commission of the peace. Their duties include holding police courts, where minor offenders are tried, and forming in the counties the courts of quarter sessions. Oaths and depositions can also be taken before them and they can sign warrants.

The justices first appeared in the 13th century and since 1919 women have been eligible. Mayors and chairmen of urban district councils are justices by virtue of their office. All others are appointed for life.

Justiciar In mediæval England the chief officer of state. There were justiciars in England from the time of William I. to that of Henry III., their office originally corresponding with that of the modern Lord Chief Justice. The Scottish supreme court for criminal cases is known as the High Court of Justiciary.

Justiciary Term sometimes used for the judges and the courts of law as a whole. In Scotland the High Court of Justiciary is the official name for the supreme court of criminal jurisdiction.

Justification Word used in law and theology. In English law a person can plead justification to a charge of libel or slander, he can also do so if charged with violence. He must prove in the former case that the alleged libel or slander was true and in the latter case that his life, or that of his wife or child, was in danger. If charged with a criminal libel he must prove that the words were published for the public benefit.

In theology the phrase justification by faith is used. It means that the believer can by faith be freed from the consequences of his sin.

Justin Two Eastern Roman emperors, Justin, or Justinus I., was a soldier, probably a Goth, and was proclaimed emperor on the death of Anastasius in 518. He died in 527.

Justin II. succeeded his uncle, Justinian I. in 565. He became subject to recurrent fits of insanity after 574 and appointed Tiberius as joint ruler. In his reign war broke out with

Persia, and the barbarians overran North Italy and the Danubian and Carpathian provinces. He died Sept 26, 578.

Justinian Name of two Roman emperors. Justinian I was born May 11, 483, in Illyria. He was the son of a peasant, but also a nephew of the Emperor Justin I who educated him. In 527 he became emperor, and he reigned for nearly 40 years at Constantinople. His reign was marked by the victories of Belisarius and Narses over the Persians, Vandals and Ostrogoths, the result being that a great area in Europe, Africa and Asia lost under previous emperors was recovered. The emperor died Nov 14, 566. His wife was the Empress Theodora.

Justinian is chiefly remembered, however for the codification of Roman law which he organised. This consists, not only of the code, but of a *Digest* or *Pandect* and the *Institutes* or explanations of the law. Its influence on the development of the legal systems of Europe can hardly be exaggerated.

Justinian II was emperor from 685 to 695 and again from 705 to 711. During the latter reign 10 years he was an exile, the result of a revolution. In 711 there was another rising and he was beheaded.

Justin Martyr Christian writer. Born in Samaria about A.D. 100, of Greek parentage, he spent much time in the study of philosophy. He became a Christian and wrote an *Apologia* of the Christian faith which was followed by a second one. According to tradition he was martyred about 165.

Jute Cordage and textile fibre obtained from two annual species of the genus *Corchorus*. This grows to a height of 10 to 15 ft in parts of East Bengal, Orissa and Bihar. The fibre consists of the hard bast between the wood and cortex and is separated by steeping the stems in water for a time.

Jute fibre is weaker than flax or hemp, but having a silky lustre, fine texture and good spinning power, it is used for cheap tapestries and carpets, also bags, packing canvas, cordage, etc. The chief centres of the jute industry are Calcutta and Dundee, where there are large jute mills.

Jutes Teutonic tribe. Their country of origin is obscure, but it may have been Jutland. Invading England in the 5th century, they settled in Kent and the Isle of Wight and probably parts of Hampshire. They are mentioned by Bede.

Jutland Mainland province of Denmark. It forms a peninsula and has a very broken coastline. Aarhus is the largest town and the Guden the longest river. It is an agricultural area. The original home of the Jutes. It was made part of Denmark in the 10th century.

Jutland Battle of. Naval battle fought May 31 and June 1, 1916, between the British and the German fleets. On May 30 the British fleet beat the German fleet, forcing them out of their harbours, and on June 1 Sir D. Beatty with a force of six battle cruisers and four battleships in support, put out from Rosyth and Sir John Jellicoe with 28 battleships and three battle cruisers from Scapa Flow. Each was attacked by destroyers, submarines and other auxiliary craft.

On the afternoon of the 31st the British battle cruisers met the German battle cruisers both being in advance of the main fleets.

There was a sharp encounter in which two British battle cruisers, *Indefatigable* and *Queen Mary*, were destroyed. *Tiger* and *Lion* were badly damaged, as were the *Lutnow* and two other German ships. Towards 5 o'clock Beatty, hearing of the advance of the main German fleet, turned to draw the enemy on to the British fleet, which was steaming towards him. The main fleets came into touch about 6 o'clock, but the great ships were never seriously engaged and only one of them, *Marlborough*, was hit. There was fighting among the smaller ones in which the British suffered further losses. *Invincible*, a battle cruiser, was blown up and a cruiser squadron was badly damaged, *Defence* being sunk. Some of the German ships were battered, but they were for one reason or other, much more difficult to sink. At the approach of dark the British battle ships drew off and prepared to renew the attack on the following day. There were torpedo attacks during the night but when morning came it was found that the German fleet had escaped and was within the shelter of its minefields.

The result of the battle, however, was not satisfactory from the British point of view. With a much stronger force, 149 ships against 110, including 28 dreadnought battleships against 16, the losses of the British were heavier than those of the Germans.

Juvenal Roman satirist. Little is known of his life, except that he was born about A.D. 60, served in the army and visited Britain and Egypt. He died in 140.

Juvenal is noted for his *Satires*, perhaps the most famous of their kind. Sixteen of them are extant. They paint a vivid picture of the manners and morals of Rome in his time, but the picture of wickedness is now considered to be greatly exaggerated. They contain many familiar quotations, have been imitated by Johnson and Dryden and many English translations have been made.

Juvenile Courts Separate children's courts set up by the Children Act of 1908. They were established for the hearing of charges against juveniles, such courts to sit in a different room or at a different time from that of the ordinary courts. The probation system figures prominently and beneficently in the work of these courts also detention for varying periods in 'approved schools'.

Juvenile Offender In English law a young person, i.e., under the age of 16 who has been arrested on some charge. By the Children's Act, 1908, such young people must be dealt with in such a way that there is no risk of their contamination by contact with adult criminals. This is done by their trial in special courts for children and by their detention, if necessary, in Borstal institutions. No juvenile offender can be sentenced to penal servitude.

Juxon William. English prelate. Born at Chichester in 1582, he was educated at the Merchant Taylors' School, London and Oxford. He became a clergyman and in 1621 was made president of his college, St. John's. In 1627 he was chosen Dean of Worcester and in 1633 Bishop of London. From 1635 to 1641 he was Lord Treasurer and during the Civil War, he was one of the most trusted advisers of Charles I. He attended the king at his trial and was with him to the end on the scaffold. In 1660 he was made Archbishop of Canterbury and died June 4, 1663.

K AABA Sacred shrine in the great mosque at Mecca. It is an irregular masonry cube, 38 ft high, containing an oval stone, 6-7 in across, of suggested meteoric origin. Venerated in Arabia before the time of Mahomet, the prophet declared that the angel Gabriel gave it to Abraham.

Kabbalah See GABBALA

Kabul Capital of Afghanistan. It stands in a fertile district on the Kabul River, and has a caravan trade in carpets, silks and cottons. Here is an old fort and its modern buildings include several colleges. Once the capital of the ancient Mogul empire, Timur made it the Afghan capital in 1774. It was taken by British troops in 1831, and was again occupied by them in 1842 and 1879. Pop 70,000.

The Kabul River, which joins the Indus at Attock, is 270 m long.

Kaffir Name adopted by Dutch and British settlers for African negroid peoples. It denotes more directly the Xosa, Pondo and Tembu tribes, who constitute, with the Zulus, the Zulu-Kaffir division of the S. Bantu peoples.

The Kaffirs are formidable warriors between whom and the white settlers there have been many struggles. Following a war in 1809 there was almost constant trouble during the next 70 years, breaking out into serious wars in 1834, 1830, 1850-53, 1858 and finally 1877-78.

To day the Kaffirs form a considerable element in the population of S. Africa, and are largely employed on the land, in the gold mines and in miscellaneous occupations. The word is an Arabic word meaning unbeliever.

Kaffir Bread Native farinaceous food. It is derived from the spongy pith of the stems of a S. African cycad, *Encephalartos caffer*. This tree, which is sometimes grown for ornament, often reaches 20 ft in height.

Kaffraria District of the Cape Province, S. Africa. It is the coastal region between the Great Kei River and the border of Natal. British Kaffraria, farther south between the Great Kei and Keiskamma rivers, was at one time a separate province, but was included in Cape Colony in 1865.

Kailyard School Name given to writers of sentimental fiction about humble Scottish life. The term was originally applied by J. H. Millar in reference to the song "There grows a bonny briar-bush in our kailyard." S. R. Cressett, Ian Maclaren (John Watson), and Sir James Barrie have been included in this category.

Kaisariyeh City of Turkey, also called Karseri, or Caesarea. A road centre on a tributary of the Kiliz Irmak, it manufactures rugs and carpets. It is the seat of Roman Catholic, Greek and Armenian bishops. Pop 39,134.

A village of Palestine, alternatively called Caesarea, is known by this name. Built by

Herod the Great, it was once a magnificent city and seaport, being for a time the capital of the country. Here S. Paul was in prison for two years.

Kaiser Title of the Holy Roman emperors and, until 1918, of the rulers of Austria and Germany. It was first used in 800 for the Emperor Charlemagne, and after the dissolution of the Empire in 1806, was retained by the Emperor of Austria. In 1871 the King of Prussia also took the title, which was held by the two succeeding German emperors. The word means Caesar, and the feminine is Kaiserin.

Kaka New Zealand parrot (*Nestor meridionalis*). Rather smaller than its cousin the kea, it is olive-brown in colour. It feeds on insects, besides extracting nectar from flowers. The eggs are laid in tree hollows. It is sociable and can be tamed as a pet.

Kakapo Bird of the parrot family (*Strigops habroptilus*). Also known as tarapo, or owl parrot, it is a native of New Zealand, and is green, yellow and brown in colour. It nests in burrows, spends the day in holes in the ground, and seeks its food at night. The wings are not well adapted for flight, the birds usually moving on foot and in flocks.

Kalahari Desert of S. W. Africa. It stretches for about 600 m N. of the Orange River, and covers some 120,000 sq m. Impassable both in the dry and the rainy season, it is in places covered with vegetation. It is full of game and contains large deposits of salt. The few inhabitants are Bushmen who live by hunting.

Kalat Native state of Baluchistan. It is ruled by a khan, advised by a British political agent at Kalat, the capital. Its boundaries are Persia, India and the Arabian Sea. The land is mountainous, but much of it is very fertile. Area, 73,278 sq m. Pop chiefly Mohammedan, 328,000.

Kaleidoscope Optical instrument showing symmetrical forms produced by a combination of reflecting surfaces. In its simplest form it consists of a tube containing two mirrors inclined to each other at 60°, with an eye piece at one end, and at the other a glass cell containing pieces of coloured glass. These, by rotation of the tube and repeated reflection, give various symmetrical patterns.

Kalgoorlie Town of W. Australia. The centre of a rich gold mining area, it is a modern town and a railway junction on the Transcontinental Rly. It is 80 m. to the east of Perth. Pop (1931) 5722.

Kalmuk Western branch of the Mongol stock. The Kalmuks, or Kalmyks, form an autonomous area in the union of the Soviet republics, the capital being Astrakhan.

Kamchatka Peninsula of Siberia. It lies between the Sea of Okhotsk and the Bering Sea, and it has been a Russian possession since 1700. The severe climate precludes agriculture, the sparse population living by hunting and fishing. Petropavlovsk is the capital.

Kamet Peak of the Himalayas. It is in the Gharwal district of the

United Provinces, being the highest mountain in a northern branch of the Himalayas called the Zaskar range. It is the second highest peak in the British Empire (25,447 ft.)

Kamloops City of British Columbia, Canada. At the junction of the N and S Thompson Rivers, it is 250 m from Vancouver. It is a junction on the C.P.R. and the centre of a mining and ranching district. It has railway workshops and lumber mills. Pop (1931) 6167.

Kanchenjunga World's third highest mountain. Situated in the Himalayas near the boundaries of Nepal and Sikkim, it is 75 m from Everest. Its chief peaks, 28,150 ft and 27,800 ft high, can be seen from Darjeeling. In 1930 an international expedition ascended the mountain, but was compelled by the weather to return when it had reached a height of 24,400 ft. It has five peaks and the word means "the five treasure houses of the great snows."

Kandahar City of Afghanistan. It lies in a plain between the rivers Argand and Tarnak. 300 m from Kabul and commands a pass into India. The city is a trading centre and owing to its position is an important fortress, surrounded by walls and having a citadel. It was occupied by the British in 1839 and 1879. Pop 60,000.

Kandersteg Tourist resort in Switzerland. It is in the Bernese Oberland and stands nearly 4000 ft high.

Kandy Town of Ceylon. Situated high among the mountains of the interior, it is 75 m by railway from Colombo, and is noted for its temples, especially the famous Buddhist Temple of the Tooth and its royal tombs. It was once the capital of the native kingdom of Kandy and was annexed by Britain in 1815. Pop (1931) 30,541.

Kangaroo Fully of poached mammals indigenous to Australasia and New Guinea. The great grey kangaroo (*Macropus giganteus*) has a small head and large ears, with massive hindquarters and long legs. It measures about 5 ft in length and can leap 30 ft. It is herbivorous and lives in herds. The female rears one young at a time in a pouch from the embryo stage until strong enough for independent life. There are also brush, rock, tree and rat kangaroos. The hide is valuable for leather, and the flesh especially the tail, is eaten.

Kano City of N. Nigeria. The capital of the fertile province and emirate of Kano. It is an important trading centre, being the terminus of a railway from Lagos and for caravans across the Sahara. Hides and ground nuts are produced and leather, silk, and cotton goods manufactured.

Kansas Central state of the United States. A prairie state, it is watered by the Kansas and Arkansas rivers. The Missouri forms its N.E. frontier. Despite a scarcity of rain in the west it is a rich agricultural state producing maize, wheat and hay. Many minerals are worked. Topeka is the capital but Kansas City is the largest town. The state is governed by a legislature of two houses. It sends two senators and seven representatives to Congress. Area 82,158 sq. m. Pop (1930) 1,865,990.

Kansas City City of Kansas, U.S.A. It stands at the junction of the Kansas and Missouri rivers, opposite

Kansas City in Missouri. The largest city in the state, and after Chicago, America's chief livestock centre, it is well served by railways and has some fine parks. It has slaughtering and meat packing establishments, flour mills, machine and railway workshops, grain elevators and factories for soap and candles. Pop (1930) 121,857.

Kansas City City of Missouri, U.S.A. An important railway junction on the Missouri River, it is opposite Kansas City in Kansas, with which it is connected by railway and other bridges. An important distributing centre, its industries are chiefly concerned with meat packing, grain, livestock and milling and the manufacture of clothing, confectionery and agricultural implements. Pop (1930) 399,746.

Kant Immanuel German philosopher. Born in Königsberg April 22, 1724, he was the son of a saddler. Scottish descent has been claimed for him. He studied at the University in Königsberg and became a tutor in a private family. In 1755 he was appointed lecturer in the university becoming in 1770 Professor of Philosophy. In 1797 he retired and died Feb. 12, 1804.

Kant ranks as one of the most influential of modern philosophers. His teaching is contained in three books which have been translated into English as *The Critique of Pure Reason*, *The Critique of Practical Reason* and *The Critique of Judgment*. He examines the nature of reason which exists, independent of experience. His conclusions are that there are three essential ideas: the soul as a thinking substance, the world as the totality of all phenomena and God as the absolute, perfect being. These ideas exist however only in the mind. His position is midway between that of the materialists and that of the idealists, though perhaps nearer to the latter than the former.

Kapok Tall evergreen tree of the family *Bombacaceae* and found in the W. Indies. It has a prickly stem and its leaves are divided into five or more lance-shaped leaflets. Its yellow flowers have an external coating of silky wool, and the woody capsules are filled with silky hairs attached to the seeds. These filaments are used as stuffing for pillows and cushions, and especially lifebelts for which the fibre is particularly suitable. An oil is expressed from the seeds.

Karachi City and seaport of Bombay, India. It was founded in 1843 at the western end of the delta of the Indus. It was for a time the capital of Sind. The city has a fine harbour and a large export trade in wheat. It is connected by railway with the Punjab and is an important air station. Pop (1931) 263,565.

Karageorgevitch Reigning dynasty of Yugoslavia. Its founder was a Serbian peasant, Kara George (Black George) Petrovitch (1760-1817). Leading his countrymen against the Turks, he succeeded in throwing off the Turkish yoke, and was proclaimed ruler of Serbia, which, however, again fell into Turkish hands. In 1842 the crown was accepted by his second son, Alexander, but he was deposed in 1858. His son, Peter, became king in 1903, and after the Great War was made King of Yugoslavia. He was succeeded by his second son, Alexander, in 1921.

Karakoram Mountain range of Central Asia. Extending for over

KARELIA

400 m across N E Kashmir, it connects the Himalayas with the Hindu Kush. In it is Godwin-Austen, 23,250 ft, the second highest mountain in the world. Several high but easy passes cross the range. In 1929 part of the range was explored by an Italian expedition.

Karakoram is also the name of an ancient Mongolian city. This was founded by Jenghiz Khan and was at one time the capital of the country. Its site was discovered in 1889.

Karelia Republic of Soviet Russia. It lies to the E of Finland and covers about 52,000 sq m, lying between Lake Ladoga and the White Sea. Petrosavodsk is the capital. Pop 267,500.

Karlsbad Health resort of Czechoslovakia, formerly in Austria. It is now known by its Czech name of Karlovy Vary. It lies on the River Tepla, at a high altitude, among picturesque surroundings, about 70 m N W of Prague. Its warm mineral springs which have been famous since the 14th century, attract a large number of visitors. The buildings include pump rooms and concert halls, and there are gardens and other attractions. There are porcelain works, kaolin being found in the neighbourhood. Pop (1930) 24,029.

Karlsruhe Capital of Baden, Germany. It is about 6 m from the Rhine and 39 m from Stuttgart. It is a railway centre and is connected by canal with its port Maxau on the Rhine. The industries include railway engineering, furniture, jewellery, plated goods, gloves and brewing. Pop 145,700.

Karma Sanskrit noun meaning a deed or action. When applied to the action of a living human being, it is the doctrine that every action, good or bad, receives its reward or punishment. Thus it is bound up with the theory of transmigration, apparently undeserved reward or punishment having been caused by the karma of a previous life. The doctrine is found in the Jain and Buddhist religions.

Karnak Village in Upper Egypt. Situated near the right bank of the Nile, near the modern village of Luxor, it contains some of the most famous ruins in the world. The chief is the great Temple of Amen-Ra, 1200 ft. long. The world's largest temple. It was begun by Sennusert I, 12th dynasty, and was enlarged intermittently down to Ptolemaic times. It contains an incomparable hypostyle hall, with numerous scenic reliefs. Other monuments include two obelisks and vast pylons approached by avenues of sculptured rams.

Károlyi Michael Adam George Nikolaus, Count Hungarian politician. Born at Budapest, March 4, 1875, he entered Parliament in 1905, and in 1912 changed from Liberal to Radical views. After the outbreak of war in 1914, he tried to conclude a separate peace with the Allies. After the Hungarian revolution of 1918, Károlyi was made Prime Minister, and President in 1919. Unsuccessful in his peace treaty, he had to hand over the government to the Soviet of Bela Kun, and left Hungary for Czechoslovakia. He was found guilty of high treason and felony, and his estates confiscated.

Karri Australian tree (*Eucalyptus diversicolor*). One of the gum trees, it grows to an enormous size in the forests of W. Australia. On account of its hardness

729

the wood is much used for paving blocks and similar purposes.

Karoo Name given to a plateau of the Cape Province in S Africa. It varies in height from 2000 to 4000 ft above sea level. It is semi-arid in character but is healthy, and affords abundant food for sheep, both from the pasturage in the short wet season and the succulent shrubs of the dry period.

Kashgar City near the western border of Chinese Turkestan. The centre of a fertile area where grain, cotton, fruit, etc., are grown under irrigation, it is surrounded by barren mountainous country through which passes give access to India to the south and to areas north and west. The Zhyzyl River runs through the city which, besides its trade, produces leather work, rough cotton and woollen cloth and has primitive oil refining. Pop 80,000.

Kashmir Native state of India. It lies to the north of the Punjab and its borders also touch Afghanistan and China. A mountainous area covering 84,258 sq m, it is traversed by the Himalayas and the Karakoram range, between which lies the fertile valley of the Indus, other important rivers being the Jhelum and the Chenab. The capital is Srinagar, Jammu being the next most important place. The people are chiefly Mohammedans, but the ruler, the Maharajah, is a Hindu. Agriculture is the chief industry and much of the land is forest.

In the Middle Ages, Kashmir under its own rulers, one of whom was Asoka, was a flourishing state. In 1581 it was made part of the Mogul empire, and later it was ruled by the Afghans and the Sikhs. In 1846 it came under British protection. In 1931 there was serious unrest in the state, British troops being sent to restore order. Pop (1931) 3,330,518.

Kassassin Town of Lower Egypt. On the Suez Canal, it is 22 m from Ismailia. Here, on Aug 8 and Sept 9, 1882, there were fights between the British forces and the Egyptians under Arabi Pasha.

Kassel Town of Prussia, Germany, the capital of the province of Hesse Nassau. It is on the Fulda, 90 m from Frankfurt-on-Main. There is a picture gallery with some notable paintings, several museums and a library with a fine collection of books and manuscripts. One of the museums built in the 20th century, contains antiquities found nearby. Kassel has railway workshops, engineering works and manufactures of paper, etc. Pop 171,700.

Katabolism Term used in biology for the physical and chemical changes in the living body resulting in the breaking down of the tissues into simpler substances. It is the opposite of anabolism, and these two processes are more or less balanced during normal life.

Katrine Lake of Scotland. Mainly in Perthshire, it extends to Strirling-shire, and is drained by the Achray and Black Avon, providing Glasgow with much water. It covers about 5 sq m, and is famed for its beautiful scenery.

Kattegat Arm of the sea between Denmark and Sweden. It connects with the North Sea through the Skagerrak and with the Baltic by means of three channels, called the Sound, the Great

Belt and the Little Belt, which are divided from one another by islands. It is about 150 m long. Shoals and sandbanks make navigation difficult.

Katydid Name used for certain grass hoppers found in N America. They make a noise by stridulation which sounds like the words "Katy did".

Kauffer Edward M'Knight. American artist and designer. Born at Great Falls, Montana, in 1890, after an eventful life in America he began work at the Art Institute, Chicago, and then worked in Munich and Paris and settled in London. He became expert at poster designing, and his boldness of design and keen sense of colour are found in the series of London's Underground Railway posters. His woodcut "Flight" (1922) is famous and he has edited *The Art of the Poster* (1924).

Kauffman Angelica Swiss artist. She was born Oct. 30, 1741, in Switzerland. She studied art in Italy, and in 1766 settled in England where she became known as a portrait and decorative painter. In 1768 she was elected one of the original members of the Royal Academy. With Reynolds and others she was chosen to decorate St Paul's Cathedral, London, but in 1781 after her marriage with Antonio Zucchi a Venetian painter she left England for Italy. She died in Rome, Nov. 5, 1807. Some of her work is seen in the large houses of that time.

Kauri Pine New Zealand tree. It reaches a height of 100 ft, with a straight trunk up to 10 ft in diameter, but large specimens greatly exceed these dimensions. It gives excellent timber lasting and readily worked. Fossil gum, dug from old forest sites, is used for varnish making.

Kavalla Town of Greece. It lies on the gulf of the same name, opposite Thasos Island. It has a good harbour and trades in tobacco. Bulgaria claimed Kavalla in 1913 thus bringing about the second Balkan War, but it was retained by Greece at the peace of that year. During the Great War it was occupied by the Bulgarians and in Aug. 1916 was bombarded by British warships. It was given back to Greece in 1918. Pop. 50,000.

Kayak Eskimo canoe usually accommodating only one person. It consists of a wooden frame about 18 ft long and 2 ft wide, covered with skins which are arranged on the top so as to keep out water. More modern boats are now common in places.

Kaye-Smith Sheila. English novelist. The daughter of Edward Kaye Smith, a doctor at St Leonards, she passed her early days in Sussex and soon gained a very intimate knowledge of the people there. In 1908 she published her first novel *The Tramping Methodist*. This was a success and others followed dealing in the main with Sussex life. They include *Starbrave*, *Sussex Green Tamarisk*, *Town, Green Apple*, *Harvest*, *The End of the House of Alford*, *Saints in Sussex*, *Iron and Smoke*, *The Village Doctor*, *Shepherds in Sackcloth* and *Susan Spray*. In private life Miss Kaye-Smith is the wife of Mr J. P. Fry.

Kazakhstan Republic of Soviet Russia. It is in Central Asia and covers some 1,825,000 sq m. Kzyl

Orda being the capital. It dates from 1924. Pop. 6,500,000.

Kazan Capital of the Tartar autonomous republic of Soviet Russia. It stands on the Kazan Ra a tributary of the Volga. It is an industrial town, manufacturing soap, candles, leather chemicals, etc., and is on the trade routes to the East. It has a university. Pop. 202,000.

Kea New Zealand parrot (*Nesitor nota* *bilis*). It is 17 in long and has dull black edged, olive green plumage. It frequents the mountains of South Island. Its partiality for the fat of the sheep leads it to attack the living animals, sometimes causing serious loss to farmers. It also feeds on the dead sheep. Its food at other times is fruit, seeds, insects and grubs.

Kean Edmund. English actor. Born in London, March 17, 1787, he earned a precarious living as a boy, at fairs and circuses. In 1814 he appeared on the London stage, where, at Drury Lane Theatre, his Shylock made him famous. With equal success he played other Shakespearean parts among them King Lear, Othello, Hamlet and Macbeth. He won successes also in plays by Massinger, Shoridan and other dramatists, and was probably the greatest tragic actor of his day. Twice he visited the United States where he had a great reception. In his later days he became very poor, owing largely to his extravagance, but he continued to play until his death at Richmond, March 25, 1833.

Other members of his family won renown on the stage. Kean's wife was an actress and their second son Charles John Kean, followed the same profession.

Kearsley Urban district of Lancashire. It is 3 m from Bolton on the LMS Ry. There are collieries in the neighbourhood and paper, cotton and bricks are manufactured. Pop. (1931), 9736.

Keate John. English schoolmaster. Born in 1778, he was educated at Eton and King's College, Cambridge. In 1797 he became a master at Eton and was appointed headmaster in 1809. Under him many salutary reforms were introduced into the school. He is best known, however, for the frequent and severe floggings which he administered to the boys. In 1834 he resigned. Since 1820 he had been a canon of Windsor, and he held also a living in Hampshire until his death, March 5, 1852.

Keats John. English poet. Born in London, Oct. 29 or 31, 1795, he was the son of Thomas Keats the keeper of a livery stable in Finsbury. He was sent to school at Enfield and was then apprenticed to a surgeon at Edmonton. He became a dresser at Guy's Hospital in 1810 but soon left that profession. In 1817 he published his first volume of poems. In 1818 *Endymion* appeared and in 1820 *Hyperion* and *Other Poems*. Before this time his health had begun to fail. Never very strong he was undoubtedly affected by the savage criticisms meted out in the reviews, to his work by the death of his brother, Thomas and by his unrequited love for Fanny Brawne. In 1820 he left England for Italy but soon after reaching Rome he died, Feb. 23 1821. He was buried in the Protestant cemetery there.

The longer poems of Keats include *Hyperion*, *Endymion*, the unfinished *Lamia*, *The Pot of Basil* and *The Eve of St Agnes*. His genius

however, is best revealed in the shorter ones, notably such unique pieces as the odes *To a Nightingale* and *To Autumn*, the sonnet *On First Looking into Chapman's Homer* and the *Lines on a Grecian Urn*. With these may be mentioned the ballad *La Belle Dame sans Merci*.

Much has been written about Keats, whose circle of friends included Shelley and Hazlitt. As a poet he occupies a very high place, one which becomes more secure as the years pass. He is above all the poet of beauty. He was no scholar, but more than any other English poet he caught the Greek spirit which he understood and interpreted with unparalleled fidelity. Later poets owe much to his influence.

The house in Keat's Grove at Hampstead known as Lawn Bank, in which Keats lived from 1817 to 1820, is now a museum dedicated to him. The centenary of his death was celebrated in 1931.

Keble John English poet and divine. Born at Fairford, April 25, 1792, he was the son of a clergyman. He went to Corpus Christi College, Oxford, and became a fellow of Oriel College. In 1815 he was ordained, and became a curate in a Gloucestershire village, but he retained his connection with Oxford, where from 1831 to 1841 he was Professor of Poetry. In 1835 he married and became vicar of Hursley near Winchester. He died at Bournemouth, March 29, 1866, and was buried at Hursley.

Keble has two claims to fame. He wrote *The Christian Year* which contains some very popular hymns including "Sun of my Soul," and he was one of the founders of the Oxford Movement, which is usually dated from a sermon preached by him at Oxford in 1833. He had a good deal to do with *Tracts for the Times*.

Keble College, in Parks Road at Oxford, was founded in his memory in 1870. The chapel, in which hangs Holman Hunt's "Light of the World" is notable.

Kedge Small anchor with an iron stock. Its uses are to steady a ship when riding in harbour or river to keep her clear of her bower anchor when the tide turns, and, cast from a small boat, to enable her to move by warping.

Kedgeree Mixture of rice and fish, augmented by hard-boiled eggs, melted butter or white sauce. In India, rice, spice and shredded onion cooked with butter and the dholi pea are compounded as kedgeree.

Kedleston Village of Derbyshire. It is situated 4 m. from Derby, and is notable for its connection with the Curzon family, who have lived here since the 11th century. Kedleston Hall, the seat of Viscount Scarsdale, is a fine mansion in the classic style designed by Robert Adam.

Keeley Mary Ann English actress. Born at Ipswich in 1806, she acted under her maiden name of Goward before. In 1829, she married Robert Keeley (1793-1869). Both she and her husband were popular comedians, and she acted in Shakespeare's plays, also in plays adapted from some of Charles Dickens' novels. From 1844-47, the pair were managers of the Lyceum Theatre, London. She died March 12, 1899, at Brompton.

Keeling Islands Another name for the Cocos Islands (q.v.).

Keene Charles Samuel English artist. Born in London Aug. 10, 1823,

he was educated at Ipswich. After a spell in the office of his father who was a solicitor, he was apprenticed to a wood engraver. In 1851 he started to work for *Punch* becoming a regular member of the staff in 1860, and it is for the excellence of his drawings in that journal that he is chiefly known, although he also illustrated several books. He died Jan. 4, 1891.

Keep Architectural term for the donjon or central portion of a mediaeval castle. It formed the living quarters and was the last refuge for the garrison in war time. The Norman keep was usually of the square type as seen in the White Tower of the Tower of London, but round and polygonal keeps were also common. The keep at Rochester is a fine example.

Keewatin Town of Ontario, Canada. With a station on the C.P. Rly., it is 130 m. from Winnipeg, on Lake of the Woods, and is visited for its fishing and shooting. Here is a large plant for generating electricity. Pop. 1300.

Keewatin was formerly a district of Canada. It had an area of 228,160 sq. m., and reached from the Arctic to Manitoba and Ontario, E. of Hudson Bay. In 1905 it was included in the N.W. Territories, and in 1912 parts of it were given to Manitoba and Ontario.

Keighley Borough and market town of Yorkshire (W.R.). It is 9 m. from Bradford and 205 from London. It stands at the confluence of the rivers Aire and Wharfe, and is served by the L.M.S. and L.N.E. Rlys., and the Leeds and Liverpool Canal. The industries include the manufacture of woollen and worsted goods, textile machinery and sewing machines. Pop. (1931) 40,440.

Keith Borough and market town of Banffshire. Old and New Keith lie on the east bank of the River Isla, with Fife-Keith on the west. They are united by two bridges. The town is served by the L.M.S. and L.N.E. Rlys. It has cattle, horse and sheep fairs, and the industries include brewing and distilling. Near are some curious stone circles and the ruins of Milton Tower. Pop. (1931) 4424.

Keith Name of a famous Scottish family, members of which were Earls Marischal for some centuries before 1716. Among its noted members was the soldier Francis James Edward Keith, a younger son of the 9th Earl Marischal. He fought for the Jacobites in 1715 and 1719, and afterwards served in the Spanish, Russian and Prussian armies. He was one of the most trusted generals of Frederick the Great, who made him a Field Marshal. He was killed in battle, Oct. 14, 1758.

A sailor, George Keith Elphinstone, bore the title of Viscount Keith. Born Jan. 7, 1746, he entered the navy and saw a good deal of service. In 1796 he defeated a Dutch fleet and took Capetown. He helped to put down the mutiny at Spithead in 1797, and served later against the French in the Mediterranean. In 1797 he was made a baron, and in 1814 Viscount Keith. He died March 10, 1823.

Keith Sir Arthur Scottish scientist. Born at Aberdeen, Feb. 5, 1866, he was educated at the university there and later in London and Leipzig. He became a doctor, and from 1899 to 1902 was Secretary of the Anatomical Society. He was then made conservator of the Museum, and Hunterian Professor at the Royal College of Surgeons,

London In 1921 he was knighted, and in 1927 became President of the British Association. He has been F.R.S. since 1913, and from 1917-22 was Fullerian Professor at the Royal Institution.

Kelth made himself a leading authority on anthropology, on which subject he wrote and lectured a great deal. His books include *The Human Body*, *The Antiquity of Man*, *Engines of the Human Body* and *The Religion of a Darwinian*.

Kelham Village of Nottinghamshire. It is on the Trent, 2 m from Newark. Here is a factory for dealing with sugar beet which is grown in the neighbourhood. The fine hall is a theological college of the Church of England. Pop 400.

Keller Helen Adams. American blind and deaf mute. Born June 27, 1880, she lost the senses of sight, hearing and smell when 19 months old. Anna Sullivan of the Perkins Institute of the Blind taught her to read by the deaf and dumb alphabet, also writing and typewriting. In 1890 she learned to speak. She graduated with honours at Radcliffe College, Cambridge, Mass., and wrote several books including *The Story of My Life*, 1903, and *The World I Live In*, 1908. In 1932 she visited Scotland to receive honorary degrees at the universities.

Kellermann François. Christophe. French soldier. Born in Alsace, May 23, 1735, he entered the French Army in 1752 and served in the Seven Years War. Later he was given a high command in the republican army, and he was responsible for its initial victory at Valmy in 1792. He served under Napoleon in Italy and Germany. In 1803 he was made a marshal, and in 1808 Duke of Valmy. He adhered to the Bourbons after the events of 1814-15 and died Sept. 23, 1820.

Kellermann's son, François Étienne, rivalled his father as a soldier. Born in 1770, he entered the army, and in 1796-97 held a command in Italy. He distinguished himself at Marengo and fought in Spain and at Waterloo. He died June 2, 1835.

Kellogg Frank Billings. American diplomat and lawyer. Born at Potsdam, New York, Dec. 22, 1856, he was educated in Minnesota, and admitted to the Bar in 1877. He practised in Rochester and St. Paul and was special counsel in the action to dissolve the Union Pacific and Southern Pacific railway merger. Elected to the Senate, 1917-23, in 1924 he became American ambassador in London, resigning in 1925 to become Secretary of State in President Coolidge's Government until 1929. Here he won fame as the originator of the Kellogg Pact, or Pact of Paris, signed in 1928, a multilateral treaty for the outlawry of war as an instrument of national policy.

Kells Urban district of Co. Meath, Irish Free State. It is on the Blackwater, 10 m from Navan, and has a station on the Gt. S. Ry. Here the kings of Meath had a palace, and here in the 6th century S. Columba built a monastery. It was the seat of a bishop from 800 to 1300. The remains include S. Columba's House, a round tower and some crosses. Pop 2200.

The book of Kells, the finest illuminated manuscript of Irish work extant, was written here in the 8th century. It is now in Trinity College, Dublin.

Kelmscott Press Private printing press founded in 1890 by William Morris. Started in the Upper Mall, Hammersmith, it was removed to Sussex House nearby, in 1891. It was named after the village of Kelmscott in Oxfordshire. Morris aimed at beauty in printing, and produced many remarkable volumes. The wood blocks are now in the British Museum, London.

Kelp Name given to the porous ash obtained by burning seaweed slowly in shallow pits or special retorts. From it is obtained iodine and alkaline salts. Formerly this was a large industry in Scotland and Normandy, but has declined owing to the production of iodine from caliche in Chile.

Kelpie Scottish water sprite. It is said to appear at fairs on stormy nights, frequently in the shape of a horse. It is malignant and hodes evil.

Kelso Burgh and market town of Roxburghshire. Situated at the junction of the Tyne and the Tweed, it is 52 m from Edinburgh, and is served by the L.N.E. Ry. A fine bridge crosses the Tweed here. It is an agricultural centre, with corn and cattle markets, corn mills and a factory for agricultural implements. Kelso is famed for its Benedictine abbey, founded in 1128. Of this much of the church remains, and it is national property. Pop (1931) 3855.

Kelty Town of Fifeshire. It is 8 m from Dunfermline, on the L.N.E. Ry. It owes its existence to the opening of the coal mines in the 19th century. Pop 7800.

The River Kelty is a tributary of the Forth, and runs for some distance between Perthshire and Stirlingshire.

Kelvin River of Scotland. It rises in the Kilsyth Hills and flows through Glasgow to the Clyde at Partick. Kelvinhaugh and Kelvingrove are districts of the city named after it. In Kelvingrove Park are the buildings of the university and the art galleries. The river is 21 m long.

Kelvin Baron. Scottish scientist. William Thomson was born in Belfast, June 26, 1824, and was educated at the Universities of Glasgow and Cambridge. In 1846, after a brilliant career at Cambridge, he was made Professor of Natural Philosophy at Glasgow where he remained until 1899. From 1900 to 1904 he was President of the Royal Society. In 1892 he was made a baron, and in 1902 he was given the Order of Merit. He died Dec. 17, 1907, when his title became extinct.

As a physicist Thomson was one of the greatest of his time. He studied thermodynamics and then electricity and magnetism, and the results of his work were of the highest importance to industry. They helped to make possible the electric cable and he was responsible for many of the inventions that have extended the general use of electricity. His paper *On Vortex Atoms* and his lectures on molecular dynamics and the wave theory of light contain the results of much of his thought, and have exercised considerable influence on students of a later day.

Kemal Pasha, Ghazi Mustafa. Turkish politician. Born in 1880 at Salonika, he became a soldier. In 1915 he commanded the Turkish armies on the Gallipoli peninsula and afterwards made himself a very formidable

figure in public affairs. At the head of a group of nationalists he set up a government at Angora which, in 1922, was strong enough to abolish the office of sultan. At the head of affairs, Mustapha Kemal won a signal diplomatic victory when the Treaty of Lausanne, in 1923, restored to Turkey much of the territory she had lost. In the same year Kemal was chosen president of the republic, which, under his strong rule, made great progress. He was still president in 1936.

Kemalists Turkish nationalists, followers of Mustapha Kemal Pasha. In 1920 the Kemalists set up a national assembly at Angora (now Ankara) which was responsible for the abolition of the sultanate and the caliphate, and the establishment of the republic in 1923. See **TURKEY**.

Kemble Charles English actor. Son of Roger Komble and brother of Sarah Siddons, he was born Nov. 25, 1775, and educated at Douai. His first stage appearance was at Sheffield in 1793. He subsequently appeared successfully in London, mainly in comedy. He was joint proprietor of Covent Garden Theatre and later an examiner of plays. He died Nov. 12, 1854.

Kemble left two daughters. The elder, Frances Anne, or Fanny (1809-93), was long a successful actress. Afterwards she made herself famous by her readings from Shakespeare. She wrote some plays and volumes of memoirs and died Jan. 15, 1893. The younger daughter, Adelaide (1814-79), became famous as an opera singer. She died Aug. 4, 1879.

Kemble John Philip English actor. Born at Prescot, Feb. 1, 1757, a brother of Charles Komble and Mrs. Siddons. Educated for the priesthood, he preferred the stage instead and made his first appearance at Wolverhampton in 1776. In 1783 he came to London, where he achieved great popularity as a tragedian, especially in Shakespearean characters. He was manager of Drury Lane Theatre, 1788-96, and of Covent Garden, 1803-17. He died Feb. 26, 1823, at Lausanne.

Kempis Thomas a. German writer. He was born about 1379 at Kempen near Dusseldorf. He was educated at Deventer and about 1400 entered an Augustinian monastery near Zwolle, becoming a monk, and living there until his death in 1471. He rose to be prior.

He made a complete copy of the Bible, and wrote histories, biographies, sermons, hymns, etc. He wrote also several books of devotion, one of which stands out as perhaps the greatest of its kind, *The Imitation of Christ*. It has been translated into many languages, and over 3000 editions have appeared. It was first printed at Augsburg in 1471 or 1472. In Brussels there is a copy written by Kempis himself, while in 1879 a facsimile edition was printed in London.

Kempston Urban district of Bedfordshire. It is on the Ouse, 2 m. from Bedford. Roman and Saxon remains have been discovered here. Pop. (1931), 5390.

Kempton Park District of Middlesex. It is near Sunbury, and is known for its racecourse. In the Middle Ages there was a palace here from which Henry VIII. used to hunt.

Kemp-Welch Lucy Elizabeth English artist. Born at Bournemouth in 1869, she studied at the

Herkomer School of Art, Bushey, Herts, and exhibited at the Royal Academy in 1894.

Her paintings of animals, especially of horses, show fine draughtsmanship, a strong sense of colour and good composition. Among her best works are "Colt Hunting in the New Forest" in the Tate Gallery, London, "Summer Drought", "Horses Bathing in the Sea", "Lord Dundonald's Dash on Lady-smith", and "The Harvesters".

Kemsing Village of Kent. It is 3 m. from Sevenoaks with a station on the S. Ry. It is notable as the birthplace of S. Edith. An image of the saint which stood in the churchyard was visited by thousands who believed it had miraculous power.

Ken Thomas English bishop. Born in July, 1637, at Berkhamstead, he was educated at Winchester and Oxford. He held livings in Essex, Hampshire and the Isle of Wight before 1679, when he went to the Netherlands as chaplain to the wife of William of Orange. In 1680 he returned to England and served as chaplain to Charles II., and held a clerical position in Winchester. In 1684 he was made Bishop of Bath and Wells and he was one of the seven bishops who refused to read the Declaration of Indulgence and were therefore tried and acquitted. He refused to take the oath of allegiance to William and Mary in 1689, thus becoming a nonjuror and losing his bishopric. He died at Longleat, March 19, 1711. Ken is best known as the author of two popular hymns "Awake my Soul" and "Glory to Thee".

Kenchester Village of Herefordshire. It is 5 m. from Hereford and is the site of the Roman town of *Castra Magna*. Much of it was excavated, 1012-13, and interesting relics were found. Pop. 100.

Kendal Market town of Westmorland, in full Kirkby-in-Kendal, on the River Kent, and the L.M.S. Ry., 21 m. from Lancaster. Here are ruins of a castle. Horse and cattle fairs are held and woollen goods are made, this industry having been introduced by the Flemings in the 14th century. Pop. (1931), 15,575.

Kendal Dame Margaret. English actress. Born at Cleethorpes, March 15, 1849, she first appeared in London in 1865, under her maiden name of Margaret (Madge) Robertson. She won her greatest successes in emotional parts. In 1869 she married the actor W. H. Grimston (1843-1917), who took the name of Kendal. With Sir John Hare he was manager of the St. James's Theatre, 1879-88. Mrs. Kendal retired in 1907 and in 1926 was made a dame (D.B.E.). An *Autobiography* appeared in 1933. She died on 14th Sept., 1935.

Kenilworth Urban district of Warwickshire. It is 4 m. from Warwick, on the L.M.S. Ry. It is chiefly famous for its castle, now in ruins. This was added to throughout the centuries, notably by Simon de Montfort, Henry III. who took it in 1266, John of Gaunt, Henry VIII. and the Earl of Leicester, to whom it was given by Elizabeth. It was destroyed during the Commonwealth. The castle was one of the largest and most important in England. The town has a trade in agricultural produce. Pop. (1931), 7592.

One of Scott's finest novels, *Kenilworth*, describes the visit of Elizabeth to the Earl of Leicester in 1575, when she was entertained with great magnificence.

Kenley District of Surrey It is 17 m from London, on the S Rly The fine common is the property of the old corporation.

Kenmare Market town of Kerry, Irish Free State It stands on the river of the same name and is reached by the G S Rlys, and by canal It is a popular tourist centre, the attractions including fishing and some wonderful scenery Near are Dorrten a seat of the Marquess of Lansdowne and Dunkerron Castle Pop 880

Kenmare River, really an estuary, 28 m long and reaching 6 m wide, separates the counties of Cork and Kerry

The Irish title of the Earl of Kenmare has been borne since 1801 by the family of Browne The earl's eldest son is called Viscount Castlerosse The son of the 5th earl, Viscount Castlerosse, made a reputation as a journalist on *The Daily Express*

Kennedy Scottish family, the head of which is the Marquess of Ailsa The home of the Kennedys was in Ayrshire and in 1452 Gilbert Kennedy was made a Lord of Parliament A later Lord Kennedy became Marquess of Ailsa (q v)

Kennedy Benjamin Hall English head master Born in Birmingham Nov 6 1804, he was educated at Shrewsbury and S John's College Cambridge He became a fellow of his college and a clergyman, and in 1830 a master at Harrow In 1830 he was chosen headmaster of Shrewsbury, and during the next 31 years he made this school famous for its classical scholarship In 1867 he became Regius Professor of Greek at Cambridge, and he died April 6, 1889 Kennedy is known for his *Latin Grammar*

Kennedy's brother Charles Rann Kennedy (1808-67), was also a famous classical scholar at Cambridge and a fine lawyer

Kennedy Margaret English novelist. A daughter of C M Kennedy, a barrister, she went to Cheltenham College and then to Somerville College, Oxford She studied history and in 1922 published *A Century of Revolutions* In 1924 she made a name with a novel *The Constant Nymph*, which was equally successful on the stage and screen Her later books include *Red Sky at Morning*, *Come with Me* and in 1931 *Return I Dare Not* She is the wife of Mr David Davies

Kennedy Thomas Scottish politician. Born in 1876 he became a socialist and in time was appointed Secretary of the Social Democratic Federation In 1921 he was elected M P for Kirkcaldy and he was elected in 1924, 1929 and again in 1935 In 1921 he was made one of the whips of the Labour Party in Parliament and in 1924 was a Lord of the Treasury In 1927 he became chief whip and in 1929 Parliamentary Secretary to the Treasury In Aug, 1931, he resigned and at the general election lost his seat but regained it at the general election of Nov, 1935

Kennington District of London To the S of the city, it is in the borough of Lambeth Kennington

Park, once known as Kennington Common, was extended in 1931 Here is Kennington Oval, the headquarters of the Surrey Cricket Club, which, like much of the property around, is on the estate of the Duchy of Cornwall

Kennington Eric Henri English artist. Born in London, March 12, 1888, he studied art there His first important work, "The Costermongers," was exhibited in 1914 It is now in the Luxon hourg, Paris In 1918 he was appointed an official artist on the western front His works include a painting on glass, "The Kensingtons in Action," war memorials in Battersea Park, London and Solssons, and the bronze statue of Thomas Hardy unveiled at Dorchester in 1931

Kenora City of Ontario It stands on the Winnipeg River, near its source in the Lake of the Woods and 132 m from Winnipeg It has a station on the C P R and is a centre of the lumbering industry Pop (1931) 6706

Kensal Green District of London, to the NW of the city It is chiefly famous for its cemeteries, but is also a busy district along the Harrow Road

Kensington Borough of the county of London Known as the royal borough, it lies to the W of the city The chief buildings include the Victoria and Albert Museum the Natural History Museum, the Imperial Institute, the Albert Hall and the fine church of S Mary Abbots High Street is a popular shopping centre The borough also includes Holland Park, Campden Hill and Brompton with its oratory and parish church near where are Prince's Club and Harrod's Stores and Earl's Court The Bishop of Kensington is a suffragan of the Bishop of London Pop 180,681

Kensington Gardens is a pleasure resort adjoining Hyde Park It covers 275 acres and contains the Round Pond and a snail garden In it are the Albert Memorial and several statues including one of Peter Pan

Overlooking the gardens is Kensington Palace, the birthplace of Queen Victoria Originally a residence of the Earl of Nottingham, called Nottingham House, it was bought by William III in 1689 and largely rebuilt by Wren Features are the gallery the orangery and the grand staircase It is now divided into residences for various members of the royal family and others connected with the court

Kent One of the kingdoms of England in Anglo Saxon times It was founded by the Jutes before 600 and had its own kings until about 700, Canterbury being the capital Later it became part of Wessex Its most notable king was Ethelbert

Kent County of England Its boundaries are the Thames and the sea with Surrey and Sussex on its inland borders Its extent is 1555 sq m and, in the west, it forms part of the London area Maidstone is the county town Canterbury is the ecclesiastical capital of England and there is also a bishopric at Rochester Kent is a fertile and in the main a level county In the centre are the Weald and extensive areas where fruit and hops are grown for which the county is famous There are some hills in the west Westerham Hill being about 890 ft high The chief rivers are the Medway, Darent and Stour In the east near Dover a coalfield has been opened and model villages such as Tillingstone erected.

Along the estuary of the Thames and on the Medway is a great industrial area, towns therein being Dartford, Erith, Gravesend, Chatham, Rochester and Gillingham. Chatham is also a naval station. Round the coast are watering places, some being on the so-called islands of Sheppey and Thanet. Among these are Herne Bay, Iankerton, Whitstable, Margate, Broadstairs, Ramsgate, Dover, Folkestone, Deal and Romney. Dover and Folkestone are also seaports for Continental traffic. Inland towns include Tunbridge Wells, a watering place, Bromley, Sevenoaks, Ashford, Faversham and Sittingbourne, and there are many picturesque little towns such as Cranbrook and Tenterden. In the south is Romney Marsh. Knole and Penshurst are famous English homes. Walmer, Dover and Leeds are castles of interest and the county is full of historic spots. It sends 11 members to Parliament.

Originally one of the Anglo Saxon kingdoms, Kent passed under the rule of Wessex about A.D. 700.

Kent is a famous cricketing county, some of the earliest clubs having been founded here and more than once its eleven has won the county championship.

Persons born east of the Medway are Men of Kent, those born west are Kentish Men. Pop (1931) 1,194,115.

A British cruiser called the *Kent* took part in the Battle of the Falkland Islands in 1914, after which she chased and destroyed the *Dresden*.

Kent Duke of English title. There was an Earl of Kent in very early times and in the 13th century the title came to Edmund, a son of Edward I. Later it was held by the Holland family, and then by the Groys. In 1706 Henry Grey, the 12th Earl, was Marquess of Kent and in 1710 Duke of Kent. The titles all became extinct when he died in 1740.

In 1799 George III. made his fourth son, Edward Augustus, Duke of Kent. He was born Nov. 2, 1767, and served for a time in the army. He married, in 1818, Victoria (1786-1861), widow of the Prince of Leiningen and their only child was Queen Victoria. The Duke died Jan. 23, 1820. In 1934 Prince George, 4th son of King George V, was made Duke of Kent. See GEORGE.

Kentigern Scottish saint. He was born in 518 and was educated at Culross by Saint Servanus. A period of hermitage preceded his elevation to the rank of Bishop of Glasgow. He remained there until his death in 603, except for a few years passed in Wales. Sometimes called Mungo, or the beloved, Kentigern is the Patron Saint of Glasgow.

Kentish Town District of London. To the north-west of the city in the borough of St. Pancras, it is a densely-populated district. The industries include the making of cigarettes, furniture, etc. Here is the North-Western Polytechnic.

Kent's Cavern Cave near Torquay. It is famous for its evidences of Palaeolithic man. The cave was examined first in 1824, but a more thorough exploration was made from 1868 to 1880. Beneath a bed of stalagmite were found various implements of flint, bone and horn, together with the bones of the mammoth and other animals.

Kentucky State of the United States. It is an east-central state,

covering 40,598 sq. m. A level and fertile region, except in the east where are the Alleghany Mountains, it produces great quantities of wheat, maize, tobacco, etc., and is famed for its horses. Frankfort is the capital, but Louisville is the largest city. Other populous centres are Covington and Lexington. The chief rivers are the Ohio, Mississippi, Big Sandy and Cumberland. In the state is the Mammoth Cave, Kentucky, which has been a state since 1792, sends two senators and 9 representatives to Congress. State government is carried on by a general assembly of two houses. Pop (1930) 2,614,589.

Ken Wood Estate at Hampstead, now public property. Some times called Caen Wood, a house stood here in the 17th century or earlier. This became the property of the Duke of Argyll and later of the Earl of Bute. In 1755 the 1st Earl of Mansfield bought it and the house was largely rebuilt for him by Robert Adam. It remained a seat of the earls for about 150 years. In the 20th century it was bought by the Earl of Iveagh, who, in 1927, left to the nation the house and some 70 acres of land. The wood proper, previously acquired, was opened in 1925 as a public pleasure ground.

Kenworthy Joseph Montagu. English politician. Born March 7, 1886, the eldest son of Baron Stratholgi, he entered the navy in 1902. Having served through the Great War, he retired in 1920 with the rank of Lieutenant-commander. In 1919 he had been elected Liberal M.P. for Hull (Central) and in 1926 he joined the Labour Party, losing his seat in 1931. In the House of Commons he became a pertinacious questioner of ministers. At one time Kenworthy was heavy-weight boxing champion of the navy.

Kenya British colony and protectorate in East Africa. It covers 224,960 sq. m. and has a coastline of about 600 m. on the Indian Ocean. Elsewhere its borders touch Tanganyika, the Sudan, Abyssinia and Italian Somaliland. The surface is hilly and in parts mountainous, Mount Kenya being 17,000 ft. high. The rivers include the Tana, Juba and Umba, and there are several lakes. Nairobi is the capital, but Mombasa is the largest town. Mombasa and Kilindini are seaports, Kisumu is a port on Lake Victoria.

The bulk of the country, the colony, is divided into seven provinces, originally forming the East Africa Protectorate. A strip of land along the coast and some islands, leased from the Sultan of Zanzibar, form the protectorate. The people are chiefly Bantus, but British settlers have taken up land, and there are many Indians and Arabs. Much of the soil is fertile, coffee, cotton, rubber, maize and other tropical products being grown, and there are farms for sheep and ostriches. Much of the land is heavy forest. The government is under a governor, assisted by an executive and a legislative council. Both Indians and Arabs are represented in the latter. The country has a railway system and aerodromes for the air service. The unit of currency is the silver shilling. Pop (1931) 3,040,960, of whom 16,800 are Europeans.

Kepler Johann. German astronomer. Born at Weil, Dec. 27, 1571, he was educated at the University of Tübingen. In 1594 he went to Graz as Professor of Mathematics and Astronomy, and in 1601 he succeeded Tycho Brahe in a similar position.

at Prague. Later he lived at Linz and was astronomer to Wallenstein. He died Nov 15, 1630.

Kepler did a great deal of valuable work, but his chief title to fame arises from his three laws of planetary motion, which were used to good purpose by Newton, and are the basis of modern astronomy.

Keppel Name of a family famous in the British Navy. A member of the family came to England with William III and was made Earl of Albemarle. Augustus Keppel, a son of the 2nd earl, was born April 25, 1725, and entered the navy as a hoy. He saw a good deal of service and rose to be an admiral and commander-in-chief of a fleet. He was an MP for some years and in 1782 was made First Lord of the Admiralty and a viscount. He died Oct 2, 1786.

A later sailor of the same family was Henry Keppel, a son of the 4th earl. He was born June 14 1809, entered the navy in 1822 and lived until Jan 17, 1904. He held important commands and rose to be an admiral of the fleet. Sir Henry wrote *A Sailor's Life Under Four Sovereigns*.

Kerensky Alexander Feodorovich Russian leader. He was born in 1881, became a lawyer in Moscow and a leading figure among the reformers and sat in the last Duma. In 1917 when the revolution broke out, he joined the government and, as Minister of War directed the military operations that were the last efforts of Russia against Germany. Later in the year he became prime minister and then president of the new republic, and was for a time the ruler of the country. The Bolsheviks, however, soon proved too strong for him and he escaped from Russia. In 1919 he published an account of his activities called *The Prelude to Bolshevism*. In 1932 he wrote for the Press in London.

Kerguelen Land Island in the Indian Ocean, some times called Desolation Land. It covers 1400 sq m but is uninhabited. It was discovered by Yves Kerguelen Tromarec, a French sailor in 1772 and is a French possession, having been annexed in 1893.

A plant called the kerguelen cabbage is eaten by sailors as a vegetable.

Kerman City of Persia. It is about 400 m south east of Tchernan and is the centre where several roads meet. A trading centre it is famous for its carpets. Kerman is the capital of a province which is noted for its goats and camels. Pop 40,000.

Kermes Dyestuff resembling cochineal in colour. It is obtained from the dried female scale insects found on a species of oak (*Quercus coccifera*) growing in the Mediterranean region. In Europe Kermes has been superseded by cochineal and the more recent aniline dyes, but is used still in the East.

Kerosene Name given to mineral illuminating oils, especially those derived from petroleum by fractional distillation and commonly known as paraffin oil. Kerosene is a mixture of liquid hydrocarbons with a specific gravity from about 0.780 to 0.830, and for safety in use must have a flashpoint not below 150°C.

Kerry County of the Irish Free State, in the S.W. of the Province of Munster. It covers 1815 sq m. Tralee is the county town. Other places are Killarney and

Listowel. The coast is much indented by Kenmare River, Dingle Bay and other openings, and its interior is perhaps the most mountainous part of Ireland, containing MoGillieuddy's Reeks and other ranges. The scenery, both coastal and inland, is very beautiful, as around Killarney, Glengarriff and other beauty spots and on many rivers and lakes. Kerry includes Valencia and other islands. Agriculture is the chief industry, but there are also some peasant industries. There are many remains of the past in the county and many legends are associated with it. Pop (1926) 143,171.

The title of Earl of Kerry is borne by the oldest son of the Marquess of Lansdowne, at one time a large landowner in the county. It dates from 1722. Kerry cattle are a small but fine and hardy breed found in this part of Ireland.

Kesteven One of the divisions of Lincolnshire. It is in the south west of the county and covers about 750 sq m. It has its own county council, Stamford being its county town.

Keston District of Kent. It is 4 m from Bromley and has become a residential suburb of London. Here is a large common.

Kestrel Genus (*Falco*) of small birds of prey. The common kestrel (*F. tinnunculus*) also called the windhover, is found in Great Britain and other parts of Europe and Asia. The male has black spotted, reddish plumage with ash-grey crown and tail. The bird resembles the falcon and averages about 13 in in length and feeds on mice and insects and sometimes on young birds. The eggs are red and spotted.

Keswick Market town and urban district of Cumberland. It stands on the Greta, 13 m from Cockermouth, and is reached by the L.M.S. Rly. Near is Greta Hall once the residence of Sonthey. The town is a centre for visitors to the Lake District. It adjoins Derwentwater and Skiddaw is near. Every summer the Keswick Convention, an evangelical gathering, is held here. Lead pencils are made in the town. Pop (1931) 4635.

Ketch Small coasting vessel fore and aft rigged. It has, in addition to a mainmast, a mizen mast placed in front of the rudder. A similar rig is adapted for some kinds of yachts.

Ketch Jack Public executioner. He lived in the time of Charles II and in 1662 was appointed public executioner. He executed Lord William Russell, the Duke of Monmouth and other convicted persons. He died in 1686.

Ketchup Sauce or relish. It is prepared chiefly from mushrooms, tomatoes or green walnuts, salted and spiced, steeped in vinegar, and boiled. It is also spelt catsup.

Ketley Village of Shropshire. It is 2 m. from Wellington and has a station on the G.W. Rly. The chief industry is coal mining. Pop 2200.

Ketones Series of organic compounds. They result from the oxidation of secondary alcohols, and, unlike the nearly related aldehydes, do not possess reducing properties. Acetone is, industrially, the most important, being used as a solvent in several manufacturing processes. Other ketones occur as constituents of various essential oils.

Kett Robert. English agitator Born about 1500, he lived at Wymondham where he became a tanner. He took the lead against the enclosure of common lands. In 1549, with his brother, William, he marched with the rebels to Norwich and in July encamped on Mousehold Heath, where, sitting under a tree, he held courts and heard complaints from the people around. They got possession of Norwich, but on Aug. 26 the rebel force was destroyed by troops under the Earl of Warwick. The Ketts were taken and hanged, Robert being put to death in Norwich, Dec. 7, 1549, after a trial in London.

Kettering Urban district and market town of Northamptonshire. It is 72 m. from London and 14 from Northampton, on the L.M.S. Rly. Wickstead Park is a public recreation ground. The chief industry is the manufacture of boots and shoes. Pop. (1931) 31,220.

Kettle Hole Natural cavity resembling a kettle's interior. They are due to scouring by detrital materials in eddy currents of water and are found in rocks. Examples occur in Switzerland, Norway and North America.

Kew Suburb of London. It is on the Surrey side of the Thames, 10 m. from London, and forms part of the borough of Richmond. A modern bridge connects it with Brentford. Kew Green is an open space and St Anne's is the chief church. At Kew is the observatory maintained by the Meteorological Office.

Kew is chiefly known for its palace and gardens. The palace was bought by George III. in 1781 and was, for some time, a royal residence. In 1899 it was opened to the public.

Kew Gardens, originally the gardens of the palace and known as the Royal Botanic Gardens, are the chief botanical gardens in England. They cover 288 acres. During and since the 18th century many foreign plants were introduced, and the collection has become quite remarkable. In 1841 the gardens were opened to the public. In the grounds are four museums, the Chinese Pagoda, the Herbarium, Palm House and laboratories. The gardens come under the control of the Ministry of Agriculture as the centre for research into plant life and its possibilities.

Key In architecture a term applied to the central stone (keystone) at the apex of an arch, locking together the component parts.

A key is also an instrument for manipulating the bolt of a lock, and a tool for turning a nut.

In music a key is a system of sounds related to one certain sound or keynote, and also the lever which raises the hammer in a pianoforte or covers the sound-holes in a flute, etc.

Keyes Sir Roger John Brownlow. English sailor. Born in 1872, he entered the navy in 1885. He served for a time as a naval attaché and had commanded submarines when the Great War began. He served both in the North Sea and in the operations against the Dardanelles and in 1917 was made Commander of the Dover Patrol. He was responsible for the raids, in April, 1918, on Zeebrugge and Ostend, being rewarded with a knighthood. At the peace he was given £10,000 and made a baronet. In 1919 Keyes was chosen Commander of the Battle Cruiser Squadron of the Atlantic Fleet, in 1921 he became deputy-chief of the naval staff, in

1925 commander-in-chief in the Mediterranean and in 1929 commander-in-chief at Portsmouth. In 1930 he was made an admiral of the fleet. He struck his flag in 1931. He was elected M.P. for North Portsmouth in 1934, and again at the general election of Nov., 1935. In May, 1935, he was placed on the Retired List.

Keyham District of Plymouth. It stands on the Hamoaze, on the G.W. Rly. and consists chiefly of buildings associated with the naval dockyard. Here is the college at which students are trained to become engineer officers in the navy, accommodating about 350 pupils.

Keyne Welsh saint. She lived as a hermit near Bristol where legend identifies certain local fossils with snakes petrified by her prayers. Another tradition claims her for Cornwall where a well, bearing her name, exists. She lived about 485.

Keynes John Maynard. English economist. Born at Cambridge, June 5, 1883, he entered the civil service in 1906 and served in the India Office and the Treasury. In 1919 he represented the Treasury at the Peace Conference in Paris, but soon after he left the service and wrote a criticism of the conference in *The Economic Consequences of the Peace*. He then became bursar of King's College, Cambridge, and chairman of the National Mutual Life Assurance Co. Since 1912 he has edited *The Economic Journal*. In 1926 he published *The End of Laissez Faire* and in 1930 declared in favour of a tariff on imported goods. Another of his books is *A Treatise on Money*, and in 1931 he published *Essays in Persuasion*. Keynes married the Russian dancer, Lydia Lopokova.

Keys House of. One of the two branches of the legislature of the Isle of Man. It consists of 24 members, who are elected by men and women electors, for seven years. With the council or upper house, it forms the parliament of the island called the Court of Tynwald.

Keyserling Hermann. German writer and philosopher. Born in Estonia, July 21, 1880. He went to several universities, including Heidelberg, and spent several years in the study of science and philosophy. In 1908 he inherited his father's Russian estates and the title of count, but lost the former during the revolution of 1917. He settled at Darmstadt where, in 1920, he founded the School of Wisdom. After having spent much time in travel, he expressed his philosophy of life in the book which made him famous, and which has been translated into English, *The Travel Diary of a Philosopher*, 1925.

Khaki Indian word meaning dust-coloured and denoting various fabrics used for clothing for soldiers. It was first worn by soldiers in India in 1848 and during the Mutiny came further into use. Owing to its useful colour, it was introduced into the British Army during the war with the Boers, 1899-1902. Khaki then became the official field service uniform for almost all the troops and has been adopted by other armies.

Khalifa Title borne by the arch-leader Abdullah el Taashi. He first appeared as one of the advisers of the Mahdi and a leader of those who objected to Egyptian authority in the Sudan. In 1885 he succeeded to the Mahdi's position and ruling the tribes there, he maintained himself at Khartoum and

then at Omdurman until 1898. In September of that year his forces were utterly defeated by the British and Egyptians under Kitchener. He escaped, but on Nov. 24, 1899, was again defeated and killed.

Khan Title used in Asia. It means lord or master and was first used by the Mongol, Jenghiz Khan.

Kharkov Capital of the Ukraine. It is 250 m. from Kiev and is one of the most important trading and manufacturing centres in Russia. Well served by railways, it has a trade in wheat and wool and many manufactures. Its fairs are notable, and it has a broadcasting station (937.5 M., 20 kW.) Pop. 417,200.

Khartoum City and capital of the Anglo-Egyptian Sudan. It stands at the junction of the Blue and the White Nile, 1356 m. from Cairo. It is connected by railway with Shellal, on the Nile with Port Sudan, on the Red Sea and with El Obeid. The city proper lies between the White Nile and the Blue Nile, with a suburb across the latter. Away to the east is Omdurman. Khartoum was founded in 1822 and destroyed by the Arabs in 1885. Taken by the British in 1898, it was laid out and rebuilt on modern lines. The buildings include the Anglican Cathedral and the Gordon Memorial College. Pop. 50,403.

Khedive Title borne before 1914 by the ruler of Egypt. A Persian name meaning prince, it was given in 1807 by the Sultan of Turkey to his vassal, Ismail Pasha. In 1914 Turkish rule in Egypt ended and the Khedive was deposed; the ruler's title was then changed to Sultan, and in 1922 the sultan was proclaimed king.

Kherson Town of Ukraine. 90 m. from Odessa, it stands on the Dnieper, being a river port. There are some manufactures and a trade in timber, hides, etc. Pop. 58,800. Another Kherson is 2 m. from Sevastopol in the Crimea.

Khiva City of the Soviet Republic of Uzbekistan. It is 470 m. from Tashkent and is an important trading centre. At one time it was the capital of a khanate, which lay to the north of the Sea of Aral and covered some 24,000 sq. m. It became Russian in 1873. After the Great War it passed under the rule of Bolsheviks and was for a time the capital of a small Soviet republic. Pop. 20,000.

Khyber Pass Rocky defile leading from Afghanistan into India. It is 33 m. long and is now the main road from Kabul into the North West Frontier Province. The railway has recently been continued from Jannard 11 m. west of Peshawar to Landi Kotal overlooking the Afghanisthan plains. There was fighting in the pass between the British and the Afghans in 1839-42 and again in 1879-80.

Kiao Chau District in the Province of Shantung, China. In 1898 Germany secured from China the lease of some 200 sq. m. here on account of the murder of two German missionaries. On this was built the port of Tientsin which was strongly fortified. On Nov. 7, 1914 after a siege it was taken by the Japanese and British. The district was ruled by Japan until 1922 when it was returned to China.

Kicking Horse Pass Crossing in the Rocky Mts. in Canada. Situated on the eastern boundary of British Columbia 5296 ft. above

sea level, west of Banff, Alberta, it is traversed by the main line of the Canadian Pacific Railway. The Kicking Horse or Wapta River flows through it.

Kidbrooke District of London. It is in the borough of Greenwich, on the S. Rly. 7 m. from the city. Here is a station of the Royal Air Force.

Kidd Benjamin. British sociologist. Born Sept. 9, 1858, after being a clerk in the Civil Service he travelled in America and Canada in 1898, studying economics, and in 1902 did the same in South Africa. In 1904 he published *Social Evolution*, which was translated into many languages including Chinese. He has also written *The Control of the Tropics* (1898) and *Principles of Western Civilization* (1902). He died at Croydon, Oct. 2, 1916.

Kidd William. Scottish pirate. He was probably born at Greenock about 1600 and became a sailor seeing a good deal of service on board a privateer in American waters. In 1696 he himself obtained command of a privateer intended to prey upon French commerce, but soon he turned pirate and, in the *Adventure*, did a great deal of damage to English and other shipping. In 1699 he was captured at Boston and sent to England where he was tried and sentenced as a pirate. He was hanged May 23, 1701.

Kidderminster Borough and market town of Worcestershire. It stands on the Stour, near where it falls into the Severn, 15 m. from Worcester and 135 m. from London and is reached by the G. W. Rly. The chief industry is the manufacture of carpets. The town has memorials to Richard Baxter and Rowland Hill. Pop. (1931) 28,914.

Kidnapping Forebly carrying away a human being, especially a child. Originally applied to stealing persons for the plantations in North America, it is now used for stealing a child. It is an offence in Great Britain under a law of 1861, punishable by penal servitude. Legally it is known as abduction.

Kidney Organ of the body comprising a pair of glands in the abdomen, close to the diaphragm and the spine. It eliminates the blood's waste nitrogenous matter in the form of urea and other saline substances dissolved in water. It is bean shaped and purplish brown in colour. The two kidneys have abundant nerves, blood vessels and lymphatics besides filtering and secreting tubes. These normally pass through the duct into the adult bladder 50 oz. or 2½ pints of urine in 24 hours.

The kidneys are subject to a number of diseases, among them Bright's disease and renal calculus.

The kidneys of the lamb, sheep and other animals are articles of human diet.

Kidron Watercourse and torrent hod in Palestine. Rising between Jerusalem and Olivet it was the Brook Cedron of John xviii. It traverses a wild magnificent gorge Wady en Nar or the "Valley of Fire" and ends in the Dead Sea. During most of the year it is dry.

Kidsgrove Urban district and market town of Staffordshire. It is 6 m. from Stoke on Trent and 153 m. from London on the L. M. S. Rly. It is also served by the Trent and Mersey Canal. Coal mining is the chief industry. Pop. (1931) 2937.

Kidwelly Borough and market town of Carmarthenshire. It stands on the little River Gwendraeth, near where it falls into Carmarthon Bay, and is 9 m from Llanelli and 217 from London. The chief industry is the making of tinplate and around are coal mines. Pop (1931) 3161.

Kiel Town and seaport of Germany, on Kiel Bay, an opening of the Baltic, and 70 m from Hamburg. It owes its importance to its position at one end of the ship canal, and was, before the Great War, one of the chief stations of the German Fleet. The palace dates from the 16th century and the university from the 17th, but modern buildings have been erected for the latter.

The harbour was much improved after Kiel became Prussian in 1866. It was strongly fortified, but by the Peace Treaty of 1919 the defences were destroyed and the naval establishments turned to commercial uses. It has large shipbuilding yards and huge docks, as well as flour mills and printing works. Fishing is another industry and it is a pleasure resort, its annual regatta being a noted event. There is a large trade in agricultural produce. Kiel was part of Holstein until 1866 and the residence of the dukes of Holstein for many years. It has a broadcasting station (232.2 M., 0.25 kW). Pop 213,880.

Kiel Canal Ship canal. Out through the peninsula of Jutland, it connects the North Sea and the Baltic. Begun in 1887 and finished in 1895 it was deepened between 1909 and 1914 to take the largest vessels. Its length is 81 m and its depth 45 ft. Kiel is at one end of the canal and Brunsbüttel, on the Elbe, at the other, and there are huge docks at Brunsbüttel and Holtenau. By the treaty of 1919 the canal is open on equal terms to the ships of all nations that are at peace with Germany.

Kieselguhr Material used in making dynamite and some kinds of soap, as a polishing powder, and as packing for articles requiring to be fireproof. Consisting of the remains of diatoms, it is almost wholly silica and is found deposited in certain freshwater lakes in Scotland, Sweden, Germany, and North America, as a greyish or brownish material, sometimes called diatomite.

Kiev Town of Ukraine. It stands on the Dnieper, where it is joined by the Desna, 280 m from Odessa. There are some manufactures and a large trade in cattle, timber and agricultural produce. An old city, Kiev was at one time the chief town of the principality of Kiev. It was taken by Russia in 1686. During the Great War it was seized by the Germans and later by the Poles. It has a broadcasting station (1034 M., 36 kW). Pop 514,000.

Kikuyu Village and district of Kenya, East Africa. The village is 15 m from Nairobi and is notable because of a conference of missionaries held here in June, 1913. Various Protestant denominations were represented and joined in a communion service celebrated by two Anglican bishops. The Bishop of Zanzibar protested and the Archbishop of Canterbury consulted his colleagues on the matter. After a conference he decided, in 1915, that the two bishops had acted irregularly in giving communion to those who were outside the Anglican Church. He laid it down, however, that this could be done if the bishop of the diocese consented.

Kilbirnie Town of Ayrshire. It is on the River Garnock, 20 m from Glasgow, and is reached by the L.M.S. Rly. The chief industry is engineering. There are ruins of a castle, at one time a seat of the Earl of Crawford. Near is Kilbirnie Loch. Pop. 8032.

Kilbride Town of Ayrshire. It stands near the coast, with a station on the L.M.S. Rly., 4 m from Ardrossan. On the coast is a little watering place called Seamill. Pop 2400.

Kilbrido, which means the Church of S. Bride, is properly West Kilbride. East Kilbride is a town of Lanarkshire. There is also a Kilbride in Skye.

Kilburn District of London. To the north-west of the city, it is partly in Hampstead and partly in Willesden. In the 18th century a spa called Kilburn Wells existed here. The district includes Kilburn Park.

Kildare County of the Irish Free State. It is in Leinster, wholly inland, and covers 654 sq m. The rivers are the Liffey, Boyne and Barrow, and it is served by the Gt. S. Rlys., and the main Irish canals. Kildare is the county town, others being Maynooth, Naas, Athy and Newbridge. The county contains the Curragh and much of the Bog of Allen. It has some ruins, notably those of Monastererevan. Pop (1926) 58,028.

Kildare St. is a thoroughfare in Dublin. In it is the Kildare St. Club, the most famous of Irish clubs, founded in 1788.

Kildare Market town of Kildare, also the county town. It is 30 m from Dublin, on the Gt. S. Rlys. Pop 2116.

Kildare Earl of. See FITZGERALD.

Kilimanjaro Mountain of Tanganyika Territory, East Africa. It is an extinct volcano with two peaks. Kibo, the higher, being 19,325 ft., Mawenzi, the lower one, lying about 7 m to the west. The lower part is a dense forest, the higher portion is covered with snow and glaciers. The top of the mountain was first reached in 1899, in 1927 the ascent was first made by a woman.

Kilkee Watering place of Co. Clare, Ireland. It is 8 m from Kilrush, on the Gt. S. Rlys. The place is visited for the bathing and the scenery. Near are the ruins of Dunleeky Castle. Pop 1700.

Kilkenny County of the Irish Free State. Wholly inland, it is in Leinster and covers 796 sq m. Kilkenny is the county town, other places are Castlecomer, Callan and Thomastown. The rivers are the Barrow, Suir and Nore. The county is level except for a few hills in the north, and the soil mainly fertile. Agriculture is the chief industry, a little coal and marble being mined. Pop (1926) 71,000.

Kilkenny City and market town of Kilkenny, also the county town, and the seat of the Bishop of Ossory. It stands on the Nore, 81 m from Dublin by the Gt. S. Rlys. The town is divided by a small stream called the Bogen into two parts, one Irish and one English. Overlooking the city is the castle, the residence of the Marquess of Ormonde. In the neighbourhood are some monastic ruins and the restored Black Abbey. The industries include marble works and flour mills, and there is an agricultural trade. Pop 10,050.

Killaloe City of Co. Clare, Irish Free State. It stands on the Shannon 17 m. from Limerick. Across the Shannon is Ballina, a bridge linking the two places. The town is visited for the fishing. Pop 900.

Killarney Market town and urban district of Co. Kerry, Irish Free State. It is 46 m. from Cork, on the Gt. S. Rlys. Killarney House, the seat of the Earl of Kenmare, has beautiful gardens. Pop 5300.

Near the town are the Lakes of Killarney, one of Ireland's beauty spots. They are three in number—the upper, middle and lower. The largest is 4 m. long. The middle one is sometimes called Muckross. Between the upper and middle lakes is the meeting of the waters, really a rapid. The river Flesk flows into the lakes and the River Laune flows out of them. There are several islands including Ross and Innisfallen, the latter once a famous seat of learning. Objects of interest are the ruins of Ross Castle and Muckross Abbey. Near are the Gap of Dunloe and many beauty spots.

Another Killarney is a town of Queensland. It is near the border of New South Wales. Pop 1500.

Killiecrankie Pass in Perthshire. It is nearly 2 m. in length. The River Garry and a road go through the pass where, on July 17, 1689, Viscount Dundee and his Highlanders defeated an English force, 4000 strong. Dundee, however, was killed in the fight.

Killigrew Thomas, English dramatist. Born in London, Feb. 7, 1612, he was a son of Sir Robert Killigrew. He grew up at the court of James I. and Charles I. and became known later by his play *The Parson's Wedding*. In 1673 he was made Master of the Revels to Charles II. He built a theatre in Drury Lane, London. Killigrew died March 19, 1683, and was buried in Westminster Abbey. Altogether he published nine plays and in them women were first allowed to appear on the London stage.

Killingworth District of Northumbria. It is 6 m. from Newcastle, on the L.N.E. Rly. and is a coal mining centre. Pop 10,600.

Killyleagh Seaport of Co. Down, Northern Ireland. It is 4 m. from Crossgar, on Strangford Lough. Linen is made here. Pop 1500.

Kilmacolm Watering place of Ross-shire. It is on the Firth of Clyde 8 m. from Greenock, by the L.M.S. Rly. Here is a hydropathic establishment. Pop 5300.

Kilmainham District of Dublin. To the west of the city, it has two famous buildings. One is the prison built about 1850 and used for political prisoners. In 1852, C. S. Parnell, when in prison here, made the so-called Kilmainham Treaty with the British Government represented by Captain O'Shea. He agreed in return for his release to assist the authorities to pacify Ireland. He and his colleagues were released but the treaty had no other issue because of the resignation of the Irish Secretary, W. E. Forster and the murder of his successor, Lord F. Cavendish. The other building is the hospital. This was built from designs by Sir C. Wren in 1675-79 and was long used as a home for old soldiers.

Kilmarnock Burgh and market town of Ayrshire. It stands on a tributary of the Irvine, called Kilmarnock Water, 22 m. from Glasgow, by the L.M.S. Rly. Its industries are engineering works and the making of boots, curtains, etc., and there is an agricultural trade. There is a Burns Museum in Kay Park and a Burns Memorial. The burgh includes Riccarton. At one time Kilmarnock was noted for the woollen bonnets made here and named after the town. Pop 35,000.

The title of Earl of Kilmarnock was borne by the family of Boyd from 1661 to 1746. The Boyds owned land in Ayrshire and had a castle at Kilmarnock. William, the 4th earl, was taken prisoner at Culloden, and was executed, Aug. 18, 1746. The title then became extinct. The title of Viscount Kilmarnock is now borne by the eldest son of the Earl of Erroll (q.v.).

Kilmore Name of several places in Ireland. The most important is 2 m. from Cavan, which has both a Protestant and Roman Catholic bishop. Another Kilmore is in Mayo.

The title of Earl of Kilmore has been borne since 1822 by the family of Needham, who had lands in Co. Down. In 1625 Sir Robert Needham was made a viscount and in 1822 the 12th viscount was made an earl. The family seat is Mourne Park, Newry, and the earl's eldest son is called Viscount Newry.

Kiln Structure designed for burning, baking or drying materials. In the lime kiln type, the material comes into contact with the fuel, broken limestone and fuel being fed at the top of the kiln and a red heat maintained for some hours, or continuously in some cases. In another type, the furnace is either beneath or surrounds an oven in which the material is baked or fired. Of this type are brick kilns, pottery and hop kilns. The hop kiln or oast house is provided with a funnel shaped top which can be turned according to the direction of the wind.

Kilo Greek word for 1000. It is much used in the metric system as in kilogramme, 1000 grammes, kilolitre, 1000 litres and kilowatt, 1000 watts.

Kilometre Measure of length of the metric system. It is equal to 1000 metres or 10 hectometres, and its abbreviation is kilo or km. Its equivalent in British measure is 0.62137 of a mile, nearly 1094 yards. Countries which have adopted the metric system (i.e., France, Belgium) show road distances in kilometres. The square kilometre is equivalent to 247 acres or 0.3861 of a square mile.

Kilpatrick Old town of Dumfriesshire. It is on the Clyde, 10 m. from Glasgow, on the L.M.S. Rly. Legend says S. Patrick was born here. New, or East Kilpatrick, 6 m. from Glasgow is a suburb of that city. Its other name is Beardsen. The Kilpatrick Hills are in the counties of Dumfriesshire and Stirling.

Kilrush Urban district, market town and seaport of Co. Clare, Irish Free State. It is 27 m. from Ennis. There is a harbour and some shipping and fishing. Pop 3700.

Kilsyth Burgh of Stirlingshire. It is 13 m. from Glasgow, on the L.N.E. Rly. The chief industry is coal mining. A range of hills near is called the Kilsyth Hills. Pop (1931) 7551.

Near Kilsyth a battle was fought between the Royalists under Montrose and the Covenanters, Aug 15, 1645. The Royalists were victorious.

Kilt Garment worn sometimes by men in the Highlands of Scotland. Part of the traditional dress of the Highlander, it is really a skirt reaching to the knee, made of tartan, each clan having its own coloured pattern. It is worn by the Highland regiments of the British Army. The kilt is also part of the national dress of Ireland and attempts have been made to revive its use there.

Kilwinning Burgh of Ayrshire. It stands on the Garnock, 24 m from Glasgow, on the LMS Rly. The industries include engineering works and woollen mills. Kilwinning is famous for its archers and as an early home of freemasonry. Its annual archery festival is described in *Old Mortality*. Pop (1931) 5324.

Kimberley Name of two English villages. One is in Nottinghamshire, 7 m from Nottingham, on the LNE Rly. The chief industries are coal mining and brewing. Pop 5200.

The other Kimberley is in Norfolk, 4 m from Wymondham. Near is Kimberley Park, the seat of the Earl of Kimberley.

Kimberley City of the Cape Province, South Africa. It is in the west of the province, 540 m. by railway from Capetown, and is the most important place in a wide district. The museum contains a fine collection of Bushman art and there is an art gallery. It includes Beaconsfield and Kenilworth. Kimberley owes its existence to the diamond mines, the working of which is the city's main industry. The first was opened in 1870. Pop 40,000.

In Oct., 1899, the Boers began to besiege Kimberley, which was held by a small British force until relieved on Feb 15, 1900. The bulk of the defenders belonged to the Loyal N Lancashire Regiment and the Kimberley Light Horse. Memorial Hill is a reminder of the siege.

Kimberley Earl of English title borne by the family of Wodehouse. John Wodehouse, a member of an old and influential Norfolk family, was born Jan 7, 1826, and educated at Eton and Christ Church, Oxford. In 1846 he succeeded his grandfather as Baron Wodehouse.

In politics a Liberal, he was Under-Secretary for Foreign Affairs, 1852-56 and 1859-61. In 1864-66 he was Lord-Lieutenant of Ireland. From 1868-70, having been made an earl in 1866, he was Lord Privy Seal, and in 1870-74 was Secretary for the Colonies. In 1880-82 he was again Secretary for the Colonies and in 1882-85 and 1886 Secretary for India. From 1892-94 he was again Secretary for India and from 1894-95 Foreign Secretary. He was leader of the Liberal Party in the House of Lords from 1896 until his death, April 8, 1902. His son, John, became the 2nd earl.

Kimbolton Market town of Huntingdonshire. It is 10 m from Huntingdon, on the LMS Rly. It is named after the little River Kym, which flows by it. Pop 900.

Kimmeridgian Term used in geology. Applied to the dark bluish clay found in Dorset, Yorkshire and other English counties, it is a subdivision of the Jurassic system and belongs to the Upper

Oolite series. The name is that of a village in Dorset near which the clay is found. Many fossils have been found in it.

Kimono Japanese garment with sleeves out in one piece with the gown. It is long and loose and is confined by a sash.

Kin Relationship by blood. The term next of kin is much used in English law. In case of death the next of kin has certain duties. The property of a person who dies intestate is divided among his kinsfolk, according to certain rules. See **INTESTATE**.

Kincardineshire County of Scotland. It is in the east of the country with a coastline on the North Sea, stretching from Aberdeen to Montrose. Its area is 382 sq m. In the north are deer forests and grouse moors, in the south is the district called Strathmore and in the west and in the centre are the Grampians. Stonehaven is the county town, other places are Inverbervie, Banohory and Laurencekirk. Agriculture is the chief industry, but the only fertile soil is in the valleys. There is some fishing. The county is sometimes called the Mearns. Pop (1931) 39,864.

Kindergarten German word meaning children's garden. It is used for the system of educating young children, introduced by G W Froebel (q.v.). The system provides time for play and allows the child to exercise its creative faculties in a number of ways. In England the first kindergarten was opened in London about 1850, and soon they were found all over the land, often as departments of schools for girls.

For Kindergarten Teachers courses are provided at the Froebel Educational Institute Training College, Grove House, Southampton Lane, SW 15; Maria Grey Training College, Salisbury Road, NW 6; The Training College, Bedford, and at certain of the two-year Training Colleges special courses in junior work are provided.

Kinderscout Hill in Derbyshire. Near Edale, it is the highest point of the Peak District, being 2088 ft. It is a grouse moor.

Kindersley Sir Robert Molesworth. English banker. Born Nov 21, 1872, the son of a soldier, he was educated at Repton. He entered a banking firm and became Chairman of Lazard Bros & Co., and a Director of the Bank of England. During the war period he was Chairman of the National War Savings Committee, and after its conclusion was constantly called to advise the British Government. He represented Great Britain when the Dawes Plan was arranged in 1924, and on other important occasions.

Kinematics Section of mechanics dealing with pure motion, that is, motion without reference to mass or force. It is concerned with direction, acceleration, velocity and composition of motion, and brings into the range of consideration the ideas of time and space in relation to motion. In many ways the distinction between kinematics and dynamics becomes somewhat arbitrary and artificial. Applied kinematics is a theory of mechanics dealing with the conversion of reciprocal into circular motion in an engine.

Kinetics Branch of the science of dynamics that treats of the

motion of forces upon the motion of bodies and of the nature of motion itself. Newton's laws of motion, and the fundamental laws by which gravitation and planetary movements are explained, and the theory of vibrations are included under kinetics. The application of kinetics to matter in a gaseous state is termed the Kinetic Theory of Gases.

Kineton Village of Warwickshire. It is 9 m from Stratford on Avon, on the Gt. Western Rly. At one time Kineton was a market town. Pop 1000.

King Name used for a ruler. It was given to the rulers who governed the little states that grew up in England in Anglo-Saxon times and was used as a translation of the Latin word *rex*. There were kings in Greece and Rome and later many of the European countries called their rulers by an equivalent of this word, such as *roi* and *konig*.

The early kings were elected, often perhaps from a narrow circle, but later the office became hereditary. Hereditary kingship became the rule in England, Scotland, France, Spain, Portugal, Hungary and Bohemia. Poland retained an elective king. In 1700 the ruler of Brandenburg was made King of Prussia and later the rulers of other German states, Saxony and Bavaria among them, were given the title of king. A king was given to the Netherlands in 1815 and later in the 19th century kings arose in Greece, Rumania, Bulgaria and other parts of the Balkan area, and in Italy. The German kings disappeared after the Great War and in 1931 the King of Spain was deposed. France ceased to be a kingdom in 1852, when Napoleon III declared himself emperor.

Some kings are kings of the people, e.g., the King of the Hellenes and Louis Philippe when King of the French. Others, such as England are kings of the land. To day, king is used very generally as a term for a ruler. The old tribal rulers in Ireland are referred to as kings and the word is also used for chiefs in Africa and Asia.

King Edward English bishop. He was born Dec. 20, 1829, a son of the Archbishop of Rochester. Educated at Oxford, he was ordained in 1854 and served as a curate. From 1855 to 1873 he was at the Theological College at Cuddesden first as chaplain and then as principal. In 1873 he was chosen Professor of Pastoral Theology at Oxford and Canon of Christ Church and from 1885 until his death, March 8, 1910, he was Bishop of Lincoln.

King was a prominent High Churchman who exercised a great influence over the students under his care and was remarkable for his personal piety. He is chiefly known for the case in which he was prosecuted before the Archbishop of Canterbury for permitting illegal ceremonial in church. The result was the so-called Lincoln Judgment that laid down the law of the Church of England about these matters.

King William Lyen Mackenzie Canadian politician. Born Dec. 17, 1874, at Berlin, Ontario, he was educated for the law. In 1900 he entered the Ministry of Labour at Ottawa and for eight years was a civil servant. In 1908 King was elected an M.P. and from 1909-11 he was Minister of Labour under Sir Wilfrid Laurier. In 1919 on Laurier's death he was chosen leader of the Liberal Party and in 1921 he became Prime Minister and Secretary for External Affairs. He left office early in 1926, but soon returned and was again Premier and Secretary for External Affairs 1926-30.

In 1930 his party was defeated and he resigned. Since 1926 he had sat in the House of Commons as one of the members for Saskatchewan. King attended the Imperial Conference in 1925. In Oct., 1935, he again became Prime Minister. His writings are chiefly on industrial subjects, on which he is an authority.

King Bird Name of various American flycatchers. The males during the breeding season, resist pugnaciously the approach of large birds, even eagles. The commonest are the ashly grey *Tyrannus carolinensis*, a summer migrant to Canada, and the grey, West Indian peteberry (*T. princeps dominicensis*), which is larger, darker and fiercer still.

King Charles Spaniel Breed of toy dog which became fashionable in Charles I's reign. Derived from the cocker spaniel, there are two favourite strains, the glossy black and tan and the chestnut red ruby. The dog has a short muzzle, wide eyes upturned nose, long, silky coat and drooping ears. The tri-colour Prince Charles is black white and tan.

King Edward VII Land

District in the Antarctic Ocean. It lies to the south east of Ross Sea nearly 2000 m. due south of New Zealand. It was touched at by Sir John Ross in 1842, but was not named until 1902, when R. F. Scott visited it.

Kingfisher Large family of birds allied to the hornbills. With large heads, long straight bills and small feet they are often brilliantly coloured. The common kingfisher, *Alcedo ispida* is Britain's handsomest bird. The female lays two clutches of round, white eggs on unclean nests of disgorged fishbones hurrowed in river banks. It lives mainly on fish, but some species live on insects and reptiles. The much larger North American belted kingfisher rarely straggles to Britain. See LAUGHING JACKASS.

King George V Land District in the Antarctic regions. Its coastline was explored in 1911-14. It lies between Adelle Land and Oates Land and is nearly 2000 m. due south of New Zealand. It belongs to Great Britain.

Kinghorn Burgh of Fifeshire. It stands on the Firth of Forth. A monument marks the spot where, in 1286, King Alexander III was killed by falling from his horse. Pop (1931) 2001.

Kinglake Alexander William English historian and traveller. Born at Tannton, Aug. 5, 1809, he was educated at Eton and Cambridge, and was called to the Bar in 1837. He travelled throughout the East, and recorded his impressions in *Easton* (1844). He went to the Crimea in 1854, and at Lord Raglan's suggestion wrote an elaborate *History of the Crimean War*, upon which eight volumes he worked until 1887. He was M.P. for Bridgewater, 1857-08 and died Jan. 2, 1891.

King of Arms Name of a high official in heraldry. It dates from about 1400 and there are now in the British Islands four kings of arms one for each of the great orders of knighthood. Garter, principal king of arms is the herald of the Order of the Garter. Bath King of Arms is the herald of the Order of the Bath. The others are the Lord Lyon King of Arms in Scotland, and Ulster king of Arms in Ireland,

who act for the Order of the Thistle and the Order of S. Patrick

King Oscar Land District of British North America. It is the south-western part of Ellesmere Island and a British possession, although named after a Swedish king.

King Oscar II Land is in the Antarctic. It lies between Weddell Sea and Bellingshausen Sea, with Graham Land to the south. It was visited and named by the Swedish explorer, Nordenskiöld, in 1902.

King Post Vertical beam at the apex of a pair of rafters, connected at its lower end to the tie beam. Struts project diagonally to the centres of the principal rafters when necessary. This is the normal construction in roofs and bridge girders for spans up to 30 ft.; in wider spans two queen-posts usually replace the king post.

Kings Books of Two books of the Old Testament. They give a history of the Jewish kings from the time of Solomon to the end of the monarchy. The author is unknown; tradition mentions Jeremiah.

The first two chapters of 1 Kings describe the death of David, thus continuing the second book of Samuel and the reign of Solomon. From 1 Kings xii to 2 Kings xvii the division of the country into Israel and Judah down to the time of the captivity is outlined; the final chapters of 2 Kings describe the Jewish kingdom to the fall of Jerusalem.

King's Bench Division

In England one of the three divisions of the High Court of Justice. It was at first the court held by the king, who, with the judges, sat on benches. It was held at first wherever he happened to be, but after a time was fixed at Westminster. Judges from this court went round the country to try offenders in the king's name, as they do to-day. In 1873 the court was reorganised and it now consists of 17 or 18 judges, with the Lord Chief Justice at its head. All criminal cases of importance come before these judges, as do civil cases except those concerned with chancery, probate, divorce and admiralty matters.

Kingsbury Urban district of Middlesex. Between Dollis Hill and Wembley Park, it is 7 m N.W. of London and is served by the Met Rly. Pop (1931) 16,636.

Another Kingsbury is a village in Warwickshire. It is 124 m from London, on the LMS Rly. Pop 1000.

Kingsclere Town of Hampshire. It is 9 m from Basingstoke. Here is a famous training stable for race horses. The chief industry is brewing. Pop 2500.

King's College Name given to various English colleges. King's College, Cambridge, was founded in 1441 by Henry VI. It is under a provost and has a close connection with Eton. It is noted for its chapel, one of the finest examples of Perpendicular architecture in existence.

King's College, London, is part of the University of London. It was founded in 1829 and the buildings are between the Strand and the Embankment. It is under a principal. Offshoots of the college are King's College for Women with buildings in the Strand and on Campden Hill, Kensington; King's College School, now at Wimbledon; and King's

College Hospital, which has a fine range of buildings at Denmark Hill. The college was reorganised in 1908, when these branches were made independent.

Another King's College is a university at Halifax, Nova Scotia. It was opened at Windsor in 1790 and remained there until 1923 when the buildings having been destroyed by fire in 1920, it was removed to Halifax. It then became associated with Dalhousie University.

King's Counsel In England, Scotland and Ireland a barrister, or advocate of superior rank. Any barrister can become a king's counsel on the recommendation of the Lord Chancellor or, in Scotland, of the Lord Justice General. He wears a silk gown and the act of becoming a king's counsel is called taking silk. He sits within the bar and cannot appear in a case unless a junior barrister appears with him.

King's County Former name of the county of the Irish Free State now known as Offaly (qv).

King's Cross District of London. It is in the borough of St. Pancras, where the Euston Road, Gray's Inn Road, Caledonian Road and other main thoroughfares meet. Here is one of the great London railway stations, now part of the L.N.E. system. King's Cross has also stations on the Met and tube railways. The district was formerly called Battle Bridge. In 1836 a monument to George IV and William IV was erected here and the present name taken. The monument was pulled down in 1845.

King's Cup Name of a prize offered to competitors in yachting and air races. For yachting the cup is given to the winner of a race at Cowes. For aviation it is awarded every year to the winner of an aeroplane race over a course of 700 or 750 miles. The aviation cup was instituted in 1922 and in 1930 was won for the first time by a woman, Miss Winifred Brown. In 1932 Capt. W. L. Hope won it for the third time. The winner in 1935 was Fl.-Lieut. T. Rose.

King's Evidence Name given to a criminal who gives evidence against those associated with him in his offence.

King's Evil Name given in olden times to scrofula (qv) owing to the belief that sufferers from this disease could be cured by the touch of the king.

Kingsford-Smith Sir Charles E. Australian airman. Born Feb. 9, 1897, in 1928 he piloted the *Southern Cross* in the first trans-Pacific flight. Later he flew from Australia to England (1929) and from Ireland to America (1930) and in 1933 he flew from England to Australia in 7 days. He also made the first west to east Pacific crossing from Australia (1934), and was the first airman to fly round the world. He was knighted in 1932. In Nov. 1935, while attempting another England-Australia flight, he was reported missing in the Burma region, and all search for him and his companion proved in vain.

King's Inn Headquarters of the bar in the Irish Free State. It is conducted very much on the lines of the Inns of Court in London and dates from 1400 or earlier. It derives its name from the fact that Henry VIII was its patron. The building in Henrietta St., Dublin, was erected in 1800.

Kingsley Charles. English clergyman and writer. The son of a

clergyman, he was born at Holme, Devon, June 12, 1819, and educated at King's College, London, and Magdaleno College, Cambridge. In 1844 he became curate and then vicar of Eversley. In 1860-69 he was Professor of Modern History at Cambridge and in 1873 Canon of Westminster. He kept his living at Eversley until his death there, Jan. 23, 1875.

Kingsley was a writer of vigorous healthy stories including *Westward Ho* and *Hereward the Wake*. Other novels, *Allan Locke*, *Yeast* and *Hyppatia* deal with social and religious problems. He also wrote a good deal of poetry, including *The Saint's Tragedy*, and two of the world's great books for children, *Heroes and Walter Babies*. An early advocate of social reform, he was associated with the Christian Socialist movement. He wrote many articles under the name of Parson Lot.

Kingsley's daughter, Mary St. Leger, wrote novels under the name of Lucas Malet. They include *The Wages of Sin* and *Sir Richard Calmady*. She married the Rev. W. Harrison, rector of Clovelly, and died Oct. 27, 1931, at 79. Kingsley's younger brother, Henry Kingsley, also won a reputation as a writer. For a time he worked in the gold mines in Australia and was later a war correspondent. His novels include *Geoffrey Hamlyn*, *Ravenshoe* and *The Hylars and the Burtens*. He died May 24, 1876.

Kingsley Mary Henrietta English tra-
veller. A daughter of G. H. Kingsley, who was a brother of Charles Kingsley, she was born in London, Oct. 13, 1862. Her intrepid journeys in the Dark Continent are described in her *Travels in West Africa*, 1897. She died at Simonstown, S. Africa, while engaged in nursing, June 3, 1900.

King's Lynn Borough, seaport and market town of Norfolk. It is near the mouth of the Great Ouse and is reached by a joint line of the L.M.S. and L.N.E.R. One of the oldest seaports in England, it is full of historic interest. Its old guildhall contains some priceless relics. As a seaport Lynn has lost ground partly owing to the closing of the river channels by sand. There is, however, some shipping while fishing and rope making are other industries. Until 1918, King's Lynn or Lynn Regis sent one member to Parliament. Fanny Burney was born here. Pop. (1931) 20,580.

King's Messenger Name of four officials in the royal household. Their duties are to carry despatches to ambassadors and other persons in high position. Their badge is a silver greyhound.

King's Prize Prize for rifle shooting. It was first given in 1860 and until 1901 was called the Queen's Prize. The amount is £250, and it is awarded every year being open to members of the forces throughout the empire. The shooting, which is at various ranges, first took place at Wimbledon, but since 1890 it has been at Bisley. In 1930 it was won for the first time by a woman Miss M. E. Foster, and in 1931 A. G. Fulton created a record by winning it for the third time. In 1935 the winner was Ar. Sgt. F. S. French late Herts. Yco.

King's Proctor In England a high legal official. His business is to watch divorce cases in the public interest and to prevent collusion. His offices are at 12 Old Queen Street, Westminster S.W. 1.

King's Regulations Regulations issued under the authority of the king relating to the British navy, army and air force, covering their general organisation, seniority, leave, ceremonies, discipline, correspondence, financial and other returns, relations with the authorities in foreign places and in the dominions, etc.

King's Speech Address with which the king or his deputy opens each session of Parliament. It is prepared by the Government, and in it their programme for the coming session is outlined. It is read to both Houses assembled in the House of Lords and after a vote of an address of thanks is sent to his Majesty. There are similar speeches in the Parliaments of Canada, Australia, New Zealand and South Africa where the Governor General takes the place of the king.

Kingston Name of several places in England. Most are distinguished by an additional word, or words as Kingston-upon-Hull, commonly called Hull (q.v.) and Kingston-upon-Thames. A smaller example is Kingston Laey in Dorset.

Kingston-on-Soar is a village of Nottinghamshire. It is on the Soar, 10 m. from Nottingham, on the L.M.S. Rly. Here is the Midland Agricultural College. Kingston Hall is the seat of Lord Belper.

Kingston City and seaport of Ontario. It stands at the eastern end of Lake Ontario at the mouth of the Cataraqui River, 175 m. from Montreal. It is reached by both the C.P.R. and C.N.R., and is connected with Ottawa by the Rideau Canal. Flour milling and shipping, for which there are large docks, are prominent industries. Steamers go from here to other places on the Great Lakes and the St. Lawrence. Kingston occupies the site of Fort Frontenac, a frontier post. It was named after George III., and from 1841-44 was the capital of the country. Pop. 25,000.

Kingston City, seaport and capital of Jamaica. It stands on the south-east coast and has a good harbour. Kingston is a big trading centre and has a good deal of shipping. It is well served by railways. In 1907 great damage was done by an earthquake. Pop. 62,700.

Kingston Duke of. English title held from 1715-1773 by the family of Pierrepont. In 1627, Robert Pierrepont, a member of an old Nottinghamshire family, was made Viscount Newark, and in 1628 Earl of Kingston. In 1706 Evelyn Pierrepont, the 5th earl, was made Marquess of Dorchester and in 1715 Duke of Kingston. He was succeeded by his grandson, upon whose death in 1773 the titles became extinct. The estates passed to a nephew, Charles Meadows who took the name of Pierrepont and was created Earl of Mansfield in 1806. The duke's seat was Thoresby, near Mansfield.

An Irish title of Earl of Kingston has been borne by the family of King since 1768. The family seat is Killynann Castle in Roscommon, and the earl's eldest son is called Viscount Kingsborough.

Kingston William Henry Giles English writer. Born in London, Feb. 28, 1814, he was the son of a merchant who lived in Oporto. His first success came with his story for boys, *Peter the Whaler*, in 1851, and soon he became one of the most popular writers of adventure stories. Among them were *The Three Midshipmen* and *The Three Admirals*.

Over 150 others including *From Powder Monkey to Admiral*, which ran as a serial in the *Boy's Own Paper*. He died Aug 5, 1880.

Kingston-upon-Thames

Borough and market town of Surrey, also the county town. It is a boating centre on the Thames, 12 m from London, on the S Rly. Saxon kings were crowned here and the coronation stone is a feature of the market place. The industries include brewing. There is a fine church. Kingston Hill is a favourite residential area. Pop (1931) 39,052.

Kingstown Seaport of the Irish Free State, called by the Irish, *Dun Laoghaire*. It is on Dublin Bay, 6 m from Dublin, on the Gt S Rlys. Mail steamers run twice daily between Kingstown and Holyhead. There is a good harbour with two long and massive piers. Kingstown is also a pleasure resort and an urban district. The name of Kingstown was given to the place in 1821 when George IV landed here. Pop 19,000.

Kingstown is also the name of the capital of St Vincent, Windward Islands.

Kingswood Urban district of Gloucestershire. It is practically a suburb of Bristol and is a coal mining area. Pop (1931) 13,297.

Another Kingswood is a district in Surrey. It is 22 m from London, on the S Rly. A third Kingswood is a village in Gloucestershire.

Kingussie Pleasure resort of Inverness-shire. It is on the Spey, 46 m from Inverness, on the LMS Rly. Pop 1200.

King William's Town Town of Cape Province, S Africa. It stands on the Buffalo, 42 m from East London. The centre of an agricultural area, it has a botanic garden and is known locally as King. Pop (1931) 6542 (European).

Kinkajou Small cat-like mammal *Cercopithecus caudivolvulus*. It is known also as the Tree-Bear, and belongs to the raccoon family. A native of Central and S America, it is covered with soft, yellow brown fur, and its tail is long and prehensile.

Kinmel Park Estate in Denbighshire. It is 4 m from Rhyl. During the Great War a camp was formed here and in 1919 this became a demobilisation centre. In 1929 the house and grounds were bought for a public school which aims at training boys for commercial life.

Kinnaird Baron Scottish title borne by the family of Kinnaird. Sir G P Kinnaird, M P, became the first baron in 1882. The 11th baron, Arthur Fitzgerald Kinnaird, who succeeded to the title in 1887, was a prominent footballer and a leader of the Frankelical Party, being president both of the Y M C A. and the Football Association. The family seat is Rosie Priory in Perthshire.

Kinnoul Earl of Scottish title borne by the family of Hay. Sir George Hay, Lord High Chancellor, was made an earl in 1633. The family seat is Balhousie Castle, Perthshire and the earl's eldest son is called Viscount Dupplin.

Kino Gum of commercial and medical value. One kind is obtained from a tree that grows in India and another from an African tree. It is obtained by cutting the bark, and comes out dark red in colour. It is

soluble in alcohol. Being an astringent, kino is used in tanning and dyeing, especially the dyeing of cotton. It is also used in making wine and in a gargle for the throat.

Kinross Burgh and county town of Kinross-shire. It stands on Loch Leven and is on the L N E Rly. Pop (1931) 2525.

Kinross-shire County of Scotland between Fifeshire and Perthshire. It has an area of 82 sq m. In the county is Loch Leven. Kinross is the county town. Except in the south the surface is flat. The chief river is the Devon. The county joins with a division of Perthshire to send a member to Parliament. Pop (1931) 7454.

Kinsale Urban district, market town and seaport of Cork, Irish Free State. It is 24 m from Cork by the Gt S Rlys. Fishing is the chief industry. Kinsale Harbour, which is really the estuary of the Bandon River, is a fine and protected sheet of water. Pop 2750.

Off the Old Head of Kinsale, a headland to the S W, the *Lusitania* was sunk in 1915.

Kintyre District of Argyllshire, sometimes spelled Cantyre. It is a peninsula in the south of the county, between the Firth of Clyde and the Atlantic. It is 38 m long and at its southern point, called the Mull of Kintyre, is a lighthouse. The coast of Antrim is only 13 m away.

Kipchak Central Asian nomads of Altaian stock, more or less mongolised. Found mostly in the Soviet Republic of Uzbekistan, they comprise both the middle horde of the Kirghiz-Kazaks, descended from the mediaeval White Horde, and the Kazan Tartars descended from the Golden Horde.

Kipling Rudyard English writer. He was born in Bombay, Dec 30, 1865, son of John Lockwood Kipling. He was sent to England and went to the United Services College, Westward Ho! In 1882 he returned to India.

In 1881 Kipling published a volume called *Schoolboy Lyrics*, but more important was the journalistic work he did between 1882 and 1890. This gave him a wide knowledge of Anglo-Indian and Indian life. In 1885 he contributed short stories to the *Civil and Military Gazette* at Lahore, and for a library of books issued by the firm of Wheeler, at Allahabad, he wrote many others. These are contained in the volumes *Plain Tales from the Hills*, *Soldiers Three*, *The Story of the Gadsbys*, *Wee Willie Winkie*, *The Phantom Rickshaw*, *Under the Deodars* and *The City of Dreadful Night*. The stories revealed Indian life to English readers in a new light, and on them the foundations of Kipling's fame were securely laid. In 1890 he published a powerful novel, *The Light that Failed*.

In the next 40 years, after he left India, Kipling was very busy, and the high quality of his work placed him in the forefront of English men of letters. His books are on a great variety of subjects, but each displays his uniquely individual touch. *From Sea to Sea* contains impressions of his travels. His verses are in *Barrack Room Ballads*, *The Seven Seas*, *The Five Nations* and *The Years Between*. His two *Jungle Books* are remarkable productions, and with them may be mentioned *Puck of Pook's Hill* and *Rewards and Fairies*, both written for children.

Volumes of short stories followed his early

ones *Life's Handicap* and *Many Inventions* are chiefly Anglo-Indian in subject matter. Later came *The Day's Work*, *Traffics and Discoveries*, *Actions and Reactions*, *Debts and Credits*, *A Diversity of Creatures* and *A Book of Words*. *Stalky and Co.* relates the story of his school days, *Sea Warfare* deals with episodes in the Great War, on which he wrote other volumes *Kim* a novel, and the *Just So Stories* are almost as good as his best work. He wrote also *The History of the Irish Guards*, and with C. R. L. Fletcher *A History of England*. In 1930 he published *Thy Servant a Dog*, and in 1932 a new volume of stories *Faints and Rencials*. In 1922 he was elected Rector of St. Andrews University, and delivered an address on Independence. His many honours included the Nobel Prize for literature in 1907. He died in Jan., 1938, and was buried in Westminster Abbey.

In 1802 he had married Caroline Balestier, and settled in Sussex. Their only son, John Lockwood Kipling, an officer in the Irish Guards, was killed in the Great War.

Kipper Originally a male salmon, dried and cured. The word is now used for a herring split open and smoked.

Kirghiz Soviet republic in Asia. It is a district around the Sea of Aral and east of the boundary between Europe and Asia. It is divided into Kara Kalpakia and Kirghizia. The capital is Frunze. It covers 95,000 sq. m. and its population is 907,500. The republic, which is federated to the union at Moscow, was created in 1927. The name is that of the Kirghiz, a Mongol people who have long lived in this part of Asia.

Kirjath Hebrew word for "city" occur ring in several Biblical place names. Kirjath-jearim, the city of woods also called Kirjath-baal, is near Bethshemesh and was the resting place of the Ark of the Covenant before the Temple was completed at Jerusalem (1 Sam. vi, 1 Chr. xiii). Kirjath-sannah and Kirjath-sepher were older names for the Canaanite town Debai, north of Beersheba (Josh. xv). See HEBRON.

Kirkburton Urban district of Yorkshire (W.R.). It is 6 m. from Huddersfield, on the L.M.S. Rly. The chief industries are woollen mills and coal mines. Pop. (1931) 3184.

Kirkby in Ashfield Urban district of Nottinghamshire. It is a coal mining centre, on the L.M.S. and L.N.E. Rlys. Pop. (1931) 17,708. Adjoining is Kirkby Bentinck, a new mining centre on the L.M.S. line.

Kirkby Lonsdale Market town and urban district of Westmorland. It stands on the Lune, 12 m. from Kendal, on the L.M.S. Rly. The bridge across the river dates from the 14th century. The town is the town of *Jane Eyre*. Pop. (1931) 1370.

Kirkby Moorside Market town of Yorkshire (N.R.). It stands on the Dove, 20 m. from Whitby, on the L.N.E. Rly. The town is an agricultural centre. Pop. 1605.

Kirkby Stephen Market town of Westmorland. It stands on the river Eden, 10 m. from Appleby, on the L.M.S. Rly. Agricultural fairs are held. Pop. 1510.

Kirkcaldy Burgh, seaport and market town of Fife-shire. It stands

on the Firth of Forth, 26 m. from Edinburgh, on the L.N.E. Rly. The chief street of the burgh is 4 m. long and Kirkcaldy is known as the 'lang town'. The industries include the manufacture of linoleum, oldcloth and linen, there is also some shipping for which there are modern docks. Adam Smith was born here. Pop. (1931) 43,874.

Kirkcudbright Burgh, seaport and market town of Kirkcudbrightshire, also the county town. It stands at the mouth of the Dee, 30 m. from Dumfries on the L.M.S. Rly. A fine bridge crosses the Dee, and there is a good harbour on Kirkcudbright Bay. Pop. (1931) 2311.

Kirkcudbrightshire County of Scotland. It is in the south west, covers 900 sq. m., and has a long coast line on the Solway Firth. Kirkcudbright is the county town, other places are Newton Stewart and Castle Douglas. Most of the area is mountains. The Dee, Cree, Ken and Ure are the chief rivers and there are a number of lochs and much picturesque scenery. Agriculture is the principal industry. The county was ruled by the great family of Douglas, who had a castle at Threave. Later the Kings of Scotland appointed a steward to look after it, and this post was held by the Maxwells until 1747. Hence it is sometimes called the Stewartry. It unites with Wigtonshire to send a member to Parliament. Pop. (1931) 30,341.

Kirkdale Village of Yorkshire (W.R.). It is 8 m. from Plokerling. There is a Saxon church. In a cave discovered here in 1821 have been found the fossilised bones of the rhinoceros, and other animals extinct in Great Britain. Another Kirkdale is a suburb of Liverpool.

Kirke Percy English soldier. Born about 1610, he fought in the war against France. After serving in 1681-4 at Tangier, of which for a time he was Governor, he raised a regiment (now the Royal West Surreys) which fought at Sedgemoor, and in Ireland for William III. The men were called Kirke's Lambs, because of the lamb on the regimental badge, and their cruelty after Sedgemoor made these lambs notorious. Kirke died at Brussels in Oct., 1691.

Kirkham Urban district and market town of Lancashire. A cotton and flax manufacturing centre. It is 8 m. from Preston, on the L.M.S. Rly. Pop. (1931) 4031.

Another Kirkham is a village of Yorkshire (F.R.). It is on the Derwent, 16 m. from York, on the L.N.E. Rly. The remains of an abbey, now public property, include the gatehouse and the cloisters.

Kirkheaton Urban district of Yorkshire (W.R.). It is 2 m. from Huddersfield on the L.M.S. Rly. Woollen goods are manufactured. Pop. (1931) 2610.

Kirkintilloch Burgh of Dumbartonshire. It is 8 m. from Glasgow and is served by the L.N.E. Rly. and a canal. There are iron founding and chemical industries. Pop. (1931) 11,817.

Kirk Kilisse Town of Greece. In Turkey before 1918, it is 30 m. from Edirne (Adrianople), on the railway to Istanbul. In Oct., 1912, during the first Balkan war, it was the scene of a decisive Bulgarian victory over the Turks.

Kirkliston Town of Linlithgowshire. It is 9 m. from Edinburgh, on

the L N E Rly The little river Almond passes it The chief industry is distilling and oil mining Pop 3700

Kirkoswald Village of Cumberland It is on the Eden, 15 m from Carlisle Another Kirkoswald, a village in Ayrshire, is associated with Burns and his Tam o' Shanter

Kirkstall Suburb of Leeds Here are the ruins of a famous 12th century Cistercian abbey The remains include the roofless church, chapter house, refectory and other buildings. Kirkstall is on the LMS Rly

Kirkstone Pass in the Lake District It is between Red Screes and Caudale Moor, and is 1500 ft at the top

Kirkwall Burgh and seaport of the Orkney Islands, also the county town It stands on Mainland, or Pomona Pop (1931) 3517

Kirriemuir Burgh of Angus It is 8 m from Forfar, on the L M S Rly Its chief industry is weaving Sir J M Barrie was born here, and it is the Thrums of his stories Pop (1931) 3326

Kirton Town of Lincolnshire It is 4 m from Boston, on the L N E Rly Pop 2400.

It is sometimes called Kirton-in-Holland, to distinguish it from Kirton-in-Lindsey, which is also on the L N E Rly, and 6 m from Brigg Pop 1600

Kish Ancient city in Mesopotamia It was a centre of Akkad culture and recent excavations have revealed a great temple and a cemetery

Kishon River of Palestine It flows through the country to the Mediterranean Sea which it enters near Acre On its banks Sisera was defeated (Judges iv), and the prophets of Baal were killed by order of Elijah (1 Kings xviii)

Kismet Moslem term for fate, or destiny A play by Edward Knoblock (q v), is called *Kismet*

Kitchen Room in a house or hotel where food is prepared It is usually fitted with a range or cooking stove and has shelves, cupboards and other receptacles for crockery In many houses a scullery serves as an adjunct In large hotels the kitchens are great rooms with elaborate fittings Some old kitchens with cooking implements of a bygone age, like that at Christ Church, Oxford, are very interesting In times of need municipal kitchens are opened, where food is supplied free or where poor persons can cook their own food

A kitchen garden is a garden where vegetables and fruit are grown

A kitchen midden is the name given to mounds of domestic refuse left by prehistoric people Anthropologists and archaeologists have made valuable discoveries about early man by examining them

Kitchener City and river port of Ontario Formerly called Berlin, it is 82 m from Toronto, on the C N R. and C P R The electric railways, trams and factories obtain their power from Niagara Furniture is made, sugar is refined and there are agricultural industries Pop (1931) 30,793

Kitchener Earl English soldier Horatio Horbort Kitchener was born in Co Kerry, June 24, 1850, the son of Lieut.-Col H H Kitchener After a course

at Woolwich, he joined the Royal Engineers in 1871 He volunteered to serve in France during the war against Germany but saw no fighting From 1874-78 he was employed by the Palestine Exploration Fund, and from 1878-82 he was surveying in Cyprus In 1882 he became an officer in the Egyptian army, and served in the campaigns in Egypt and the Sudan between that year and 1889, including the expedition for the relief of Gordon

In 1892 Kitchener was made Sirdar, or Commander of the Egyptian Army, and in that capacity did a great work He reorganised the forces and was responsible for the successful expedition to Dongola in 1896, and the victories at the Atbara and Omdurman that destroyed the power of the Mahdi and restored Khertum and the Sudan to British influence He was made a baron and granted £30,000 In Dec. 1899, Kitchener left Egypt to serve as chief of the staff to Lord Roberts in S Africa He helped to change the fortunes of the struggle with the Boers, and, having succeeded Roberts as commander-in-chief, finished the war and assisted in making peace He was then made a viscount and given £50,000 and the Order of Merit From 1902-09 he was commander-in-chief in India, where he left his mark upon the organisation of the army

In 1911 Kitchener returned to Egypt, this time as agent and Consul-General, and he was holding that position in 1914, although he was temporarily in England On Aug 5, having been made an earl, he was appointed Secretary for War, and he set to work to raise the force known as Kitchener's Army In 1915, not altogether comfortable in his position (for, while seeing from the first the gravity of the outlook, he, like others, failed to grasp some of the essential and novel features of the tremendous struggle), he permitted some of his duties to be transferred to others and on June 5, 1916, he was sent on a mission to Russia On the same evening his ship, the *Hampshire*, was lost, some say she struck a mine, and Kitchener was among the drowned

Kitchener was unmarried and his titles and also his residence, Broome Park, Kent, passed to his elder brother, Henry Elliott Chevallier Kitchener (b 1846), whose eldest son, called Viscount Broome, died in 1928

There are various memorials to Kitchener, one being in St Paul's Cathedral, another on the Horse Guards Parade, London, and a third at Marwick Head, near where he was drowned Money raised by a national fund was devoted to founding scholarships of £150 a year These are to train young men for commercial life and were at first given to those who had served in the Great War

Kite Sub family of birds of prey, particularly the common glee or red kite of Europe and N Africa This has reddish-brown plumage, but is now almost extinct in Britain It is about 24 in long and feeds on small birds and insects The black kite, a rare visitant, and the Egyptian and Indian pariah kites are useful scavengers

Kittiwake Bird belonging to the gull family In colour it is white with a yellow bill It is found chiefly in the N Atlantic, breeding in Greenland and Spitzbergen (Svalbard), and visits the coasts of Britain Occasionally it breeds in Britain It feeds on fish and makes its nest in the cliffs A variety with red legs is found in the N. Pacific The young kittiwake is called a tarroch

Kiwi New Zealand bird (*Apteryx*) There are three species, *A. mantelli*, *A. au-*

trails and *A. owenii*. They are rare and nocturnal, brown in colour with a long beak and only rudimentary wings, laying very large eggs for their size, which is about that of the common fowl.

Kleptomania Form of aberration exhibited in an uncontrollable propensity to steal. It sometimes attends epileptic insanity.

Klerksdorp Town of the Transvaal, S. Africa. It is 29 m. by railway from Potchefstroom, and is the oldest Boer settlement in the Transvaal. A stream divides the old village from the new town. Around the town are gold mines, and it is also an agricultural centre with important cattle markets. Near are irrigation works. Pop. (1931) 3600 (European).

Klip River of Natal, S. Africa. It rises in the Drakensberg Mountains and joins the Tugela near Ladysmith. The district around Ladysmith is called the Klip River district.

Klipspringer Small variety of antelope. It is found in Africa, especially in rocky districts, and is an exceptionally good climber. Its name means rock jumper.

Klondyke River of the Yukon Territory, Canada. It joins the Yukon near Dawson City. In 1896 the discovery of gold in the Klondyke and its feeders caused much excitement. The district along the river is also called Klondyke.

Klopstock Friedrich Gottlieb, German poet. Born at Quedlinburg, July 2, 1724, he was educated for the Church at Jena and Leipzig. Instead, however, of becoming a pastor he devoted himself to writing religious poetry. He lived at Copenhagen on a pension granted to him by the King of Denmark and died at Hamburg, March 14, 1803. Klopstock's great work, *Der Messias*, was begun in 1748 and finished in 1773.

Kluck Alexander von, German soldier against Austria in 1866 and against France in 1870-71, being wounded at Metz. In 1900 he became a general. In 1914, when he was inspector general of the three army corps centred in Berlin, he was given command of the army that invaded Belgium. He entered Brussels, won other victories and marched towards Paris. He was attacked on the Marne and driven back to the Aisne, where his army entrenched itself. In 1916 he retired, and in 1920 he issued a book translated into English as *The March on Paris*.

Knacker (Icelandic *knakkr*, a saddle). Dealer who traffics in old or disabled horses. By English law a knacker must kill the horse delivered to him within two days. He is forbidden to work any horse sent to him or to sell it alive, and he must keep a careful record in his books of the animals delivered to him. He must not kill any animal within sight of another animal waiting to be killed, nor must he cut off any of its hair before it is killed.

Knapweed (*Centaurea nigra*). Perennial plant of the order *Compositae*. Found in waste places and on dry meadowland. It is two or three feet in height with hairy stems and small rough leaves. The flower heads which resemble thistles, are bright purple in colour. It is sometimes known as the greater knapweed.

Knaresborough Market town and urban district of Yorkshire (W. R.). It is on the Nidd 4 m. from Harrogate on the L.M.S. Rly. The ruined castle is finely placed above the river. Near the bridge are St. Robert's Chapel, an old shrine, and the Dropping Well. St. Robert's Well is associated with the crime of Eugene Aram. Mother Shipton is also connected with the town. Pop. (1931) 5942.

Knebworth Village of Hertfordshire. It is 25 m. from London, on the L.N.E. Rly. Here is Knebworth House, the seat of the Earl of Lytton. The estate with its extensive grounds has been in the family since about 1500. The eldest son of the Earl of Lytton is called Viscount Knebworth.

Knee Joint Joint in human beings and other animals. It is formed by the femur or thigh bone, the flattened top of the tibia or main bone of the lower leg, and the patella or knee cap. Powerful muscles, specially adapted to maintain man's erect attitude, permit of bending the knee and straightening the leg in a direct line, each movement being accompanied by a slight rotation. The joint is surrounded by a system of strong ligaments, lined with a synovial membrane producing lubricating fluid. Two internal ligaments cross between the two bony prominences at the end of the thigh-bone. Dislocation of the joint is rare, but cartilages may be ruptured or displaced.

Kneller Sir Godfrey, English painter. Born at Lambeth, Aug. 8, 1646, he studied art in Italy and in 1676 settled in London. He was appointed court painter by Charles II., and worked in England until his death. Kneller painted portraits of the ladies of the court of Charles II. and his successors to George I., also Louis XIV. and Peter the Great. He also painted Sir Isaac Newton, and the 48 members of the Kit Kat Club. He was knighted in 1691 and died Oct. 19, 1723.

Kneller Hall, Twickenham, is the headquarters of the Royal Military School of Music.

Knickerbocker Surname, originally Knickerbacker, of a Dutch colonist in New York in the 17th century. From a prominent descendant Washington Irving borrowed the pen name Diedrich Knickerbocker when writing his humorous *History of New York*, 1809.

Knight One who has received the honour of knighthood. The earliest knights were members of an order, such as the knights of the hospital of St. John and the Knights Templars. Others were made knights by the king or other high personage, usually for deeds of valour. The custom grew up of addressing a knight as sir before his Christian name and this is the usual title of all knights unless, as with some members of the great orders of knighthood, they hold a higher one.

There are ten classes of knights, all being created by the sovereign. Three belong to the great orders of knighthood: garter, thistle and St. Patrick, but most of these are peers. Six other orders, Bath, Star of India, St. Michael and St. George, Indian Empire, Royal Victorian Order and Order of the British Empire, consist of knights and members of lower rank such as commanders and companions. The knights are called sir and use the letters G.C.M.G., K.C.B., K.B.E., or others indicating the order and rank. The equivalent of knight in the orders that admit women to

membership is damo The tenth class consists of knights bachelor They belong to no order, but have a society of their own at 21 Old Buildings, Lincoln's Inn, London, W C In 1926 they secured the right to a distinctive badge Persons knighted for services of a civil nature are usually made knights bachelor

The wife of a knight is strictly speaking a dame, but in practice is addressed as lady Knighthood is not hereditary Some Irish chiefs are called by courtesy knights, e.g., the Knight of Kerry, and the title is used by the order of S John of Jerusalem and the Primrose League

Knight Charles English publisher The son of a bookseller and printer, he was born at Windsor, March 15, 1791, and joined his father in business In 1811 they founded a local newspaper which Knight edited until 1821 In 1822 he moved to London and became a publisher He started *Knight's Quarterly Magazine*, but is better known for the cheap literature he issued such as *The Penny Magazine* and *The Penny Cyclopaedia* He worked in association with the Society for the Diffusion of Useful Knowledge and became publisher of *The London Gazette* Knight was also an author and wrote *A Popular History of England* in eight volumes, lives of Shakespeare and Caxton, and the autobiographical *Passages of a Working Life* He died at Addlestone, March 9, 1873

Knight Dame Laura. English artist. A daughter of Charles Johnson of Nottingham, she studied art first at Nottingham and later at S Kensington In 1903 she married a portrait painter, Harold Knight, and in the same year first exhibited at the Royal Academy She was elected A.R.A. in 1927, and in 1929 was made a D.B.E. Her pictures deal chiefly with theatrical subjects and circus life, of which she has made a special study

Knighthood Social and military system that existed in Europe in the Middle Ages Men were made knights in various ways, one of the most usual being by a religious ceremony which included a vigil before an altar prior to taking vows Others were made knights for gallantry on the field of battle

The knights formed a distinct class They fought on horseback and in armour, and were the landowners and aristocrats of their day The system began to decay about 1300 and came to an end a century or so later

The orders of knighthood, however, still survive in England and other monarchical countries and the honour of knighthood is still conferred by sovereigns The senior order is the Order of the Garter The Order of the Golden Fleece, which had an Austrian and a Spanish branch, was the greatest of the European orders of knighthood

Knightlow Hill in Warwickshire Here every year on Nov 11, representatives of the parishes in the hundred of Knightlow meet They stand round a hollow stone on the hill and into this throw the money due from them to the lord of the hundred The steward of the Duke of Buccleuch calls them together and presides over the proceedings

Knighton Market town and urban district of Radnorshire It is on the River Teme, 195 m from London, on the L.M.S. Ry Pop (1931) 1836

Another Knighton is a suburb of Leicester

Knightsbridge Thoroughfare in London It runs

from Hyde Park Corner to Kensington Gore Here are Harrod's Stores, the barracks of the Household Cavalry and Prince's Club

Knight's Fee (or Knight-service). Piece of land, the holder of which in feudal times was responsible for sending knights to serve the king in time of war The obligation varied from time to time, and the relief paid on inheriting one of these fees was 100 shillings

Knights Templars Mediaeval military order It was founded at Jerusalem about 1118 to protect pilgrims to the Holy Sepulchre It was given a home in Jerusalem in a palace called Solomon's Temple

The order soon became rich and powerful Its head was the Grand Master and it was divided into commanderies, each under a governor or master The members were both monks and soldiers and took the vows of chastity, poverty and obedience About 1300 it had 15,000 members and owned a great deal of property The order was very active during the crusading period and fought also against the Moors It was suppressed in 1312 by the Pope

The Templars wore a white mantle with a red cross Their banner was called beauseant, and their motto *Non nobis, Domine, non nobis, sed Nomini Tuo da gloriam* The seal showed two knights riding one horse

Knoblock Edward English dramatist Born in New York, April 7, 1874, Edward Knoblauch was educated at Harvard In 1911 he achieved a notable success in London with his play *Kismet* Another success was *Milestones*, 1912, which, like *London Life*, 1894, he produced in association with Arnold Bennett In 1931, with J.B. Priestley, he dramatised *The Good Companions* In 1916 he was naturalised in England and changed the spelling of his name

Knockaloe Place in the Isle of Man It is south of Peel and here, during the Great War, was a large internment camp for German civilians

Knock-knee Deformity in which, when the lower limbs are straightened, the knees close inwards and the legs diverge It may be due to rickets in young children, and is sometimes remediable by resting in bed, or using splints, or by surgical operation It may also arise from excessive standing or weight-carrying when young

Knockmealdown Range of hills in the Irish Free State It is on the borders of Tipperary and Waterford The highest point is 2600 ft.

Knole Residence of Lord Saokville It is 2 m from Sevenoaks and stands in a large park It contains some magnificent rooms and priceless works of art It was at one time a residence of the Archbishops of Canterbury and of the Earls and Dukes of Dorset (q.v.)

Knollys Name of a notable English family It is descended from Sir Francis Knollys, Lord Mayor of London in the 15th century. Francis Knollys, a member of this family, was born July 16, 1837 He became a court official under Queen Victoria, private secretary to the Prince of Wales, afterwards Edward VII, and was private secretary to George V until 1913, when he resigned

Knighted in 1886, he was made a baron in 1903, and a viscount in 1911. He died Aug 15, 1924.

Knot Nautical measure of speed. A vessel is said to travel so many knots, this meaning a certain distance per hour. A nautical mile is 6080 ft, so if a ship travels 60,800 ft in an hour, she travels at 10 knots. In former times the record was kept by tying knots in a piece of rope.

Another kind of knot is a fastening together of two pieces of rope or string. In addition to the ordinary knot, elaborate kinds are used by sailors and studied by Boy Scouts. These include the clove hitch and the reef knot, the latter being the simple knot tied a second time. Others are the granny knot, the bowline knot, the timber hitch and the blackwall hitch.

A third kind of knot is a portion of wood harder than the rest, found sometimes in tree trunks.

Knot Wading bird of the plover family (*Tringa canutus*). Related to the sandpiper it breeds in the Arctic regions and visits Britain in autumn and winter, haunting marshy flats for molluscs. It was fattened for the table in England in Tudor times. Its average length is about 10 in.

Knottingley Urban district of Yorkshire (W.R.). It is 3 m from Pontefract on the River Aire, on the L.M.S. Rly. It is a river port on the Aire and Calder navigation system, and has some manufactures. Pop (1931) 6842.

Knout Form of whip once used in Russia for the flogging of criminals and political prisoners. It consisted of triangular thongs of hardened leather interwoven with wire and bound together. Applied to the naked flesh it produced terrible wounds, and the results were often fatal. Its use was abolished by the Tsar Nicholas I.

Knowlton Village of Kent. It is 9 m from Canterbury. As the result of a newspaper competition Knowlton was awarded the prize for sending, voluntarily, the highest proportion of its male inhabitants to the Great War. A granite cross records this fact.

Knowsley Residence of the Earl of Derby. It is 8 m from Liverpool. It is a large house standing in a park of 2500 acres and most of it dates from about 1700. The picture gallery is especially fine. The estate came to the Stanleys when, in the 14th century, one of them married the heiress of the Lathoms. In 1831 the Earl of Derby sold 1700 acres of the estate to the Corporation of Liverpool for housing purposes.

Knox John Scottish reformer. He was born near Haddington about 1515 and attended one of the Scottish universities, probably St Andrews. When a priest and tutor in a nobleman's family his friendship with George Wishart led him to join the reformers just after the murder of Cardinal Beaton in 1546. He was taken prisoner by the French when they captured the castle of St. Andrews, and was for a time a galley slave. In Feb., 1549, he was released, at the instance of Edward VI., and during that king's reign he lived in England. He was offered the Bishopric of Rochester made a royal chaplain and assisted in the preparation of the articles in the Prayer Book.

In 1553 Edward died and Knox went to Dieppe and then to Geneva where, as at Frankfurt and elsewhere, he made a name as a preacher. He returned definitely to Scotland

in 1558. The reformers were then in a position of power, and Knox, full of the teaching of Calvin, was seen their leading spirit. He won many adherents by his preaching, but was equally zealous as a politician. He made a treaty with England, now under Elizabeth, gained for himself and his friends the direction of affairs and proceeded to make Protestantism the religion of the country.

In 1561 the young Queen Mary returned to Scotland and quickly roused the anger of Knox, who, however, retained a good deal of power. When Mary fled to England, Knox and his friends were again dominant, but the murder of the Earl of Moray in 1570 was a great blow to them. Knox went to St. Andrews to be among his friends, but returned to Edinburgh to preach once more in St. Giles. He died there. Nov 24, 1572.

Knox was twice married once to Marjory Bowen and secondly to Margaret Stewart. His chief book is his *History of the Reformation in Scotland*. In 1558 at Geneva he wrote *The First Blast of the Trumpet Against the Monstrous Regiment of Women*. Knox was intolerant and a fanatic, but he has left his mark for good on Scotland, the educational system of which owes much to the ideas of his *Book of Discipline*.

Knox Ronald Arbuthnot. English writer. Born Feb 17, 1888, one of the four brilliant sons of Rev. E. A. Knox, Sanskrit scholar and in 1903 21 Bishop of Manchester, he was educated at Eton and Balliol College, Oxford, where he had a fine career. He became fellow and lecturer at Trinity College, and, having joined the Roman Catholic Church, was later made chaplain to the Roman Catholic students in the University. Father Knox has written a good deal of fiction as well as more serious works. His books include *The Viaduct Murder*, *Essays in Salfire*, *Caliban in Grid Street*, and *The Belief of Catholics*.

Knox's oldest brother, Edmund George Valpy Knox (born 1881) was educated at Rugby and Corpus Christi College, Oxford. He joined the staff of *Punch*, and as Evoc became known for his humorous writings, many of which have appeared in book form as *Fancy Now*, *It Occurs to Me*, *Here's Misery* and *The Other Eden*. In 1933 he succeeded Sir Owen Seaman as Editor of *Punch*.

Knucklebones Game very popular in ancient times and the forerunner of dice games. At first played with the knuckle bones of sheep, which were thrown and caught on the back of the hand, it is now played with stones.

Knur and Spell English ball game of medieval origin. It requires a knur or small ball, a steel springed trap or spell, and a stick. The stick, called the pommel, is about 4 ft long with a flexible handle and a head of hardwood. The spring makes the ball rise, whereupon the player hits it with the stick as hard as he can. The longest drive wins.

Knutsford Market town and urban district of Cheshire. It is 15 m from Manchester on the Cheshire Lines Rly. Knutsford is known in fiction as *Cranford*, and Mrs. Gaskell, the authoress of that work, who lived here for many years and died here, was buried in the old Unitarian Graveyard. The name is taken from King Canute. Pop (1931) 5878.

Knutsford Viscount. English title borne by the family of Holland. Henry Thurstall Holland, a son of a physician,

Sir Henry Holland, was born Aug 3, 1825. He went to Harrow and Trinity College, Cambridge and became a barrister. Having been for some years in the Colonial Office, he sat in the House of Commons from 1874 until 1888. In 1885 he was Financial Secretary to the Treasury, in 1886 Vice-President of the Council, and in 1888-92 Secretary for the Colonies. He was made a baron in 1888, and a viscount in 1895. He died Jan 29, 1914.

Knutsford's son and successor, Sydney Holland, the 2nd viscount, was best known for his splendid work for the London hospitals. He was chairman of the London Hospital and devoted his life to collecting funds for its support. He died July 27, 1931, and was succeeded by his brother, Arthur Henry Holland-Hibbert (born 1855), of Munden, Walford, as 3rd viscount.

Koala (*Phascolarctus cinereus*) Native name of a marsupial mammal found only in Australia, it is stout and clumsy, tailless, with ash-grey fur and tufted ears. Living in eucalyptus trees, it feeds on their leaves and tender shoots, occasionally digging for roots, which it stores in its cheek pouches. Its average length is about 2 ft.

Kobe City and seaport of Japan. Sometimes called Hyogo, it is 22 m from Osaka, on the west coast of the Inland Sea. There is a good deal of shipping and the industries include shipbuilding. The city was founded in 1863 and a fine harbour has been built. Pop. (1931) 787,616.

Koch Robert, German scientist. Born Dec 11, 1843, he was educated at the University of Göttingen, and became a doctor. He practised at Hanover, but soon gave his time chiefly to research work, being, in 1880, made a member of the Imperial Board of Health in Berlin. In 1882 he discovered the bacillus of tuberculosis, and a little later the bacilli of cholera and phthisis. In 1885 he was made Professor at Berlin University, and Director of the Institute of Hygiene, and in 1891 Director of the Institute for Infectious Diseases. Later he spent much time in S. Africa in researches into cattle diseases. Tuberculin, or the lymph cure for tuberculosis, was another of Koch's discoveries. On these he wrote several books. In 1905 he received the Nobel prize for medicine, and he died May 28, 1910.

Koh-i-nur Name given to a famous diamond said to have been found at Golconda, India, it originally weighed 186 carats. Formerly in the possession of the Mogul emperors and the later Indian princes, in 1849 it was presented to Queen Victoria, was recut to 106 carats, and now forms one of the British crown jewels.

Kohl Powder used in Egypt for darkening the eyes. It was used by Jezebel (2 Kings ix.).

Kokra Timber obtained from a tree in Burma called *Aporosa dinica*. It is very hard and is used for musical and scientific instruments.

Kola Nut of an African tree, also called gum. It is about the size of a walnut and is very bitter to the taste. It contains a good deal of caffeine and the natives eat it as a stimulant. The tree on which it grows is an evergreen, sometimes 40 ft. high, and bearing pale-yellow flowers.

Kolubara River of Yugoslavia. It rises near Valjevo and flows mainly north to the Save. In Nov. and Dec.,

1914, a battle was fought along its banks between the Austrians, who had invaded Serbia, and the Serbians. It lasted nearly a month, but in the end the Austrians were driven out.

Komati River of S. Africa. It rises in the Transvaal and flows through Swaziland and Mozambique to Delagoa Bay. Its chief tributary is the Crocodile and where the two unite is the village of Komati Poort. This is 58 m from Lourenço Marques.

Komintern The Third, or Communist, International. It is the international organisation of the Communist party of all nations, and was founded in March, 1919. Its chief purpose is to hasten world revolution, and it rejects parliamentarism as a means to this end. It is an association bound together by a common programme and principles. It organises "cells," which work in different places, to the common end, and are subordinated to the party as a whole.

Konia City of Turkey. It is in Asia Minor about 300 m from Izmir (Smyrna). There are manufactures of carpets and silks, and a considerable trade in agricultural produce. The name is sometimes spelled Konia. Pop. 47,495.

Koniggrätz (or Kralové Hradec) City of Czechoslovakia. It is 14 m from Prague. Near is the village of Sadova, after which the Germans called the battle in which they routed the Austrians in 1866. Pop. 13,100.

Königsberg City and river port of E. Prussia. It stands near the mouth of the Pregel, 386 m from Berlin. The university is an old foundation, but has fine modern buildings, among them an observatory and a library. The castle is imposing.

There are large modern docks and the industries include shipbuilding, the manufacture of machinery and chemicals, and the preparation of foodstuffs. The city, which is a railway centre, was founded by the Teutonic Order and later was the capital of the Dukes of Prussia. It has a broadcasting station (217 M., 0.5 kW). Pop. 280,000.

The Königsberg was the name of a German cruiser destroyed in the Ruffi River, E. Africa, in July, 1915.

Koodoo African antelope, *Strepsiceros capensis*. Tawny with vertical white stripes on the sides and reaching 5 ft at the shoulder. It is exceeded in size only by the eland, to which it is allied. The horns, present only in the male, are spirally twisted.

Kootenay River and lake of N. Canada in the Rocky Mountains, but part of its course is in the United States. Entering Canada again it passes through Kootenay Lake to the Columbia river. It is 400 m long.

Kootenay Lake is in the south-east of British Columbia. It is 60 m. long and covers 220 sq. m. Kootenay is also the name of a pass across the Rocky mountains. This is between the provinces of Alberta and British Columbia, just north of the international boundary.

Kopeck Russian coin. It is the hundredth part of a rouble, or nominally something less than a halfpenny.

Kopenick Town of Prussia. It is on an island in the Spree, 10 m. from Berlin. Pop. 31,000.

The Captain of Kopenick was a cobbler.

Wilhelm Voigt. In Oct., 1906, he dressed himself as an army officer, and with an imposing guard, pretended he had come on important business to the burgomaster. He thus obtained a good deal of money, but was soon arrested. He died in 1918.

Kopje Dutch name for the flat round topped elevations that are scattered over the tablelands of S Africa. In the Great Karroo and elsewhere compact lava sheets of geological age have been weathered and fretted into hillocks up to 100 ft high. They greatly influenced operations in the S African War, 1899-1902.

Koran The Sacred book of the Moham medans. It claims to be a divine revelation, communicated through the angel Gabriel at intervals over 23 years to the Prophet Mahomet. At his dictation various scribes wrote them down on scattered fragments of parchment stone, palm ribs and other materials. These were traditionally collected by Zaid at the behest of Mahomet's successor, Abu Bekr, and a definite text was afterwards prepared for the Caliph Othman. Islam's supreme authority on matters of faith, morals and law, the Koran is a rhymed prose rhapsody of 6000 verses. It is divided into 114 *suras*, and opens with the *Fatiha*, the prayer repeated five times daily by all devout Moslems.

Korea District of Asia, also called Chosen. A peninsula on the main land. It was formally annexed by Japan in 1910. It is 600 m long and covers over 85,200 sq m. Its northern boundaries are Feng Tien and Manchuria. On the west is the Yellow Sea, on the east the Sea of Japan. It includes over 1000 islands. The land is forested and mountainous, and the rivers are short and rarely navigable. Seoul, or Keijo fu, is the capital. Other large towns are Fusan fu, Heigo fu (the old capital), and Taikyū fu. Seoul, Chemulpo, Fusan and Gensan are four of several open ports.

Rice, barley, wheat, beans, tobacco and cotton are grown and cattle are reared. Gold, iron ore and coal are mined to a slight extent. Fishing is carried on and fruit is grown. There is a railway system and there are many good roads. The Central Bank is the bank of Chosen. The chief coin is the yen.

The Koreans are physically a fine race with a culture of their own. Their language intermediate between Mongol, Tartar and Japanese, contains many Chinese words, and their written language is a mixture of Chinese and native characters.

HISTORY Korea, whose troubled history goes back 1000 years n.c., was an independent kingdom in the 10th century. Its rulers were called emperors until late in the 19th century, for a great part of which the country was the victim of much unrest. After the devastating invasion of the Japanese in 1902-98 until recent times it was nominally under Chinese suzerainty. This was ended by the China-Japanese War of 1894-5, by which time the Japanese had important trading interests in the peninsula. After the Russo-Japanese War of 1904-5 Korea was virtually a Japanese protectorate until it was formally annexed by Japan in 1910 when a Governor General was appointed and members of the Korean imperial house were given Japanese patents of nobility. Since then its material prosperity has increased considerably. The name is also spelled Corea. Pop. 21,058,403.

Korniloff Lavr Georgievitch Russian soldier. He was born in Siberia the son of a Cossack, and was trained

for the army. He fought for the Boers in S Africa, 1899-05, and served against Japan in 1904-05. During the Great War he saw service and was taken prisoner, but he quickly escaped and as leader of an army took part in the offensive of July, 1917, winning a notable victory over the Austrians. He was then put in charge of all the Russian armies, but quarrels soon broke out between him and Kerensky. He then formed an army in the south of Russia and fought against the Bolsheviks until he was killed in the Caucasus, March 31, 1918.

Kosciusko Mountain of New South Wales, the highest in Australia. It is in the Australian Alps and reaches 7328 ft.

Kosciusko Tadeusz Polish soldier. Born in Lithuania, Feb. 12, 1746, he became a soldier and served in the French Army. He fought for the American colonists against Great Britain, and then led the Poles against the Russians. Following the partition of 1794, he set up a government in Warsaw, but after one or two victories, was defeated by both Prussians and the Russians. He was taken prisoner, but was set free in 1796, and lived in Switzerland. On Oct. 15, 1817, he was killed by his horse falling over a precipice at Solenre.

Kosher Jewish word denoting food or culinary vessels made fit and clean by Talmudic ritual. As Jews are forbidden to swallow blood, beasts are killed for them by their own butchers who sharply sever the windpipe. The meat is soaked in water, salted and washed thrice.

Kosovo District of Yugoslavia. A plain about 50 m long, it is near the frontier of Albania. The name means the field of blackbirds.

In 1389 the sultan, Murad I, defeated the Serbs here, and in 1448 Murad II defeated the Hungarians under Janos Hunyadi. There was fighting here during the Balkan War. In Nov. 1916, the Serbian armies gathered to resist the advance of the Germans. After some hard fighting they were compelled to retreat. Many perished in the cold, but others were rescued by Allied help, and taken to Corfu.

Kossuth Lajos (Louis) Hungarian leader. Born Sept. 19, 1802, he was educated at Budapest and became a lawyer. In 1832 he was elected a member of the diet at Presburg, and was soon prominent among the advocates of political and social reform. For expressing his opinions in a paper he edited he passed three years in prison. Seven years later, in 1847, he became a member of the diet of Hungary, and in 1848 was the recognised leader of the party that demanded independence for the country. His energy raised a national force, and the diet declared for independence with himself as governor, or dictator. The movement failed partly because foreign countries would not assist and in 1849 Kossuth resigned his office and went to Turkey.

For the rest of his days Kossuth was an exile in England where he was received as a hero. His *Memoirs of My Exile* is an English translation of one of his books. He died in Turin, March 20, 1894. He had refused the offer of pardon and had lost his nationality, but his body was taken to Buda for burial.

Kossuth's son, Ferencz Kossuth (1841-1914), was a prominent politician in Hungary from 1895 until his death.

Koumiss Drink made from the milk of the mare and the camel. Obtained by allowing the milk to ferment, it

is drunk by the Tartars and other Asiatic peoples. It has an acid taste, but is serviceable as a diuretic and for other purposes in medicine. It can be made from cow's milk.

Kovno City of Lithuania, also called Kaunas. It is on the Niemen, 60 m from Vilna, and is the capital of the republic pending the recovery of Vilna, which is also claimed by Poland. The city has a number of manufactures, does a considerable trade in grain, etc., and is an important railway junction. There is a large Jewish element in the population. Pop 113,000.

Kowloon Peninsula in China near Hong Kong. It was ceded to Britain in 1860 and is part of the colony. At one time there was here a large city of which only the walls remain. Near its site a new town has been built.

Kraal Collection of huts around a cattle enclosure. It is sometimes stockaded with timber fences or mud walls. Kraals are built by the Kaffirs and Hottentots and the word is also used for similar villages in E. Africa, and sometimes for enclosures for animals.

Krakatoa Volcanic island in the Strait of Sunda. Midway between Sumatra and Java, it covers 18 sq. m. In 1833 an eruption here destroyed 35,000 lives, did great damage and set up world-wide disturbances. Two-thirds of the island disappeared.

Kraken Fabulous sea monster of Scandinavian legend. Supposed to be of enormous size, it has been likened by an old Norwegian writer to an island appearing in the water with arm-like appendages resembling those of an octopus. It is the subject of one of Tennyson's early poems.

Kran Persian coin. It has been replaced as the unit of currency by the rial, which is equivalent in value. It is still in circulation, however, and is worth about 4d.

Krassin Leonid Borisovitch. Russian revolutionary. Born in 1870, he entered business life, but becoming associated with the extremists was, for a time, an exile. He had returned to Russia when the revolution began in 1917, and as one of its leaders he helped to arrange the Treaty of Brest-Litovsk, and became a minister in the new government. In 1920, and again in 1921, he was sent on a trade mission to England, and he represented the Soviet Government in London in 1925-26. He died in London, Nov. 24, 1926.

Kreisler Fritz. Austrian violinist. Born in Vienna, Feb. 2, 1875, he studied in Vienna and Paris, and soon showed exceptional powers. He toured the United States in 1889, and first appeared in London in 1903. He served in the Austrian Army during the Great War and was wounded. He has since made several appearances in London, being regarded as the world's greatest violinist. In 1929 he received the honorary degree of LL.D. from Glasgow University.

Kremlin Russian word for a citadel. The most famous is the kremlin at Moscow. It stands on a hill overlooking the river Moskva, covers about 100 acres, and is surrounded by a wall.

Kriemhild Figure in German legend. A sister of the King of Burgundy, she married Siegfried, King of the Nibelungs. Siegfried was murdered by Hagen and Kriemhild married the King of the Huns. Her life, thenceforward, was devoted to vengeance. She gave a feast to Hagen and

others, this was followed by a fight in which many were killed. After the struggle she killed Hagen with Siegfried's sword, and was then killed by Hildebrand. The story is told in the *Nibelungenlied*, and figures in Wagner's opera sequence *Der Ring des Nibelungen*.

Kris Dagger used by the Malays. It has usually a sinuous blade. The handle is commonly of wood, but some examples are of ivory, with a decorated scabbard.

Krishna Hindu deity. A chieftain in the Mahabharata, he later became Vishnu's eighth avatar or incarnation. His popularity throughout N. India is based on legends, which make him a cowherd lad associated with his favourite mistress Radha. Usually painted blue, he is represented as standing on a snake, sometimes playing a flute, and with four hands.

Krithia Village of Gallipoli. It is about 4 m. from the end of the peninsula, and was the scene of severe fighting in 1915. It was attacked by the British on April 28, but the Turkish defences were too strong for them to reach it. On May 6-8 there was a further attack which also failed, but on June 4, a third attack resulted in the gain of a good deal of ground. Another attack, also partially successful, took place on June 28. A further effort to advance was made in August and on Nov. 15 the Turkish positions were assailed for the last time, successfully, but in the following January Gallipoli was evacuated.

Krone Monetary unit of Norway, Sweden, Denmark and Iceland. The word means crown. It is worth about 1½d and normally 18 go to the £ sterling. It is divided into 100 ore. Before 1925 the krona was the monetary unit of Austria and was also used in Hungary.

Kronstadt Seaport of Soviet Russia. It stands on an island at the mouth of the Neva, 20 m. from Leningrad. It was founded in 1703 as a harbour for the Russian capital, and before the Great War was a naval station, strongly fortified. A canal links it with Leningrad. The dockyard is maintained by the Government. Pop 21,000.

Kronstadt City of Rumania, now known as Brassó or Brasov. Beautifully situated at the foot of the Transylvanian Alps, it was until 1919 in Hungary. The inner town has remains of 16th century fortifications. It is now a banking centre, and has oil refineries and cement works. Pop (1930) 56,234.

Kroonstad Town of the Orange Free State. It is 129 m. from Bloemfontein and is an important railway junction. It is the centre of an agricultural district. Pop (1931) 5639 (European).

Kropotkin Peter Alexievich, Prince. Russian geographer, author and revolutionary. Born at Moscow, Dec. 9, 1842, he entered the Corps of Pages at St. Petersburg in 1857 and in 1862 went with a Siberian Cossack regiment to Siberia, where he carried out two geographical surveys. In 1871 he explored the glacial deposits of Finland and Sweden, and in 1872 he visited Switzerland. Later, becoming an anarchist, he spread nihilist propaganda on his return to Russia. He was several times arrested in Europe, but escaped to England, and settled there, 1883-1917, when he returned to Russia. He died Feb. 8, 1921.

Kru Negro people. They live in scattered communities along the coastland of

Liberia They display an aptitude for seafaring which has led to their contracting as Kru boys for service on vessels navigating the Guinea coast. They practise face marking, tattooing and tooth mutilation. They number over 40,000.

Kruger Stephanus Johannes Paulus Boer politician. Born at Colesburg in Cape Colony, Oct. 10, 1825, he went as a boy into the Transvaal and settled there. In 1880 he was a leader in the revolt against British annexation, and was the active spirit of the provisional government during the war of 1880-81. In 1883 he was elected President, an office he still held when difficulties arose between Great Britain and the Transvaal in 1899. Stubbornly hostile to concessions of any kind, he must bear some of the responsibility for the war that followed. In 1900 he went to the Netherlands, but he was in Switzerland when he died, July 14, 1904. In 1902 he wrote a volume of memoirs. Kruger combined a hard and narrow religious creed with much political subtlety.

Krugersdorp Town of the Transvaal at the western end of the Rand, it is 20 m from Johannesburg. Pop (1931) 13,653 (European).

Krupp German family. Friedrich Krupp, born in 1787, started in business at Essen as a maker of iron and steel in 1812. He died in 1826, and the business was conducted by his son Alfred. He made it a very successful concern and when he died, July 14, 1887, left it to his son Friedrich Alfred Krupp. He died Nov. 22, 1902, leaving an only daughter, Bertha, who married Gustav von Bohlen und Halbach.

The Krupp works made railway material on a large scale, but were best known as armament works. Guns, ammunition, armour plate and other war material were turned out in immense quantities before the Great War. The firm had branches at Annen and elsewhere, and ship-building yards at Kiel. Something like 80,000 men were employed, and for them there were welfare organisations on an elaborate scale. After the Great War the works were devoted to the making of electrical agricultural and other kinds of machinery, as well as railway plant.

Krypton Very rare element having the symbol Kr and atomic weight 82.92. It occurs in extremely minute quantities in the atmosphere and has been found in varied gases given off from the waters of mineral springs. It is distinguished by the bright yellow and green lines in its spectrum.

Kubelik Jan Bohemian violinist. Born July 3, 1880, near Prague, he learned to play from his father, a market gardener. In 1898 he made his debut in Vienna and tours in Europe and the United States made him one of the leading violinists of the day. He married the Countess Czaky Szell.

Kublai Khan Mongol Emperor of China. He was born about 1216 the grandson of Jenghiz Khan. In 1259 he became grand Khan of the Mongols. His great work was the conquest of China which occupied him some 20 years. He then became head of a great Mongol Empire with his capital at Peking where he held a splendid court. Under him Buddhism became the State religion. His empire lasted only until 1368. Kubla Khan was the patron of Marco Polo, and Coleridge wrote a fragmentary poem on him.

Kufah Village of Iraq. It is 90 m to the south of Bagdad. Here the caliphs lived before moving to Bagdad. It gives its name to a script used for the earliest copies of the Koran.

Kufra Group of oases in Libya. They are near the border of Egypt and are the headquarters of the Senussi Caravan routes go across the desert, but few Europeans have visited the district.

Ku Klux Klan American secret society. It was founded in Tennessee in 1865 and developed into an elaborate and organised movement. Its aims were to maintain the purity and dominance of the white race against the negro, and it was soon very strong in the southern states. The head was the grand wizard, other officials were grand dragons, grand giants and grand titans, every member was a ghoul. Terrorism was freely employed. In 1871-72 laws were passed forbidding these secret societies and after a time the Ku Klux Klan disappeared. In 1915 the society was revived in Georgia. Its aims were practically the same, the dominance of the white, or what was called 100 per cent Americanism. Its influence was also directed against Roman Catholicism.

Kumanovo Town of Yugoslavia. It is 20 m from Uskub. In Oct., 1912, the Serbians gained a great victory over the Turks here, the fighting occupying three days. During the Great War the town was taken by the Bulgars in Oct., 1915, and was not regained by the Serbs until Sept., 1918.

Kumasi Chief town of Ashanti, some 160 m from Sekondi on the coast. Pop (1931) 36,284.

In 1874 British troops entered Kumasi and destroyed a good part of the town. Another expedition was sent against it in 1896, when a British resident was installed. In 1900 the British in the town were attacked by the tribesmen, but held out from March till July when they were relieved by a force which met with stubborn resistance. See ASHANTI.

Kummel Name of a popular liqueur. It is made of sweetened spirit flavoured with cumin and caraway seed. The name is the German word for cumin.

Kun Bela Hungarian agitator of Jewish extraction. Born in 1888 he became a lawyer and a journalist. After the Great War, in which he served, he set up a Bolshevik republic in Hungary. This only lasted for a few months. He then went to Russia, but was again agitating in Hungary in 1927.

Kuomintang Political party in China. It is composed of the followers of Sun Yat Sen and stands for a policy of China for the Chinese. It became prominent in 1927, its strength being chiefly in the south of the country.

Kurd People of mixed stock inhabiting the region loosely called Kurdistan. This is now divided among Turkey, Persia and Iraq. The Kurdish population being about 1,500,000. Descended from the Carduchi who opposed Xerophon's retreat in 400 B.C., they are partly settled partly nomadic. They are mainly Mohammedans.

Kurdistan District of Asia Minor. It is part of the Turkish Republic and its chief town is Diarbekir. It lies to the south of Armenia and has the Euphrates

on the west. It is inhabited chiefly by nomads. The boundaries have never been clearly defined.

Kuria Muria Group of five islands off the coast of Arabia. They belong to Great Britain and cover about 22 sq m. They are about 750 m from Aden and on them guano is found. The islands, which serve as a landing place for the Red Sea cable, are peopled by a few Arabs. They are under the control of the Persian Gulf Residency.

Kurile Group of 31 islands off the coast of Japan. Their Japanese name is Chishima and the inhabitants are chiefly fisherfolk. They extend for 150 m, almost to Kamohatka. Area, 3969 sq m. Pop 5000.

Kuroki Count Tamesada Japanese soldier. Born in 1844, he entered the army and won a reputation during the war with China. In 1904 he was given command of an army and he led this to victory over the Russians at the battles of the Yalu and Mukden. He died Feb 4, 1923.

Kuropatkin Alexei Nikolaevitch Russian soldier. Born in 1848, he became an officer and gained experience with the French army in Algeria in 1874. He held a staff appointment in the Russo-Turkish war of 1877-78 and added to his reputation by exploits in Turkistan and Caucasus. In 1898 he became Minister for War and in 1904 was chosen to command the forces against Japan. After the Russian defeat at Mukden he was superseded, but was given another command. He was put in command of a group of armies during the Great War and in 1916 went as governor to Turkistan. Later he was arrested and on Feb 10, 1921, he died in Moscow.

Kut Short name for Kut-el-Amara. A town of Iraq, 290 m from Basra, it is almost encircled by the river Tigris. It was rebuilt after the Great War and has some modern buildings. There is a cemetery for British and Indian soldiers.

A good deal of fighting took place at Kut during the Great War. In Aug, 1915, a British force was sent against the Turks defending it, and a battle took place on Sept 28, the British being victorious. The British, under Sir C. Townshend, then moved farther up the river, but met with defeat at Ctesiphon and fell back on Kut in Nov. Kut was fortified and was soon surrounded by Turkish troops. Between Jan. and April, 1916, several attempts to relieve Kut were made, but failed, and on April 29 when the force was at starvation point, 9000 troops, 6000 being Indians, surrendered. In Jan., 1917, new forces having been collected and put under Sir Stanley Maude, the campaign for its recovery was begun. There was some hard fighting, but on Feb 23, 1917, the town was occupied by the British.

Kuwait State of Arabia. It is on the N W shore of the Persian Gulf and is ruled by a sheikh, or sultan. The chief town is Kuwait. It has a fine harbour and does a fair amount of trade. The sheikh is on friendly terms with the government of India. Pop 50,000.

Kvass Russian alcoholic beverage. It is made by fermenting rye meal, dough or bread, or wheat or barley meal sugar and fruit being added. It contains from 1 to 2 per cent. of alcohol. It is made both commercially and in the home.

Kyd Thomas English dramatist. Born in London in 1558, he was educated at Merchant Taylors' School. His first play, *The Spanish Tragedy* (1584-89), was popular for many years. He later became friendly with Marlowe, and was arrested with him for "blasphemies" and imprisoned until after Marlowe's death, when his patron forsook him. He died in poverty in 1594. *The Spanish Tragedy* was long the best-known play in Europe, and was played as a stock piece in Germany and Holland until the eighteenth century. He also wrote *Solimar and Perseda* (1588) and *Cornelia* (1593-94).

Kyle District of Ayrshire. It lies between the rivers Doon and Irvine and is one of the districts into which the county was at one time divided.

Kylemore Lake or lough of Co. Galway, Irish Free State. It is in the N W of the county, not far from Letterfrack, in the midst of magnificent scenery. There is Kylemore Castle, once a seat of the Duke of Manchester, a fine building decorated with Connemara marble.

Kyles of Bute Sea channel of Scotland. It is about 16 m long, between the county of Argyll and the Island of Bute. It is famous for the scenery along its shores.

Kyneton Town of Victoria, Australia. A mining centre and pleasure resort on the river Campaspe, 53 m from Melbourne. Pop 3400.

Kyoto City of Japan. It is on the Island of Honshu, 27 m from Osaka. Kyoto is an industrial centre with manufactures of fancy goods and artistic ware. It is also an important railway junction and is well supplied with electric power. Pop (1930) 765,142.

Kyrie Eleison Greek invocation translated as *Lord have mercy upon us* and used in religious worship. In the mass it follows the introit and is repeated thrice to each person of the Trinity. *Christe eleison* is the variant used for the second person. In the Church of England it is used at both morning and evening prayer.

Kyrie John English philanthropist. Born at Dymock in Gloucestershire, May 22, 1637, he was educated at Balliol College, Oxford. He passed his life in Ross, Herefordshire, where he had some property and was known as The Man of Ross. He built churches and schools and was prominent in other beneficent work. Pope, who first called him The Man of Ross, and Coleridge praised him in poems. He died Nov 7, 1724.

The Kyrie Society was founded to perpetuate his memory. It exists to benefit the poor and its offices are at 92 Victoria Street, London, S W.

L AAGER In South Africa a protected camp. It was made by arranging the convoy wagons in a circle as was done by the Boers when they were trekking from one part of the country to another.

Laaland Island of the Baltic Sea. It is 447 sq m in extent and lies off the mainland of Holstein. The soil is fertile and much of it is covered with forests.

La Bassée Town of France. It is 16 m from Lille on the canal named after it. A small mining town, it was destroyed during the Great War, but has been rebuilt. It has been adopted by Preston.

Laboratory Place set apart for carrying on scientific experiments. It varies in character and equipment according to the nature of the science. In the teaching of physical science laboratories are essential, also for purposes of research, whether academic or economic. The National Physical Laboratory at Teddington where research and the testing and standardisation of materials are carried out, is an important government laboratory.

Labouchere Henry du Pré English politician and journalist. Born in London, Nov. 19, 1831, he was educated at Eton and Trinity College, Cambridge, and entered the diplomatic service. In 1865 he was elected an M.P., but he soon lost his seat. In 1880, however, he was returned for Northampton and he remained in the House of Commons, one of its most prominent figures, until 1905. During those years he was persistent in his efforts to secure integrity in public life. He died in Florence Jan. 15, 1912.

In 1870 Labouchere, who had done a little writing for *The Daily News* established *Truth*, and to him was due the distinctive feature of that weekly journal, its constant and fearless exposure of impostors and jobbery.

Labour In economics one of the factors in the production of wealth, the others being land and capital. It describes work done on raw material, except that which takes the form of management and direction.

The share of the joint product which should fall to labour in the shape of wages has been the subject of much discussion and many theories. One idea is that labour is a commodity to be bought in the market at the lowest possible price, this being in practice the minimum cost of living. Another view is that labour has the first claim on the product of industry. Tariffs and other factors outside the industrial system also influence wages.

Labour Ministry of Department of the British Government. It was set up in 1916 to deal with matters affecting labour, such as unemployment and arbitration, and is under a minister usually a member of the Cabinet who is assisted by a parliamentary secretary and staff. The offices are at Montagu House, Whitehall, London, S.W. 1.

Labour Day Name given to May 1 in most European cities to hold labour demonstrations. In the United States and Canada

and in some parts of Europe, Labour Day is a national holiday.

Labour Exchange Office established and controlled by the state for the registration of the unemployed, and the adjustment of the supply of labour to the demand. In Great Britain they were established in 1910, but in 1918 the name was changed to Employment Exchange (qv).

Labour Party Political party in Great Britain and other countries. Existing to further the interests of the working classes it arose during the 19th century and became powerful in the 20th. In Great Britain it was first represented in Parliament in 1900.

In 1923 the Labour Party became the official Opposition in the House of Commons, and in 1924 it formed a ministry. This had a short life, but a second Labour Ministry was in power from May 1920, to August, 1931. Then the party split, the majority under Mr. Arthur Henderson forming the Opposition, while a minority supported the National Government of Mr. J. Ramsay MacDonald. In the ensuing General Election (1931) the Labour party was reduced from 265 members to 51, the Unionist party securing no fewer than 471 seats. On Mr. Arthur Henderson's defeat at the 1931 election leadership of the Labour party passed to Mr. George Lansbury. He resigned for health reasons in Oct., 1935, and Major Attlee became chairman till after the General Election in Nov. when he was appointed leader. At that Election 154 Labour members were returned to Parliament as against the National Government total of 431.

The Labour Party holds an annual conference and its headquarters are at Transport House, Smith Square, Westminster, S.W. 1. Associated with it is the Parliamentary Labour Party, all Labour members of Parliament, but the Independent Labour Party is quite distinct.

Labour Parties have obtained political power in other countries, especially Australia. There it has dominated the politics of the several states and has been in power for a considerable portion of the Commonwealth's existence, its leaders being Mr. W. M. Hughes, Mr. A. Fisher and Mr. J. H. Scullin. The Labour Parties in Canada and the United States have not yet secured political power.

Labrador District of North America. The most easterly part of the continent, it consists of a stretch of land along the Atlantic Ocean, from the Gulf of the St. Lawrence to Hudson Bay. The coastline, which is about 1000 m long, is indented with many bays and fringed with many islands. The interior is mountainous, the climate cold and the soil unfertile. The population consists of (1931) 4624, mostly Eskimos, and the only industry is fishing. There are, however, considerable natural resources in the shape of timber and minerals that are still unexploited.

The area of Labrador is about 500,000 sq m, divided between Canada and Newfoundland. In 1927 the Privy Council settled a dispute about the boundary, and 110,000 sq m of the land were given to Newfoundland. This coastal strip is Labrador proper. In 1932 it was stated that Canada was willing to purchase Labrador from Newfoundland.

Labradorite Variety of soda-felspar. It occurs in many igneous rocks, and, owing to its fine play of colours, is used for making cameos and decorative slabs.

La Bruyère Jean de French essayist. Born in Paris, Aug. 16, 1645, he was educated at Orleans University. Called to the Bar in 1673, he became on Bossuet's introduction, tutor to Condé's grandson. In 1688 he published his *Caractères*, sarcastic pictures of well known contemporaries which more than once caused his defeat as candidate for the Academy. His style, like Racine's, is an excellent example of classical French. He died May 10, 1696.

Labuan Island of the East Indies. Situated off the north-west coast of Borneo, it has been British since 1846 and under the control of the Straits Settlement since 1907. Malays form the main element in the population. Agriculture is carried on and there is some export trade. Victoria (pop. 1500) is the capital and has a good harbour. Pop. (1932) 7771.

Laburnum Genus of hardy herbs of the leguminous order. They are natives of southern Europe. The common *L. vulgare*, introduced into England in the 16th century, bears pendulous sprays of yellow pea-like flowers. Purple laburnum is a hybrid of this with an allied species. Scotch laburnum has smooth pods. The wood of the laburnum is used to some extent by cabinet makers.

Labyrinth Name given to an intricate series of passages in a building or underground. The most famous labyrinth was that of Cnossos in Crete, built, according to the legend, by Daedalus. In Egypt, at Hawarah, there are the remains of another renowned labyrinth built by Amenemhat III, and mentioned by Herodotus.

Lac Purple dyestuff used for dyeing leather and silk. It is prepared from the bodies of *Coccus lacca*, an insect occurring on the twigs of *Ficus indica* and other trees in India, China and Japan. The insects secrete the resin known as stick lac, and the dye is obtained by soaking the lac with the insects in water.

Lac (or Lakh) Hindu word for 100,000, but used to describe any great number. A lac of rupees, 100,000, is worth between £6000 and £7000.

Laccadive Group of islands in the Indian Ocean. Situated some 200 m from the Malabar coast, the group consists of 14 islands, 9 of which are inhabited. They are administered by the Madras Presidency. The people, who are mainly Mohammedans, carry on a trade in coconuts and coconut products. Pop. (1931) 16,046.

Laccolith Term used in geology. It is applied to an intrusive igneous rock which has been forced up in a molten state to spread between the overlying strata forming a lenticular mass. Owing to this intrusion the superficial strata have become elevated into a large anticlinal dome, examples of this structure being met with in Utah.

Lace Ornament of silk or cotton used on clothing and for other purposes. Lace is of two kinds, that made by hand and that made by machinery. Both are worked according to designs provided for the worker and some of these are very beautiful. Hand-made lace has been produced for centuries, and various kinds were called after European

cities which specialised in their manufacture. Thus we hear of Venetian, Mechlin and other laces. In England, lace-making flourished in Devonshire and Buckinghamshire, and some beautiful lace was also made in Ireland.

Point lace, in which the Venetians excelled, is not unlike embroidery, the lace pattern being worked upon a fabric foundation. Pillow lace is made by plaiting the threads around bobbins placed on a pillow or frame and arranged to form the required pattern.

In the 18th century lace was first made by machinery, and in the 19th this became a staple industry of Nottingham and its neighbourhood, as well as of Devonshire and parts of Scotland. Other centres were Calais and Plauen.

Machine lace is made on a machine invented by John Leavers, and the laces are named usually after the patterns of hand-made varieties, such as Brussels, Valenciennes, Torchon and Alençon.

In the 20th century the prosperity of this industry dwindled. For five years after the Great War the English manufacturers were protected by a safeguarding duty of 3½ per cent, but this was removed in 1930. Protection was again given, however, when a general tariff on imported manufactures was imposed in 1932. Bleaching is a subsidiary industry.

Lacedaemon In Greece, a name, used interchangeably with Laconia, for the district around Sparta (q.v.).

La Chaise François de French priest. The son of a noble, he was born at Aix, Aug. 25, 1624, and educated at Lyons. He became a member of the Society of Jesus and was appointed in 1674 confessor to Louis XIV, a position which he held until his death, Jan. 20, 1709.

His name is borne by a cemetery in Paris (Père La Chaise), one of the most famous in the world.

Lachine Town of Quebec. It is on Lake St. Louis, really part of the St. Lawrence, 8 m from Montreal. Near are some rapids in the river and the canal cut to avoid them is called the Lachine Canal. There are some manufactures. Lachine has stations on the C.P.R. and C.N.R. Pop. 15,400.

Lachish Ancient city of Palestine. It stood 16 m from Gaza and was a place of importance in early times. The site has been excavated and valuable discoveries made. It is mentioned several times in the Bible, and in Joshua x there is a reference to the King of Lachish.

Lachute Town of Quebec, Canada. It is 44 m from Montreal and is served by the Canadian Pacific Rly. The industries include sawmilling. Pop. 3906.

Lacquer Name given to a resinous varnish which gives a highly polished surface when applied to wood or metal. Japanese lacquer is made from the resinous exudation from the lacquer tree, *Rhus vernicifera*, and is used for cabinets, trays, boxes, etc., giving a very hard and polished coating. Ordinary lacquers are made from shellac dissolved in spirit with the addition of other resins and colouring matter, and are applied to metal and hardened by stoving the articles.

Lacrosse Outdoor ball game. The name is really la crosse, the crosse being the stick used by the player. The game is played on a field about 100 to 150 yds long. The stick is furnished at the end with a net, and the aim of the player is to catch the ball.

in this and then to carry, or hurl, it forward. The ball is of rubber weighing about 4½ oz.

A side consists of 12 players and the aim of each is to get the ball between the goal posts. The players are arranged much as in association football and only goalkeepers may handle the ball. In England to day matches are played between Oxford and Cambridge since 1887 they have been played between north and south and since 1922 there has been a regular county championship. The game is very popular in Canada, whence it was introduced into England.

Lactation Secretion of milk, or the period of suckling an infant. In human beings normal milk appears within two or three days of the birth of the child the average amount being 12 or 16 oz daily. This lasts for about five weeks, after which the amount increases until the child is about eight months old. It then decreases gradually.

Lactic Acid Several organic acids having the formula $\text{CH}_3\text{CHOHCOOH}$. The commonest formed during the souring of milk by bacterial fermentation of milk sugar, is a syrupy liquid, but can be obtained in crystalline form. It occurs also in fermenting vegetable matter and in meat juice.

Lactometer Name given to a type of instrument used in the determination of the quality of milk. There are several forms of lactometers. One is a variety of hydrometer for taking the specific gravity of milk and another is a cylindrical graduated glass vessel which measures the volume of the separated cream.

Lactone Group of colourless liquid compounds soluble in water and alcohol and having usually a faint aromatic odour. They are regarded as intramolecular anhydrides of certain hydroxy acids, and are obtained by the elimination of water from certain hydroxy-carboxylic acids by the action of mineral acids upon the salts of these acids.

Lactose Scientific name for milk sugar occurring in milk. It is less soluble and not so sweet as cane sugar. It does not ferment with yeast but undergoes fermentation with the common mould, *Penicillium glaucum*, forming lactic acid and causing the souring of milk. Lactose is a by-product of the milk industry in Switzerland, New Zealand and elsewhere.

Ladoga Lake of Russia. In the north of the country, it is on the borders of Finland and only a few miles from Leningrad. It covers 7000 sq m being the largest lake in Europe and its length is 125 m. A canal to the Gulf of Finland 30 m away, has been planned.

Ladrones or Mariannes Group of islands in the Pacific Ocean. They are about 1500 m. from the Philippines and are governed by Japan under mandate from the League of Nations except Guam which belongs to the United States. Saipan, Tinian and Rota are the largest of the islands many of which are uninhabited. Coconuts, cotton, tobacco, rice and other tropical products are grown here. Their area is 470 sq m and the population 69,530 of whom 19,635 are natives and the rest Japanese.

Ladybird Large family of beetles (*Coccinellidae*). They have clubbed antennae and apparently three jointed feet. Comprising about 2,000 species the most familiar British species are the red or yellow two spot

and seven-spot. With bodies usually shining and hairless they are economically valuable, because they and their larvae mostly consume scale insects and plant lice.

Ladybrand Town of the Orange Free State. It stands in the mountains of Basutoland about 5000 ft. above sea level. It is connected by railway with Bloomfontein. Pop. (Eur. 1931) 2396.

Lady Chapel Place for the altar of the Virgin Mary in large churches. It was often a separate building, but to day is more usually part of the main structure. There are some very beautiful lady chapels in the English and French cathedrals and churches. A fine example is at Ely but there are many others as in the new cathedral at Liverpool.

Lady Day Name given to March 25. In the Christian calendar it is the day of the annunciation of the Virgin Mary. It is a quarter day in England and Ireland.

Lady's Mantle Flowering herb of the order *rosaceae*. It grows in the northern parts of Europe and Asia. The yellowish flowers grow in clusters.

Ladysmith Town of Natal, Africa. It stands near the Klip River, 190 m. from Durban, with which it is connected by railway. There is a racecourse and a market is held here. Standing about 3000 ft. high the town is visited by invalids. It owes its name to the wife of Sir Harry Smith, at one time Governor of Cape Colony. Pop. (Eur. 1931) 3659.

In 1899 a British force, 12,000 strong under Sir G. White, was besieged here by the Boers. The siege lasted from Nov. 1, 1899, to Feb. 28, 1900 when the relieving force, under Sir Redvers Buller, entered the town.

Lady's Smock (*Cardamine pratensis*) Perennial plant of the cruciferous order. It is found in Great Britain in moist meadows and swampy places in the spring. Its flowers are of the palest lilac or pinkish purple shade borne on stems 12 to 18 in. high. The upper leaves are pinnate with small narrow leaflets. The lower leaves broader and more rounded with a larger terminal leaf. Other names for it are cuckoo flower, and milkmaids.

Laertes In Greek legend, King of Ithaca and the father of Odysseus. He joined in the Calydonian boar hunt and in the expedition of Jason and the Argonauts. He was still alive when Odysseus returned home after his wanderings.

Lafayette Marquis de French statesman. Maria Joseph Paul Yves Roch de Motier was born Sept. 6, 1757, of noble family. In 1777 he went with some followers to help the colonists in America in their struggle with Britain and he served with them throughout the war. In 1789, being again in France he was elected to the states general, and commanded an army when war broke out with Austria but soon quarrelled with the dominant Jacobins and fled from the country. In 1799 he returned to France, and came into prominence after the restoration of the Bourbons. In 1824 Lafayette visited the United States, where he was received as a hero. He died May 20, 1834. Two American cities are named after Lafayette, as is also the Lafayette National Park (12 sq. m.) in Mount Desert Island off Maine.

La Fère Town of France. It is 10 m from St Quentin, at the junction of the rivers Serre and Oise. The Germans took it in their advance of 1914 and kept it until Oct 13, 1918.

La Fontaine Jean de French writer. Born at Châteauneuf-Thierry, July 8, 1621, he studied to become a priest, but instead took to the law. However, he never settled down to regular work, but lived an idle and dissolute life, chiefly in Paris. In 1661 he began to write and during the next few years published the volumes on which his fame rests. The most valuable are the *Fables* written in verse, almost equally famous are the *Contes*. La Fontaine, who was very friendly with Molière and Racine, died April 13, 1695.

Lagash City of Babylonia. It was founded by the Sumerians perhaps in 3000 B.C. or earlier, and was a flourishing centre of their culture. It had its own rulers, called patasis, who were subject to one or other of the kingdoms of that time, including Akkad and Ur. Soon after 2400 B.C. the city disappeared.

Lager Light beer. It is produced in Bavaria at low temperatures by decoction and bottom fermentation. It differs from infusion beers in containing more unfermented malt extract and carbonic acid and less alcohol. British beers resembling lager are produced by variant methods.

Lagerlöf Selma Ottilliana Louisa Swedish writer. Born Nov 20, 1853, she was at first a teacher but soon began to write. In 1891 she made a reputation with some short stories, *Gosta Berlings Saga*. Novels followed and most of them have been translated into English. The English titles of the best are, *An Adventure in Vineta*, 1895, *Jerusalem*, 1901-02, *The Adventures of Nils*, 1906-07, *The Outcast*, 1920, *The General's Ring*, 1925, *Anna Svérdr*, 1927. *From My Childhood* appeared in 1930. Her books owe their success to their vivid pictures of Swedish life. In 1909 she was given a Nobel prize, and in 1914 was elected to the Swedish Academy as its first woman member.

Laggan Loch, or lake, of Inverness-shire. It is 7 m long, and the River Spean flows through it.

Lagoon Sheet of water. It may be an estuarine shallow enclosed by dunes of river silt, as at Venice. Other lagoons are formed by springs, and others are sheets of water within a coral atoll.

Lagos City and seaport of Nigeria. It stands on a small island of the same name, just off the mainland, with which a bridge connects it. Lagos has a good harbour and a considerable trade passes through it. Here is a wireless station. Pop (1931) 100,000. The district and town of Lagos became British in 1862 and until 1914 there was a colony of Lagos. This now forms part of the protectorate of Nigeria.

In Lagos Bay on Aug 18, 1759, four French warships were destroyed by a British fleet under Admiral Boscawen.

Lagrange Joseph Louis French scientist. Born in Turin, Jan 25, 1736, of French parents, he was educated there. He became professor in the University at Turin, and in 1766 director of Berlin Academy. His later years from 1787 were spent in Paris, where he was a professor. He died April 10, 1813. His investigations into the principles of acoustics, mechanics and dynamics, were of

the highest value. His chief work is the *Mécanique Analytique*.

La Harpe Jean François de French writer. Born in Paris, Nov 20, 1739, he began to write, and in 1763 produced a tragedy called *Warwick*. This was followed by others and also by books of criticism called *Lycée*, or *Cours de Littérature*, in 12 volumes. He favoured the Revolution, but, having been imprisoned, turned to the Royalist side. He died Feb 11, 1803.

La Hogue Cape of the Contentin Peninsula, France. Here, on May 19, 1692, an English fleet, under Admiral Russell, aided by some Dutch ships, defeated the French, most of whose ships were destroyed by the pursuers, who sent fire ships amongst them. The victory saved England from invasion as France had an army of 20,000 men ready near Cape La Hogue. The battle is sometimes called after another cape on the peninsula, Barfleur.

Lahore City of India and the capital of the Punjab. It stands on the left bank of the River Ravi, 1250 m from Calcutta and is a great railway centre. There is an old and a new part of the city. A university for the Punjab has been founded and there are several colleges. The mausoleum of Ranjit Singh and the Hall of Mirrors are reminders of the past. The city is still surrounded by its walls and a bridge crosses the river. The large railway works give much employment and there are some native manufactures, but the agricultural trade is more important. Pop (1931) 429,747.

Laibach City and river of Yugoslavia. The town, which stands on the river, is 44 m from Trieste and is the chief town of a large district. Pop (1931) 59,768.

In 1821 a congress of European powers was held at Laibach. It was the last of the series that was started in 1814. There the powers authorised the Austrians to occupy Naples.

Laissez Faire French expression, meaning "Let alone". It is used in political economy to summarise the individualist, as against the collectivist, doctrine of non-interference by governments in politics and trade, and supposedly originated in 1680, when Legendre remarked to Colbert, regarding government regulation of commerce, "Laissez faire, laissez passer."

Laity Term used for the whole body of laymen and lay women, i.e., all who are not clergy. In the Church of England one of the three houses of the national assembly is the House of Laity. The members are elected for five years by the diocesan conferences.

Lake Expanse of water occupying a depression in the land surface. Lakes from various causes are liable to fluctuate greatly in extent and tend gradually to disappear. They may form in rock basins or be caused by an obstruction such as ice or moraine accumulations in a river valley, or by the upheaval or subsidence of land, or old volcanic craters. The Caspian Sea and Lake Superior are the two largest lakes in the world.

Lake Name given to insoluble pigments used in dyeing. They are formed by the combination of an organic dyestuff with alumina or metallic salts. A number of lakes are used as watercolour paints, especially those from the madder plant (rose madder), and from cochineal (crimson lake), but are being replaced by more permanent alizarine pigments.

Lake District Area in the north of England. It covers

some 400 sq. m. in the counties of Cumberland, Westmorland and Lancashire and is a picturesque district of mountains, lakes and valleys. The chief centres are Keswick, Ambleside, Grasmere and Bowness, and in the district are the three highest mountains of England, Scafell, Helvellyn and Skiddaw. The lakes include Windermere, Derwentwater, Ullswater, Conistone, Grasmere and others. The district is much visited by walkers and climbers and has several packs of foxhounds. It was first made popular by the poems of Wordsworth, Coleridge and Southey, the Lake poets.

Lake Dwelling Habitation supported on piles or fascines, usually found on shallow lake margins. Remains found in Central Europe, especially in Switzerland, from 1853 onwards, yielded many objects belonging to the stone, bronze and early iron ages, similar dwellings are still seen in Borneo and Papua. In neolithic times villages of 200 or 300 huts on pile supported platforms were the centres of a civilisation that included fishing and some agriculture.

Lake of the Woods Lake of North America, partly in Canada and partly in the United States. It covers 1850 sq. m., and in it are many islands, hence its name. Keweenaw to the Canadian end is the chief port on the lake.

Lally Thomas Arthur French soldier. Born Jan. 1702, he was the son of Sir Gerald O'Lally, an Irishman and a Jacobite. He entered the French army and took part in the expedition of 1745 but his chief exploits were in India. In 1750 he led a force to that country and for five years conducted the fight against the British in and around Madras. In the end he was defeated and made prisoner, when he surrendered Pondicherry. Allowed to return to France, he was tried for treachery, found guilty, and beheaded May 7 1756.

His son, Trophime Gerard Lally-Tollendal became known as a Royalist during the French Revolution. He was made a marquis by his friend, Louis XVIII.

Lamaism Religious system prevalent in Tibet, Mongolia and Sikkim. A form of Buddhism, it is administered by monks and nuns. The chief pontiff is the temporal Dalai or Grand Lama, inhabiting the Potala Palace at Lhasa. The Pen-Ch'en Lama, the spiritual head inhabits the Tashi Lhunpo monastery. The Dalai Lama is Buddhism's acknowledged head in China, but not in Japan.

Lamarck Jean Baptiste French scientist. Born Aug. 1, 1744, he entered the army, in which he served during the Seven Years War. An injury compelled him to seek another calling and he became a bank clerk. He spent much time in studying botany and in 1773 published a book on the flora of France through which he became a member of the Academy. In 1778, and keeper of the herbarium in the royal garden in Paris. He lectured there on zoology for 25 years and at the same time worked out the ideas on evolution which are expressed in his books *Philosophie Zoologique* and *Histoire des Animaux sans Vertèbres*. In a sense he was a forerunner of Darwin but he knew nothing of natural selection and the variation of types. He died in Paris Dec. 18 1829.

Lamartine Alphonse Marie Louis de French writer and politician. Born at Mâcon Oct. 21, 1790 he was educated at Lyons and then went to Italy. In 1820 he

published some poems called *Méditations*, and these with later volumes marked the revival in his country of romantic poetry. He also wrote a book on his travels in the East, and a narrative poem called *Jocelyn*. In 1833 he entered political life as a deputy, became Foreign Minister, and was for a time the most powerful man in the country. In a few months he resigned, and the rest of his days were passed in writing. His notable books include *La Chute d'un Ange*, *Confidences* and *Nouvelles Confidences*. As an historian he won fame with his *Histoire des Girondins*, he also wrote a history of the events of 1851-52. He died May 1, 1869. Lamartine married an Englishwoman, Marianne Birch.

Lamb Charles English writer and wit. Born in London, Feb. 10, 1775, the son of John Lamb he was educated at Christ's Hospital in Newgate Street, and in 1792 became a clerk in the service of the East India Co. There he remained until his retirement in 1825. He lived with his sister Mary, in the Temple, and then in succession at Enfield, Islington, Edmonton and elsewhere. He died Dec. 27, 1834, and was buried at Edmonton.

Lamb is best known by his *Essays of Elia* of their kind the most delightful and popular in the language which first appeared in *The London Magazine*. With his sister he wrote *Tales from Shakespeare*, and he himself wrote *The Adventures of Ulysses* and other books for children as well as a tragedy, *John Woodvil*, and a number of poems. Lamb had a great circle of friends, and many of his witty sayings have been preserved. Chief among his friends was S. T. Coleridge. His domestic life was clouded by the periodical madness of his sister, who in one of her attacks killed their mother. After this tragedy Charles took charge of her until his death. She lived until May 20, 1847.

Lambeth Borough of the county of London. It is on the south side of the Thames, having a considerable frontage on the river, and includes the districts of Brixton, Kennington, Vauxhall, Herne Hill,ulse Hill and part of Norwood. The industries include pottery and engineering works, but there are many others. A kind of pottery produced here in the 17th century is known as Lambeth ware. A new bridge over the Thames was opened by King George V in July, 1932. The borough sends four members to Parliament. Pop. (1931) 296 162.

LAMBETH PALACE, which overlooks the river, has been for 700 years a residence of the archbishops of Canterbury. The building is full of interest. Features are the dining hall, the chapel and the rich library, the gatehouse and the Lollards' Tower. Part of the grounds called Archbishop's Park is open to the public. A decennial meeting of bishops of the Anglican Church is held at Lambeth, and is called the Lambeth Conference. The last was held in 1930.

Lambton Castle Seat of the Earl of Durham. It is 8 m. from Durham, overlooking the River Wear and was built in the 18th century on the site of an older house. It stands in a large park. In 1930 the house was closed, and in 1932 some of the literary and other treasures were sold.

Lamentations Book of Book of the Old Testament. Ascribed to Jeremiah it consists of five dirges, four of which are written acrostically beginning with the successive letters of the Hebrew

alphabet, the fifth is non-acrostic. The lament, concerning Nebuchadnezzar's capture of Jerusalem and destruction of the temple, 586 B.C., are read in the synagogue annually on Aug 6

Lamesley Town of Durham It stands on the Team, 4 m from Gateshead, on the L.N.E. Rly Coal mining is the principal industry

Lamia In classical mythology, a Libyan queen whom Zeus loved When Hera slew her children she destroyed every child she could secure Greek mothers used her name as a bogey to frighten their children She passed into Greek demonology as a vampire enticing youths to their destruction, as in Keats's poem, *Lamia*

Lamination Term in geology It is applied to the structure seen in sands, clays and shales where the component particles are laid down in thin layers ranging from an inch down to 1/16th of an inch in thickness Lamination is due to successive depositions of fine mud or sand by rivers or tidal currents, usually in quiet waters

Lammas Day Name given to August 1, a Scottish, and formerly also an English, quarter day In mediaeval times it marked the end of the wheat harvest, and on it a loaf was offered as a thanks giving by every harvester It was thus the loaf mass or lammas When the calendar was altered, lammas day was moved to Aug 12 The lammas fields were the fields which on this day were thrown open for pasturage, previously they had been enclosed for the growing of corn.

Lammermuir Range of hills in Scotland They run through Berwickshire and East Lothian (Haddingtonshire) to St Abb's Head Lammer Law (1733 ft.) is the highest point The scene of Scott's novel, *The Bride of Lammermoor*, is laid here

Lampblack Impure form of soot It consists of amorphous carbon and hydrocarbons obtained by burning in special furnaces such substances as oil, resin and other organic material, the lampblack being collected from the hood or flues of the furnace It is used in the manufacture of black paint and printers' ink

Lampeter Borough and market town of Cardiganshire It is on the Tfeŷ, 27 m from Carmarthen, on the G.W. Rly Here is St David's College, founded in 1827 for the training of candidates for the ministry of the church in Wales Pop (1931) 1742

Lampoon Name used for a satire, or attack of a somewhat vulgar character, on an individual It may be either in verse or prose At one time politicians were very subject to lampoons

Lamprey Family of aquatic vertebrates of an order lower than fishes Scaleless and jawless, they cling to rocks or fishes by their mouths British sea lampreys, river lampreys, or lampurns, and mud lampreys, or prides, all ascend rivers for spawning, and are captured mainly for bait for sea fish They are found in all temperate waters

Lanark Burgh, market and county town of Lanarkshire It stands on the Clyde, 31 m from Glasgow, on the L.M.S. line Cotton and other textiles are manufactured, and there is an agricultural trade Every June a town festival is held on Lanark Moor, and there are race meetings twice a year The

scenery in the neighbourhood is very beautiful Pop (1931) 6178

Near is New Lanark, where Robert Owen erected cotton mills and worked them as an experiment in socialism

Lanarkshire County of Scotland It is in the south-west of the country and, as the Clyde flows through it, is sometimes called Clydesdale It covers 879 sq m, and is chiefly noted for its rich coal mines which have made it a great industrial area More than one-third of the population of Scotland lives in Lanarkshire, which includes most of Glasgow, as well as Lanark, Rutherglen, Motherwell, Hamilton and Airdrie Away from the mines there is much fertile land, where market gardening and the rearing of horses, cattle and sheep are carried on Clydesdale horses are famous The chief rivers are the Cart, Kelvin and other tributaries of the Clyde, and in the south are the Lowther Hills The county is full of scenes and buildings of historic interest Pop (1931) 1,585,968

Lancashire County of England. In the north-west of the country, it has a long coastline on the Irish Sea. Elsewhere its boundaries are Yorkshire and Cheshire In the north is a portion of the county separated from the rest by Morecambe Bay and known as Furness The county is entered by the Pennines. The rivers include the Mersey, Irwell, Ribbles, Lune, Calder and Darwen Coniston is the largest lake

Much of Lancashire is a thickly populated area, and is a centre of the coal-mining and cotton industries Liverpool and Manchester are the chief industrial towns, and the principal seaports, Manchester being linked with the sea by a ship canal Other large towns are Salford, Blackburn, Bolton, Oldham and Preston Lancaster is the county town, Barrow-in-Furness is a large seaport Blackpool and Southport are popular watering places Lancashire is a famous cricketing county and has innumerable cricket and football clubs Pop (1931) 3,926,760

The Lancashire Fusiliers, a regiment of the British army, was raised in 1685 and was formerly known as the 20th Foot It has a long and honourable record of active service, and had many battalions in the field during the Great War The depot is at Bury

Lancaster Borough, market town and river port of Lancashire, also the county town It is on the Lune, 7 m from the sea and 230 m from London, on the L.M.S. Rly Much of the old castle is now used as law courts and contains a museum The chief industries are the making of linoleum and engineering works, while there is a little shipping in the river Pop (1931) 43,396

The Royal Lancaster Regiment, which has its depot at Lancaster, is nowadays known as the King's Own.

Lancaster Duchy of Name of the estates that belong to the King as Duke of Lancaster They are chiefly in the counties of Staffordshire and Lancashire and are managed by a council, the head of which is the chancellor of the duchy, a member of the Government In 1931 two-thirds of the duchy was £120,000, and £62,000 was paid to the King The duchy has an attorney-general, and courts are held in the name of the Duke, who appoints the high sheriff of the county

Lancaster Duke of. Title borne by the king of Great Britain

Henry III's younger son, Edmund, was made Earl of Lancaster in 1267, and this title passed to his great-grandson, Henry, who was made a duke in 1351.

Duke Henry was a famous soldier until his death on May 13, 1366. He left no sons, only a daughter who married in 1359, John of Gaunt, a son of Edward III. In this way Gaunt obtained the rich estates of the duchy and the title of Duke of Lancaster, which passed on his death to his son, who became Henry IV. The duchy then became associated with the crown and since that time (1399) the king, or queen, has been Duke of Lancaster.

Lancaster Duke of English prince John of Gaunt, so named because he was born at Ghent was the fourth son of Edward III. Born June 24, 1340, in 1359 he married Blanche, the heiress of Henry, Duke of Lancaster, and so obtained that title. She died in 1369 and he married Constance, daughter of Peter, King of Castile. John spent much of his time fighting in France and Spain and at one time hoped to become King of Castile. When his father's health was feeble he became active in English politics, and he remained so during the reign of his nephew, Richard II. At this time he was the leader of the party that favoured the teaching of Wycliffe and opposed the church. He died Feb. 3, 1399 leaving a son who became Henry IV and a daughter, Catherine. His third wife was Catherine Swynford. By her he was the father of the Beauforts, who played an important part in public affairs during the reigns of Henry IV and Henry V.

Lancaster House of Family that provided kings of England from 1399 to 1461. Its founder was Edmund, a son of Henry III, who was made Earl of Lancaster in 1267. In 1351 Henry, a later earl, was made a duke and from him the title passed to Edward III's son John of Gaunt, who married the duke's daughter. Their son Henry claimed the throne as being descended from Edward I, and in 1399 landed in England from his exile and was crowned Henry IV. Richard II being deposed. He, his son Henry V and his grandson Henry VI were kings in turn. Richard Duke of York claimed the crown in opposition to Henry VI, and the Wars of the Roses began. The result was the deposition of Henry VI in 1461 and his murder in 1471. His son had already been killed and the house of Lancaster became extinct in the male line.

Lancaster Joseph English reformer. Born in 1778 he opened a school in Borough Road London in 1801. He introduced into this the monitorial system, and the experiment was so successful that in 1808 the Royal Lancasterian Society was founded to develop his ideas. This became the British and Foreign School Society. Lancaster went to the United States in 1816, and was in New York when he died Oct. 24, 1838. He is regarded as one of the pioneers of popular education in England.

Lancaster House Mansion containing the London Museum. It is near St. James's Palace and overlooks the Green Park. Formerly York House it was built about 1826 for the Duke of York and was bought successively by the Duke of Sutherland (1841) and Lord Leverhulme (1912). The latter renamed it Lancaster House and presented it to the nation to contain the London Museum.

Lance Slender cavalry spear. It was used by the knights in the Middle Ages. Its use was revived during the Napoleonic wars and in the 19th century it was adopted for regiments in the British, Prussian and other armies. It is now only a ceremonial weapon. The lance is from 8 to 9 ft long, made of steel with a short, triangular spear head. Sometimes it is of ash or bamboo with a steel head.

Lance Corporal Non commissioned officer in the British army. It is the lowest rank in the service. The lance corporal wears a single chevron on each sleeve.

Lancelet Small vertebrate creature. It is found near the coast of most warm countries and is about 2 ins long. It is like a fish in shape, but is a much simpler organism, being merely a piece of jelly with a backbone. It belongs to the class *Cephalochordata*, and is interesting because, being the lowest of the vertebrates it is regarded as the link between these and the invertebrates. Its other name is amphioxus.

Lancelot Character in the Arthurian legends. He appears as the handsome knight who won the love of Arthur's queen, Guinevere, and so broke up the company of the Round Table. He was known as Sir Lancelot of the Lake, and tradition makes him the father of Galahad. He is said to have become a monk after his great battle with Arthur. His story is in Malory's *Morte D'Arthur* and in Tennyson's *Idylls of the King*.

Lancers Cavalry regiment in the British army. They are so called because their principal weapon was the lance. At one time there were six of them, 5th, 9th, 12th, 16th, 17th and 20th. The oldest, the 5th and 9th Lancers were raised in 1697, and the others in the 18th century. After the Great War the number of lancer regiments was reduced to four and in 1929 one of these the 12th, was made into an armoured car regiment. The other three are the 9th, the 16th/5th, a union of those two, and the 17th/21st, another union. All have fine records of service, especially the 17th, which wears as its badge a Death's Head and is called the Death or Glory Boys.

Lancers Square dance. It is of French origin and was very popular in the 19th century. It consists of five figures and eight people compose the set.

Lancewood Tough elastic timber of various trees of the custard apple order. It grows in British Guiana and the West Indies. Assagai wood, allied to dogwood, is sometimes called Cape Lancewood.

Lanchester Town of Durham. It is 8 m from Durham, on the N.E. Rly. The chief occupation is coal mining. The town occupies the site of a Roman city and many Roman remains have been unearthed. Pop 5200.

Lancing Village of Sussex. It is 8 m from Brighton, and has of late become a seaside resort. On the Downs above the village is Lancing College, properly St. Nicholas College, Lancing a public school with accommodation for about 400 boys.

Land Word used for the earth on which we live and which provides us with the fundamental needs of human life. In most countries of the world a great deal of it is owned by private individuals, but there are public lands, or land which belongs to the

state as a whole. Much of the land in private hands is let out for rent.

The private ownership of land has created many difficulties, and sometimes perhaps injustices, and as a remedy its nationalisation has been suggested. The special taxation of land, which it is argued differs from other commodities in that its amount is strictly limited, has been advocated and in one or two cases has been put into practice. In Ireland, where the land problem is particularly acute, much of the land has been bought by the tenants from the landlords with the aid of the state.

In Great Britain economic causes in the 20th century have led to the sale and break up of many large landed estates. All over the civilised world the tendency is for the ownership of land to pass from the large holder to the small one.

In Great Britain land is conveyed from one person to another by lawyers who draw up conveyances, which, with other documents, constitute the title deeds. This applies to the two kinds of land found in the country, freehold and leasehold. The laws dealing with land are very cumbersome, but a series of laws passed in 1925 helped to simplify them.

To facilitate the transfer of land, a system of registration has been devised. This has been adopted in Canada, Australia and other parts of the British Empire and to some extent in England. An office for the registration of titles to land was opened in London. In 1898 the registration of land sold was made compulsory in the county of London and in 1925 in the borough of Eastbourne. It is also compulsory in Yorkshire and Middlesex, elsewhere it is optional. The owner of land on the register for a certain time obtains an absolute title to it which is guaranteed by the state, and future transfers can be carried out at small cost.

Land In economics one of the factors in production, the others being capital and labour. The share of the joint product which it receives is known as rent. According to Ricardo's theory of rent, the amount of rent is decided by the value of a piece of land over land on the margin of cultivation, i.e. land which just pays for the expenses of cultivation and no more.

This idea of rent is quite sound in theory, but in practice it needs modification. Local customs play their part in determining the value of land. Moreover, land, especially agricultural land, has had a certain amount of capital put into it and must offer a return in the shape of profits.

The enormous increase in land values in towns has led to a demand for special taxation on these, but so far only temporary expedients have been attempted in this direction.

Land Army Organisation set up in Great Britain in 1917. It was composed of women who were unenrolled, wore a uniform and received a regular weekly wage. Each entrant received training and an outfit. Their duties were to assist farmers, and at one time they numbered about 20,000. The organisation, which had a journal, *The Landswoman*, was dissolved after the war.

Landau Town of Bavaria. It stands near the Hardt Mountains, 30 m from Mannheim, on the little River Quöich. At one time it was a free city and was fortified. In 1648 it was given to France and in 1816 to Bavaria. The town is a centre of the wine trade. Pop. 17,000.

Landau gave its name to a kind of carriage, once popular in England. This could be open or closed and was usually drawn by one horse.

Land Court Body that decides matters concerning the tenure and rent of land. In 1911 one was set up in Scotland. This fixes fair rents, especially in the areas occupied by crofters, and decides the price of land that is taken for small holdings.

Land Crab Widespread family of tropical crustaceans. Their modified gill cavities, acting as lungs, enable them to live on land. They spend the day in burrows, sometimes two or three miles inland, migrating to the coast collectively in the breeding season. The Jamaica violet land crab is a table delicacy, especially when soft-shelled during moulting.

Landes District of France. It is in the south-west of the country, and is a noted expanse of sand and marsh covering 3615 sq. m. in the departments of Landes, Lot-et-Garonne and Gironde. On it furze grows freely and sheep are pastured. At one time the people of the Landes went about on stilts, so difficult was it to traverse the sand and marsh, but now there are roads that to a large extent have made this mode of progress unnecessary. The department of Landes lies along the Bay of Biscay.

Landgrave German title meaning "count of the land." There were several such in the Middle Ages and later, one being the ruler of Thuringia. In Hesse there were landgraves until 1918.

Land League Society set up in Ireland in 1879. Its object was to reform the land system of that country. Its inspirer was Michael Davitt, and its president, C. S. Parnell. The methods adopted, including refusal to pay rent, boycotting and even outrages, brought its supporters into conflict with the law, and in 1881 the league was declared an illegal association. After this time less was heard of its operations, and as the landlords were gradually bought out there was less need for it.

Landlord Primarily one who owns land. It is also used for the owner of houses and for the licensee of an inn. Many landlords let their land and houses to others who are known as tenants and who pay rent.

In Great Britain, as in other countries, a number of laws deal with the relations between landlord and tenant. The several Rent Restriction Acts and an important act passed in 1927 regulate the position as regards property which is not agricultural. One result was to give retiring tenants of business premises the right of compensation for improvements. As regards agricultural land also, the retiring tenant is entitled to compensation for improvements made by him. See **LAND**.

Landor Walter Savage. English writer. Born at Warwick, Jan. 30, 1775, the son of a doctor, he was educated at Rugby and Trinity College, Oxford. For a time he lived in Wales and wrote poems. Later he raised and led a force to help Spain in the Peninsular War. On his return from this expedition, he lived again in Wales, then in Florence, and then, for 20 years (1838-58), in Bath. In 1858 he went back to Florence where he died, Sept. 17, 1864.

Landor was a fine scholar and a man of considerable gifts. He had many friends,

but his quarrelsome nature made an equal number of enemies. Of his writings the most popular are, *Imaginary Conversations*, 6 vols. *The Examination of W. Shakespeare* and *Pericles and Aspasia*. He also wrote a tragedy, *Count Julian*, and many poems. Lander had a great love for republicanism, admiring Washington and Garibaldi.

Landrail Alternative name for the cornerake (q.v.) used to distinguish it from a water rail. It also denotes generally any rail frequenting uplands, e.g., the New Zealand weka rail.

Landrecies Town of France. It stands on the Sambré, on the borders of Belgium, 50 m. from Lille, and was long a fortified town. Noor is the forest of Mormal. On Aug. 25, 1914, when the British were retreating from Mons, sharp fighting with the Germans took place here. The Germans were driven out, but soon regained the town and held it until the end of the war.

Landscape Term in art applied to a picture representing a view of a country as seen by the artist. Among the greatest of landscape painters are Ruysdael and Hobhouse of the Dutch school, Claude, Corot and Rousseau of the French school, and the English artists, Constable, Bonington and Turner.

Landscape gardening means laying out a garden with regard to its general appearance, not to the details of beds and borders. It thus needs a considerable area and is best seen in the gardens of the great English houses such as Alnwick and Bowood. Natural features can be used with great effect.

Landseer Sir Edwin Henry English artist. Born in London, March 7, 1802, he studied art under his father, an engraver, and at the Royal Academy Schools, London. In 1826 he was made A.R.A. and in 1830 R.A. He was knighted in 1850. He died in London, Oct. 1, 1873. Landseer became very popular as an animal painter. His works are represented in the Tate and National Galleries, London. In the form of engravings his pictures became very well known, e.g., "The Monarch of the Glen" and "Dignity and Impudence." He designed the lions in Trafalgar Square, London.

Land's End Extreme western point of Cornwall, 9 m. from Penzance, and is visited by pleasure seekers. The granite cliffs rise to a height of 100 ft. Near are the Longships, a group of islets on one of which is a lighthouse.

Landslip Subsidence of strata on the coast where hard beds rest upon soft impermeable ones. The action of springs and waves wear away the softer rocks rendering the overlying beds unstable and liable to break and slide down on to the shore. Examples are seen at Axmouth, Devon and Antrim, Ireland.

Land Tax Form of taxation. Taxes on land have been levied in many countries and have taken many forms. The feudal system included what was usually a tax on land, and tithes are a tax on land. In Great Britain in 1692 a tax was levied on land at the rate of 4s. in the £. Later owners were allowed to commute the tax and many did so. To day it is only paid for a small proportion of the land of the country and produced £650,000 in 1932. It is levied on the parishes and the amount divided up among the landowners.

In modern times there has been a demand for taxes on land that has improved in value owing to the growth of population and other causes. In Australia a tax of this kind was levied and there was one in Great Britain between 1910-1920, this being called the increment value duty. In 1929 a new land tax was introduced. This took the form of a tax on the capital value of land at the rate of a penny in every £1. Agricultural land and also plots of land worth £120 and less were exempt. A valuation of all the land in the country was begun, but this was suspended in 1931, and the proposed tax was abandoned.

Lane Lupino. English actor and acrobat. He was born June 18, 1892, and made his first London appearance as "Nipper Lane" in 1903. He is a member of the famous Lupino family noted for its acrobatic skill since 1780 and is himself an expert acrobat.

Lanercost Village of Cumberland. It stands on the Irthing, 11 m. from Carlisle. It is famous for the ruins of its 12th century priory, which has some old and interesting tombs.

Lanfranc English prolate. Born at Pavia about 1005, he became a priest and settled in Normandy. In 1041 he became a Benedictine monk at Bec and in 1045 he was made head of that house. Through the influence of William, Duke of Normandy, he was made head of a monastery at Caen in 1062, and Archbishop of Canterbury in 1070. He died May 24, 1089, and was buried in Canterbury Cathedral, which he himself had rebuilt after the fire of 1067.

Lanfranc was a scholar and wrote some treatises and commentaries. He was also one of William's most trusted advisers.

Lang Alexander Matheson. British actor. Born in Montreal, May, 15, 1879, the son of a Scottish minister, he was educated at Inverness and St. Andrews, and in 1897 first appeared on the stage. Under F. R. Benson he played Shakespearean characters with much success and he soon became prominent. He took a company to Australia and S. Africa and as a producer was responsible for, *Mr. Wu*, *Othello*, *Carnival* and *The Wandering Jew*, in all of which he himself appeared. His other successes included *Charles Surface in The School for Scandal*, *John Storm in The Christian*, and he also played in *Jew Süss* and *Elizabeth of England*. Lang has also taken part in productions for the films.

Lang Andrew. Scottish writer. Born at Selkirk, March 31, 1844, he was educated at Edinburgh Academy, St. Andrews and Oxford. He was made a fellow of Morton College, Oxford, and became a writer for the press. He wrote regularly for *The Daily News* and for other journals, partly on politics but more frequently on books, his work being marked by wide knowledge, graceful style and real, though unobtrusive, scholarship. Working to the end, he died July 20, 1912.

Lang's books are very numerous and on a variety of subjects. Some are volumes of poetry, such as *Grass of Parnassus*, others are translations, the most notable being those of the *Iliad* and the *Odyssey*, in which he collaborated. He also wrote a *History of Scotland*, and translated but scholarly books on Mary, Queen of Scots and Joan of Arc, also on the Young Pretender and the rising of 1745. *A Monk of Fife* is a novel and with Rider Haggard he wrote *The World's Desire*. On anthropology and folklore he was something of

an authority, his books including, *Custom and Myth and Magic and Religion*. His volumes of essays on literature such as *Letters to Dead Authors* and *Books and Bookmen*, are perhaps his most enduring work.

Lang Cosmo Gordon British prelate. A son of Rev J Marshall Lang, principal of the University of Aberdeen, he was born Dec 31, 1864, and educated at Glasgow and Balliol College, Oxford. He became a fellow of Magdalen College, entered the Church and from 1890-93 was vicar of S Mary the Virgin at Oxford, and from 1896 to 1901 vicar of Portsea. Afterwards he became successively Bishop of Stepney, Canon of S Paul's and (in 1909) Archbishop of York. In 1928 he was appointed Archbishop of Canterbury in succession to Dr Davidson.

Lang John Thomas Australian politician. Born in Sydney, Dec 21, 1876, he became mayor of Auburn and a prominent figure in the Labour movement. In 1913 he entered the legislative assembly of New South Wales where he became leader of the Labour party. From 1920-22 he was Treasurer and from 1925-27 he also held the office of Prime Minister. In 1930 Lang again became Prime Minister, and he was prominent during the financial crisis of 1931, when he advocated the policy of repudiation, and in March refused to find money for the interest due in London on New South Wales loans. During 1931 and 1932 he carried on a struggle against the government of the Commonwealth that passed legislation to compel New South Wales to meet its liabilities, but in 1932 the general election went against him, and he left office.

Langdale Two valleys in the Lake District. Great Langdale is near Grasmere and is 5 m long. At Eiterwater it meets Little Langdale, a somewhat shorter valley. Two pikes at the top of Great Langdale are known as the Langdales, they are Harrison Stickle (2400 ft) and Pike o' Stickle (2330 ft). A village in Great Langdale is called Langdale. It is 4 m. from Ambleside.

Langholm Burgh of Dumfriesshire. It is on the Esk, 21 m from Carlisle, on the L.N.E. Ry. Old Langholm is on one side of the river and New Langholm on the other. The burgh is noted for its sheep fairs and tweed is manufactured. Near is Langholm Lodge, a seat of the Duke of Buccleuch. Pop (1931) 2448.

Langland William English poet. He was born at Cleobury Mortimer about 1330 and became a priest. He passed most of his life in London without a regular charge and died in 1400 or thereabouts. Langland is famous as the author of *The Vision of Piers Plowman*, a picture of the life of the time in England which is invaluable. The scene is the Malvern Hills, near his home.

Langside District of Glasgow. It is famous because here on May 13, 1568, the forces of Mary, Queen of Scots were beaten by those under the Regent Moray. Mary escaped to England. Langside is now in the city of Glasgow.

Langton Stephen English prelate. Born about 1150, he studied in Paris and became a priest. In 1206 he was made a cardinal and in 1207 was appointed Archbishop of Canterbury, but owing to the opposition of King John, he did not obtain the post until 1213, spending his time in France. Langton is best known as one of the leaders of the barons

who compelled John to sign Magna Charta, and as a defender of the church and the rights of the English nation. He died July 9, 1228, and was buried at Canterbury. The theological *Commentaries* he wrote were valued by scholars in the Middle Ages.

Langtry Lily English actress. Born in Jersey, Oct. 13, 1852, she was the daughter of a clergyman there, Rev W C Le Breton. In 1874 she married Edward Langtry, and in 1881 she appeared on the London stage where her beauty and ability soon made her the most popular actress of the day. She remained for many years a great favourite, her successes including parts in *She Stoops to Conquer*, *Macbeth*, and *As You Like It*. She played also in South Africa and the United States and for a time managed a London theatre. She also owned racehorses. Her second husband was Sir Hugo de Bathe. She died Feb 12, 1929.

Language Any expression of thought, specifically the verbal utterance developed by mankind from inarticulate gesture into articulate speech for recording and communicating ideas. Language is not heritable, but acquired by each individual after birth. It may comprise isolated, agglutinative and inflected, or analytic and synthetic forms. Developed in various primary areas, these passed into local dialects by migration and settlement, being classifiable into major groups such as Indo-European, Semitic, Hamitic, Altaic, Austric, Bantu, Amerind and the like. Dialectal branches are especially abundant in isolated regions, e.g., mountain valleys and islands. Sign language and drum language are conventional modes of communication independent of the tongue.

Languedoc One of the provinces of France before 1789. It was in the south-east of the country, lying to the north of the Pyrenees and the west of the Rhône. Its chief town was Toulouse. The Albigenes and then the Camisards lived in the district. The word means the *langue*, or language, *d'oc*, because the inhabitants pronounced the French word for yes as *oc*.

Lankester Sir Edwin Ray. English scientist. Born May 15, 1847, the son of a medical man, he was educated at S Paul's School, London, and Downing College, Cambridge. He began to lecture at Exeter College, Oxford, and from 1874-90 was Professor of Zoology at University College, London. From 1891 to 1898 he was Linacre Professor of Comparative Anatomy at Oxford, and from 1898 to 1907 director of the Natural History Museum at South Kensington. One of the leading zoologists of his time, Lankester wrote text books, and after his retirement devoted his talent to popularising the sciences of which he was a master. His volumes include, *The Kingdom of Man*, *Diversions of a Naturalist*, *Secrets of the Earth and Sea* and *Science from an Easy Chair*. In 1906 he was president of the British Association and he helped to found the Marine Biological Association. Knighted in 1907, he died Aug 15, 1929.

Lannes Jean French soldier. Born April 11, 1769, the son of a livery stable keeper, he entered the army in 1792. Soon he attracted the notice of Napoleon, and was made a general. In Italy he added to his reputation at Marengo, and he held high commands at Austerlitz, Jena and Friedland. He also served in Spain and Portugal, and was made Duke of Montebello and a

marshal At the battle of Aspern he was seriously wounded, and died May 31, 1809

Lanolin Name given to hydrous wool fat It is a yellowish white tenuous substance derived from the skin of the sheep It contains cholesterol and the ethers of certain fatty acids, is absorbed readily by the skin used as the basis of many ointments for rapid absorption of drugs

Lanrezac Charles Louis. French soldier He was born in Gnadonopce, July 31, 1851, and entered the army He passed through the school of war and made a reputation as a student of strategy He rose to the rank of general, and in 1914, when war broke out, he was a member of the Council of War and head of the 5th army He led his army at the battle of Charleroi, but he did not agree with the French plan of campaign, and his relations with Joffre were bad On Sept. 3 his command was taken from him He died Jan 18, 1925

Lansbury George English politician. Born Feb 21, 1859, he emigrated when young to Australia Having returned to England in 1885, he became known as a socialist politician. In 1903 he was elected to the borough council of Poplar which he also represented on the London County Council From 1910-12 he was Labour MP for Bow and Bromley and he was again elected in 1922 and at subsequent elections From 1929-31 he was First Commissioner of Works and in 1931, when nearly all the Labour leaders had lost their seats in Parliament, he was selected to lead the Opposition. He resigned leadership for health reasons in Oct., 1935

Lansdown Hill outside Bath On it is a tower built by William Beckford and called Beckford's Tower On July 5, 1643, it was the scene of a fight between the Royalists and the Parliamentarians, in which the former were driven back with heavy loss On the hill is a monument to Sir Bevil Grenville, who was killed

Lansdowne Marquess of English title borne by the family of Fitzmaurice The early Fitzmaurices were barons of Kerry in the Irish peerage, and in 1722 one of them was made Earl of Kerry A younger son of the 1st Earl was made Earl of Shelburne in 1753, and the 2nd Earl of Shelburne was made Marquess of Lansdowne in 1784 The family estates are in Wiltshire, where is the family seat of Bowood The marquess has also estates in Ireland His eldest son is known as the Earl of Kerry

William Petty Fitzmaurice, the 1st marquess is better known as the Earl of Shelburne (q.v.) In 1809 Henry Petty Fitzmaurice became the 3rd marquess He had already been Chancellor of the Exchequer (1806-07), and for the rest of his life he was one of the leaders of the Whig party, holding high office under successive Whig governments In 1852 and 1855 he refused to become premier and later he refused a dukedom Died Jan 31, 1863

Lansdowne Marquess of English statesman Henry Charles Keith Fitzmaurice was born Jan 14, 1845, and was educated at Eton and Balliol College, Oxford In 1866 on the death of his father, the 4th marquess, he succeeded to the titles and estates and entered upon his long career of public service He held a junior office in the Liberal ministry of 1868-74 and again for a short time in 1880 In 1883 he was appointed Governor General of Canada

and from 1888-93 he was Governor General of India In 1895, as a Liberal Unionist Lord Lansdowne was made Secretary for War, a post he retained until he became Foreign Secretary in 1900

Resigning office in 1905 he became leader of the Unionist party in the House of Lords He was concerned in the negotiations of 1914 on the Irish question, and in 1917 advocated a peace with Germany He died June 3, 1927 His life was written by Lord Newton 1929

Lord Lansdowne married a daughter of the Duke of Buccleuch His younger son, Lord Charles Mercer Nairne, was killed in the Great War, the elder son having, as Earl of Kerry, sat in the House of Commons became the 6th marquess on his father's death.

Lansdowne House London residence It is in Berkeley Square, and was built in the 18th century by the brothers Adam Additions were made to it later Long the London house of the Marquess of Lansdowne, it was sold in 1929

Lansing Robert. American politician Born at Watertown, New York, Oct. 17, 1864, he was educated at Amherst College He became a lawyer, was employed on several important international cases and was closely associated with the government. In June, 1915, he succeeded W. J. Bryan as Secretary of State and he held that position throughout the war period, when his knowledge of international law was extremely useful He attended the Peace Conference in Paris, but in Feb., 1920 resigned, and returned to his legal practice at Watertown Lansing wrote *The Peace Negotiations* and *The Big Four of the Peace Conference*

Laocoon Group of statuary It was discovered in Rome in 1506, and is now preserved in the Vatican Museum. It represents the final episode in the Greek legend of the Trojan priest Laocoon, where two serpents strangle him and his two sons. The ruined arms and some parts of the serpents have been restored

Laodamia Character in Greek legend. The wife of Protesilaus, who was killed during the siege of Troy she implored the gods to allow him to return to her from Hades for three hours On his return to Hades she died and so went with him

Laodicea Name of several cities founded or renamed by Seleucid kings The chief, situated on the River Lyons near Colossae, was renamed by Antiochus II (3rd cent. B.C.) after his wife Laodice Its early Christian community was addressed by Paul in his epistle to the Colossians and reproved for lukewarmness in Revelation (Ch. III)

Laomedon In Greek legend the King of Troy For an offence Zeus ordered Apollo and Poseidon to serve Laomedon In return the king promised them rewards, but when the time came he refused to honour his undertaking Poseidon therefore sent a sea monster to ravage his lands, and to save them it was decided to sacrifice the king's daughter, Hesione, to the beast. Hercules saved the princess, but again Laomedon refused the promised reward. For this he and his sons, save one, were killed The survivor, Priam became King of Troy

Laon City of France It is 87 m. from Paris, and has a magnificent cathedral and an old palais de justice Owing to its position it was an important fortress in

the Middle Ages and a residence of the Carolingian kings. There was much fighting here during the Great War. The town was entered in Aug 30, 1914, by the Germans who remained in possession until Oct., 1918. Pop 19,125.

Lão-Tsze Chinese philosopher. He lived in the 6th century B.C. and was the author of a work called *Tao-teh king*, one of the sacred books of the Chinese. He teaches the religion called Taoism, a kind of pantheism. "All things originate from Tao, conform to Tao, and to Tao they at last return," Tao being the supreme being. He taught also a belief in the transmigration of souls. He was librarian to one of the ruling princes and finished his life in a hermitage.

La Paz Capital of Bolivia. It is the actual seat of government, though Sucre is the legal capital. It stands high up in the mountains in the centre of the country. Railway lines connect it with the coast at Mollendo and with other places. La Paz is a prosperous trading centre, with a university and some fine buildings. Pop 146,930.

Another La Paz is a small port of Argentina, on the Parana river. A third La Paz is in Mexico. This is a seaport.

Lapis Lazuli Beautiful blue mineral. It consists of silicate of soda, lime and alumina with sulphur and chlorine. It has been valued as an ornamental stone from ancient times, being known to Pliny as *sapphirus*. It is used still in mosaic work, and was the original source of the pigment ultramarine.

Laplace Marquis de French scientist. Pierre Simon Laplace was born March 28, 1749, and showed exceptional gifts as a mathematician. In 1767 he became a teacher of this subject in Paris and later a professor of analysis. He published the result of his researches on the integral calculus. In 1796 his famous book on astronomy, *Exposition du Système du Monde* appeared, and in 1799 the still more famous *Mécanique Céleste*. His researches into the movements of the tides, the planets and the solar system generally have won for him a reputation as the greatest of French astronomers. He was equally great as a physicist, and in physics, too, his researches were of profound significance. Laplace was made a marquis and died March 5, 1827.

Lapland District of Europe. In the extreme north, it is in Sweden, Norway and Finland. It is a thinly peopled land of forests and morasses, owing its name to the Lapps, a race short in stature, with high cheek bones and snub noses. They are nomads and live by hunting and fishing. They number about 30,000 in Europe and there is a colony of them in Alaska.

La Plata Rio de Name of a river estuary and city in South America. The estuary is made by two great rivers, Uruguay and Parana, and divides Argentina from Uruguay. It is about 200 m long and at its mouth about 150 wide. There are several ports on the estuary, which is a great trading route.

The city of La Plata is in Argentina, 35 m. from Buenos Aires and five from its port, Ensenada. It is a modern place and has some fine buildings and parks. Pop (1931) 182,401.

Lapwing Common British bird (*Paniscus aristatus*), also called the green plover and the pewit. It is found in Europe and Asia and winters in India and Africa. It has four toes. Its back is greenish and it

has white underparts. It feeds upon insects and worms. Its eggs are laid on the ground and used to be sold and eaten as plovers' eggs.

Larbert Town of Stirlingshire. It is just outside Falkirk on the River Carron and 24 m from Edinburgh. It is a railway junction. Pop 1500.

Larceny In English law a form of theft. The stealing and carrying away of goods "with intent permanently to deprive the owner thereof," constitutes larceny. It is a felony and can be punished by penal servitude for as much as 14 years. For simple larceny, or common theft, the maximum sentence is three years.

Larch Genus of deciduous cone-bearing trees (*Larix*). The common larch, *L. europaea*, native in the Alps, is a lofty tree from 80 to 140 ft. high, with needle-like leaves and small cones. Its hard, tough timber serves for poles, pitwood, railway sleepers and domestic building, and it also furnishes turpentine and bark for tanning. Largely planted in Britain it suffers much from the larch canker fungus, hence other species, e.g. Japanese red and N. American western larch, are being tried.

Lares Roman household divinities. Originally each family land had its tutelary deity, who became the centre of the household worship. The lararium, or shrine, usually contained images or pictures of youths holding horns of plenty and plates. Public lares had chapels at crossroads.

Largo Seaport of Wiltshire. It is on the Firth of Forth, 3 m from Leven. It has a fishing harbour, and remains of a castle. Largo Law is a hill near, 960 ft. high. Pop 2274.

Largs Burgh and watering place of Ayrshire. It stands on Largs Bay, 43 m from Glasgow, on the L.M.S. Rly. Near here, in 1263, a Norwegian army was defeated by King Alexander III and Norway was compelled to give up the Hebrides. Pop (1931) 6115.

Lark Name of a family of birds (*Alaudidae*). There are many species but only a few are seen in Great Britain. The chief are the skylark and the wood lark, both of which make their nests in the country. The crested lark, the shore lark and others visit the country and, like the other larks, are fairly general in the warmer parts of Europe and Asia.

Larkspur Popular name for the flower also called the delphinium (*g v*).

Larne Seaport, market town and urban district of Northern Ireland. It is in Co. Antrim, 24 m from Belfast, and stands at the mouth of Lough Larne, an opening of the Irish Sea. The town has a good harbour. Pop (1926) 8100.

La Rochefoucauld Duc de French writer. Born in Paris, Sept 15, 1613, François de la Rochefoucauld served in the army. He mixed in the tangled politics of the time and figured in the wars of the Fronde, after which his time was passed mainly in social life in Paris. In 1663 the duke published the book on which his fame rests, *Reflexions ou Sentences et Maximes Morales*. He also wrote some *Mémoires*, which are very valuable for the history of the time. He died March 17, 1680.

Larva Stage in the metamorphosis of many forms of animal life after

emergence from the egg. It usually differs considerably from the adult form. In marine forms, such as mollusca and crustacea, the larvae are pelagic, while the adult lives on the sea bottom. Among the amphibia some adult forms are terrestrial, while their larvae are aquatic. Among insects, the larva is concerned with feeding and growth while the adult is adapted chiefly for reproduction.

Laryngitis Inflammation of the mucous membrane of the larynx, or organ of voice. The acute form, resulting from catching cold, inhaling irritant vapours, swallowing hot fluids, or overstraining the voice, may be attended by hoarseness, a harking cough, a choking feeling, difficulty in swallowing, and impeded breathing. If repeated, or produced by excessive smoking, it may become chronic. When the epiglottis swells the affection is called oedematous and this serious condition may result from phthisis or syphilis.

Treatment—Give inhalations of steam containing Friar's balsam (2 teaspoonfuls to 1 quart of boiling water), keep the patient in a warm room, and insist on absolute rest of the voice. For children ipecacuanha is a good remedy (½ teaspoonful every half hour until vomiting occurs) and a steam kettle in the room is soothing.

Laryngoscope Surgical instrument used for the examination of the interior of the larynx and trachea. It consists of a mirror fixed to a long handle, another mirror being adjusted to the brow of the operator and reflecting a powerful beam of light on the first mirror, which is placed at the back of the mouth.

Larynx In human beings a cartilaginous chamber lying below and continuous with the pharynx and leading to the trachea or windpipe. The cartilages forming the larynx are the thyroid in front, a ring-like epiglottis and two small arytenoids. A slit-like opening into the pharynx, the glottis, is bounded by a movable flap or epiglottis, which projects behind the tongue. The larynx contains the vocal cords which extend across the cavity and are concerned in the production of the voice.

La Salle Sieur de French explorer René Robert Cavalier de La Salle was born at Rouen, Nov. 22, 1643, and went out when a youth to Canada. He made several voyages along the St. Lawrence and the Mississippi, and was the first to trace the Mississippi to its mouth in the Gulf of Mexico (1682). The vast Mississippi region he annexed as a French possession and was appointed its governor. In 1684 he landed by mistake in Texas and spent two years in trying to reach the Mississippi. While attempting to return to Canada he was murdered by his men, who became desperate, March 20, 1687.

Lascar Indian word used by the Portuguese for inferior army servants or camp followers, e.g., gun lascars. Long applied to Asiatic seamen, especially Indians on coasting or ocean going vessels. It is officially recognised by the Merchant Shipping Acts as excluding non-Indians, e.g., Malays and Chinese. The Indian Government now limits it to deck hands.

Lascelles Name of a famous Yorkshire family. Its head is the Earl of Harewood (q.v.), and his eldest son is called Viscount Lascelles.

Lasker Emanuel German chess player. Born Dec. 24, 1868, he soon showed extraordinary genius as a mathematician. On this subject he wrote a good deal, at the same time becoming famous as a chess player. In 1892 he won the championship of England and in 1893 the championship of the United States. In 1891 he became the world's champion and he retained this title until Casablanca beat him in 1920. In 1921 he was again beaten by Casablanca.

Laski Harold J. English political philosopher. Born in Manchester, June 30, 1893, he was educated at Manchester Grammar School and New College, Oxford. From 1914-1916 he lectured in history at McGill University, and from 1916-1920 at Harvard and, later, Yale. Connected since 1920 with the London School of Science, in 1921 he became Vice-Chairman of the British Institute of Adult Education. He has sat on many public committees, and has published articles on political economy.

Las Palmas Seaport, city and health resort of the Canary Islands. It stands on Grand Canaria and its main industry is shipping, as steamers call here to coal. The buildings include a 16th century cathedral. There is a good modern harbour. Pop. (1931) 79,441.

Lassalle Ferdinand German socialist. Born April 11, 1825, at Breslau, the son of a merchant, he was well educated, but adopted no profession. For some years he lived in Paris, Heine being among his friends. Having returned to Germany he took part in the rising of 1848 and was put in prison. Later he published his book, *System of Acquired Rights*, and in 1863 helped to form a national party of workers. A love affair with Heine von Donnges involved him in a duel at Geneva and on Aug. 31, 1864, he died from his wounds. The duel is the subject of Meredith's novel, *The Tragic Comedians*.

Lasso Hemp rope or rawhide thong ending in a slip noose used for catching and throwing cattle on the ranches. It varies in length from 35 to about 100 ft. In the Argentine it is attached to the girth, but in North America to the saddle horn. A form of lasso is used in Siberia for catching reindeer.

Last Measure for fish. A last consists of 13,200 fresh herrings. It is used in certain ports on the east coast of Great Britain as an alternative to the cran which is used in other ports.

Last Supper Paschal meal shared by our Lord with His disciples on the eve of His crucifixion. It is commemorated throughout Christendom in the Holy Communion or Eucharist (I Cor. x). It has inspired painters in all ages, notably in Leonardo da Vinci's wall painting in Milan. See EUCHARIST.

Laszlo de Lombo Phillip Alexius British painter. Born in Budapest in 1869, he was educated there and studied art in Paris. His portraits attracted much attention and having settled in England, he was commissioned to paint King Edward VII., Queen Alexandra and other persons of note. In 1914 he was naturalised.

Latakia Seaport of Syria. It is 70 m. from Tripoli and has a good harbour from which the produce of the country is shipped. It occupies the site of Laodicea, and excavations have revealed remains of the

earlier city The town gives its name to a kind of tobacco grown in Syria Pop 21,404

Lateran Palace in Rome, once the residence of the popes. It was built in the 16th century on the site of an older building and is now a museum

Near is the Church of S John Lateran, long the papal church and therefore regarded as the mother church of the Christian world. There have been five Lateran Councils, the most important being the fourth held in 1215, which declared the supremacy of the Bishop of Rome, defined the doctrine of transubstantiation and made provision for a crusade

The treaty of 1929 with Italy which recognised the independence of the Vatican state, is called the **Lateran Treaty**

Laterite Deposit of yellowish or reddish coloured clay. It is found in India, the Andamans and parts of South America. These clays are very extensive and of considerable thickness, and result from the decomposition of rocks rich in iron minerals. Laterite is used locally for making mortar, cement and also tiles, etc

Lathe Machine used for turning and shaping articles of wood, metal or other materials. Lathes vary in character from the simple "turn bench" of the watchmaker, where the work is rotated by a bow, to the modern types with crank and flywheel mechanically driven, often of great size

Lathom Village of Lancashire. It is 3 m from Ormskirk and was once a market town

Lathom House, the seat of the Earl of Lathom, was formerly a castle and a seat of the Stanleys, from whom it passed in 1730. In 1645-46 the castle was defended by Charlotte, Countess of Derby, on behalf of Charles I, but she was compelled to surrender it after a prolonged siege. It was then destroyed. The present house was built in the 18th century

The title of Earl of Lathom was given in 1880 to Edward Bootle-Wilbraham, 2nd Baron Skelmersdale, who represented the two old families whose names he bore

Latimer Hugh, English bishop. Born in 1490, or 1491, at Thurcaston near Leicester, the son of a yeoman, he became a clergyman and obtained a living in Wiltshire. In 1535 he was made Bishop of Worcester, but in 1539 he was imprisoned for not accepting the Six Articles. He resigned his bishopric, but soon returned to it. Meanwhile he had identified himself with the reformers, and during the reign of Edward VI devoted himself to assisting Cranmer in furthering the Reformation and in preaching. Soon after Mary's accession in 1553 he was put in prison. In Sept. 1555, after a trial at Oxford, he was found guilty of heresy and was burned with Ridley on Oct. 16. The spot is now marked by the Martyrs' Memorial. Some of Latimer's sermons are extant and have been published

Latin Language of the Romans and one of the great classical languages of the western world. It belongs to the Indo-European group and was spoken by the Latini, a people living in central Italy some centuries before Christ. It became the language of the Romans and in it their great literature was written. The century before Christ and the early years of the Christian era were its great age. To this time belong Virgil, Cicero, Horace and the other great writers of classical Latin

It is impossible to exaggerate the influence of the Latin language on literature in the west

of Europe and in North America. It is the foundation of French, Italian, Spanish and other romance languages, and has contributed largely to the development of English. It became the language of the Church and of education, and in consequence the language of botany and other sciences. For long, education following the monastic tradition, was conducted in Latin, and our public schools show signs of this influence to-day

Latitude Angular distances at the centre of the earth of any point upon the surface measured north or south from the equator. The equator is regarded as 0° of latitude, and parallels of latitude are imaginary circles on the earth's surface parallel to the equator. A degree of latitude equals 69½ m

Latitudinarians (Lat *latus*, broad) Name given to certain divines in the Church of England in the 17th and 18th centuries. They included Gilbert Burnet, Chillingworth, Tillotson and Hales, and were known for their liberal opinions, regarding creeds as of secondary importance

Latium District of Italy. Before Rome became great, a district to the south of the Tiber was inhabited by the Latini and called Latium. The towns in it, Alba Longa being one, formed themselves into a league which in the 4th century was engaged in a war with Rome. The Latini were beaten and their territory became part of the republic of Rome. The name survives as that of the language spoken by the Romans

La Trappe Monastery near Alençon in France. It was founded in 1140 as a Cistercian house and some remains of its church still stand. It is famous because it gave its name to the Trappist Order which was founded here in the 17th century

Latten Variety of brass or bronze. It consists of copper and zinc used in the form of thin sheets for making memorial plates and vessels in churches. The term is applied also to brass sheets for wire-drawing, and to the mild steel plates used in the manufacture of tin-plate

Latter Day Saints Formal and correct name of the body known more usually as Mormons. It is really the Church of Jesus Christ and Latter Day Saints, and was adopted in 1834. See MORMONS

Latvia Republic of Europe. It consists of Courland and other districts that before 1918 were part of Russia. Its area is 24,410 sq m and the population is (1930) 1,900,045. It has a coastline of 338 m on the Gulf of Riga and the Baltic Sea. Its other boundaries are Russia, Estonia and Lithuania. Riga is the capital and the chief seaport, other places are Libau, Dvinsk, Mitau and Windau. The country is flat and the soil fertile. There are many rivers, the chief being the Dvina. Agriculture is the chief occupation of the people, and rye, barley, oats, flax and potatoes are grown. A good deal of the land is forest. There is some fishing. About three-quarters of the people are Letts and over half are Protestants. The language is Lettish

Latvia is governed by a president, elected for three years, a cabinet and a parliament of one house. Proportional representation is the rule at these elections. The country has a railway system and a state bank. There is a small army recruited by compulsory service

A state of Livonia, founded in the 15th

emergence from the egg. It usually differs considerably from the adult form. In marine forms, such as mollusca and crustacea, the larvae are pelagic, while the adult lives on the sea bottom. Among the amphibia some adult forms are terrestrial, while their larvae are aquatic. Among insects the larva is concerned with feeding and growth while the adult is adapted chiefly for reproduction.

Laryngitis Inflammation of the mucous membrane of the larynx, or organ of voice. The acute form, resulting from catching cold, inhaling irritant vapours, swallowing hot fluids, or overstraining the voice, may be attended by hoarseness, a barking cough, a choking feeling, difficulty in swallowing, and impeded breathing. If repeated, or produced by excessive smoking, it may become chronic. When the epiglottis swells the affection is called oedematous and this serious condition may result from phthisis or syphilis.

Treatment—Give inhalations of steam containing Friar's balsam (2 teaspoonfuls to 1 quart of holling water), keep the patient in a warm room, and insist on absolute rest of the voice. For children, ipocauanha is a good remedy (1 teaspoonful every half hour until vomiting occurs), and a steam kettle in the room is soothing.

Laryngoscope Surgical instrument used for the examination of the interior of the larynx and trachea. It consists of a mirror fixed to a long handle, another mirror being adjusted to the brow of the operator and reflecting a powerful beam of light on the first mirror, which is placed at the back of the mouth.

Larynx In human beings a cartilaginous chamber lying below and continuous with the pharynx and leading to the trachea or windpipe. The cartilages forming the larynx are the thyroid in front, a ring like oricord and two small arytenoids. A slit like opening into the pharynx, the glottis, is bounded by a movable flap or epiglottis, which projects behind the tongue. The larynx contains the vocal cords, which extend across the cavity and are concerned in the production of the voice.

earlier city The town gives its name to a kind of tobacco grown in Syria Pop 21,404

Lateran Palace in Rome, once the residence of the popes It was built in the 16th century on the site of an older building and is now a museum

Near is the Church of S John Lateran, long the papal church and therefore regarded as the mother church of the Christian world There have been five Lateran Councils, the most important being the fourth held in 1215, which declared the supremacy of the Bishop of Rome, defined the doctrine of transubstantiation and made provision for a crusade

The treaty of 1929 with Italy which recognised the independence of the Vatican state, is called the Lateran Treaty

Laterite Deposit of yellowish or reddish coloured clay It is found in India, the Sudan and parts of South America These clays are very extensive and of considerable thickness, and result from the decomposition of rocks rich in iron minerals Laterite is used locally for making mortar, cement and also tiles, etc

Lathe Machine used for turning and shaping articles of wood, metal or other materials Lathes vary in character from the simple "turn bench" of the watchmaker, where the work is rotated by a bow, to the modern types with crank and flywheel mechanically driven, often of great size

Lathom Village of Lancashire It is 3 m from Ormskirk and was once a market town

Lathom House, the seat of the Earl of Lathom, was formerly a castle and a seat of the Stanleys, from whom it passed in 1730 In 1645 the castle was defended by Charlotte, Countess of Derby, on behalf of Charles I, but she was compelled to surrender it after a prolonged siege It was then destroyed The present house was built in the 18th century

The title of Earl of Lathom was given in 1880 to Edward Bootle-Wilbraham, 2nd Baron Skelmersdale, who represented the two old families whose names he bore

Latimer Hugh English bishop Born in 1490, or 1491, at Thurcaston near Leicester, the son of a yeoman, he became a clergyman and obtained a living in Wiltshire In 1535 he was made Bishop of Worcester, but in 1539 he was imprisoned for not accepting the Six Articles He resigned his bishopric, but soon returned to it Meanwhile he had identified himself with the reformers, and during the reign of Edward VI devoted himself to assisting Cranmer in furthering the Reformation and in preaching Soon after Mary's accession in 1553 he was put in prison In Sept., 1555, after a trial at Oxford, he was found guilty of heresy and was burned with Ridley on Oct 16 The spot is now marked by the Martyrs' Memorial Some of Latimer's sermons are extant and have been published

Latin Language of the Romans and one of the great classical languages of the western world It belongs to the Indo-European group and was spoken by the Latini, a people living in central Italy some centuries before Christ It became the language of the Romans and in it their great literature was written The century before Christ and the early years of the Christian era were its great age To this time belong Virgil, Cicero, Horace and the other great writers of classical Latin

It is impossible to exaggerate the influence of the Latin language on literature in the west

of Europe and in North America It is the foundation of French, Italian, Spanish and other romance languages, and has contributed largely to the development of English It became the language of the Church and of education, and in consequence the language of botany and other sciences For long, education, following the monastic tradition, was conducted in Latin, and our public schools show signs of this influence to-day

Latitude Angular distance at the centre of the earth of any point upon the surface measured north or south from the equator The equator is regarded as 0° of latitude, and parallels of latitude are imaginary circles on the earth's surface parallel to the equator A degree of latitude equals 69½ m

Latitudinarians (Lat *latus*, broad) Name given to certain divines in the Church of England in the 17th and 18th centuries They included Gilbert Burnet, Chillingworth, Tillotson and Hales, and were known for their liberal opinions, regarding creeds as of secondary importance

Latium District of Italy Before Rome became great, a district to the south of the Tiber was inhabited by the Latini and called Latium The towns in it, Alba Longa being one, formed themselves into a league which in the 4th century was engaged in a war with Rome The Latini were beaten and their territory became part of the republic of Rome The name survives as that of the language spoken by the Romans

La Trappe Monastery near Alençon in France It was founded in 1140 as a Cistercian house and some remains of its church still stand It is famous because it gave its name to the Trappist Order which was founded here in the 17th century

Latten Variety of brass or bronze It consists of copper and zinc used in the form of thin sheets for making memorial plates and vessels in churches The term is applied also to brass sheets for wire-drawing, and to the mild steel plates used in the manufacture of tin-plate

Latter Day Saints Formal and correct name of the body known more usually as Mormons It is really the Church of Jesus Christ and Latter Day Saints, and was adopted in 1834 See MORMONS

Latvia Republic of Enrope It consists of Courland and other districts that before 1918 were part of Russia Its area is 24,440 sq m and the population is (1930) 1,900,045 It has a coastline of 338 m on the Gulf of Riga and the Baltic Sea Its other boundaries are Russia, Estonia and Lithuania Riga is the capital and the chief seaport; other places are Libau, Dyvinsk, Mitau and Windau The country is flat and the soil fertile There are many rivers, the chief being the Dvina Agriculture is the chief occupation of the people, and rye, barley, oats, flax and potatoes are grown A good deal of the land is forest There is some fishing About three-quarters of the people are Letts and over half are Protestants The language is Lettish

Latvia is governed by a president, elected for three years, a cabinet and a parliament of one house Proportional representation is the rule at these elections The country has a railway system and a state bank There is a small army recruited by compulsory service A state of Livonia, founded in the 15th

century, embraced what is now called Latvia, but after 1560 Courland became a duchy under the authority of Poland. In the 18th century Latvia was included in Russia.

In 1917 the Letts decided to press for independence. In Nov., 1918, they declared their land a free state, and in Jan., 1921, their independence was recognised by the League of Nations, to which Latvia was admitted. The country's boundaries were fixed and a period of steady progress began with socialism as a strong force in political life.

Laud William English archbishop. He was born at Reading, Oct. 7, 1573, and educated at St John's College, Oxford, of which he became a fellow. He held several livings but his abilities and energy soon marked him out for a larger sphere. Entering the Church he was made chaplain to several noble men and was soon chaplain to James I. His advancement was rapid. He was elected President of St John's Dean of Gloucester, and in 1621 Bishop of St David's. In 1626 Charles I made him Dean of the Chapel Royal. From 1626-28 he was Bishop of Bath and Wells, and in 1628 he was made Bishop of London. In 1633 he became Archbishop of Canterbury.

The king's ecclesiastical policy in England and Scotland was inspired by Laud and was in general unwise and provocative. It aimed at establishing uniformity of worship on some what narrow lines, and was the cause of much unrest, especially in Scotland. In 1641 the House of Commons took action. Laud was impeached, and under a bill of attainder beheaded on Tower Hill, Jan. 10, 1645. A notable high churchman, Laud accepted much of the ritual and creed of the Roman Church and disliked Puritanism in all its forms.

Laudanum Name given to tincture of opium. It is a dark reddish brown liquid, standardised to contain 0.75 per cent. of anhydrous morphine. It is prepared by steeping powdered opium in dilute alcohol for some time, afterwards straining, pressing and filtering the product. Laudanum is used in prescribed doses as an anodyne and soporific.

Lauder Sir Harry MacLennan, Scottish comedian. Born Aug. 4, 1870, he earned a living as a coal miner. His gift of song and humour attracted attention, and in 1900 he appeared as a professional in London, becoming extraordinarily popular. Some of the songs he sang were his own compositions. In 1920 he was knighted and retired from the stage, but in 1931 he reappeared in London. Lauder has written *A Minstrel in France* and *Roamin' in the Gloom*.

Lauderdale Duke of Scotch-politician. John Maitland was born at Lethington in East Lothian, May 24, 1616, a son of the 1st Earl of Lauderdale whom he succeeded in 1645. He became a leading spirit among the Covenanters but soon changed sides, and in 1650 returned to Scotland with Charles II. Taken prisoner at the Battle of Worcester, he was not released until 1660.

With Charles II on the throne Lauderdale became very prominent. He was a member of the Cabal and Secretary of State for Scotland, where he was responsible for the savage persecution of the Covenanters that took place between 1672 and 1680. He had also a good deal to do with the direction of affairs in England and in both countries he made himself hated. He left office in 1680 and died in Aug., 1682. In 1672 Lauderdale was made a duke but the title died with him.

Lauderdale Earl of Scottish title held by the family of Maitland. They held land in Berwickshire, and in 1590 Sir John Maitland, Secretary of State under James VI, was made Lord Maitland of Thirlestane. His son was made an earl, and John, the second earl, a duke. When he died in 1682 the dukedom became extinct but the earldom passed to his brother, Charles, and has since remained in the family. The earl is Hereditary Royal Standard Bearer for Scotland. His eldest son is called Lord Maitland and his seat is Thirlestane Castle in Berwickshire.

Lauds Service in the Roman Catholic Church. In the early church it was sung at daybreak. To day it is sometimes said after matins. The Psalms 148, 149 and 150 are called the "lauds," or psalms of praise, and from these the service received its name.

Laughing Gas Name given to nitrous oxide. It is prepared by heating ammonium nitrate to 350°F., when the salt is resolved into the gas and water vapour. It is a colourless, transparent gas with a sweet taste, and when inhaled produces insensibility, hence its use as an anaesthetic in dental surgery and in operations of short duration. See ANAESTHETICS.

Laughing Jackass Australian name for a powerful bird, the largest of the kingfisher family (*Dacelo gigas*). With dull greenish blue, brown freckled plumage, it has a strident, clamorous laugh, and is protected for its skill in killing reptiles and mice. The same region possesses various other laughing kingfishers.

Launceston Borough and market town of Cornwall. It stands where the Kenney falls into the Tamar, 213 m. from London, on the Gt. Western and Southern Rlys. The chief objects of interest are the castle keep, the property of the Duchy of Cornwall, and the ruins of an old prison and Norman gateway. The borough includes Newton on the other side of the Kenney, once a separate town. The town is chiefly a centre for the sale of agricultural produce. Pop. (1931) 4071.

Launceston City and river port of Tasmania. It stands where the North and South Esk unite to form the Tamar, 40 m. from the sea and is the chief town in the northern part of the island. It is connected by railway with Hobart. There is a shipping trade with Australia, other industries are smelting and the marketing of fruit. Pop. (1932) 31,210.

Laundry Establishment where washing and dressing of soiled linen and clothes is carried on. Laundry work is now done mostly by mechanical means. Rotary washing machines are used. These consist of a perforated cylindrical cage for the reception of the soiled linen, enclosed in an outer casing containing the soapy water. Hydro-extractors are used for the removal of water and the final drying is effected by dry air treatment, while ironing is carried out by gas or steam heated rollers.

In Great Britain laundries are inspected by public health officials, and there are legal provisions about the hours of employment and the workers' conditions.

Laurel Name of diverse evergreen shrubs and trees with leathery, lance shaped leaves. The laurel of antiquity was probably the Mediterranean bay tree (*Laurus nobilis*). The cherry laurel (*prunus lauro-*

cerasus) and the Portuguese laurel contain hydrocyanic acid. These three grow freely in Great Britain. Britain's only native laurel is the spurge (*Daphne laureola*). The Indian Forest Dept. call the decorative timber of the saff tree (*Terminalia*) laurel wood. North America and Japan furnish other laurels.

Laurentian Rocks Pre Cambrian metamorphosed rocks found in the Laurentian Highlands north of the St Lawrence estuary. They now rank as the undermost archaean rocks, 30,000 ft thick, upon which an upper Laurentian or Labradorian series rests unconformably. A primitive land area, called Laurentia, is thought to have existed from Canada to the Scottish Hebrides, its shores receiving the earliest palaeozoic sediments.

Laurie Annie Scottish heroine. She was a daughter of Sir Robert Laurie, a landowner of Maxwellton, Dumfriesshire, and was born in 1682. On her marriage in 1717 an unsuccessful suitor, William Douglas, wrote the song which has made her name immortal. The music was composed by Lady John Scott, who added a verse to the song.

Laurier Sir Wilfrid Canadian statesman. Born Nov 20, 1841, he was of French-Canadian, Roman Catholic parentage. He was educated at McGill University, Montreal, and became a lawyer and a journalist. In 1871 he was elected to the legislature of Quebec, and in 1874 to the House of Commons at Ottawa, where he represented East Quebec. In 1877 he was for a short time in the Cabinet.

An eloquent speaker, Laurier soon came to the front, and in 1887 was made the leader of his party, the Liberals. In 1896 a General Election gave the Liberals a majority and he became Prime Minister, a position he held for 15 important years. He gave preferential tariffs to Great Britain, restricted immigration and carried through other reforms. His proposals for reciprocity with the United States led to his defeat in 1911 and he resigned. As leader of the opposition, he favoured Canada's entry into the Great War in 1914, but objected to conscription. He died Feb 17, 1919.

Laurium Mountain in Greece. It is about 30 m south-east of Athens and was celebrated in ancient times for its silver mines. They belonged to Athens and from them the city obtained much wealth. Within recent years mining has been revived in the district and considerable quantities of silver and lead, as well as cadmium, manganese and iron, are produced.

Lausanne City of Switzerland. It stands on the north side of the Lake of Geneva, 38 m from Geneva, and is an educational and literary centre. Here Gibbon wrote much of the *Decline and Fall*. Its port is Onex on the lake and it is the capital of the canton of Vaud. It has a broadcasting station (680 M, 0.6 kW). Pop 76,200.

The Treaty of Lausanne was signed, July 24, 1923, between the Allies and Turkey. It fixed the boundaries of Turkey as they are to-day. In June, 1932, the European Powers held a conference at Lausanne to discuss the question of war debts, and especially Germany's failure to pay reparations. An agreement was reached putting an end to reparations payments, Germany in return undertaking to contribute £150,000,000 towards the reconstruction of Europe. The payment, however, was not to be made at once and was dependent on an agreement about war debts being reached

between Germany's creditors and U.S.A. The president of the conference was Mr Ramsay MacDonald (q.v.).

Lauterbrunnen Village and pleasure resort of Switzerland. It is in the Bernese Oberland, 8 m. from Interlaken, and is a good centre for the most beautiful of the Swiss scenery. Near is the Jungfrau.

Lava Molten rock poured out from a volcano. Lava may flow to a considerable distance when very fluid or form accumulations around the vent when viscous. As the lava flows, owing to the escape of steam, the surface becomes slaggy, while the interior forms a compact mass.

Laval Pierre French statesman. Born in 1883, he became a socialist. In 1908 he was mayor of Aubervilliers and a little later he was elected to the Chamber of Deputies. He was made a senator in 1924, and in 1925 was Minister of Public Works. In 1926 he was Vice-President of the Council under M. Briand, and in 1930 Minister of Labour under M. Tardieu. In Jan, 1931, he became Premier and Minister of the Interior, and it was his lot to deal with the difficulties about the payment of reparations that arose in 1932. In Jan, 1932, he reconstructed his ministry, but a little later he was forced to resign.

Laval-Montmorency François Xavier Frenob prelate. Born at Laval, of a famous family, April 30, 1823, he entered the priesthood. In 1874 he became Bishop of Quebec, and, after the governor, the most influential man in the colony. He resigned his bishopric in 1883, but remained in Canada until his death, May 6, 1908.

Laval is known as the founder of the Laval universities of Quebec and Montreal.

Lavater Johann Kaspar Swiss scientist. Born at Zürich, Nov 15, 1741, he was there educated and became a minister. His whole life was passed in his native place, and much of his time was devoted to writing and study. He wrote poems and books on mysticism, but his claim to fame is his work on physiognomy, which has been translated into English. He died Jan 2, 1801.

Lavender Genus of perennial herbs or shrubs of the labiate order (*Lavandula*). The cultivated *L. vera* bears erect branches with long stalked spikes of fragrant mauve flowers, from which an aromatic oil is distilled, 250 lb of flowers yield 1 lb of oil. In England the flowers are grown for commercial purposes at Mitcham and Hitchin. Sea lavenders are species of statice of the plumbage order.

Lavenham Town of Suffolk. It is 10 m from Bury St Edmunds, on the L N E Rly. There is a guildhall dating from the 16th century, and one of the finest churches in the county. At one time Lavenham was a flourishing market town and a centre of the cloth manufacture. Pop 2000.

Laverstoke Village of Hampshire. It stands on the Test, 2 m from Whitechurch, and contains the paper mills at which, since 1724, the paper for English bank notes has been made. They are owned by the family of Portal whose residence is Laverstoke House.

Lavery Sir John Irish artist. Born in Belfast in March, 1856, he studied art in Glasgow and then in London and Paris, and became a celebrated portrait painter. In

1912 he was created A.R.A., and in 1921 R.A. He was knighted in 1918. His work may be seen in the National Portrait Gallery, London, in the collections in Glasgow, Liverpool, Manchester and at Ottawa and elsewhere abroad.

Lavoisier Antoine Laurent, French scientist. Born in Paris, Aug. 26, 1743, and there educated, he held official positions, including that of director of the state powder works, and gave much time to chemical research. He gave the name oxygen to the "dephlogisticated air" discovered by Priestley, and by his researches established the method of weighing chemical substances. He showed that matter is indestructible, and until recent times his theory was implicitly accepted. He was made farmer general of the taxes, a position which led to his execution on May 8, 1794, a victim of the Revolution.

Law Word meaning rule or order. It is used in two main senses. The first is for an inevitable order of the universe, as the laws of motion or the laws of cause and effect.

In the second sense it refers to a rule laid down for human action, disobedience of which is likely to be followed by some penalty or inconvenience. The general name for such rules is law, the study of law is jurisprudence.

Men cannot live together in society without law, and laws appeared at a very early stage in human history. In their growth religion played a great part, and early laws were regarded as the commands of a god. This idea in modern times is partly responsible for what is known as the moral law. The early codes contain strong evidences of priestly influence.

Gradually among primitive peoples custom became an important factor in the development of law, and many early codes of law, e.g., the laws of the English before Norman times, are merely collections of accepted customs. The lawgivers of ancient times, such as Hammurabi and Moses, were not legislators in the modern sense. They did not make laws, they restated those already existent. The Greeks had a developed system of law, but modern law owes its greatest debt to the Romans.

Law has been classified in various ways. The Romans divided it into the civil, or national, law, and the law of nations, which is the basis of international law. This division premises that certain laws, or rules, are by their very nature binding upon all mankind, but others only upon a particular people or state.

Another division of law is into the civil law, and the canon, or ecclesiastical, law, and another is into the common, or unwritten law and the statute law, a classification familiar in England, while a third class is case law, or law as interpreted by the judges. In England, as in other countries, the criminal law has been separated from the civil law and this makes a further branch. Another distinction of importance to students is that between customary law and the Austinian definition of a law as the positive command of a sovereign, who has power to enforce it.

To day every country has its own legal system, influenced by the national genius and history. Each system has three essentials, an individual, or body, with power to make laws, a body of judges to declare them, and another body to enforce them. The various legislatures are the law makers. The judges declare the laws and the police, or a similar organisation, with an army in reserve, enforce them. International law must be excepted from

these statements, because as yet no power to enforce its orders has been created.

Law is one of the oldest subjects of study at the European universities. As a profession it attracts many thousands of men and a few women. Lawyers are divided into several classes, but entrance to each is everywhere a privilege guarded by educational and other tests. See BARRISTER, SOLICITOR, etc.

LAW AS A CAREER The legal profession is divided into two classes, Barristers (called in Scotland "Advocates") and Solicitors, the two are closely interdependent, but no one may practise both. A barrister can only be employed through a solicitor, since, by an ancient custom, no layman may have direct communication with the bar. In England both branches are open to women.

As Law is one of the "learned" professions, so it is one of the most exclusive, by reason of the high standard of ability necessary, no less than on account of the long and expensive courses of training. For the first four or five years of his career the young barrister will earn next to nothing, and it is well to take this fact into consideration at the outset. But for a person of sufficient ability it offers a promising career with wide opportunities, while the scope for women is increasing.

A university degree, in Law or in Arts, is the best foundation for a legal training. Also it exempts from the preliminary examinations, and reduces the period of special training to three years.

Barristers. To become a barrister, a student enrols himself as a member of one of the Inns of Court. During, or at the end of the period of special training (not less than three years), he must pass the bar examinations, for which he can prepare in several ways. He may attend the lectures arranged by the Council of Legal Examination (15 Old Square, Lincoln's Inn, London, W.C. 2), or attend university classes, or study privately, or "read in chambers." This last is usually done whether lectures and classes are attended or not. It consists of becoming a pupil to a barrister in order to gain practical experience. A fee of 100 guineas a year is payable.

The Inns of Court are four in number—Gray's and Lincoln's, the Inner and Middle Temples. Before being "called to the Bar" or certified as a qualified barrister, a student must pass the bar examinations, and must also keep twelve terms, i.e., three years. He fulfils the requirements of keeping terms by dining in hall a certain number of times each term. The number varies according to the status of the student.

Total fees (excluding a deposit of £150) are between £158 and £170, varying according to the Inn. Particulars of fees and of entrance examinations should be obtained from the Treasurer's Office of the Inn which the student intends to enter.

The Faculty of Advocates, Edinburgh, is the controlling body for admission to the Scottish Bar. The procedure and standards of the examinations are similar, but as Scots Law is different from English Law, an English barrister cannot practise in Scotland, and vice versa. The Irish Bar is controlled by the Honourable Society of King's Inn, Dublin.

Solicitors. To become a solicitor, it is necessary at the outset to pass an entrance examination set by the Law Society, the body responsible for the organisation of the profession. Membership is open to any qualified practising solicitor. It is then necessary to

enter into what is known as "service under articles" (as an articulated pupil to a firm of solicitors) for a period of five years (three for the graduate). Premiums are frequently very high—varying from 100 to 500 guineas. There is also a Government stamp duty of £80 to pay on articles and £25 on admission.

Fees for law classes, which are attended during apprenticeship, and for examinations must also be taken into account. The final examination is usually taken at the end of the period of articulated service, and success in it entitles the student to seek admission to the Roll and to practise as a solicitor.

Professional clerkships in a solicitor's office are paid anything from £200 to £500 a year, and more responsible posts are paid up to about £800 a year. In dependent practice or in partnership a successful man may expect to earn anything from £600 to £2000 a year according to the size of his business and its professional standing. The salaries of municipal and government solicitors range from £300 a year to £1500. Information concerning fees, entrance examinations, etc., may be had from the Law Society, Bell Yard, London, W C 2.

Law Andrew Bonar British politician. The son of a Presbyterian minister, he was born in New Brunswick Sept. 16, 1858, and educated in Glasgow. He entered business life in Glasgow with some relatives, and after a successful career in the iron trade he retired. In 1900 he was elected Unionist M.P. for a division of Glasgow, in 1902 he took office as Parliamentary Secretary to the Board of Trade, and in these years he made his reputation by his speeches in favour of tariff reform. In 1905 he left office and in 1906 was defeated in Glasgow, but almost at once was elected for Dulwich.

In 1911, although he had never sat in a cabinet, Bonar Law was elected leader of the Unionist Party in the House of Commons. As such he took a leading part in the great orations of July and August, 1914, and later, when the coalition ministry was formed in 1915, he became Colonial Secretary. In the crisis of Dec. 1916, he acted with Lloyd George and became Chancellor of the Exchequer and leader of the House of Commons. In 1918 he left the exchequer, but he retained his other post until March, 1921, when he resigned for reasons of health. He had represented Great Britain in Paris at the Peace Conference.

In October, 1922, after the end of the coalition, and a general election which resulted in a Unionist victory, he became Prime Minister, but in the following May he resigned. He died Oct. 30, 1923.

Law John. Scottish financier. Born April 21, 1671, he was the son of a goldsmith in Edinburgh. In 1694 he was sentenced to death for killing a man in a duel, but escaped from prison and reached Amsterdam, and for 20 years or more travelled about Europe. His acute intellect was soon turned to the possibilities of credit. He could not persuade the Parliament of Scotland to take up his idea of a land bank, but he was more successful in France. With his brother, William, he started in 1716 a bank in Paris, and in 1718 the regent allowed him to make this a national bank. For a time it flourished, and in 1719 Law founded a company to trade in the region of the Mississippi, but soon the crash came. In 1720, having just been made Controller General of Finance, Law found that he could not meet his obligations. His property was confiscated and he

left France. He lived in England in poverty for some years, and died March 21, 1729.

Law William English mystic. He was born in Northamptonshire in 1686, and educated at Cambridge. He became a clergyman but, as he refused to acknowledge George I., he did not obtain a living. For some years he was tutor to the Gihhon family, and his last years were passed quietly in Northamptonshire. He died April 9, 1761. Law wrote a good deal, but his fame rests on one book alone, *A Serious Call to a Devout and Holy Life*, 1728, long one of the most popular of its kind. He studied mysticism, became the leading interpreter in England of the ideas of Jacob Boehme, and wrote two books on the subject. He also wrote against the stage.

Law Agent Scottish equivalent of the English solicitor. They have a professional society and their duties and privileges were laid down by the law in 1863. To become a law agent the candidate must serve articles and pass examinations.

Law Court Building where justice is administered. The phrase law courts is used in England for the building in the Strand, London, in full, the Royal Courts of Justice, where the judges of the high court sit. Other capital cities have law courts. In Edinburgh the Parliament House is used, in Belfast a new building has been erected. Ottawa and Pretoria have law courts for Canada and South Africa respectively. For the German republic the law courts are in Leipzig, and for the United States at Washington.

Lawes Sir John Bennet English scientist. Born at Rothamsted, Dec. 28, 1814, he went to Eton and Brasenose College, Oxford. In 1822 he inherited his father's estate at Rothamsted and there, on leaving Oxford, he began experimenting with the growing of crops. The results were of high value to agriculture, and in 1899 the work was handed over to a trust he created, The Lawes Agricultural Trust, which still conducts it. He became F.R.S. in 1854, and in 1882 was created a baronet. Lawes died Aug. 31, 1900.

Law Lord Name given in England to the Lords of Appeal. They are six in number and sit in the House of Lords as life peers. With other members of the House of Lords who have held high judicial office they hear the appeals from the lower courts of law. In Scotland the judges of the Court of Session are made lords for life, but they are not members of the House of Lords. The salary of a law lord was £6000 a year, but was reduced by 20 per cent. in 1931.

Lawn Thin sun-bleached fabric of linen or cotton. It is used for dresses, trimmings, handkerchiefs and the like. Formerly called cloth of Rhemes, and in Tudor times Launo linen, it was named from the town of Laon. Some fine muslins are called lawns. Bishop's lawn is used for the sleeves of the robes of Anglican bishops.

Lawn Tennis Popular outdoor game played by both sexes. The implements are rackets and balls, and it is played on a court 78 ft. long and 36 ft. wide. The court is divided into two equal parts by a net and further into sections by white lines, and the aim of the players is to hit the ball so that it falls within the court, but at such a pace, or in such a position, that it cannot be returned. A failure to return the ball counts a point to the other side. The score goes 15, 30, 40, 50, so that four points can make a game.

If, however, both sides reach 40, or double, the game is continued until one side is two points ahead of the other. The side that wins six games scores a set, but here again if the sides reach 5 games each, the set cannot end until one side is two games in front. Sets of 12, 10, or threelines, are quite usual.

The game is usually played by two persons against two, but it can be played by one against one. In this case the court is less broad, in proportion at each side, 4 ft 6 in wide, being now outside it. Grass courts are the more common, but of late years many hard courts of gravel, cement or asphalt have been laid down. On these the game can be played throughout most of the winter. There are regulations about the weight and size of the balls, but none about the racquets.

There are tennis clubs all over Great Britain and Ireland, also in the United States, Canada, France, Japan and other countries. The great event of the lawn tennis year is the international meeting at Wimbledon, where players from all over the world meet to decide the various championships. Since the Great War American players have often been successful in the men's games, although France has won a number of victories. Among the women the outstanding player has been Suzanne Lenglen. In the early days of the championship matches, which began in 1877, players from Ireland were the most notable exponents of the game.

The game in Great Britain is governed by the Lawn Tennis Association which was formed in 1888. Its address is 28 Essex Street London, W.C.2. Professionals are recognised for coaching and other purposes, but are strictly debarred from matches and competitions.

The Davis Cup is contended for by male teams from the various countries. The Wightman Cup is fought out between woman players from Great Britain and the United States.

The game developed from real tennis and was at first called sphairistike (q.v.). It was played in 1874 and soon took its modern form. Names of great players include the Irish brothers Renshaw and Doherty, Borotra and Cochet, the Americans, Tilden and Ellsworth Vines, who won the singles championship in 1932, and Jack Crawford, winner in 1933. Famous women players include Suzanne Lenglen and Mrs. Helen Wills Moody.

Lawrence Christian saint and martyr. Born according to tradition, at Huesca, Spain, he became a deacon in Rome. During Valerian's persecution in 258 he was ordered to produce the church's treasures. He showed some beggars, and was sentenced to be burned alive in an iron chair, usually represented as a gridiron. The church which Constantine erected over his tomb is one of Rome's seven pilgrimage churches. He is commemorated on Aug. 10.

Lawrence Arabella Susan English politician. Born in 1871, she was educated at Newnham College, Cambridge, and began to work among the poor in London. In 1912 she became a member of the London County Council and she kept her seat until 1928. In 1923 she was chosen Labour M.P. for East Ham North and represented that constituency again, 1924-31, when she was beaten. In 1929-31 she was Parliamentary Secretary to the Ministry of Labour, and held several important posts in the Labour movement, including organiser of the National Federation of Women Workers and deputy chairman of the Labour Party.

Lawrence David Herbert English writer. Born at Eastwood Sept. 11, 1885, the son of a coal miner, he was educated in Nottingham. In 1911 he published his first novel *The White Peacock*, and in 1913 he made his name with *Sons and Lovers*, a realistic story of life among the coal miners. Henceforward his life passed partly in Mexico and partly in Italy, was occupied with literature and art. His other novels include *The Trespasser*, *The Lost Girl*, *The Plumed Serpent*, *Kangaroo*, *The Ladybird* and *The Prussian Officer*, a volume of stories *The Rainbow* was suppressed and *Lady Chatterley's Lover* was printed abroad. He wrote a good deal of verse, including a volume called *Pansies*, some essays and some plays. He died March 3, 1930.

By some Lawrence is regarded as a great literary artist, but his realism revolted many. In his genius there was a strong morbid strain.

Lawrence Lord English administrator. John Laird Mair Lawrence was born at Richmond, Yorkshire, March 4, 1811, and educated at Foyls College, Londonderry, and at Haileybury. He joined the service of the East India Company in 1820, took part in the war against the Sikhs in 1846, and when the Punjab had been conquered was given charge of it. His energy and resource did much to keep the district loyal during the Mutiny, and he was able to lead an army of Sikhs from there to the relief of Delhi. He retired in 1858, but returned to India in 1864 and served as Governor General until 1869. He was then made a baron. He died June 27, 1879, and was buried in Westminster Abbey.

Lawrence Sir Henry Montgomery English soldier. Born in Ceylon June 28, 1800, an elder brother of Lord Lawrence, he entered the Indian army in 1823. He served in the various wars of the next 25 years, including those against the Afghans and the Sikhs. In 1843 he was knighted and for a time he served with his brother in the Punjab. When the Mutiny began he was at Lucknow and he led the defence of the Residency there for four months until he was wounded, dying July 4, 1857.

Lawrence Sir Herbert Alexander English soldier. Born Aug. 8, 1861, he was a son of the great Lord Lawrence. He served in the S. African War, but later left the army for business. In 1914 he rejoined and saw service as a staff officer in Egypt and Gallipoli. Knighted in 1917, in 1918 he was Chief of the Staff to Sir Douglas Haig. In 1919 he left the army and became chairman of the banking firm of Glyn, Mills, Currie & Co., and a director of other large concerns. Since 1926 he has been Chairman of Vickers, Ltd.

Lawrence Sir Thomas English artist. He was born in Bristol, May 4, 1709, the son of an innkeeper. He painted portraits when only a child and later studied art in London. He soon made a reputation and was elected A.R.A. in 1791, and R.A. in 1794. In 1792 he was made painter to the king, and in 1815 he was knighted. In 1820 he was chosen President of the Royal Academy and he died in London, Jan. 7, 1830.

Lawrence was the most fashionable portrait painter of his day and his subjects included many notable European figures. Many Lawrence portraits are at Windsor and in the National Portrait Gallery, London.

Lawrence Thomas Edward English soldier and explorer. Born Aug. 15, 1888, he was educated at Oxford High

School and Jesus College, Oxford. A scholarship enabled him to go out to Syria in 1910, and during the next four years he learned a great deal about the Arabs and did excavation work at Caraceniush. In 1914 he was employed on geographical work at the War Office, and in 1915 he was sent out to Egypt, Turkey having just entered the war against Great Britain. He then went on to Arabia, where his knowledge of Arab life was invaluable. In that country, negotiating with the Arab tribes, organising them for war and leading them in battle, he was the mainspring of the campaign which destroyed the Turkish influence in that region. Officially he was a staff officer with the rank of colonel of the British army.

In 1919 Lawrence attended the Peace Conference in Paris, but he soon left it in disgust. He was made a fellow of All Souls College, and in 1922-23 he acted as adviser to the Colonial Office. In 1922 he enlisted as a mechanic in the air force as T. E. Shaw, a name which he took by deed poll in 1927. He wrote an account of his adventures as *The Seven Pillars of Wisdom*, 1926. An abridged edition, *Revolutions in the Desert*, appeared in 1927. He was killed in a road accident in May, 1935.

Lawson Sir Wilfrid English politician. Born Sept. 4, 1829, the son of the 1st baronet, he became M.P. for Carlisle in 1850, for Cockermonth (1886-1900), for the Camborne division (1903-05) and again for Cockermonth in 1906. He died July 1, 1906. In his day Lawson was very well known for his advocacy of temperance and kindred reforms.

Lawyer Member of any branch of the legal profession. In England and elsewhere it includes 'barristers' and solicitors; in Scotland advocates, writers to the signet and law agents. Each of these has its own professional organisation. - See BARRISTER, SOLICITOR, LAW.

Laxative Substance gently stimulating the action of the bowels. It may be a food, e.g., cabbage, brown bread, honey, prunes, or a mild medicine, e.g., sulphur, magnesia.

Laxtonberry Fruit first raised in 1930. It is a cross between the raspberry and the loganberry and is grown in the same way as the latter. To ensure fertilisation it should be planted near other fruit trees.

Layamon English poet. He was a priest who lived in Worcestershire in the 12th century. He was the author or translator of *Brut*, a poem of great value to students of the English language. He took an existing story written by Wace and turned it into rhyme. Brut, a descendant of Aeneas, is represented as the ancestor of the Britons.

Layard Sir Austen Henry English scholar. The son of a clergyman, he was born in Paris, March 5, 1817. He was educated mainly in Italy, but later studied law in London. Between 1845 and 1847 he did most valuable work on the ruins of Nineveh, publishing its results in his *Nineveh and its Remains* and other works, and sending some of his specimens to the British Museum. Later he explored the ruins of Babylon and wrote *Nineveh and Babylon*. From 1852-57 and again 1860-69 Layard sat in Parliament. From 1861-66 he was Under-Secretary for Foreign Affairs, and from 1868-69 Chlof Commissioner of Works. In 1869 he was sent

as ambassador to Madrid, and in 1877 to Constantinople. He died July 5, 1894.

Layering Method of propagation of plants in which an artificial sucker is formed by bending over and pegging down a branch into the soil. A strong shoot is chosen, the lower leaves removed, and the stem partially cut across a joint. It is then pressed into suitable soil at an angle and held in position by a peg. At the partially severed joint roots are soon formed, producing a new plant which can be detached from the parent.

Layman One who is not a professional. It is used chiefly for those who are not priests, clergymen, or ministers. Convocation in the Church of England has houses of laymen set up in 1886.

Lay Reader In the Anglican Church a layman licensed by a bishop to perform various duties. They take extra services in consecrated buildings and assist the clergy in other ways, but do not administer the communion. They were established in 1866.

Lazarette Public hospital for the quarantine of persons with contagious diseases. The word is connected with Lazarus, who is supposed to have suffered from leprosy.

Lazarists Order of secular priests. They are dedicated to missionary work in rural districts, instruction of the ignorant and training of youth for the priesthood. The order was founded by S. Vincent de Paul, confirmed by Urban VIII in 1632, and established in the College de S. Lazaro, Paris. They are also called Vincentians.

Lazarus Character in the New Testament. He was a wealthy and influential native of Bethany, whom Jesus raised from the dead (John xi-xii), and with whom and his sisters Martha and Mary, he was a frequent guest.

Another Lazarus is the beggar mentioned in the parable of the rich man (Luke xvi). The word is the Greek form of the Hebrew Eleazar.

Lazulite Blue or greenish-blue vitreous mineral occurring in Switzerland, Sweden and Brazil. It consists of phosphate of aluminium and iron with some magnesium hydroxide.

Leacock Stephen Butler Canadian writer. Born in Hampshire, Dec. 30, 1869, he went to Canada when a child and was educated at Upper Canada College and the University of Toronto. For some years he was a teacher at his old school, but in 1903 he became Lecturer in Political Science at McGill University, Montreal, and in 1908 he was appointed Professor of Political Economy there. Leacock wrote several books on political economy, including *Practical Political Economy*, 1910, and also biographies and essays on literary subjects. His reputation, as far as the general public is concerned, rests on his volumes of short, humorous stories, such as *Literary Lapses*, *Nonsense Novels*, *My Discovery of England*, *Moonbeams from the Larger Lunacy*, *Short Circuits* and *Winnovied Wisdom*. In 1932 *The Dry Pickwick* appeared.

Lead Important metallic element. It has the symbol Pb, atomic weight 207.2 and melting point 327°C, and is one of the most widely distributed and useful of metals. Its principal ore is the sulphide, galena and cerussite, the carbonate is also valuable.

Lead is a very soft, bluish grey metal, very malleable, ductile and heavy, but with little tenacity. It readily tarnishes in moist air but the layer of oxide formed protects the surface from further change. The metal is used in sheet and other forms for roofing, pipes, cisterns, etc., and its compounds have many industrial applications.

The world's annual production of lead is about 1,400,000 tons, or rather more than the consumption. As it is chiefly mined with silver, it is not surprising that the United States and Mexico provide half the supply. Australia, Canada, Germany and Spain produce each over 100,000 tons a year. Burma is the next producer and the large supplies in Rhodesia are not yet fully worked. Great Britain produces about 10,500 tons a year.

Lead Plummet or sinker used for sounding the depth of the sea. Shallow waters are easily sounded by letting down a piece of lead attached to a marked line and greased with tallow, which brings up samples of the sea bottom.

Leadenhall Market in London, between Cornhill and Aldgate. It dates from the 13th century, and is the chief London market for poultry. The buildings date from 1881 and are entered from Leadenhall and Gracechurch Streets. The site of East India House in Leadenhall Street is now occupied by the building of Lloyd's.

Leader Benjamin Williams, English artist. Born at Worcester, March 12, 1831, the son of E. Leader Williams, he studied art in his native town, and in London, and made a reputation by his English landscape. In 1883 he was elected A.R.A. and in 1888 R.A. He died March 22, 1923.

Leadhills Village of Lanarkshire, 18 m from Lanark and on the L.N.S. Ry. Here are some old lead and silver mines and the village, 1300 ft up, is one of the highest in Scotland. Pop. 850.

Leaf Outgrowth from the stem of a plant forming a lateral expansion of varying form and function. In a foliage leaf the outsole and epidermis have numerous openings or stomata leading to the air spaces in the cellular tissue or mesophyll and functioning in transpiration. The mesophyll is traversed by veins or vascular bundles, continuous with those of the stem, and it contains the chlorophyll grains which give the green colour to the leaf and function in carbon assimilation under the action of sunlight. A typical foliage leaf consists of a leaf base, stalk or petiole, and blade or lamina.

League Association or alliance of a permanent character, especially between states. They existed among the Greek states. The Hanseatic League was a union of cities chiefly German, for economic ends, which was at its height in the 14th century and a modern example is the League of Nations.

To day the word is used for political and social organisations such as the Anti Gambling League. It is also much used in sport for a group of clubs which play matches with each other for a championship.

League Name given to a measure of length. It varies in different countries but in Britain it is equivalent to three English miles or in nautical measure to three knots or the twentieth part of a degree. The Gallic or Roman league was equal to 1500 paces or roughly one and a third English miles.

League of Nations International organisation. It came into existence Jan. 10, 1920, as part of the treaty that followed the Great War. Its headquarters are at Geneva. It has over 50 members, including all the leading countries of the world except the United States, Germany, Mexico and Brazil. Each of the dominions of the British Empire is a separate member with its own vote. English and French are the official languages. The cost of the league is over £1,000,000 a year, paid by subscriptions from its members.

The aims of the League are laid down in the Covenant. The High Contracting Parties, in order to promote international co-operation and to achieve international peace and security by the acceptance of obligations not to resort to war, by the prescription of open, just and honourable relations between nations, by the firm establishment of the understanding of international law as the actual rule of conduct among Governments and by the maintenance of justice and a scrupulous respect for all treaty obligations in the dealings of organised peoples with one another, agree to this Covenant of the League of Nations.

The Covenant of the League contains fundamental clauses on the prevention and settlement of disputes. These clauses bind nations who are members of the League not to employ force for the settlement of a dispute until they have first submitted it to the League of Nations (or to arbitrators or to judges), waited at least six months for the award or decision, and then allowed at least three more months to elapse.

The organisation of the League is in five sections. The assembly is a meeting held each September when three representatives from each member state attend. The council, which meets at least four times a year, consists of representatives from five states that are permanent members and from nine others who are temporary members. The permanent members are Great Britain, France, Italy, Russia and Japan. The temporary members are elected each year. The Secretariat, under the Secretary General, is the civil service of the League. The two other departments are the permanent Court of International Justice at the Hague and the International Labour Office at Geneva, which aims at improving the condition of labour all over the world.

Besides dealing with matters concerning boundaries, health, finances, transit, etc., the League has controlled mandated territories, governed the Saar till it returned to Germany by plebiscite vote in March, 1935 and helped to govern Danzig. It strove to settle the Sino-Japanese dispute 1932-3, and the Gran Chaco war between Bolivia and Paraguay settled June, 1935 after the withdrawal of Paraguay from the League in February.

In Jan., 1935, the League mediated between Yugoslavia and Hungary when hostilities were threatened after the Marseilles assassinations, and from Jan. received continuous notes from the parties to the Italo-Abyssinian dispute. After rejection of many peace proposals, including those of the 5 power Committee, Italy was declared aggressor in Oct., 1935, and 51 members agreed to the operation of Sanctions, Austria and Hungary alone declining.

Important conferences on disarmament (1932-5) have also been called under the auspices of the League.

Leamington Borough and inland watering place of Warwickshire. It stands on the Leam, 2 m from Warwick and 98 from London. There are pump rooms and gardens and much accommodation for visitors. Its early name was Leamington Priors, altered afterwards to Royal Leamington Spa. Pop (1931) 29,662.

Leander In Greek story the lover of Hero, the priestess of Sestos. In order to visit her he swam the Hellespont from Abydos. One night the light from the lighthouse at Sestos failed him and he was drowned. The Leander Rowing Club with headquarters at Putney, London, was founded in 1818.

Leap Year Year of 366 days occurring every 4 years. It was introduced by Julius Caesar in 46 B.C. in the Julian calendar, in order to adjust the calendar year to the solar year, which is not quite 365½ days. The slight over-correction is put right by omitting leap year at the proper long intervals.

Lear Edward. English writer of Danish descent. Born in London, May 12, 1812. He became a draughtsman. He exhibited regularly at the Royal Academy and spent much time in travel, writing and illustrating accounts of his journeys. In 1846 he published *The Book of Nonsense*, and on this and his other volumes of verses, *More Nonsense Rhymes and Laughable Lyrics*, his fame rests. He died Jan. 30, 1888.

Lease Word used in English law in connection with real property. A lease is granted by an owner called the lessor to a tenant called the lessee. Farms and large houses are usually let on lease, the period being usually 7 or 14 years, though it may be less or more. A lease for three years or more must be in writing. In the case of repairing leases the tenant must keep the premises in good repair.

A mining lease is a permission to work minerals. It is given by the owner of the land who usually receives payment in the form of a royalty on each ton of mineral taken out of the ground. Coal, tin and other minerals and metals are worked in Great Britain under mining leases.

Leasehold Name used in England for land held on a lease, the other kind of land being freehold. In a sense, however, all land is freehold, as someone owns the freehold of a piece of leasehold land. Leasehold land is let out for a term of years, usually 99, for building purposes, the payment for it being called the ground rent. At the end of the period the land and the buildings thereon become the property of the person who owns the land, or his successors. Several attempts have been made to end this system, but without success. It is, however, possible to convert a leasehold into a freehold by buying the land outright. Leaseholds are regarded in English law as personal not as real property.

Leasing In Scots law the offence of making seditious statements about the King and the government of the country. It is not now treated as a crime, unless accompanied by seditious action.

Leather Skin or hide of an animal after being subjected to the process known as tanning, which preserves it from decomposition and gives it increased strength, toughness and insolubility for use in making footwear, gloves, saddlery, bags, etc. The skins of oxen, horses, sheep and

goats are commonly used, but seal, whale, fish and alligator skins have their own special application.

In preparing leather the hide is first cleaned, removing the hair, flesh, etc., and then tanned by one of the many methods now in use. In bark tanning the hides are steeped in an infusion of tannin, made from oak bark or other vegetable material, until conversion into leather is complete. In chrome tanning chromium compounds are used, giving a highly resistant material. Chamois leather is prepared by an oil treatment producing a soft pliable form of leather.

In England the main centres of the leather industry are Bournemouth, London and Leeds. In Bournemouth a technical college is maintained by the Leathersellers' Company, founded in 1441, one of the London livery companies. It has large estates, is interested in Colfe's Grammar School at Lewisham, and has a hall at 13 St. Helen's Place, Bishopsgate, London E.C.

Leatherhead Urban district of Surrey. It stands on the Mole, 18 m from London on the S. Rly. It is regarded as the original of picturesque Highbury in Jane Austen's *Emma*. Tanning, brewing and the making of bricks and pottery are the chief industries. Pop (1931) 6916.

Leatherwood Sole American genus of shrubs of the spurge laurel order (*Dirca*). The Atlantic and Californian species yield a tough inner bark used by N. American Indians for fibrous thongs. Their acid properties are deleterious, both externally and internally.

Leatherwood is also the name of the close-grained timber of a tree that grows in New South Wales. It belongs to the saxifrage order and has a distinctive odour.

Leaven Term applied to the substance used in bread making to cause the dough to rise, thus giving a spongy texture. This is due to fermentation and the production of minute bubbles of carbonic acid gas in the dough. The usual leaven is fermented dough prepared from flour mixed with water, salt and yeast. Aerated bread is made by forcing carbonic acid gas under pressure into the dough, thus giving porosity to the bread.

Lebanon Range of mountains in Syria. It is about 100 m long and runs almost parallel to the Mediterranean. The average height of the mountains is about 7000 ft., though some exceed 10,000. Solomon's Temple was largely built of cedar wood from Lebanon.

Lebanon Republic of Syria. It is governed by France under mandate from the League of Nations. Formerly part of Syria, it was made a state in 1920. Its boundaries are the Mediterranean on the W., the Anti-Lebanon range on the E. and Palestine on the S. Its area is about 4300 sq. m. Beirut is the capital. Pop. 862,600.

Leblanc Nicolas. French scientist. Born in 1742, his fame rests upon the process for making soda from salt which he discovered by using sulphuric acid heated by a mixture of chalk and charcoal. He started a factory, but this was taken from him during the French Revolution. Late in the 19th century, his process was replaced by the Solvay method. Leblanc committed suicide, Jan. 16, 1806.

Le Bourget See BOURGET, LE

Lebrun Albert French politician Born in Lorraine, Aug 29, 1871, he was educated at Nancy where he studied engineering. In 1900 he was elected to the Chamber of Deputies, and in 1911 he was made Minister of Commerce, a post he held until 1913 when he was Minister of War for a few months. In 1917 he was Minister of Blockade under Clemenceau, and in 1920 Minister of the Liberated Regions. In 1920 he was elected to the Senate, and in 1926 became its vice president. He succeeded M. Doumer as President of the Senate in May, 1931. A year later, after Doumer's murder, he was elected President of the Republic.

Le Brun Charles French artist. Born in Paris, Feb 24, 1610, he showed early talent. After spending some years in Rome he returned to France and was chosen by Colbert as the first director of the Gobelins tapestry factory. He founded the Royal Academy of Fine Arts in Paris and the French School at Rome. His work is seen in some of the decorations at Versailles. He died Feb 12, 1690, in Paris.

Le Brun Marie Louise Elizabeth Vigée French artist. Born in Paris, April 16, 1755, she studied under Vernet, and showed great skill in portraiture at an early age. In 1775 she married the painter Joan Baptiste Le Brun, and for some years was a fashionable portrait painter in Paris and a member of the Academy. Her works number over 600 portraits and 200 landscapes. Six of her paintings are in the Louvre, and she is represented in the National Gallery, London. She died in Paris, March 30, 1842.

Le Cateau Town of France. It stands on the River Salle, 15 m from Cambrai. There in the Middle Ages the Bishop of Cambrai built a castle and the place was called Cambrai-le Cateau. It was then in Flanders, but in 1678 it became part of France. In 1559 a treaty between France and Spain was made here. Pop 12,000.

During the Great War, Le Cateau was continuously in the fighting area. During the retreat from Mons Sir H. Smith-Dorrien and his corps made a stand here on Aug 26, 1914. The British, about 52,000 strong, held back the enemy until the afternoon, when the retreat was continued.

The second Battle of Le Cateau was fought Oct. 6, 1918, part of the final British advance. Three armies were engaged and a great deal of ground was recovered, including Le Cateau.

Lecky William Edward Hartpole Irish historian. Born near Dublin, March 26, 1838, he was educated at Choltenham and Trinity College, Dublin, and became one of the foremost historians of the age. He was Unionist M.P. for Dublin University from 1895 to 1903. He died Oct. 22, 1903.

Lecky's chief works are two philosophical studies of great value and interest, *The Rise and Influence of Rationalism in Europe* and *The History of European Morals*, as well as *A History of England during the 18th Century*. He was given the Order of Merit in 1902. His *Life* was written by his widow.

Leconfield Baron English title borne by the family of Wyndham. The first earl was George Wyndham, an illegitimate son of the last Earl of Egremont. He inherited the earl's great

wealth and was made a baron in 1859. The estates are around Potworth House, the family seat near Chichester.

Lecouvreur Adrienne French actress. Born April 5, 1692, she first appeared on the stage in 1717. She soon made a reputation and for some years was the greatest tragic actress of the time. She died March 20, 1730. Madame Lecouvreur was also famous for her lovers, who included Voltaire and Marshal Saxe.

Lectern Term applied to reading desk in churches from which the lessons are read. It is made of wood often elaborately carved, or of brass or bronze, and usually takes the form of an eagle with outstretched wings supported on a central column.

Lectionary Book containing portions of Scripture prescribed for reading at public worship throughout the year, or a table of such lessons or lessons. The practice of public Scripture reading, established in the Jewish synagogue, was continued in the early Christian church. The table of lessons in the Anglican prayer book was replaced by a new lectionary in 1879.

Leda In Greek mythology, the wife of Tyndareus, King of Sparta. Zens, in the form of a swan, visited her when bathing. She thus became in one version of the story the mother of Castor and Pollux, Clytemnestra and Helen of Troy. The Leda and swan motive is represented on classical marbles, terra cottas, gems and wall paintings.

Ledbury Market town and urban district of Herefordshire. 13 m from Hereford, on the G.W. Rly. The chief buildings are the church, with a detached tower, and the market house, and an institute is named after Elizabeth Barrett Browning who lived here. The main industries are tanning and malting. Pop (1931), 3283.

Ledger In bookkeeping the principal account book of a business. Into it all debits and credits are posted from the journals, cash book, etc., so that it gives a complete record of financial transactions.

Lee Nautical term. It is the side away from the one from which the wind blows, and therefore the sheltered side. The other is the windward or weather side.

Lee District of London in the borough of Lewisham, about 7 m S of the City on the S. Rly. There is a chapel built by Christopher Boone and almshouses of the Merchant Taylors Company. The manor house, once a residence of the Earl of Northbrook, is now a public library.

Lee River of England. It rises in Bedfordshire and flows into the Thames near Blackwall, 46 m long and navigable. It is used to feed the New River. From Enfield Lock to Hackney a channel has been cut. The Stort is its chief tributary, and it is managed by a conservancy board with headquarters in London. The name is sometimes spelled Lea.

Lee River of Cork. Irish Free State. It rises in a lake and flows through the county for 45 m until it falls into Cork Harbour. It passes Macroom and flows in two arms past Cork, to which city it is navigable.

Lee Nathaniel English dramatist. Born in 1653, he was educated at Westminster School and Trinity College, Cambridge. He became an actor, but was more successful

as a writer of plays. He lived a very dissolute life and passed some years in Bethlehem Hospital. He died in 1692. Lee's dramas include *Nero*, *Glomana, or the Court of Augustus Caesar*, *The Rival Queens* or *Alexander the Great*, and several others. With Dryden he wrote two tragedies in blank verse, *The Duke of Guise* and *Oedipus*.

Lee Robert Edward. American soldier. Born in Virginia, Jan 19, 1807, the son of a general, Henry Lee, he became an officer in the army. He served in the engineers and gained experience in the war against Mexico (1846), and in service against the Indians. From 1852-55 he was Superintendent of West Point.

In 1861, on the outbreak of the Civil War, Lee threw in his lot with the Southerners and commanded a force sent to the confederate army from Virginia. In 1862 he was promoted to command the forces around Richmond and there he won some conspicuous successes, completely turning the tide of war for a time in favour of the south. In 1863 he won a great victory at Chancellorsville, and, although defeated at Gettysburg, he managed to hold his own against superior forces who were aided by the command of the sea. In 1864 he conducted the famous Wilderness Campaign and succeeded in thwarting his opponent, Grant. In Feb. 1865, Lee was put in command of all the southern forces, but by then they were too weak to make any impression on the strengthened Northerners. On April 9, 1865, he was surrounded and forced to surrender at Appomattox Court House. In a short time he was pardoned, and he was President of Washington College, Lexington, from 1865 to Oct. 12, 1870, when he died.

Lee Sir Sidney. English writer. Born in London, Dec 5, 1859, his name was Solomon Lazarus. He was educated at the City of London School and Balliol College, Oxford. He began his literary career on the staff of *The Dictionary of National Biography*, and in 1891 was made its editor, being now known as Sidney Lee. In 1898 his *Life of Shakespeare* appeared, and a revised edition in 1915. He also wrote *Lives of Queen Victoria* and *Edward VII*. His other books include *Great Englishmen of the 16th Century*, and *The Principles of Biography*. He was Professor of English Language and Literature at the East London College, and received many academic honours, including a fellowship of the British Academy. He was knighted in 1911 and died March 3, 1926.

Lee Sydney. English artist. Born in 1866, he studied art in Manchester and Paris. He won several prizes by his etchings and engravings as well as his paintings. His picture "Among the Dolomites" was bought for the nation and he has pictures in Liverpool, Glasgow and other cities, as well as in the South Kensington Museum. He was elected A.R.A. in 1922 and R.A. in 1930.

Lee William. English inventor. Born at Calverton, Nottinghamshire about 1560, he was educated at Cambridge. He became a clergyman and was at Calverton from 1582 to 1593. While there he invented a frame for knitting stockings more quickly than they could be knitted by hand. He took it to London and made a success of it. His concluding days were passed in Rouen and in Paris where he died about 1610.

Leech Order of segmented worms. They possess suckers at one or both ends and live on the blood of animals. There are many species, some living in water and others in marsh land. The best known, both found in England, are the horse leech and the smaller leech much used at one time by medical men. The latter is about 2 in. long and sucks by making a triple wound with the tooth-like plate in its mouth.

Leech John. English artist. Born in London, Aug 29, 1817, he was educated at the Charterhouse. In 1841 he joined the staff of *Punch*, and his 3000 drawings in that journal show a fund of humour, combined with great technical skill, and form a most valuable companion to the history of the age. He illustrated *The Christmas Carol* by Dickens, and other books. Many of his drawings are in the South Kensington Museum. He died in London, Oct. 29, 1864.

Leeds City and county borough of Yorkshire (W.R.). It stands on the Aire, 185 m. from London, and is served by both the L.M.S. and L.N.E. Rlys., as well as by canals to both the E. and the W. coast. St Peter's is the parish church, while the Roman Catholics have the Cathedral, St Anne's Parks and open spaces include Roundhay Park and Woodhouse Moor. The ruins of Kirkstall Abbey and the estate of Temple Newsam belong to the city.

The chief industry of Leeds is the manufacture of cloth and clothing. Others are engineering works, leather works, printing works and factories for making shoes, chemicals, glass, etc. Leeds was made a county borough in 1888 and its boundaries were extended in 1912. In 1897 its mayor was made a lord mayor. Pop. (1931) 482,789.

The University of Leeds was founded in 1904, its nucleus being Yorkshire College, which consisted of the Leeds College of Medicine and the Yorkshire College of Science. It has fine buildings, including a block erected in 1928-32, and possesses equipment for all branches of scientific study. Its medical school is famous.

The Leeds and Liverpool Canal is a waterway, 127 m. long, connecting the district with the Morsey.

Leeds Village of Kent. It is 4 m. from Maidstone. There are ruins of a castle. The building was formerly a fortress and its gateway and the drawbridge over the moat remain.

Leeds Duke of. English title borne since 1694 by the family of Osborne. Sir Edward Osborne was a London apprentice in the 16th century. He married his master's daughter and became very rich. His grandson, Edward, inherited his wealth, including estates in Yorkshire, and was made a baronet. His son, Thomas Osborne, was made Earl of Danby in 1674, and Duke of Leeds 20 years later. The titles passed to the duke's son and other descendants. Francis, the 5th duke, married the heiress of the Earl of Holderness and obtained Hornby Castle. He was Secretary of State from 1783 to 1789. When the 7th duke died in 1859, the title passed to a younger son of the 5th duke, whose descendant still holds it.

In 1931 the 11th duke sold the family estates, including Hornby Castle, which was pulled down. The duke's eldest son is known as the Marquess of Carmarthen.

Lee-Enfield Name given to the type of rifle modified from

the Lee Metford and adopted by the British army and navy. The rifle has a length of 44½ in., with a weight of 8 lb 14½ oz., and a calibre of .303 in. The range is 2000 to 3700 yards, for which there are two sets of sights. The magazine holds ten cartridges, fed to the barrel by a spring worked by a bolt action.

Lee of Fareham

Viscount Eng-lish politician
Arthur Hamilton Lee was born Nov. 8, 1868, and educated at Cheltenham College. After a course at Woolwich he passed into the army and served therein until 1900. For part of the time (1893-98) he was a professor at the Royal Military Academy, Kingston, Canada. In 1900 he was elected Unionist M.P. for the Fareham division, and from 1903-05 he was Civil Lord of the Admiralty. In 1915 he became Parliamentary Secretary to the Ministry of Munitions and in 1917-18 he was Director General of Food Production. In 1919 he was made Minister of Agriculture, and in 1921 he became First Lord of the Admiralty. He resigned in Nov., 1922, having represented Great Britain at the Washington Conference. Since then he has been chairman of important royal commissions and actively connected with Anglo-American and other movements. In 1918 Lee was made a baron and in 1922 a viscount. He inherited the estate of Chequers (qv), which, in 1921, he presented to the nation.

Lee-on-the-Solent Watering place of Hampshire, 9½ m. from London, on the S. Ry. Here are good sands and bathing.

Leek Hardy biennial bulbous herb of the lily order (*Allium porrum*). It is grown from seed and later transplanted into trenches. The root is blanched like celery and cooked and eaten as a vegetable. The leek is the national emblem of Wales and is worn on March 1, St. David's Day.

Leek Urban district of Staffordshire. It stands on the L.M.S. Ry., 164 m. from London and is also served by a canal. Its fine old church of St. Edward has four Saxon crosses. The main industry is the manufacture of silk. Near the town is Rindyard Lake. Pop. (1931) 18,556.

Lees-Smith Hastings Bertrand Eng-lish politician. He was born in India in 1878, and educated at Aldenham School and for the army at Woolwich, but he abandoned a military career and graduated at Queen's College, Oxford. He became known as an economist, and was connected with Ruskin College, Oxford, and the London School of Economics. In 1910 he was elected M.P. for Northampton, and he sat in the House of Commons as a Liberal until 1918. In 1922 he joined the Labour Party, and was elected M.P. for the Kelghley division, but lost his seat in 1931. In 1929 Lees-Smith was made Postmaster General in the Labour Ministry, and in 1931 he was for a few months President of the Board of Education. He resigned office in Aug., 1931, and in Oct. lost his seat in Parliament but was returned for Kelghley in 1935.

Leeward Islands Group of islands in the W. Indies. They lie between the Atlantic Ocean and the Caribbean Sea and are called Leeward because of their position with regard to the trade winds. They extend from Puerto Rico to Martinique and the British Islands include Dominica, Montserrat, St. Kitts, Antigua

Anguilla, Nevis and some of the Virgin Islands. Barbuda and Redonda are dependencies. They cover 715 sq. m., and around a governor, executive and councils. Antigua is the seat of government. Sugar and molasses are produced, and lime juice is made. Cotton and tobacco are grown. In 1933 it was proposed to unite the Leeward and Windward Islands under one governor, with headquarters at St. Lucia, and to name the new colony the British Caribbean Islands. Pop. (1931) 127,820.

Martinique, Guadeloupe and St. Martin belong to France. Those of the Virgin Islands that are not British belong to the U.S.A., having been bought from Denmark in 1916.

Left In politics a party holding advanced views radicals or socialists. When the National Assembly met at Versailles in 1789 the extremists sat on the left of the hall, the moderates on the right.

Leg Limb supporting and moving the body. Most vertebrates have two pairs. Insects have normally three pairs, spiders, four, higher crustacea, five, some millipedes more than 100 pairs. The human leg or shank contains the tibia or shin bone which enters into the knee joint and, aided by the fibula, into the ankle joint.

Legacy Money or property left to a person by will. A gift of a particular thing, a picture by Reynolds for instance, is a specific legacy. A general legacy is a gift of money out of the estate. If there is not enough money to pay all the legacies each must accept the same proportion, unless, by the terms of the will one or more legacies are to have preference.

Legacy Duty Tax payable by persons who receive personal property owing to the death of another. In the case of real estate the same duty is payable, but it is called succession duty. Both rank as death duties. Legacy duty is payable by the recipient unless the person leaving the money orders it to be paid from the estate. The rate is 1 per cent to husband, wife or lineal descendants, 5 per cent. to brothers and sisters and their descendants and 10 per cent. to all other persons.

The duty is not payable when the total value of an estate is £15,000 or less, nor when the sum left to a widow or child under 21 years of age does not exceed £2000, nor when the total amount received by a husband, wife or lineal descendant does not exceed £1000.

Legal Tender Money or currency legally be paid. In Great Britain and N. Ireland notes of £1 and 10s. are legal tender for payments of any amount. Bank notes of greater value than £1 are legal tender in England and Wales only. Gold coins are legal tender to any amount. Silver coins are legal tender up to £2 and bronze ones up to 1s.

Legate Ambassador, also called a nuncio, sent by the pope on errands of importance. They are usually cardinals and members of the papal court.

Legation Term used for the minister to a foreign country and his staff. It is also used for the building in which they conduct their business unless this ranks as an embassy. The land on which it stands is regarded by international law as part of the country it represents and the building is usually free from all rates and taxes.

Legend Something appointed to be read. Originally it was a

passage of Scripture read in divine worship and later something from the lives of the saints in monastic refectories, *e.g.*, Voragine's *Golden Legend*. It embraced also secular tales, *e.g.*, Chaucer's *Legend of Good Women*. From their fabulous tendency the word came to denote a story, often fancifully embroidered, differing from a myth because it concerned a nation, family or individual, and had a basis of truth. It denotes also an inscription on a coin, monument, or coat of arms.

Leghorn City and seaport of Italy, called Livorno by the Italians on the W coast, 12 m from Pisa and 50 from Florence. Its fine harbour, enlarged in the 20th century, has made shipping the chief industry, along with shipbuilding and glass-making. At one time the city was famous for its straw hats and for a breed of fowl popular in Great Britain.

Leghorn, when a very small place, passed from one ruler to another until, in 1421, it became a dependency of Florence, then ruled by the Medici family, who made it a place of some importance. Pop (1931) 124,391.

Legion Unit of the Roman Army usually fixed at about 6000. In addition each legion had 300 cavalry and a number of auxiliary troops. There were 25 or 30 legions, each divided into 10 numbered cohorts, with an eagle as a standard.

Legion of Honour French order, founded by Napoleon in 1802. The president of the republic is the grand master, and there is a chancellor and a council. The badge is a five armed cross surmounted by a laurel wreath and suspended by a red ribbon. Soldiers, sailors and civilians are alike eligible for membership, which, during the Great War, was given to soldiers of the allied countries. It was also given to towns in France and Belgium. Members are divided into five classes: grand cross, grand officer, commander, officer and chevalier.

In 1930 the Irish Free State decided to establish a Legion of Honour.

Legislation Making of laws. The making of new laws to meet changing conditions is an important part of the work of the modern state. In Great Britain legislation is primary, *i.e.*, the making of laws proper, or secondary, *i.e.*, the making of rules by local authorities or departments, to carry out the laws.

There is a Society of Comparative Legislation at 1 Elm Court, Temple, EC 4. See LAW.

Legislature Name used for any body that has the power of making laws. In Great Britain and other parts of the British Empire it is the two Houses of Parliament, in the United States the two Houses of Congress, and in France the Chamber of Deputies and the Senate. In some cases the legislative powers are limited by the constitution, which may often contain clauses defining the powers of each house. See PARLIAMENT.

Legitimacy State of being lawful or legitimate. It is usually applied in English and Scottish Law to cases of marriage and birth. Marriages are legitimate if neither party has a husband or wife living and if other conditions as to age and relationship are observed. Children are legitimate if they are born in lawful wedlock, or if the parents are subsequently married. If not they are illegitimate. Before 1926 a

subsequent marriage did not make children legitimate in England, although it did so in Scotland and other countries where Roman law prevailed.

Legitimists Name used for those who support the claim to the throne of a fallen dynasty. They believe that, although kings may lose their thrones, they cannot lose their rights, and therefore their claims remain good. In Great Britain the Jacobites, who hold that a descendant of Charles I is the rightful sovereign, are legitimists. In France the legitimists believe in the claims of the Bourbons, in Spain they support the claim of Alphonso XIII and his sons. See JACOBITES.

Legros Alphonse French artist. Born at Dijon, May 8, 1837, of humble parents, he worked for a time as a painter and decorator. He studied art and settled in London, where he taught etching at S Kensington. In 1876 he was appointed Slade Professor of Fine Art at University College, London, a post he held until 1892. Legros died Dec 8, 1911.

Legumin Nitrogenous substance or protein. It forms one of the constituents of the reserve food material occurring in the seeds of the pea and broad bean, and belongs to the group of globulins, distinguished by their insolubility in water and solubility in saline solutions.

Lehar Franz Hungarian composer. Born April 30, 1870, after studying at Vienna and Prague he became a conductor, producing his first opera, *Kukushka*, subsequently called *Tahana*, in 1896. His charming melodies and waltzes have earned him great popularity, and among his successes may be mentioned *The Merry Widow*, *Paganini*, *Gypsy Love* and *Frederica*.

Leibnitz Gottfried Wilhelm German scholar. Born at Leipzig, July 6, 1646, he lived for some time in Paris and visited London. His early study of the law was abandoned for mathematics, and he discovered a new method of the calculus, which led to a dispute with Sir Isaac Newton. He invented a calculating machine.

In 1676 Leibnitz was made librarian to the Duke of Brunswick at Hanover, and there he became a trusted friend of the family. He tried to reform the coinage, and to bring about something like a union of Christendom. In 1700 he persuaded Frederick I, King of Prussia, to found the Academy of Sciences at Berlin, and of this he was made president. He died at Hanover Nov 14, 1716.

Leibnitz possessed a powerful and original mind, his interests were multifarious and his influence great, but his best work was done as a philosopher. He expounded a system in which substance consists of atoms, or monads, each self-contained and individual, the whole forming a perfect harmony with its centre and creator, God.

Leicester City and county town of Leicestershire. It stands on the Soar, 99 m from London, on the LMS and LNE Rlys, and has two canals. The County Hall, used for the assizes, includes the dining hall of the castle around which the town grew. Trinity Hospital is an old almshouse, the chantry house is now a museum, and there is a 14th century gateway. Leicester has a university college, a school of art and a technical school. St Martin's church is now the cathedral. There are several fine parks.

including Bradgate and Abbey, both with historical associations

The making of hosiery is the principal industry there are also factories for making boots and shoes, cotton goods, etc. In 1919 Leicester was made a city and in 1927 it became the seat of a bishop. In 1928 its mayor was given the title of Lord Mayor. Leicester occupies the site of the Roman station, *Ratae*, and there are Roman remains as well as remains of its mediæval walls. Pop (1931) 239,111

Leicester Earl of English title borne by several families. The first earls were the Norman Beaumonts and later came Simon de Montfort (1206) Edmund Earl of Lancaster, a son of Henry III (1265) and in 1664 Robert Dudley Robert Sidney, a brother of Sir Philip Sidney, was made earl in 1618 and the Sidneys held the title until 1743. Thomas Coke was earl from 1744 to 1759, and the Townshend family held the earldom from 1784 to 1855.

In 1837, Thomas William Coke was made earl, his title distinguished as Leicester of Holkham. He was a son of Robert Wynnman, who took the name of Coke when succeeding to the estates of his uncle, the Earl of Leicester, who died in 1759. Thomas W. Coke, born May 6, 1762, inherited the estates in 1776 and became the most famous agriculturist of his day. He was for years an M.P. and a leading social figure. He drained and cultivated the land around his Norfolk seat, Holkham Hall, making it very productive. He did much to improve the breed of sheep and cattle and the quality of the crops. He died June 30, 1842, and the title is still held by a descendant. The earl's eldest son is called Viscount Coke.

Leicester Earl of English courtier Robert Dudley was born about 1532, a younger son of John Dudley Duke of Northumberland. He was a member of parliament and served as a soldier, but he is best known as the husband of Amy Robsart and the suitor of Queen Elizabeth, whom he entertained in his magnificent castle at Kenilworth in 1575. In 1580 Amy Robsart, whom he married in 1550, died at Osmor place, Oxford, probably by foul play. In 1573 he married Lady Shenfield and in 1578 he bigamously married Lettice, Countess of Essex, but all the time he was paying his addresses to Elizabeth. In 1564 Dudley was made an earl, and in 1585 he was sent with an army to the Netherlands, but he showed no great military skill. In 1586-87 he was Governor of the United Provinces, and in 1588 he commanded the force at Tilbury gathered to meet the Spaniards. He died Sept 4, 1588, it is said by poison.

Leicestershire County of England. It covers 823 sq. m. and is mainly level, but contains Charnwood Forest with its hills and the Wolds in the N.E. Agriculture is the chief industry, and there is some coal mining. Leicester is the county town. Other places are Loughborough, Hinckley, Market Harborough and Coalville. Ashby de la Zouch, Lutterworth and Belvoir are places of historic interest, and Melton Mowbray a hunting centre. The county is a famous hunting shire and is a first-class cricketing county. Pop (1931) 302,083.

The Leicestershire Regiment was raised in 1688 and known as the 17th Foot. It has a long record of service and is called The

Tigers, from the regimental badge granted in 1804. The depot is at Leicester.

Leiden Town of the Netherlands, also called *Loyden*, 9 m. from the Hague. The Old Rhine flows through the town, which is well served by railways. There is a hutter market and a weigh house, and the museums contain valuable collections of antiquities and works of art. The industries include cloth making, printing and a trade in farm produce.

Leiden is famous for its university, founded in 1575, at one time one of the greatest centres of learning in Europe. The great event in its history was its siege by the Spaniards in 1572-73, when it was relieved by flooding the adjacent land. Pop (1932) 71,598.

Leigh Borough and market town of Lancashire, 11 m. from Manchester on the L.M.S. Rly. The main industry is the manufacture of cotton. Pop (1931) 45,313.

Leigh-on-Sea Watering place of Essex. It is on the Thames estuary, 33 m. from London on the L.M.S. Rly. It adjoins Southend-on-Sea, and has been part of the borough since 1913. It has some shipping and is a fishing centre.

Leighton Lord English artist. Frederick Leighton was born in Scarborough, Dec 3, 1830. He was educated mainly in Italy and studied art in Brussels, Paris, Frankfurt and Rome. He made a reputation with "Climacus's Madonna carried in Procession" in 1855. In 1858 he settled in London, and in 1864 was elected A.R.A., and in 1866 R.A. In 1878 he was made President of the Royal Academy. Knighted in 1878 he became baronet in 1886 and baron in 1896. On Jan 25, 1896, he died unmarried and was buried in St. Paul's Cathedral.

Leighton was a careful student of Greek art and had a remarkable sense of beauty. His pictures, mainly classical in style and subject, include "Paolo and Francesca,"

"The Harvest Moon," "Wedded," "The Bath of Psyche" and "Flaming June." He was also a fine sculptor as he proved by his "Athlete Struggling with a Python," now in the Chantry collection. He built, in 1866, Leighton House at 12 Holland Park Road, Kensington. It is Oriental in style, and many of the decorations were brought from Syria. Its most notable apartment is the Arab Hall. It is now a public museum, and in 1928 two galleries were added.

Leighton Buzzard Market town and urban district of Bedfordshire. It stands on the Ouse, 41 m. from London, on the L.M.S. Rly. There is a beautiful market cross and an old school. The town lives chiefly on its agricultural trade. Pop (1931) 7031.

Leinster Province of Ireland. It is wholly in the Irish Free State and covers the E. and S.E. part of the country. It contains 12 counties—Carlow, Dublin, Kildare, Kilkenny, Leix, Longford, Louth, Meath, Offaly, West Meath, Wexford and Wicklow. The Shannon divides it from Connaught.

The Leinster Regiment, formerly the 100th and 109th Foot, was disbanded in 1922. It was also known as the Royal Canadians.

Leinster Duke of Irish title, borne since 1766 by the family of Fitzgerald. In 1316 a descendant of the 1st Baron of Offaly was made Earl of Kildare.

The 10th earl was executed in 1537. The family seat is Carton, near Maynooth, and the duke's eldest son is styled the Marquess of Kildare.

Leipzig City of Germany. It is in Saxony, 74 m from Dresden and 104 from Berlin. Famous as a trading, musical and educational centre, and for its historic associations, it has the largest railway station in Europe, two airports and the supreme law court of the Republic. There are several museums, including one of the book trade, a stock exchange and fine theatres and concert halls. A tower of the citadel is now part of the town hall. It has been for centuries a centre of the bookselling and fur trades, and these are the chief articles sold at the famous Leipzig Fair, now held twice a year. The manufactures include chemicals, machinery, paper, scientific and musical instruments, etc. Printing is an important industry and owing to its position the city is a great distributing centre. It has a broadcasting station (259 M., 2 kW).

The University of Leipzig, founded in 1409, is one of the most celebrated in Germany. It has an observatory and botanical garden, and an institute of agriculture. The schools include the noted Conservatoire of Music. Leipzig became a centre of Protestantism and the University was one of the strongholds of the reformed learning. Pop 679,159.

The Battle of Leipzig, called "the battle of the nations," was fought Oct 16-18, 1813, between the French under Napoleon, and the allied Russians, Austrians and Prussians. The French were defeated with heavy losses.

Leiston Urban district of Suffolk, 4 m from Saxmundham on the L N E Rly. The main industry is agricultural and the chief object of interest the abbey ruins. Pop (1931) 4184.

Leith Port of Edinburgh, on the Firth of Forth, 2 m N of the city, on the L N E and L N S Rlys. It has a large harbour, enlarged just before the Great War, and extensive docks, and is connected with Edinburgh by Leith Walk. The chief industry is shipping, others are distilling, sugar refining and the manufacture of chemicals.

Leith belonged for two centuries after 1329 to the citizens of Edinburgh and was several times attacked by the English. It had a citadel and was surrounded by walls. In 1533 it was made a burgh, but in 1920 it was included in Edinburgh.

Leith Hill Hill in Surrey, on the S Downs, about 5 m. from Dorking and 965 ft high, the highest point in the S E of England. There are fine views from the summit, on which is a tower.

Leitrim County of the Irish Free State. It is in the province of Connaught and covers 613 sq m, with hills in the N and E. The Shannon flows along its borders, and Lough Allen is the largest lake. Carrick-on-Shannon is the county town, others are Manor Hamilton, Mohill and Jamestown. Leitrim itself is a village on the Shannon. There is a small coalfield in the county, but agriculture is its staple industry. Pop (1926) 55,907.

The title of Earl of Leitrim has been borne since 1795 by the family of Clements. The first holder was Robert Clements, an Irish M.P. The family estates are in Donegal and Leitrim, and the earl's eldest son is called Baron Clements.

Leix County of the Irish Free State, known until 1922 as Queen's County. In the province of Leinster it covers 664 sq m. It is served by the Gt S Rlys and the Grand Canal. Maryborough is the county town, other places are Portlinton, Mountmellick, Stradbally and Abbeyleix. The chief rivers are the Barrow and the Nore. Agricultural pursuits occupy most of the people, but the soil is not very fertile as there is much bogland. In the N are the Slieve Bloom Mts. Pop (1926) 51,540.

Leland John. English writer. Born in London about 1506, he was educated at S Paul's School and Cambridge. He showed a distinct aptitude for research, and in 1533 became the Royal Antiquary. He wrote *Itinerary*, describing a journey through England and Wales which has been of great value to modern scholars. He left an immense collection of notes. His reason gave way and he died April 18, 1552.

Lely Sir Peter. English painter. He was born near Utrecht, Sept 14, 1618, and studied art in the Netherlands. He settled in London in 1641, became an English subject and was knighted and made Court Painter by Charles II. He died Nov 30, 1680.

Lely is best known for his portraits of the ladies of the court of Charles II, which are now in Hampton Court Palace.

Leman Gerart Mathieu Joseph Georges. Belgian soldier. Born Jan 8, 1851, he was educated for the army which he entered in 1872. In 1880 he was made professor at the military college, and in 1905 its commandant. In 1914 he was commanding the fortress of Liège, which he defended against the Germans until it was taken. He remained a prisoner of war until Jan, 1918. Leman died Oct 17, 1920.

Lemberg Town of Poland, known also as Lwow, in Galicia, 355 m from Vienna. It is a great railway junction, and has cathedrals of the Greek, Armenian and Roman Catholic churches. The city has many manufacturing and other industries. Lemberg was founded in the 13th century, and its famous university dates from 1661. In 1772 it was taken from Poland and given to Austria, when it became the capital of Galicia. In 1919 it became part of the new Poland. Pop (1931) 316,177.

There was much fighting around Lemberg during the Great War. After some hard and prolonged battles, it was evacuated by the Austrians and entered by the Russians early in Sept., 1914. There was another great battle for it in 1915, and in June the Russians were driven out by the Germans.

Lemming Rodent of the vole family, about 5 in long, yellowish brown in colour, it is found in Europe, Asia and N America. It lives in the ground like the rabbit and feeds on grass. It is very common in Norway. It has a habit of migrating at certain times, in enormous numbers the animals move across the country, eating the crops on their way, until they reach the sea. They swim there until they are drowned. The banded lemming turns white in winter.

Lemnos Island of Greece in the Aegean Sea. It is 45 m from the entrance to the Dardanelles. It covers 180 sq m. The chief town is Lemnos, or Castro, and the chief crops fruit and tobacco. Mudros Bay, like Lemnos itself, was used by the Allies during the Great War against Turkey. The island

was a Turkish possession from 1478 to 1925. In ancient times it was famous for its carthage, which was believed to cure cases of plague and poison. Pop 25,000.

Lemon Oval fruit of an evergreen tree, apparently a variety of citron (*Citrus medica*), known only in its cultivated state. Extensively grown in Italy, Spain, Greece, California, Florida and S Africa, its yellow rind furnishes candied peel and an essential oil. Its pulp, as a juice, is used for lemonade and citric acid, and for various cooking and medicinal purposes. Large quantities are imported into Great Britain.

Lemon Mark. English writer and humorist. Born in London, Nov 30, 1809, the son of a hop merchant, he became manager of a brewery in London. He founded and edited *The Field* and edited also *The London Journal* and *The Family Herald*. In 1841 he helped to found *Punch*, and he was its editor from 1843 to 1870, when it became a national institution. Lemon wrote many plays, including *Hearts are Trumps*, several novels and a good deal of other literature, including fairy stories and a *Jest Book*. As Uncle Mark he won a reputation as a lecturer, and he was also known as an amateur actor. He died at Crawley, May 23, 1870.

Lemonade Beverage comprising lemon juice diluted with water and sweetened with sugar. Boiling water is poured on sliced fruit, sugar is added and it is left to cool. It is a palatable thirst quenching drink, used hot or cold. A pinch of bicarbonate makes it effervescent. Aerated water flavoured with essence or peel of lemon is called lemonade.

Lemon Grass Name of several tall aromatic grasses. They are widely cultivated in the tropics for their essential oils. That sold as East Indian is distilled from *Andropogon flexuosus*, indigenous to Cochín and Tinavelly. West Indian comes from *A. citratus*, also produced in Ceylon and Malaya. They often masquerade as oil of verbena.

Lemon Sole Flatfish allied to the dab, extensively caught in trawlers in the N of Europe. It is smaller but wider than the ordinary sole, to which it is inferior in flavour. It spawns in the spring and early summer. The fish is not allied to the true sole, the name being a corruption of the French *limande*, meaning dab.

Lemprière John. British scholar. He was born in Jersey about 1708, educated at Winchester and Pembroke College, Oxford, and became a school master. In 1792 he was made headmaster of Abingdon Grammar School, and, having been ordained, was vicar of Abingdon, 1800-09. He then went to Exeter as headmaster of the grammar school there, and later held livings in Devonshire. He died Feb 1, 1824. Lemprière's name lives through his *Classical Dictionary* and his *Universal Biography*.

Lemur Family of monkey like mammals. They are confined to Madagascar and the Comoro Islands, but at one time roamed over Europe and Africa. The head resembles that of the fox and the general appearance is something between a cat and a monkey. They live in trees and sleep during the daytime. Their food consists of small birds, insects, eggs, fruit, etc. The several species vary in size, but all are tameable and affectionate.

Lena River of Siberia. It rises near Lake Balka in the S, flows mainly N and falls into Nordenskiöld Sea, a branch of the Arctic Ocean. One of the longest rivers of the world, it is a gold bearing stream, 2900 m long. The property of the English company which worked the gold has been seized by the Soviet authorities. The Lena Islands are in the estuary.

Langlen Suzanne. French lawn tennis player. Born at Compiègne, May 29, 1899, she won her first championship when only 14. From 1919 to 1925 she held the Ladies' Singles Championship at Wimbledon, and she won similar honours in France and the U.S.A. In 1927 she became a professional. She has written several books on the game, and her first novel was published in 1925.

Lenin Name taken by the Bolshevik leader, Vladimir Ilyich Ulyanov. He was born April 10, 1870, the son of a schoolmaster, and was educated at Simbirsk, his birthplace, and then at the University of Kazan. As a student he was a leader in the demonstrations against authority prevalent at that time. He went to St. Petersburg to study law, and was exiled to Siberia. Released in 1900, he lived for a time in Paris and London. He was in Russia during the brief revolution of 1905, after which he resided chiefly in Switzerland. During these years he was one of the leaders of international socialism.

In 1917 the German Government agreed to an arrangement by which Lenin and other leaders were to return to Russia. They passed from Switzerland to Germany in a closed train and reached Petrograd. Kerensky was then dominant in Russia, and the new arrivals were unable to overthrow him. Trotsky, who was by now closely associated with Lenin, was put in prison, while Lenin escaped by flight. With Trotsky released, they renewed their agitation and in Nov., 1917, they succeeded in destroying the authority of Kerensky. The new ideas of government worked out by them during the years of exile were then put into operation. A council of people's commissioners was set up with Lenin as president, and the system known as Bolshevism was established. Peace was signed with Germany and Moscow made the country's capital in March, 1918. Opposition was ruthlessly crushed and the system established by Lenin and Trotsky remained dominant. Closely guarded in the Kremlin, Moscow, Lenin retained his power until his death, Jan 31, 1924. The Bolsheviks honoured his memory by a magnificent tomb. In 1920 Petrograd had been renamed Leningrad.

Leningrad City and seaport of Russia, formerly known as St. Petersburg and then as Petrograd, and until 1918 the capital of the country. At the mouth of the River Neva, the oldest part is on an island and the larger part on the left bank, and its harbour is used by medium sized ships. A ship canal leads to its outport, Kronstadt.

Leningrad has some fine buildings, including the famous winter palace overlooking the Neva. The Hermitage once housed one of the finest collections of treasures in Europe. The churches included the cathedrals of St. Isaac and the Kazan Cathedral, a model of St. Peter's at Rome, but both have been turned into museums. Other churches have been closed and dismantled. The fortress of St. Peter and St. Paul contains a famous prison. There is a university founded in

1819, and many colleges and schools. The famous thoroughfare long called the Nevski Prospect has been renamed Oct 25 Street. The chief industry is shipping for which there are extensive docks. There are two broadcasting stations (1000 M, 100 kW and 351 M 12 kW).

Leningrad was founded in 1752 by Peter the Great who made it the capital. There have been several risings in the city, notably in March, 1917. In 1931 a scheme for rebuilding the city and restoring its prosperity was put forward. Since 1918 the population has declined, it is now 1,617,007.

Lennox District of Scotland. It goes from Dumharton to Stirling, and includes the county of Dumbarton and parts of the counties of Stirling, Renfrew and Perth. In the district are the Lennox and Kilpatrick Hills and the Campsie Fells. There was an Earl of Lennox in the 12th century, and a later earl was father of Lord Darnley. In 1581 Esme Stuart was made Duke of Lennox, but the title died out in 1672. In 1675 Charles II gave it to an illegitimate son, Charles Lennox, Duke of Richmond, and it has since been held by the dukes of Richmond.

Lennoxton Town of Stirlingshire, 11 m from Glasgow on the L N E Rly. It is a coal mining centre and has also textile mills. Pop 2600.

Leno Dan. English comedian, whose real name was George Galvin. He was born Dec 20, 1860, and won fame as an entertainer by his clog dancing. He was also something of an acrobat. In 1888 he appeared in London in the pantomime at Drury Lane, and for the next 20 years he was perhaps the most popular figure in variety entertainments. His native humour, unique of its kind and quite clean, delighted thousands. Leno died Oct 31, 1904.

Lens Portion of a transparent medium, usually glass, enclosed between two surfaces which are parts of spherical or plane surfaces. In passing through a lens light rays are refracted and become more convergent or divergent according to the type of lens. Convex lenses, which are thicker at the centre than at the edges, are either double convex, plano convex or concavo convex. Concave lenses, thinner at the centre than at the edges, have corresponding forms to the convex type.

Lens Town of France. It is on a canalised river, 13 m from Arras, and stands on a rich coal field, with engineering works and iron and steel industries. Buildings destroyed during the Great War have been rebuilt and industries restarted. A memorial church has been built by the Canadians.

In the Middle Ages and later, Lens was a fortified town, in Aug. 1649, the Spaniards were defeated by the French. In Oct. 1914, the Germans occupied Lens, and attempts to recover it failed, one being made in the Battle of Loos in Sept. 1916. The Germans evacuated it on Oct 2, 1918. Pop (1931) 33,513.

Lent In the Christian year the 40 days just before Easter. It begins on Ash Wednesday, and is for many a time of abstinence. It commemorates the 40 days passed by Christ in the wilderness. The French call it *carême*.

Lenthall William. English politician. Born in June, 1591, the son of a landowner in Oxfordshire, he was educated at Oxford. He became a barrister and in 1640

was elected M P for Woodstock. In 1641 Charles I appointed him Speaker of the House of Commons, and he retained the office until 1653. Throughout the Civil War Cromwell addressed to him his letters about the campaign. He was speaker again in 1659 when the Rump was recalled. Lenthall was exempted from pardon in 1660 but he was unmolested, and he died at his residence at Burford, Oxfordshire, Sept 3, 1662.

Lentil Annual herb of the order *Leguminosae*. It grows in the Mediterranean region and bears single pale-blue flowers. Its seeds are a valuable article of food, as they contain a very high proportion of carbohydrates and protein. They grow in pods and can be cooked whole or split, or ground into a meal.

Leo Name of one of the constellations. It is situated just beneath the feet of the Great Bear, and contains a number of important stars, such as Regulus, or α Leonis, the blue star, Denebola, or β Leonis, and the double star, Algieha. It is also the fifth sign of the Zodiac, and as such no longer corresponds with the constellation.

Leo Name of 13 popes. The most important are Leo I, Leo X and Leo XIII, who are noticed separately. Leo II was pope, 682-83. Leo III, pope from 795 to 816, crowned Charlemagne emperor and was canonised in 1673. Leo IV, pope from 847-855, built the part of Rome called after him the Leonine city. Leo V was pope in 903 and Leo VI in 928. Leo VII was pope, 936 to 939, and Leo VIII from 964 to 965. Leo IX, a German, was pope, 1049 to 1054. Leo X, like Leo X, a member of the Medici family, was pope for a few weeks in 1605. Leo XII pope from 1823 to 1829, was a harsh and unpopular ruler at a time when liberal ideas were spreading rapidly in Europe.

Leo I. Pope from 440 to 461. He was chiefly occupied in combating heresies and in strengthening the authority of Rome. He is best remembered, however, as the pope who saved the city from Attila and his Huns, and later protected it when it was captured by Genseric and the Vandals. He died in Rome, Nov 10, 461, and was canonised. He is known as Leo the Great.

Leo X. Pope from 1513 to 1521. A son of Lorenzo the Magnificent, of the Medici family, he was born in Rome, Dec 11, 1475. He was made a cardinal and in 1513 was chosen pope. Thoroughly secular in his outlook he was the typical pope of the Renaissance. He carried on several wars, but his chief interests were in his splendid court, where art and literature flourished. The Reformation began during his reign. He died Dec 1, 1521.

Leo XIII. Pope from 1878 to 1903. Born March 2, 1810, he studied for the priesthood and in 1837 was ordained. He served Pope Pius IX in a secular capacity, both in Italy and the Netherlands, and in 1846 he was appointed Archbishop of Perugia. In 1853, as Cardinal Pecci, he was one of the leading personages at the papal court. Very active, he was on good terms with most of the European countries, but would not recognise the Italian Government in Rome. He wrote poems and issued several encyclical letters, one on capital and labour. He died July 20, 1903.

Leo Name of six East Roman emperors. Leo I called the Great reigned from 457 to 474. His grandson, Leo II only reigned

for a few weeks **Leo III**, the greatest of the six, founded the Isaurian, or Syrian, dynasty when he began to reign in 717, and in 726 he forbade the worship of images.

Leominster Borough of Herefordshire at the junction of three small rivers, 157 m from London and 12 from Hereford, on the G W and L M S Rlys. The magnificent church has a Norman nave. There is a trade in bops. Pop (1931) 5707.

Leon Kingdom of Spain. It originated in the 10th century and was united for short periods with Aragon and Castile. It was finally united with Castile in 1230. It covered about 20,000 sq m in the N W of the country, and included, as well as the capital Leon, the cities of Salamanca and Valladolid.

Leon City of Spain, 174 m N W of Madrid, in mountainous country. Its cathedral is Gothic (founded 1199) and around the old city are the mediaeval walls and gates. Beyond is an industrial quarter. Pop (1931) 29,337.

Leon City of Nicaragua, Central America. The town is a centre for trade in minerals, timber and coffee, which are exported from Corinto, 32 m to the N. It dates from 1610 and was formerly the capital of the republic. Pop 23,565.

Leonardo da Vinci Italian artist and scholar. Born in 1452 at Vinci, near Florence, he was the illegitimate son of a lawyer. About 1470 he worked in the studio of Verocchio and later he was in Egypt as an engineer. In 1482 he settled in Milan, at the magnificent court of the Sforza family. In 1500 he was architect and engineer to Caesar Borgia in Florence, and in 1506, invited by Louis XII, he went to France. He died near Amboise May 2, 1519.

Poet and scientist as well as artist, his genius was expressed also in engineering, architecture and mathematics, and he anticipated many discoveries of modern science, including the airship. The outstanding proofs of his artistic power are the 'Mona Lisa,' in the Louvre at Paris, 'The Last Supper,' now somewhat faded at Milan and 'The Virgin of the Rocks,' in the National Gallery, London. There are collections of his drawings in the British Museum and at Windsor Castle. He wrote a book on art.

Leoncavallo Ruggiero. Italian composer. Born in Naples in 1858, in his best known works, the operas *Pagliacci* (1892) and *Zaza* (1900), he used his sense of dramatic possibilities to full advantage. His other works apart from *La Bohème* were not very successful. He died Aug. 9, 1919.

Leonidas King of Sparta. He is remembered because he was the leader of the small band of Spartans who defended the Pass of Thermopylae against the Persians. He began to reign in 491 B.C. and was killed in the pass in 480, with all his followers about 1000 in number.

Leonids Name given to the streams of meteors or shooting stars which appear to originate in the constellation Leo. These meteors are small bodies moving in regular orbits, and when entering the earth's atmosphere at a high velocity become incandescent by the friction of the air. The Leonids may be observed about November 14 and at intervals of about 33 years showers of exceptional brilliancy occur when the earth crosses the orbit of a meteoric band.

Leopard Large member of the cat family, *Felis pardus*, found in Africa and Asia, and notable for its spots. The fur is tawny and is valued for rugs. The average length is about 4 ft. The leopard preys by night on other animals, such as dogs, goats and monkeys and is very savage, although it will not usually attack man. It can climb trees. One variety is called the snow leopard, and there is a black leopard in Africa, now becoming rare. In India the true leopard is called the panther, the word leopard is reserved for the cheetah, which is a favourite quarry for sportsmen.

Leopold Name of two Holy Roman emperors. Leopold I, a son of Ferdinand III, was born June 9, 1640 and educated to be a priest. On the death of his elder brother, in 1654, he became emperor, and much of his reign was occupied in wars with France under Louis XIV. He had also to resist the advance of the Greeks and to deal with revolts in Hungary and Bohemia. To secure for his son, Charles, the throne of Spain he entered upon the War of the Spanish Succession, but died in the midst of it, May 5, 1705. His two sons, Joseph and Charles, succeeded him in turn.

Leopold II, a son of Francis I and Maria Theresa, became Grand Duke of Tuscany in 1765. In 1790 he became emperor in succession to his brother, Joseph II, but he died soon afterwards, March 1, 1792. He was succeeded by his son, Francis II.

Leopold I King of the Belgians. Born at Coburg, Dec. 16, 1790, a son of the Duke of Saxe-Coburg-Gotha, he became a soldier and fought against Napoleon. In 1816 he married Charlotte, only daughter of George IV, and was made Duke of Kendal. In 1831 he was chosen the first King of the Belgians and soon he married as his second wife a daughter of Louis Philippe. He reigned for 34 years and did a great deal to make Belgium a peaceful and prosperous country. He took a continual interest in affairs in Britain. He died Dec. 10, 1865, leaving two sons, his successor Leopold, and Philip, Count of Flanders.

Leopold II King of the Belgians. The older son of Leopold I, he was born in Brussels, April 9, 1835, and, as Duke of Brabant, served in the army. He became king in 1865 and ruled, on the whole successfully, for 41 years. His management of the Congo Free State, which he owned until 1908, brought upon him a certain amount of odium. He died at Laeken, Dec. 17, 1909, and was succeeded by his nephew, Albert.

Leopold III King of the Belgians. Son of King Albert, he was born Nov. 3, 1901, and in 1926 married Princess Astrid of Sweden. On the death of his father in a mountaineering mishap on Feb. 23, 1934, he succeeded to the throne. In the following year he and Queen Astrid were involved in a road accident and she was killed (Aug., 1935). His elder son is called the Duke of Brabant.

Leopoldville Capital of the Belgian Congo. It is on the left bank of the Congo, near Stanley Pool and was founded in 1882. It is a river port and an administrative centre. In 1923 it was made the capital of the state. Pop. 10,000.

Lepanto Harbour of Greece. It is on the N of the Gulf of Corinth and has a certain amount of trade. The Turks took it from Venice in 1499.

The Battle of Lepanto, one of the great naval fights of the world, was fought Oct. 7, 1571 Spain, Venice and Genoa united to send a fleet against the Turks of about 200 galleys, under Don John of Austria. It almost destroyed the Turkish fleet of 275 galleys, and put an end to the naval power of the sultan.

Lepidoptera Order of insects represented by the butterflies and moths. They are characterised by having four wings covered with minute coloured imbricating scales, a hairy body and sucking mouth parts. Their metamorphosis is complete, consisting of a larva or caterpillar, possessing spinning glands, a pupa or chrysalis, and an imago or perfect insect.

Lepidus Marcus Aemilius Roman soldier and triumvir. He was born about 74 B.C. and in the war between Caesar and Pompey, supported Caesar who made him Dictator of Rome and Consul. In 43, after Caesar's murder, he was, with Mark Antony and Octavian, one of the three who ruled the Roman World between them. His share was France and Spain, and later, Africa, but he quarrelled with Octavian and all his power was taken from him. He died 13 B.C.

Leprechaun In Irish folklore a small creature resembling an old man. He is usually harmful, but is beneficent to human beings who can withstand his trickery. He is credited with the power of discovering buried treasure.

Leprosy Chronic transmissible disease. It is due to the bacillus leprae (discovered in 1871) and was a terrible scourge in antiquity. In the Mosala law there are many regulations about it, and in the Middle Ages in Europe and Asia the sufferers were segregated in leper houses, compelled to wear warning bells, and special windows were provided for them in churches. After the 15th century the disease gradually disappeared from Europe. It is still a scourge in Africa, Asia and the Pacific Islands and there are leper hospitals and asylums in India, Ceylon, South Africa and the Philippine Islands. It is estimated that there are over 2,000,000 lepers in the world.

There are two forms of leprosy. The nodular form shows itself in an irregular thickening of the skin and in the formation of nodes, or tubercles, which may develop into ulcers. In its nervous or anaesthetic form whitened patches appear on the skin, there is a deadening of sensation, the sufferer losing all sense of pain, heat, cold and touch and perhaps the extremities of the limbs fall away.

Many remedies have been tried for leprosy, including mercury, salvarsan and other drugs, as well as serum and vaccines, but the best results have been obtained by the injection of chaulmoogra oil.

Lerwick Chief town and seaport of the Shetland Islands. It is on the island of Mainland on Bressay Sound, with a good harbour for its fishing industry. Fort Charlotte is used by the Naval Reserve. A festival is held in the town every January.

Lesbos Greek island lying near the coast of Turkey, N.E. of Smyrna. It is mountainous with fertile soil, olives, grain, fruit, etc., being produced. Sappho Alcaeus, Theophrastus and other famous writers lived here. The modern name and that of the chief town is Mytilene. Area 618 sq. m. Pop. 161,557.

Leslie Burgh of Fifeshire, on the Leven, 12 m. from Cupar, on the L.N.E. Rly. The parish church may be the "kirk on

the green," in a ballad by James I. The green was at one time used for bull baiting and the bull stone is still seen. Linen and papermaking are the main industries. Leslie House is the seat of the Earl of Rothes. Pop. (1931) 2477.

Leslie David Scottish soldier. A son of Sir Patriok Leslie, who had estates in Fife and was made Lord Lindores, he was born in 1601 and gained experience of war in the Swedish army. He took part in the Battle of Marston Moor in 1644 and defeated Montrose at Philliphaugh in 1645. When the Scots took up the cause of Charles II he commanded the army that was beaten by Cromwell at Dunbar in 1650. From 1651 to 1660 he was a prisoner in the Tower of London. In 1661 Leslie was made Lord Newark, a title held by his descendants until 1790. He died in 1682.

Leslie Shane Irish writer. Born in 1885, he was educated at Eton and King's College, Cambridge, served in the Great War and soon began to write. His output, both in prose and verse, is considerable and includes *The Life of Cardinal Manning*, *Life of Sir Mark Sykes*, *The End of a Chapter*, an autobiography, *Mrs Fitzherbert*, a play, and the novels, *The Oppidan*, *The Anglo-Catholic* and *The Cantab*. In 1932 he published *Studies in Sublime Failure*.

Lesnes Name of an abbey at Plumstead, Kent. It was founded as an Augustinian house in 1178 and lasted until the Reformation. The ruins and grounds are public property.

Lesseps Ferdinand de French engineer. Born at Versailles, Nov. 19, 1805, he joined the consular service in 1825 and secured an appointment at Alexandria. He was afterwards in Spain as French ambassador. In Egypt, de Lesseps had seen the possibilities of a canal across the Isthmus of Suez and after 1849 he devoted his life to making it. He obtained the concession, formed the company and supervised the work until the opening of the canal in 1869. Afterwards he undertook to cut a canal across the Isthmus of Panama, but this was less successful. De Lesseps was ruined and discredited by the mismanagement associated with the scheme, was tried and sentenced to imprisonment but never served the sentence. He died Dec. 7, 1894. A cousin of the Empress Eugénie, he was made a viscount by Napoleon III.

Lessing Gotthold Ephraim German author and critic. Born in Saxony, Jan. 22, 1729, the son of a Lutheran clergyman, he was educated at the Universities of Leipzig and Wittenberg. He wrote critical articles for the periodicals, and spent time in travel and in making friends with the thinkers of the age. In 1767 he was appointed playwright to the theatre at Hamburg and in 1770 Librarian to the Duke of Brunswick. He died at Brunswick, Feb. 15, 1781.

Lessing was a constructive thinker and his ideas on art and literature had great influence on Goethe and others. His greatest works are perhaps *Lazoon*, in which he gives his ideas on poetry and the plastic arts, and *Nathan the Wise*, a drama that is a fine plea for religious toleration. His other works include *Miss Sara Sampson*, a tragedy, and *Minna von Barnhelm*, the first German comedy. He also wrote, to give them their English titles, *The Young Scholar*, *How the Ancients Depicted Death* and *The Education of the Human Race*. His ideas on the drama are in his *Hamburg Dramaturgy*.

Letchworth Urban district of Hertfordshire, 34 m from London, just outside Hitchin, on the L N E Rly. Around the Jacobean manor house the first English garden city was laid out in 1903. There are printing works and other industries. Pop (1931) 14,454

Lethal Chamber Term applied to a device for killing small animals painlessly. It consists of an airtight chamber in which the animal is placed, a mixture of carbonic acid gas and chloroform vapour being introduced under pressure, causing death within a few seconds.

Lethbridge City of S Alberta. It is on the Old Man River, 700 m from Winnipeg and 130 m S of Calgary on both the C P and C N Rlys. The industries are chiefly concerned with railway work, coal mining and the distribution of goods over an extensive farming area. Pop (1931) 13,489

Lethe In Greek legend a river of the underworld. Its waters were supposed to induce utter forgetfulness, so that when the dead drank of them they lost all memory of their past lives.

Leto In Greek legend the mother of the twins Apollo and Artemis. Jupiter became her lover and so Hera, in her jealousy, sent the serpent Python to chase her through the world. Poseidon made a refuge for her by putting a peg through the floating island of Delos. The Romans called her Latona.

Letterkenny Market town of Donegal, Irish Free State. It is on the Swilly, not far from Lough Swilly, on which it has a small port, Ballyraine. The chief building is the cathedral of the Roman Catholic Diocese of Raphoe. Pop 2,200.

Letter of Credit Document enabling a traveller to obtain money in foreign countries. The letters are issued by a banker at home to a banker abroad who is asked to pay a certain sum to the person named in the note.

Letter of Marque Document giving authority to the owner of a ship in time of war to attack merchantmen belonging to an enemy nation. The letters were issued by the naval authorities and the ships that received them, called privateers, were recognised in international law.

Letters Patent In Britain a privilege given by the sovereign in a document stamped with the Great Seal. It gives to a person or company the exclusive right of an invention. Peerages are also bestowed by letters patent. See **PEERAGE**.

Lettres de Cachet (or *lettres closes*) Blank orders of arrest issued by French kings, prior to the Revolution, to the governors of prisons. By this practice abolished in 1789, it was only necessary to insert the name of an individual in such an order to effect his immediate incarceration.

Letts People of Indo-European stock. They inhabited Courland and Livonia when these districts were part of Russia and are now the dominant people in the Republic of Latvia. They number about 2,000,000, chiefly Protestants, and there are colonies of them in the United States. See **LATVIA**.

Lettuce Hardy annual herb. Cultivated as a vegetable, it was introduced

into England from Flanders in the 16th century. The two chief varieties are the cos lettuce, which has an erect, oblong head and is generally crisp, and the cabbage lettuce which has longer leaves and is less compact in appearance.

In 1931 a duty was placed on lettuces imported into Great Britain.

Leu Unit of currency in Rumania. At one time worth a franc, its real value is now $\frac{1}{4}$. It is divided into 100 bani and the plural is lei.

Leucite Rock forming mineral. It consists of a silicate of potassium and aluminium and is found chiefly in lavas in the vicinity of Vesuvius, Capo di Bove near Rome and in the basaltic rock of the Elfen. It occurs as crystals of white or grey colour, having anomalous optical properties, which vary according to the temperature.

Leuctra Village of Greece. Here, in 371 B.C. the Thebans led by Epaminondas, defeated the Spartans, and ended the Spartan dominance in Greece.

Leuthen Village of Silesia, 10 m from Dresden. In the battle fought here, Dec 5, 1757, Frederick the Great utterly defeated an Austrian army, took 12,000 prisoners, and regained Silesia.

Lev Unit of currency of Bulgaria, worth nominally a franc, but really $\frac{1}{2}$ of a penny. It contains 100 stotinki. The plural is leva.

Levant Name used for the E part of the Mediterranean Sea, i.e. the coastal regions of Asia Minor and Egypt. A person of Frankish race born in this area is known as a Levantine. A wind blowing from E Spain is a Levante.

The Levant Company was an English trading company that existed from 1592 to 1825. It was given by charter a monopoly of the trade with Constantinople and the neighbourhood. For a time it flourished, but later its trade was interfered with by pirates.

Levee Name given to the natural mud wall or embankment on the lower Mississippi. It is formed during floods when the river overflows and spreads over a level plain, depositing its sediment against the banks. These levees are strengthened artificially, but are often breached during excessive floods. Similar levees are formed on swift, muddy rivers, like the Hoang Ho in China.

Levee Reception held by a king for men only, in modern times in order that persons who have received official positions, or honours, may be presented to the king. Levees are held in the kings' name by the Governors General in India and the Dominions. The name is due to the fact that at one time the French kings received visitors during the process of rising from bed.

Level Instrument used in surveying for determining the amount of variation from the true level of a surface. It consists of a spirit level attached to a telescope. The spirit level is a cylindrical glass tube so filled with alcohol or water as to allow of the retention of a small air bubble. The complete instrument is mounted on a stand and regulated by a pivot and screws.

Levellers Political party that arose in England during the Civil War. Its members were chiefly soldiers in the army of Oliver Cromwell. Their leader was John Lilburne and their democratic ideas were set out in The Agreement of the People. In

1649, after the king's death, they mutinied, but the rising was quickly suppressed, and by 1660 they had disappeared

Leven Loch or lake of Kinross shire. It is 22 m from Edinburgh and covers nearly 6 sq m. On Castle Island, connected with the mainland by a causeway, the kings of Scotland had a palace, where Mary, Queen of Scots, was imprisoned in 1567-68. The lake was formerly much larger than it is to day. It is noted for a special kind of trout.

Another Loch Leven is a sea loch between the counties of Argyll and Inverness. It is 12 m long and is a branch of Loch Linnhe

Leven Name of several rivers in Great Britain. One flows through some lochs between the counties of Argyll and Inverness to Loch Leven. It is 16 m long and its waters are used for generating electric power at Kinlochleven. Another flows from Loch Lomond through Dumbartonshire to the Clyde. It is 7 m long and forms the Vale of Leven, which is famous for its bleaching and dyeing yards. A third Leven flows from Loch Leven in Kinross shire to Largo Bay. It is 16 m long and is partly an artificial waterway. In England there are short rivers of this name in Lancashire and Yorkshire. One flows from Lake Windermere to Morecambe Bay.

Leven Burgh and watering place of Fifeshire, on the Firth of Forth, 11 m from Kirkcaldy, on the L.N.E. Ry. Leven has some manufactures, while it is becoming increasingly popular as a golfing centre. Pop (1931) 7411.

Leven Earl of. Scottish title held with the earldom of Melville by the Fifeshire family of Leslie-Melville. Alexander Leslie, a soldier, born about 1580. Served in the Netherlands. Later he entered the Swedish Army and after the Thirty Years' War was made a field marshal. In 1638 he commanded the army raised by the Scots to fight Charles I. He won some successes and in 1641 was made Earl of Leven. Later he fought at Marston Moor. He died April 4, 1661.

Leven's title passed to his son and then to two daughters, and in 1682 it was given to David Melville, a great-grandson. In 1707 he became Earl of Melville and since then the two earldoms have been united. The earl's eldest son is called Lord Balgonie, this being the name of his seat in Fifeshire.

Levens Hall Residence in Westmorland. It is 3 m from Milnthorpe and is one of the finest Tudor houses in the country. Built by Sir James Bellingham. It is noted for its exquisite panelling.

Lever District in Lancashire. Little outside Bolton. It is a cotton manufacturing and coal mining centre. Pop (1931) 4944. Great Lever is an adjoining area, but is not an urban district.

Lever Simple mechanical power. It consists of an inflexible bar supported at one point (fulcrum) with a weight or resistance at a second point. Power is applied at a third point to overcome the resistance, thus tending to cause the bar to rotate in opposite directions. There are three classes of levers. In the first the fulcrum is between the weight and power, in the second the weight lies between the other two, while in the third the power is between the weight and fulcrum.

Lever Charles. Irish writer. Born in Dublin, Aug 31, 1806, he was educated at Trinity College there and became a doctor. He spent some time in Canada, after which he practised medicine in several Irish towns and then in Brussels and other places abroad. In 1858 he was made vice-consul at Spezia and in 1867 consul at Trieste. His serial, *Harry Lorrequer*, in the magazine of his university proved very successful and other novels followed, including *Charles O'Malley*, *Jack Hinton*, *Tom Burke of Ours*, *Roland Cashel* and *Sir Brook Fosbrooke*. These are stories of social and military life in Ireland early in the 19th century. He also wrote, in another vein, *The Martins of Cro-Martin* and *The Dillons*. Lever died at Trieste, June 1, 1872.

Leverhulme Viscount. English title borne by the family of Lever. William Hesketh Lever was born in Bolton, Sept 19, 1851, his father, James Lever, being a grocer there. He was educated at elementary schools and entered his father's business as a commercial traveller. In 1886 he began to manufacture soap at Wigan, and, aided by effective advertising, he made his Sunlight brand known all over the world. On the Mersey, a model town, Port Sunlight, was built, and the firm of Lever Bros became the largest of its kind in the world. Many other concerns were amalgamated with it and before its founder died the combine had a capital of nearly £50,000,000. In 1929 there was a further big amalgamation with the Margarine Union and the firm of Unilever, Ltd, came into existence. A new building, Unilever House, Blackfriars, London, was opened in July, 1932, as the headquarters.

Lever had many and varied interests outside his business. He was a Nonconformist but also a discriminating patron of the theatre. As a Liberal he sat in Parliament for the Wirral Division, 1906-10. As a social reformer he advocated a short working day and introduced a system of profit sharing. To foster the native industries of the Scottish Highlands he bought, in 1918, the island of Lewis, but this was less successful than his other ventures. His interests in Africa were extensive and there, too, he showed practical philanthropy. In 1911 Lever was made a baronet, in 1917 a baron and in 1922 a viscount. He died May 7, 1925, when his only son, William Hulme Lever, became the 2nd viscount.

Leverrier Urbain Jean Joseph. French astronomer. Born in Normandy, March 11, 1811, he was educated in Paris. He became a Professor of Astronomy and by his scientific writings became known and was elected to the Academy. His great work was the discovery of the planet Uranus, an honour he shared with John C Adams. He was made professor in the University of Paris and from 1854-77 was director of the observatory there. He died Sept 23, 1877.

Leveson-Gower Name of an English family represented by the Duke of Sutherland and Earl Granville. Sir Thomas Gower, a landowner in Yorkshire, was made a baronet in 1620. His descendant, who had taken the additional name of Leveson and owned land in Staffordshire, was made a baron in 1703. In 1746 John, the 2nd baron, was created Earl Gower and the 2nd earl was created Marquess of Stafford in 1788. The 2nd Marquess of Stafford married the Countess of Sutherland, a great heiress, and was made Duke of Sutherland.

The first Earl Granville was a younger son of the first Marquess of Stafford.

Levi Biblical character, the third son of Jacob and Leah and regarded as the ancestor of the tribe of the same name. Levi is also an alternative name for St Matthew.

Leviathan Old Testament word denoting an aquatic monster, actual or emblematic. In Job xii it is a crocodile, in Isaiah xxvii a mythic serpent and in Psalm cxi a generalised sea monster. Hence, anything immense, e.g., the authority of the sovereign in Hobbes's *Leviathan*, 1651.

Leviathan is the name of a liner built at Hamburg in 1914 for the Hamburg America line and named the *Vaterland*. At the outbreak of the Great War it was detained at New York until 1917, then renamed the *Leviathan* and used as a transport for American troops.

Levis Town and river port of Quebec, on the S side of the St Lawrence, opposite Quebec City. It is on the C.N.R. and Quebec Central Rlys and steam ferries cross the river. There are docks for shipping, and some manufacturing industries. Pop (1931) 11,724.

Levitation Term applied to the alleged phenomenon of raising heavy bodies in the air so that they remain suspended without mechanical means. The idea is referred to in many ancient writings. The Neoplatonist, Iamblichus, was said to have been levitated ten cubits from the ground during meditation. In modern times levitation has been claimed by spiritualistic mediums, such as Daniel Home.

Levites One of the twelve tribes of Israel. Its male members were set aside to assist the priests in the service of the temple. Unlike the other tribes, no definite piece of territory was allotted to them when the Promised Land was divided. Instead, they were given 48 cities and were maintained by tithes and alms from the others. In the wilderness they carried the tabernacle and later they acted as singers in the temple and prepared the sacrifices.

Leviticus Book of the Old Testament. It comprises the legal and ceremonial institutions regulating the sanctuary service of the Israelites administered by the tribe of Levi. It is divided into the laws of sacrifice (Ch i-vii), priestly consecration (Ch viii-x), purification (Ch xi-xv), the day of atonement (Ch xvi), holiness (Ch xvii-xxvi) and vows and tithes (Ch xxvii).

Levy Raising something, either money or men, usually by force in time of emergency. A *levée en masse* is a term used for calling out the fit male inhabitants of a country to resist an invader, or meet some other emergency. See CAPITAL LEVY.

Lewes Borough, market town and county town of Sussex, on the Ouse, 60 m from London, on the S Rly. The extensive remains of the Norman castle have belonged to the nation since 1920. Lewes is an agricultural centre and has a racecourse. In the suburb of Southover are some fine old houses, including one that belonged to Anne of Cleves, and the ruined priory of St. Pancras. From 1295 to 1885 Lewes was separately represented in Parliament and in the Middle Ages it was a centre of the wool trade. Pop (1931) 10,785.

The Battle of Lewes was fought on May 14, 1264. An army under Henry III and his son, Edward, marched against the baronial forces under Simon de Montfort. They met

near Lewes and at first the royalists were victorious. Later the scales were turned. Henry III and Edward were made prisoners and Lewes was occupied.

Lewes George Henry, English writer. Born in London, April 18, 1817, he abandoned medicine for literature. His first-hand knowledge of the literature and philosophy of Germany was reflected in his writings. In 1863 Lewes founded *The Fortnightly Review*, which he edited for 16 years, and his best-known book is *His Life of Goethe*. For over 20 years Lewes lived with George Eliot, and her work was much influenced by his advice and criticism. He died Nov 28, 1878. He is pictured in J.E. Buckrose's book, *Silhouette of Mary Ann*.

Lewis Largest island of the Outer Hebrides. Called Harris in the S., it is 60 m long, covers 860 sq m and is 30 m from the mainland. Stornoway is the chief town and port. The surface is chiefly peaty moorland with a number of sea lochs and some hills in the S rise to a height of 1750 ft. The coast is rugged. The industries are the growing of barley, oats and potatoes, the raising of sheep and cattle, fishing and weaving. There are relics of the Druids, and some stone circles at Callernish. Much of the island was bought in 1918 by the first Lord Leverhulme but in 1924 his estates were sold. Pop 32,000.

Lewis Sinclair, American novelist. He was born in Minnesota, Feb 7, 1885, the son of a doctor, and was educated at Yale. He became a journalist and acted as editor for several publishers. In 1914, with the publication of *Our Mr Wren* he became known as a novelist and his popularity reached Britain with *Main Street*, 1920, and *Babbitt*, 1924. Other novels are *Free Air*, *Martin Arrowsmith*, *Elmer Gantry*, *The Man Who Knew Coolidge* and *Dodsworth*. *It Can't Happen Here* was published in 1935.

Lewis Gun Form of automatic gun. It is constructed on the principle of the machine gun, and can be fired from the shoulder like a rifle or by the use of a mount. Its automatic action is caused by the pressure of the explosion of gases and the action of a powerful spring, giving a forward and backward movement.

Lewisham Borough of the County of London. It is on the S side of the river, extending to the border of Kent, and covers about 11 sq m., with several stations on the S Rly. It includes Catford, Lee, Forest Hill, Bellingham, Hither Green and parts of Blackheath, Downham, Brockley and Sydenham. The town hall was enlarged in 1931 and the S.E. Polytechnic opened in the same year. Some of the land belongs to the Earl of Dartmouth, whose oldest son is called Viscount Lewisham. Pop (1931) 219,942.

Lexington Village of Massachusetts, 10 m from Boston. Here, on April 19, 1775, the first battle in the War of Independence took place. A British force was sent from Boston to Concord to seize some stores. It was attacked by colonists, but saved by the arrival of reinforcements.

A town of Kentucky is named Lexington. This is 80 m from Cincinnati and in it is the State University. Pop 41,600.

Leyden Jar Electrical condenser invented by Cunnacius in 1746 at Leiden University. It consists of a glass jar coated inside and out with tinfoil, and having a brass rod ending in a knob

projecting from the inner coating. The jar is earthed, and a current from an electrical machine is passed into the knob producing a negative charge on the outer foil. To discharge the jar the two foils are connected by the ends of a conductor.

Leyland Market town and urban district of Lancashire, 5 m from Preston on the LMS Riv. The chief industry is the manufacture of cotton. Pop (1931) 10,573.

Leys School Public school at Cambridge, founded in 1874, and controlled by Wesleyans. The buildings are modern, with accommodation for 260 boys.

Leyton County borough of Essex, 6 m from London, on the L N E. and LMS Ryas. There are some industries, and a technical institute. It was made a borough in 1926. The ground of the Essex Cricket Club is at Leyton. Pop (1931) 128,317.

Leytonstone District of the county borough of Leyton (q.v.) It adjoins Wanstead Flats and Epping Forest.

Lèse Majesté Crime against the sovereign or the state. It was defined in Rome as any action against the republic, such as assisting its enemies. It also included illegal attempts to secure high office. It is now equivalent to treason.

Lhasa Capital of Tibet. It stands on a plateau, 12,000 ft. above sea level, and 390 m from Darjeeling. Access to it is by road only. The sacred city of Lamalism, it is called the Forbidden City and until 1904 only one Englishman had visited it. The Potala is the palace of the Dalai Lama, and the centre of his faith. Standing on a hill, with five gilded pavilions, it is one of the most wonderful buildings in the world. The chief temple is the Jokhang, devoted to the worship of Buddha. The streets are narrow and dirty and the houses mean in appearance. Lhasa is much visited by pilgrims and round it is the Ling-kor or Pilgrims' Way. There are native manufactures and some trade. Pop 20,000.

Near Lhasa are three great monasteries containing between them perhaps 20,000 inmates. They are known as Debning, Sera and Gaden. The monks or lamas in the two first named take an active part in political life. Each is a university as well as a monastery.

Li Chinese weight. It is a thousandth part of a Chinese ounce. Li is also the name of a measure of length, equal to one-third of an English mile.

Liana General name for long climbing and twining plants in tropical and sub-tropical forests. Usually woody and rooted in the ground they attach themselves by aerial roots and tendrils to other vegetation, sometimes choking it, and forming festoons and monkey ropes, occasionally utilised for bridges.

Liao-Tung Peninsula of Manchuria, also the name of the adjoining gulf. It was ceded to Japan in 1895, but was soon returned to China. In 1905 the southern part of the peninsula, leased to Russia, was transferred to Japan and since then has been ruled by that country. It contains Port Arthur and Dairen, which is the capital. Pop (1930) 1,328,011.

Liao-Yang Town of Manchuria. It is on the railway and is a populous trading centre. Here, in Aug-Sept, 1904, there was some fierce fighting between the Japanese and Russian armies. In the end the Russians retreated and the Japanese

entered Liao-Yang, but the victory was by no means decisive.

Lias Series of strata forming the base of the Jurassic System and occurring in England from Devon and Dorset across to Yorkshire. The beds consist of blue clays, sands, shales and limestone, and are divided into Lower, Middle and Upper Lias. The Cleveland ironstone of Yorkshire is a Liassic formation, and the Whithy beds yield jet.

Libau City and seaport of Latvia. It is on the Baltic Sea, 150 m from Riga. It has a good harbour and shipping is one of the main industries, there are some manufactures. In the neighbourhood are sulphur springs. Near is the Lake of Libau. Its Latvian name is Līepāja. Pop 57,238.

Libel Writing or otherwise issuing any thing that may damage a person's business or reputation. In English law it is also a libel to publish anything of a blasphemous, seditious or immoral nature.

The law of libel chiefly concerns newspapers and periodicals, although libels are published in other ways. In England the chief law on the subject is the legislation passed in 1843. A person who is libelled, or thinks he is libelled, can bring an action for damages. It is for the defence to prove that the statements made were true and were justified, but even then, if the plaintiff can prove that he has suffered loss by them, he may obtain damages at the discretion of the jury.

If the characters of public persons are attacked, the offender can be prosecuted for a criminal libel. Statements made in both Houses of Parliament and in the courts of law are, however, privileged. See SLANDER.

Liberal In politics one who is in favour of greater political liberty. As such the word has been taken by political parties, for example, the National Liberals in Germany.

In England the Liberal party developed from the Whigs and took the name early in the 19th century. In the 50 years that followed the Reform Bill of 1832 it was on the whole the dominant party in the country and was responsible for many social and political reforms. Its leaders were Earl Grey, Earl Russell, Lord Palmerston and above all, W E Gladstone.

In 1885 the party was divided over the question of Home Rule for Ireland and was out of office, except during 1892-95, until 1905. It then had a spell of office lasting 10 years and covering the early days of the Great War, while it had a share in the Coalitions which followed. When the war ended the Liberal party was weak and divided, but its work was largely done, many of the reforms on its programme had been carried out, while others such as the disestablishment of the Church of England, no longer aroused enthusiasm. In a measure its decay was hastened by the growth of the Labour party which, in 1922, supplanted it as the official opposition.

Only a few Liberals were returned to the House of Commons in succeeding elections. In 1931 there were 72, split into three groups, two of which, led respectively by Sir John Simon and Sir Herbert Samuel, were represented in the National Government formed by Ramsay MacDonald, while the third, under Mr Lloyd George, stood out on the issue of Free Trade.

The Liberal Central Association, which is maintained by a number of Liberal associations

throughout the country, has offices at 21 Abingdon Street, London, S.W. Associated with it is the National Liberal Federation which holds a conference every year.

Liberal Unionist Political party now merged in the Unionist or Conservative one. It was founded in 1885 when some members of the Liberal party, who disapproved of Gladstone's plan to give Home Rule to Ireland, left him and founded an organisation of their own. They were led by the Duke of Devonshire, then Marquess of Hartington and Joseph Chamberlain, and included John Bright. Later the Liberal Unionist and Conservative organisations in England were merged in one, but in Scotland the Liberal Unionists retain a separate association. See CONSERVATIVE.

Liberator One who liberates or frees. The epithet is given to certain men who from time to time have distinguished themselves in leading their countrymen to freedom, such as Simon Bolivar, after he had taken Caracas from the Spaniards in 1813. It was also the title of a paper published in America from 1831-65 protesting against slavery and edited by W. L. Garrison.

Liberator Name of a building society. It was founded with allied companies by Jabez S. Balfour in 1808, and for a time was a very prosperous undertaking, but in 1892 the group failed with a liability of £8,000,000. Balfour was arrested and imprisoned. There was a good deal of distress and a fund was raised for the victims. The assets, one being the Hotel Cecil, were carefully husbanded, and during the 30 years that followed the collapse something was repaid to the depositors. See BALFOUR J. S.

Liberia Republic of Africa. It is on the west coast between Sierra Leone and the French possessions on the Ivory Coast. It covers 43,000 sq. m. and has a coastline of 350 m. Monrovia is the capital and the chief seaport. The main products are rubber and palm oil. Minerals are worked to a small extent. The country has no railways, but there are motor roads.

Liberia was formed to provide a home for freed slaves from America. The Republic dates from 1847 and is governed by a president and a council of ministers with a parliament of two houses. English is the official language. Liberia is a member of the League of Nations. The inhabitants are nearly all negroes, and Protestants. Pop. 2,600,000.

Liberty Sir Arthur Lasenby, English merchant. He was born at Chesham, Aug. 13, 1843, the son of a lace manufacturer. In 1875 he opened a shop in London, Liberty's, which specialised in artistic fabrics and gained a great reputation for the beauty and novelty of its wares. Knighted in 1913, he died May 11, 1917.

Libra Weight and monetary unit. The Latin word denoted the steelyard, its fixed weight counterpoise, a standard copper 12 lb. bar of 12 ounces, a copper coin and a gold monetary unit. It still designates a Spanish, Portuguese and S. American weight, and a Peruvian gold coin. Britain's pound is written lb. for weight, £ for value.

Libra Seventh zodiacal constellation, represented by the Roman scale beam, indicating equal nights and days when the sun's ecliptic crosses the equator at the autumnal equinox.

Library Collection of books, also the room or building which contains them. A library may be a few hundred books in a private house or the 3,000,000 in the British Museum.

Most civilised countries have national libraries. Notable examples are the British Museum in London and the Bibliothèque Nationale in Paris. Scotland and Wales have each a national library, the Scottish one including the Advocates' Library. At Oxford is the Bodleian and at Cambridge the University Library. These libraries are entitled to a copy of every book published in the country.

Some libraries are famous for the quality rather than the quantity of their books. One such is the John Rylands Library in Manchester which includes the collection bought from Earl Spencer at Althorpe. There are valuable collections of books and manuscripts in some cathedral and college libraries and in some of the great houses. The legal medical and other societies have libraries, but each of these is mainly confined to its own subject.

One of the most valuable libraries in the world is in the Vatican, others are in Rome and other continental cities.

The treasures of these libraries are mainly reserved for students, but for the general public there are lending libraries, usually controlled by a city or town council and often supported from the rates. Many were erected with money provided by Andrew Carnegie, whose money has been used to provide village libraries in various parts of the country. Other lending libraries, called circulating libraries, are privately collected, and those who use them pay a subscription for the privilege. In 1932 the Carnegie Trust decided to contribute towards a new building in London for the Central Library for students.

In most cities and towns there is also a reference library where books can be consulted, but not taken away. Manchester has a very good one and in 1932 one was opened in Norwich. The library of the Patent Office in London belongs to this class.

Special libraries include libraries for the blind. Each government department has a library and they are found in some business houses. In 1928 20 £1,909,007 from the rates was spent on libraries in England and Wales, and in 1927 28 £208,100 in Scotland.

LIBRARIANSHIP AS A CAREER—This offers a congenial occupation to many men and women, and is well paid in its higher branches. Junior assistants begin at £200 £300 a year, but a senior assistant should receive about £300, and the chief librarian of a public library system anything up to £1000—though about £400 £500 is the average salary.

The recognised professional qualifications are Fellowship and Associateship of the Library Association which are granted upon passing the requisite examinations. Those employed in libraries usually take the Correspondence Courses conducted by the Library Association (25-27 Bedford Square, London, W.C.1). Another method is to attend the School of Librarianship at the University of London (Gower Street, W.C.1) where a two years course leads to a Diploma which is accepted as a qualification for Fellowship. Graduates can complete this course in one year. Lectures are also given in the evenings for the convenience of those engaged during the day. Courses and Summer Schools are held in connection with other universities.

Libya Italian possession in Africa. The word, sometimes spelt Lybia, was used by the Greeks for the whole continent, but it is now confined to a district in the north. This lies along the north coast from Egypt to Tunis, and is divided into the two districts of Tripolitania and Cyrenaica.

Libya became a Turkish possession in the 16th century and so it remained until 1911. In that year Italy invaded and annexed it, this annexation being recognised by the Treaty of Ouchy, signed in Oct. 1912. In 1928 the area of the country was greatly extended by the inclusion therein of various oases. It has a coastline of about 1100 m and covers altogether over 800,000 sq. m.

The Libyan desert is the name of the part of the Sahara between Egypt, the Sudan and Tripoli. It has many oases. See TRIPOLI.

Licence Permission by the state to enjoy a certain privilege. To-day it is the usual way by which the state controls trades and privileges, and is also a source of revenue. The word has a special connection with the sale of intoxicating liquors, which must be only by licence. Public houses are known as licensed premises and the proprietor is a licensed victualler. The sale of drink is sometimes called the licensing trade.

Licences are necessary to enable one to keep a dog, drive a motor-car, sell tobacco, possess a wireless receiving set, act as a moneylender, auctioneer or pawnbroker and use a gun. Others who need licences are dealers in patent medicines, keepers of men servants, users of armorial bearings and hawkers. Owners of motor-cars and private carriages must take out a licence. The issuing of licences, except marriage licences (see MARRIAGE), is controlled by the Board of Customs and Excise. Most of them can be obtained through a post office and the work of seeing that they are taken out falls to the police. Licences for the sale of intoxicating liquors are granted by the magistrates. See LIQUOR CONTROL.

Lichen Compound plant organism consisting of two symbiotic partners, a fungus and an alga. The fungal element belongs, in nearly every instance, to the Ascomycete group and is usually responsible for the external form of the lichen. The green algal cells become enveloped in the felted mass of fungal threads, the two plants mutually benefiting by their association. Lichens form incrustations, foliaceous, or branching masses on rocks, tree trunks, etc., examples being the Beard Moss and Iceland Moss.

Lichen Form of skin disease commonly known as "dry itch." It consists of an eruption of a cluster of small red pimples on an inflamed area, becoming later a group of dry scaly points accompanied by severe itching and a burning sensation. It occurs usually in persons of nervous or sanguine temperament and may be induced by irritants from certain occupations.

Lichfield City, borough and market town of Staffordshire. It is 117 m. from London, on the L.M.S. Rly. It is a centre for the sale of agricultural produce and has breweries and other industries. The city has one of the most beautiful cathedrals in England, also associations with Johnson. St John's Hospital dates from 1495. The Three Crowns is an old inn. The war memorial is a garden of remembrance. The house in which Johnson was born is now a museum for his relics and there is a statue of him.

A bishopric was founded at Lichfield about 670 and from 786 to 803 its holder was an archbishop. At one time the city had a castle and until 1885 it sent members to Parliament. Pop. (1931) 8,508.

The title of Earl of Lichfield has been held by the family of Anson since 1831. The earl's seat is Shugborough Hall, Stafford, and his eldest son is called Viscount Anson.

Lichnowsky Karl Marx. German prince and diplomat. Born March 8, 1860, he entered the German Foreign Office in 1884, retiring in 1904. In 1912 he was appointed ambassador to Great Britain, and later was much criticised for his failure to preserve diplomatic relations between Great Britain and Germany in 1914. In 1917 he was exiled on the unauthorised publication of his *Meine Londoner Mission*, a criticism of German policy in the Sarajevo incident of 1914. He died Feb. 27, 1928.

Licinius Roman emperor. He was a peasant who became a soldier and attracted the notice of the Emperor Galerius, who put him in charge of a part of his empire. In 313 he became sole ruler of the eastern part of the empire, the remainder being under Constantine the Great. Rivalry arose and in 324 war broke out between them. Victory fell to Constantine, and Licinius was made a prisoner and later put to death.

Lick Observatory in California. It is on Mt. Hamilton, near the coast of the Pacific, and is controlled by the University of California. In order to secure the least possible amount of interference it is surrounded by a belt of untouched land. The observatory possesses powerful telescopes and ranks as one of the greatest in the world. It was founded by James Lick of San Francisco and was opened in 1885.

Lickey Hills Low range of hills in Worcestershire. They lie between Birmingham and Droitwich and about 500 acres belong to the city of Birmingham.

Lictor Official in ancient Rome. One or more lictors walked in front of the more important magistrates. They carried a bundle of rods, called *fusces*, and an axe, as symbols of the magistrates' power.

Liddell Henry George. English scholar. Born Feb. 6, 1811, the son of a clergyman, he became tutor and lecturer at Christ Church, and in 1846 was appointed headmaster of Westminster School. In 1855 he returned to Oxford as Dean of Christ Church and there he stayed until his death, Jan. 18, 1898. One of his daughters was the original of *Alice in Wonderland*.

Liddell was a prominent figure in Oxford and his name is perpetuated by the great Greek *Lexicon* prepared by himself and Robert Scott. This appeared first in 1843 and the latest of several new editions in 1930.

Liddesdale District of Scotland. It is in Roxburghshire and is the valley of the Liddel Water, a tributary of the Esk. There are border towers in the dale, including Hermitage Castle, and the scenery is most picturesque. The Armstrongs and the Elliots, famous border families, lived here.

Liddon Henry Parry. English preacher. Born at North Stoneham in Hampshire, Aug. 20, 1829, he was ordained in the Church of England, became Vice-Principal of the Theological College at Cuddesdon and in 1859 Vice-Principal of St Edmund Hall, Oxford. For the next eleven years he was one

of the leading figures in Oxford, exercising by his sermons and lectures great influence over the undergraduates. In 1870 he was appointed Canon of St Paul's, a position he held until his death at Weston super Mare, Sept. 9, 1890.

Liddon was prominent as a follower of Pusey and a leader of the High Church movement, but he is best known as a gifted preacher. His Lenten sermons in London, long though they were, were attended by vast crowds.

Lido Island and pleasure resort of Italy. It is 8 m long and is one of the islands that separate the lagoon on which Venice stands from the sea. In the 20th century it became a fashionable resort for English people. The social centre of the island is Santa Elisabetta. At the north of the island is a fortress.

Liebig Justus German chemist. He was born at Darmstadt, May 12, 1803, and was educated at Bonn, Erlangen and Paris. When only 21 years old he was appointed Professor of Chemistry at Glessen. In 1846 he was made a baron, and in 1852 he moved to Munich where he was Professor of Chemistry until his death, April 18, 1873.

Perhaps the leading chemist of his day, Liebig discovered various chemical substances notably chloral and chloroform, and wrote much on chemistry. He also improved the apparatus of the chemist and showed how the soil could be made more productive by the use of fertilisers. He invented the extract of meat which is called after him.

Liechtenstein Small principality of Europe. It is on the east side of the Rhine, between Austria and Switzerland, not far from Lake Constance. It covers 65 sq m. Vaduz is the capital. Agriculture, notably cattle rearing, is the chief occupation of the people. The land is governed by a prince and a diet of 15 members. Before the Great War it was closely associated with Austria, but now its coinage is Swiss and Switzerland controls its customs, posts and telegraphs. The principality was formed in 1719 and from 1815 to 1866 was part of the German Confederation. Pop (1930) 10,213.

Liège City of Belgium. It is on the Meuse, 55 m from Brussels. The buildings include the cathedral, the palais de justice and the museum. There is a university and a broadcasting station (242.7 M). The city is a centre of the iron and steel industry; others include the making of motor cars and various engineering products. On Aug. 6, 1914, the Germans attacked Liège. The last forts fell on the 16th and the city remained in German hands until Nov. 1918. Pop (1931) 165,657.

Lien Word used in English law. It describes the right a creditor has to retain property until his debt is paid. Thus, if a man has an overdraft, the bank can take a lien on some shares which he possesses. An innkeeper has a lien on the goods of his guest until the bill is paid, and a carrier on the goods which he carries.

Lieutenant Literally, one who takes the place of another. In the British navy a lieutenant is between a sub-lieutenant, or mate, and lieutenant-commander. In the army he is between a second lieutenant and captain. In the air force a flight lieutenant is between a flying officer or observer, and a squadron leader. In the army the lieutenant wears a badge of two stars on his sleeve in the navy he wears two stripes and a curl of gold braid.

Lieutenant-Colonel Rank in the British army, between colonel and major. A lieutenant colonel commands a battalion of infantry, a regiment of cavalry or a brigade of artillery. The badge of rank is a crown and star.

Lieutenant-Commander

Rank in the British navy. He ranks between commander and lieutenant. The badge of rank consists of three stripes and a curl. The equivalent rank in the army is a major and in the air force squadron leader. There are lieutenant-commanders in the various branches of naval work—engineer, paymaster, etc.

Lieutenant-General Rank in the British army. He ranks below a general and above a major general, and his usual command is an army corps. The badge of his rank is a crown with a sword and baton crossed beneath it.

Life State of activity peculiar to animals and plants in which an organism acts upon its environment which in turn reacts upon it. The physical basis of life is protoplasm, a complex mixture of compounds of carbon, hydrogen, oxygen and nitrogen, with usually some sulphur and phosphorus.

These compounds consist of proteins, fats, carbohydrates, mineral salts and about 75 per cent. of water. Protoplasm is an unstable structure as it is subject to constant physical and chemical changes (metabolism) by which the organism grows. These metabolic processes comprise those that build up (anabolism) and those that break down the protoplasm (katabolism). The living activities are expressed in movement, nutrition, growth, sensation and reproduction, and in all these activities a supply of energy is required, set free, in most cases, by oxidation of the protoplasm, the intake and use of oxygen being known as respiration. In the death of an organism, its unity is lost, and the protoplasm breaks up to form new compounds.

Lifeboat Special type of boat designed for saving life at sea. They are designed for stability and buoyancy, and have special valves for discharging the excessive inflow of water. They are operated from the shore or carried on ships and some have collapsible sides. Shore lifeboats are built of wood usually with a double skin of mahogany, and are propelled by oars and sails although many motor driven lifeboats are now in use.

The boats are maintained by the Royal National Lifeboat Institution at 42 Grosvenor Gardens, London, S.W.1. It maintains over 100 lifeboats, and has been responsible for saving over 62,000 lives. Its income amounted in 1931 to £264,039.

Life Guards Regiment of the British army. Part of the household cavalry it dates from the time of Charles II. and still forms the sovereign's escort on important occasions. For long there were two regiments of Life Guards, but after the Great War they were amalgamated. The Life Guards have a fine record of service which includes some hard fighting during the Great War. The regiment ranks as the senior one in the army.

Liffey River of Ireland, 50 m long, it rises in the mountains of Wicklow and flows through counties Kildare and Dublin to the sea. The city of Dublin stands on it.

Lifford County town of Donegal, Irish Free State. It is on the Foyle,

opposite Strabane, 15 m from Londonderry
Pop. 400

The title of Viscount Lifford has been borne by the family of Hewitt since 1781. The first viscount was Sir James Hewitt, Lord Chancellor of Ireland.

Ligament In anatomy the membrane that connects the movable bones. Especially in the knee, the ligament is very susceptible to strain. See KNEE JOINT.

Ligature Term applied to a thread of silk, catgut or other material used for tying up blood-vessels in surgical operations. Ligatures are made in different thicknesses and are sterilised usually with carbolic acid.

In musical notation, a ligature is a tie or line binding together a group of notes requiring a certain length of sound, or when the notes are of different pitch, intended to be sung with one breath or played as a continuous phrase.

Light Form of energy having the properties of vibration or wave motion and traversing space. It causes the sensation of sight by its action upon the eye. The speed at which light travels is about 186,000 m per second, so that the light of the sun takes nearly 8½ minutes to reach the earth.

Newton first showed that a beam of sunlight, when transmitted through a prism, is broken up into a coloured band or spectrum, the colours being red, orange, yellow, green, blue, indigo and violet. It is now known that beyond the red end of the spectrum are invisible heat or infra-red rays, and similarly beyond the violet end, other invisible ultra-violet rays, having a chemical or actinic action. The differences in wave length of the rays are associated with the differences in colour, and in the visible spectrum the longest wave lengths are at the red end, while the shortest are at the violet end. Light, heat and wireless waves are electro-magnetic vibrations of the same form, but differing widely in wave length.

For measuring the distance of the stars from the earth and for other measurements of the universe, a light year is taken as the unit. This is the distance travelled by light in a year and is calculated at 6 million million miles (6,000,000,000,000). See RELATIVITY.

Light Brigade Brigade of light cavalry. It refers particularly to the brigade of light cavalry that charged at Balaklava in 1854. See BALAKLAVA.

Lighter Large open flat-bottomed boat used in loading and unloading ships in port, and for carrying goods for short distances. They are generally towed but in some cases are steam propelled, and are used instead of barges on English inland waters.

The men in charge of lighters are known as lightermen. On the Thames they require a licence, which can be obtained from the Watermen's and Lightermen's Company, a very old organisation.

Lightfoot Joseph Barbor. English theologian. Born in Liverpool, April 13, 1828, he was educated at Trinity College, Cambridge, where he was senior classic, and fellow and tutor of Trinity College. In 1861 he was appointed Hulsean Professor of Divinity and in 1875 Lady Margaret Professor at Cambridge. In 1871 he was made Canon of St Paul's, London, and in 1879 Bishop of Durham. He remained at Durham until his death, Dec. 21 1889. Lightfoot was chiefly

known as an authority on the New Testament, which he helped to revise.

Lighthouse Building provided with powerful illumination to guide navigation of ships in dangerous waters. Lighthouses are built either on the coast or on a rock, and usually take the form of a tower surmounted by a "Lantern." The Eddystone lighthouse is a well-known example built on an isolated rock, while the Inchcape Rock lighthouse is built on a reef in the Firth of Tay. Usually the illuminant is a mixture of petroleum vapour and air burnt in a form of incandescent mantle, the beam of light being intensified by lenses and mirrors.

In England the maintenance of lighthouses is the business of Trinity House, which obtains an income by levying light dues on shipping. For Scotland there are the Commissioners of Northern Lighthouses in Edinburgh and the Clyde Lighthouses Trust in Glasgow. Other countries have similar organisations.

Lighting For purposes of illumination oil lamps were an early device. In some olive oil was used with a floating wick, in others the wick was confined in a nozzle. Candles of various kinds have been, and still are, used for illumination, the earliest form being the rushlight, where the wick consisted of a peeled rush stem.

With the invention of the Argand burner in 1783 and the introduction of petroleum, greater efficiency in lamps was obtained. From the beginning of the 19th century coal gas became more and more used as an illuminant, the invention of the Welsbach incandescent mantle in 1886 giving a marked increase in lighting power. A further advance came with the use of electric arc lamps and the introduction of the incandescent electric bulb by Edison and Swan in 1879 and 1880. See ELECTRICITY, GAS.

Lightning Flash due to an electrical discharge between two clouds or between the clouds and the earth. Lightning may originate either from a positive charge within the cloud and pass downward in a branching path, or it may originate as a positive charge in the earth and branch upward to the cloud. Sheet lightning is a reflection of a distant discharge or of lightning below the horizon. Ball lightning is a slower moving globular form which explodes violently in contact with an object.

Lightning Conductor Appliance attached to buildings for discharging gradually the electric current of lightning into the earth. It consists usually of a copper terminal fixed on the highest part of the building and connected to solid copper tape fixed to the walls by copper staples or gun-metal holdfasts. The tape passes downwards to an earth plate of copper buried in charcoal in damp soil. Tall chimney shafts often have a band near the top bearing four terminal rods.

Lightship Special type of vessel used for giving warning of sandbanks and other dangers to navigation on the coast. The vessel is moored in shoal water and bears at its masthead a form of lantern as a warning signal. Most of these vessels are manned by a crew, but some are entirely automatic in action. Four lightships are placed to mark the Goodwin Sands off the Kentish coast and another well-known lightship is moored off Spithead.

Lignin Essential constituent of woody tissue. Lignin, also known as ligno cellulose, is a complex organic compound permeating the cell walls and recognised by certain reactions.

Lignite Immature form of coal sometimes known as brown coal, and frequently showing traces of the original wood structure. It is an important fuel in many European countries, especially Germany, where it occurs in beds of considerable thickness. It is also found in Australia. It contains over 45 per cent. of volatile matter, and is used as fuel in the form of briquettes.

Lignum Vitae Tropical American evergreen tree of the *Guaiacum* order (*G. officinale*). It is called "wood of life," because of its medicinal properties. The tough, unsplittable, greenish black heartwood contains one fourth resin, used in chronic rheumatism and acute tonsillitis, turners employ it for pestles, pulley blocks and rulers. An E. Australian acacia furnishes hardwood called hickory lignum vitae.

Ligny Village of Belgium. It is famous because here, during the Waterloo campaign, Napoleon defeated the Prussian army on June 16, 1815. See WATERLOO.

Liguria Name of a division of Italy in ancient times. In the north of the country adjacent to the French frontier it included Genoa. The name is borne by a modern division of Italy, a range of the Alps and of the Apennines, and an arm of the Mediterranean. The republic of Genoa, when rearranged by Napoleon in 1797, was called the Ligurian republic. It lasted until 1805.

Li Hung Chang Chinese politician. Born Feb. 16, 1823, he came to the front as a soldier. Later he turned to politics and had a considerable share in introducing western ideas into China. In 1875, the ruler being a child, he became practically head of the government and remained so until his death, Nov. 7, 1901.

Lilac Genus of hardy deciduous shrubs of the olive order, natives of S.E. Europe and temperate Asia (*Syringa*). They bear large pyramidal clusters of small flowers, usually fragrant, bluish purple, reddish or white. The commonly cultivated *S. vulgaris*, 20 ft. high, was introduced into Tudor England. The smaller Persian, Chinese and Roman lilacs, 4-7 ft., are distinct or hybridised, *S. Jankaea*, from Transylvania, is scentless.

Lilith Female night monster who passed from Persian into Jewish folklore. Mentioned in Is. xxxiv, R.V. margin, the A.V. name is screech owl. Rabbinical literature made her Adam's wife before Eve's creation, she became thereafter a nocturnal, wandering demon, especially dangerous to children and women in childbirth, and involving the wearing of protective amulets.

Lille City of France. It is on the River Deule, 155 m. from Paris, and is well served by railways and canals. The buildings are mainly modern although on the Grande Place are the Grande Garde and the Bourse, both ancient. The city has a university with fine buildings and a Pasteur Institute. Lille is a great manufacturing centre, not only for iron and steel goods, but for textiles, which are produced in great quantities here. It has a broadcasting station (285.4 M., 1.3 kW.).

Owing to its position Lille has often been besieged and it has changed hands several

times. It was strongly defended when the Great War broke out, but the forts were soon reduced by the German guns. On Oct. 12, 1914, the garrison surrendered and it remained in German hands until Oct., 1918. Pop (1931) 201,568.

Lilliput Fabulous island in the Indian Ocean on which Gulliver was wrecked, in Swift's *Gulliver's Travels*, 1726. Its inhabitants did not exceed his finger in height. Garrick personally trained children to act in a play of the name 1756. Hence any thing dwarfish is called lilliputian.

Lillywhite Frederic William English cricketer. Born in Sussex, June 13, 1892, he was a bricklayer who soon won a local reputation as a cricketer. This spread, chiefly owing to his success as a bowler, and he went to London where, in 1814, he was engaged by the MCC. He remained a professional in the service of that club until his death, Aug. 21, 1854.

Lily Typical genus of herbs with scaly bulbs of the lily order (*Lilium*). Natives of N. temperate regions the flowers comprise six free perianth segments, the anthers being on slender filaments. Many garden forms are trumpet-shaped, sometimes with reflexed or rolled back segments. One of the oldest in cultivation is the Mediterranean white Madonna lily, the E. Asian dark spotted, orange red, tiger lily is either single or double flowered, the Japanese yellow-banded white *L. auratum* may be 6-10 in. across. The S. European purple martagon or turk's-cap and the Bermuda white Easter lily are other favourites. Other genera contain the African, *Guernesey*, Lent, S. Bernard's and water lilies. See DAFFODIL.

Lily of the Valley (*Convallaria majalis*). Perennial plant of the order *Liliaceae*. The spikes of white bell like flowers spring on erect stems from oval green leaves and have a delicious fragrance.

Lima Capital of Peru. It is 7 m. from the coast of the Pacific Ocean where is its port Callao and is a railway centre. It is laid out on modern lines and a feature is the large bull ring. There is a university. Lima has some manufactures and is the trading centre of the republic. It has large foreign elements in its population. Pop (1928) 265,000.

Limasol Seaport of Cyprus. It is on the south coast and the chief industry is exporting the produce of the island. Pop (1931) 15,349.

Limburg South-eastern province of Holland. Area 847 sq. m. pop (1931) 566,916, capital Maastricht, and north-eastern province of Belgium, area 930 sq. m., pop 373,228, capital Hasselt. These two, with a small area of the Liège province, formerly constituted an independent duchy.

There is also a town named Limburg in Liège province, where Limburger cheese was originally made.

Limbus In mediaeval scholasticism, a supposed borderline occupied by departed souls before the final judgment. Also called limbo it included a *limbus patrum*, Abraham's bosom in Luke xvi, the prison to whose spirits Christ preached in Hades (1 Peter iii), and a *limbus infantium* for unbaptised children. Dante's Inferno makes it the uppermost of hell's nine circles.

Lime Oxide of calcium, or quicklime. It is a white substance obtained by heating to redness limestone or marble. It readily

absorbs water, evolving heat and finally crumbles to a soft bulky powder known as slaked lime or calcium hydroxide, which is soluble in water, forming a solution known as limewater. Lime is used in the making of mortar and cements, as a soil dressing in agriculture, also as a water softener, and in many important manufactures.

Lime Typical genus of timber trees of the lime order (*Tilia*), natives of N temperate regions. The leaves are heart-shaped, oblique and saw-toothed, the clustered, sweet-scented, nectar yellowish-white flowers attract bees. Small-leaved and taller large-leaved subspecies grow wild in Britain. The common European lime or linden, *T. europaea*, introduced into Tudor England, furnishes whitewood useful for toys kitchen utensils and carvings, the inner bark or bast makes Russian matting. The N American basswood, or American lime, 80-100 ft high, is more important.

Lime Fruit Yellow, round or oval, thin-skinned fruit of two cultivated varieties of the citron. It originated in Asia. Sour limes, 1½ in across, regarded as *Citrus medica*, var *acida*, yield commercial lime-juice, citric acid and an essential oil. West Indian being preferred. Sweet limes, regarded as *C. medica*, var *limetta*, are esteemed in India.

Limehouse District of London. It is on the north side of the River Thames in the borough of Stepney. It is largely inhabited by sailors and there are several docks in the district. It has also a large Chinese population. There are several homes and institutes for seamen. Limehouse Cut connects the Rivers Thames and Lee.

Lime Juice Liquid squeezed from the fruit of the sour lime. It is used as a preventive of and remedy for scurvy, and also as a source of citric acid.

Limelight Means of illumination obtained by heating quicklime to an incandescent state in an oxy hydrogen flame. A cylinder of lime slowly rotated in the flame produces the characteristic brilliant white light. Though still used for stage effects and in optical lanterns, it is now largely replaced by electricity.

Limerick City, seaport and market town of the Irish Free State, also the capital of the county. It is on the Shannon, 129 m from Dublin, and is served by the Gt Southern Rlys, and by canals. It consists of Irish Town, English Town and Newtown Pery. The chief trade is shipping, for which there are docks, and much dairy produce is exported. Bacon curing and other agricultural industries are carried on and the city is famous for its lace. The river is crossed here by several bridges. Pop (1926) 39,448.

The famous siege of Limerick took place in 1691 and the treaty of Limerick was signed after its surrender, on Oct 3, to the forces of William III.

The title of Earl of Limerick has been borne since 1803 by the family of Pery. The earl's eldest son is called Viscount Glentworth.

Limerick County of the Irish Free State. In the province of Munster, it covers 1064 sq m. It is mainly level, but contains the Galtee Mts in the N.W. The district called the Golden Vale is one of the most fertile parts of Ireland. The chief rivers are the Shannon, which forms the northern boundary, and its tributaries. Limerick is the county

town, others are Newcastle, Rathkale and Adare. Pop (1926) 100,895.

Limerick Kind of verse, usually nonsensical and humorous. Said to have been invented by Edward Lear, it consists of five lines. The first, second and fifth lines rhyme, as do the third and fourth, which are shorter. An example is

There was a young lady of Riga,
Who went for a ride on a tiger,
They returned from the ride
With the lady inside,

And a smile on the face of the tiger.

Limerick competitions in which the competitor completes an unfinished limerick, have from time to time proved popular.

Limestone General term for rocks whose chief constituent is carbonate of lime. When pure, a limestone is white, but the presence of iron compounds and other impurities give rise to red, brown, green, blue and other tints. Examples of limestones are chalk, dolomite and marble, and most varieties are used in building and allied industries.

Limited Liability Term used in English company law. Since 1855 it has been possible to form companies in which the liability of the shareholders is limited to the amount of their shares. Previously a partner or shareholder was liable to lose everything he had if a business failed, as is the case with private firms to day. Other legislation notably acts of 1862, 1908 and 1929, have dealt with the affairs of these limited liability or joint stock companies, but their fundamental position has remained unchanged. The companies are of two kinds (1) liability limited by shares, (2) liability limited by guarantee.

Limoges City of France. It stands on the Vienne, 250 m. from Paris, and is a railway junction. The chief building is the magnificent cathedral. The city is chiefly famous for the porcelain which is made here. This is hard and semi-transparent with a brilliant glaze. The city has a broadcasting station (293 M, 0.7 kW). Pop 93,192,577.

Limonite Name given to brown haematite, the hydrated sesquioxide of iron, containing about 60 per cent of the metal and occurring in fibrous, concretionary or earthy masses resulting often from the decomposition of other iron ores. A loose porous form deposited in marshes is known as bog iron ore and occurs in Scandinavia.

Limpet Large, widely-distributed sub-order of marine belly-footed molluscs with conical shells. Abundant on European coasts, the common *Patella vulgata*, clings to rocks with its round sucker-like foot, feeding upon seaweed, its lingual ribbon having 1920 rasp-like teeth. Millions are collected annually for bait, and in some parts of Ireland for food. See GASTROPODA.

Limpopo River of South Africa, also called the Crocodile. It rises in the Transvaal and enters the sea 100 m. to the north of Delagoa Bay. For part of its distance it forms the northern and western boundary of the Transvaal.

Linacre Thomas. English scholar. Born about 1460 he was educated at Canterbury and Oxford. He studied medicine in Oxford and in Italy, and became tutor to Henry VII's son, Arthur. Later he was

physician to Henry VIII. He died Oct. 20, 1524.

Linacre is known as one of the group who forwarded the New Learning in England, More and Colet being others of the group. He was one of the founders of the Royal College of Physicians.

Lincoln City, county borough and market town of Lincolnshire, also the county town. It is on the Witham, 130 m from London, on the L N E and L M S Rlys. Its chief glory is the cathedral one of the most magnificent Gothic buildings in the world, superbly placed upon a hill. A new palace and an old one, as well as a theological college, are associated with the cathedral.

Other antiquities include remains of the Roman city and of the Norman castle, the old guildhall, part of a gatehouse called Stonebow, and John of Gaunt's stables also an old guildhall. Two houses are among the oldest specimens of domestic architecture in England. Lincoln's industries include engineering works and flour mills. It has a large trade in timber and farm produce. Races are held here. Pop (1931) 60,348.

Lincoln Abraham American statesman. He was born in a log hut in Kentucky, Feb. 12, 1809, the son of Thomas Lincoln, who was descended from an emigrant from Hingham, in Norfolk. His mother, Nancy Hanks, died when he was a boy, and in poor circumstances the family moved from place to place finally settling in Illinois.

Abraham received a little education in school, but more from his own reading. In his rough surroundings he was known as a man of unusual strength and was popular as a story teller. He earned a living on the land, leaving it twice to work on cargo boats that sailed down to New Orleans. He then became a clerk at New Salem, Illinois, and went on a campaign against the Indians in 1832. On his return he and a partner opened a store, but this failed. He then secured a position as postmaster of the town and worked as a surveyor. He qualified as a lawyer in 1836, and began to practice at Springfield in 1837.

In 1834 Lincoln's public life began with his election to the legislature of Illinois, and his talents as a debater won for him the leadership of his party. In 1846 he was elected to the House of Representatives at Washington, but he declined re-election in 1850.

The last period of Lincoln's life began in 1854 when the controversy about slavery became acute. The Republican party was formed to prevent any extension of the slave holding area. Lincoln soon became its leader in Illinois and continued a series of debates with Stephen A. Douglas begun in 1839. In 1856 he was an unsuccessful candidate for the vice presidency, but continued to lead the Republican Party, was nominated for the presidency and in 1860 was elected President. In 1861 the Southern States seceded and under his direction the Northern States entered upon the Civil War. Amid circumstances of great difficulty he directed the campaigns and in the end the North was victorious. He had saved the Union, which he always asserted was his aim, although at an enormous cost, and in 1863 he had announced the emancipation of the slaves. In 1864 he was again elected President, his opponent being McClellan, and in his inaugural address he spoke of his desire to heal the wounds of the country. On April 14 he was shot in the theatre at Washington by an actor, J. Wilkes Booth, and died on the following day.

In 1842 Lincoln married Mary Todd. Only one of his four sons survived him, Robert Todd Lincoln, who was American minister in London, 1889-1893.

Lincoln was the greatest figure in the history of his country. There is a statue of him near the Houses of Parliament at Westminster.

Lincoln Judgment Name given to a decision of the Archbishop of Canterbury on matters of ritual in the Church of England. Edward King (c. 7), Bishop of Lincoln was presented in 1889 for certain acts performed during the celebration of the Holy Communion. The case was heard before E. W. Benson, the Archbishop of Canterbury, and most of the acts declared legal. The decision was confirmed on appeal by the Privy Council.

Lincolnshire Second largest county of England. It has a long east coastline on the North Sea, from the Humber to the Wash. It covers 2665 sq m and is divided into three parts, Lindsey, Kesteven and Holland, each with its own county council. Lincoln is the county town. Other places are Grimsby, Boston, Grantham and Skeffington. The watering places include Cleethorpes and Skegness. The principal rivers are the Trent, Witham and Welland.

The county is flat, although there are chalk hills in the N. E. and the soil fertile. Wheat, barley and potatoes are grown and cattle are reared. Fishing is another industry. In the north is a coal and iron field. In the S. E. is the fen district and around the Wash is much reclaimed land. Pop (1931) 624,553.

The Lincolnshire Regiment, known as the 10th Foot, dates from 1685. It has a fine record of services. The depot is at Lincoln.

Lincoln's Inn One of the Inns of Court in London. It occupies the site of a house owned by an Earl of Lincoln in the 13th century, between Chancery Lane and Lincoln's Inn Fields. The Old Hall (1506) was restored in 1927.

Lincoln's Inn Fields was laid out as a square by Inigo Jones. It now belongs to the London County Council. In the centre are some gardens and the buildings around include Sir John Soane's Museum and the Royal College of Surgeons. The Fields cover seven acres.

Lind Jenny Swedish singer. She was born at Stockholm, Oct. 6, 1820. After her first successes at the opera house at Stockholm in 1838-1841 she studied under Garcia in Paris. In 1847 she appeared for the first time in London and later made her home in England, where "the Swedish nightingale" was very popular. A devout Christian her later appearances were all in oratorios or on the concert platform. She taught singing for a time at the Royal College of Music, London. In private life the wife of Otto Goldschmidt, director of the Bach Choir, she died at Malvern, Nov. 2, 1887.

Lindbergh Charles Augustus American aviator. Born at Detroit, Feb. 4, 1903, of Swedish descent, he entered the Air Mail Service of the U.S.A. In May, 1927, he became known by his flight across the Atlantic for a prize of \$5000. In a monoplane he did the journey from New York to Paris in 33 hours 50 minutes the first airman to fly the Atlantic alone. In 1929 Colonel Lindbergh married a daughter of Dwight Morrow, late ambassador to Mexico. The kidnapping of their infant son in 1932 aroused interest all over the world. After a search

lasting ten weeks the child's remains were found in the garden of their house. In 1935 a German, Hauptmann, was pronounced guilty of the murder and condemned.

Lindisfarne Island off the coast of Northumberland, sometimes called Holy Island. In Anglo-Saxon times St Aidan founded a monastery there. Later it became a Benedictine house, and its ruins remain. About 1500 a castle was built, and restored in the 20th century. At low water Lindisfarne can be reached on foot. The nearest station is Beal. The Lindisfarne Gospels, an illuminated MS dating from the 7th century, is in the British Museum.

Lindley Baron English lawyer. Nathaniel Lindley was born Nov 29, 1828, and educated at University College School and University College, London. He became a barrister in 1850 and in 1875 a judge. In 1881 he was made a judge of the Court of Appeal, in 1897 Master of the Rolls and in 1900 a Lord of Appeal and a life peer. He resigned in 1905 and died Dec 11, 1921. Lindley's hook on the law of partnership is the chief authority on this subject.

Lindley John English botanist. Born at Catton, Norwich, Feb 5, 1790, he was educated there, and in 1821 entered the service of the Royal Horticultural Society to lay out the garden at Chiswick. He became secretary of the Society and from 1829 to 1850 was Professor of Botany at University College, London. He died Nov 1, 1865. Lindley wrote *The Vegetable Kingdom* and other books, and edited *The Botanical Register* and *The Gardener's Chronicle*.

Lindrum Walter Australian billiards champion. In 1929 he came to England and beat a number of records, notably when he made a break of 3905 and when he scored 2572 points in a single afternoon. In 1932 he made a record break of 4137. He is left-handed.

Lindsay Sir Ronald Charles British diplomat. A son of the 26th Earl of Crawford and Balcarres, he was born May 3, 1877, and educated at Eton. In 1898 he entered the Foreign Office and gained experience of diplomatic work in Paris and elsewhere. From 1913 to 1919 he was Under Secretary for Finance in Egypt. In 1924 he went to Constantinople and in 1926, having been knighted, to Berlin as ambassador. In 1930 he was transferred to Washington.

Lindsey District of Lincolnshire. See LINCOLNSHIRE. The title of Earl of Lindsey has been borne by the Lincolnshire family of Bertie since 1626. The earl's seat is Clington House, near Stamford.

Linen Textile material made from the fibres of the flax plant, *Linum usitatissimum*. The flax fibres represent the hard bast of the stem and are prepared by retting, a process in which fermentative bacteria in water act upon the cementing substance of the bast separating the fibres. This process is effected by steeping the stems in ponds, tanks or streams. The retted straw is dried, and then broken or scutched in mills to remove all extraneous matter. By passing through hackling mills, the short fibres or tow are separated from the long fibres or line which are then spun into yarn for making linen. Lawn, Cambric and damask are examples of fine textured linen, while sheeting and some grades of tablecloths are made from coarser yarn. The chief seat of the industry is Northern Ireland.

Ling Soft-finned food-fish of the cod family (*Molva vulgaris*), ranging from Iceland to the English Channel. Dark-grey, lighter beneath, 4-6 ft. long, it is a ground-fish, trawled at 50-100 fathoms in the North Sea, and line-fished in winter. Salted or dried as Lenten stockfish for Central and South Europe, it yields inferior "cod-liver" oil.

Lingard John English historian. He was born at Winchester, Feb 5, 1771, and educated at Douai. He became a teacher in a Roman Catholic college in Durham and there remained until 1811. He died at Hornby in Lancashire, July 17, 1851. He refused to become a cardinal.

Lingard is known by his *History of England* which takes the story up to 1688. It was very popular, and a new edition, edited and extended to 1910 by Hilaire Belloc, appeared in 1914.

Lingfield Town of Surrey, 10 m. from Reigate, on the S. Rly. The beautiful collegiate church dates from the 15th century and there is an old prison, now used as a museum. Races are held here.

Link Unit of measurement. Gunter's surveying chain contains 100 links, each 7.92 in. The American engineering chain has 100 links, each 12 in.

Link Torch of tow or hards dipped in pitch, perhaps so called because cut into lengths or links. Before street illumination developed they served for lighting passengers. Linkboys plied for hire. Iron link-stands with rings for holding links, and funnel-shaped extinguishers, occasionally survive on old London house doors.

Linlithgow Burgh, market and county town of Linlithgow, or West Lothian, 17 m. from Edinburgh, on the L.N.E. Rly. The palace, the birthplace of Mary Queen of Scots, overlooks Linlithgow Loch and was a residence of the kings of Scotland. It is open to visitors and is second in historic interest only to Holyrood. St Michael's Church is one of the finest parish churches in Scotland. The town has leather and paper manufactures. Pop (1931) 3666.

Linlithgow Marquess of Scottish title held by the family of Hope. John Adrian, 7th Earl of Hopetoun, who was the first Governor-General of Australia, was made Marquess of Linlithgow in 1902. He left Australia in 1905 and in that year was Secretary for Scotland. His son, Victor, the 2nd marquess, in 1923 was chairman of the committee that inquired into the price and marketing of agricultural products and issued the Linlithgow Reports. In Aug. 1935, he was appointed to succeed Lord Willingdon as Viceroy of India. His seat is Hopetoun House, near Linlithgow, and his eldest son is called the Earl of Hopetoun.

Linlithgowshire County of Scotland, also called West Lothian. It covers 120 sq. m. and has a coastline on the Firth of Forth. Linlithgow is the county town, other places are Broxburn, Bo'ness, Bathgate and Queensferry. The Avon and the Almond are the chief rivers and there are hills in the north. Pop (1931) 81,426.

Linnaeus Carl. Swedish botanist, later styled Carl von Linné. He was born at Rashult in Smaland, May 23, 1707, and early studied botany. He was educated at Upsala University for a medical career, but in 1730 was appointed Assistant Professor of Botany. In 1735 he gained his doctor's degree.

in Holland, and on his return to Sweden, practised for some years as a physician, but from 1741 until his death he was Professor of Botany at Upsala. In his most famous works, the *Systema Naturae*, *Genera Plantarum* and *Bibliotheca Botanica* Linnæus laid the foundations of modern botanical nomenclature. He died Jan 10, 1778. His library and collections became the property of the Linnean Society, Burlington House, London, in 1828.

Linnell John English painter. Born in London, June 16, 1792, he turned his attention from portraits to landscapes and engravings. His landscapes are chiefly scenes in Surrey. Examples of his work are to be seen in the National and Tate Galleries, London. He died Jan 20, 1882.

Linnet Common British resident song-bird of the finch family, *Linola cannabina*. Stout billed, 5½ in long, it is called grey, brown or rose according to sex or season. Its wood lined nest shelters 4 to 6 brown speckled, dirty white eggs. A favourite cage bird, it ranges Europe and W Asia, wintering southward, being largely replaced in Scotland by the mountain linnet or twite.

Linnhe Loch or arm of the sea. It is on the W coast of Scotland, between the counties of Inverness and Argyll.

Linoleum Trade name meaning linseed-oil fabric, of a kind of floorcloth. Patented 1860 and 1863, it comprises oxidised linseed oil incorporated with ground cork, resins and pigments, pressed upon a coarse canvas backing between steam heated rollers. It may be self-coloured, printed or inlaid with coloured compositions. It is made in Lancaster, Greenwich and Dunfermline.

Linotype Printing machine which sets up a whole line of type by a series of mechanical operations. In a similar manner to a typewriter the operator depresses a key releasing a matrix or metal plate, bearing a corresponding letter, from a magazine. The matrices are carried along to a compartment on the machine in which molten type metal is forced against the matrices to form casts of the lines of letters, the machine then returning the matrices to the magazine.

Linseed Ripened and dried flax seeds. Oval, compressed, lustrous brown, the outermost coat contains mucilage from the cotyledons are expressed, with or without heat, 40 per cent of a valuable drying oil used for paint, varnish, linoleum, soap and printers' ink. The residual 60 per cent is pressed into oil-cake for cattle food. Of the world's production of 4,000,000 tons Argentina raises half, India, Russia, Canada and U.S.A. the remainder. *Linseed poultices*, of freshly ground meal, are unsuitable for open wounds.

Linthwaite Urban district of York shire (V.R.) It is on the Colne, 3 m from Huddersfield, a centre for woollen manufacture. Pop (1931) 9889.

Lion Largest of the cat tribe (*Felis leo*), sometimes reaching 10 ft. overall, and surpassing 500 lb. The shaggy mane on the male's head and shoulders distinguishes it from other large Old World cats, the tufted tail conceals a thorn like spine. The tawny coat, pale to deep, is uniform, the mottling and striping of the cub's coat disappears at maturity. Barbary, Senegal and Persia furnish varieties. One was contemporary with early man in England. Lions prey on antelope, zebra and other large mammals, also on cattle and

plugs, man eating is rare. They are found in Africa and parts of Asia, including India.

Lion Heraldic charge, especially on royal and princely shields. The earliest attitude, reared on hind legs, was called rampant, distinguished from passant, walking on three paws statant, walking on four paws, sejant recumbent salient, springing gardant, denoting full faced. The lions of England, first used on Richard I's great seal, 1194, are passant gardant.

Lip Upper and lower muscular border of the mouth, comprising skin, fibrous and glandular tissue, muscle and mucous membrane. The superficial blood vessels impart a rosy colour which anaemia renders pallid and defective oxygenation livid. Lip ornaments, characterising certain African and American Indian peoples, are made of stone, bone, wood, metal, shell and feathers, usually involving perforation. See HARE LIP.

Lipari Group of 7 islands about 20 m from the N coast of Sicily and 46 sq m in area. They are volcanic and Stromboli is still active. The town of Lipari, on Lipari Is. is the capital with a good harbour, and a castle built by Charles V. The soil is fertile and the islanders grow olives, currants, etc. Pop 22,000.

Lipoma Name given to a certain kind of innocent tumour, in which fat is mingled with the tissue. It is found on any part of the body, chiefly in persons of sedentary habits and is harmless. The only real cure is surgical.

Lippe State of N.W. Germany, now a republic. It covers 489 sq m and Detmold is the capital. The Weser is the chief river. The soil is fertile, but much of the land is forest. Pop 163,650.

The River Lippe is a tributary of the Rhine. It flows through Westphalia and is 150 m long.

Lippi Fra Filippo Italian painter. He was born at Florence in 1412 and became a monk, hence the designation Fra or Frater. Living at Padua, Florence, Prato, where he was chaplain in a convent, and elsewhere, he painted a good deal and there are pictures by him in the National Gallery, London, the Louvre and other European collections. He died at Spoleto in Oct., 1469.

His son, Fra Filippino Lippi (1460-1504), was equally famous as a painter and some of his work is in the National Gallery, London.

Lip-Reading Understanding the speech of others by observing the movements of lips and tongue, and the facial expression. Some deaf persons employ it instead of watching finger spelling. It has proved unsatisfactory for the systematic training of deaf mutes, except in combination with manual methods. The British National Institute for the Deaf recognises as one of its objects the re-education of the partially deaf through speech reading. See DEAFNESS.

Lipton Sir Thomas Johnstone British merchant. Of Irish parentage he was born in Glasgow May 10, 1850. He began life as an errand boy and about 1865 went to the United States. In 1876 he opened a provision shop in Glasgow. The business prospered, other shops were acquired, and in a few years the firm of Lipton & Co., Ltd., became one of the largest in the retail provision trade, with interests in Ceylon and elsewhere. In 1898 Lipton was made a knight, and in 1902 a baronet. He died unmarried Oct. 21, 1931. To the public Lipton was best known as a

yachtsman and a liberal donor to the hospitals. He built several yachts, called *Shamrock*, which competed for the America Cup.

Liquation Metallurgical process for the separation of a metal from its ore. It is used especially in the case of complex ores containing mixtures of lead, silver and copper, by heating the ore in a furnace to a temperature at which those constituents, having lower melting points than the rest, sweat out or liquate from the mass.

Liquefaction Term used in physics. It describes the change of a substance from a solid to a liquid, as ice to water, and also the change from a gas to a liquid. The latter results in liquid gases, such as liquid air, liquid oxygen and others, which are much used in commerce. The processes, which were greatly developed by the researches of Sir James Dewar, are very elaborate. The gases are cooled by allowing them to expand.

Liqueur Potable spirit, usually sweetened with a distinctive flavouring. Well-known varieties include Kirsch and Maraschino, distilled from or flavoured with cherries, Kummel, flavoured with caraway seeds, Curaçao, with bitter orange peel, Absinthe, with wormwood, Noyau, with fruit-kernels. Benedictine and green or yellow Chartreuse utilise secret monastic recipes. Crèmes are usually thick and oily, e.g., Crème de menthe. Apricot, oberry, orange and peach brandy, and sloe gin, are prepared by steeping the fruits. Vermouth is fortified and aromatised white wine.

Liquid State of matter in which the molecules are held together by cohesion to a less degree than in a solid, and have a greater freedom of movement giving the property of fluidity.

Measures used for liquids are called liquid or fluid measures. In Great Britain the standard measure is the gallon, defined as the measure of 10 lb of distilled water at 62°F with the barometer at 30 in., making it contain 277.274 cubic in. of distilled water. The unit in the metric system is the litre. See LITRE.

Liquid Fire Weapon introduced by the Germans during the Great War. It was an inflammable oil ignited from a blow pipe called a flammenwerfer, or flame thrower. Gas was used to eject the oil which then burst into flame.

Liquidation Term generally used for the paying of debts when a limited company is insolvent. It is the equivalent of bankruptcy in the individual. A company, however, may go into liquidation for purposes of amalgamation or reconstruction, or because the object for which it was formed has been attained. There are three modes of liquidation, voluntary, voluntary under the supervision of the court, and compulsory.

Liquor Control Supervision by the state of the sale of intoxicating drink. In Great Britain no one can sell intoxicating liquor, for consumption on or off the premises, unless he obtains a licence. These licences are granted by the magistrates, and an annual charge, dependent upon the value of the public house, is paid. A licence is usually only granted for a year and can be withdrawn if its holder infringes the law. The police are responsible for seeing that the law is observed, and they can object, as can any one else, to the renewal of a licence if they have grounds for complaint. In Scotland there is a system of local option.

Other methods of control, notably the Gothenburg System in Sweden, have been tried, these including a partial control by the State, as in some provinces of Canada.

In England, during the Great War, the State took entire control of the sale of intoxicating liquor in certain areas where munitions were made. After the war this control was retained in the Carlisle district, where it is still managed by a board of control under the Home Office. In 1930 a royal commission was appointed to inquire into the licensing laws as they concern the sale of intoxicating liquor. See LOCAL OPTION.

Liquorice Brittle, blackish substance (*glycyrrhiza*). It comprises juice extracted from the long, woody roots of a perennial Mediterranean leguminous herb. Both this stick liquorice and the peeled root serve as a mild laxative, sweetmeat, flavouring for nauseous medicines and demulcent in throat lozenges. It comes from Pontefract, Yorks., but chiefly from Calabria and Spain.

Lira Unit of currency in Italy. It is divided into 100 centesimi and is coined in silver. Paper lire were also issued. The nominal value of the lira is 94d, the same as the franc, but it has depreciated since the War. In 1927 it was stabilised at 92.46 to the £.

Lisbon City and seaport of Portugal, on the estuary of the Tagus, about 12 m. from the sea, it has been the capital since 1260. It has a pleasing climate and a fine situation and is much visited by foreigners. The Praça do Commercio is the largest of several fine squares, and there is a huge bull ring. The river makes a magnificent harbour, well equipped with docks, and considerable business is due to its position as the financial and distributing centre of the republic. It is also a fishing port and has two broadcasting stations (31.25 M., 2 kW. and 282.2 M., 2 kW.). The city includes Belem and Alcantara, famous for its marble aqueduct, and covers 50 sq. m. It was almost destroyed by an earthquake on Aug. 1, 1755. Pop. (1930) 594,390.

Lisburn City, urban district and market town of Co. Antrim, N. Ireland, on the Lagan, 8 m. from Belfast, on the G.N. (Ireland) Rly. The principal industry is linen manufacture. Pop. 12,400. The title of Earl of Lisburne has been held since 1776 by the family of Vaughan.

Liscard District of Cheshire. On the River Mersey with a station on the L.M.S. Rly., it is in the county borough of Wallasey. Pop. 16,535.

Lisieux Town of France. In the department of Calvados, it is on the River Touques, 30 m. from Caen by rail and 19 from Honfleur. The church of St. Pierre was once a cathedral. The episcopal palace is now a museum. Pop. 16,000.

Liskeard Borough and market town of Cornwall, 15 m. from Plymouth, on the G.W. Rly. There is a trade in agricultural produce. Pop. (1931) 4,266.

Lismore Island of Argyllshire, 9½ m. long and 1½ m. broad, at the entrance of Loch Linnhe. There are ruins of a cathedral and a castle, and a collection of Gaelic poems known as the Book of the Dean of Lismore. Agriculture and fishing are the chief occupations, and there is a lighthouse on the S.W. point. Pop. 357.

Lismore Town of Co. Waterford, Irish Free State. It is on the Blackwater, 4 m. from Cappoquin, on the Gt. S. Rly.

The castle, once the property of Sir Walter Raleigh, is now a seat of the Duke of Devonshire. Pop 1600

Lister Baron English surgeon and scientist Joseph Lister was born at Upton, Essex, April 5, 1827, the son of a member of the Society of Friends. He was educated in London and became a doctor. Specialising in surgery, he was made professor of that subject at Glasgow in 1860. In 1869 he became Professor of Clinical Surgery at Edinburgh, and in 1877 at London. In 1885 he was made a baronet and in 1897 a baron. His other honours included the Order of Merit and the presidencies of the Royal Society and the British Association. He died Feb 10, 1912, when his title became extinct.

Lister was one of the greatest surgeons of his time, and is famous as the inventor of antiseptics. The Lister Institute of Preventive Medicine was founded in 1891 and took its present name in 1903. Its headquarters are at Chelsea and it has laboratories at Elstree.

Listowel Market town and urban district of Co. Kerry, Irish Free State, on the little River Feale 170 m from Dublin on the G.S. Rlys. There are ruins of a castle. The town has an agricultural trade. Pop 2917.

The title of Earl of Listowel has been borne by the family of Haro since 1822. The earl's eldest son is called Viscount Kenismore.

Liszt Franz, Hungarian musician. Born Oct 22, 1811, the son of Adam Liszt, he began to show his genius when a child. He studied music in Vienna and Paris and soon became known on the concert platform, appearing in London and other centres. In 1849 he was made conductor of the opera at Weimar, where he remained until 1861. The rest of his days were passed mainly in Paris and Budapest, and he died at Bayreuth, July 31, 1886. In 1865 he took orders in the Roman Catholic Church, and he is sometimes called the Abbé Liszt.

Litany Form of prayer or supplication in which the responses are said by the congregation. It was first used in the 4th century and since then many litanies have been compiled. The litany of the Church of England is based on the one compiled by Cranmer in 1544.

Litharge Monoxide of lead. It is formed when lead is heated strongly in air, causing slow oxidation of the metal, or by heating lead carbonate to dull redness. As a heavy straw yellow powder it is known as massicot, but when melted to form a crystalline solid as litharge. It is used as a glaze for pottery and in glass, enamel and rubber manufactures.

Litherland Urban district of Lancashire, 4 m from Liverpool, on the L.M.S. Rly. The Liverpool overhead electric railway also has a station here. Pop (1931) 15,967.

Lithgow Town of New South Wales. It is 100 m from Sydney by rail and is a mining centre, with coal iron ore and shale. There are some manufactures. Pop 16,380.

Lithography Process of surface printing taken from stone, zinc or aluminium. It was invented about 1798 by Alois Senefelder. The process is based upon the antipathy between grease and water so that when the stone or plate, upon which is a drawing in greasy ink, is moistened with water and an inked roller is passed over the

surface, the ink is retained by the drawing, but rejected by the water elsewhere.

Lithosphere Term used to denote the solid mass of the earth. The lithosphere has an irregular surface and has been divided into an abysmal area where the ocean is over 10,000 ft deep, a transitional area where the water is under 10,000 ft in depth, and a continental area forming the land surface.

Lithuania Republic of Europe. Formerly part of Russia, it lies between Latvia, Poland and Germany, and has a coastline on the Baltic. Its boundaries with Poland are not absolutely settled as both countries claim Vilna and district. Kovno or Kaunas is the temporary capital, but Vilna, which is in the possession of Poland, is regarded by Lithuanians as the capital. Other places are Grodno or Gardinas, and Suwalki, both still retained by Poland. Memel is the chief seaport, but here Poland has certain rights. The area is 21,489 sq m, but with the regions in dispute it is about 30,000. Pop. (1931) 2,924,983.

Lithuania is an agricultural country, level and fertile. Oats, wheat, rye and potatoes are among the crops. Cattle, sheep and pigs are reared and there are large forest areas. Dairy produce, corn, cattle timber and hides are the chief exports. The army is recruited by compulsory service. The litas, worth about 4d., is the unit of currency. There is a state bank which issues notes.

The constitution of the country consists of a President, elected for seven years, and a cabinet under a Prime Minister. This is responsible to a legislature or diet, elected every five years by all men and women.

Soon after 1300 Lithuania became a grand duchy and in the 15th century was a very large state, stretching from the Baltic to the Black Sea. In 1569 it was united with Poland, although in some respects remaining independent. At the end of the 18th century, like that country, it was partitioned, Russia and Prussia dividing it between them.

In 1918, the Lithuanians, then under Russian rule, proclaimed their independence. Russia recognised this in 1920 and the European powers in 1922. In 1926 military officers overthrew the government and appointed a new President who was re-elected in 1932.

Under the Treaty of Versailles a French High Commissioner replaced German rule over the town and territory of Memel, but in Jan. 1923 the Lithuanians invaded it and by a Convention signed at Paris in May, 1924, took over sovereignty. The Nazi sympathies of the Memel Diet have caused high feeling and in Sept., 1935 Hitler invited the League to examine the Memel question.

Litmus Colouring matter obtained from various lichens (*Rocella ticanora*, etc). Litmus is used as a chemical test for acids and alkalis, as its natural purplish blue colour is turned red by acids and restored by alkalis. The lichens are treated with ammonia and fermented, then with an alkaline carbonate and lime, the liquor finally being evaporated.

Litre Unit of capacity in the metric system of weights and measures. It is calculated very carefully as the volume of a cubic decimetre, but roughly speaking, 4½ litres are equal to a gallon.

Litter Portable bed or couch. Used in early Greece, this method of travel improved after the Persian contact. Curtained

and roofed litters supported by poles on men's shoulders spread throughout the Roman Empire and mediaeval Europe until supplanted by travelling coaches. Hand litters for transporting army wounded occur, besides horse, mule and camel litters. See SEDAN CHAIR.

Littleborough Market town and urban district of Lancashire, 4 m from Rochdale, on the L M S Rly. The chief industries are cotton manufacture and coal mining. Pop (1931) 12,028.

Little Englander Term used for one who is opposed to any expansion of the British Empire. A term of contempt, it was first used about 1890. See IMPERIALISM.

Little Entente Name used for the alliance between the countries of Czechoslovakia, Rumania and Yugoslavia. It was founded in 1920 and renewed in 1929.

Littlehampton Seaport, watering place and urban district of Sussex, at the mouth of the Arun, 62 m from London, on the S Rly. The sands and hatching are good and there are golf links. On the front is a large green. The river is crossed by a bridge and a ferry. There is a little shipping. Pop (1931) 10,181.

Littleport Town of Cambridgeshire, on the Great Ouse, 6 m from Ely, on the L N E Rly. The main industry is marketing the fruit and vegetables that are grown in the district.

Littlestone Village and watering place of Kent, 8 m from Hythe, on the S Rly. There are golf links here.

Littleton Village of Middlesex, 3 m from Staines. The Metropolitan Water Board has one of its largest reservoirs here, opened in 1925.

Littleton Sir Thomas English lawyer. He was born at Frankley, Worcestershire, about 1410. In 1466 he was made a judge, and he died Aug 23, 1481.

Littleton's known because he wrote in Norman French a treatise on tenures, which is one of the earliest text books of English law. It has been translated into English and on it Sir E. Coke wrote a famous *Commentary*.

Littoral Term in geography to denote the land adjacent to the coast of a country. The physical configuration of the coastal regions varies greatly. In some areas it is a belt of low elevation with estuaries or deltas of large rivers, centres of economic production, in others rugged cliffs and a littoral of high elevation, sparsely populated and less productive.

Liturgy Greek word meaning "public service," used in several senses. It refers to any or all of the services in the Book of Common Prayer, which contains the liturgy, or liturgies, of the Church of England. More strictly it applies to the form or office for the administration of the Holy Communion, a use to which it was put as early as the 4th century.

Litvinoff Maxim Russian politician. He was a Jew named Finkelstein before taking his present name. He joined the Communist Party in Russia and worked for it in London where he was engaged for a time as a journalist. He became one of the leaders of the Soviet and in 1918 was sent to London as its representative. Soon, however, he was obliged to leave the country, and he then represented his country in Sweden and

Norway. In 1930 he was made Commissioner for Foreign Affairs, and as such represented Russia when she entered the League, Sept., 1934, and negotiated the Franco-Soviet Pact on behalf of the U S S R in 1936.

Liver Largest glandular organ in the body. Normally weighing 50-60 oz., it is situated on the right side, diaphragm above, intestines and right kidney below. Blood from the stomach and intestines enters it through the portal vein, some harmful substances are abstracted, and the food's vegetable starch converted into animal starch or glycogen, which is stored ready for reconversion into sugar and restoration to the blood as required. The hepatic veins receive this as well as that derived from the hepatic artery after circulating through the organ for its own nourishment. Another duty is to form bile which pours into the duodenum direct or collects in the gall-bladder. See BILE, JAUNDICE.

Liver Fluke Worm which is harmful to sheep and occasionally to horses, cattle and dogs. It is about an inch long and obtains its name because its eggs are nourished on the liver of the water snail. As worms they leave the snail and fasten themselves on to blades of grass where they are liable to be eaten by sheep. In this way sheep may contract a serious disease called distomatiasis.

Liverpool City and seaport of Lancashire, on the estuary of the Mersey, 201 m from London, on the L M S Rly. An electric overhead railway serves the city and its suburbs. The area is 33 sq m. Canals link the Mersey with the trading centres in the N and centre of England.

The buildings include the cathedral begun in 1904, which occupies a commanding site, and which, when finished, will be one of the finest modern churches in the world. The Roman Catholics have planned to build a cathedral which will rival St Peter's in size. The university, founded in 1903, has a school of tropical medicine and a technical college. In 1932 a radium institute was opened.

The main industry of Liverpool is shipping, especially the import of cotton. Controlled by the Mersey Docks and Harbour Board there are extensive docks on both sides of the river, the quays being 37 m in length. Other industries are the manufacture of cement, chemicals, etc. The city obtains its water supply from Lake Vyrnwy in N. Wales. Pop (1931) 855,539.

Liverpool Town of New South Wales, 22 m from Sydney, centre of a sheep-rearing district. Pop (1931) 6,360.

Liverpool Earl of English title held by the families of Jenkinson and Foljambe. Its first holder was Charles Jenkinson. Born April 26, 1727, he became prominent in politics and held office under Pitt.

In 1786 he was made Baron Hawkesbury and in 1796 Earl of Liverpool. He died Dec 17, 1808. Liverpool's son and successor, Robert Banks Jenkinson, was born June 7, 1770. He entered the House of Commons in 1790 and in 1801 became Foreign Secretary. As such he helped to make the Treaty of Amiens. In 1804 he became Home Secretary, under Pitt, and Prime Minister. His long term of office of 15 years was marked by a steady resistance to reform. He died Dec. 4, 1828, and the title became extinct on the death of the 3rd earl in 1851.

In 1893 Cecil George Savile Foljambe, a grandson through his mother, of the 3rd earl, was made Baron Hawkesbury and in 1905, Earl of Liverpool. His son, Arthur, the 3rd

earl who succeeded in 1907, was Governor General of New Zealand, 1912-20

Liverpool Street Thoroughfare in London. It runs from Bishopsgate Street to Blomfield Street, and gives its name to a great railway station, opened in 1875 to serve the G E Rly. It is now a terminus of the L N E line. The street, once called Old Bethlehem, was named after the Prime Minister Lord Liverpool.

Liverwort Flowerless plant of a class closely allied to mosses (*Hepaticae*). They differ in having two sided stems, spiral threads among the spores and a simpler organisation. Being chlorophyll bearing, they are green or brownish green, usually growing on rocks or trees in marshy situations.

Livery Word meaning 'thing delivered,' originally denoting the provision of food and clothing for a household. From the sense of a fixed food ration for horses came the term livery stable, ultimately designating one keeping horses and carriages for hire. From the sense of a fixed supply of household clothing it passed into the uniform adopted by princes, barons and others for their civilian or military retainers. From the distinctive clothing of trade guilds it came to denote the livery companies themselves.

Living Ecclesiastical benefice, held by a rector or a vicar. He must have been in holy orders for two years, and is presented to the living by the patron. It is a freehold estate and from it he cannot be removed except for a serious moral or ecclesiastical offence. He must reside in the parish for at least nine months of the year unless he gets leave from the bishop for a longer period.

Livingstone David, Scottish missionary and traveller. Born at Low Blantyre, Lanarkshire, March 19, 1813, a son of Neil Livingstone, a small trader, he began to work in a cotton mill as a child. He managed to obtain some education and saved enough money to graduate in medicine at the University of Glasgow. In 1840, under the auspices of the London Missionary Society, he went to Bechuanaland, S. Africa, where he was associated with Robert Moffat.

In 1849 Livingstone began his explorations. He travelled down the Zambezi, discovered the Victoria Falls, Nyassa and other lakes, and his last journeys were made to discover the sources of the Nile. In Oct., 1871, he was rescued at Ujiji by Stanley. He died at Ijala on May 1, 1873, and was buried in Westminster Abbey. Livingstone married Mary, daughter of Dr. Moffat. His work is commemorated by the Livingstonia Mission of the Church of Scotland, and there are memorials to him at Blantyre.

Livingstone Capital of Northern Rhodesia, near the Zambezi River, 287 m. from Bulawayo by railway. It has government buildings and an Anglican church. Lusaka has been chosen as the new capital. Pop. 800.

A mountain range about 100 m. long, N. of Lake Nyassa is named after Livingstone, as is a gorge on the Zambezi.

Livy Roman historian. Titus Livius was born in Padua in 59 B.C., and died in A.D. 17. His *History of Rome* was in 142 books, and the 35 books which remain cover the period from the founding of the city (753 B.C.) until 9 B.C. From time to time come reports that some of the lost books have been found. Livy was a lively and vivid, if not always accurate, historian.

Lizard Order of scale clad reptiles found in all temperate and tropical regions. They differ from snakes by having normally four limbs, movable eyelids, external ears, and mandibles naturally united. New Zealand's lizard like non scaly tuatara forms a separate order, newts are smooth skinned batrachians. The 1700 species are carnivorous or herbivorous, mostly terrestrial and arboreal, producing either eggs or living young. The Gila monster is the only venomous form. Geckos, chameleons and true lizards form sub orders of Britain's four species, the common *Lacerta vivipara*, 7 in. long, and the snake like blind worm produce living young. The sand lizard, 9 in., is egg laying. Guernsey has the European green lizard, 12 to 16 in. long.

Lizard The Most southerly point of England. It is in Cornwall, 10 m. from Helston, and is reached by motor vehicles. On the headland are a lighthouse and a wireless station and around it are some famous coasts and much magnificent scenery. The village near, a popular pleasure resort, is called Lizard Town.

Llama S. American two toed ruminant. It is related to Old World camels, but smaller, humpless and woolly haired (*Lama glama*). Pre-Columbian America domesticated two breeds of the wild guanaco. Of the llama, usually white, the males served as beasts of burden, the females providing milk and flesh food. The alpaca, usually black, provided wool.

Llanberis Village of Caernarvonshire, 9 m. from Caernarvon on the L M S Rly. Called the Chamonix of Wales, it is a good starting place for the ascent of Snowdon. Near are two lakes, one over a mile long, and some slate quarries. The Pass of Llanberis, the wildest in Wales, rises to over 1100 ft. A coach road goes over it.

Llandaff City of Glamorganshire. It is part of the city of Cardiff, on the River Taff, 149 m. from London, on the G W Rly. The small cathedral was completely restored in the 19th century. Llandaff has been the seat of a bishop since about 600. It has ruins of a castle.

Llandeilo Market town and urban district of Carmarthenshire, on the Towy, 15 m. from Carmarthen, on the G W Rly. Near is Dynevor Castle, the seat of Lord Dynevor, built to replace a castle first erected in the 9th century. The town is named after S. Tollo, a bishop of Llandaff, and has an agricultural trade. Pop. (1931) 1886.

A division of Ordovician rocks is called the Llandeilo group by geologists.

Llandovery Borough and market town of Carmarthenshire, on the Towy, 26 m. from Carmarthen, on the G W Rly. There are ruins of a castle. Pop. (1931) 1980.

Llandovery College is one of the chief public schools in Wales. Founded in 1848, it has accommodation for about 200 boys.

In geology Llandovery rocks are a division of the Silurian. They are much used for making roads and for building purposes.

Llandrindod Wells Urban district and watering place of Radnorshire, on the Ithon, 45 m. from Shrewsbury, on the L M S Rly. In the 18th century its mineral springs became known, and they are visited by sufferers from gout, rheumatism, skin diseases and other complaints. The town stands high, and has many attractions for visitors. Pop. (1931) 2925.

Llandudno Watering place and urban district of Caernarvonshire. It is on the N Coast, where the Conway falls into the sea, and is on the LMS Rly, 48 m from Chester and 228 from London. In the 19th century it became a very popular pleasure resort. The sands are good and there is a fine promenade. The Happy Valley is an amusement centre. Steamers go to Liverpool and elsewhere. Pop (1931) 13,677.

Llanelly Borough, seaport and market town of Carmarthenshire. It is on Burry Inlet, part of Carmarthen Bay, 12 m from Swansea, on the GWR Rly. The chief industries are tinplate works, copper refineries and chemical works. There is a good harbour with extensive docks. Pop (1931) 38,393.

Llanfairfechan Urban district of Caernarvonshire. About 8 m from Bangor, it is a popular watering place. Pop (1931) 3162.

Llangammarch Wells Watering place of Brecknockshire, 15 m from Llandovery, on the LMS Rly. The waters here are suitable for heart troubles as they contain barium chloride, which is not found anywhere else in the British Isles.

Llangefni Market town and urban district of Anglesey, on the River Cefni, 250 m. from London by the LMS Rly. It is an agricultural centre. Pop (1931) 1782.

Llangollen Market town and urban district of Denbighshire, on the Deo, 202 m. from London, on the GWR Rly. It is famous for its 14th century bridge, and the house, Plas Newydd, now a museum, in which the "Ladies of Llangollen," Lady Eleanor Butler and the Hon Sarah Ponsonby, lived. There are remains of a Cistercian abbey called Valle Crucis, and the scenery around is beautiful. Pop (1931) 2937.

Llanidloes Borough and market town of Montgomeryshire. It is 14 m N of Rhayader and 198 from London by the GWR Rly, and is situated on the Severn. It has lead mines and flannel mills. Pop (1931) 2356.

Llanos Name used in S America for plains on which cattle graze. They are covered with grass, except in the dry season. They are chiefly in Venezuela. The word, a Spanish one, means "plains."

Llanrwst Urban district and market town of Denbighshire. It is 11 m from Conway and 234 from London, by the LMS Rly. Malt and tanning are its principal industries. Pop (1931) 2366.

Llantarnam Urban district of Monmouthshire, 5 m from Pontypool and 3 from Newport, on the GWR Rly. Its buildings include Llantarnam Abbey and coal mining is its chief industry. Pop (1931) 7284.

Llanthony Village of Monmouthshire, 9 m from Abergavenny, on the Honddu River. Its ruined abbey was a house of the Austin Friars, founded in 1108 and from 1811 to 1814 was the home of Walter S Lander. Near is a modern abbey founded in 1869 by the Anglican monk, Father Ignatius. It belongs to the English Benedictines.

Llantrisant Market town of Glamorganshire, 10½ m from Cardiff, on the GWR Rly. There are numerous collieries in the vicinity. Pop 21,946.

Llantwit Major Market town of Glamorganshire. It is 5 m from Cowbridge on the GWR Rly. Llantwit had a monastery, which was a famous seat of learning in the Middle Ages, and a seaport, Colhugh, on the Bristol Channel.

Llanwrtyd Wells Urban district and spa of Brecknockshire. An inland watering place, it is 11 m from Llandovery and 231 from London by the LMS Rly. Pop (1931) 742.

Llewelyn Name of several Welsh princes. Llewelyn the Great was a prince in N Wales from 1194 to 1239. He was constantly at war with King John and his son, Henry III. In 1239 he went into a monastery at Aberconway where he died, April 11, 1240. His grandson was the Prince Llewelyn II who fought against Edward I. He was beaten and made prisoner in 1276, but later released and died in battle near Builth in 1282.

Llewellyn Sir William. English artist. Born in Dec, 1863, he studied art in S Kensington and in Paris. In 1912 he was elected A.R.A. and in 1920 R.A. In 1928 he was chosen President of the Royal Academy. He has painted portraits of Queen Mary and other members of the royal family.

Lloyd Baron. English politician. Born Sept 19, 1879, a member of the banking family, George Ambrose Lloyd was educated at Eton and Cambridge. He travelled a good deal in Asia and Africa, was for a time in the diplomatic service, and became an authority on the politics of the East. In 1910 he was elected to Parliament as M.P. for W. Staffordshire. In 1918 he was appointed Governor of Bombay, and in 1924 he returned to Parliament as M.P. for Eastbourne. In 1925 Lloyd was appointed High Commissioner for Egypt and the Sudan, and made a peer as Baron Lloyd of Dolebran. He retired in 1930 and returned to public life in England.

Lloyd Edward. English publisher. He was born Feb 16, 1815, at Thornton Heath and started in business in London as a bookseller and newsagent. He then became a publisher, and in 1842 founded *Lloyd's News*, a London Sunday paper, which was a great success. He also started the *Daily Chronicle*, and established paper mills at Sittingbourne as Edward Lloyd, Ltd. He died April 8, 1890, and until 1918 his business was conducted by his sons. The newspapers have now been incorporated with others, but the paper making business, one of the largest in the world, is controlled by Lord Camrose.

Lloyd Edward. English singer. Born in London, March 7, 1845, he sang as a boy in the choir of Westminster Abbey, and later in the Chapel Royal. About 1871 he went on the concert platform, and his fine tenor voice made him one of the most popular vocalists in the land. He died March 31, 1927.

Lloyd Harold. American comedian. He was born at Burchard, Nebraska, on April 20, 1893. Beginning as an extra with the Edison Company in 1913 he joined Hal Roach a year later, making a reputation with "A Sailor Made Man," "Granny's Boy," etc. In 1923 he organised the Harold Lloyd Corporation whose first picture was "Girl Shy." Lloyd's humour is clean satire of the bespectacled ingenuous American youth.

Lloyd Marie. English music hall artist. Born Feb 12, 1870, she first gained recognition in the east end, but later appeared

at the Oxford music hall, and in pantomime at Drury Lane. She was the embodiment of cockney humour, exploiting the cockney genius for low comedy in turns which placed her among the foremost music hall artists. She died Oct. 7, 1922.

Lloyd's London association of underwriters, engaged in the business of insuring ships and their cargoes. It originated about 1688 in a coffee house kept by Edward Lloyd who issued *Lloyd's List* and *Lloyd's News*, both giving particulars about the movements of ships. In 1774 the association having been properly constituted, moved into the Royal Exchange. There it remained until 1928, when a fine building in Leadenhall Street was opened. The association, which is governed by a committee, was incorporated in 1871. See UNDERWRITER.

Lloyd's Register of Shipping is a society which records particulars of all merchant shipping of 100 tons and upwards, issues standard rules for shipbuilding and supervises construction and compiles statistics of all vessels under construction.

Load Line Plimsoll mark placed amidships on the sides of a vessel to show the limit to which loading may be carried. This mark consists of a twelve inch circle with a horizontal line drawn through the centre, and in addition a "grid" is marked to show load lines for different seasons and waters.

Loam Term applied to a sandy clay usually containing carbonate of lime and of sufficiently loose texture to allow of the free percolation of water through it.

Loanda Capital and seaport of Angola, in full San Paulo de Loanda. It stands on a bay protected by the island of Loanda. Connected by railway with the interior, it exports the produce of the land.

Lobby Small hall or waiting room. It is used sometimes for part of a house but more usually in connection with legislative assemblies such as the House of Commons, where voting takes place in two lobbies. Those in favour of a motion go into the "aye" lobby and those against it into the "no" lobby. In other lobbies the legislators interview those who call on them. From this has come the term lobbying, which means that outside interests bring pressure to bear on members of Parliament to support or oppose a certain proposal.

Lobelia Large genus of perennial and annual plants. They are mostly herbs, of the *Campanula* order, natives of nearly all temperate and warmer regions. The dwarf, compact tufts grown in garden borders *L. crinus*, came from S. Africa. Tall Mexican cardinal flowers and Virginian blue cardinals have yielded handsome hybrids with carmine, purplish blue, white and rosy magenta blooms.

Lobengula King of the Matabele from 1870 until 1894. He is known as the leader of the people in their war with the British in 1894, in which they were defeated.

Lobito Bay Harbour of Portuguese W. Africa. It is 4930 m from Southampton. The best harbour on the W. coast, it is protected by a spit of sand, and large vessels can anchor close to the shore. The bay is famed for its oysters.

Lobster Name of the larger edible marine long tailed ten footed crustaceans. The foremost thoracic limbs have enlarged pincer-like claws. The common

lobster, *Astacus gammarus*, averages 8 to 12 lb., the American variety sometimes reaches 20 to 23 lb. The larger clawless rock lobster or crawfish, *Palinurus vulgaris* has a spiny carapace. The smaller Norway lobster, *Nephrops norvegicus*, has slender pincers.

Lobworm Family of free marine segmented worms living in sea shore mud and sands also called lugworm. The common European *Arenicola piscatorum* favoured by ground feeding fishes is a favourite angler's bait. Greenish or brownish, 8 to 10 in long, it bears 13 pairs of red tufts or gills. Sand swallowed when burrowing, and ejected forms surface casts between tides.

Local Government System by which counties, towns and other areas are given power to look after their own affairs. The amount of local government is laid down by law and varies according to the importance of the area.

In England the most important measures regulating local government are those of 1834 (towns) of 1888 (counties), and of 1894 (urban and rural districts). A further important measure was passed in 1929. Local government is controlled by the Ministry of Health until 1919 called the Local Government Board. Scotland and both parts of Ireland have their own systems of local government on very much the same lines as England. The areas of the various districts are altered as required by the Ministry of Health, or in the case of large towns and cities, by act of Parliament.

Local Option Term used for the system whereby a county, town or other locality is given the power to decide its own policy. In connection with the sale of intoxicating liquor, local option has been in force in Scotland since 1920. There in every burgh or other area a poll will be taken if one tenth of the inhabitants ask for it and the electors vote with three issues before them. They can decide on no licences whatever but in this case the majority in favour must be at least 55 per cent., they can decide on no change in the existing system or on a limitation of 25 per cent. of licences. Another poll cannot be taken until three years have elapsed. Local option has been suggested in connection with the opening of cinemas on Sunday.

Locarno Town of Switzerland. It is on Lake Maggiore and has a station on the route through the St. Gotthard Pass to Italy. Here in Oct., 1925, a conference of the European powers was held and a number of treaties known as the Pact of Locarno were arranged, and signed in London on Dec. 1. One guaranteed the existing frontiers of France. Called the Rhine Guarantee Pact, it was signed by Germany, Belgium, France, Great Britain and Italy. Others were signed between Czecho-Slovakia and Poland and France. Treaties providing for the submission of all disputes to arbitration were made between Germany on the one hand and France, Belgium, Poland and Czecho-Slovakia on the other. It was decided that Germany should become a full member of the League of Nations.

Loch Term applied to lakes in mountainous districts and to fiord like inlets of the sea on the coast of Scotland. A typical loch is a long narrow rock basin of considerable depth and characteristic of mountain valleys formerly subjected to glacial action. By submergence of the lower reaches of the valley the loch may become an inlet of the sea.

Lochaber District of Inverness shire. It is wild and mountainous, and contains Ben Nevis.

Lochaber axe is the name of an axe much used at one time by the Highlanders of Sootland.

Lochgelly Burgh of Fifeshire. A colliery town, it is 7 m from Dunfermline by the LNE Rly. Pop (1931) 9297.

Lochmaben Burgh of Dumfriesshire. It is 8 m north east of Dumfries by the LMS Rly. Near the town, which is situated on the Annan, are the ruins of a castle of Robert the Bruce. Pop 1014.

Lochy Lake, or loch and river of Inverness shire. It is 10 m long and has been utilised for the Caledonian Canal. The river Lochy runs from the lake to Loch Linnhe.

Lock Mechanical device for securing a door or lid of a box. It usually consists of a sliding bolt moved by a key. Locks have been in use since ancient times especially among the ancient Egyptians, and those of the Middle Ages down to the 18th century were often of great beauty of design. In 1778 the double-acting tumbler lock was introduced and gave greater security than the common single-acting tumbler, then and still used for the cheaper kind of door locks. A further improvement came with the Chubb detector lock with spring pressed tumblers, the Hobbs type with safety levers, and the Yale cylinder lock, a modern adaptation of the old Egyptian pin lock. Keyless locks are worked by combinations of letters or numbers or open only at a given time.

Lock Engineering device on canals or canalised rivers by means of which vessels may pass from one level of the waterway to another. The lock consists of an enclosure with watertight gates at each end, sluices being provided to admit or discharge water. When a vessel is passing from a higher reach to a lower one, the lower gates are closed and water admitted until the level within the lock rises to that of the upper reach. The upper gates then are opened to admit the vessel and are again closed, while the sluices discharge the water in the lock until the lower level is reached, the vessel passing out on opening the lower gate. The reverse process is followed for raising a vessel to a higher level.

Locke John. English philosopher. Born Aug. 29, 1632, at Wrington, Somerset, the son of a Puritan lawyer, he became a tutor at Oxford, and also studied medicine and practised there as a physician. In 1666 he became secretary and friend to the Earl of Shaftesbury. From 1675 to 1679, and again from 1683 to 1689, he lived abroad, for political reasons, in France first and later in the Netherlands. He was a Commissioner of the Board of Trade from 1696 to 1700, when he retired. He died Oct. 28, 1704. In 1932 the tercentenary of his birth was celebrated.

Locke's philosophical ideas are set out in his *Essay Concerning the Human Understanding*. In this he argues that all our knowledge is the result of experience, our beliefs in good or evil arise largely from the association of ideas. As a political philosopher Locke ranks high also. In his work *On Civil Government*, he developed the principle that sovereignty depends upon contract, and so put the ideas that animated the Whigs in making the settlement of 1688 upon a philosophical basis. His works include a *Letter on Toleration*, his earliest

work, written in Latin and translated into English, *Thoughts on Education and The Reasonableness of Christianity*. In reply to his critics he wrote further on these subjects.

Locke William John. English novelist. Born in Barbados, March 20, 1863, he was educated at St John's College, Cambridge. He became an architect, but later turned to literature, and in 1905 scored a success with *The Morals of Marcus Ordeyne*, followed by *The Beloved Vagabond*. His works include *The Joyous Adventures of Aristide Pujol*, *Stella Maris*, *Septimus* and *The Great Pandolfo*. In 1930 he issued a volume of short stories, *The Town of Tombarcl*, and after his death appeared *The Shorn Lamb*. He wrote a play *The Man from the Sea*, and adapted some of his novels for the stage. Locke died in Paris, May 16, 1930.

Lockerbie Burgh and market town of Dumfriesshire. It is 10 m from Dumfries and 76 from Glasgow, on the LMS Rly, and is famous for its lamb fairs held in August. There is an old tower, once used as a prison. Pop (1931) 2574.

Lockhart John Gibson. Scottish author. Born July 14, 1794, he was educated at the High School, Glasgow, and at Balliol College, Oxford. He became an advocate but earned his living by writing. In 1826 he settled in London and was made editor of the *Quarterly Review*, a post he retained until 1853. Lockhart is known for his association with Scott. In 1820 he married Scott's daughter, Sophia, and in 1837-38 he published his *Life* of the novelist, which is a standard biography. He also wrote lives of Burns and Napoleon. Lockhart died at Abbotsford, Nov. 26, 1854.

Lockjaw Infectious disease, also called tetanus (*q v*).

Lockwood William Henry. English cricketer. Born in Nottingham, March 25, 1868, he became known as a cricketer, playing for his own county and later for Surrey. He soon made a reputation, both as a bowler and a batsman, and played for England against Australia in 1893, and again in 1899 and 1902. For some years he was the finest bowler in England, and one of the great all round players of the game. He retired in 1904, and died April 27, 1932.

Lockyer Sir Joseph Norman. English astronomer. Born at Rugby, May 17, 1836, he entered the Civil Service. He studied astronomy and, while remaining in the service, became prominent as an astronomer. In 1875 he was given a position in the science and art department at South Kensington, and in 1879 was made director of the solar physics observatory there. In 1897 he was knighted, and he died at Sidmouth, Aug. 16, 1920.

Lockyer was the head of eight expeditions that went out to observe solar eclipses and his chief work, as an astronomer, was investigating solar phenomena. He wrote a number of books, one being on the connection between sun spots and the weather.

Locomotive Kind of engine used on railways and mostly belonging to the steam engine type. It has, as general characteristics, simple direct-acting engines on a rigid frame, a square furnace, long fire tubes, with the exhaust steam carried through a blast-pipe within the smoke box to produce a draught through the furnace. In modern locomotives devices for increasing and superheating the steam, heating the feed water supply, together with compound engines and

longer boilers, have been introduced. The "Rocket" of 1829 weighed under seven tons and drew a load of less than 20 tons, while some American locomotives weigh over 2000 tons and draw a load of over 3000 tons.

An electric locomotive may consist of a separate carriage containing the motor and control apparatus with either an overhead or track current, or the generator may be housed in a compartment of the carriage, a Diesel oil engine being used for generating the current.

Locomotor Ataxia Disease resulting from progressive degeneration of the nerve tissues of the spinal cord, occasioned by the parasite of syphilis, hereditary or acquired. The muscular movements become uncoordinated, and the gait and station disordered. Although the disease may not reach this stage for many years after infection, if at all, its presence is shown by the absence of knee jerks, sluggishness of the pupils and shooting pains in the legs. The sufferer may ultimately become a bedridden paralytic.

Locust Name of various short horned grasshoppers. It usually denotes in Old World use the larger migratory forms of *pachytylus*, *acridium* and *caloptenus*. In the Mediterranean region and S. Africa large swarms periodically obscure the sun and deafen the ear with their rustling wings. The ground laid eggs develop wingless forms which devour everything available. The destructive migratory Rocky Mountain locust is a *caloptenus* smaller than many British grasshoppers.

The Imperial Institute of Entomology has done a good deal of work in investigating methods of dealing with the locust. In 1932 it was reported that a scientific mission had discovered their breeding places in northern and central Africa. Methods of destroying them that have been successfully tried include leading them into pits and there killing them by chemicals or fire.

Locust Bean Pod of the carob tree. It grows in Asia Minor and Italy, and is remarkable for the large proportion of sugar it contains. Attempts have been made to grow it in S. Africa. It is ground into meal and is chiefly given to cattle that are being reared for food.

Lode Term applied to a metalliferous vein in a rock. A lode represents a fissure which has become filled with ores and other minerals, or in some cases a lode may be a fault due to rock displacement. Lodes vary in width from a few feet to 100 feet and in length up to many miles.

Lodge Sir Oliver Joseph, English scientist. Born at Penkull, Staffordshire, June 12, 1851, he became Assistant Professor of Mathematics at University College in 1879, Professor of Physics at Liverpool in 1881, and in 1900 he was made first Principal of the new University of Birmingham, a post he held until 1919. In 1902 he was knighted and in 1913 he was President of the British Association.

As a physicist Lodge made important investigations in the field of electricity. His researches on the nature of the sound and electro-magnetic waves were especially valuable, and helped to make wireless telegraphy possible. Later he gave much attention to the phenomena of spiritualism of which he became one of the leading exponents. His books include *Modern Views of Electricity*, *Life and Matter*, *Man and the Universe*, *Ether and Reality* and *Relativity*. On spiritualism he has written *Ray-*

mond or Life and Death, *The Survival of Man* and *Why I Believe in Personal Immortality*, the first of these a memoir of his son Raymond, killed in the Great War.

Lodge Thomas, English dramatist. He was born about 1558, being a son of Sir Thomas Lodge, Lord Mayor of London. He was educated at Merchant Taylors' School and Trinity College, Oxford, and afterwards studied at Lincoln's Inn. He went on voyages of adventure across the Atlantic, but much of his time was spent in writing. He wrote several romances, one being *Rosalinde* which gave Shakespeare the plot of *As You Like It*, as well as some poems and translations of Latin authors. His other works include a satire *A Fig for Momus* and a drama *The Wounds of Civil War*. With Nathaniel Greene he wrote *A Looking Glass for London and England*. Lodge died about 1625.

Lodger One who resides in the house of another and pays for his accommodation. It has two legal significances. A lodger, if of full age, is entitled to vote at parliamentary and other elections provided he has resided in the constituency for a period of three months immediately preceding the preparation of the register. A creditor cannot seize the goods of a lodger if he loves a distress upon his landlord, whether it is for rent or for debts of any other kind.

Lodi City of Italy. It stands on the Adda, 20 m. from Milan, in the centre of a rich agricultural district. The chief building is the cathedral, dating from the 12th century. On May 10, 1796, Napoleon won a victory here over the Austrians, who were driven from their defence.

Lodz Town of Poland. It is on the River Lodka, 75 m. by railway from Warsaw. The large market square is a feature. Lodz is a centre for the manufacture of cotton and other textiles, also machinery. It has a broadcasting station (235 M., 2 kW). Pop. (1931) 605,287.

Loess Yellowish fine grained sandy and calcareous loam. It covers large areas in Central and South Eastern Europe and vast tracts in China, where it occasionally forms deposits 1000 ft. thick. In the Rhine Valley the loess deposits are of fluvial origin, but those in Northern China appear to be due to the action of wind.

Lofoden Group of islands off the coast of Norway. They cover about 1000 sq. m. and are divided into two groups. Hindø is the largest island. The chief occupation is fishing for cod, but there is some farming, although the islands are mountainous and are within the Arctic circle. Pop. 47,000.

Loftus Urban district of Yorkshire (N. R.). It is 22 m. from Middlesbrough and 259 m. from London, by the L.N.E.R. The chief industry is ironworking. Pop. 7631.

Log Nautical term for the appliance used to determine the speed of a vessel. In its older form the log consisted of a piece of wood, triangular in shape attached to a line with knots at intervals of 50 ft. This was towed behind the vessel and the speed estimated by the amount of line paid out in relation to an hour-glass. The modern type of log has a spinning action which turns a pointer upon a dial.

Logan Mountain in the north west territory of Canada. It reaches a height of 19,514 ft.

Air Views

THE HEART OF THE EMPIRE

An aerial view of the Thames at Westminster, showing the Abbey and the Houses of Parliament

Loganberry Hardy, prickly shrub of the rose order. Derived from the European raspberry and a Californian blackberry, it was hybridised by Judge Logan, 1881. It attained swift popularity, reaching Britain about 1900. Cultivated like the raspberry, its 10 to 15 ft. shoots bear in the second year fruits larger, longer and more acid than the raspberry. Loganberries are usually bottled and preserved.

Logan Rock Rounded boulder poised on a rocky base so that it readily oscillates with gentle pressure. A logan rock or stono is the result of weathering *in situ*, or may be a stranded boulder transported by ice. Logan stones occur in Cornwall, in Devonshire, and in Glamorgan at Pontypridd.

Logarithm Index of the power to which a fixed number or base must be raised to be equal to a given number. Thus if 8 is the given number and 2 the base, the logarithm of 8 is 3, as $2^3 = 8$. By the use of logarithms arithmetical calculations may be greatly shortened and for ordinary purposes common logarithms having 10 as the base are used. A logarithm usually consists of a whole number or characteristic, and a decimal fraction or mantissa, the latter only being given in tables of logarithms.

Loggia Roofed, elevated structure open on one or more sides, but forming a part of a building. It is characteristic of Italian architecture, and often incorporated in the design of English country houses.

Logia Greek word, "sayings," used as the title of an ancient collection of oracles or discourses concerning our Lord. Several 2nd-century writers mention such a collection, and the word sometimes denotes the conjectural document, often called Q, apparently used by S. Matthew and S. Luke. The word is also applied, rightly or wrongly, to two Egyptian papyrus fragments discovered at Oxyrhynchus in 1897 and 1903, professedly containing Sayings of Jesus, and two fragments of lost gospels of similar origin.

Logic Science of reasoning, or the science of the laws of thought. The earliest and most influential system of logic was that laid down by Aristotle in his *Organon*. The study was revived by Abelard and other early scholars and logic has been taught in the universities since their day. A new direction was given to it by the *Novum Organum* of Francis Bacon.

Logic may be divided into inductive and deductive. Induction is reasoning from the particular to the universal, deduction is reasoning from the universal to the particular. The products of thought are the term, the proposition or premise and the inference or conclusion. Reasoning takes the form of the syllogism which is in three parts, two statements and a conclusion. Thus a syllogism may be

All men have beards.
A is a man.
Therefore A has a beard.

All men have beards.
A has a beard,
Therefore A is a man.

The first syllogism is correct, but the second is incorrect, the fallacy being what is called an undistributed middle. A may be a monkey because the first premise does not say that all men, but no other animals, have beards.

Logogram (1) Word-sign, e.g., £ and lb for pound, s for shilling, d for pence, sometimes pictorial, e.g., ♂ for male. (2) Versified puzzle comprising several words synonymously representing others derived anagrammatically from the word to be guessed. Thus from *curtain* the word *cur* may be replaced by *dog*, run by (a mole's) *burrow*.

Logos Greek term, "word," employed in ancient philosophy and theology. Heraclitus and the Stoics used it for the manifestation of the godhead in reason. Later Jewish thought regarded Wisdom as a divine attribute, both streams nourished the Logos doctrine of Philo. S. John defined the Logos as the Word of God incarnate (John i).

Logue Michael. Irish prelate. Born in Co. Donegal, Oct. 1, 1840, he was educated for the priesthood of the Roman Catholic Church and was ordained in 1866. He was made Bishop of Raphoe in 1870. In 1887 he was chosen Archbishop of Armagh and Primate of all Ireland, a post he retained until his death, Nov. 19, 1924. In 1893 Logue was made a cardinal.

Logwood Heartwood of a Central American evergreen leguminous tree (*Hæmatocorylon campechianum*). Imported in large billets, brownish-red externally, it contains a glucoside forming with metallic mordants blue and black dyes, used in textile dyeing and printing, and in ink-making. Its tannic acid is medicinally a mild astringent.

Lohengrin Hero of German legends. The son of Parsifal, he was one of Arthur's knights. Arthur sent him on a swan to rescue a maiden named Elsa. He did this and then married Elsa, but was taken from her by the swan, because, contrary to command, she had persuaded him to tell her whence he came. The story is the subject of a 13th century poem and around it Wagner wrote an opera.

Löhr Marie. Australian actress. Born in Sydney, July 28, 1890, she made her first appearance on the stage in 1894. In 1901 she came to London and made a reputation by acting with the Kendals, Sir H. B. Tree and Sir John Hare. From 1918 to 1925 Miss Löhr managed The Globe Theatre, London, where she produced *A Marriage of Convenience* and other plays.

Loire River of France, the longest in the country. It rises in the Cévennes and flows past Orleans, Blois, Tours, Nantes and other places to the sea at S. Nazaire. It is over 600 m. long and is famous for the châteaux that have been built on its banks. Its tributaries include the Allier, Indre and Vienne. It gives its name to two departments of France, Loire and Loire Inférieure.

Loki In Norse mythology, a giant personifying destructive fire. His offspring were the Midgard serpent, the wolf Fenris and the evil Hel. After he had caused Balder's death the gods bound him to a rock, freed at Ragnarok, he and Heimdal slew each other.

Lollards Name given to the followers of John Wycliffe. They arose towards the end of the 14th century, objected to prayers for the dead, celibacy and other church ordinances, attacked the wealth and indolence of the clergy and became a political party. Laws were passed against them and, during the reigns of Richard II and of Henry

IV, they were persecuted and a number of them were put to death. The party died out towards the end of the 15th century, but undoubtedly its teaching prepared the way for the Reformation. The word comes from the Dutch lollen, "to sing in a low voice."

Lombard Peter, Italian scholar. Born at Novara about 1100, he studied at Bologna and Paris. He was influenced by Abelard and became a teacher of theology in Paris. In 1159 he was made a bishop of Paris and he died there, July 20, 1160.

Lomhard is known as the author of an early work on theology, *Libri quatuor Sententiarum* or *Four Books of Sentences*. It was very popular in the Middle Ages.

Lombards People of Europe, also called the Langobardi, or long axes. Their first home was in Germany, but about 470, under Alboin, they invaded Italy and conquered much of it, including the district still called Lomhardy. They had their own dukes or kings and formed an independent duchy or kingdom, the kings wearing the famous iron crown. They were in general hostile to the popes and in 774 they were defeated and subdued by the Pope's ally, Charlemagne.

Lombard Street Street in the city of London. It goes from the Bank of England to Gracechurch Street. It is named from the Lombards who lived here in the 12th century and since then has had a close connection with finance and banking. At present several of the great banks have offices in the street and the name is sometimes used for the money market.

Lombardy District of Italy. In the north of the country, it lies between Piedmont and Venetia and covers over 9000 sq. m. Milan is the capital. Except in the north, Lombardy is flat and very fertile with much beautiful scenery, especially around Como, Garda and other lakes. Its chief rivers are the Po, the Oglio and the Ticino. Named after the Lombards, it was ruled by the dukes of Milan but later passed to Spain and then to Austria. In 1859 it was given to Sardinia and in 1861 was included in the new kingdom of Italy.

Lombardy Poplar Tall ornamental tree of the willow order (*Populus fastigiata*). Inhabiting Persia and NW India from remote ages reaching 100-150 ft., Lombardy apparently receded in its post-classical times, and it spread thence. Its thin erect branches occasion a cypress-like aspect much appreciated as a contrast to flatter vegetation. It has no economic value.

Lombok Island of the Dutch East Indies. It lies to the east of Java and covers 3060 sq. m. On it are some high mountains but the soil in the valleys is fertile and produces rice, maize, tobacco etc. Mataram is the chief town. It is governed from the island of Bali, separated from it by the Strait of Lombok. Pop. (with Bali), 1,802,146 (1930).

Lombroso Cesare, Italian scholar. Born at Verona Nov. 18, 1836, he studied medicine, and in 1862 was made Professor of Mental Diseases at Pavia. Later he was director of an asylum at Pesaro and Professor of Forensic Medicine at Turin. He died Oct. 19, 1909.

In 1875 Lombroso published a book, *L'Uomo*

Delinquente, which started the science of criminology and on which his fame rests. Later came *The Man of Genius*, *The Female Offender* and *Crime, its Causes and Remedies*. These have been translated into English. He also wrote on spiritualism.

Lome Seaport of Togoland, the capital of the French colony. There are facilities for shipping. Formerly under German rule, on Aug. 7, 1914, it was taken by the British.

Lomond Loch or lake of Scotland. The largest in the country, it lies between the counties of Stirling and Dumfries and covers about 27 sq. m. The loch and then the Clyde take its waters to the sea. The scenery on and around the lake is very beautiful and it is much visited by tourists. On the loch are many islands, the largest being Inchmurrin. Ben Lomond overlooks the lake on the east side.

London Capital of England and of the British Empire, also a seaport and a financial, manufacturing and trading centre. It stands on the Thames the city proper being on the north bank. It covers a good part of the County of Middlesex and extends into Surrey, Kent, Hertfordshire, Essex and Buckinghamshire.

The original London, still called the City, occupies about a square mile (677 acres) on the north side of the river. Around it is the County of London, created in 1889, consisting of the city and 28 other boroughs and covering 116 sq. m. Outside this is another district vaguely called Greater London. The boundaries of this are uncertain and it is continually extending. It may be regarded as the district within a radius of 15 m. each way from Charing Cross, covering something like 700 sq. m. The area served by the Metropolitan Water Board covers 574 sq. m.

London possesses many buildings of historic and other interest, among them St. Paul's Cathedral, Westminster Abbey, Southwark Cathedral, the Roman Catholic Cathedral at Westminster, the Temple Church and St. Margaret's Westminster. The Houses of Parliament are a fine pile overlooking the Thames, and near is the hall of the London County Council. The Tower of London is unique. Buckingham and St. James's palaces are in the heart of London. On its outskirts are Kew and Hampton Court palaces, Kensington is midway. Lambeth and Fulham are episcopal palaces. Greenwich and Chelsea hospitals and the group of buildings in and around the Temple have great historic interest.

The headquarters of the Bank of England, the Guildhall, the Mansion House, the Charterhouse and other historic buildings are in the city. The principal theatres are near Charing Cross. Other places of amusement include the Crystal Palace, Madame Tussaud's in Baker Street, and various fine cinema halls in and around Leicester Square and the Strand.

The largest of the central open spaces is Hyde Park and near it are the Green and St. James's parks. Richmond Park and Greenwich Park are crown property, and Hampstead Heath is the largest of scores of open spaces under the control of the London County Council. In Regent's Park are the zoological and botanical gardens. A series of bridges cross the Thames, the lowest being the Tower Bridge, below which are the docks for the shipping controlled by the Port of London Authority.

Although the great public schools have nearly all been removed to the country, London is a great educational centre. It has a university, connected with which are colleges of every kind. The London County Council maintains hundreds of schools and many endowed schools are in the suburbs. For more specialised education there are several polytechnics.

The city of London is governed by a lord mayor and corporation, as it has been for 600 years and more. The county has a county council, comprising chairman, 20 aldermen and 124 councillors. The councillors are elected every three years. The term of office for aldermen is 6 years and 10 retire every 3 years. Outside its area are many boroughs and urban districts such as Croydon, Richmond, Walthamstow, Tottenham and others.

The greatest manufacturing and distributing city in the world, London's factories and workshops produce goods of almost every kind. Fancy goods, furniture, clothing and foodstuffs are prominent, but motor cars and other heavy articles are also made. The city of London is the headquarters of the world's financial system and in it the banks and financiers of every nation are represented.

London is the centre of the country's railway system and contains the great termini of Paddington, Waterloo, Charing Cross, Euston, Marylebone, St Pancras, King's Cross and Liverpool Street. The electric railways are chiefly underground tubes. There are canals and the river below the Tower Bridge has tunnels for foot passengers and vehicles. There are airports at Waddon and Hanworth. London is the broadcasting centre for the British Isles. London Regional broadcasts are made on a wave length of 342.1 M., London National on a wave length of 261.1 M. The population of the county in 1931 was 4,396,821 and of Great London, 8,202,818.

London City of Ontario. It is on the Thames, 120 m from Toronto and is served by the two transcontinental lines, C.N.R. and C.P.R. There are a number of manufactures and here are railway repairing shops. It has two broadcasting stations (62.56 M. and 34.68 M.). Pop (1931) 71,022.

London Declaration of International naval agreement. It was drawn up at a conference held in London in 1908-09 and dealt with the law about blockade and other matters that arise in time of war. All the great naval powers signed it, but as it had not been ratified when the Great War began, its provisions never became operative.

London Port of. Term used for the part of the Thames used as a seaport. It is controlled by a body called the Port of London Authority, which has its office in Trinity Square, E.C.3. It consists of a chairman, vice-chairman and members chosen by various interests, such as the London County Council and the Board of Trade. It controls the tidal waterway of the Thames between Havongore Creek in Essex and Teddington.

The authority was created in 1909 when it bought the London docks from various companies for about £32,000,000. It has added to these and the dock area is now about 4,300 acres. The largest docks are the Surrey Commercial, the West India, the Millwall, the East India, the Royal Victoria and Albert, the King George V and those at Tilbury.

London University of. Educational centre in London. It was founded in

1836 and was at first an examining body only. Later it became a teaching body also and in 1900 it was reorganised. The university consists of 36 colleges and schools, the chief being University College, Gower Street, and King's College, Strand. Others are the Imperial College of Science and Technology, the London School of Economics, Birkbeck College, East London College, Bedford College and the Royal Holloway College. Recent additions are the Constauld Institute of Art and the Institute of Historical Research. The organisation also includes several medical schools and theological colleges. It is governed by a chancellor, and vice-chancellor, chairman of convocation and senate. The headquarters are in the Imperial Institute, South Kensington, but new buildings are planned on a site in Bloomsbury. The university has athletic grounds at Molesey Park, near Worcester Park, Surrey.

London Jack. American novelist. Born in San Francisco, Jan 12, 1876, he started upon a career of adventure by digging for gold in Klondike. Afterwards he travelled over a good part of North America on foot, worked as a seaman and, in 1904-05, London served as a war correspondent in Manchuria. About 1900 he began to write and his books became very popular. He put into them much of his own adventurous career and a remarkable knowledge of certain forms of animal life. They include *A Daughter of the Snows*, *The Call of the Wild*, *White Fang*, *Martin Eden*, *The Making of the Elsinore* and *Night Born*. He died Nov 22, 1916.

London Gazette The Official organ of the British government. It appears twice a week, on Tuesday and Friday, and contains proclamations and official announcements generally. For Scotland a similar purpose is served by *The Edinburgh Gazette* and for Northern Ireland by *The Belfast Gazette*.

London Museum Collection of objects relating to the history of London. The objects are arranged in chronological order and begin at very early times. They cover every phase of London life, not excluding dress, toys and the like. The Museum was founded in 1912 and is housed in Lancaster House, presented to the nation by the 1st Viscount Leverhulme.

Londonderry County of Northern Ireland. In the province of Ulster, it has a coastline on the north and covers 816 sq m. The land is fairly level except in the south. The Roe, Foyle and Bann are the chief rivers. The chief town is Londonderry. Other places are Coleraine, Limavady and Dungiven. Castlerock, Port Stewart and Downhill are watering places. The old name of the county was Derry, still frequently used. London was prefixed to it in 1609 when the corporation of the city acquired large estates therein. Pop (1926) 94,511.

Londonderry City, seaport and market town of Co. Londonderry, Northern Ireland, also the county town. It stands on the Foyle where it falls into Lough Foyle, 95 m from Belfast. There are some industries, among them flour milling, bacon curing and linen manufacturing, but shipping also is important. From here produce is sent to the ports of England and Scotland. Derry, as it is called, is a city of great historic interest. It was a fortified town and its gates and walls still stand. The chief event in its history is the heroic defence against the

troops of James II in 1689, an event still commemorated in the city. Pop (1920) 45,159

Londonderry Marquess of British title held by the family of Vane Tempest Stewart. In 1780 Robert Stewart, an Irish landowner, was made a baron and in 1810 Marquess of Londonderry. His son was the politician known as Viscount Castlereagh (qv), who became the 2nd marquess. His half brother, Charles William, the 3rd marquess, married the heiress of the families of Vane and Tempest and secured their estates in Durham and Yorkshire. Frederick William, the 4th marquess, who succeeded in 1854 had been an MP for over 20 years.

In 1884 Charles Vane-Tempest-Stewart became the 6th marquess. He was Lord Lieutenant of Ireland 1880-89, and as a Unionist politician was Postmaster General, 1900-02, and President of the Board of Education, 1902-05. He died Feb 8, 1915 when his son, Charles Henry, became the 7th marquess. He was an MP, 1900-15. In 1921 he became Minister of Education for Northern Ireland, a post he held until 1920. In 1928-29 he was in the Unionist ministry as First Commissioner of Works and in 1931 he became Secretary for Air in the national government. The seats of the marquess are Wynyard Park, Durham, and Mount Stewart, Co Down. His eldest son is called Viscount Castlereagh.

London Pride Hardy perennial herb of the saxifrage order, native in Ireland and S W Europe (*Saxifraga umbrosa*). Naturalised throughout Britain, an old favourite in cottage-gardens and rockeries, especially in moist situations, its rosettes of tough, ovate, coarsely toothed, stalked leaves, 1½-2 in across, surround a single leafless 6-12 in stalk bearing small white flowers, sometimes red spotted.

London Stone Fragment of an ancient carved stone preserved in the wall of St Swithin's Church, Cannon Street, London. It is supposed to be a portion of a Roman *milharium*, or the centre from which distances were measured on the roads in Roman Britain. In support of this hypothesis there is, however, no direct evidence.

Long Lake or loch of Scotland. It is a sea loch, opening on the west coast between the counties of Argyll and Dumbarton. It penetrates for 17 m into the land.

Long Viscount. English politician. Walter Hume Long was born July 13, 1854, at Bath, was educated at Harrow and Christ Church, Oxford and inherited estates in Wiltshire. He began his parliamentary career in 1880 as Conservative member for North Wiltshire, and although he changed his constituency several times, he retained his seat in the House of Commons until 1921, when he was created a peer. He was President of the Board of Agriculture, 1895-1900 and of the Local Government Board, 1900-05. In 1905 he was for a short time Chief Secretary for Ireland. In 1915, under the Coalition ministry, he was again President of the Local Government Board, in 1916 Colonial Secretary, and in 1919-21 First Lord of the Admiralty. He died Sept 26, 1924, having been created Viscount Long of Wraxall in 1921. He lost his older son, Brig-Gen Walter Long, C M G, D S O, in the Great War, and was succeeded in his title by his grandson.

Longbenton Urban district of Northumberland, also known

as Bonton. It is 4 m from Newcastle and 273 m from London by the L N E Ry. There are stone quarries and coal mines. Pop (1931) 14,072.

Longchamps Racecourse of Paris. It is in the Bois de Boulogne and here the race called the Grand Prix is run. There are slight remains of an abbey here.

William de Longchamps was chancellor of England in the time of Richard I. He died Jan 31, 1197.

Longcloth Plain cotton fabric. It was woven originally in long pieces, hence its name. Longcloth usually is bleached and is of heavier quality than cambric. It is used chiefly for making shirts and underclothing, the lower grades being woven from American cotton and the finer qualities from the best Egyptian cotton.

Long Eaton Urban district and market town of Derbyshire. It is 7 m from Nottingham, on the L M S Ry. The town is a centre of the lace manufacture and has engineering works and other industries. Pop (1931) 22,339.

Little Eaton is a village 3 m from Derby, on the L M S Ry.

Longfellow Henry Wadsworth. American poet. Born at Portland, Maine, Feb 27, 1807, the son of a lawyer, he was educated at Bowdoin College, New Brunswick. There, in 1820, he became Professor of Languages after three years study in Europe. In 1836 he moved to Harvard to become Professor of Modern Languages and Belles Lettres. There he remained until 1854 when he retired. He died at Cambridge Mass., March 24, 1882.

Longfellow is America's most popular poet, and enjoyed almost equal popularity in Britain. He excelled in narrative poems, expressed in simple and exquisite language. His greatest work is probably the unique *Song of Hiawatha*, *Evangeline* and *The Golden Legend* coming next. *Tales of a Wayside Inn* may also be mentioned. His short poems include such favourites as *A Psalm of Life*, *Excelsior* and *The Village Blacksmith*. He translated Dante's *Divine Comedy* and pieces from German poets.

Longford County of the Irish Free State. In the province of Leinster, it covers 420 sq m. The Shannon forms its western boundary. Longford and Granard are the chief towns. The soil is fertile except in the north where there are bogs, cattle and horses are reared. The Royal Canal passes through the county. Pop (1920) 39,847.

The title of Earl of Longford has been borne since 1785 by the family of Pakenham. The fifth earl was killed in Gallipoli in 1915. The Earl lives at Pakenham Hall in Westmeath and his oldest son is called Lord Silchester.

Longford Market and county town and urban district of the county of the same name, Ireland. It is 75 m from Dublin, on the River Camlin and is served by the Gt Southern Ry. There are tanneries and corn mills. Pop 3700.

Longford Village of Wiltshire. It is on the River Avon, 3½ m from Salisbury. Here is a castle built in the 16th century and restored in the 19th. It contains a wonderful collection of pictures and is the seat of the Earl of Radnor.

Longhorn English breed of cattle with long down-curved or up

turned horns. Especially developed in 18th-century Leicestershire they became widespread in Britain, being gradually displaced as short-horns improved. The prevailing colour is black or brown, with a white stripe down the back. They are good beef cattle, and the cows fair milkers.

Long Island Island of the United States. It lies close to the east coast and is part of the state of New York. The East River divides it from Manhattan on which the city of New York stands and Long Island Sound is an opening on its north side. It is 118 m long and covers 1680 sq m. Long Island has become practically a suburb of New York. On it are Brooklyn, which is part of the city, also Coney Island and other pleasure resorts. It contains golf courses, race courses, country clubs, motor tracks, and aviation grounds. Some part of it is cultivated, but much of it is woodland. It has two broadcasting stations (62.5 M and 34.68 M).

Longitude Term applied to the angular distance of the meridian of a place from some given meridian. That of Greenwich Observatory is the usual one adopted. For geographical purposes the earth's surface is divided into circles of longitude, and distances in degrees are numbered east or west of the meridian of Greenwich.

Longleat Residence of the Marquess of Bath. It is in Wiltshire, 3 m from Warminster, and is one of the finest houses in the country. It is in the Italian style and dates from the 16th century, but additions were made in the 19th. Features of the house are the hall and a picture gallery which contains a priceless collection of portraits.

Long Parliament Name used for the parliament that carried on the Civil War. It met on Nov. 3, 1640, and was responsible for the policy that led to the war, for the appointment and dismissal of the generals and the execution of the king. It instituted many constitutional changes, but most of them were temporary only. In 1649 the Presbyterian members were expelled, but the others remained sitting until April, 1653, when Cromwell turned them out. In May, 1659, the surviving members were again called together and the parliament sat until dissolved on March 16, 1660. William Lenthall was speaker of the parliament from 1640 to 1653. The acts of the Long Parliament after 1642, being unconstitutional, are not on the statute book.

Longport Variety of English chinaware. It takes its name from Longport, near Burslem, where it was made in the 18th and 19th centuries. It is a porcelain with a hard transparent body beautifully decorated.

Longridge Urban district of Lancashire. It is 7 m from Preston, on the L.M.S. Ry. The main industry is cotton spinning. Pop. (1931) 4158.

Longton District of Stoke-on-Trent. On the L.M.S. Ry., it is a centre of the pottery industry, and was a separate borough until it was incorporated in 1910 with Stoke-upon-Trent (qv).

Lonsdale Earl of English title borne by the family of Lowther. In 1696 Sir John Lowther, a rich baronet in Cumberland, was made a viscount, but the title became extinct in 1750. His estates came to Sir James Lowther who, in 1784, was made Earl of Lonsdale, but this title became extinct

when he died in 1802. In 1807 Sir William Lowther was made Earl of Lonsdale and from him the present earl is descended. Hugh Cecil Lowther, who, in 1882, became the 5th earl, has won a great reputation as a sportsman. His seat is Lowther Castle, Penrith.

Lonsdale Frederick English dramatist. Born, Feb. 5, 1881, he began to write for the stage and soon became known as a dramatist. His successes include *The King of Cadonia*, *The Best People*, *Maid of the Mountains*, *The Last of Mrs. Cheyney* and *Canaries Sometimes Sing*.

Looe Urban district, seaport and watering place of Cornwall. It stands where the River Looe flows into Looe Bay, 16 m from Plymouth on the G.W. Ry. There is shipping and fishing, the sands and bathing are good and there is some yachting. Looe Island in the river was once famous for its smugglers. Pop. (1931) 2878.

Loofah Vegetable bath sponge. It is derived from the cylindrical fruit of various species of tropical annual climbing herbs of the gourd order, notably in Egypt and Japan. Sometimes 2.3 ft long, a tough fibrous network encases the seeds. These having been macerated and the cuticle removed, the fibre serves as a flesh brush.

Loom Machine used for weaving textile fabrics. In the simplest form of weaving one set of threads running the whole length of the fabric and known as the warp, is manipulated so as to pass alternately over and under a crosswise set known as the weft. The simple handloom has been replaced by the power loom first introduced by Cartwright in 1785-87, and a further improvement was effected when automatic action was introduced by Jacquard, about 1801.

Looping Term in aeronautics for a manoeuvre used chiefly for display. In it, after the aeroplane has dived, it turns over in a circle or loop, the pilot sitting on the inside of the circle. In a variation of this feat, the inverted loop, the movement is in the opposite direction with the pilot on the outside.

Loos Village of France. It is 3 m from Lens and is a coal mining centre. It was destroyed during the Great War, but has since been rebuilt.

Battle of Loos The village gives its name to a battle of the Great War, fought Sept. 25-Oct. 13, 1915. The object of the Allies was to recover Lens and the surrounding coal mines from the Germans. The main attack was made between Lens and La Bassée, by a British and a French army, with subsidiary movements elsewhere. The advancing troops were at first very successful. Loos itself was entered by a London division and the German front was broken, but for several reasons the gains could not be held. On the next day (Sept. 26) German reserves arrived and there was some fierce fighting, which continued on the 27th. Incidents were the attack of the Foot Guards on Hill 70 and the French attempts to take Souchez. The battle proper ended on the 28th, but there was a good deal of fighting until Oct. 13. Some of the gains, including Loos, were retained by the Allies, but at a tremendous cost. The British lost perhaps 60,000 out of 250,000 engaged.

Loosestrife Perennial herbaceous plant of the order *Lythraceae*. The purple loosestrife (*L. salicaria*) is common.

on river banks and in marshy places. It is 4 or 5 ft. in height with branching stems lance shaped leaves and spikes of brilliant purplish flowers. Another variety is *L. vulgaris* which bears clusters of yellow flowers.

Lorca City of Spain. It is 41 m from Murcia and has some old buildings, including a Moorish castle. Lead and silver are found in the neighbourhood. Murcia is a manufacturing and trading centre, and around the old town are modern suburbs. Pop 74,700.

Lord Title of honour. In Great Britain it is used for all peers, earls, viscounts and barons are addressed informally as Lord so and so. Another kind of lords are the law lords, who hold life peerages. Bishops as lords of parliament are also addressed as "my lord."

In Scotland judges of the upper house of the court of session are known as lords, although they do not sit in Parliament, and the younger sons of dukes and marquesses are addressed as lord with the Christian name. Lord of the manor is a territorial distinction, not a title, a variant is the Scottish laird. The feminine of lord is lady.

Lord Advocate Chief law officer of the crown in Scotland. He is usually an advocate of distinction and corresponds to the attorney general in England. He is a member of the ministry, usually with a seat in the House of Commons. His office is in Edinburgh and he is responsible for public prosecutions in Scotland.

Lord Chamberlain Officer in the royal household of Great Britain. He has charge of the king's household above stairs and ranks immediately next to the lord steward. He is invariably a peer, and until the time of George V was a member of the ministry. The lord chamberlain also acts as the censor of plays, a duty he took over in 1624 from the master of the revels. The symbols of his office are a white wand and a key. The queen's household also has a lord chamberlain.

Lord Chief Justice Name given to the president of the king's bench division of the high court of justice. He ranks next to the lord chancellor and is usually made a peer on appointment. A similar office exists in other English speaking countries. In the United States the supreme court is under a chief justice.

Lord Great Chamberlain

Officer of state in Great Britain. He is the sixth great officer of state, but his duties have mainly passed to others. He is the keeper of the palace of Westminster and has duties at the opening of parliament and the coronation. The office was long held by the great family of de Vere. It is now held by the Earl of Ancaster the Marquess of Cholmondeley and the heirs of the Marquess of Lincolnshire each acting for a reign. The Marquess of Lincolnshire was lord great chamberlain when George V became king, on his death it was decided that his son in law Viscount Lewisham, should undertake the duties.

Lord High Chancellor

High official in Great Britain. The keeper of the great seal ranking just after the Archbishop of Canterbury, he is a member of the government of the day and by virtue of his position is president of the House of Lords, both as a legislative and as a judicial body. He reads the

king's speech when the king is not present and is the head of the judicial system. His duties are to advise the king about the appointment of judges and magistrates and on matters concerning the administration of justice. The office originated in very early times. See CHANCELLOR.

Lord High Steward In England a great officer of state. The office is a very old one. He was originally concerned with looking after the royal table but now has duties only at a coronation or the trial of a peer. There is no regular holder of the office but when either occasion arises a lord steward is chosen.

Lord in Waiting Nobleman in attendance on the king. They are six in number and take it in turns to be in attendance. Until 1924 they were members of the political party that was in power and were changed with every change of government. To day three of them are politicians and three are not.

Lord Keeper In England, until the 18th century, one of the great officers of state. He was the keeper of the great seal and as such acted as the deputy or assistant, to the lord chancellor.

Lord Lieutenant Official who represents the sovereign in each of the counties of England, Wales, Scotland and Northern Ireland. Formerly they raised men for defending the country and later they were given charge of the militia. When the army was remodelled in 1907 the lord lieutenant became the president of the county association of the territorial force. He is appointed for life and appoints deputy lieutenants to assist him. He is also the keeper of the records, or *custos rotulorum* for the county. The appointment is for life. There was a lord lieutenant of Ireland until 1922.

Lord Mayor Title of the chief magistrate in London, York, and other cities of England and Wales. London has had a lord mayor since early times; he is elected every year from among the aldermen, and is usually made a baronet on retirement. During his term of office he lives at the Mansion House. The day of his installation Nov 9, is marked by a procession through the streets of London called the Lord Mayor's Show, which has been held since 1215. In the evening there is the banquet at the Guildhall at which leading statesmen usually speak.

York has had a lord mayor for several centuries but the other holders of this title have been granted it by the king since 1887. These include Birmingham, Burford, Bristol, Hull, Leeds, Liverpool and Manchester, Norwich and Sheffield, Leicester, Nottingham, Portsmouth and Stoke were given the honour in 1928. In Scotland the corresponding title is lord provost.

Lord President of the Council In Great Britain one of the great officers of state. He presides over meetings of the privy council, but has few other duties. He is usually a politician and a member of the Cabinet and the custom has grown up of giving the office to a senior member of the ministry who is free to undertake duties of a general nature. In the Labour ministry of 1929-31 Lord Parmoor, leader of the Government in the House of Lords, was lord president, in the National Government formed in 1931 the

post was given to Mr Stanley Baldwin, and in the reconstructed Cabinet of June, 1935, to Ramsay MacDonald who retained it after the Election in Nov 1935

Lord Privy Seal In Great Britain a high officer of state. He was the keeper of the king's privy seal and his duty was to affix this to the necessary documents. These were then passed on to the lord chancellor, or the lord keeper, for the great seal to be impressed upon them. These duties ended in 1884.

To-day the lord privy seal is a member of the Cabinet without departmental duties. In the Labour ministry of 1929-31, the lord privy seal was given the task of dealing with unemployment. Viscount Halifax was appointed Lord Privy Seal in 1935.

Lord's Cricket ground in London. It is in St John's Wood, belongs to the M.C.C. (Marylebone Cricket Club) and is regarded as the headquarters of the game. Middlesex home matches are played here also test and other important matches such as Oxford and Cambridge, and Eton and Harrow. It takes its name from Thomas Lord, who founded it in 1814.

Lords House of. Upper house of the legislature of Great Britain, also the supreme court of law. It arose from the council of barons summoned by the king to advise him on affairs of state. After a time the greater barons separated from the lesser barons and the commons, and with the bishops and abbots became the House of Lords, but the term itself was not used for it until 1544.

To-day the house consists of two classes, the lords temporal and the lords spiritual. The former number some 700 and are divided into five classes, dukes, marquesses, earls, viscounts and barons. The latter consists of the 2 archbishops and 24 bishops. In addition there are a few law lords who are peers for life only.

The basis of membership is hereditary. Each member, save only the bishops and the law lords, is the holder of an hereditary title, which carries with it the right to a seat in the House of Lords. Peeresses in their own right are not allowed to sit. The speaker, or chairman of the House, is the lord chancellor and his deputy is the chairman of committees. Its procedure is very like that of the House of Commons. Some members of the Cabinet sit in the House of Lords, but of late years the number of these has decreased.

For a long time the houses, Lords and Commons, were equal in power, but, in the time of Charles II, the power of the Lords over finance was definitely curtailed. In 1911, by the Parliament Act, the House was made subservient to the House of Commons. Now it can only delay, not utterly reject, legislation passed by the Commons. From time to time proposals for reforming the House of Lords, generally by introducing an elective element, have been put forward, but, so far, none has been accepted.

Lord's Day Observance Society. See SABBATH.

Lord's Prayer Model of prayer given by Jesus to his disciples (Matthew vi, Luke xi). The Revised Version omits Matthew's doxology, a liturgical addition of Jewish origin, adopted in the 1st-2nd century. Teaching of the Twelve Apostles. The prayer appeared in early Christian liturgies. The Anglican Prayer-book

version, with or without the doxology, follows the Great Bible of 1539.

Lord Steward Official of the royal household. He is responsible for the management of the household below stairs, i.e., all that concerns the catering and domestic arrangements of the royal residences. Until 1924 the office was held by a politician and the holder resigned with other members of the ministry. Many of the duties formerly discharged by the lord steward are now undertaken by the master of the household.

Loreburn Earl. British politician. Robert Threshie Reid was born April 3, 1846, a son of Sir J. T. Reid, and was educated at Cheltenham College and Balliol College, Oxford, where he played cricket for the university. He became a barrister, was elected Liberal M.P. for Hereford (1880) and in 1886 was returned for his own county, Dumfriesshire. In 1894 Reid was made solicitor general and then attorney-general, but he was out of office from 1895 until 1905. In that year he was chosen lord chancellor and created a baron. In 1911 he was made an earl and in 1912 he retired from active political life. He died Nov 30, 1923, when his title became extinct.

Loreto City of Italy. It is near the coast 15 m. from Ancona, and is a famous place for pilgrimage. The object of veneration is the Santa Casa, or "sacred house," a building said to have been the home of the Virgin Mary at Nazareth, miraculously transported here. The building is protected by a marble screen. Over it a fine Renaissance church has been built. Pop 3000.

Loretto Scottish public school. It is at Musselburgh, 6 m. from Edinburgh, and was founded by H. H. Almond in 1861. There is accommodation for about 200 boys. The school is famous for its output of Rugby footballers and its Spartan régime.

Lorient Seaport and naval station of France. It stands on the coast of Brittany, 30 m. from Vannes, and has yards for building and repairing warships, works for making guns and armour, barracks and other establishments. Lorient was formed in 1664 by the French East India Company, hence the name, which means "the East." Pop 42,853.

Lorimer John Henry. Scottish painter. Born at Edinburgh in 1856, the son of Professor James Lorimer, he was educated there and studied art at the Royal Scottish Academy. He began as a portrait painter, but later made a reputation with his subject pictures. In 1900 he was made a member of the Royal Scottish Academy.

Lorimer Sir Robert Stodart. Scottish architect. Born Nov 4, 1864, he was educated at the University of Edinburgh, became an architect and won a reputation chiefly in domestic work. His later genius is well seen in the national war memorial in Edinburgh Castle and the chapel of the Knights of the Thistle in St Giles Cathedral, Edinburgh. His honours included a knighthood (1911) and membership of the Royal Scottish Academy. He died Sept 13, 1929.

Loriner Old name for a seller of harness and trappings for horses, also spelt lorimer. The Loriners' Company is one of the London livery companies. Its offices are at 13 S. Swithin's Lane, E.C. 4.

Lorne District of Argyllshire. It lies between Loch Avo and the sea coast. The Firth of Lorne separates it from the Island of Mull. The eldest son of the Duke of Argyll is called the Marquess of Lorne.

Lorraine District of France. It is in the east of the country between Luxembourg and Alsace, and formed part of the district of Alsace Lorraine which was a German possession from 1871 to 1919.

Lorraine owes its name to Lothar who was its first king in the 9th century. Soon it was seized by France, but later became part of Germany. It was ruled by dukes who were vassals of the German king until 1542, when one of them made himself independent. Soon however, it passed under the control of France and its dukes were subject to the King of France. Their line died out in 1736, when Stanislaus the exiled King of Poland and the father-in-law of Louis XV, was made duke. In 1766 he died and the duchy passed to France who retained it until 1871.

The old duchy was much larger than the present district. Until 1871 it included Nancy which was its capital. In the early Middle Ages it included Brabant, then called Lower Lorraine. Its chief town is now Metz. Its chief river is the Moselle and it is mainly covered by the department of Moselle.

Lory Subfamily of Australorapian brush-tongued parrots. Pigeon sized and smaller, of brilliant plumage, sometimes broad-tailed, they have sharply pointed wings. The purple-capped red-tailed *Lorius domicella* of the Moluccas with yellow gorget, fruit-eating and honey-eating is frequently tamed for its unrivalled ventriloquism. The New Guinea black-capped lory lacks the yellow gorget.

Los Angeles City and seaport of California. In the south of the state it is 350 m from San Francisco and covers nearly 500 sq m. It is well served by railways and air services and is laid out on modern lines with wide thoroughfares and high buildings in the central part. In the city is the University of Southern California. A huge stadium was erected for the Olympic Games of 1932. Water is brought by an aqueduct from the hills 230 miles away and electric light and power are generated. The city has a service of electric railways.

Los Angeles is known for its association with the film industry which is centred mainly in the districts known as Hollywood and Culver City. There is a harbour at the mouth of the river and a large trade in fruit. The manufactures include motor vehicles, while oil refining is another important industry. There are large railway shops and printing works. Pop. (1930) 1,238,048.

Lossiemouth Burgh, seaport and watering place of Moray, Scotland. It stands where the River Lossie enters the Moray Firth, 6 m from Elgin, on the L N E Rly. There is a harbour and fishing is the principal industry. The burgh consists of three villages, Lossiemouth, Branderburgh and Stotfield. Pop. 4166.

Lost Tribes The Ten Tribes of Israel. They were carried into captivity by the Assyrian King Sargon at the fall of Samaria, 722 B.C. The other two tribes deported to Babylon at the fall of Jerusalem 586 B.C., returned 50 years later, but the ten disappeared from history.

Lostwithiel Borough and market town of Cornwall. It

stands on the Fowey, 21 m from Truro, on the Gt. W. Rly. Lostwithiel was at one time a centre of the tin mining industry. The stannary courts were held here, and here was the stannary prison. Pop. (1931) 1325.

Lot Son of Abraham's brother, Haran (Gen. xlii, xiv, xix). Accompanying his uncle from Mesopotamia, he chose as his land the Jordan valley near Sodom. The story of the flight from the doomed cities of the plain and his wife's death became a favourite warning in Jewish domestic life.

Lothian District of Scotland. It stretched from the Cheviot Hills to the Forth and was at one time part of the English kingdom of Northumbria. In 1018 it was taken by Malcolm II, King of the Scots, and was thenceforth a part of Scotland. The Lothians now include the three counties of Linlithgow or West Lothian, Edinburgh or Middlethian and Haddington or East Lothian. The Royal Scots was formerly called the Lothian Regiment.

Lothian Marquess of Scottish title borne by the family of Kerr. In 1606 Mark Kerr, a lord of session, was made Earl of Lothian. Robert the 4th earl, was made a marquess and from him the present marquess is descended. Philip Henry Kerr the 11th marquess was born, April 18, 1882, and educated at the Oratory School, Birmingham and at New College, Oxford. He was editor of *The Round Table*, 1910-16, and secretary to D. Lloyd George, 1916-21. In 1930 he succeeded a kinsman in the title. In Aug., 1931, he was made Chancellor of the Duchy of Lancaster in the National Government, but he only held office for a few weeks. He went to India as chairman of one of the committees appointed to deal with matters concerning the future government of that country. His seats are Newbattle Abbey, near Edinburgh and Blickling Hall, Norfolk. The fine library at Blickling was sold in 1931.

Loti Pierre. Name taken by the French writer, Louis Marie Julien Vland. Born Jan. 14, 1850, he entered the navy in 1867. In 1879 he appeared as a novelist, and became a reputation in 1880 with *Le Mariage de Loti*. Many others, stories of adventure, followed, one of the most popular being *Le Pêcheur d'Islande*. Others are *Le Roman d'un Spahi*, *La Galilée* and *L'Inde (sans les Anglais)*. In 1891 he was elected to the Academy and he died June 10, 1923.

Lotion Fluid preparation for cleansing or healing the body's outer surface. Distinct from a liniment because not oily, and from a fomentation because not hot, it is usually applied on lint. It may be antiseptic, e.g. boric acid, cleansing e.g. black wash, astringent e.g. Gonard's water, soothing, e.g. baking soda, cooling, e.g. vinegar and water.

Lottery Award of money or other prizes as the result of lot or chance. Since 1826 lotteries have been illegal in Great Britain before that time they were used to obtain money for the state as they still are in several European countries. Sweepstakes and raffles come under the heading of lotteries, and are therefore, strictly speaking, illegal in Great Britain though not in the Irish Free State. A competition is a lottery only if chance is the deciding factor in awarding the prizes. Most of the competitions conducted by the newspapers and periodicals are arranged so that they contain an element of skill and are therefore, technically, legal.

Lotus Classical name of various plants. It includes the jujube-tree associated with the lotus-enters, and the sacred water lilies, *Nymphaea lotus*, of Egypt and *Nelumbium speciosum* of India.

The lotus is also the name of a large cosmopolitan genus of leguminous herbs and undershrubs. Four British species include the yellow bird's foot trefoil, sometimes red-streaked, of which a cultivated double-flowered form occurs.

Loubet Emile French statesman. Born, Dec 31, 1838, at Marsanne, he was the son of a small farmer who was, for many years, mayor of the town. He became a lawyer at Montélimar and soon took part in local affairs. In 1876 he was elected a deputy and in 1885 he was made a senator. Having been Minister of Public Works, 1887-88, he became Premier in 1892. In 1895 he was elected President of the Senate and from 1899 to 1906 he was President of the Republic. He died Dec 20, 1929.

Loudoun Earl of Scottish title. In 1633 John Campbell was created Earl of Loudoun. James Mure Campbell, the 5th earl, died in 1786, when the title passed to his daughter, Flora, who later married the Marquess of Hastings. Until 1868 the earldom was held by succeeding Marquesses of Hastings. In 1868 the marquessate became extinct, so the earldom of Loudoun passed to a woman, as it did again in 1920 when Charles Edward Hastings, the 11th earl, died.

Loudoun is a parish near Kilmarnock in Ayrshire. Therein is Loudoun Castle, the old seat of the earls and countesses.

Loud Speaker Apparatus for converting the electric energy in a wireless receiver into generally audible sound vibrations. Two main types are made, the cone type being a megaphone attachment to a telephone, the moving-coil type having permanent magnets between which the coil carrying the current moves. Loud speakers are used in broadcast reception and generally for announcements in public.

Lough Word used in Ireland for a lake or loch. There are both inland loughs, as Lough Neagh, and loughs that are arms of the sea, as Carlingford Lough.

Loughborough Borough and market town of Leicestershire. It stands on the Soar, 10 m from Leicester and 110 from London, on the L N E and L M S Rlys. The war memorial is a bell tower in Queen's Park with a fine carillon. The chief industries are the making of hosiery and electrical goods and bell founding. Pop (1931), 26,945.

Loughrea Market town of Co Gal way, Irish Free State. It stands on Lough Rea, 118 m from Dublin, on the G S Rlys, and has a trade in agricultural produce. Pop 2800.

Loughton Urban district of Essex. It is 12 m from London, on the L N E Rly. In former times the inhabitants had the right to cut firewood in Epping Forest, which adjoins the town, and the Lopping Hall, built in 1883 is a reminder of this practice. Loughton Hall stands on the site of a famous Tudor mansion. Pop (1931), 7390.

Louis Old French coin, in full the Louis d'or. A gold coin, it was first coined in 1640 and named after Louis XIII. It was worth about 16s, and was coined

regularly until 1767. Later the Napoleon of 20 francs was sometimes called the Louis.

Louis Name of four rulers of the mediæval or Holy Roman Empire, called by the Germans, Ludwig. Louis I, a son of Charlemagne, succeeded to a vast inheritance when his father died in 814. His reign was troubled by quarrels between his sons, who divided his realm at his death, June 20, 1840. Louis II, a son of Lothair I, was emperor from 855 to 875 and Louis III, a grandson of Louis II, from 901 to 905. He was then deposed and blinded, and lived at Arles until his death in Sept., 928.

Louis IV, was Duke of Bavaria when he was elected Emperor in 1314. He was crowned Emperor in Rome in 1328, and in spite of much opposition held his own until his death, Oct 11, 1347.

Louis Name of eighteen kings of France. The first five were descendants of Charlemagne. The next Louis, Louis VI, called the Fat, was a king of the Capetian family. He reigned from 1108 to 1137. His son, Louis VII, reigned from 1137 to 1180. He was the rival of Henry II of England who married his divorced wife, Eleanor of Aquitaine, and so became ruler of a good deal of France. Louis VIII, a son of Philip Augustus, reigned from 1223 to 1226. Before his accession he had invaded England in the reign of King John. The other kings of this name are noticed separately.

Louis IX. King of France, called S. Louis. Born April 25, 1214, he was a son of Louis VIII and Blanche of Castile. In 1226 he became king, and for a time his mother was regent. When he came of age he carried on a war against Henry III of England, and did a good deal to strengthen the position of the throne. From 1248 to 1254 he was absent on a crusade. In the next eighteen years he won his reputation as a lawgiver and a saint, having established the Sorbonne in Paris, issued a new code of laws, set up courts of justice and effected many other improvements. In 1270 he went on his second crusade, but as soon as he reached Tunis he died of the plague, Aug 25, 1270. In 1290 he was canonised and his life was written by the historian Jean de Joinville.

Louis X. King of France. A son of Philip IV, he was born Oct 4, 1289. In 1314 he became king but he only reigned for two years as he died June 5, 1316. His successor was his brother, Philip V.

Louis XI. King of France. A son born at Bourges, July 3, 1423. In 1461 he became king and reigned for 22 years. At home he did a great deal to make the crown stronger and the nobles weaker, abroad he was occupied with wars and intrigues with Charles the Bold and Edward IV of England. In 1468 he was taken prisoner by Charles, but released three days later.

Louis has won fame as one of the craftiest of kings, using cunning rather than arms to discomfit his foes. In his later years he became very superstitious and lived in retirement at Plessis les Tours. He died there Aug 30, 1483. His successor was his son, Charles VIII. Louis is pictured by Scott in *Quentin Durward*.

Louis XII. King of France. A son of Charles, Duke of Orleans, he was born in 1462. He became Duke of Orleans, married a daughter of Louis XI,

and took some part in politics and in war. Later he was recognised as heir to the childless king Charles VIII, whom he succeeded in 1499. Louis reigned for 15 years, some of which were spent warring in Italy, where he conquered, but could not hold, a good deal of the country. He died Jan 1, 1515, having gained the title of father of his people. Louis married, as his second wife, Anne, Duchess of Brittany, and as his third, Mary, daughter of Henry VII of England. He left no sons, and his successor was Francis I.

Louis XIII King of France. A son of Henry IV and Mary de' Medici, he was born Sept. 27, 1601, and became king nine years later. For some years his mother acted as regent, but in 1617 he himself took control. His personal reign of over 25 years was overshadowed by his minister Richelieu, who took office in 1624 and henceforward directed the affairs of state, and was disturbed by risings of the Huguenots, which were put down firmly, and by intrigues against Richelieu, engineered by the king's brother Gaston, Duke of Orleans. In its later period France went to help the Protestants in the Thirty Years' War. Louis married Anne, daughter of Philip III of Spain. Their sons were Louis XIV and Philip, Duke of Orleans. He died May 14, 1643.

Louis XIV. King of France. A son of Louis XIII and Anne of Austria, he was born Sept. 5, 1638, and began to reign in May, 1643. He reigned for the long period of 72 years, and was by far the most prominent figure in the Europe of his day, exercising enormous influence, not only upon politics, but also upon art, literature and fashion. During the earlier part of his reign he greatly extended the area of France, although in 1697 and 1713 he was obliged to return many of his gains. He had a great sense of his own importance, surrounded himself with pomp and was called 'le roi soleil' and 'le grand monarque'. He built Versailles and other splendid edifices. Louis married Maria Theresa, an Austrian princess, and after her death Madame de Maintenon. His son and his grandson died before him, and he was succeeded by his great-grandson Louis XV. He died Sept. 1, 1715.

Louis XV. King of France. A son of Louis XIV, Duke of Burgundy, who was a grandson of Louis XIV, he was born Feb 15, 1710. In 1715 he succeeded his great-grandfather on the throne, and he reigned over France for nearly 60 years. His reign began with the making of peace, but for much of it France was at war with Great Britain and other European powers. Weak and sensual the king exercised little influence on affairs of state so contributing in a negative fashion to the revolution. In 1725 he married Maria Leszczyńska, a daughter of the exiled King of Poland, but he had also many mistresses, notably Madame de Pompadour. He was called the well beloved (*le bon aimé*) because, when he was ill in 1744, the people showed great concern. He died May 10, 1774, and was succeeded by his grandson.

Louis XVI King of France. Born at Versailles Aug 23, 1754, he was a son of the dauphin Louis and a grandson of Louis XV. In 1765 his father died, and in 1774 he succeeded his grandfather as king. Four years before he had married Marie Antoinette, a member of the great Hapsburg family and a daughter

of Maria Theresa, the empress. He began to reign at an unfortunate time. The state of the country gradually became worse, and in 1789 the revolution began and he had to pay for the sins of his fathers. In June, 1791, he escaped from Paris to Vincennes, but he was captured and brought back. From then until Sept 1792, he reigned as a constitutional king, but the office was then abolished and Louis was put upon his trial. He was found guilty and guillotined as Louis Capet, Jan 21, 1793. The king left a son, known as Louis XVII, and a daughter.

Louis XVII King of France, but in name only. A son of Louis XVI, he was born March 27, 1785. In 1789 he became dauphin on the death of his elder brother. He was put in prison with the other members of the royal family, and kept there after the execution of his parents. He was reported to have died in the Temple, Paris, then a prison, June 8, 1795, perhaps of poison, but some thought the report was untrue. Several pretenders came forward, claiming to be the dauphin, the most notable a German, Karl Wilhelm Naundorf, who appeared in France in 1833. He died in 1845.

Louis XVIII King of France. He was born at Versailles, Nov 17, 1755 and was a son of the dauphin Louis and a grandson of Louis XV. At the outbreak of the Revolution he expressed some sympathy with the new order, but after the capture of his brother Louis XVI, he escaped from the country. In 1795 when the dauphin nominally Louis XVII, died, he proclaimed himself king, but it was an empty title only. He lived a life of hardship and sometimes went until 1807, when he settled in England. In 1814 Louis, as the head of the Bourbons, was recalled to France and became king, but was soon forced to flee, in 1815 however he returned and reigned until his death Sept 16, 1824. His successor was his brother Charles X.

Louis Name of three kings of Bavaria, also known as Ludwig. Louis I, a son of the first king Maximilian Joseph, was born Aug 25, 1786. He became king in 1825 and ruled on the whole wisely, until compelled to abdicate in 1848. He died Feb 28, 1868. One of his sons was King Maximilian II. Another was Otto King of Greece.

Louis II, a son of Maximilian II, was born Aug 25, 1845 and became king in 1864. Interested in art and music, he neglected affairs of state. He was the patron of Wagner, and spent enormous sums of money on buildings to carry out the great composer's ideas. Later his mind gave way, and in 1886 a regent was appointed. Three days later the king and his medical attendant were drowned.

Louis III, a son of the regent Luitpold, was born Jan 7, 1845. In 1912 he succeeded his father as regent for the insane king Otto, and in 1913 Otto was deposed and Louis became king. He reigned until compelled to abdicate in 1918, and died Oct. 21, 1921.

Louisburg Seaport of Cape Breton Island, Nova Scotia. It has a railway station and is 40 m from Sydney. There is a good harbour and fishing is an industry.

In 1714, when the French surrendered Nova Scotia to Great Britain, they kept Cape Breton and on it built a great fortress which they called Louisburg. In 1745 after a long siege, this was taken by the British, but it was

restored in 1748. In 1758 it was again taken by the British with a combined army and fleet, and this time it was destroyed.

Louise Name of two British princesses. One was the fourth daughter of Queen Victoria. Born March 18, 1848, in 1871 she married the Marquess of Lorne, afterwards 9th Duke of Argyll. He died in 1914. The princess is childless.

Another Princess Louise was the eldest daughter of Edward VII. She was born Feb. 20, 1867, and married in 1889 the Duke of Fife, who died in 1912. Known as the Princess Royal, she died Jan. 4, 1931, leaving two daughters.

Louisiana State of the United States. It covers 48,500 sq. m., and has a coastline on the Gulf of Mexico of some 1500 m. Baton Rouge is the capital, but New Orleans is the largest town. It is a fertile area, although liable to floods in the S. where there are many swamps. Cotton, rice and sugar are grown, and there are vast forests. The fisheries are valuable, and there are rich sulphur mines. The state is governed by a legislature of two houses and sends eight representatives and two senators to Congress. It became a state in 1812. Pop. 2,101,593.

Louisiana is the name given by the French to a great district which they acquired in 1682. It included the whole of the central part of the present United States, from the Great Lakes to the Gulf of Mexico and from the English colonies to the Rocky Mountains, Texas being excluded. In 1763 it was ceded partly to Great Britain and partly to Spain, but in 1800 the Spanish portion, lying to the W. of the Mississippi, was given back to France. In 1803 this area, over 1,100,000 sq. m. in extent, was sold by France to the United States for \$23,000,000.

Louis Philippe King of the French. Born Oct. 6, 1773, he was the eldest son of the Bourbon, Philip, Duke of Orleans, known as Egalité. When the French Revolution began he followed his father in renouncing his titles and joined the revolutionary army. In 1794, however, having displeased the authorities, he fled from the country, and until the restoration of 1815 lived in Switzerland, the United States and England. In 1815 he returned to France, and in 1830 on the deposition of Charles X, was chosen King of the French. He was known, partly owing to his homely ways and partly to his declared opinions, as the Citizen King. At first his rule was successful, but gradually he became unpopular, and unwise repressive measures added to his enemies. The trouble came to a head in 1848 when the king abdicated and fled to England. He lived at Claremont, Surrey, until his death, Aug. 26, 1850. His only surviving son was known as the Comte de Paris.

Louisville City of Kentucky, United States. It stands on the Ohio, 110 m. from Cincinnati, and is an important railway junction. There are many manufactures, including tobacco, while the shipping is important, as Louisville is a great river port with extensive docks. Formerly a settlement known as "The Falls of the Ohio," it became a town in 1780 and was named after Louis XVI of France. Pop. (1930) 307,715.

Lourdes Town of France. It is on the Adour in the district of the Pyrénées, 22 m. from Pau. It is famous for

its grotto, visited every year by thousands of pilgrims, as it contains a spring reputed to possess miraculous powers of healing. The buildings include the basilica, the chapel of the rosary and a hospice for pilgrims. Over-looking the town is a chateau. The pilgrimages began in 1858 when the Virgin appeared to a peasant girl. It is said that about 500,000 persons visit the shrine each year, and many cures have been reported. Emile Zola's great novel *Lourdes* deals with the pilgrimage. Pop. (1931) 42,779.

Lourenço Marques City and seaport of Portuguese East Africa and capital of Mozambique. It is on Delagoa Bay, 347 m. from Pretoria, and is the nearest outlet for the produce of the Transvaal. There is a large harbour and extensive docks. The city has a botanic garden. Pop. (1931) 42,779.

Louse Name denoting unrelated groups of small invertebrate animals, especially (1) wingless parasitic suctorial bugs infesting the hair of human and mammalian hosts, (2) another wingless order having biting mouth-parts, parasitic on birds and mammals, called bird-lice, (3) degraded parasitic crustaceans called fish-lice and whale lice, (4) plant-sucking bugs and their larvae, called plant-lice. See **WOODLOUSE**.

Lousewort Large genus of herbs of the figwort order, they are natives of N. temperate regions (*Pedicularis*). Parasitic on roots of the common British heath lousewort, *P. sylvestris*, so-called because long supposed to encourage lice in browsing sheep, bears rose-coloured, two-lipped flowers. The marsh lousewort, *P. palustris*, is an annual, with dull-pink flowers.

Louth County of the Irish Free State. It is in Leinster with a coastline on the Irish Sea, and its area is 316 sq. m. Dundalk is the county town, another town is Drogheda, while Carlingford and Greenore are coastal towns. The Borne forms its southern boundary, and is the only navigable river. There are hills in the N., but the surface is usually flat and the soil fertile. Agriculture is the chief industry. The county contains the famous ruins of Monasterboice. It takes its name from a village near Dundalk, once a place of importance. Pop. (1926), 62,739.

Louth Borough and market town of Lincolnshire. It is 31 m. from Lincoln and 141 m. from London, on the L.N.E. Ry. The town is an agricultural centre and has works for making agricultural implements, other industries are brewing, malting and milling. Near are the ruins of a Cistercian abbey. Pop. (1931), 9678.

Louvain City of Belgium. It is on the Dyle, 19 m. from Brussels, has some industries and is a railway junction. It contains some of the finest buildings in Belgium, notably the Hotel de Ville, which was unharmed during the German occupation. The cathedral, however, was damaged, but has been restored.

Louvain is chiefly famous for its university, founded in 1433 and long one of the chief intellectual centres of Europe. Its chief glory was its library, which was burned down in Aug., 1914, the books and manuscripts lost being irreplaceable. It has been rebuilt by the U.S.A. and the library furnished with gifts from universities and learned societies all

over the world. The new building was opened in 1928. Pop. (1931) 38,734.

Louvre The Museum and art gallery in Paris, probably the richest in the world. The building stands on the right bank of the Seine and was long one of the chief palaces of the kings. Built on the site of an older palace, the present building was begun in the 16th century by Francis I and added to by Louis XIV and Napoleon. The famous Apollo Gallery was rebuilt, 1845-51, and in 1906 two new galleries were added.

The palace has been a museum since the time of Napoleon, who brought here many of the works of art he collected during his campaigns. The richness of the collection defies description. The paintings and sculptures are representative of the art of almost every age and school. The pictures include Leonardo da Vinci's "Mona Lisa" and "the Virgin of the Rocks." The sculptures include the "Venus of Milo" and the "Winged Victory of Samothrace."

Lovage Genus of smooth perennial umbelliferous herbs (*Lamium*) natives of N. temperate regions. Scotch lovage, *L. scoticum*, also found in Northumberland and N. Ireland, on rocky coasts, with small white or pink flowers, has a stout, branched, aromatic and pungent rootstock, its much-divided leaves are eaten as a pot herb.

Lovat Lord. Scottish title held by the family of Fraser. Hugh Fraser, the 1st lord, lived in the 15th century, and owned vast lands in the county of Inverness which passed to his descendants. When Simon Lovat, the Jacobite, was executed in 1747, the title and estates were forfeited, but they were restored to his son, Simon. In 1815 the title became extinct, but the estates passed to a distant relative and in 1837 their owner was created Baron Lovat with the precedence of the earlier title.

Simon Joseph Fraser, who in 1887 became the 14th baron, was born Nov. 25, 1871. For service against the Boers he raised Lovat's Scouts, and he served in France and Gallipoli during the Great War. His seat is Beaufort Castle, Beauly, around which are his large estates.

Lovat Lord. Scottish nobleman. Simon Fraser, 12th Baron Lovat, was born about 1667, a grandson of the 7th baron and a cousin of the 10th. For his outrageous treatment of his wife, a daughter of the house of Argyll, he was prosecuted by her kinsfolk, but escaped and lived in France as a Jacobite. In 1715 he helped the government and was pardoned, and later secured the family estates, and had his title confirmed. In 1745 he sided with the Jacobites, with whom he had regularly kept in touch, and took the field. After Culloden he was captured, found guilty of treason and beheaded in London April 9, 1747.

Love Sentiment of sympathetic or pleasurable attraction felt towards certain individuals, classes or things. Though regarded as ultimately derived from the parental instinct shared by the lower animals, it tends to acquire in man moral and spiritual elements which in its highest expression, lack all thought of self interest. The Christian ideal makes love to man the unvarying method of manifesting love to God. In the supreme synthesis of the beloved disciple, God is Love (1 John iv, 8).

Lovebird Name denoting various small parrots who habitually perch closely together. They include the African short-tailed genus *Agapornis*, of which the rose-faced, 6½ in. long, is a favorite cage bird, and some tropical American and Papuan pygmy parrots. The Australian hodgepodge or love bird, *Melopsittacus undulatus* is a long-tailed grass parrot formerly much used for street fortune telling.

Love-in-a-Mist (*Nigella damascena*) Annual ranunculaceous plant popular in gardens. The flowers are blue or white surrounded by filmy leaves giving the appearance which gives rise to the name. It is hardy and easily grown from seed which should be planted where the flowers are required to bloom, in April or May. Other names for it are Jack in Prison or Devil in a Bush.

Lovelace Earl of English title borne by the family of King William King. Lord Ockham a title given to his ancestor, Sir Peter King, the Lord Chancellor was made Earl of Lovelace in 1838. The title is still held by his family. The earl's eldest son is called Viscount Ockham.

Lovelace Richard. English poet. A son of Sir William Lovelace, he was born at Woolwich in 1618. In 1642 he was put in prison for a political offence. Later he fought on the Royalist side in the Civil War and served in the French Army, then came back to England where he was again in prison in 1648-49. He died in London in poverty in 1658.

Love-Lies-Bleeding (*Amarantus*) Annual plant bearing red flowers on long drooping stems. Prince's feather (*Amarantus hypochondriacus*) of the same genus is of slightly taller growth with red flowers borne on an erect stem. It grows to a height of 2 or 3 ft.

Loving Cup Drinking vessel ceremoniously passed from hand to hand at state and civil banquets. Like the grace cup of university gatherings, it is often a gold or silver gilt chalice or goblet, with or without cover, sometimes many-handled. It appears at masonic and livery company banquets in the city of London and elsewhere.

Low Countries Name used for the Netherlands because of their situation, on or below the level of the sea. It includes the modern kingdoms of Belgium and the Netherlands.

Lowe Sir Hudson. British soldier. He was born in Galway, July 28, 1769, entered the army and served in Egypt, afterwards being Governor of the Ionian Islands. He served with the Prussian Army in 1814-15 and in 1815 was made Governor of St. Helena and therefore responsible for Napoleon. From 1825-31 Lowe commanded the troops in Ceylon, and he died Jan. 10, 1844.

Lowell City of Massachusetts. It is 26 m. from Boston, where the rivers Merrimack and Concord meet. An important industrial town, Lowell has manufactures of woollen goods, clothing, machinery, etc. Pop. (1930) 100,234.

Lowell James Russell. American poet. Born at Cambridge, Massachusetts, Feb. 22, 1819, he was educated at Harvard and became a lawyer, but soon left this profession to edit *The Pennsylvania*

Freeman. From 1857 to 1861 he edited *The Atlantic Monthly*, and from 1862 to 1872 was part editor of *The North American Review*. From 1855 to 1877 he was Professor of Modern Languages and Literature at Harvard. In 1877 he became ambassador in Madrid, and in 1880 in London. He left the service in 1885 and died Aug. 12, 1891.

Lowell is best known, perhaps, as a poet. Some of his shorter pieces, for example *The Present Crisis*, are among the finest in American literature, and his gift of humor is well seen in *The Biglow Papers*. Equally notable are *The Vision of Sir Launfal* and *A Fable for Critics*. His critical works include *My Study Windows*, *Among My Books* and *The Old English Dramatists*. He also wrote a life of Hawthorne and *Fireside Travels*.

Lowell Percival American astronomer. Born in Boston, March 13, 1855, he spent his life in the study of astronomy, first at the Lowell Observatory, Flagstaff, Arizona, and later as Professor of Astronomy in Boston, and conducted very valuable researches. He wrote *Mars and its Canals* and *Mars as the Abode of Life*. Lowell died Nov. 13, 1916.

Lowestoft Borough, seaport, market town and watering place of Suffolk. It stands at the mouth of the Waveney, 118 m from London, on the L N E Rly. The narrow streets in the old town are called scores. With inner and outer harbour Lowestoft is a great fishing port and has a large fish market. Near is Lowestoft Ness, the most easterly point of England. Pop (1931) 41,768.

On June 3, 1665, there was a sea fight off Lowestoft between the English and the Dutch fleets. The Dutch were defeated.

On April 25, 1916, a German fleet, aided by some Zeppelins, bombarded Lowestoft and did some damage. There was another bombardment on Nov. 26, 1916, and the town was several times attacked from the air.

Low Sunday First Sunday after Easter. Various explanations as being so-called to distinguish it from the great festival whose octave it ends, or as the "Laudes Sunday" on which the sequence *Laudes Salvatoris* was sung, it is the Roman Catholic Alb or Quasimodo Sunday, and the Greek Antipascha or New Sunday.

Lowther Village of Westmorland. It is 4 m from Penrith and gives its name to the family of which the Earl of Lonsdale is the head. Here is the earl's seat, Lowther Castle, built in the style of the 14th century and containing some valuable treasures.

Lowther Range of hills in Scotland. They are in the counties of Lanark and Dumfries. The highest points are about 2400 ft. high.

Loyalty Group of islands in the Pacific Ocean. They belong to France and are governed from New Caledonia, which is 100 m away. The largest are Lifou, Mare and Uvea. Copra, rubber and coconuts are the main products. They cover 800 sq. m.

Loyola Ignatius Spanish saint and founder of the Society of Jesus. He was born at Loyola, a castle in the Basque Provinces, Dec. 24, 1491, and passed his youth at the court of Ferdinand and Isabella. He then became a soldier, and while recovering from wounds he read some devotional books, with the result that in March, 1522, he dedicated himself to the service of the church.

He wrote about this time the wonderful book of devotion called *Spiritual Exercises*.

Loyola next made two journeys to Jerusalem, then studied at several universities, where he found some kindred spirits. In 1534 he and six others of them took vows in a church at Montmartre which marked the foundation of the great order. The intention of its members was to work for the conversion of the heathen. In 1540, when the order was formally founded by the pope, Loyola became its first general. The rest of his life was passed in Rome in organising the society, which in a few years became large and influential. He died July 31, 1556. In 1622 Loyola was canonised. See JESUITS.

Lozenge Diamond-shaped figure. Forming a subsidiary in heraldic charges, it is a rustre if pierced with a round opening, a fusil if elongated. Shields so shaped bear the arms of spinsters and widows. The word also denotes a small medicated or flavoured tablet, originally diamond shaped, for slow solution in the mouth, e.g. cough lozenges.

Lubeck City and seaport of Germany. It stands on the Trave, 10 m from its mouth in Lübeck Bay, and is one of the most important of the Baltic seaports. It is connected by railway with Berlin, 180 m away, and is also a centre for air services. The river channel has been deepened so that the largest vessels can reach the city.

As one of the chief towns of the Hanseatic League, Lübeck is historically a place of much charm. The 13th century town hall on the market place is one of the finest in Germany. Equally fine is the Gothic cathedral, enlarged in the 15th century, and there are many other notable old buildings. In the newer part of the town are some fine modern ones. Shipping and shipbuilding are carried on, while there are blast furnaces and manufactures of various kinds. Pop 125,000.

Lübeck State of the German republic. It is a district along the river Trave, and includes the city of Lübeck and the town of Travemünde. The area is 115 sq. m. and the population 150,000. It is governed by a senate and a house of burgesses, the 12 members of the senate forming the executive.

Lubitsch Ernst. German actor. He was born in Berlin, Jan. 29, 1892, and from 1911 to 1922 gained experience as an actor in Germany. In 1922 he went to America to direct Mary Pickford's work for the films, and since 1927 he has produced for the Famous Players-Lasky Corporation.

Lubrication Act of insinuating between two surfaces, such as parts of machines pressing and rubbing against each other, substances called lubricants, designed to lessen friction and prevent serious abrasion. These substances may be solid, semi solid or liquid, ranging from metallic alloys and graphite to animal, vegetable and mineral greases and oils.

Lucan Roman poet. He was born in Spain in A.D. 39, and was named Marcus Annaeus Lucanus. He went to Rome and his uncle, Senecca, secured for him entrance to the court of Nero. There his abilities made him conspicuous, and aroused the jealousy of the Emperor. In 65 he was concerned in a plot to murder Nero, and on this being discovered he committed suicide. His sole extant poem is called *Pharsalia*, it deals with the

civil war between Caesar and Pompey and the end of the republic.

Lucan Earl of Irish title held by the family of Bingham. In 1632 Henry Bingham was made a baronet. In 1776 his descendant, Sir Charles Bingham, was made a baron and in 1795 Earl of Lucan. His grandson, George Charles Bingham, who became the 3rd earl in 1839, was the soldier who commanded the cavalry division at Balacava, where his share in the disaster led to a good deal of controversy. He died Nov 10, 1888 and the present earl is his descendant. The earl's estates are chiefly in Co Mayo, where is his seat Castlebar House. His oldest son is called Lord Bingham. Lucan is a village on the Liffey, just outside Dublin.

Lucas Edward Verrall English author. Born in 1865, he was educated privately. He began to write, and in 1902 joined the staff of *Punch*. He made a reputation as a humorist by the skits written with O L Graves including *Wisdom While You Wait* and *Hustled History*. Some of his works are travel books, such as *A Wanderer in London*, and others are anthologies such as *The Open Road*. Some deal with art and others are novels of a somewhat discursive kind. A selection shows his versatility *Highways and Byways in Sussex*. Over Remerton's *Mr Ingleside*, *A Boswell of Baghdad*, *John Constable the Painter* and *A Wanderer among Pictures*. About 1924 he became chairman of the publishing firm of Methuen & Co Ltd. He was made a Companion of Honour in 1932.

Lucas John Seymour English painter. Born in London, Dec 21, 1849 he was apprenticed to a wood carver, but later studied painting at the Royal Academy schools. His paintings of historical scenes won for him a considerable reputation, notable ones being "The Armada in Sight" and "After Calloiden". He also painted a panel for the Royal Exchange, London. Lucas was made A.R.A. in 1886 and R.A. in 1898. He died May 8 1923.

Lucca City of Italy, 15 m. from Pisa. Notable buildings are the 11th century cathedral and the town hall once a ducal palace. There are the remains of a Roman amphitheatre and aqueduct and of the town walls. From 1369 to 1797 Lucca was a republic. It is now a flourishing town with textile and other manufactures and an agricultural trade. Near the city are the famous hot baths of Lucca. Pop (1931) 81,807.

Luce Bay Opening of the sea off the coast of Wigtownshire. It is between the Mull of Galloway and Burrow Head, and goes about 16 m into the land.

Lucerne Perennial leguminous herb of the Mediterranean region, also called purple medick (*Medicago sativa*). Cultivated in antiquity, and reaching Tudor England, it grows widely nowadays in temperate climates including western N America which calls it alfalfa. Its trefoiled leaves and clusters of yellow or blue clover like flowers yield several pasture and fodder crops annually. See ALFALFA.

Lucerne Lake of Switzerland. It is about 24 m long and covers 45 sq m. It is famed for its beauty and has associations with William Tell. The River Reuss runs through it.

Lucerne City of Switzerland. It stands just where the River Reuss leaves the Lake of Lucerne, 59 m from Basel. Lucerne is the capital of the canton of the same name. Near is the famous Aonstrasse, a road cut out of the rocks.

Lucerne is a popular tourist centre and from it many famous beauty spots can be visited. It is a calling place for steamers on the lake, and has some industries. Pop (1930) 47,066.

Lucian Greek writer. He was born in Syria and became a teacher, travelling from place to place and lecturing. Later he lived in Antioch and in Athens, and he died in Egypt in A.D. 180. The most popular of his many writings are his satires in which he holds up to ridicule the gods and the old customs. They have been translated as *Dialogues of the Dead*, *Dialogues of the Gods*, and other titles. He also wrote a *True History*.

Lucifer Latin name, light bearer, for the planet Venus as morning star. The Hebrew word "shining-one," denoting figuratively the King of Babylon in Isa. xiv 12 and translated Lucifer in the Authorised Version becomes "day star" in the Revised Version. With this passage early Christian theologians incorrectly connected Luke x 18 and Rev x 1, hence Lucifer came to denote Satan before his fall.

Lucknow City of India. It stands on the River Gumti, 560 m from Calcutta, and is an important railway junction. The city has many industries some being traditional Indian crafts, while others are engineering works, railway shops and the like. From 1732 to 1857 Lucknow was the capital of the rulers of Oudh. It is now the capital of a division of the province of Agra and Oudh. Pop (1931) 274,650.

The Siege of Lucknow was one of the outstanding incidents of the Indian Mutiny.

Lucretia Roman heroine. The wife of Lucius Tarquinius Collatinus, a member of the Tarquin family. Another member of the family outraged her whereupon she stabbed herself to death on the next day. A revolt followed and the Tarquins were driven from Rome. Her story is told by Livy, and Shakespeare described the act in his poem, *The Rape of Lucretia*.

Lucretius Latin philosopher and poet. Titus Lucretius Carus was born in 98 B.C. Very little is known about him except that he wrote and that he died in 55 B.C. His great work is *De Rerum Natura* a poem in which he expounds his philosophy, that of the Epicureans.

Lucullus Roman epicure. Lucius Licinius Lucullus was born in 110 B.C. and became a soldier. He made a reputation by his nine years campaign against Mithridates and became praetor in 77 and consul in 74. In 65 he retired from active service and during the next nine years gave feasts of unsurpassed profusion and splendour at his villa at Tusculum and at his house in Rome. He died in 57 B.C.

Lucy Sir Henry William English humorist. Born in Liverpool in 1845, he was there educated. After a period in business, he became a reporter on a journal in Shrewsbury in 1864. In 1873 having been for a time in Paris he joined the staff of *The Daily News* and in 1881 became a member of the *Punch* staff. He was knighted in 1909 and retired in 1916. Lucy made his reputation as a reporter of doctates in Parliament and by the

skill with which he obtained information of value for his papers. The sketches of the proceedings in Parliament which he wrote for *Punch*, signed Toby M.P., were a feature of that journal. Lucy wrote a number of books, including *Memories of Eight Parliaments* and *The Diary of a Journalist*. He died Feb 20, 1924.

Luddites Men who caused disturbances in the Midland counties of England in 1811-12. The name is taken from that of Ned Ludd, an idiot living in a village of Leicestershire. The Luddites, believing that machinery was the cause of their unemployment and distress, went about destroying it. They were chiefly men connected with the making of hosiery in the counties of Nottingham and Leicester, where most of the damage was done. The rising was put down, but in 1816 there was another outbreak which extended into Yorkshire and Lancashire.

Ludendorff Erich German soldier. Born in Posen, April 9 1865, he entered the army in 1882. He secured an appointment on the staff, lectured to the students at the military academy and in time rose to the rank of major general. In Aug 1914, he took part in the attack on Liège, but was soon sent to the east to serve as chief of the staff to Hindenburg. When, in August, 1916, Hindenburg took command of all the German forces, he remained his chief adviser.

Ludendorff was responsible for the defeat of Rumania, but his chief energies were directed to the western front. He directed the German campaigns of 1917 and 1918, and in the former year introduced new methods of attack and defence. He was in control until the end came, but he could not avert the final defeat. In Oct., 1918, he resigned, and after a time in Sweden settled in Munich. Now and again he appeared in public life, once as an opponent of the republic. He wrote books on the war. *My War Memories*, *The General Staff and its Problems* and *Warfare and Politics*.

Ludgate One of the old gates of the city of London. It was near where the Old Bailey now stands and owed its name to the legend that it was built by King Lud. It was used as a prison for debtors and was pulled down in 1760. The name is now borne by Ludgate Circus, where Fleet Street meets Farringdon Street and New Bridge Street, and Ludgate Hill, which leads from the Circus to St Paul's Cathedral.

Ludlow Borough and market town of Shropshire. It stands on the River Teme, 27 m from Shrewsbury and 162 from London. The ruined castle is the chief object of interest. Tanning and milling are the chief industries. Interesting buildings include the old collegiate church in the perpendicular style and The Feathers Inn.

Ludlow was a very important place in the Middle Ages, chiefly because of its position on the Welsh border. The president of the Council of the Marches lived in the castle and the Court of the Marches was held there. Milton's *Comus* was first played in the castle, which was destroyed in 1646. Ludlow sent members to the House of Commons from 1471 to 1835. Pop (1931) 5642.

Ludlow Edmund English politician. He was born about 1617, went to Trinity College, Oxford, and in 1642 joined the Parliamentary army. He was made governor of Wardour Castle which he defended until 1646. In the same year Ludlow became

M.P. for Wiltshire. He commanded the troops in Ireland, 1651-52, but became suspicious of Cromwell and lived for a time in retirement. In 1659 he was again an M.P., a member of the Council of State and commander of the troops in Ireland. He lived chiefly at Verney until his death in 1698, the last of the regicides. Ludlow's *Memoirs* are a useful authority for the history of his time.

Ludwig Emil German writer. Born in Breslau, Jan 25, 1881, he was the son of a professor of ophthalmology named Cohen. He was educated at the universities of Breslau and Heidelberg and began his literary career by writing plays. He then did journalistic work and produced some novels, but his reputation rests upon his biographies. The first was a *Life of Bismarck*, which he followed with *lives of Napoleon*, *William II*, *Goethe* and *Abraham Lincoln*, all described as psychological studies. He also wrote a *Life of Christ*. His biographies have been translated into English.

Ludwigshafen Town and river port of Bavaria. It is on the Rhine, just opposite Mannheim. There is a good harbour and shipping is an important industry, while the town has manufactures of chemicals and beer, flour mills and iron foundries. The town was founded in 1843 by Louis, or Ludwig, King of Bavaria, and all its buildings are modern. Pop 101,900.

Lugano Lake of Italy and Switzerland. It lies between Lakes Maggiore and Como, is 22 m long and covers some 20 sq m. The River Tresa carries its waters to Lake Maggiore. The scenery around is very beautiful and on the lake shores are many spots visited by tourists.

The city of Lugano is in Switzerland. At the north end of the lake, it is 51 m from Milan on the main railway line. It is a tourist centre and a calling place for steamers on the lake. Pop (1930) 15,184.

Lugard Frederick John Dealtry, Baron Jan 22, 1858, and educated for the army, he first saw service in the Afghan War, 1879-80. With the exception of five years' governorship of Hong-Kong, 1907-12, his work has been confined to Africa, first in establishing and protecting British interests, then as High Commissioner of Northern Nigeria, 1899, Governor of Northern and Southern Nigeria, 1912, and finally Governor General of all Nigeria. He has always sought to improve the conditions of the natives, doing much to abolish slave trading. He retired in 1919, was made Privy Councillor, 1920, and was appointed to the permanent mandates commission of the League of Nations, 1922. He was created a baron in 1928.

Lugg River of England and Wales. Rising in Radnorshire it flows through Herefordshire, entering the River Wye below Mordiford.

Lugger Vessel carrying lug sails. Two-masted or three-masted, often with running bowsprit and 2-3 jibs, the quadrilateral sails are bent upon yards hanging obliquely to the mast.

Luke Traditional author of the third gospel and the Acts of the Apostles in the New Testament. He is commonly identified with the non-Jewish physician of Antioch mentioned by S Paul, whose missionary journeys he sometimes accompanied.

Traditionally he died in Bithynia when 74 years old. As saint and evangelist he is commemorated on October 18.

Luke The Gospel of Third book of the New Testament. Written after the Matthew and Mark gospels, and addressed to the Gentile world, it is remarkable for its tender interest in the sick and outcast, its sympathy with womanhood, its intimate details of the infancy, perhaps derived from the Virgin Mary, and its full treatment of our Lord's last journey to Jerusalem. Its literary charm betokens a versatile and cultivated intellect. Its sequel, The Acts of the Apostles, displays similar qualities.

Lully Jean Baptiste French composer. He was born in Italy in 1633, but when a young man settled in France and became a Frenchman. He spent his life at the court of Louis XIV., first as a violinist, and finally as music master. He died in Paris, March 22 1687.

Lully was a very successful composer. He wrote many operas in which he made the ballet an essential part and with him Molière was associated. His works include, *Alceste*, *Alys*, *Thésée* and other operas.

Lully Raymond Spanish writer. Born in 1235 in the Island of Majorca he was the son of a nobleman, and passed his youth at the court of the King of Aragon. About 1265 he devoted himself to missionary work among the heathen, to study and to writing. In 1315 he went to Algeria where his preaching against the Mohammedans irritated the people and he was almost stoned to death at Bougie. He was rescued by some sailors, but died on their ship June 30, 1315. Lully had a great scheme for acquiring knowledge which he explained in his *Ars Magna*.

Lulworth Name of two villages of Dorset. East Lulworth is about 5 m. south east of Wareham. West Lulworth is 2½ m. distant. Near is Lulworth Cove, a holiday resort.

Lumbago Painful muscular affection in the lower part of the back, due to inflammation of the connective tissue. It usually arrives as a sudden seizure, sometimes following exposure to cold and damp, or straining of the muscles of the loins.

Treatment—During the acute phase of this type of rheumatism, local rest for the affected muscles of the back is essential. The application of heat in the form of poultices, and counter irritants such as mustard or turpentine may relieve the pain and diminish the inflammation. In chronic cases massage baths and spa treatment are most likely to be effective.

Lumber Word denoting (1) useless or discarded furniture, especially if cumbersome. (2) N. American timber sawn or split into logs, beams, boards etc., for transportation. The latter use originated in 17th century New England, and the important activities long carried on in Canada and the United States, in the felling, preparing and transporting of timber constitute the lumber industry. The labour is performed by lumberjacks, lumberjacks or lumbermen. Similar operations enter into the collection of pulpwood for paper manufacture.

Lumley Castle Residence of the Earl of Scarborough. It is on the Wear near Chester le Street in Durham. The original building dates from the 13th century, but the present one is largely modern. A fine pile, it has been for

six centuries the seat of the Lumley family, which takes its name from here.

Lumpsucker Class of fish found round the coasts of Great Britain and the northern parts of Europe generally. It is about 12 ins. long, and has a power of attaching itself to the rocks by means of its sucker. The male is red and yellow in colour which varies according to conditions. In the breeding season the male watches over the eggs for several weeks.

Lunacy State of being unable to control one's actions, or as popularly understood, out of one's mind. A mental condition, it is not always easy to define. Many persons possess eccentricities or mental weaknesses but it is not always easy to decide when these pass into lunacy.

In Great Britain a lunatic must be certified as such by two medical men. In a rate aided case, only one medical certificate is necessary. He or she can then be put under control and his or her property managed by some one else. This is usually done by an application to the courts of law when a committee as it is called, is appointed to manage the lunatic's estate.

To care for lunatics there are many private asylums which must be inspected, while the councils of counties and county boroughs must provide asylums. For criminal lunatics there is a special asylum at Broadmoor. To look after lunatics and mentally deficient there is a board of control at Caxton House West, Westminster. This consists of three senior commissioners legal and medical, and a chairman. Under them are assistant commissioners. There is a similar board for Scotland at 25 Palmerston Place, Edinburgh.

Lund City of Sweden. It is 13 m. from Malmö and is famous for its university. In the 12th century Lund was a flourishing seaport, but the sea has receded from it. In 1676 a treaty between the Swedes and the Danes was signed here. Pop (1952) 25 138.

Lundy Island in the Bristol Channel. It is off the north coast of Devonshire, 12 m. from Hartland Point, and covers 1000 acres. Here are two lighthouses. Pop. about 50.

Lune River of Westmorland and Lancashire. It rises between Ravenstonedale and Lonsdale and flows through Lancashire to Lancaster Bay. Lancaster stands on it and its port Glasson, is near the mouth. It is about 45 m. in length.

Lunenburg Town and seaport of Nova Scotia. 70 m. from Halifax. The industries are fishing and ship building. Pop. 2792.

Lunette Architectural term for the vertical wall space enclosed by a vault. It is often used for mural painting, or the space may be filled by a circular or oval window. The term is extended also to a round or oval window in a ceiling and to a painting within a circular border and similarly placed.

Lunéville Town of France. It stands on a tributary of the Meurthe, 20 m. from Nancy. It is a manufacturing town with engineering works, railway works, motor car works and textile mills and has an agricultural trade. It is also a military station and has large barracks. Pop. 25 000.

The Peace of Lunéville was signed here Feb. 9 1801. It was made between France and Austria and was a complete humiliation for

the latter The Rhine was fixed as the boundary of France and Napoleon was dominant in Italy and Switzerland where he set up several republics

Lung Organ of respiration In man it comprises two elastic spongy masses, each enclosed in a serous membrane or pleura, almost filling the chest cavity, and weighing in healthy adults 40 oz. Communicating with the outer air through the windpipe, the right lung is three-lobed, the left two-lobed. At their roots the bronchi are subdivided into innumerable branches which ultimately reach tiny air-cells, furnished with capillaries through whose walls the carbon dioxide of venous blood is replaced by the oxygen of inhaled air. See PLEURISY, PNEUMONIA, TUBERCULOSIS

Lung Fish Fish found in the rivers of the tropical parts of Africa, Australia and South America. They are the surviving descendants of what may have been the transitional stage between fishes and amphibians.

The South American lung fish is shaped rather like a conger eel. Its home is in the marshes along the Amazon and its tributaries, and the fish wriggles through the thick aquatic vegetation, using its hind limbs in an irregularly bipedal way. It comes to the surface to take air into its lungs. In the dry season it hibernates.

Lungwort Perennial rough-haired herb of the horage order (*Pulmonaria angustifolia*). Locally called beggar's basket and Joseph-and-Mary, and occasionally found wild in Hants and Dorset, its lance-shaped leaves bear pale green lung shaped spots, the funnel shaped flowers change from pink to blue. *P. officinalis*, growing in old gardens, has broader root-leaves, and the blooms are sometimes white. It is a native of Europe and an alternative name is Jerusalem cowslip.

Lunn Louise Kirkby. English singer. Born in Manchester, Nov 8, 1873, she studied music in London. In 1893 she appeared on the concert platform and became one of the leading singers of the day. For three years she was with the Carl Rosa Company, and she has sung much at Covent Garden, London, and has made frequent tours abroad.

Lupercalia Roman festival. It was held every year on Feb 15 in honour of Mars and the wolf (*lupus*) and was a festival of fruitfulness. Sacrifices were offered by the priests, and with thongs cut from the skins of the dead animals they passed in procession. The women, anxious to be fruitful, came forward to be touched with the thongs. The festival was held on the Palatine Hill.

Lupin Genus of annual and perennial leguminous herbs and undershrubs. They are natives of the Mediterranean region and temperate America. Some were cultivated in antiquity for human food and cattle fodder. Gardeners have developed many attractive hybridised forms, annuals being derived from both eastern and western species, perennials from American only.

Lupus Disease of the skin occurring in two forms. *Lupus vulgaris*, due to the tubercle bacillus, develops nodules, usually about the nose, cheeks or ears, which may persist for years, ulcerate, and produce unsightly scars. A milder form, *lupus erythematosus*, whose cause is unknown, develops

red, scaly patches which do not ulcerate. These may be treated with soothing ointments, but the more serious form may need stronger caustics, or the application of Finsen-light or X-ray treatment.

Lurcher Dog that is a cross between a greyhound and a collie or other kind of sheep dog. They are usually very useful for hunting hares and rabbits and for retrieving game, and are therefore frequently kept by poachers.

Lurgan Urban district of Co. Armagh, Northern Ireland. It is 20 m. from Belfast on the G.N. (Ireland) Riv. The chief industries are the making of linen and the preparing of tobacco. Lough Neagh is near the town. Lurgan Castle, a fine modern building is the seat of Baron Lurgan, a title dating from 1839. Pop. (1926) 12,553.

Lusatia District of Germany. It is in the east of the country, partly in Prussia and partly in Saxony. In the Middle Ages it was divided into two parts, Upper and Lower. It was part of Bohemia and then of Hungary before it passed to Saxony and Prussia.

Lusitania Name used in Roman times for a province that included Portugal and part of Spain. It is sometimes used to-day for Portugal.

The Lusitania was a Cunard steamship that was sunk by a German submarine off the coast of Ireland, May 7, 1915. 1,198 persons lost their lives. The vessel was one of 31,500 tons.

Lute Stringed instrument. It is long-necked, with fretted finger-board and pear-shaped back and was introduced into Europe by the Crusaders. As an orchestral instrument it persisted until 1741, as a solo instrument until 1760, but it was in its prime in the Middle Ages.

Lutetia Latin name for Paris (*q.v.*). The town which in the time of Julius Caesar stood where is now the centre of the city was called by this name. It was the chief town of a tribe called the Parisii.

Lutecium Rare metallic element of the yttrium group of rare earths. It has the symbol Lu and atomic weight 175. Lutecium was isolated by Urbain in 1907 from ytterbium by fractional crystallisation. It occurs along with ytterbium and other metals of the same group in the mineral gadolinite from Ytterby in Sweden.

Luther Hans. German statesman. Born in Berlin, March 10, 1879, he studied law and became a public official, first at Charlottenburg and then in Magdeburg. During the war period he was secretary of the association of German and Prussian towns, and from 1918-22 was burgomaster of Esson. In Dec., 1922, he returned to Berlin to become minister of food, and in Oct., 1923 minister of finance under Stresemann. He restored the German currency and in 1925 became Chancellor, in which capacity he was the German leader at Locarno. In May, 1926, he resigned and became associated with the management of the state railways. Hitherto without definite party ties, in 1927 he joined the People's Party.

Luther Martin. German reformer. He was born at Eisleben, in Saxony, Nov. 10, 1483, the son of a slate cutter. His parents were poor, but he was well educated at Magdeburg, Eisenach, and Erfurt. He entered a monastery there and became a

monk In 1508 he went to Wittenberg as a lecturer at the university and made a reputation as a preacher

By now he had worked out a doctrine of salvation, different from that taught by the church, and in 1517 he became a national figure He challenged John Tetzel a friar who was selling indulgences, to a discussion on the subject and drew up 95 theses as a basis for the debate These he fixed on a church door at Wittenberg on Oct 31, 1517 an event which is usually regarded as marking the opening of the Reformation

Luther's action created a great stir in Germany, where people were becoming alive to the scandals in the church, and he soon had a considerable following, which was strengthened by his writings In 1520 the pope issued a bull condemning his views, but this was publicly burned by the reformer at Wittenberg and his breach with the church was complete He did, indeed, when summoned attend the diet at Worms in 1521, but again he refused to give way in his famous sentence, *Ich kann nicht anders* (I can do no other) To save him from violence he was carried off to a fortress, the Wartburg, and there he lived for about a year under the protection of the Elector of Saxony The Reformation had been started and much of Luther's later life was passed in organising the Reformed Church in Germany He took little part in politics, but in 1525 and at other times showed himself hostile to the peasants and their grievances In 1526 he married an escaped nun, Catherine von Bora He died at Eisleben, Feb 18, 1546

Luther's great literary work was his translation of the Bible He also wrote some popular hymns His three chief theological works are, *On the Duty of a Christian Man*, *An Address to the Nobility of the German Nation* and *On the Babylonian Captivity of the Church of God*

Lutheranism Form of religion founded by Martin Luther Its creed is contained in the confession of Augsburg, but, like other churches, it does not demand to day a literal acceptance of all the doctrines stated therein Lutheranism is strong in Germany where, after being divided into many churches, it now forms a united church, to which more than half of the population nominally belong Before the foundation of the republic it was the state church

Lutheranism is the state religion in Norway, Sweden and Denmark and is strong in the United States Its adherents, altogether, may number 60,000,000 or 70,000,000 It is governed by its ministers, by elected courts called consistories and by synods In many ways it is rather like the Presbyterian churches, retaining a certain amount of ceremonial, including the keeping of the church festivals The singing of hymns occupies a prominent place in its worship

Luton County borough and market town of Bedfordshire It is 30 m from London and is served by both the LMS and LNE Ryds Luton was once noted as the centre of the straw plaiting industry The chief industries to day are the making of motor cars and engineering products In 1928 the borough was enlarged Pop (1931) 68,526

Lutsk Town of Russia, on the River Prypiat At one time it was the capital of an independent state, but it became

Russian in 1701 The Russians made it into a strong fortress Pop 30,000 In 1915 it was captured by the Germans In June, 1916 the Russians in their great offensive regained it and captured a great deal of war material Later in the year it again changed hands and the Germans retained it until peace was made with Russia in 1917

Lutterworth Market town of Leicestershire It stands on the little River Swift 90 m from London, on the LMS and LNE Ryds The chief building is the fine old parish church which is associated with John Wycliffe, who was rector here, 1374-84

Lutyens Sir Edward Landseer English architect He was born in London March 20, 1869, and was trained as an architect His designs soon attracted attention and he became in time one of the outstanding figures in his profession He was employed on the planning of Delhi and was responsible for Government House and other buildings there He also designed the Cenotaph in Whitehall, London, and several other war memorials, as well as Britannia House, London for the Anglo Persian Oil Company He was made A.R.A. in 1913, a knight in 1918, and R.A. in 1920

Lutzen Town of Germany It is in Prussian Saxony and is famous because near here two decisive battles have been fought

On Nov 16, 1632, the Swedes under Gustavus Adolphus, fighting for the Protestants in the Thirty Years War, met here the army of Wallenstein Each army was about 20,000 strong After a stern fight, in which Gustavus was killed, the Swedes were victorious Memorials mark the site On May 2, 1813, there was a battle here in which the French under Napoleon defeated the Russians

Luxembourg Palace in Paris now a museum On the left bank of the Seine, it was built early in the 17th century on land bought from the Duke of Luxembourg Pineau as a residence for Marie de Medici widow of Henry IV After a time it fell into decay, but it was restored in 1836 and converted into an art gallery It contains a fine collection of modern paintings There are some magnificent rooms decorated in the most sumptuous style, while the gardens are large and beautiful

Luxembourg Marshal French soldier Born January 8, 1628, François Henri de Montmorency Bonville was related to the Condé family He left France after taking part in the civil war, and went to Spain where he served in the army His brilliant career in the French army began in 1639, in 1672 he took command of an army and during the war against the Netherlands made his reputation In the war that began in 1689 he won victories over William III at Steinkirk and Neerwinden He was made Duke of Luxembourg in 1661, a marshal in 1675, and died, Jan 4 1695

Luxembourg Country of Europe It is a grand duchy lying between Belgium, France and Germany, and covers 999 sq m Luxembourg, a town with 53,791 inhabitants is the capital The Ardennes cover much of the land, which is mainly an agricultural area, although iron ore is mined in the south The chief river is the Sûre The government is conducted by a small cabinet and there is a council of state and

an elected house of 52 members. The land was occupied by the Germans from 1914-18, and in 1919 a referendum took place to decide its future. In 1922 an economic union with Belgium was made, and in July, 1932, Luxembourg joined that country and the Netherlands in a treaty for the mutual lowering of tariffs.

In the Middle Ages Luxembourg was a county and its counts made themselves powerful rulers. In 1354 their land became a duchy, and in 1443 a part of Burgundy. Later it belonged to Spain and then to Austria. In 1815 it was made a grand duchy, and in 1839 it was divided between Belgium and the Netherlands, the part assigned to the latter country being the present Luxembourg. In 1890, when the king of the Netherlands died, Luxembourg again became a separate state with Adolph, Duke of Nassau, as grand duke. He was succeeded by a son, William, after whose death in 1912 his daughter, Marie, became grand duchess. In 1919 Marie abdicated in favour of her sister, Charlotte. She is married to a prince of Bourbon-Parma.

Luxor Town of Egypt. It is on the east bank of the Nile, 418 m from Cairo. It is a tourist centre and is also visited by invalids. Luxor occupies the site of the old city of Thebes, and adjacent to it is Karnak with its temple. Pop 12,600. See KARNAK, THEBES.

Luzon Second largest island of the Philippine group. It is about 300 m long and covers 40,814 sq m. There is a mountainous area in the north and centre, and several active volcanoes. Much of the soil is fertile, and tobacco, sugar and hemp are grown. Minerals are abundant. Manila, the capital of the group, is in the south-west of the island.

Lyautey Louis Hubert. French soldier. Born at Nancy, Nov 17, 1854, he passed through the college at St Cyr into the army. He saw a good deal of service in Algeria and Madagascar and was in Indo-China for a time. He rose to the rank of general and in 1912 was appointed administrator of Morocco. In 1916 he was minister of war for a short time, but in 1917 he returned to Morocco, where he remained until 1928. Lyautey's work in bringing peace and prosperity to Morocco is one of the outstanding successes of the French rule in Africa. In 1921 he was made a marshal. Died July, 1934.

Lycanthropy Term denoting in folklore the power attributed by popular superstition to certain human beings of being transformed, temporarily or permanently, into an animal, wolf, dog, tiger, hyena or jaguar. Pathologists recognise a form of hysteria, called lycanthropy, in which the patient, believing himself to be an animal, acts accordingly.

Lycaon In Greek legend a king of Arcadia. He was turned into a wolf because he offered human flesh to Zeus when the god came to visit him. Of his 50 sons 49 shared his fate.

Lycaonia was the name of a district in Asia Minor. Iconium was the capital, other places being Lystra and Laodicea.

Lyceum Grove outside Athens near a temple sacred to Apollo Lycius. As Aristotle and other philosophers taught here, the word was used later for a place of learning and this use has persisted, especially in France where lycées are very common.

The Lyceum Theatre in London is in Wellington Street, Strand. It was built in 1765, rebuilt in 1816 and burned down in 1830. In 1834 the present theatre was built. From 1878 to 1902 it was used by Henry Irving and Ellen Terry. Later it became associated with melodrama.

The Lyceum Club is a club for women, chiefly professional and artistic. It was founded in 1904 and its house is 9 Chesterfield Gardens, London, W 1.

Lych Gate Covered gate at the chief entrance to a churchyard and usually having a gable roof. It was the old custom at a funeral for the coffin to rest at the gate until the arrival of the clergyman, hence the sheltering roof. The oldest lych gate in England is said to be the one at Bray, Berks, dated 1448.

Lyck Town of East Prussia. It stands on the River Lyck, 118 m from Königsberg. Near the borders of Germany, Lyck was an important place in the Middle Ages. Pop 13,400.

During the Great War Lyck was occupied by Russian troops in Aug., 1914, and again in Oct. On Sept 12, there was a battle near the town, the Russians being defeated and driven back.

Lycurgus Spartan lawgiver. He lived about 800 B.C. He is regarded as the creator of the constitution of Sparta, which he reformed on returning from a period of travel.

Another Lycurgus was an Athenian. He lived in the 4th century B.C., and did a good deal to improve the finances, strengthen the navy and beautify the city. He was also an orator and 15 of his speeches remain.

Lydd Borough of Kent. It is 71 m from London, on the S. Rly. The town is now an inland one as the sea has receded. It was a Cinque Port in the Middle Ages. The explosive, lyddite, was tested near here, hence its name. Pop (1931) 2778.

Lyddite Explosive closely resembling melinite in composition, and named from Lydd in Kent. It is a mixture of picric acid and trinitrotoluene in varying proportions.

Lydford Village of Devonshire. It stands on the River Lyd, 7 m from Tavistock on the S. Rly. It is on the edge of Dartmoor and in the Middle Ages was a borough and market town. As a stannary town the courts were held in Lydford and here was the stannary prison. Lydford gorge is one of the beauty spots of the district.

Lydgate John. English poet. Born at Lydgate, Suffolk, about 1370, he became a priest of the Benedictine order. He spent some time abroad. Henry IV made him court poet. From 1423 to 1434 he was prior of a religious house in Essex. He died about 1451, and was buried at Bury St. Edmunds. Lydgate was an imitator of Chaucer. His chief works are *The Store of Thebes*, *The Troy Book*, *The Fall of Princes* and *The Temple of Glass*, all based on older romances.

Lydia Kingdom that existed in Asia Minor before the Christian era began. It came into existence after 700 B.C., and was most flourishing under the rule of Croesus, when it included a good part of Asia Minor. In 546 Croesus was defeated by the Persians and Lydia became subject to the Persian kings. It recovered its independence in 334, but only for a brief time. In 133 B.C.

It was included in the Roman Empire. Its capital was Sardis. It is said that metallurgical coinage was first used in Lydia.

Lydney Town of Gloucestershire. It is in the Forest of Dean, 8 m from Chopsdown, and is reached by the G W Rly. There are coal mines in the neighbourhood. In Lydney Park, the seat of Lord Blodislow, Roman remains have been found.

Lye Term applied to a solution of caustic potash or soda or the alkaline carbonates. It was originally prepared by the extraction with water of impure carbonate of potash from wood ashes for use in soap making. Lyes are used for cleansing purposes and the removal of grease from fabrics, etc., also for refining petroleum and in tanning.

Lyell Sir Charles, British geologist. He was born in August, Nov 14, 1797, the son of Charles Lyell, a hotanist, and went to Exeter College, Oxford. He became a barrister, but gave his time to travel and the study of geology. In 1832-33 he was professor of King's College, London, and in 1864 was president of the British Association. In 1848 he was made a knight, and in 1864 a baronet. He died Feb 22, 1875.

Lyell's work had a great influence on the modern study of geology. His chief book is *The Principles of Geology*, a standard work on the subject. He also wrote, *The Geological Evidences of the Antiquity of Man* and *Letters and Journals*, which were published in 1881.

Lyly John, English writer. He was born in Kent in 1553, and studied at Oxford and Cambridge. He entered the service of Lord Burghley, and for 20 years was responsible for the entertainments at the queen's court. In 1589 he was elected an M P. Lyly is known as the author of *Euphues*, the publication of which in 1579-80 is an important event in English literature. It is a prose romance the first of its kind in English, in two parts, *The Anatomy of Wit* and *Euphues and his England*. Euphues was an Italian gentleman whose adventures are related. The book, which was very popular, created the word euphuism for a style of writing in which simile, allusion and antithesis are used to excess. Lyly wrote eight plays, or masques for the court, among them are, *Sappho and Phao*, *Endymion*, *Mother Bombie* and *The Woman in the Moon*. He died in London in Nov 1606.

Lyme Regis Borough, seaport and watering place of Dorset. It is on Lyme Bay, 150 m from London, on the S Rly. There is a harbour and some shipping, while quarrying is an industry, but the place is less prosperous as a seaport than it was in the Middle Ages. From 1295 to 1817 Lyme Regis, which was in early times the king's property, was separately represented in Parliament. The place is mentioned by Jane Austen and here the Duke of Monmouth landed in 1685. Pop (1931) 2620.

Lymington Borough, seaport and market town of Hampshire. It stands at the mouth of the Lymington River 18 m from Southampton, and 90 m from London on the S Rly. The place is a yachting centre and from here steamers go to the Isle of Wight. Until 1885 it sent members to Parliament. Pop (1931) 5157.

The Lymington River rises in the New Forest and flows into the English Channel just beyond Lymington.

Lymm Urban district of Cheshire. In the north of the county, it is situated on the Bridgewater Canal, and is practically a suburb of Manchester. It is 187 m from London by the L M S Rly. Pop (1931) 5642.

Lymph Name given to the colorless fluid consisting of a plasma identical with blood plasma. It is conveyed through lymphatic vessels to the lymphatic glands, where leucocytes or white blood corpuscles are added to the plasma and finally to the capillaries. The work of the lymph is to carry nutriment to the tissues and to return waste products to the blood. The lymph glands not only form white blood corpuscles but also aid in destroying the toxins of microbes.

Lympne Village of Kent. It is 2 m from Hythe, and is chiefly known as an air station. This was established in 1915 and until the end of the Great War was used for military purposes. It was then converted into a station on the route from the Continent to London.

Lynch Law Name given to the system by which people take the law into their own hands. It was very usual in North America in the 19th century, as it was also in various parts of Europe, while it is not unknown to day. It appears to flourish where racial antagonism is strong and authority somewhat weak, and crimes against women make a special appeal to it. The name is that of a farmer in Virginia named Charles Lynch, who in the 18th century, was a leader of those who took summary vengeance on black men for offences against the whites.

Lynd Robert, British writer and critic. Born in Belfast, the son of a Presbyterian minister, April 20, 1879, he was educated there. After graduating at Queen's College, he settled in London and joined the staff of *The Daily News*. After a time he became the literary editor of that paper, a post he retained when it became *The News Chronicle*. He wrote also a good deal for weekly and other periodicals, chiefly reviews of books and essays. His many published books include, *Home Life in Ireland*, *The Art of Letters* and *The Peat of Belis*. His wife, Sylvia, is also a writer both in prose and verse.

Lyndhurst Town of Hampshire. It is in the New Forest, 9 m from Southampton, on the S Rly. It is a centre for visitors to the Forest. In August there is a sale of forest ponies here. The church contains frescoes by Lord Leighton.

Lyndhurst Lord English lawyer John Singleton Coppley, a son of the artist, John S. Coppley, R.A., was born at Boston, U.S.A., May 21, 1772. He was educated at Trinity College, Cambridge, where he was second wrangler and became a barrister. In 1818 he entered the House of Commons as M.P. for Yarmouth, and in 1819 he was made solicitor general, in 1824 he became attorney general. In 1827 Coppley, now a leading figure among the Tories, was made lord chancellor and a baron. He left office in 1830, but was again lord chancellor, 1834-35 and 1841-46. From 1830-34 he was chief baron of the exchequer. He died Oct 12, 1863, when his title became extinct.

Lynmouth Watering place of Devonshire. It stands where the East Lyn and the West Lyn meet, 18 m. from

Barnstaple A cliff railway runs from here to Lynton, which stands much higher. There is a harbour and steamers go from here to Bristol and Ilfracombe. Near is the beauty spot called Watermeet.

Lynton Urban district and watering place of Devonshire. It is on the north coast, 17 m from Barnstaple. Pop (1931) 2012.

Lynx Class of animals belonging to the cat family (*Felis*). It is found in Europe, Asia and North America, though it is not so common as it was formerly. At one time it lived in England. The animal is larger and heavier than the cat and has a short tail and bearded cheeks. There are several species, and the fur varies in colour from white to quite dark. All are savage and feed on birds and small mammals, but will attack larger ones, such as sheep and goats.

Lyon Word used in Scottish heraldry. It is a form of lion. The herald's office for Scotland is called the Lyon Court and its head is the Lyon King of Arms who is registrar of the Order of the Thistle. He is assisted by three heralds, Marchmont, Albany and Rothesay, and three pursuivants, Carrick, Falkland and Unicorn. His office is in the Register House, Edinburgh.

Lyonnesse Name of a country now supposed to be submerged. It was off the north coast of Cornwall and may have included that county. Breton and Cornish folklore contain many references to it. It was the land of Arthur and his knights, and Camelot was its chief town.

Lyons City in eastern France. First founded in 59 B.C., and later occupied by the Romans, it is now the capital of the Rhône department, with a population of 579,763. It stands where the rivers Saône and Rhône meet, and has fine bridges, quays, and some docks. The cathedral of St Jean was begun in the 12th century.

Lyons is the seat of an archbishopric, and the headquarters of an armv corps. Its educational facilities include a university and the earliest veterinary school in Europe. Silk is the foremost industry, and has developed rapidly since 1450. Artificial silk is also manufactured, there is a large dyo industry, and trade in cloth, coal and metals, wines and chestnuts. Excavations in 1933 uncovered extensive Roman remains, including a magnificent amphitheatre. It has two broadcasting stations (465 S.M., 15 kW, and 287.6 M., 0.7 kW).

Since 1916, an International Fair has been held annually at Lyons.

Lyons Sir Joseph. British business man. The son of Nathaniel Lyons, he was born in London. He was educated by the Jews and studied art. In 1894, having foreseen the possibilities of the catering business, he opened a tea shop in London, and this was the first of many. Hotels were added and the firm opened factories to produce many of the products sold, the result being that it became the largest business of its kind in the land. In 1911 Lyons was knighted and he died June 22, 1917.

Lyons Joseph Aloysius. Australian politician. Born in Tasmania, Sept. 15, 1879, he finished his education at the university of Tasmania and became a teacher. In 1909 he was elected to the legislature of the state in the Labour interest and from 1914-16 he was treasurer and minister of education. From 1923 to 1928 he was prime minister

of the island. In 1929 Lyons was elected to the House of Representatives of the Commonwealth and at once joined the ministry of Mr Scullin as postmaster general and minister of works. He was acting treasurer during Mr Scullin's absence in London in 1930, but in Jan. 1931, he resigned as he differed from some of his colleagues on the vital question of handling the grave financial situation. He came forward as the leader of the party that stood for meeting all obligations, and at the end of the year he and his followers scored a great success at the general election. Lyons then became prime minister (1931). He formed a Coalition Ministry Nov. 1934, and visited England for the Jubilee in May, 1935.

Lyre Musical instrument. From a hollow sound chest rise two curving arms (sometimes hollow) connected by a cross-bar, from which seven or more strings run to another cross-bar on the sound chest. These are touched by the left hand. The instrument was much used by the Greeks who sometimes played it with a small stick or plectrum.

Lyre Bird Genus of perching birds allied to the scrub bird. Resembling in size the domestic fowl, the males after the third year, develop in the breeding season handsome tails, much longer than themselves, which are displayed peacock-wise in the form of stringed lyres. Some species imitate the notes of other birds. They are found in Australia only.

Lyric Originally a song sung to the accompaniment of the lyre, but to day a form of poetry. It is opposed to epic or narrative poetry and is much more an effort of the imagination. The lyrics in the great Greek plays are among the finest in existence, notably those in *Hippolytus* and other plays of Euripides translated into English by Gilbert Murray. Pindar, Anacreon, Alcaeus, Sappho and other Greek poets also wrote beautiful lyrics.

In English poetry the lyric has a firm place. There are some in the plays of Shakespeare, for instance in *As You Like It*, and writers of the lyric flourished in Tudor times from Thomas Campion to Edmund Spenser. But apart from Shakespeare, the greatest writers of the lyric belong to the 17th century, and those written by Sir John Suckling, Robert Herrick, Lovelace and others are an imperishable part of English literature. Only less notable are the religious lyrics of George Herbert and Henry Vaughan. As a lyricist the name of John Donne should be mentioned.

The 18th century was not favourable to the lyric, but the poets of the 19th made good use of it. Perhaps Shelley is the supreme genius in this form of verse, but Keats, Tennyson and Swinburne, Wordsworth and Browning also wrote some wonderful lyrics.

Lys River of Europe. It rises in France and soon passes into Belgium. It is 120 m long and falls into the Schelde at Ghent, it is connected by canal with the Yser.

There was a good deal of fighting along the course of the river during the Great War, especially when, in October, 1914, and again in April, 1918, the Germans made efforts to control the Channel ports.

Lysander Spartan statesman. Lived in the 4th century B.C., and became prominent during the war with Athens as commander of the fleet. He secured aid from the King of Persia, but his greatest exploits were his victory over the Athenian

fleet at the battle of Aegospotami and the capture of Athens, events which ended the Peloponnesian War in favour of Sparta. He was killed when fighting the Thohans in 395 B.C. His life was written by Plutarch.

Lystra City of Asia Minor. It is now called Khatyn Seral. St Paul visited it on his travels there. Hoand Barnabas were taken by the people for Jupiter and Mercury (Acts xiv).

Lytham-St-Anne's Borough, watering place and market town of Lancashire. It stands on the estuary of the Ribble 6 m from Blackpool, on the L.M.S. Ry. The place, which has two piers, promenade and gardens, consists of Lytham and St Annes which, until 1922, were separate urban districts. Pop (1931) 2576.

Lyttelton Town and seaport of New Zealand. It is in South Island, 7 m from Christchurch and has a fine natural harbour, around which docks have been built. Much of the produce of the Canterbury district is exported from here. Pop 3800.

Lyttelton Alfred English politician and athlete. The youngest son of the 4th Lord Lyttelton, he was born Feb. 7, 1857, and went to Eton and Trinity College, Cambridge. He became a harristrier and a K.C. and in 1895, as a Liberal Unionist, was elected M.P. for Warwick and Leamington. In 1902 he went to the Transvaal on public business and on his return to England in 1903 succeeded J. Chamberlain as colonial secretary. He held office until 1905, being chiefly concerned with the question of Chinese labour in the S. African mines. In 1906 he lost his seat at Warwick, but was soon elected for S. George's, Hanover Square, and was in the House of Commons until his sudden death, July 5, 1913. His only son is Captain Oliver Lyttelton, D.S.O. His first wife was Laura, a daughter of Sir Charles Tennant, Bart., and sister of the Countess of Oxford, the second was Miss Edith Balfour who wrote his *Life*.

Lyttelton was a superb athlete. At cricket he was captain of Eton and Cambridge and played for England against Australia. He represented Cambridge and England at association football, and he was the amateur racquets champion, 1882 to 1895.

Of Alfred Lyttelton's seven brothers, the most notable perhaps were, Sir Neville Gerald Lyttelton, the fourth, and Edward Lyttelton, the seventh. The former entered the army and held high commands in the South African War (1899-1902). From 1904-12 he was commander-in-chief in Ireland and from 1912 until his death July 6, 1931, was governor of Chelsea Hospital.

Edward was captain of the Cambridge cricket eleven. He became a schoolmaster and a clergyman. From 1890 to 1905 he was head master of Haileybury and from 1905 to 1916 of Eton.

Lyttelton Baron English title borne by the family of Lyttelton.

George Lyttelton, an M.P., was made a baron in 1756. He was related to the Temple family and was associated politically with Chatham. When his son, Thomas, who succeeded him, died Nov. 24, 1779 the title became extinct.

In 1794 the barony was revived for William Henry Lyttelton, an uncle of the last holder. He was succeeded in turn by his two sons. In 1837 a grandson, George William Lyttelton, became the 4th baron. He was a fine scholar, having been senior classic at Cambridge, and a politician. He was known too, as the brother-in-law of W. E. Gladstone and the father of eight sons, who won fame in various fields of activity, not least as cricketers. He died April 10, 1876. His oldest son, who succeeded, inherited in 1889 the title of Viscount Cobham (qv). Hagley Hall in Worcestershire has been the seat of the Lytteltons for some 800 years.

Lytton Earl of English title held by the family of Lytton. Edward Robert Lytton, a son of Baron Lytton, was born in London, Nov. 8, 1831. He went to Harrow and entered the diplomatic service in 1849. Having gained experience in Paris, Vienna and elsewhere, he was made ambassador to Portugal in 1874. From 1876 to 1880 he was governor general of India and from 1887-91 was ambassador in Paris. In 1873 he became a baron and in 1880 an earl. He died in Paris, Nov. 24, 1891. Lytton wrote verse under the name of Owen Meredith.

Victor Alexander George Robert Lytton, who became the 2nd earl in 1891, was a grandson. Born Aug. 9, 1876, and educated at Eton and Trinity College, Cambridge, he held positions in the coalition ministry between 1916 and 1921 and from 1922 to 1927 was governor of Bengal. He wrote the *Life* of his grandfather Lord Lytton. In 1932 he went out to Manchuria as head of a mission sent by the League of Nations. Lord Lytton's seat is Knebworth House, Hertfordshire. His eldest son, Viscount Knebworth, lost his life flying in May, 1933.

Lytton Lord English novelist. Edward George Earle Bulwer-Lytton was born in London, May 25, 1803. His father, Earle Bulwer, was a soldier and his mother a member of the old family of Lytton. He was educated privately and at Cambridge, and in 1831 became M.P. for St. Ives and in 1832 for Lincoln, he lost his seat in 1841, but from 1852 to 1866 was M.P. for Hertfordshire. In 1858-59 he was secretary for the colonies and in 1866 he was made a baron. Lytton died at Torquay, Jan. 18, 1873, and was buried in Westminster Abbey.

Lytton's fame rests solely upon his novels and plays, although to day these are rather neglected, as being too sentimental and perhaps too tedious. In their time, however, they enjoyed great popularity. The best are *The Last of the Barons*, *The Last Days of Pompeii*, *Kienri* and *Harold*. Others are *Paul Clifford*, *Felham*, *The Caxtons*, *Zanoni*, *Eugene Aram*, *Ernest Maltravers*, *Night and Morning* and *The Parisians*.

M AARTENS Maarten N a m e taken by the Dutch novelist, Joost Marius Willem van der Poorten Schwartz. He was born in Amsterdam, Aug 15, 1858, and was educated in England and Germany. He became a lecturer in law at the University of Utrecht, but soon adopted the career of a writer. His novels, stories of Dutch life, were published in both English and Dutch. The best of them are *The Sin of Joost Ardingh*, *A Question of Taste*, *God's Fool*, *My Poor Relations*, *The Woman's Victory*, *The New Religion* and *Brothers All*. He died Aug 5, 1915.

Maastricht Town and river port of the Netherlands. It is on the Meuse near the frontier of Belgium, 16 m from Liège. The town has some manufactures and a trade along the river where there are large docks. Pop (1932) 61,763.

Mabinogion The title given by Lady Charlotte Guest to her English translation of eleven Welsh prose tales from the 14th-century Red Book of Hergest. They include four Irish mythological romances, called the four branches of the Mabinogi, the ancient stock-in-trade of young bardic aspirants, associated with old Welsh tales and Arthurian romances. The Mabinogion was first published in 1838.

Mablethorpe Urban district and watering place of Lincolnshire. It is 13 m from Louth, on the L N E Rly. There are good sands and bathing. Pop (1931) 3928.

Mabuse Jan Gossaert De Flemish painter. He was born about 1472 and took the name of Mabuse from his birthplace, Manbeuge. He became a painter and passed some time in Italy. He was in the service of the Duke of Burgundy for some years and died Oct 1, 1532, at Antwerp. Mabuse is represented in the National Gallery, London, by "The Adoration of the Kings."

Mac Scottish word meaning "son." It has become part of a large number of surnames common in Scotland and N Ireland. In these it is sometimes spelled simply M or Mc. In all cases the rule is to vocalise them as if they were all spelled out Mac.

McAdam John Loudon Scottish engineer. He was born at Ayr, Sept 21, 1756, and is famous for his introduction of the use of firmly embedded layers of small pieces of granite or similar material for road surfaces, a method since known as macadamising. He was appointed Surveyor-General of Roads in the Bristol area in 1815, and of the Metropolitan area in 1827. He died Nov 20, 1836.

Macao Colony in China belonging to Portugal. It consists of the island of Macao in the Canton river and the smaller islands of Taipa and Colôane. The total area is about 10 sq m. The transit trade is mostly in the hands of Chinese. The Portuguese settled here in 1557. Pop (1928) 157,175.

Macaroni Form of farinaceous food, chiefly prepared in Italy.

Made from the hard wheat, rich in gluten, habitually cultivated in S Europe, the flour is kneaded into paste, inserted in a cylinder with perforated ends, pressed out in tubular form and stove-dried.

Macaroni Travelled exquisites who introduced extravagant modes as well as macaroni into late 18th-century England. Forming the Macaroni Club (Charles James Fox being a member) they wore towering perukes, diminutive hats, striped or spotted breeches with borbled ends, frilled shirt fronts and large white cravats. Macaroni women outrivalled them in extravagance of head-dress.

Macartney Earl British administrator. George Macartney was born in Co Antrim, May 14, 1737, and was educated at Trinity College, Dublin. In 1764, having joined the public service he went to Russia where he made a commercial treaty. From 1769-72 he was Chief Secretary for Ireland, and from 1780-86 Governor of Madras. He was the first ambassador to China, 1792-94 and from 1796-98 Governor of the Cape of Good Hope. He was made a baron in 1776 and an earl in 1792. He died May 31, 1806, when his titles became extinct.

Macassar Seaport and capital of Celebes, Dutch E Indies. Situated on the S W coast, it exports timber, coffee, copra, rubber and other forest products. Pop 86,662.

Macassar Strait, about 550 m long, with a maximum breadth of 87 m, separates Celebes from Borneo by a deep oceanic channel E of the Sunda continental shelf.

Macassar Oil is the trade name of a hair oil originally made from a Mauritius iron wood or from the Indian kosumba tree. Pale or golden, its ingredients sometimes include coconut or safflower oils.

Macaulay Lord English historian. Thomas Babington Macaulay was born at Rothy Temple, Leicestershire, Oct 25, 1800, his father being Zachary Macaulay, a London merchant. His early home was at Clapham where his parents were members of the Evangelical sect. In 1818 he entered Trinity College, Cambridge, where he had a very brilliant career, and in 1824 he was made a fellow. He became a barrister, but earned a living by writing, chiefly for the *Edinburgh Review*.

A convinced Whig, Macaulay was, in 1830, returned as MP for the pocket borough of Calne. In 1833 he was elected for Leeds, but in 1834 he left Parliament to become legal advisor to the Council of India. There he remained for four years, and left his mark upon the legislation of the country. In 1839 he was elected MP for Edinburgh, and joined the Whig ministry as Secretary of War. He left office in 1841, but returned as Paymaster-General in 1846. In 1847 he lost his seat but was given one of the members for Edinburgh, 1852-56. In 1856 he was made a baron and on Dec. 28, 1859, he died unmarried and was buried in Westminster Abbey.

The chief of Macaulay's writings are his *Essays*, his *History of England* and his poems,

especially *The Lays of Ancient Rome*. The *Essays* show him as a descriptive writer of the first rank, but are more remarkable for the wealth of his knowledge and the fulness and aptness of his allusions. As exercises in criticism they are also notable, especially, perhaps, the one on Milton. The first volume of the *History* appeared in 1848, but it was unfinished when the author died, the fifth and last volume being published in 1861. As a poet Macaulay wrote vivid, swinging verse, a full of lines that linger in the memory as do some of his great prose passages. In their own sphere *The Lays of Ancient Rome* and *The Armada* are unrivalled.

Macaulay Rose English novelist and essayist. She spent her childhood in Italy and was educated at Oxford. Her publications which are marked by a lively humour, include *What Not*, 1919, *Potterism*, 1929, *Dangerous Ages*, 1921, *Mystery at Geneva*, 1922, *Told by an Idiot*, 1923, *Orphan Island*, 1924, *Creire Pratin*, 1926, *Keeping up Appearances*, 1928, *Slaying with Relations*, 1930, two books of verse, 1914 and 1919, *A Casual Commentary*, essays, 1925, *Some Religious Elements in English Literature*, 1931, *They Were Defeated*, 1932, *Milton*, a biography, *Going Abroad and The Minor Pleasures of Life*, 1931, *Personal Pleasures*, 1935.

Macaw Genus of long tailed S Amerl can parrots (*Aras*). They range from Mexico to Paraguay. The commonest are the blue and yellow, the red and yellow and the hyacinthine. Distinguished by their gorgeous plumage, some of them 3 ft long, including tail, they are gregarious forest dwellers and incorrigible screamers.

Macbeth King of the Scots. He became king in 1040, securing the throne by murdering Duncan. He reigned for 17 years, and was killed during a battle with Duncan's son, Malcolm, and his English ally Siward, Earl of Northumbria. The story as told in Holinshed's *Chronicle* is the basis of one of Shakespeare's greatest tragedies.

MacBey James Scottish painter and etcher. Born at Newburgh, Aberdeenshire, Dec 23, 1883, he entered a bank at 15, but studied art privately, and began etching at 17. His first exhibition was in London in 1911. He has made etchings of Scotland, Wales, Holland, Spain, Venice, Morocco and France, and 1917-18 was official artist to the Egyptian Expeditionary Force.

Maccabees Jewish family distinguished in the revolt against Syrian tyranny, 2nd century B.C. Attempts under Antiochus Epiphanes to establish pagan altars in Palestine were forcibly resisted by Mattathias, an aged priest of the Hasmonean family, who fled to the mountains with his five sons John, Simon, Judas, Eleazar and Jonathan, 168 B.C. After his death the war was continued under his son, Judas Maccabaeus, whose name "hammer," came to designate the family. After protracted struggles he retook Jerusalem, restored the Temple service and was slain in battle 161 B.C. The revolt ended in a Jewish monarchy under Roman sanction. The Old Testament Apocrypha include two historical books on this period, 1 and 2 Maccabees. See HYRCANUS I.

McCardie Henry Alfred British Judge. Born in Edgbaston July 18, 1869, he was called to the Bar in 1894, and in 1916 became a Bencher of the Middle Temple

and a Judge of the High Court. His advanced views and outspoken comment on social affairs made the "bachelor judge" a famous figure. He died in 1933.

McCarthy Lillah English actress. She was born at Cheltenham, Sept 22, 1875, and educated there. She has played leading parts in England, Australia and the United States with Wilson Barrett and in Shaw plays between 1905-08. She assumed management of the Little Theatre in 1911, playing Margaret Knorr in *Fanny's First Play*, and later played with Sir Herbert Beerhohn Tree and Sir Martin Harvey. She became manager of the Kingsway Theatre in 1912 and 1919 and produced plays by Eden Phillpotts and Arnold Bennett, afterwards playing with Matheson Lang in *The Wand'ring Jew*. In 1920 she married Sir F. W. Kobbe.

Macclesfield Borough and market town of Cheshire. It stands on the little river Bollin, 18 m from Manchester and 166 from London, on the L.M.S. Rly. A canal connects the town with the Grand Union system. The chief industry is the manufacture of silk. Pop. (1931) 34,902.

McClintock Sir Francis Leopold British sailor. He was born at Dundalk on July 8, 1819, and entered the navy in 1831. For tracing of the fate of Sir John Franklin's expedition to the Polar Regions he was knighted in 1860. He wrote *The Fate of Sir John Franklin*. He later sounded the North Atlantic for the electric cable and was created a K.C.B. in 1891. He died Nov 17, 1907.

McCormack John Irish vocalist. Born at Athlone, June 14, 1884, he was educated in Dublin, where he sang in the choir of the Roman Catholic cathedral. He then went to Milan for study, and in 1907 appeared for the first time in opera in London. Possessing a beautiful tenor voice, he sang for several seasons at Covent Garden, also in concerts in London, New York, Naples, Melbourne and elsewhere. His singing of Irish folk songs was also noteworthy. In 1917 he became an American citizen, and in 1924 the pope made him a count and an official at the papal court.

Maccunn Hamish Scottish composer. Born at Greenock, March 22, 1868, he studied music in London. From 1888-94 he was Professor of Harmony at the Royal Academy of Music, London. His works include the operas *Jeanie Deans* and *Diarmaid*, some cantatas and the popular overture *Land of the Mountain and the Flood*. Maccunn died Aug 2, 1916.

Macdonald Name of a famous Scottish clan. They were powerful in Argyllshire and the Islands in the 12th century, or earlier, and claimed the position of honour on the right in battle. Their chieftain was the Lord of the Isles. Later Macdonalds settled in other parts of Scotland and there were Macdonalds of Glencoe and other branches.

Macdonald Flora Scottish heroine. She was born in 1722 and came into notice in 1746. In that year Prince Charles Edward escaped to the Hebrides after Culloden. Flora secured a passport for herself and her servants, one of whom was the disguised prince, and succeeded in taking him to Portree and so enabling him to escape to France. She was later put in prison, but was released in 1747. In 1750 she married

Allan Macdonald, and went with him to America where he served in the British Army against the colonists. She came home in 1779, and died at Kingsburgh, March 5, 1790.

MacDonald George Scottish writer. Born Dec 10, 1824, at Huntly, Aberdeenshire, he was educated at the University of Aberdeen, and was minister at Arundel and Manchester. For reasons of health he soon gave up the ministry and devoted himself to writing and lecturing. He lived a good deal at Bordighera, but died at Ashted, Surrey, Sept 18, 1905.

MacDonald was a popular author, although the dialect in his novels makes them irksome to some readers. They include *David Elmhirst*, *Alec Forbes of Howglen*, *Robert Falconer*, *The Marquess of Lossie*, *Sir Gubbie and Salted with Fire*, and reflect Scottish life and ideas of the time. For children, with almost equal success, he wrote *At the Back of the North Wind* and *The Princess and the Goblin*. His many poems include *Where do you come from, baby dear*, and the *Diary of an Old Soul*.

MacDonald James Ramsay British politician. He was born at Lossiemouth in humble circumstances, Oct. 12, 1866, and educated at the elementary school there. Settling in London he worked as a clerk and then as a journalist. He became identified with the Fabian Society and the Labour Party and was soon an influential member of the group that inspired this movement. He edited *The Socialist Review* and wrote a good deal on Socialism. In 1900 he was made Secretary of the Labour Party, a post he held for twelve years, and for the next twelve he was its treasurer. From 1900 to 1904 he was a member of the London County Council.

In 1895 MacDonald stood for Parliament for Southampton, but failed to secure election, as he did at Leicester in 1901. In 1906 he was returned for Leicester and he held the seat until 1918 when, owing to his pacifist ideas during the Great War, he was defeated. He was absent from Parliament until 1922, when he was returned for the Aberavon division of Glamorganshire, a seat which he exchanged in 1929 for the Seaham Harbour division of Durham.

Having been from 1906 to 1909 Chairman of the Independent Labour Party, MacDonald was, in 1911, chosen leader of the Labour Party in the House of Commons. He held this position until 1914, and returned to it in 1922, when the Labour Party was the official opposition in Parliament. As leader he was called upon in Jan 1924, to form a ministry and he became the first Labour Prime Minister in Great Britain. He also filled the office of Foreign Secretary until the ministry fell before the end of the year. Having been leader of the Opposition for a period of nearly five years, he was called upon, after the general election of 1929, to form the second Labour Ministry. This was in office under his premiership until a financial crisis led to its break-up in Aug 1931. With a few colleagues and followers MacDonald acted with the other two political parties and a National Government was formed, with himself as premier. This was confirmed in office when the general election of Oct 1931, sent an immense majority to its support in the House of Commons. MacDonald himself won a signal victory at Seaham over a Socialist opponent. In 1932

he underwent two operations on his eyes, but was able to preside over the Lausanne conference in July.

In June 1935 for reasons of health he resigned the premiership in favour of Mr Stanley Baldwin and took over the Lord Presidency of the Council. Defeated at Seaham Harbour at the General Election of Nov, 1935, he was elected to represent the Scottish Universities in Feb 1936 retaining his Cabinet post.

MacDonald has travelled very widely and is a man of considerable culture. His books include *Socialism and Society*, *Labour and the Empire*, *The Awakening of India*, *The Socialist Movement*, *Parliament and Revolution*, *Wanderings and Excursions*, and a *Memoir* of his wife. In 1912-14 he was a member of the royal commission that inquired into the public services of India, and he has received numerous academic and other honours.

MacDonald married, in 1896, Margaret Ethol, daughter of J. H. Gladstone, the eminent scientist, a woman of unusual gifts. She died in 1911, leaving five children. One son, Malcolm, was returned as MP for the Bassetlaw division in 1929 and again in 1931. In 1931 he was appointed Under Secretary for the Colonies and in June, 1935, Secretary of State for the Dominions. Though defeated in the Election of Nov, 1935, he was returned for Ross and Cromarty in Feb, 1936, and continued in office.

Macdonald Sir John Alexander Canadian statesman. Born in Glasgow, Jan 11, 1815, he went to Canada as a child, his parents settling at Kingston. In 1836 he became a barrister and was elected to the legislature of Ontario in 1844, becoming prominent as a politician. In 1856 he was made Premier of Ontario and Attorney-General and he was the leader of those who worked for the confederation of Canada. When, in 1867, the Dominions came into being, Macdonald was selected as the first Prime Minister. He retained this office until 1873 and returned to it in 1878 remaining Prime Minister until his death at Ottawa, June 6, 1891.

Macdonald, the leader of the Conservative Party, was responsible for enlarging the federation by adding British Columbia to it. He was knighted in 1867, and on his death his widow was made a baroness. His residence, Earncliffe, Ottawa, is now public property.

Macduff Thane of Fife. He is said to have lived in the 11th century and to have taken part in the rising against Macbeth. He appears in Shakespeare's plays.

Macduff Burgh, market town and seaport of Scotland. It stands at the mouth of the river Deveron, 50 m from Aberdeen, on the LMS Rly. There is a modern harbour for the shipping and the fishing. Pop (1931) 3276.

The eldest son of the Duchess of Fife is called the Earl of Macduff.

Mace Spice prepared from the fleshy covering of the nutmeg. It is dried in the sun and possesses aromatic properties, which render it of use for flavouring.

Mace Staff with a massive head, formerly a weapon of war but now used as a symbol of authority. In early times its use as a weapon was allowed to medieval clerics who were forbidden to shed blood by the sword. As it came into ceremonial use it became more ornate and was often richly decorated. In the House of Commons the mace is laid on the table while the Speaker is in the chair.

Macedonia Territory in the Balkan Peninsula. It stretches from the western frontier of Bulgaria to the Gulf of Salonika.

Western Macedonia is mountainous and contains three large lakes, Ochrida, Prespa and Ostrovo. Eastern Macedonia has two valleys, watered by the rivers Varda and Struma. Agriculture is the chief occupation, and there is much iron ore and magnesite, so far scarcely developed. The chief towns are Salonika, Monastir, Uskub and Adrianople. Agriculture is the staple industry.

Macedonia became strong after 359 B.C. under Philip and Alexander the Great and held sway over the rest of Greece until conquered by Rome in 168 B.C. Peopled later by Slavonic races, it was part of the Bulgarian empire from 800-1000 and after a hundred years of Serbian rule, fell to the Turks in 1689. From 1875 there were constant revolts of the Christian Bulgarians against the Turks, culminating in a great massacre in 1903.

Macedonia was a field of battle during the Balkan wars and after 1913 was divided between Greece and Serbia, but when the World War broke out in 1914, Allied troops were sent to Salonika, and Bulgaria being eventually defeated, Macedonia was divided after 1919 between Greece and Yugoslavia.

McEvoy Ambrose English portrait painter. Born at Crudwilt, Wiltshire, Aug. 12, 1878, he was encouraged by his father to take up art and entered the Slade School in 1893. He became friendly with Augustus John, and soon gained a reputation for clever portraits in line and wash, and became a fashionable portrait painter. He was elected A.R.A. in 1924, and died Jan. 4, 1927.

Macfarren Sir George Alexander British musician. Born in London, March 2, 1813, he was the son of George Macfarren, a writer of plays. He studied at the Royal Academy of Music where in 1837, he was made professor. In 1875 he was made principal of the college, and he was also Professor of Music at Cambridge but he was perhaps better known as the conductor of the orchestra at Covent Garden Theatre from 1845 to 1875. In 1883 he was knighted, and he died Oct. 31, 1887. Macfarren composed many operas, several cantatas and oratorios as well as many other pieces. He wrote books on harmony and other subjects. In 1865 he became blind.

Macgill Patrick. Irish novelist and poet. He was born in Donegal in 1890, and was educated at a mountain school. He worked between the ages of 12 and 19 about the farm and as a navvy, and joined the staff of the *Daily Express* in 1911. He served in the British Army during the Great War. His books include *Songs of a Navvy*, *Songs of the Dead End*, *The Great Push*, *Soldier Songs*, *Glenmoran*, *Moleskin Joe* (a play), *Fear and Suspense* (a play produced in London in 1930).

McGill University University in Canada. It was founded at Montreal by money left by James McGill and dates from 1821. Since then it has had other benefactors including Lord Strathcona. The university has a fine range of buildings on Mount Royal at Montreal and facilities in the shape of laboratories, libraries etc. for every branch of study. There are residential halls and several theological and other colleges are affiliated

to the university. It is open to women equally with men.

Macgillicuddy's Reeks Chain of mountains in Co. Kerry, Irish Free State. Carruntuohill (3414 ft.), the highest of the range, is also the highest peak in Ireland.

Machiavelli Niccolo Italian writer. He was born in Florence May 3, 1469, his father being a lawyer. He entered the service of the city and from 1498 to 1512 occupied a high position being sent on several missions to foreign rulers. In 1512, on the return of the Medici to power, he lost his position and was for a short time in prison. He then went to live in the country, and remained there until his death, June 20, 1527. He was buried in Santa Croce, Florence.

Machiavelli's masterpiece dedicated to Lorenzo the Magnificent is *Il Principe* or *The Prince* one of the world's great manuals of statecraft. It is based on the theory that the ruler, or prince, is justified in taking any steps that will maintain his supremacy. The state under his control is neither moral nor immoral. It acts without regard to morality, and thus the ruler may if necessary, resort to deceit and treachery. He also wrote *A History of Florence*, *The Art of War* and *Discourses on the First Decade of Titus Livius*.

Machicolation Series of corbels or the parapet or battlements in mediaeval castles or fortifications. Openings between the corbels were left in the overhanging stone floor of the rampart to allow of the discharge of missiles upon an attacking force.

Machine Gun Firearm provided with a mechanism for the rapid discharge of rifle bullets or small shells. The mechanism increases the rapidity of charging, the firing and the ejection of spent cartridges.

In the mitrailleuse type, the gun was worked by turning a handle the Gatling gun by means of a crank, the Nordenfeli by a lever action, the Gardner by use of a winch. In the Maxim gun automatic action was introduced, a spring recoil being used, and a similar action is seen in the Vickers type. The Hotchkiss gun is worked by the action of the propellant gases upon a piston mechanism.

In 1915 a Machine Gun Corps was formed. It was divided into four branches: Infantry, cavalry, heavy and motor. In 1919 a school for training officers was opened at Sleaford, but in 1921 the corps was disbanded. There is a memorial at Folkestone to those of its members who fell in the Great War. Machine gun detachments are now attached to each battalion of Infantry.

Machynlleth Urban district and market town of Montgomeryshire. It stands near the Dovey, 21 m. from Aberystwyth, on the G.W. Rly. It is visited by tourists and for the fishing. Pop. (1931) 1892.

Mackail John William. British scholar. Born in 1859, he was educated at Balliol College, Oxford, and became an Inspector under the Board of Education. His works include a fine verse translation of Homer's *Odyssey*, a valuable primer on *Latin Literature*, *Lectures on Greek Poetry* and *Lectures on Poetry*. He edited *Select Epigrams from the Greek Anthology*, and wrote lives of

William Morris and George Wyndham. He was Professor of Poetry at Oxford 1906-11. In 1932 he was chosen president of the British Academy.

Mackall married Margaret, daughter of Sir E. Burne-Jones, and their son, Denis George Mackall, won fame by his humorous stories. These include *Bill the Bachelor*, *According to Gibson*, *Greenery Street*, *How Amusing*, *The Square Circle* and *David's Day*. He was born June 3, 1892, and was educated at St Paul's School and Balliol College, Oxford.

Mackay Town and seaport of Queensland. It stands on the coast, at the mouth of the river Pioneer, 625 m. to the N.W. of Brisbane. It has a fine modern harbour, and from it much of the produce of the state is exported. Pop (1931) 9230.

McKenna Reginald English financier. Born in London, July 6, 1863, he was educated at King's College, London, and Trinity Hall, Cambridge. He rowed against Oxford in 1887. He was called to the bar in 1887, but soon turned his attention to politics, and was elected Liberal M.P. for N. Monmouthshire in 1895. In 1905 he was appointed Financial Secretary to the Treasury. From 1907-08 he was President of the Board of Education, from 1908-11, First Lord of the Admiralty, from 1911-15, Home Secretary, and in 1915-16 Chancellor of the Exchequer. He introduced the war loan of 1915 and was responsible for the duties on certain imports called the McKenna Duties. He lost his seat in Parliament in 1918, and in 1919 was made Chairman of the Midland Bank, assisting the Government in an advisory capacity on several occasions.

McKenna Stephen British novelist. Born Feb. 27, 1885, he was educated at Westminster School and Christ Church, Oxford. From 1915-19 he served in the War Trade Intelligence Department, visiting the U.S.A. in 1917. The first of his many novels, *The Reluctant Lover*, appeared in 1912. Others include *Sonia*, 1917, *Midas & Son*, 1919, *Indication*, 1923, *An Affair of Honour*, 1925, *The Secretary of State*, 1927, and *The Datchley Inheritance*, 1929. In 1932 appeared *The Way of the Phoenix*.

Mackennal Sir Bertram Australian sculptor. Born in Melbourne in 1863, he was educated in Australia afterwards studying art in Paris. His work soon attracted attention, and he was selected to carve several statues of Queen Victoria and later to design the coinage issued after the accession of George V. His other work includes memorials to Edward VII. in St George's Chapel, Windsor, and elsewhere, and the national memorial to T. Gainsborough. In 1909 Mackennal was made A.R.A., and in 1922 R.A. He was knighted in 1921 and died Oct. 10, 1931.

Mackensen August von German soldier. Born in Saxony, Aug. 6, 1849, he was educated at Torgau and Halle and entered the Saxon Army in 1869. After this became part of the army of the new empire in 1871 he rose rapidly in rank, becoming, in 1908, head of an army corps. He came into notice by his services against the Russians, and for his work on the E. front in 1914-15 was made a field marshal. He led the armies that conquered Serbia and later crushed Rumania, for the administration of

which he was responsible until Nov., 1918. For a time he was interned, but in 1919 he was allowed to return to Germany.

Mackenzie River of Canada. Rising near Mt. Brown in British Columbia, for the first 680 m. it is the Athabasca from Lake Athabasca and the Great Slave Lake for about 600 m. It is the Great Slave River, with the Peace and the Finlay as its tributaries. The Mackenzie River proper flows from Great Slave Lake to Mackenzie Bay in the Arctic Ocean. It is 1000 m. long.

One of the districts of the N.W. Territories is called the Mackenzie. It covers over 560,000 sq. m., reaching from British Columbia to the Arctic Ocean.

Mackenzie Sir Alexander Scottish explorer. Born about 1755 in Inverness, he went to Canada in the service of one of the trading companies in 1779. For the next 20 years he did a great deal of exploring. He found the mouth of the river named after him, the Mackenzie. He crossed the Rocky Mts. to the Pacific coast and journeyed along the St. Lawrence. In 1801 he published an account of his travels. Knighted in 1802, he died March 11, 1820.

Mackenzie Compton British author. He was born at West Hartlepool, January 17, 1883, and was educated at St Paul's School, London, and at Oxford. He served in the South African and Great Wars, and directed the Aegean Intelligence Service with great distinction in 1917.

He has written *The Passionate Elopement*, 1911, *Carnival*, 1912, *Sinister Street*, 1913-14, *Poor Relations*, 1919, *Rich Relatives*, 1921, *Rogues and Vagabonds*, 1927, *Gallipoli Memories*, 1929, *More Athenian Memories*, 1932 and three plays. In 1933 he published *Reaped and Bound*, a volume of essays, and *Literature in My Time*, the first of a series of books on current activities by authoritative writers. He was elected Rector of Glasgow University in 1932.

Mackenzie Sir Morell British surgeon. Born at Leytonstone, July 7, 1837, he was educated in London and studied at the London Hospital, in Paris and in Vienna. He won a prize for an essay on diseases of the larynx and soon became one of the leading specialists in that branch of surgery. He was one of the founders of the Hospital for the Throat, was one of the first to use the laryngoscope and wrote a standard book, *Diseases of the Throat and Nose*. To the general public he became known in 1887 when he was consulted by the Crown Prince of Germany, later the Emperor Frederick, on whom he wrote a book, *Frederick the Noble*. Knighted in 1887, he died Feb. 3, 1892.

Mackenzie William Lyon Scotsman and Canadian politician. He was born in Angus, March 12, 1795, and in 1820 settled in Canada. He made his home in Toronto, where, in 1824, he started *The Colonial Advocate*. In 1834 he secured a seat in the legislature and, as the leader of an influential party, declared for a republic. He took part in the rising that broke out in 1837 and when this was crushed, escaped to the United States where he was arrested and imprisoned. In 1849 he was allowed to go back to Canada and was re-elected to the legislature. He died Aug. 29, 1861.

Mackerel Marine food-fish related to the tunny, abundant in the N. Atlantic (*Scomber scombrus*). The slightly compressed body, commonly 10-12 in. long,

rising to 18 in, mostly covered with minute scales, is black-barred, bluish-green above and silvery beneath. Shoals move between the open sea and coastal water, and are mostly taken in drift nets, especially off Cornwall and the E. coast of Britain, in May-June and Sept-Oct. The Spanish mackerel, *S. colias*, differs in being big eyed, with larger scales, and an air bladder.

McKinley William American president. Born in Ohio, Jan 29 1843, he was educated to become a lawyer. After serving in the Civil War, he practised law at Canton. In 1877 he was sent to Congress by the electors of Ohio, and he had a good deal to do with the introduction of the high tariff of 1890, sometimes called the McKinley Tariff. In 1896 he was the Republican candidate for the presidency and he succeeded in defeating W. J. Bryan, who advocated bimetallism. There was another contest between them in 1900 and again McKinley was the victor. During his first term of office the war with Spain took place, his second had only just begun when he was shot by an anarchist at Buffalo Sept. 6, 1901. He died on the 14th, when Roosevelt became president.

Mackintosh Sir James Scottish writer. Born, Oct. 24, 1765, he was educated for the medical profession in Aberdeen and Edinburgh, but he settled in London and became a barrister. He became known by his *Vindiciae Gallicae*, a defence of the French Revolution, written in answer to Burke, which won for him the honour of French citizenship. In 1804 he went out to Bombay as a judge and in 1813, after his return to England, was elected M.P. for Nairn and made Professor of Law at the East India College, Haileybury. From 1830-32 he was a member of the Board of Control for India. He died May 22 1832.

Maclaren Archibald Campbell English cricketer. Born in Manchester, Dec. 1, 1871, he was educated at Eistree and Harrow. For four years he played cricket for Harrow against Eton and in 1891 he was made captain of the Lancashire county team. For the next 20 years or so he was one of the outstanding figures in the game, a superb batsman and fieldsman and a captain of unusual discernment. He played many times in test matches in England and Australia and was captain of the English team at home in 1899, 1902 and 1909 and in Australia in 1897-98 and 1901-02. In 1895 he scored 424 runs at Taunton the highest score in first class cricket. He wrote *Cricket, Old and New*, 1924.

Maclaren Ian Name taken by the Scottish writer, Rev John Maclaren Watson. Born at Manningtree, Essex, Nov. 3, 1850, he was educated at Stirling and in Edinburgh. He became a minister of the Free Church of Scotland in 1874, his first church being in Edinburgh. He was at Logiealmond and in Glasgow before becoming minister of the infant school church in Sefton Park, Liverpool, where he was from 1880 until just before his death, May 6, 1907.

As Ian Maclaren, he wrote in 1894 some sketches of Scottish life called *Beside the Bonnie Brigs Bush*. The book had an extraordinary success and was followed by others including *The Days of Auld Lang Syne* and *Kate Carnegie*. He also wrote *The Mind of the Master* and other theological books.

Maclean Sir Donald Scottish politician. Born in Tieve, he became a

solicitor in London. In 1906 he entered the House of Commons as Liberal M.P. for Bath. From 1910-18 he represented the counties of Peebles and Selkirk and from 1918 to 1922 Peebles and Midlothian. In 1929 and 1931 he was elected for a division of Cornwall. From 1911 to 1916 he was Deputy Chairman of Committees and in 1917 he was knighted. In 1919 Mr Asquith, having lost his seat, Sir Donald was chosen the leader of the Liberal group in Parliament, a position he retained until 1922. In Aug 1931 he joined the National Government as President of the Board of Education. He died suddenly, June 15, 1932.

MacLeod Norman Scottish writer and preacher. Born at Campbeltown, Argyllshire, June 3, 1812 and educated for the ministry, his first churches were at Londoun and Dalkeith. From 1851 till his death, June 16, 1872 he was minister of the Barony Church, Glasgow and author of the popular *Reminiscences of a Highland Parish*, 1867. He edited *Good Words* from 1860 to 1872 and was a friend of Queen Victoria.

MacLise Daniel British painter. Born in Cork, the son of a Highland soldier, Jan 25, 1806, he became a clerk in a bank there. He soon left this to study art and showed such promise that he was helped to study in London. He was elected A.R.A. in 1835 and R.A. in 1840 and in 1866 was offered the presidency of the Royal Academy. He died in Chelsea, April 1 1870.

MacLise's great pictures include "The Banquet Scene in Macbeth," "The Ghost Scene in Hamlet," in the Tate Gallery. "Snap Apple Night," "Caxton's Printing Office," "Malvolio and the Countess" and "Shakespeare's Seven Ages." He helped to decorate the House of Lords painted a portrait of his friend, Charles Dickens and illustrated books.

Macmahon Marie Edmé Patrice Maurice French soldier. He was born June 13, 1808, being descended from an Irish soldier who had settled in France after 1688. He served in Algiers and in the Crimean and was head of the army that in 1864, defeated the Austrians at Magenta, after which he was made a Marshal and a Duke and appointed Governor General of Algeria. He returned home in 1870 to command an army corps in the war with Prussia. At Worth he was defeated and at Sedan he was made prisoner. After his release he put down the Commune and established the authority of the republic. This led, in 1873, to his election as president. His actions aroused a good deal of hostility and in 1879 he resigned. He died Oct. 17, 1893.

McNeill James Irish politician. Born Aug 27, 1809, in Co Antrim, he was educated at Blackrock College, Dublin and at Emmanuel College, Cambridge. In 1890 he won a position in the Indian Civil Service and he remained in India until 1921. Returning to Ireland he was made Chairman of the Dublin County Council and took part in drawing up the constitution of the Irish Free State. From 1923 to 1927 McNeill was High Commissioner for the Free State in London, and in 1928 he was made Governor General.

Mâcon City of France. It stands on the Saône, 45 miles from Lyons, and is the capital of a department. The city gives its name to a popular variety of Burgundy. Pop (1931) 18,495.

Macquarie River of New South Wales, Australia. It is formed by a union of the Fish and the Campbell rivers and flows through New South Wales for about 350 m until it joins the Darling. It waters a rich agricultural district and on its banks are Bathurst and Wellington.

An island in the South Pacific also bears this name. It belongs to New Zealand and on it is a meteorological station. Its area is 170 sq m.

Macquarie Bay is on the west coast of Tasmania. It forms a good harbour.

Macramé Trimming made by knotting together long fringe-threads into geometrical patterns. Presumably of Arabian origin, it reached Moorish Spain, where "Morisco fringes" are still made, and N Italy, whose knotted lace experienced a 19th-century revival of fashion in macramé lace, for wedding gifts in Latin America and for recreative lace making in Victorian England.

Macready William Charles, English actor. Born in London, March 3, 1793, and educated for the law, he took to the stage and made a great reputation in Shakespearean parts. Other successes were won with Helen Faucit in Lytton's plays, *The Lady of Lyons* and *Richieu*. From 1837-39 he was manager of Covent Garden from 1839-41 of the Haymarket and from 1841-43 of Drury Lane. He went three times to the United States. In 1851 he retired, and he died at Cheltenham, April 27, 1873, leaving some interesting diaries.

His son, Sir Cecil Frederick Nevil Macready, was a soldier with a long record of active service. In 1918-20 he was commissioner of the metropolitan police and in 1920-22 he was in command of the troops in Ireland.

Macrinus Roman emperor whose full name was Marcus Opellius Severus. Born in 164, he became an officer of the Praetorian Guard and, having induced the soldiers to murder Caracalla, was proclaimed emperor in 217. He made war on Parthia, but this being unsuccessful, the soldiers turned on him and he was put to death in 218.

MacWhirter John, Scottish artist. He was born near Edinburgh in 1839 and studied art at the Edinburgh School of Design. He exhibited at the Royal Scottish Academy and, was elected as Associate in 1864, also at the Royal Academy, becoming R.A. in 1893. MacWhirter was chiefly a landscape painter, many of his works being studies of scenery in the Highlands and in Italy. He was the author of *Landscape Painting in Water Colours*. He died Jan 28, 1911.

Madagascar Island in the Indian Ocean. It has a tropical climate, high mountains (Amboro, 9490 ft.), large rivers flowing west, extensive lakes and valuable forests and minerals.

The natives are of Melanesian and Polynesian stock. Education is compulsory from 8 to 14. The chief industry is agricultural and the chief towns are Antananarivo in the highlands and Tamatave on the east coast. Madagascar became a French possession in Jan., 1896, the last native sovereign being Ranavalona III (1861-1916). The area is about 241,094 sq m and the pop. (1931) 3,701,770, of whom some 23,076 are French and 13,460 foreigners.

Madden Sir Charles Edward, British admiral. Fourth Sea Lord of the Admiralty (1910-11), he served in the

Battle of Jutland in 1916, and was mentioned in despatches. He was Admiral of the Fleet in 1924, and First Sea Lord of the Admiralty (1927-30) retiring in 1930. He was created a baronet in 1919, and awarded the O.M. in 1931. He also holds many foreign decorations. He died June, 1935.

Madder Pigment obtained from the roots of the madder plant, *Rubia tinctorum*. This is a perennial plant, growing in Southern Europe and Asia Minor. Formerly it was the source of the dyestuff, turkev red, replaced now by alizarin derivatives. Madder forms a series of richly-coloured, transparent lakes used as water colours.

Madeira Island group in the North Atlantic Ocean belonging to Portugal. The principal island, which gives its name to the group, is a favourite health resort, mountainous and fertile, producing wine, sugar and fruit.

The chief town is Funchal, the shipping centre, and a seat of a Roman Catholic bishopric. Pop. (1930) 210,220.

Madeira River of South America, a tributary of the Amazon. It is formed by a union of the Mamoré and the Beni and flows for 900 m until it falls into the Amazon near Manaos. The greater part of its course is navigable. It is about 2 m wide where it joins the Amazon.

Madison James, American president. Born in Virginia, March 16, 1751, he became a member of the legislature and helped to frame the American constitution. At first he acted with Alexander Hamilton, but later adopted the views of Hamilton's opponents and with Jefferson tried to limit the power of the central government. When, in 1801, Jefferson became president, Madison was made Secretary of State and held that post until 1809. He was then elected president, was re-elected in 1812, retired in 1817, and died June 28, 1836.

Madoc Second son of Owen Gwynedd, Prince of Wales. According to a 15th-century Welsh poem, after disputes over the succession to the Welsh crown, he sailed westward with ten ships. In Tudor days the legend arose that he had discovered America; this, unsupported by evidence, is the theme of Southey's poem, *Madoc*, 1805.

Madonna Italian word, "my lady," specifically reserved to denote the Virgin Mary when represented in art. Representations in 3rd-century catacombs inaugurated a practice to which artists have devoted their highest powers in all ages. Madonnas occur as paintings on canvas, wood and fresco, works in mosaic, or sculptures in wood, ivory, metal and stone. Of the many madonnas painted by the great Italian artists, pride of place is usually given to Raphael's Sistine Madonna, now in Dresden. See LILY.

Madras Capital of Madras Presidency and chief port on the east coast of India. It extends for 9 miles along the coast, and for 4 miles inland, and was founded in 1640 by the East India Company. There are cotton mills, iron foundries, engineering works and cigar factories, hides, cotton and oil seeds are exported, and timber, coal, grain and machinery are imported. Pop. (1931) 647,230, mostly Hindus.

Madras Presidency of British India. Occupying the entire south of the Indian peninsula, it is divided into the high interior tableland, the long, broad east coast,

sit in the London police courts and in certain large towns, such as Birmingham. They can sit alone as they have the powers of two ordinary magistrates. They must be barristers of at least seven years' standing.

Magna Carta Charter of privileges signed by King John at Runnymede, near Staines, June 15, 1215. He was forced to sign it by the barons led by the Archbishop of Canterbury, Stephen Langton. It was a statement of the laws or customs of the land and was confirmed by Henry III and Edward, but with some of its most important clauses left out.

Magnesia Name given to magnesium oxide. This is a white, bulky powder formed when magnesium is burned in air, or when the carbonate is calcined. It is used in medicine, and in making crucibles, cupsels and firebricks.

The carbonate, or a mixture of the carbonate and hydroxide, used in pharmacy, is termed *magnesia alba*.

Magnesite Mineral consisting of magnesium carbonate and occurring in massive fibrous or granular form. Its colour varies from white, grayish white to brown, and it is associated usually with serpentine and allied rocks occurring in Silesia, Norway and North America. Magnesite is used in preparing Epsom Salts, and in paint, paper, and firebrick manufacture.

Magnesium Metallic element having the symbol Mg, atomic weight, 24.32, and melting point 651°C. Its compounds, chiefly the carbonate, are distributed widely as magnesian limestone, dolomite and magnesite. It is extracted chiefly by electrolysis of the fused chlorides from the mineral carnallite in Prussian Saxony. Magnesium is a white metal burning with a dazzling white light when heated to redness in air. In ribbon, wire or powder it is used in photography and pyrotechny, and with aluminium forms a valuable alloy, *magnallum*.

Magnet Substance having the property of attracting iron, and in a lesser degree, nickel and certain other metals. This attractive property was observed first in the lodestone or magnetite, an oxide of iron.

A permanent magnet is a straight or horse shoe shaped steel bar magnetised by contact with a similar magnet or an electro magnet, the latter consisting of a soft iron bar surrounded by insulated wire coils and then temporarily magnetised by an electric current.

Electro-magnets, which can lift many times their own weight, are widely used in industry, particularly for handling such materials as scrap iron. Their lifting power is determined by the number of ampere turns, the strength of the current employed, multiplied by the number of turns in the coils.

Magnetic Poles Areas on the earth's surface to which the mariner's compass points. They do not coincide with the geographical poles, north being found about 97° W 70° N, south estimated about 155° 16' E, 17° 25' S. They are subject to regular seasonal variations and to sudden irregular "magnetic storms".

Magnetism Form of energy exhibited in iron and a few other metals. The study of magnetic forces constitutes the science of magnetism. It invariably has a directive character. A bar magnet freely suspended and rotating about a

vertical axis, tends to come to rest in a definite position, that is, approximately north and south. It is found also that the north poles of two magnets repel each other, and the same is true of the south poles. When iron filings are sprinkled upon the poles of a horse shoe magnet they become magnetised and arrange themselves in curved "lines of force".

The earth has the properties of a magnet, with poles lying near the ends of its rotational axis. Lines of force are not regular on the surface, the necessary corrections to compass observations are taken from charts issued for practically all parts of the world.

Magnetite Black mineral with metallic lustre. It consists of the magnetic oxide of iron containing when pure, about 72.5 per cent of iron. It occurs in veins and beds in schists and other metamorphic rocks, also in the form of magnetic iron sands. Magnetite, the lodestone of the ancients, is a natural magnet.

Magneto Machine or generator for converting mechanical energy into electrical energy by the rotation of an armature in the magnetic field of a horseshoe magnet. Magneto's are used for the production of an electric spark for ignition purposes in internal combustion engines.

A magneto consists essentially of two coils of wire, primary and secondary, wound upon a core of soft iron, and rotated between the poles of a magnet. The current in the primary coil is regularly interrupted by the action of a contact breaker, inducing in the secondary coil a current which passes across the electrodes of the sparking plug producing a spark.

Magnificat Opening word of the Latin canticle, translated as *My Soul Doth Magnify the Lord* in the Book of Common Prayer. It is taken from St. Luke's Gospel (1:46-55) and has been used since the 6th century in Christian churches.

Magnolia Genus of hardy and half-hardy trees and shrubs related to the tulip tree. They are indigenous to subtropical Asia and N. America, bearing large, fragrant, solitary flowers. The earliest to reach Britain was the American evergreen shrub *M. glauca*, introduced in 1688. During the 18th century several others came from both east and west, including the handsome American holly bay, *M. grandiflora* 70 ft. high, from whose seeds the free flowering Exmouth variety was established, and the Chinese yulan, *M. conspicua*, of which there is a purple tinged, double flowered variety.

Magpie Genus of perching birds of the crow family (picæ). Stout-beaked, lustrous black, relieved by white on wings and breast, the common *P. pica*, 18 in. long, is wary when wild, and a sad thief when domesticated. Massively built nests protect the 6-7 spotted and blotched bluish white eggs.

Magyar Dominant people of the Hungarian republic. Descended from Ahtalan nomadic horsemen of Turkic stock who took Ugric wives and adopted their language, they came westward into the Hungarian plains in the 9th century, assimilated other ethnic elements, entered the Roman Catholic communion in the 11th century, and have preserved their identity against Teutonic and Slavic pressure through their national language and tradition. After the changes of 1919 the republic's population became almost entirely Magyar. See HUNGARY.

Mahabharata Hindu sacred book. first printed in Calcutta, 1834-39, this ancient Indian epic is probably the longest in the world, and is the work of many hands, Vyasa, its supposed author, being undoubtedly a generic name. Its main story describes the conflict between Kurus, spirit of evil, and Pandus, spirit of good.

Mahaffy Sir John Pentland Irish scholar. Born Feb 26, 1839, the son of a clergyman, he went to Trinity College, Dublin. He was made a fellow and from 1869 to 1900 was Professor of Ancient History there. In 1914 he was chosen provost, a post he held until his death, April 30, 1919. He had been in holy orders since 1864 and in 1918 he was knighted.

Mahaffy was known as "the General" because of his knowledge of many subjects. He was an accomplished musician, a good cricketer and a fine shot, as well as a scholar of unusual attainments. He wrote several books on ancient history including *Greek Life and Thought* and *The Empire of the Ptolemies*, and his public positions included the presidency of the Royal Irish Academy.

Mahan Alfred Thayer American historian. He was born Sept 27, 1840, his father being a professor at West Point Military Academy. In 1886 he was chosen President of the Naval War College and he retired from the service in 1896. He died Dec 1, 1914.

Mahan is known for his books on sea power, which attracted world attention. These are, *The Influence of Sea Power on History* (1660-1783), which appeared in 1900, and *The Influence of Sea Power upon the French Revolution and Empire*, 1892. He also published a biography, *Nelson, the Embodiment of the Sea Power of Great Britain*, 1897, and a volume of lectures called *Naval Strategy*, 1911.

Mahatma Sanskrit word, "great-souled," applied by modern Western theosophists to men said to be endowed with preternatural powers acquired by ascetic or astral means. The word became associated by the Indian populace with the Hindu nationalist leader, Mohandas Gandhi (q.v.), because of his asceticism.

Mahdi Name for the messiah expected by the Mahommedans. His coming was first preached in the 10th century and several men since have claimed to be the Mahdi. The best known was Mohamed Ahmed who was horn in the Sudan in 1818. He set out to conquer the Sudan and met with a certain amount of success. He died in 1885 and in 1898 his tomb near Khartoum was destroyed by British troops.

Mah Jongg Chinese gambling game. It is played with 136 counters or tiles, not unlike dominoes. Four players usually take part, but it can be played by two. The tiles are divided into three suits and there are four sets of each. Each player plays for himself and tries to secure the tiles representing the highest score.

Mahogany Compact timber, distinguished as Spanish or Cuban. It is derived from a Central American and W. Indian tree (*Swietenia mahagoni*). Reaching Britain early in the 18th century it acquired favour for domestic furniture, although less esteemed since Victorian times. It is still used for cabinet work and aeroplane propellers. Honduras and Mexican mahogany

come from an allied species, both grow also in India.

Mahomet Founder of Mahommedanism. An Arab, he was born in Mecca about 570, a posthumous child, and soon lost his mother. He lived with an uncle and was employed in looking after camels and sheep, varying this occupation with one or two trading journeys. In 595 he married a wealthy widow and became rich and prosperous.

In 610 Mahomet began to regard himself as chosen by God to preach a new faith. He lived in a cave where he had visions and where, he believed, the angel Gabriel visited him. He denounced idolatry and declared there was only one God, Allah, and that Mahomet was his prophet. His few followers were persecuted, his wife died and he himself, in 622, was obliged to leave the city. He went to Medina, where the new faith was soon firmly established and the movement became a crusade. Mahomet raised an army and soon proved himself a conqueror. He entered Mecca as a victor in 630 and before he died in 632 had subdued all Arabia. He died in Medina, where he was buried. Although married to several wives, including Avesha, he left no son. His savings were collected together to form the Koran which contains the creed of his millions of followers.

Mahommedanism Religion founded by Mahomet. Its adherents are sometimes known as Moslems, or collectively as Islam. When Mahomet died in 632 his faith had a considerable hold on the inhabitants of Arabia and Asia Minor. His successor as caliph was Abu Bekr, who carried on his policy of converting the unbelievers by force. In 654 Mahomet's son-in-law, Ali, became caliph, and the adherents were divided into two great branches, Sunnites and Shites. The latter believed in the right of Ali to succeed, but the Sunnites did not.

During its first two centuries, or thereabouts, Mahommedanism made great progress. It spread into Africa and Europe, where in Spain it has left a great mark. In the 11th and 12th centuries, Asia Minor being almost completely Mahommedan, the faith spread over India. It was accepted by the Turks and inspired them to the conquests which were such a menace to Europe in the 15th, 16th and 17th centuries. In the 18th century they lost ground and at the end of the Great War, Turkey almost ceased to be a European power.

The faith of the Mahommedans is contained in the sentence coined by Mahomet, "There is no God but Allah, and Mahomet is his prophet." Its creed, which in some points is interpreted differently by its two great sects, is contained in the Koran. It enjoins prayer with the face turned to Mecca five times a day, fasting from sunrise to sunset during the month of Ramadan, and a pilgrimage once during a lifetime to Mecca. It places women in a very inferior place compared with men. Its worship is held in mosques which are found in all its cities, some of them being buildings of great splendour.

Its adherents number over 200,000,000, of whom 160,000,000 are in Asia. India contains a large Mahommedan element.

Mahratta See MARATHA

Maiden Castle Earthwork just outside Dorchester.

Dorset It was formed in the neolithic age and covers 160 acres being perhaps the largest of its kind in the country. The hill is 430 ft high and is protected by concentric ramparts of earth.

Maidenhair Fern (*Adiantum*) Large genus of ferns of the polypody tribe, natives of temperate and tropical regions. The common *A. capillus veneris*, whose fronds have spreading hair-like branches, occasionally occurs wild in the west of England, Wales and Ireland. There are several hothouse and greenhouse favourites, mostly preferring damp and shade. Some furnish a sweet syrup called capillaire.

Maidenhair Tree (*Ginkgo biloba*) Tall gymnospermous tree the single species of its genus. It is a native of China and Japan and has beautiful fan-shaped foliage. The golden plum-like fruit borne on the female tree is edible, the male tree bears a catkin-like spike for fertilisation.

Maidenhead Market town and urban district of Berkshire. A popular boating centre on the Thames, it is 24 m from London, on the G.W. Ry. The industries include brewing. Pop. (1931) 17,520.

Maid of Orleans See JOAN OF ARC.

Maidstone County town, borough and market town of Kent. It is on the Medway, 41 m from London on the S. Ry., and the centre of several road services. Here is the former palace of the Archbishops of Canterbury. The industries include the making of agricultural implements, paper, cement and toffee and there is a trade in hops and farm produce. It is also a military centre. Pop. (1931) 42,259.

Main River of Germany. It rises in the mountains in the east of the country and flows for some 300 m to Mainz where it joins the Rhine. On its way Frankfurt, Nuremberg, Würzburg and other places and most of its course is navigable. The Saale and the Regnitz are tributaries and a canal unites it with the Danube.

A small river of Co. Antrim, Northern Ireland, is called the Main. It is 30 m long and flows into Lough Neagh.

Maine Province of France before the Revolution. It lay to the south of Normandy, around the town of Le Mans which was its capital. It had its own counts for a time, but about 1100 became part of the territory ruled by the counts of Anjou, one of whom was Henry II of England. In 1291 it was taken from King John by the King of France and was ruled by counts who were members of the royal family. At the Revolution it was divided into the departments of Sarthe and Mayenne.

Maine State of the United States. In the N.E. of the country, its northern boundary is formed by New Brunswick and it has a long coastline on the Atlantic Ocean. Its land area is 29,895 sq. m. and its interests are chiefly agricultural. The state capital is Augusta but Portland is the largest place. Other towns are Lewiston and Bangor. Pop. (1930) 797,423.

Maine Sir Henry James Sumner, British historian. Born Aug. 15, 1822. He was educated at Christ's Hospital and Cambridge. He was senior classic at Cambridge in 1844 and in 1847 was made regius professor of civil law there. In 1852 he was appointed

reader in jurisprudence at the Inns of Court and in 1862 he went to India as legal member of the viceroy's council. In 1869, on his return to England, he was made professor of comparative jurisprudence at Oxford and in 1877 master of Trinity Hall, Cambridge. In 1871 he was knighted, and was Whewell professor of international law at Cambridge from 1887 until his death at Cannes, Feb. 3, 1888.

Maine wrote books which had a great influence on the study of jurisprudence and are still valuable. The most important is *Ancient Law*, hardly less so are *The Early History of Institutions* and *Early Law and Custom*.

Maintenance Word used in English law. A maintenance order is one which a wife can obtain from a magistrate if her husband fails to support her. The amount varies according to the husband's income, but will not exceed £2 a week, with 16 additional 10s a week for each child under 16. A maintenance order differs from a separation order. See ALIMONY, SEPARATION.

Maintenon Madame de Wife of Louis XIV of France. Françoise d'Aubigné was born Nov. 27, 1635. Her parents being then in prison as Huguenots, she lived in Martinique for a few years, but in 1645 returned to France, and in 1651 she was married to the poet Scarron. He died in 1660 and his widow, forced to earn a living, became governess to the children of Louis XIV and Madame de Montespan. Her wit and beauty attracted the attention of Louis and she became king's mistress about 1678, when she was made a marquise. She retained her position until Louis died in 1715, being for the last 30 years of that time his wife, and exercised a remarkable influence over him. Her last years were passed at St. Cyr, where she died April 15, 1719, leaving behind her a reputation for piety.

Mainz City and river port of Hesse, Darmstadt, Germany. It stands on the Rhine, where that river is joined by the Main, 22 m from Frankfurt. There is a trade along the river and Mainz is a railway junction and has a number of manufactures. The wine trade is important. The cathedral is one of the finest in Germany. The French spelling of the name is Mayence. Pop. 110,000.

In the Middle Ages Mainz was the seat of a bishop and then of an archbishop. He became the primate of Germany and an elector and ruled over an extensive district around the city. The office was abolished in 1803 and the city itself then became part of Hesse.

Maisonneuve City of Quebec, a manufacturing centre, it is on the island of Montreal, and adjoins the city of that name. Maison-neuve is named after Paul de Chomedey, Sieur de Maisonneuve, a French officer who, in 1642, founded the city of Montreal. He was the governor until 1665 and died in 1676.

Maitland Town of New South Wales. Hunter River, 120 m north of Sydney. East Maitland is an important railway junction and an agricultural and colliery centre. At West Maitland are pottery and brick works. Pop. (1931) 11,949.

Maitland Frederic William, English historian. Born May 28, 1850. He was educated at Eton and Trinity College, Cambridge. In 1884 he was made reader in English law at Cambridge and in 1888 Downing professor of laws. He died Dec. 19, 1906.

Maitland's researches into the early history of our laws and institutions marked him out as a scholar of unusual power. His chief works are, *The History of English Law*, written with Sir F. Pollock and the suggestive volume, *Domesday Book and Beyond*. He wrote *Township and Borough* and *Canon Law in England*, and was one of the founders of the Selden Society.

Maiwand Village of Afghanistan. It is 30 m. from Kandahar. Here, on July 27, 1880, a British force was attacked by an army of Afghans who routed the native troops. The retreat was covered by a battalion of the Berkshire Regiment which lost 300 officers and men.

Maize Stout, annual grass. Next in importance to rice as a cereal food, it is probably indigenous to tropical America. Besides enormous crops in the United States, it is raised in Canada, Mexico, Argentina and Brazil, and is naturalised in S. Africa, India, China, S. Europe and Australia. The grain is roasted or boiled, coarsely milled it becomes hominy or polenta, deprived of gluten it yields cornflour. It is also a valuable fodder food, and the leaves furnish green fodder.

The world's production of maize in 1932 was 520,000,000 quarters and is only slightly less than that of wheat.

Majolica Name properly restricted to tin-enamelled pottery of the Italian Renaissance. On its decorative designs were painted and fired. First developed by Luca della Robbia, it reached its zenith when associated with metallic lustre, in emulation of that displayed on Hispano-Moresque ware, which reached 15th century Italy in Majorcan ships, hence the name. Supreme examples were produced at Pesaro, Faenza, Castel Durante, Urbino, Gubbio and other famous 15th-17th century pottery centres. Clever modern imitations abound.

Major Rank in the British army. It is below that of lieutenant-colonel and above that of captain. A major wears a crown as the badge of his rank. In the infantry a major is usually the second in command of a battalion and commands a company.

Major Name meaning greater, applied in music to seconds, thirds, sixths and sevenths. A major semitone is a diatonic semitone and a major triad consists of a note with its major 3rd and perfect fifth above it. A diatonic scale progressing by tones but with 3rd and 4th and 7th and 8th degrees only a semitone apart, is said to be in major mode. The major tone in acoustics is that in the ratio 9:8 and the organ stop major bass is a 16 ft diapason stop.

Majorca Island in the Mediterranean Sea. It is one of the Balearic Islands and belongs to Spain. It is 115 m. from Barcelona and covers 1325 sq. m. The interior is mountainous, but the soil is generally fertile and much fruit is grown including oranges and figs. Wine, glazed pottery, coal and stone are produced. Palma is the capital and there are many small places and good harbours around the coast. There are many wonderful stalactite caves. See BALEARIC ISLANDS.

Major-General Rank in the British army. It is above that of colonel and below that of lieutenant-general. The badge is a sword and baton crossed with a star above. A major-general's usual command is a division.

Majuba Hill Hill of Natal. At the north-eastern end of the Drakenberg Mountains, it is 7000 ft. high. On Feb. 27, 1881, a small British force under Sir G. Colley seized the hill. Early next morning the British were attacked by the Boers and defeated, Colley being killed.

Malabar District of India. It is in Madras and covers about 6000 sq. m. Calicut is the chief town. The Malabar coast is a strip of land about 40 m. wide between the hills and the sea.

Malacca Largest of the Straits Settlements. Occupying about 637 sq. m. in the Malay Peninsula, it extends for 42 m. along the Malacca Strait opposite Sumatra, the capital of the same name being 110 m. NW of Singapore. Captured by Portuguese in 1511, it became Dutch in 1641, and British in 1795. It was finally exchanged for Britain's Sumatra settlement in 1824. Pop. (1932) 191,335.

Malachi Name assigned to the last book of the Old Testament in the English Bible. Meaning "my messenger," it may be the personal name of a prophet otherwise unknown, or the title of a prophet whose proper name is unrecorded. Written after the rebuilding of the Temple, 6th century B.C., the book rebukes priestly degeneracy and various social evils.

Malachite Green mineral composed of the basic carbonate of copper. It is rarely crystallised but occurs in compact or nodular masses often of great size in the Ural Mts., Australia, France and the British Isles. When cut and polished it is used for decorative purposes or as a gemstone. It is also the basis of a pigment, malachite green.

Malacology Branch of zoology devoted to the study of the anatomy of animals of the molluscan type. It is distinguished from conchology which is concerned with the study and classification of molluscs based primarily upon the characters of the shells.

Malaga City and seaport of Spain. Situated on the Mediterranean coast 65 m. N.E. of Gibraltar, it comprises a complex of old buildings commanded by a 13th century Moorish castle, with well built modern suburbs. The climate is mild and equable, wine is produced and there is much shipping activity. Founded by Phoenician merchants, it passed into Roman, Visigothic and Moorish hands, becoming Christian in 1487. Pop. 191,611.

Malakand Pass on the Indian frontier, also the name of a frontier post. The pass is in the North West Frontier province and extends from the valley of the Kabul to that of the Swat River. Dargai is at the mouth of the pass. In 1897 there was trouble with the Swats here and the force sent against them was called the Malakand field force. See DARGAI.

Malär Lake of Sweden. Just outside Stockholm, it covers 650 sq. m. and its waters are carried to the Baltic. There are over 1000 islands on the lake, which is the centre of magnificent scenery.

Malaria Italian term, "bad air," for a group of fevers. Formerly called ague, they are intermittent fevers and are caused by minute animal parasites (*plasmodium*). Malaria is found to be transmitted from infected persons by the sunset bite.

of the bloodsucking females of certain mosquitoes (*Anopheles*). The parasites, after a life-cycle in the female mosquito pass through their salivary glands when biting, undergo a second life-cycle in man and then attack his red blood corpuscles. The specific remedy is quinine. See BLACKWATER FEVER.

Malay People of Mongoloid stock dominant in the Malay Peninsula and Archipelago. The true Malays are a shortish round headed, straight haired, olive brown race, with small hands and prominent cheek bones, of an easygoing impassive temperament. First arriving in Sumatra and Malacca, they became Islamised in the 13th 16th centuries developed seafaring practices and underwent ethnic admixture with their Indian and Melanesian neighbours. Their language, the *lingua franca* of the East Indies, has widespread affinities traceable from Easter Island to Madagascar.

Malaya Political term for the greater part of the Malay Peninsula south of the Siamese boundary and constituting the British sphere, it embodies the Straits Settlements, Federated Malay States and Non Federated Malay States, including the Johore Protectorate and four native states which passed from Siamese to British suzerainty in 1909. Occupying 51 605 sq. m., it has an estimated population of 4,000,000 including Malay tillers of the soil, primitive jungle dwellers, and Chinese and Tamil immigrants.

Malay Archipelago World's largest group of islands, variously called also the East Indies, Indonesia and Malaysia. Common usage includes the Sunda Islands, Celebes the Moluccas, Borneo, New Guinea, the Philip pines, and Netherlands India.

Malay Peninsula Strip of land forming the southernmost extremity of Asia. Connected with the rest of Farther India by the Kra isthmus, and projecting southward between the China Sea and the Malacca Strait, it extends for 750 m. to Cape Romania, the extreme point being sheltered by the island of Singapore, which has railway connection with Bangkok. The area is 70,000 sq. m., traversed by a mountain ridge with peaks up to 8000 ft., densely forested and fringed here and there with coastal swamps.

Malcolm Name of four kings of the Scots. Malcolm I was king from 943 to 954, and Malcolm II from 1005 to 1034. Malcolm III, a son of Duncan killed Macbeth in battle and was made king in 1057. He was killed at Malcolm's Cross near Alnwick in Nov. 1093. He married Margaret, an English princess, and was known as Canmore, or big head. Malcolm IV succeeded his grandfather, David I in 1153. He reigned until his death, Dec. 9, 1165. All four Malcolms ruled over the southern part of Scotland only and held part of their land as vassals of the English kings.

Malden District of Surrey. It is 3 m. from Kingston on Thames, and 10 from London on the S. Rly. To the north is New Malden, a residential district, and the two are part of the urban district of the Maldens and Coombe. Pop. (1931) 23 412.

Maldivé Islands in the Indian Ocean. They belong to Great Britain and are controlled from Ceylon, but have their own sultan and government. Of coral formation they are 400 m. to the south west of Ceylon.

Malé, or King's, is the largest island and there are 12 others. Copra, millet, fruit and nuts are grown, and many of the inhabitants are fishermen. Pop. (1931) over 79,000.

Maldon Borough seaport and market town of Essex. It stands at the head of the Blackwater estuary, on the L. N. E. Rly. The industries include shipping engineering works, brewing and milling. Pop. (1931) 0559.

Malesherbes Chrétien Guillaume de Lamolignon de. French politician. Born in Paris Dec. 0, 1721, he became a lawyer and notable censor of legal abuses. After his retirement in 1771 he undertook to defend Louis XVI. was arrested, and sent to the guillotine, April 22, 1794.

Malherbe Françoise de French poet. Born at Caen in 1555, he was a protégé of Cardinal Du Perron, and became a favourite at the court of Henry IV. He wrote odes songs epistles, translations and criticisms and had a vigorous if somewhat cold, style. He started a reaction against the artificialities of Ronsard and the Pléiade. He died in Paris, Oct. 10, 1628.

Malines Alternative name for the Belgian city of Mechlin (q.v.).

Malingering Feigning illness or incapacity to work in order to secure a benefit. Cases occur under the national scheme for sickness benefit and in connection with workmen's compensation. Most cases are easily detected by experienced medical men.

Mall The Thoroughfare in London. It runs from the Admiralty Arch near Trafalgar Square to the Victoria Memorial before Buckingham Palace. It is overlooked by the gardens of St. James's Palace and the adjacent houses. The name like that of the parallel Pall Mall, is taken from the game of polo mell which was played here in the 17th century.

Mallard Common wild duck of Great Britain and the northern hemisphere (*Anas platyrhynchos*). The name properly denotes the drake only, 24 in long, with glossy green head and neck, white ringed, purplish breast and greyish white underparts. The wild drake unlike the domesticated forms, is content with one mate, which lays 8 to 12 greenish white eggs in down lined grass nests. See DUCK.

Malleability Capability of certain plastic metals of being constrained into new forms by mechanical methods such as hammering or rolling, without fracture. The most malleable metal is pure gold. See CASTING.

Malling Two villages of Kent. West Malling, or Town Malling, is 5 m. from Maidstone and 36 from London, on the S. Rly., and East Malling is about 2 m. away. A fruit-packing station has been opened at the former place.

Mallow Genus of herbs, natives of the northern hemisphere (*Malva*). The common blue flowered mallow, the lilac flowered dwarf, or round leaved, and the rosy flowered musk mallow grow wild in Britain, the last is returning to favour with gardeners. They, however, commonly designate mallows varieties of the hardy annual tree mallow (*Lavatera*) with rose or white blooms. See MARSH MALLOW.

Mallow Urban district, market town and watering place of Co. Cork,

Irish Free State It is on the Blackwater, 21 m from Cork, and is a junction on the G S Rly. It is an agricultural centre and has a mineral spring. Pop 4562

Malm Geological term for one of the three divisions into which the Jurassic System is divided in Germany. An alternative name is White Jurassic, and it corresponds to the Upper and Middle Oolite in England.

Malm stone is an old name given to a calcareous sandstone occurring in West Surrey, Hampshire and Sussex.

Malmédy Town and district of Belgium. The town stands on a little river, and is 25 m from Aix-la-Chapelle. Pop 5000.

The district covers 318 sq m. From 1815 to 1918 it was part of Germany. In 1920 the people, by a plebiscite, decided to become part of Belgium.

Malmesbury Borough and market town of Wiltshire. It is on the Avon, 94 m from London, on the G W Rly. To day an agricultural and brewing centre, Malmesbury was once a centre of cloth manufacture. Its abbey church has a beautiful Norman porch. Pop (1931) 2334.

Malmesbury Earl of English title borne by the family of Harris. James Harris was born at Salisbury, April 21, 1746, and was educated at Winchester and Oxford. He had a long career in the diplomatic service, and in 1788 was made a baron. In 1800 he was made an earl, and he died Nov 21, 1820. His *Diaries and Correspondence*, also his *Letters*, are valuable to historians.

James Edward, the 2nd earl, was succeeded by James Howard as 3rd earl. He was born March 25, 1807, and became earl in 1841. In 1852 and 1858-59 he was Foreign Secretary, and he was Lord Privy Seal, 1866-68 and 1874-76. He died May 17, 1889, when his titles passed to a nephew. The family seat is Heron Court near Bournemouth, and the earl's eldest son is called Viscount Fitzharris.

Malmö Seaport of Sweden. It is on the Sound, beyond which is Copenhagen, 16 m away. There is a good harbour and the place is well served by railways. Apart from shipping, for which there is ample accommodation, the industries are connected with the production of tobacco, sugar and other commodities. It has a broadcasting station (231 M, 1.25 kW). Pop (1932) 129,927.

Malmsey Sweet high-flavoured wine produced from grapes grown in the Middle Ages in the Aegean, and exported from Monemvasia in the Morea. The French name, Malvoisie, is also used. Its modern representative, produced at Santorin, mostly goes to Russia. White wines of Malmsey type come from Cyprus, Sicily, Sardinia, the Canaries, Madeira and the Azores.

Malory Sir Thomas English writer. He appears to have come from Warwickshire to London, to have been a politician and a soldier, to have died in 1471, and to have been buried in the Grey Friars near Newgate. His *Morte d'Arthur* is one of the treasures of English literature. He evidently collected from various old writers the legends about Arthur and his knights and arranged them in an orderly way. The book was finished in 1469 and was first printed, by Caxton, in 1485.

Malpas Town of Cheshire. It is 13 m from Chester, on the L M S Rly. Pop 1100.

Another Malpas is a village in Cornwall. It is on the Fal, 2 m from Truro.

Malpiauquet Village of Franco. It is 10 m from Mons and is famous for the battle fought here Sept. 11, 1709, between British and Austrian armies under Marlborough and Prince Eugene and a French army under Villars. The French were utterly routed, but the allies were too weak to pursue them. About 90,000 men were engaged on each side, the British and their allies lost 20,000 men and the French 12,000.

Malt Partially germinated grain of various cereals, chiefly barley. The process by which it is prepared is termed malting. In Britain barley is used generally in brewing, spirit and vinegar manufactures, but in Germany and other countries wheat, rice and other cereals also are used. The barley is steeped first in water, then the soaked grain is spread on a floor or in revolving drums and allowed to germinate up to a certain stage. During this process the ferment diastase is formed and converts the starch present into maltose (qv) and dextrin. The "green malt" is dried in a kiln and finally cured at a greater heat without free circulation of air until the mass becomes friable, brown in colour, and develops a distinctive flavour. A watery infusion of malt is known as "sweet wort," and a thick syrupy extract is used medicinally. See BREWING.

Malta Island of the Mediterranean Sea. It is about 55 m from Sicily, is 17 m long, and covers 95 sq m. It is an important British naval base. Valletta, which succeeded Città Vecchia as the capital, is the chief harbour. The interior is hilly, but there are fertile valleys where oranges, figs, olives, grapes and other fruits grow freely. Horses, sheep and goats are reared and many mules come from Malta, which is also famous for its honey and lace. The fisheries are valuable.

Malta was ruled in turn by the Phoenicians, Greeks, Carthaginians, Romans and Arabs.

It was then attached to Sicily and to Aragon. It was part of the empire of Charles V and that ruler gave it to the knights of St John, who fortified it and ruled it until 1798, when it was seized by Napoleon. It was formally handed over to Great Britain in 1814.

In 1921 a constitution was given to Malta. This provided for a legislature of two houses, the members of the lower house being elected. Matters of imperial concern, such as defence, trade and coinage are under the control of the governor, who is assisted by two councils. English is the official language and British coins are the legal tender, but the islanders have their own tongue, a Semitic one, which is in general use. The island has an order of nobility consisting of 29 families, and there is a university.

In 1929 there was a serious dispute between the state, represented by Lord Strickland, and the Church of Rome, to which most of the people belong. The interference of the priests in secular matters led to a crisis, and after negotiations for a settlement had failed, the constitution was suspended on June 26, 1929. A royal commission visited the island to inquire into the matter in 1931 and in 1932 the constitution was restored and an election held. Pop (including Gozo and Comino) 241,621.

Malta Fever Variety of fever found in the Mediterranean.

countries, also in other parts of the world. It takes very much the same course as other fevers, but the illness lasts longer than in most of them, sometimes as long as six months. It is caused by a parasite which is conveyed by the milk of goats.

Maltese Terrier Breed of dog. It is an ancient form of lap dog, traceable for 2000 years, tho inaccurate name terrier is becoming obsolete. It resembles a toy Skye terrier, averaging 5 to 6 lb., dark-eyed, black nosed, with long, white, silky coat and thickly haired tail curling over the back. It is intelligent, affectionate and good tempered.

Malthus Thomas Robert. English economist. He was born near Dorking on Feb 17, 1766, and became curate of Albury, Surrey in 1797. In 1798 he published anonymously his *Essay on the Principle of Population* which set out to prove that increase of population was dependent upon the presence of warmth and food, and would only be checked by the lack of these things, or by such positive checks as disease, epidemics, wars and plagues. In 1805 he was appointed Professor of Political Economy in the East India College at Haileybury. He wrote *Principles of Political Economy* in 1820. He died near Bath on December 23, 1834.

Malton Urban district and market town of Yorkshire (N.R.). It is situated on the Derwent, 21 m from York, on the L.N.E.R. The industries include brewing, milling and tanning. The town is a centre for the breeding and sale of horses and has racing stables. Pop (1931) 4418.

Maltose Name given to malt sugar, a carbohydrate belonging to the group of disaccharoses containing twelve atoms of carbon. It is formed by the action of the ferment diastase, present in malt, upon starch of which 80 per cent is converted into sugar. It undergoes fermentation by yeast, producing alcohol.

Malvern Inland watering place and urban district of Worcestershire. It consists of Great Malvern, Little Malvern, Malvern Link and other places on the Malvern Hills. Great Malvern is 128 m from London, on the G.W. and L.M.S. Rlys. The town has medicinal waters. Pop (1931) 15,632.

Malvern Hills Range of hills in England. They are chiefly in Worcestershire and Herefordshire and the highest points are 1400 ft. high. The chief hills are Worcester, Hereford and Gloucester Beacon and they are best visited from Malvern. Some part of the region is national property and in 1930 31 steps were taken to protect them from disfigurement by quarrying. The district was once a hunting ground and was called Malvern Chase.

Mamelukes Body of slaves trained to arms. They were utilised by Saladin's successors in 13th century Egypt as a mounted bodyguard. Their leader made himself sultan, 1250, a Bahri and then Circassian dynasty of Mameluke sultans followed. The Turkish domination, 1517, on throned a Turkish pasha, who ruled through 24 provincial Mameluke, beys. Napoleon I defeated the Mamelukes, 1798, but they retook the country until Mohammed Ali with French support, became pasha, treacherously assassinated the surviving beys and their followers in 1811.

Mametz Village of Franco, 5 m. from Albert. During the Great War it was captured by the British in the Battle of the Somme, July 1, 1916, but it was lost in March, 1918.

Mammal Highest division of the animal kingdom. Mammals are air-breathing and warm blooded vertebrates, which, with the exception of the lowest group, the monotremes, are viviparous and suckle their young. The foetus undergoes a gestation period during which it is nourished by an organic connection between the foetal membranes and the uterine wall or placenta. The spinal column is characterised by having intervertebral discs between the centra, the skull possesses two condyles and articulates directly with the lower jaw. A hairy covering is usually present, and the brain differs from that of the lower vertebrates by having a band of transverse fibres, the *corpus callosum*.

Mammon Aramaic word for riches, used in the Sermon on the Mount (Matt vi), and the parable of the Unjust Steward (Luke xvi). Personifying inordinate love of gain, mediaeval Europe gave the name to a demon, as figured in Milton's *Paradise Lost*.

Mammoth Extinct member of the elephant family. It was found in N latitudes in glacial and preglacial times. In build it closely resembled the Indian elephant, but was provided with a thick, hairy coat over a woolly undercoat, and its long, slender tusks were curved upwards and outwards. Remains still retaining the flesh have been found in the icy gravels of Siberia, and its bones are present in many deposits as well as drawings by primitive man upon ivory fragments.

Mammoth Cave Large cavern in the limestone rock S of Louisville, Kentucky. It has more than 150 m of passages with subterranean lakes and streams. The chambers and passages present many different forms such as grottoes, domes, galleries and avenues, some having masses of stalactites and stalagmites or a covering of calcite crystals. The chief chamber is 4 m long, 125 ft in height, and in places 300 ft. wide.

Man Genus of biped mammals of the order of primates (*Homo*). Biologically related to the other members of the order, the apes, monkeys and baboons, man presents peculiar differences of structure and aptitude, physical and mental. These include perfectly opposable thumbs on the hands erect posture, gracefully curved spinal column, arms relatively shorter and legs relatively longer and stronger, progression on the soles of the feet, brain relatively larger and more complex than in any other animal and capacity for articulate speech and education, whence came human civilisation. Man like precursors intermediate and incomplete, lived in earlier geological ages. Modern man is regarded as a single species, *Homo sapiens*. See ANTHROPOLOGY, ETHNOLOGY.

Man Island off the N.W. coast of Great Britain. It is 33 m long and covers 221 sq m. At the S end is a small island called the Calf of Man. The island, a popular pleasure resort, lies about an equal distance from England, Scotland and Ireland (27 m). Douglas is the capital. Other places are Peel, Ramsey, Castletown, Port Erin and Laxey, connected by railway or electric tramways with Douglas and one another. The highest

point, *Smæfell*, is 2034 ft high, and there are some beautiful glens. Oats and barley are grown, and dairy farming, lead mining and fishing are other industries.

The attractions of the island include a mild climate in which fuchsias grow freely in the open. In the summer steamers ply regularly to Douglas from Liverpool, Barrow, Glasgow and other ports.

Man is a part of the British Empire, but has its own constitution. This consists of a Council and a House of Keys, an elected body of 24 members. A Lieutenant Governor represents the King. It has its own legal system, but its church, under the Bishop of Sodor and Man, is part of the Church of England. The island is divided into six sheadings, and its two judges are called deemsters. The coat of arms is three legs. The Manx language, a Celtic one, is still spoken by a few of the people. Manx cats are tailless.

The island was inhabited by Celts who became Christians in the 6th century. From the Kings of Norway it passed in 1263 to the Kings of Scotland. Edward I secured it for England, and in 1406 Henry IV gave it to Sir John Stanley. The Stanleys were Lords of Man until 1736, and their successors, the Dukes of Atholl, from 1736 to 1765, when the sovereign rights were acquired by the English Government. The rest of the Duke's rights were bought in 1827. Pop (1931) 49,338.

Managua Capital of the republic of Nicaragua. Connected by rail with Granada, it stands on the S side of the Lake of Managua, and has a university and an air station. There is a trade in coffee, sugar, bananas and other products, and some manufactures. The city was damaged by an earthquake in 1931. Pop 33,000.

Manaos City and river port of Brazil. On the Rio Negro, a tributary of the Amazon, it has a university and is the capital of the state of Amazonas. There are large docks and steamer connection with Europe. Pop (1930) 83,736.

Manasseh Elder son of the patriarch Joseph, but less important than Ephraim. His descendants were established N of Ephraim in Samaria, and also in Gilead and Bashan, E of Jordan. Another Manasseh was a king of Judah, 697-642 B.C. A son of Hezekiah, whose reforming policy he abandoned, his persistent idolatry contributed to Jerusalem's destruction and the Jewish exile.

Manatee Genus of aquatic mammals of the sea cow order. They inhabit estuaries and rivers on the tropical Atlantic coasts of America and Africa. They are inoffensive, thick-skinned, 8 ft long, with hand like fore paddles and no hind limbs, and feed on aquatic herbage. Amazonian natives eat the flesh.

Manche Name used by the French for the English Channel (*q.v.*). It is also the name of a department which has a coastline on the channel and includes the Cotentin Peninsula. St. Lo is the chief town and Cherbourg the chief port.

Manchester City of New Hampshire. The largest city in the state. It is 16 m from Concord, on the River Merrimack. The chief industry is the manufacture of cotton. Pop 76,834.

Manchester City of Lancashire, on the Irwell, 189 m from London by the L.N.E. and L.M.S. Rlys. The city area covers 34 sq m.

The Chetham Hospital is one of the few old buildings in the city. The Rylands Library, in a fine modern building, is a priceless collection of books and manuscripts. The cathedral, formerly the parish church, dates from the 15th century. The grammar school, nearly as old, occupies a fine new building at Fallowfield. The public parks include Heaton Park. In 1932 arrangements were made to build a new City Hall.

Manchester is the headquarters of the cotton manufacture in England and a great distributing centre. Other industries are engineering and chemical works, and the manufacture of clothing. The university grew out of Owens College, and the city is famous as a musical centre, with a Royal College of Music and the fine Hallé Orchestra. Its leading newspaper, the *Manchester Guardian*, is known throughout the civilised world. The city is governed by a lord mayor and council, and sends 10 members to Parliament. The sporting facilities include a racecourse and the ground of the Lancashire cricket club at Old Trafford. It has two famous association football clubs, Manchester United which won the cup in 1909, and Manchester City which won it in 1904. There is an aerodrome on Chat Moss. It has two broadcasting stations, North Regional (480 M, 50 kW) and North National (301.5 M, 50 kW). Pop (1931) 766,333. See MANCHESTER SHIP CANAL.

Manchester Duke of English title held by the family of Montagu. Sir Henry Montagu, a judge, was made Earl of Manchester in 1626. His son, the 2nd earl, was a Parliamentary leader in the Civil War. In 1719 Charles, the 4th earl, was made a duke. The family seats are Kimbolton Castle, Huntingdonshire, and Tanderagee Castle, Armagh. The earl's eldest son is called Viscount Mandeville. The title is taken from Godmanchester, near Huntingdon.

Manchester Ship Canal Canal connecting Manchester with the estuary of the Mersey. The work was begun in 1887 and the canal opened for traffic in 1894. It cost about £20,000,000. It is 35½ m long and goes from Trafford Park, Manchester, to Eastham on the Mersey. Well provided with docks and warehouses, it is 28 ft in depth, and steamers of 12,500 tons can navigate it. It passes by Runcorn and Ellesmere Port.

Manchu People of Tungus stock in E Asia. Tall, slender, medium-headed, level-eyed, they effected contact with early Caucasian migrations, peopled Manchuria, and imposed a dynasty on China in A.D. 1644, which the Republican Revolution ended in 1912. Largely displaced in Manchuria by Chinese immigrants, their Altaic speech and script linger only in scattered groups.

Manchukuo District of E Asia, formerly Manchuria but since 1932 an independent state. It is between the Amur, which divides it from the territory of the Soviet Republic, and China, to which it formerly belonged. Its 3 provinces cover 363,610 sq m, and are served by the S. Manchuria and Chinese Eastern Rlys. The soil is very fertile and the population has recently increased greatly. The soya bean is the chief product, but wheat, barley and millet are grown. Mukden is the largest city and the old capital, but Changchun was made the capital of the new state in 1932. Other towns and ports are Newchwang, Antung, Dairen or Dalny, and Port Arthur.

The possession of Manchuria was often a matter of dispute. Russia obtained a footing in the country, but in 1905 her rights therein were transferred to Japan. After the Great War there was a considerable amount of lawlessness in the province, in which Japanese troops remained. They were employed to crush the marauders, while from time to time came reports that the Soviet authorities were anxious to take some share in the affairs of the country. The control of the railway system was another cause of friction.

In 1932 Manchuria was proclaimed independent as Manchukuo, and the former Emperor of China, Mr. Pu Yi, as he was named, was installed in Manchukuo, as ruler of the state of the Manchus. He was called the Administrator, and his office declared elective. The new government expressed its desire to meet the obligations which it formerly owed as part of the Republic of China. Just before this event the League of Nations had sent out a commission to investigate the circumstances of Japanese control and to inquire into the formation of Manchukuo. The report of this commission was accepted by the League in Feb. 1933. In Jan. 1933, however, it was decided to make Mr. Henry Pu Yi hereditary Emperor of Manchukuo and he was crowned March 1, 1934. The State is nominally independent but is actually under the domination of Japan. Pop. 25,000,000.

Mandaeans Eastern religious sect, resembling the Gnostic Christians of the second and third centuries. Their belief derived from the New Testament but containing Jewish and Parsi elements reveres John the Baptist. They are therefore sometimes called Christians of Saint John, or Subbi (Baptists) and identified by Mohammedans with the Sabaeans of the Koran. Very few now remain and those mostly in Iraq.

Mandalay City and river port of Burma, on the Irrawaddy, about 400 m. from Rangoon. The old city was burned down in 1892, but two of the palaces and the walls remain. It is now the British quarter and is called Fort Dufferin. In the new city the finest building is the group of several hundred pagodas which compose the great temple named Kutbodaw. The city does a large trade in the products of the country. From 1837 to 1885 Mandalay was the capital of the kingdom of Burma. Pop. (1931) 147,932.

Mandamus In English law the name of a writ. The word in Latin means "we command." It is issued by the King's Bench division in cases where a public body, or occasionally a private person, fails to perform an obvious duty.

Mandarin Name, derived by Portuguese navigators from Hindu, in general European use for any public official in China, civil or military, who wears a button. The native name is *huan*. Nine grades are indicated by the material and colour of the button knobs and girdle clasps, and the devices embroidered on the robes.

Mandarin Duck Small freshwater duck indigenous to E. Asia (*Aix galericulata*). It is also called the Chinese teal. The drake has purple, green and chestnut plumage, with long, silky, erectile crest. One of the slender feathers expands into an upturned purple banded chestnut fan.

Mandate Command. When a person is elected to Parliament, or some other body, on a particular question, he or his party is said to receive a mandate.

Since the Great War the word has been used for the authority given by the League of Nations to a country to administer the affairs of another country. Countries responsible for Mandated Territories, as they are called, receive their directions from the League, and reports about their work are issued from time to time. Great Britain governs Tanganyika and Palestine, and until 1931 governed Iraq, under mandate. France governs Syria, and British Dominions govern S.W. Africa and certain islands in the Pacific.

Mandeville Sir John English author. He is regarded as the author of a book of travel written about 1360. The information is taken from earlier books and contains much legendary matter as well as a certain amount of actual travel details. One theory is that the author was a certain John de Bourgoigne, but this may have been a name taken by Mandeville. Mandeville died at Liège Nov. 17, 1372.

Mandoline Musical instrument of the lute family still popular in Italy. The Neapolitan mandoline has four pairs of metal strings tuned in fifths. It is played with a tortoiseshell plectrum, and 17 frets mark the stoppings. The larger Milanese mandoline has five or six pairs of strings tuned like the lute. Handel, Puccini, Mozart and Beethoven composed for the mandoline occasionally.

Mandrake Genus of perennial herbs of the potato family, (*Mandragora*). They are stemless plants with thick, fleshy roots whose forked growth simulates man's lower limbs. Fantastic superstitions have pertained to them since the days of Rachel (Gen. xxx). Long credited with narcotic and other properties, they are of no economic importance. They grow around the Mediterranean Sea.

Mandrill Species of the baboon family, (*Papio maimon*), a native of W. Africa, where it is found in communities. It is remarkable for its bright colouring, the muzzle being bright red with blue on either side, and the hinder parts purplish. The fur is brown and the beard yellowish.

Manet Edouard French painter. The greatest exponent of the Impressionist school he was born in Paris, Jan. 23, 1832, and studied under Couture. His work, notably 'The Garden' first of the "plein air" school, and 'Olympia' aroused much hostility and was frequently excluded from the Salon, causing Manet and his followers to exhibit independently. He died in Paris April 29, 1883.

Manganese Metallic element having the symbol Mn, atomic weight 54.93, and melting point 1808° C. It is a brittle steel grey metal which oxidises rapidly in moist air. In its commercial form manganese usually contains up to 5 per cent of silicon, which increases the hardness and resistance to corrosion. Its alloys are of great economic value, especially those with steel, and its compounds enter into many industries. Its chief ores are pyrolusite, wad and manganite.

Mange Transferable skin complaint in various domestic animals. It is due to minute parasite mites. Sarcopptic mange, caused by burrowing itchy mites, occurs in dogs, horses, pigs, goats, cats and others. Psoropptic mange, caused by skin boring mites, occurs in horses, cattle and sheep. Follicular mange, caused by worm like mites (*Demodex*), affects the hair follicles of dogs.

Mango Tall, evergreen tree of the cashew family. It is native in the E Indies and Malaya (*Mangifera indica*). Reaching 10 or 40 ft in height, it is cultivated in tropical Asia, Africa and America for its fleshy, reddish yellow, kidney-shaped fruit. This, when unripe, is a favourite ingredient of chutney. Cultivated forms of luscious flavour are esteemed for dessert.

Mangold Wurzel Coarse, overgrown field-plant, a biennial herb of the goosefoot family (*Beta vulgaris*). Red and yellow forms, of varying shape and solid content, serve as winter fodder for livestock. Sugar develops during storage, only old roots being palatable. The so-called root includes the original stem, the so-called seeds are fruit-clusters.

Mangosteen Evergreen tree (*Garcinia mangostana*). It grows in Malaya and the E Indies and produces a luscious fruit, the size of a small orange. The thick purplish rind encloses a white or reddish pulp of delicate flavour. The juice of the rind is very astringent and is used medicinally in cases of dysentery.

Mangotsfield Urban district of Gloucestershire. It is a junction on the LMS line from Bath and Bristol, 5½ m from Bristol and 122 from London. There are collieries in the neighbourhood. Pop (1931) 11,251.

Mangrove Name denoting various trees abounding in tropical coastal swamps. The common mangrove (*Rhizophora mangle*) with thick, smooth, leathery leaves and large four-petalled flowers, sends down from the trunk and branches spreading stilt-like roots which, in conjunction with new growths from seeds germinated in the still hanging fruit and then falling, form interminable forests. Bark extracts are made for tanning. The central American corrida or black mangrove (*Avicennia nitida*) is allied to the white mangrove of Queensland and elsewhere.

Manhattan Island of the United States. It is at the mouth of the Hudson River, and most of New York City stands on it. The island is 13 m long and about 2 m wide in the centre, narrowing at either end.

Mania Form of insanity characterised by over activity of the brain. Simple mania is marked by much loquacity and instability of conduct or emotion. In acute mania speech becomes incoherent and will-power disappears, the sufferer becoming "raving mad". The onset is usually gradual, possibly due to toxic changes in the blood of the brain. Sometimes fatal through sheer exhaustion, most cases recover, either abruptly or after relapses, but it may pass into chronic mania, and this into dementia.

Manichaeism Religious system founded by the Persian Mani, or Manichaëus, in the 3rd century, A.D. Based upon Magian dualism, with Buddhist, Gnostic and Chaldean features, it regarded the world as resulting from a conflict of light and darkness, man as engendered by Satan, and Mani himself as the last and greatest prophet. Confronting Christianity and Mithraism, it spread to Mesopotamia, Central Asia, W Christendom and N Africa, long resisted Islamic opposition, acquired at times Christian elements, and influenced the Albigenses.

Manicure Term applied to the treatment of the finger nails to

preserve their healthy condition and appearance. The nails are cleaned in soapy water and shaped with a flexible steel file. Orange wood sticks are used for pressing back the cuticle, the loose portions of which are removed by a cuticle knife or fine scissors.

Manila Capital and seaport of the Philippine Islands. It stands on the W. side of Luzon where the River Pasig falls into Manila Bay. The old town is surrounded by a wall, and the cathedral dates from the 16th century. There is a university dating from 1857 and organised on modern lines. The older one, founded in 1585, was closed in 1730. N of the old city, across the Pasig, are modern suburbs. There is a good harbour and water supply. Pop (1932) 341,034.

In Manila Bay on May 1, 1898, a Spanish fleet was sunk by the Americans under Commodore Dewey, and on Aug 13 the city was taken.

Manila Hemp Fibre having great strength, tenacity and lightness. It is obtained from the leaf-bases of *Musa textilis*, a plant of the banana family growing in the Philippines. It is used for making ropes and cordage, and the finer grades for muslins and other fabrics, also as a binding material for plaster.

Maniple Division of the Roman legion. From the 4th century B.C. onwards the 3000 heavy-armed infantry formed 20 maniples of 120 and 10 of 60, each with two centurions and a standard bearer.

Maniple Eucharistic vestment. A narrow stole-like strip about 30 in long, originally of linen, afterwards of other materials embroidered and fringed, it is looped over the left wrist. Disused by the English Church at the Reformation, it tends to reappear, sometimes for wiping the chalice rim.

Manipur Native state of India. It is in Assam and covers 8456 sq m. The ruler is a rajah, and the capital is Manipur or Imphal. The Indian Government, which put down a rising here in 1891, receives tribute from the state and has some control over its affairs. Pop (1931) 445,608.

Manitoba Lake of Canada. In the province of Manitoba, it lies 60 m to the S.W. of Lake Winnipeg. It covers 1500 sq m and is 120 m long. Its waters are carried by the Little Saskatchewan River to Lake Winnipeg.

Manitoba Province of the Dominion of Canada. Between Ontario and Saskatchewan, it is one of the prairie provinces and covers 261,832 sq m. Winnipeg is the capital. The chief rivers are the Red and the Nelson and its lakes cover 20,000 sq m. The largest are Winnipeg, Winnipegosis and Manitoba. Wheat, barley, maize and oats are produced in large quantities and there is a good deal of dairy farming. Coal is mined. The province is governed by a legislature of one House and a Cabinet responsible to it, and is represented also in the Parliament at Ottawa.

The province was formed in 1870 from land bought from the Hudson Bay Company. It was enlarged in 1881 and again in 1912. Before 1870 it was called the Red River Settlement. The University of Manitoba was founded in 1877 and owns large tracts of land. It consists of colleges in Winnipeg and the neighbourhood. Pop (1931) 700,139. See CANADA.

Mann Thomas. German writer. Born at Lübeck, June 6, 1875, at the age of

19 his family removed to Munloh, and while working in insurance, he devoted himself to literature. He published *Buddenbrooks* in 1903, a massive story of a family of Lübeck merchants, such as his own. He wrote short stories and a novel, and in 1925 another long novel, *Der Zauberberg* (English translation, *The Magic Mountain*, 1926), the story of the people in a tubercular convalescent home in Davos. He has written essays and one play and he was awarded the Nobel Prize for Literature in 1929.

Mann Tom English politician. Born at Foleshill, Warwickshire, April 13, 1856, he worked on a farm and in a coal mine as a boy. Later he became an engineering apprentice in Birmingham. Prominent in the trade union and Socialist movements, he was a leader of the dockers' strike in 1889. He was first secretary of the Independent Labour Party, 1894-96, of the London Reform Union and of the National Democratic League, and became associated with the syndicalist movement. He was active as a Labour leader in Australia between 1902 and 1908, and in S. Africa. In 1918-21 he was general secretary of the Amalgamated Society of Engineers. He has written *A Socialist's View of Religion*, *Russia* in 1921, *Tom Mann's Memoirs* and *What I Saw in China*, 1927.

Manna Saccharine exudation, obtained from incisions in the stems of *Fraxinus ornus*, the manna ash, a native of S. Europe. It is used in the form of yellowish-brown fragments or flakes in medicine as a mild laxative. Similar exudations are derived from a number of trees, the manna of the Bible probably being that from the tamarisk.

Mannheim Town and river port of from Karlsruhe, where the Neckar flows into the Rhine. It is a modern town with a number of manufactures and a large harbour. The palace, once the residence of the Margraves of Baden, has a museum, picture gallery and library. The National theatre has associations with Schiller. From 1720 to 1778 Mannheim was the capital of Baden. Pop. 247,500.

Manning Henry Edward English cardinal. Born at Totteridge, July 15, 1808, he was made rector of Lavington in 1834. Manning was attracted by the Oxford Movement and in 1851 joined the Church of Rome. He was ordained priest and worked as chief of the oblates of S. Charles at Bayswater. He acted as assistant to Cardinal Wiseman and succeeded him in 1865 as Archbishop of Westminster. In 1875 he was made a cardinal, and he died Jan. 14, 1892. He is buried in Westminster Cathedral.

Manning was a prominent figure in his day and did a great deal for his Church in England. He was a social reformer, keen on housing and temperance. In *Lothair* he is portrayed as Cardinal Grandison. He wrote *The Eternal Priesthood* and other books.

Manningham Industrial district N.W. of Bradford, on the L.M.S. Rly. Here are large mills of Messrs. Lister and Company, and Manningham Park.

Manningtree Market town of Essex, on the estuary of the Stour, 8 m. from Colchester, on the L.N.E. Rly. The industries include malting and a trade in agricultural produce.

Manoel Two kings of Portugal. Manoel I was king from 1495 to 1521. He encouraged Vasco da Gama and others to go on voyages of discovery.

Manoel II was born in Lisbon, Nov. 15, 1889, the son of King Carlos I and a Bourbon princess. He became king on Feb. 1, 1908, on the murder of his father and his elder brother. In 1910 he was deposed and settled in England. In 1913 he married a princess of the Hohenzollern family. He died July 2, 1932.

Manometer Instrument for measuring the pressure of gases. Its principle is illustrated by a U-shaped tube partially filled with liquid. If the pressure on both surfaces is equal, the height in both limbs remains the same, but with increasing pressure the liquid rises in one limb. The barometer and steam gauge are forms of manometers.

Manor Name used for a landed estate. In the Middle Ages the manorial system was in force over a considerable part of England. The lord, who held the land from the king or a great noble, lived in the manor house, some of it he let out to tenants, who paid him by working for him on certain days. Other parts of the land, called the demesne, he cultivated by the aid of this labour and a further part was woodland or common where the tenants grazed their animals. The arable land was divided into strips, and each tenant, called a villein, had a share in each of the common fields of the manor.

The manors varied in size, and the poorer tenants were called borderers and cotters. None of the tenants was free to leave the estate. The lord held courts and a record or manorial roll was kept of the services due from the tenants for their land.

F.W. Maitland in *Domesday Book and Beyond* thinks the manor was an estate assessed separately for the geld or tax paid to the king. The system began to decay in the 14th century and had disappeared by the 16th, although traces of it remained, copyhold in land for example, and the remaining manorial rights were bought and sold until finally abolished by legislation in 1925. It is estimated that there were 20,000 manors in England.

Mansard Type of roof, named after its French inventor, François Mansard (1598-1666). The lower part of the roof is steeply pitched while the upper part is but slightly inclined. The Mansard roof was suitable for large buildings and provided ample space without unduly increasing the height.

Mansfield Borough and market town of Nottinghamshire, on the Maun, 139 m. from London and 13 from Nottingham, on the L.M.S. and L.N.E. Rlys. It owes its early fame to its association with Shorwood Forest. In the 19th century it expanded a good deal owing to the opening of coal mines, and there are now factories for making hosiery, machinery, silk and cotton goods, boots and shoes. The town has a technical school for the mining industry. Pop. (1931) 46,075.

Mansfield Earl of Scottish title borne by the family of Murray. The first earl was William Murray, a famous lawyer. Born March 2, 1705, he became a barrister and an M.P., was Solicitor General and then Attorney General, and in 1756 was made Lord Chief Justice and a baron. He was one of the leaders of the political group that carried on the government in the interests of George III. He retired in 1788 and died March 20, 1793.

Mansfield gave some famous legal decisions,

including the one that slays who land on English soil are free His London house was burned in 1780 during the Gordon riots, another of his residences was Ken Wood at Hampstead

The earl's seat is Scone Palace near Perth, and his eldest son is called Lord Scone

Mansfield Katherine British writer She was born in New Zealand in 1880, the daughter of Sir Harold Beauchamp, and educated at Queen's College, London In 1911 she published her first volume of stories *In a German Pension*, and she wrote for *The Athenaeum* In 1920 a volume of stories, entitled *Bliss*, made her reputation, and this was followed by *The Garden Party*, *Prelude* and *The Daughters of the Late Colonel* In 1913 she married the critic, J Middleton Murry She died Jan 9, 1923, after a long illness In 1924 *The Journal of Katherine Mansfield* and in 1928 her *Letters* appeared

Mansfield Woodhouse

Urban district of Nottinghamshire, 2 m from Mansfield, on the LMS Rly Coal mining is the chief industry Pop (1931) 13,707

Manship Paul American sculptor Born Dec 25, 1885, he studied art in Philadelphia and Rome He soon came to be regarded as one of the leading sculptors of the day He executed the Morgan Memorial in the Metropolitan Museum of Art in New York and other exquisite pieces there and in Paris

Mansion House Official residence of the Lord Mayor of London It stands opposite the Bank of England, was built between 1739-53 from designs by George Dance, and restored and extensively improved in 1930-31, when a fine roof garden was added The finest room is the Egyptian Hall, wherein the banquets are held Attached to it is the police court

There is a mansion house for the Lord Mayor in York, and another in Grafton St, Dublin Bristol also has a mansion house

Manslaughter In English law the unlawful killing of another without premeditation It may be due to an accident or done in the heat of the moment, or as an act of self-defence It may be the result of neglect, as when a failure to call in a doctor results in death The maximum punishment is penal servitude for life Manslaughter is not recognised in Scots law

Manston Village of Kent, on the coast between Margate and Ramsgate Here in 1920 a camp was opened for teaching trades to men who had served in the Royal Air Force

Mansurah City of Egypt It stands on one of the branches of the Nile, and is a prosperous trading and cotton growing centre Here, in 1248, St Louis of France was imprisoned when retreating at the head of his crusading army from Damietta The fortress which was his prison has been restored Near are the ruins of a temple dedicated to Isis Pop 63,076

Mantegna Andrea Italian painter Born at Vicenza in 1431, he settled in Mantua and soon won a position in the front rank Nine of his pictures, a series called "The Triumph of Julius Caesar" are in Hampton Court Palace, and he is represented in the Louvre Much of his work took the form of decorations for churches, among them

the Belvedere chapel in the Vatican, Rome. He died Sept 13, 1506

Mantilla National headdress of women in Spain and Spanish countries Sometimes supported by a lofty head-comb, and draped over the head and shoulders, it may serve as a veil, being made of black or white lace and other material, often costly It developed from the light cloak thrown over the dress

Mantis Genus of insects of the orthopterous order They are not unlike locusts and are sometimes called the praying mantis because the forelegs assume an attitude of prayer

Mantling In heraldry, the mantelet, lambrequin or scarf, represented as floating from the helm or crest, It is usually jagged as if tattered in conflict, or tasselled It degenerated into a foliated scroll, or became a mere ornamental appendage to an escutcheon, comprising a background of flowing drapery adjusted in folds, sometimes lined with ermine

Mantua City of Italy, on the Mincio, 100 m from Milan The city was for 400 years the capital of the duchy ruled by the Dukes of the Gonzaga family It is chiefly interesting as the birthplace of Virgil (q v) Pop (1931) 42,939

Manu Mythical Hindu being Springing from the self-existent Brahma, he divided himself into male and female, whence came in process of time the present human race A Manu deluge-legend recalls the Biblical story of Noah Sanskrit law books, recast about the Christian era, contain digests of primitive law, cited as the Code of Manu

Manure Name given to the various fertilisers used for enriching the soil The oldest is farmyard manure which contains all the essentials required by plants Gnano, the excrement of sea-birds, and bone, blood, fish and other organic refuse are valuable fertilisers To supplement the many organic manures inorganic substances such as sodium nitrate, ammonium sulphate, basic slag, and superphosphate are employed In certain cases, special fertilisers are used, such as shoddy for hops

Manuscript Anything handwritten. Specifically the word denotes an ancient or mediæval writing produced before the general adoption of printing in the 5th century, usually abbreviated to MS, plural MSS Such writings, once made on waxed tablets fastened together, came to be made on papyrus, parchment or paper, forming a volume or roll, or a codex in book form, and multiplied by copying singly Some contain illuminations of great beauty and historic value See PALAEOGRAPHY, PALIMPSEST

Manvers Earl English title borne by the family of Pierrepont Charles Medows, M.P., inherited the estates of the Duke of Kingston in 1788 and took the name of Pierrepont In 1806 he was made Earl Manvers, and his descendants have since held the title The family seat is Thoresby, near Mansfield, and the earl's eldest son is called Viscount Newark

Maori People of Polynesian stock in New Zealand Estimated (1932) at 69,893, mostly in North Island one-fifth being half-caste, they are tall and muscular, black-haired, with oval faces of Caucasian type Traditionally arriving from Rarotonga c 1350, they encountered still earlier Polynesian im-

migrants intermingled with indigenous Papuanians. Remarkable cultural developments occurred, marked by jade adzed timber houses, decorative wood carving and flax weaving. The ruling chiefs practised face tattooing, jade amulets, *tiki* simulating human embryos, were worn. When Great Britain undertook sovereignty, 1840, conflicts with the natives developed, 1843-47 and 1861-71. Since then the Maoris have become law abiding and nominally Christianised. They have a native representative on the executive council, and four elected members in the Parliament of New Zealand.

Map Representation upon a plane surface of the earth or some part of it. As the earth's surface is curved, its true form and proportion cannot be shown on a map without some degree of distortion. To reduce this distortion as far as possible various projections are adopted. Mercator's projection is cylindrical, with parallels of latitude shown as straight lines; other projections are the stereographic, showing less distortion and the conical, suitable for small areas. Gootour maps show the contour of a district by lines running through points of equal elevation.

Maple Genus of deciduous trees and shrubs of the soapwort order (*Acer*). They are natives of N. temperate regions. The fruits are ash-like two-winged 'keys'. Many species are planted for their valuable timber, sugary product or richly tinted and variegated foliage. Britain's indigenous small leaved maple is *A. campestre*, the false sycamore or great maple, *A. pseudo-platanus* 40 to 60 ft. high, has long been naturalised. The spring sap of the still taller American sugar or bird's-eye maple and red flowered or curled maple regularly yields maple sugar.

Maple Sir John Blundell English hustler and man. Born in London March 1, 1845. He joined his father in business as a seller of furniture. Under his control the firm became one of the largest of its kind. It still flourishes in Tottenham Court Rd., London. In 1887 Maple entered the House of Commons as Conservative M.P. for Dulwich, and in 1892 he was knighted. He was made a baronet in 1897 and died Nov. 24, 1903. A well known racehorse owner, his stables at Chelmsfordbury were famous. He rebuilt University College Hospital, near Tottenham Court Road.

Mar Earl of Scottish title held by the family of Erskine. Mar is a district in Ayrshire and in early times was under one of the 7 Scottish earls, but the house became extinct in the 15th century. In 1565 the title was given to John Erskine but his descendant lost his lands and titles for siding with the Pretender in 1715. In 1824 the earldom was revived for a member of the Erskine family, who in 1835, became also Earl of Kellie. In 1866 he died and there was a long dispute about the title. It was given in 1875 to the Earl of Kellie and its holder is now known as the Earl of Mar and Kellie. His eldest son is called Lord Erskine.

In 1885 the title of Earl of Mar was given to J. F. Goodere Erskine, and his descendant still holds it. Owing to this unusual procedure there are two Earls of Mar. The one holds by the family of Goodere Erskine was given precedence from 1405, the earl's eldest son is called Lord Garloch (pron. Gherry).

Marabou Central African stork (*Leptoptilos*). Its undertail coverts were formerly collected for millinery and scarf trimmings. Marabou feathers come also from the allied Indian adjutant bird.

Maracaibo City and seaport of Venezuela. It stands on the strait that leads from Lake Maracaibo to the Gulf of Maracaiho part of the Caribbean Sea. It has a small harbour and is the chief seaport in the republic, oil and sugar figuring among the exports. Pop. 74,800.

Marachest Town of Rumania. It is in Moldavia, 12 m. from Focsani, on the River Sereth and is an important railway junction. It has two broadcasting stations (76 and 48.95 M).

In Aug., 1916 an army of Austrians and Germans, then invading Rumania, was met by a defending army near this town. A battle began on Aug. 13 and continued for some days. A successful German attack continued until the 19th when the battle ceased without decisive result, but the Germans did not advance further into the country.

Maraschino Liqueur made from a cherry that grows in Yugoslavia and Italy. From this the liqueur is distilled and sugar or honey is added to it.

Marat Jean Paul French revolutionary leader. Born at Boudry, Neuchâtel he studied and practised medicine, optics and electricity in France, Holland and England. In 1773 he published a *Philosophical Essay on Man*, and in 1789 started a political paper, *L'Ami du Peuple*, which attacked those in authority. He was forced to leave France, but returned in 1792 and was elected to the Assembly. He then engaged in a bitter struggle with the Girondins, which led to his assassination in his bath by Charlotte Corday, July 13, 1793.

Maratha Hindu people inhabiting extensive tracts in W. and Central India. Formerly containing the medieval Maharashtra kingdom. They number about 6,500,000 the complex of castes and tribes speaking the Marathi dialects about 2,361,000. Besides Maratha Brahmans of pure descent, there are more or less Aryanised aboriginals descended from non-Brahman camp followers in the Maratha armies. British conflicts with the 17th-18th century Maratha confederacy and early 19th century campaigns constituted the Maratha wars, which increased the area of the British Empire in India. Maratha units gained distinction during the Great War, especially in Mesopotamia.

Marathon Plain of Greece, 22 m. from Athens. It is famous for the battle fought here in 490 B.C. The Persians had invaded Greece and were encamped on a plain near the sea. There they were attacked by a Greek army, chiefly composed of Athenians, directed by Miltiades. The Greek victory, after an initial repulse, was complete.

Marathon Race Name given to a long distance foot race, so named because after the Battle of Marathon a certain Phidippides ran the 22 m. to Athens to announce the victory of the Greeks. On his arrival he fell dead. The chief Marathon race is at the Olympic Games the course being 26 m. 385 yds., covered in 1928 in the record time of 2 hours 30 minutes 57.6 seconds. There is a Marathon race for coaches.

Marazion Market town and seaport of Cornwall also called Market

Jow It stands on Mounts Bay, 4 m from Penzance, on the G W Rly, and the chief industry is fishing. Until 1835 Marazion had its own mayor and corporation. There is a causeway from here to St Michael's Mount, and in the Middle Ages the town was much visited by pilgrims.

Marble Term loosely applied to any rock capable of taking a high polish. Strictly it means a hard limestone used for ornamental purposes, and more especially those of a crystalline and granular character. The colour varies from white to black, and in some, such as the Devon and Derbyshire marbles, the markings are due to their fossil contents. Statuary marble is quarried at Carrara, Italy, onyx marble in Algeria, green serpentine marbles in Ireland, Italy and Greece.

Marble Arch Gateway near the N entrance to Hyde Park. A copy of a Roman arch. It was designed by George Nash in 1828 as an entrance to Buckingham Palace. In 1851 it was removed to its present site. In 1930 31 new buildings made great changes near the Arch, which gives its name to a station on the Central London Tube Rly.

March Market town and urban district of Cambridgeshire, 30 m from Cambridge on the L N E Rly. Pop (1931) 11 276.

March Earl of Scottish title now borne by the eldest son of the Duke of Richmond and Gordon. The first earls were so named because they were the guardians, or wardens, of the march districts. It was held by the family of Dunbar until forfeited in 1434. In 1675 it was given to the Duke of Linnnox and it has since been held by his descendants. From 1697 to 1810 there was another earldom of March, its first holder being William Douglas. His descendant, William, 3rd Earl of March, was made Duke of Queensberry (q v).

The English title of Earl of March was held by the family of Mortimer from 1228 to 1425. Later, Richard, Duke of York, the father of Edward IV, was Earl of March.

March Earl of English soldier. Roger Mortimer, born about 1287, was the eldest son of Edmund Mortimer. The holder of great estates on the borders of Wales, he was prominent in the time of Edward II. He was made Governor of Ireland and was one of the group that followed Thomas, Earl of Lancaster, in his rebellion against the king. He was put in prison, but in 1324 he escaped and went to France. There he became the lover of Isabella, the wife of Edward II, and in 1327 the pair returned to England, took the king prisoner and had him put to death. Mortimer then helped the queen to rule in the name of her son, Edward III, for three years. In 1330 the king took him prisoner at Nottingham and he was hanged at Tyburn, Nov 29, 1330.

Marchand Jean Baptiste. See FASHODA.

Marches Word used for a borderland, as those between England and Scotland and between England and Wales. In the Middle Ages there was continuous warfare in the former district, the governors of which were called Wardens of the Marches. The march district between England and Wales was governed by Lords Marchers, and castles were built to defend it, among them Ludlow and Wigmore. The authority of the Lords Marchers was taken away in 1536.

Marconi Guglielmo. Italian inventor. Born at Bologna April 25, 1874, he took out the first wireless telegraph patent on June 2, 1896. In 1899, wireless telegraphy was first used for saving life at sea. In 1901 Marconi succeeded in transmitting and receiving signals between Newfoundland and Cornwall, and since then has taken a leading part in the scientific and commercial development of wireless telegraphy, telephony and broadcasting. In 1914 he began experiments with short waves, which led to the "beam" system of long distance and directed wireless transmission.

He was awarded the Nobel Prize for Physics in 1909, made a Senator in 1915 and a Marquess in 1929. He served with the Italian forces during the Great War and after Mussolini became virtual dictator in Italy Marconi supported his cause, offering his scientific services in the conduct of the Abyssinian war.

Marcus Aurelius Roman emperor and Stoic philosopher. Born in Rome April 26, A D 121, the son of Annianus Verus, he became co-emperor in 161 with his adopted brother, Lucius Verus. He re-established discipline, ameliorated the conditions of slaves, reformed the civil laws and kept back the barbarians, who menaced the empire in the north and east.

His *Meditations*, written mostly in camp, and in the midst of public business, show him to have been a man who, at a time of universal corruption and self-indulgence, was self-denying and just. He died March 17, 180.

Mardi Gras Shrove Tuesday, or Fat Tuesday, so-called because of the fat or paraded through the streets in France, the day before Ash Wednesday. It is celebrated in Catholic countries with feasting, processions and merry-making, and is the last day of a carnival before Lent begins.

Marduk God of Babylon, where he had a splendid temple. He became god of the sun and of war and healing, and took the attributes of the old Sumerian deities.

Maree Loch in Ross and Cromarty. About 20 m from Dingwall, it is 13 m long and covers about 11 sq m. It is almost surrounded by mountains and some of the finest scenery in Scotland.

Marengo Village of Italy, about 5 m from Alessandria. Here on June 14, 1800, Napoleon gained one of his earliest and greatest victories. With 40,000 men he crossed the Alps into Italy and, at Marengo, came face to face with an Austrian army much larger than his own. The French were retiring when Napoleon arrived. He ordered an advance, brought up all his reserves and the Austrians were quickly routed.

Mare's Tail (*Hippuris vulgaris*) Water plant of the natural order Haloragaceae. It has a creeping root stock and the whorls of narrow leaves encircle the joints of the slender stems. The small green flowers are stalkless and have red anthers. It is found in shallow pools and lakes.

Margam District of the borough of Port Talbot, Glamorganshire. It is a coal mining centre. The chief building is the restored church, once a Cistercian abbey, of which some ruins, including the chapter house, remain. Near is Margam Abbey, long the seat of the Mansel and Talbot families. The estate was sold in 1921.

Margaret Saint and Queen of Scotland. A granddaughter of Edmund

Ironsides, she was born in Hungary about 1045, but came to England with her brother Edgar Atheling. The King of Scotland offered them a home, and in 1067 Margaret was married at Dunfermline to Malcolm III. In 1093 her husband was killed, and the same year the queen died leaving three sons, Edgar, Alexander I and David I, who all became kings. In 1250 she was canonised.

Margaret Queen of Scotland, called the Maid of Norway. She was the daughter of Eric, King of Norway, and through her mother, a granddaughter of Alexander III, King of Scotland. She was born in 1283, and in 1284 was declared heir to the throne of Scotland. In 1290 Alexander died and she became, in name, queen. She crossed over from Norway, but died on arriving at the Orkneys in Sept. 1290.

Margaret Queen of Henry VI. A daughter of René, Duke of Lorraine, and known as Margaret of Anjou, she was born March 23, 1430. In 1445 she was married to Henry VI at Titchfield Abbey in Hampshire. She was remarkable for the energy which she put into her husband's cause during the Wars of the Roses, although she was partly responsible for his difficulties with his subjects. From 1463 to 1470 she was in France dependent upon the benevolence of her kinsfolk. She returned to England in 1471 with her only son Edward, but the defeat of the Lancastrians at Tewkesbury put an end to her hopes of recovering the throne. She was then made prisoner, and was not released until 1476. Her concluding years were passed in France. She died at Angers, April 15, 1482.

Margarine Name given to a butter substitute. It was made originally from beef fat digested in a weak alkaline solution with pepsin, but afterwards improved by churning the fat with milk. In its modern form margarine is made from animal or vegetable fats. Usually hydrogenated or hardened coconut fat, or palm kernel oil is used with liquid cotton seed or arachis oils, and churned with soured milk. Like butter, margarine must not contain more than 16 per cent of water and no preservatives except salt. There are heavy penalties for adulterating margarine or selling it without it being clearly labelled.

Margarita Island in the Caribbean Sea. It is separated by the Strait of Margarita from the mainland of Venezuela, to which country it belongs. Asunción is the capital. The area is about 400 sq. m. Off its shores are pearl fisheries.

Margate Borough, pleasure resort and seaport of Kent. It is on the E. coast, near the North Foreland, 74 m. from London, on the S. Ry. It has attractions of every kind, including winter gardens, pier and golf links. The bathing and sands are good. The eastern part is known as Cliftonville. In 1931 a new general hospital was opened. Pop. (1931) 31,312.

Margay Brazilian name of a small tiger cat *Felis tigrina*. It ranges from Mexico to Paraguay. A forest dweller 24 in. long, with 12 in. tall, its harsh grizzly grey fur is variously spotted and ringed, the cheeks have three black stripes. It preys on small mammals and birds, and is sometimes famed for destroying rats in houses.

Margrave German title now extinct. It meant count of the mark, or march, and was equivalent to marquess. It

was given at first to those who looked after the march or border districts and later became the title of certain rulers, e.g., the Margraves of Brandenburg and Baden.

Marguerite Name loosely applied to the composite flowers of various hardy perennial herbs of the type of the ox-eye daisy, *Chrysanthemum leucanthemum*. A shrubby form from Teneriffe, *C. frutescens*, and a yellow variant, are favourite garden marguerites. The half hardy blue marguerite, *Agathaea coelestis*, is quite distinct. See DAISY.

Marguerite of Valois See VALOIS

Maria Theresa Empress of the Holy Roman Empire. A daughter of Charles VI, she was born in Vienna, May 13, 1717. As her father had no sons, he named her as his successor on the imperial throne, and ruler of Austria and persuaded the Powers to agree to this. When he died, however, a Bavarian prince was elected emperor, and Frederick the Great invaded Silesia, which he claimed by virtue of an old treaty. The result was a European war which lasted until 1748, and then, after a period of peace, came the Seven Years' War, 1756-63. Maria Theresa lost Silesia, but in 1748 she secured the election of her husband, Francis Duke of Lorraine, whom she had married in 1736 as emperor. On his death, her son, Joseph II, was elected, but Maria Theresa remained the real ruler until her death Nov. 29, 1780. Her large family included the Emperor Leopold II and Marie Antoinette.

Another Maria Theresa, also an Austrian princess, was the wife of Louis XIV.

Marie Antoinette Queen of Louis XVI of France. A daughter of the Empress Maria Theresa and the Emperor Francis I, she was born in Vienna, Nov. 2, 1755. In May, 1770, she married the dauphin, who in 1774 became King of France. She soon became unpopular, and was regarded as responsible for much of the misery in the land and as the evil genius of her husband. Although by no stretch of imagination could the terrible condition of France before the Revolution be charged against the queen, her conduct was foolish, or worse, and she seems to have possessed neither ability nor tact. Her relationship with Austria was another cause of mistrust, especially when the Revolution began. In 1792, with Louis she was arrested. Attempts to release her failed. At her trial in Oct., 1793, she defended herself with dignity and spirit, but sentence of death was passed Oct. 16, 1793, and on the same day she was guillotined. See LOUIS XVI.

Marie de Medici Queen of France, and wife of Henry IV. She was born at Florence in 1573 and married Henry in 1600. After the murder of her husband in 1610 ten years after their marriage, she was made Regent for Louis XIII. She was greatly influenced by the Italian Cardinal and his wife. After Concini's murder in 1617 she was at war with her son Louis XIII. From 1617 to 1620. In 1630 Richelieu exiled her to Compiègne, whence she escaped to Brussels. She is said to have died in poverty at Cologne, July 3, 1642.

Marie Louise Empress of the French. A daughter of the Emperor Francis I, she was born Dec. 12, 1791. In 1810 she became the second wife of Napoleon. In 1814 she returned to

Austria, but the rest of her life was passed in Italy where Parma and other territories were given to her. She had a son, the Duke of Reichstadt, by Napoleon and several children by her lover, Count von Neipperg, whom she married in 1822. She died in Vienna, Dec 18, 1847.

Marienbad Spa in Czechoslovakia. Attractively situated 2090 ft. high among pine woods, it became popular in the 19th century owing to the curative properties of its mineral springs for gout and diabetes. The old abbey of Tepla nearby originally owned the springs. The buildings are modern. Pop., about 7000.

Marigold Annual composite herb with orange or lemon coloured flowers. The common pot-marigold is *Calendula officinalis*, from S. Europe; an allied Cape marigold, white rayed with purple disk, now called *Dimorphotheca*, yields also hybridised black-eyed orange sorts. Mexican species of *Tagetes* furnish so called African and French marigolds, double flowered sort varieties occur. The orn. marigold is *Chrysanthemum segetum*. See MARSH MARIGOLD.

Marine Soldier who serves on board ship. Marines were first raised in England in 1664, but the Royal Marines in its present form dates from 1755 when the Admiralty took over the force. It has a long record of service, and its motto is *per mare per terram*. From 1859 to 1923 it was divided into two branches, the R. Marine Artillery and the R. Marine Light Infantry. The men are known popularly as the jollies, and officers and men wear white helmets. They are organised in three divisions, Chatham, Portsmouth and Plymouth, and have a depot for recruits at Deal. The Royal Marine Police Force dates from 1922.

Marine Ministry of Department of State. Some countries, e.g., Canada and France, call the department that is responsible for the navy by this name. It is the equivalent of the British Admiralty, and like it its head is a politician.

Mariners' Compass Instrument for directing the course of a vessel. It consists of a case containing a circular card or dial fixed upon a magnetised steel needle. The dial is marked out into 360 degrees, and the four cardinal points, the north coinciding with the north point of the needle. Each quadrant is divided further into eight points north north east, etc. The compass is contained in a case or binnacle and is placed usually on the highest part of the deck.

Mariolatry Term deprecatory of the Roman Catholic doctrine and practice concerning the Virgin Mary. Apologists claim that while *latreia*, worship, is due to God alone, the Virgin is entitled to *hyperlatreia*, a lesser form of veneration invoking her aid in human intercessions. Hence the repetition of the *Ave Maria*, with or without the rosary, and the veneration of images and pictures. The doctrine, abandoned by the Protestant Reformation, is repudiated by the 22nd Article of Religion of the Church of England.

Marionette Miniature figure of wood, cardboard, leather or other materials manipulated on a mimic stage by wires or strings. Puppets with movable limbs were used in ancient Egypt, Greece and Rome. In 16th-18th century Europe, especially France

and Italy, they were employed to depict Biblical stories and other incidents of dramatic interest, and survive in Punch and Judy.

Maris Jacob Dutch painter. Born at the Hague in 1837, the eldest of three artist brothers, he is known mainly as a painter of landscapes, in which the subject is subordinate to the effect. He painted "Landscape near Dordrecht," "Seaweed Carts," and "Sehevingen." He died in 1899. The work of his brother Matthew (1839-1917) has a touch of mediaevalism. "Bride of the Church," "Four Mills," and "Girl Feeding Chickens" are among his best works. William (1844-1910) lived mainly in London. His work is modern in treatment. "Cows Beside a Ditch" is an example.

Marists Roman Catholic congregation of priests and laity. Its members conduct educational, sick-nursing and missionary enterprises. Founded at Bellevue, France, in 1816, the Marist fathers and associated lay brothers and lay sisters, maintain a novitiate at Pagnon, Devon, and several missions in New Zealand, Fiji and other Pacific islands.

Marius Gaius Roman soldier and statesman. Born in 157 B.C., he gained his early experience of war in Africa against the Carthaginians. In 119 he was chosen tribune and in 107 consul as consul he ended the war against Numidia by capturing its king, Jugurtha. He next crushed the hordes of barbarians who had invaded the Roman realm. During this period he was elected consul four times in succession and at the end was hailed as the third founder of the city.

Marius was again chosen consul in 100. Between 100 and 85, although not consul, he did good work in putting down rebellions. When Sulla was preferred to Marius as the commander in the war against Mithridates, a furious quarrel broke out between them and Marius only saved his life by escaping to Africa. Soon, however, he returned to Rome and with Cinna captured the city. He then ordered a massacre of his enemies, and for five days, it is said, 4000 slaves revelled in the task of slaughter. A few weeks after being chosen consul for the seventh time, Marius died (85 B.C.).

Marjoram Genus of perennial aromatic herbs or undershrubs (*Origanum*). They are indigenous to N. temperate regions. Wild marjoram, 1 to 3 ft. high, is purple-flowered. Sweet or knotted and pot marjoram are two cultivated culinary forms whose leaves are used for stuffing and soups-flavouring. Hop marjoram or dittany of Crete (*O. dictamnus*), introduced into Tudor England, preferably grows under glass.

Mark German unit of currency. Divided into 100 pfennig and coined in silver from 1876 it was worth, in English currency, just under 1s. After the Great War its value depreciated, and in 1924 a new mark, called the Reichsmark, was introduced and given the value the mark had before the war. It is coined in silver and is issued in notes for ten marks, 20 marks, and other denominations.

There have been other coins of this name. The Anglo-Saxons had a mark and there was a Scottish mark worth 13s. 4d. In the Middle Ages the mark was also a unit of weight.

Mark One of the four evangelists. He was a Jew, probably from Cyprus, and the son of a Christian named Mary. Known as John Mark, he accepted Christianity and went on a missionary journey with S. Paul, and

his own constn, Barnabas He left them at Perga and later was in Rome with S Peter who, it is believed, supplied him with much of the information contained in his gospel. He is said to have died in Egypt. His day is April 25 He is patron saint of Venice (q v)

Mark The Gospel of Second book of the New Testament As early as A.D. 130 Papias recorded that Mark, having become Peter's interpreter, wrote down all he remembered. This apparently occurred at Rome The work is a brief, rugged narrative, a transcript of life, dealing with the acts rather than the sayings of our Lord It was utilised by Matthew and Luke as the framework for the other two synoptic gospels The last 12 verses are usually considered an addition by another pen

Mark Antony Roman statesman, properly, Marons Antonius Born about 83 B.C. he was a kinsman of Julius Caesar with whom he was closely associated He helped Caesar to defeat Pompey at Pharsalus in 48 B.C., and the two were consuls in 44 After Caesar's murder, Antony was the leader of his followers, and with Octavian, the future emperor, and Lepidus formed the triumvirate to restore order They acted with great thoroughness, and no little injustice and cruelty Antony and Octavian destroyed the army of Brutus and Cassius at Philippi, and divided the Roman realm between them Antony, as ruler of the eastern portion, went to Egypt, where he became the lover of Cleopatra More than once he quarrelled with Octavian, and the final struggle came in 31 B.C. The naval fleets met off Actium Antony's ships were scattered or destroyed, but with Cleopatra he managed to get back to Egypt. There in 30 B.C. he committed suicide Antony is known largely through the character drawn by Shakespeare in *Julius Caesar* and *Antony and Cleopatra*

Market Place where goods are sold In olden times the right to hold a market was conferred by a king or lord For the privilege money was paid, and market rights became very valuable Until recently the Duke of Norfolk owned the markets in Sheffield and the Duke of Bedford owned Covent Garden market in London To day nearly all the markets are owned and controlled by the city or borough councils The great London markets are controlled by the corporation of the city or the London County Council

Many towns, Nottingham for instance, had a large open square or market place in which the market was held, traders erecting their stalls and displaying their wares there Some of them remain Cattle markets are still held in uncovered places but these are now usually distinct from ordinary markets

Market Bosworth Village of Leicestershire It is 12 m. from Leicester, on the L.M.S. Rly There is an old grammar school, and the town has an agricultural trade Near is the field on which the battle was fought in which Richard III was killed, Aug. 22, 1485 Pop. 886

Market Deeping Village of Lincolnshire It is on the Welland, 8 m. from Peterborough, in the fen district. There is a station on the L.N.E. Rly at Deeping St. James, 3 m. away Pop. 888

Market Drayton Market town of Shropshire It is on the River Tern, 13 m. from Shrewsbury, on the G.W. Rly The parish church is Gothic.

At the grammar school Robert Clive was educated There is a trade in agricultural produce

Market Garden Land on which fruit and vegetables are grown for sale It is defined by law as "a holding wholly or partially cultivated for growing produce for market" Market gardens are found in nearly all parts of the country, but especially around Worthing the valley of the Lea in Hertfordshire, and areas in Middlesex, Kent, Derbyshire, Worcestershire, and Cambridgeshire In Scotland there is a market gardening district in Lanarkshire Fruit and vegetables are grown under glass for the early market, particularly in the Channel Islands Market producers are legally entitled to compensation from their landlords for improvements made on their holdings

Of late years more attention has been paid to the grading and packing of market garden produce Under the national mark scheme a system of grading has been introduced and packing stations for fruit have been established at Cottenham in Cambridge and in Kent.

Market Harborough Urban district and market town of Leicestershire It stands on the Welland, 16 m. from Leicester and 81 from London, and is served by the L.M.S. Rly and a canal There is a beautiful old church with a broach spire and an old grammar school, the latter a quaint building standing on wooden pillars Boots and tyres are made and the preparation of foodstuffs is a leading industry Pop. (1931) 9312

Market Rasen Urban district and market town of Lincolnshire It is 13 m. from Lincoln, on the little River Rasen, and is reached by the L.N.E. Rly Pop. (1931) 2048

Market Weighton Market town of Yorkshire (E.R.) It is 22½ m. from York and 192 from London by the L.N.E. Rly A canal goes from here to the Humber The town has a trade in agricultural produce

Markinch Burgh of Fifeshire A coal mining centre, it is 33 m. from Edinburgh, and is served by the L.N.E. Rly There are paper mills Pop. (1931) 1988

Mark Lane Street in London It runs from Great Tower Street to Fenchurch Street. It contains the new and the old corn exchange

Marl Name given to many clays which contain varying proportions of calcium carbonate They are used as a dressing for soils deficient in lime Many so called marls of the Old Red Sandstone, Permian and Triassic systems are devoid of calcium carbonate, being simply friable clays containing more or less sand

Marlborough Borough of Wiltshire It is on the Kennet, 76 m. from London, on the G.W. Rly There are two old churches, and some ancient inns and houses The Castle Inn is now part of the college There is an agricultural trade Pop. (1931) 3492

Marlborough College is on the edge of the town. Founded in 1843 for the sons of the clergy it was thrown open to sons of laymen in 1853 It stands in extensive grounds Its fine range of buildings includes a chapel and a war memorial It has accommodation for about 700 boys

The hills near Marlborough are known as

the Marlborough Downs and are famous for their sheep

Marlborough Duke of English title held by the family of Churchill. In 1626 John Ley was made Earl of Marlborough, and the title was held by three of his descendants. In 1689 John Churchill was made earl, and in 1702 duke. In 1722 his title passed to his daughter, Henrietta, Countess of Godolphin, and on her death to Charles Spencer, 5th Earl of Sunderland, a son of the duke's other daughter.

John Spencer Churchill, the 7th duke, was Lord Lieutenant of Ireland, 1870-80. In 1892 his grandson, Charles Spencer Churchill, born Nov 13, 1871, became the 9th duke. He was under secretary for the colonies in 1903-05. His eldest son became 10th duke on his father's death in June, 1934. His eldest son is called the Marquess of Blandford, and his seat is Blenheim, near Oxford.

Marlborough John Churchill, Duke of English soldier. Born at Ashe, Devon, June 24, 1650, and educated at St Paul's School, London, he became a page at court and then entered the army. He first served James II, but after the revolution of 1688 he joined William of Orange, who gave him an earldom and appointed him commander in chief. In 1702 he was created duke and given the command of the English forces in the war of the Spanish Succession. The greatest soldier of his age, Marlborough saved Austria from invasion by the French by his victory at Blenheim in 1704, and foiled Louis XIV's schemes for the invasion of Holland by the victories of Ramillies (1706), Oudenarde (1708) and Malplaquet (1709). His wealth and unscrupulousness gained him many enemies who seized the opportunity afforded by the failure of his wife's influence with Queen Anne to obtain his recall in 1711. He was accused of peculation, and dismissed from his offices. Reinstated for a time by George I, whose accession he did much to secure, he died on June 16, 1722.

Marlborough House Royal residence. In London at the western end of Pall Mall. It was built by Wren for the 1st Duke of Marlborough in 1709. It became a royal residence in 1817, and later was the home of two Princes of Wales, afterwards Edward VII and George V. From 1910 until her death it was the residence of Queen Alexandra. In 1932 a sculptured monument to the late Queen-Mother was erected here and was unveiled by King George.

Marlinspike Iron instrument used on board ship. 10 or 12 in in length, it is employed for unfastening knots and loosening rope strands when splicing.

Marlow Urban district of Buckinghamshire. It is on the Thames, 32 m from London, on the G W Rly. The grammar school dates from the 17th century. A suspension bridge crosses the river. Marlow has breweries and other industries and is much visited for its boating. It is called Great Marlow to distinguish it from Little Marlow, a village 2 m away. Pop (1931) 5087.

Marlowe Christopher. English dramatist. Born at Canterbury in 1564, he was educated there and at Cambridge. Having taken his degree he went to London where he associated with Shakespeare and other writers of the time. He was killed near Greenwich during a quarrel in 1593, just when he had been summoned before the privy council

to answer a charge of heresy. He was buried in the churchyard at Deptford, and in 1891 a memorial to him was unveiled at Canterbury.

Marlowe wrote several plays of outstanding merit, notably *Tamburlaine the Great*, *The Tragical History of Doctor Faustus*, *The Jew of Malta* and *Edward II*. He also left translations from Musaeus, Ovid, and Lucan and wrote some excellent lyrics. His unfinished play, *Dido, Queen of Carthage*, was finished by Thomas Nashe.

Marmalade Preserve originally made of quinces, now usually of Seville oranges. The fruit is cut up, pips and inner pith are removed, sugar is added, and the whole is then boiled. Lemon and apple marmalade are varieties of jam. The Central American marmalade tree, *Lucuma mammosa*, bears plum shaped fruit whose quince like pulp is called natural marmalade. The story goes that marmalade was first made for Mary, Queen of Scots, who referred to it as a pleasing food for *ma malade*. The preserve is largely made at Dundee and Paisley.

Marmont Auguste Frédéric Louis Viesse de French soldier. Born July 20, 1774, at Châtillon sur Seine, he became Napoleon's aide de camp and ably supported him in many campaigns. He was made Duke of Ragusa in 1808 and Marshal of France in 1809, and in 1811 he succeeded Masséna in the chief command in the Iberian Peninsula. After the capture of Paris by the Allies in 1814, he attached himself to the Bourbons, was given many honours, and went into exile with Charles X, dying in Venice March 2, 1852. He is remembered for his *Esprit des Institutions Militaires*, 1845, and nine volumes of *Mémoires*, published posthumously.

Marmora Sea of Inland sea between Europe and Asia Minor. The Dardanelles lead from it to the Aegean Sea and the Bosphorus to the Black Sea. It is 175 m long and covers 4500 sq m. Its waters are Turkish and its old name was Propontis. In the sea are a number of islands. One, called Marmara, is noted for its marble.

Marmoset Smallest of the monkeys. It is about the size of a squirrel, with a long tail and thick fur. There are two genera, *Midas* and *Hapale*, inhabiting tropical America. Easily tamed, they make attractive pets. The name "ouistiti" is applied to some from the whistling noise they make when disturbed.

Marmot (*arctomys*) Genus of rabbit-like rodents inhabiting N temperate regions. They are stout, thick set, burrowing vegetable-feeders, generally hibernating. Besides the Alpine marmot, 15 to 25 in long, with short, bushy tail, inhabiting the Pyrenees, Alps and Carpathians, the bobac, 15 in long, ranges from Germany's eastern frontier into Siberia, other species occur in the Himalayas and Central Asia. N American marmots include the woodchuck, 14 in long, with 7 in tail, ranging from Manitoba to Carolina, and often a farmer's pest.

Marne Department of N E France. It has an area of 3167 sq m and a population of 397,773. The western part, near Reims, is hilly, with chalky cliffs, and here and at Epernay and Châlons are the famous vineyards of Champagne. Oats, rye, barley and potatoes are grown. Reims carries on an old woollen industry, besides the manufacture of casks and cases for wines, and also glass and metal works. The chief towns are Châlons, the capital, Reims, Epernay and Vitry.

The River Marne runs through the department. It forms a canal from Paris to Dizy and has canal connections with the Saône, the Rhône and the Aisne. Communication between the departments is largely by means of these canals.

Marne Battles of the Decisive battles of the Great War. The first battle, Sept. 6, 1914 effectively checked the great German advance. The German right wing, under Von Kluck, having crossed the Marne and exposed their right flank, Joffre launched an attack under Maunoury, which made Kluck turn westwards, leaving a gap between his left and Blülow's right. The British attacked here, driving the Germans beyond the Grand and Petit Morin, and disorganising their front. Kluck began to retire on Sept. 9, exposing Blülow still more, and allowing Foch to attack. The British crossed the Marne with the Germans in full retreat.

The second Battle, July 15, 1918, marked the limit of Germany's last big offensive. Pushing on to reach Paris, they crossed the Marne east of Rheims, making a salient in the Allied lines. Foch sent a Franco-American force against the west of this curve, which drove the Germans across the Marne and, after stubborn fighting, defeated them at Soissons.

Marochetti Carlo Italian sculptor. Born in Turin in 1805 he studied art in Paris and there made his reputation. In 1848 he settled in London and in 1866 was made an R.A. but he was again in France when he died June 4, 1868. His work includes a relief on the Arc de Triomphe in Paris, the statue of Richard I at Westminster, the Inkerman memorial in St. Paul's Cathedral, London, and a statue of Queen Victoria in Glasgow.

Maronites Community of Syrian Christians. Originating in Lebanon in the 4th or 7th century they have belonged to the Roman communion since 1445. See DRUSES.

Maroon Twine bound pasteboard box of gunpowder with quick fire priming. It simulates cannon firing. During the Great War maroons gave warning of imminent air raids.

Marple Urban district of Cheshire. It is 12 m. from Manchester, on the Little River Goyt and is served by both railway and canal. The chief industry is the manufacture of cotton goods. Marple Hall, a Jacobean house, was once the seat of the families of Vernon and Bradshaw. Pop. (1931) 7390.

Marquesas Group of 13 volcanic islands N. of the Low Archipelago, S. Pacific. They are under French protection. Occupying 480 sq. m. the largest are Nukahiva, 70 m. round, and Hiva-oa, 60 m. round, six are inhabited. The people are Polynesians. The S. or Mondrani group was discovered in 1595, the N. or Washington group in 1791. France took formal possession in 1842. Pop. 2253.

Marquess Title in the British peerage ranking next below that of duke. It is a form of the German margrave. It was used in France in the form of marquis, and as marchese is still used in Italy. In England the first marquess was created in 1385. The senior marquess is the Marquess of Winchester. The coronet bears four strawberry leaves and four pearls. A marquess is styled "the most honourable." His younger sons and his daughters have the courtesy title

lord or lady prefixed to the Christian name. The wife of a marquess is a marchioness.

Marquetry Form of flat surface inlay work of ornamental woods, ivory, bone, tortoiseshell, mother-of-pearl or metals used for decorating furniture, cabinets and small articles. Early Italian marquetry consisted of geometrical wood inlays, but in later Italian work pictorial designs became common. In Holland and France in the 17th century, and in England in the 18th, some fine work was done.

Marquette Jacques French explorer. Born at L'Anjou in 1637, he became a Jesuit. In 1666 he was sent to Canada on missionary work and for 7 years he worked among the Indians who lived around the Great Lakes. In 1673 he went on a journey down the Mississippi which he was one of the first to explore. He died May 18, 1675 and left a Journal.

Marrakesh City of Morocco, sometimes called Morocco. It is 250 m. from Fez and 80 m. from the coast. There are many mosques, the most notable being the Koutubia. Leather goods and carpets are made and the city is an important trading centre. Pop. (1931) 193,582.

Marriage Union between man and woman recognised by law or custom. It arose at a very early stage in human society, as without something of the kind it was impossible to fix or enforce the responsibilities of parentage. It was also necessary in the interests of the woman and for determining the ownership of property.

Marriage may be monogamous or polygamous. Among many primitive peoples polygamy was, and is, recognised. But in Christendom monogamy was gradually established, and today the laws of all Christian countries forbid polygamy. Another form of early marriage was the group marriage, a union of men and women indiscriminately, but only within a certain circle. Polyandry, the union of one woman with two or more men, is also known to have existed in certain early societies.

The customs which attend marriage are extremely old and varied. Among many peoples there is a pretence that the woman is captured. In other cases she is purchased and payment is made for her to her father or other relative. On the other hand in some cases money or property is given with her. In almost all states of society her legal position is inferior to that of her husband, and in quite a number she is regarded merely as his property. From this idea even the most advanced communities have only broken away in recent years.

LAW AND REGULATIONS Every community has its own marriage laws. In England no one under 16 years of age can be legally married, and before the age of 21 the consent of the parents must be obtained. Marriages between near relatives are forbidden. There is a table of prohibited degrees drawn up by the Church but the secular law now allows marriage between a man and his deceased wife's sister, and other unions between persons of similar degrees or relationship. These were legalised by acts passed in 1907, 1921 and 1931 but such unions are still disliked by the Church.

In England marriages can be celebrated either in the registrar's office or in Church, either by certificate licence, or banns. Of civil marriages the simplest form is by certificate. The parties must give personal notice to the registrar of the district in which they have

lived for at least 7 days. If they have lived in different registration districts notice must be given in each. In the case of marriage by licence, only one of the parties need give notice, but he or she must have lived in the district for at least 15 days, the other party must reside in England or Wales at the time. In the case of marriage by certificate, the registrar will issue the certificate 21 days after the notice has been given, and the marriage can take place within three months. In the case of a marriage by licence he will issue it on the following day, and the marriage can take place within six months. A certificate costs a few shillings, but a licence costs about £2 10s.

Religious marriages are either by banns or by licences. If the former, the names must be read out on three consecutive Sundays in a church of the parish in which the parties reside or in which they habitually worship. If they live in different parishes the names must be read in both. The clergyman can then marry them at any time. If a licence is preferred to banns this can be obtained from a surrogate of any archbishop or bishop.

Another method is to secure a special licence from the office of the Archbishop of Canterbury at 23 Knightbridge St., London, E.C. This costs about £25 and allows the parties to be married at any time and at any place without previous residence therein.

SCOTS LAW The law of Scotland on the subject differs a good deal from that of England. No person can marry under the age of 16, but the requirement of English law that the consent of the parent is required to the marriage of any person under 21 has no place in the law of Scotland. No valid marriage can take place in Scotland unless one of the parties has his or her usual residence in Scotland, or has resided in Scotland for 21 days immediately preceding the marriage.

In Scotland a marriage may be either regular or irregular. Both are fully binding, and only differ in the manner in which they are constituted. A regular marriage must be celebrated by a minister of religion after the banns have been proclaimed or a proper notice of the marriage has been given, but it need not take place in a church. An irregular marriage may be contracted in one of three ways: (1) The parties may consent to marry one another, and this is sufficient to constitute the marriage.

(2) If a woman has allowed a man to have intercourse with her on the faith of a promise previously made to marry her, a valid marriage is constituted by the intercourse.

(3) The third method is by habit and repute. In this the consent necessary for the marriage may be inferred from the fact that the parties have lived together as man and wife for some considerable time, and that the woman has occupied the position of a wife in the man's household and has been regarded as his wife by general repute.

All regular marriages must, by law, be registered within three days. Irregular marriages need not be registered, but the parties may have the marriage registered by applying jointly to the sheriff substitute at any time within three months of the marriage. Failure to register a marriage will not affect its validity.

Marrow Soft tissue in the interior of bones. Red marrow, in spongy bones, contains delicate cells from which the red corpuscles are largely recruited. Yellow marrow, comprising about 95 per cent of fat-cells fills the cavities of tubular bones. The so-called spinal marrow, occupying the cavity

running through the vertebrae, is the nervous system's central axis.

Marryat Frederick, English author. Born at Westminster, July 10, 1792, he entered the navy and was on active service during the latter part of the war with France. In 1830, having just begun to write novels, he retired from the service as a captain. He devoted some of his time to improving the system of signalling at sea, for which he was made an F.R.S. He died at Langham, Norfolk, Aug. 9, 1848.

Captain Marryat's many books, in which he embodied his experiences of the sea, were, and still are among the most popular of boys' stories. The first was *Frank Midmay*, and some of the best are *Peter Simple*, *Jacob Faithful*, *Mr Midshipman Easy*, *Masterman Ready* and *The Children of the New Forest*. His daughter, Florence Marryat (1833-99), wrote many novels and some books on spiritualism.

Mars First of the superior planets beyond the earth. Its distance from the sun is 141,384,000 m., its mean diameter 4230 m., or rather more than half that of the earth, and its year measures 687 solar days, with a day of 24 hrs 37 min 23 secs. Mars has two small satellites discovered in 1877, one revolving round the planet in 7 hrs., the other in 30 hrs. Well-defined markings or "canals" were discovered by Schiaparelli in 1877 and these and other regional markings show seasonal changes and suggest the presence of snow and vegetation. Some think that Mars is inhabited, as its climate could sustain life in some respects as we know it.

Mars Roman god of war and husbandry. Although the Romans commonly identified him with the Greek Ares, he never lost his essentially Latin character. Deemed the legendary father of Romulus, he named the first month of the Roman year. His first altar stood in the Campus Martius, used by Roman youth for warlike exercises.

Marsala Seaport of Sicily. Situated at the island's westernmost point, 19 m SSW of Trapani, it is the centre of a wine-producing region, and during the 19th century developed a large export trade in Marsala wine, a fortified white type with 20-25 per cent alcohol, vatted and blended like sherry. The town, whose name is Saracenian, witnessed Garibaldi's landing, 1860. It occupies the site of the Carthaginian stronghold Lilybaeum, whose surrender to Rome, 241 B.C., ended the First Punic War. Pop. 50,200.

Marsden Market town and urban district of Yorkshire (W.R.). It is 7 m from Huddersfield and 196 from London by the L.M.S. Rly. Here are textile manufactures. Pop. (1931) 5720.

Marseillaise National song of the French republic. It was written by C. J. Rouget de Lisle in 1792 and was first sung by a body of men from Marseilles on entering Paris during the disturbances of that year.

Marseilles City and chief seaport of France. It stands on the Gulf of Lyons, 410 m by railway from Paris. It has enormous docks which a canal connects with the Rhône. The buildings, mainly modern, include a magnificent cathedral. The Hotel de Ville dates from the 17th century. The chief industry is shipping. It has a broadcasting station (315 M, 1.6 kW). Pop. (1931) 800,881.

Marshal Title of honour It meant a man who had the care of horses and at first the earl marshal was something like master of the horse to the king To day in England he is one of the great officers of state There is also a marshal of ceremonies in the royal household

As a military title, marshal originated in France and was given to famous soldiers by Louis XIV Napoleon made great use of the dignity as a reward for services in the field It fell into disuse after 1871 but was revived in 1916 for those who had distinguished themselves in the Great War The English equivalent is field marshal (qv)

Marshall Group of islands in the Pacific Ocean They lie to the east of the Carolines just north of the equator Jalut is the capital They cover 160 sq m and produce copra The islands were taken by Germany in 1885 and since the Great War have been ruled by Japan under mandate from the League of Nations Pop 10,000

Marshall-Hall Sir Edward English lawyer Born at Brighton Oct. 29 1865 he was called to the bar in 1883 He appeared with unrivalled distinction in some of the leading criminal cases of his time Made a KC in 1898, he was Unionist M P for Southport, 1900-06 and East Totter, 1910-16 when he was appointed Recorder of Guildford Knighted in 1917 he died Feb 24, 1927 Hon E Marjoribanks wrote his life

Marshal of the Air Highest rank in the Royal Air Force It corresponds to admiral of the fleet in the navy, and field marshal in the army

Marshalsea Former prison in South London Built originally in the 14th century, or earlier it was pulled down about 1780, rebuilt in 1811, closed in 1849 and finally demolished in 1887 Dickens's father was here for debt, and the novelist describes it in *Little Dorrit*

Marsh Mallow (*Althaea officinalis*) Perennial herb of the mallow order, native in temperate regions Occurring on British maritime marshlands, it is a downy plant 2 to 3 ft high, with large thick, oval leaves and rose-coloured 1 to 2 in flowers The highly mucilaginous root furnishes gullemaise lozenges and marsh mallow cream See HOLLYHOCK

Marsh Marigold (*Calthia palustris*) Perennial herb of the buttercup order native in N temperate regions Its fleshy, creeping rootstock bears large smooth kidney shaped leaves and showy 1 to 2 in flowers of golden potalike sepals Double flowered garden varieties exist.

Marston Moor District between York and Knaresborough famous for the battle of 1644 The Parliamentary army aided by the Scots, was hesleging York Prince Rupert marched north to relieve it The Parliamentarians, under Fairfax and Cromwell and the Scots prepared to meet the Royalists on Marston Moor and were followed by Rupert and the force under Newcastle that had been freed from York The battle took place on the evening of July 2 Fairfax was routed but Cromwell's forces turned the scale The Royalists, about 25,000 strong, were utterly beaten, leaving about 3000 dead on the field

Marsupial Lowly order of the mammalia. Coming next above

the most primitive groups, it is distinguished by the young being born in an immature condition and continuing their development in an abdominal pouch or marsupium The order includes the opossums and bandicoots, wombats kangaroos and phalangers

Martello Tower Circular fort erected at intervals on the English coast and in the Channel Islands at the time of the threatened invasion by Napoleon They are about 40 ft in height with the entrance about 20 ft above the ground, and were intended to accommodate a small garrison with cannon Originally a martell was an Italian bell tower for giving warning against pirates

Marten (*Mustela* or *Martes*) Name of various arboreal carnivorous mammals of the weasel family distributed in the N hemisphere The European pine marten 18 in long with 9 to 12 in tail, still lingers in Britain The white breasted beech-marten is widely distributed in Central Europe and W Asia The largest of all, the American fisher marten, furriers call the Virginian pole cat.

Martha A sister of Lazarus and Mary at whose village home in Bethany, near Jerusalem, Jesus was an honoured guest (Lk x Jn xi xli) Our Lord gently reproved the anxious spirit, in contrast with her sister's, in which she discharged her household obligations She is habitually cited as the exemplar of the practical housewife

Martial Roman epigrammatist. His full name was Marcus Valerius Martialis, and he was born in Spain about A D 43, but after 66 passed much of his life in Rome He died in Spain about 104 Martial is famous for the wit and polish of his unrivalled epigrams

Martial Law Law administered by the military authorities in times of danger or disorder When it is proclaimed the civil law is superseded by the rule of the soldiers who have extensive powers of arresting and punishing offenders against the peace For many years there has been no necessity to place Great Britain under martial law but in 1920 and 1921 parts of Ireland were under it It was proclaimed in Spain during the troubles of 1930 and 1931 and there have been other cases of its use in Europe since the Great War, for instance in Prussia in 1932

Martin Name of various perching birds of the swallow family Two, brooding in Britain, spend the northern winter in S Africa The black and white house martin, *Chelidon urbica*, 5½ in long, makes rough mud built, swallow like nests. The lighter hued sand martin, *Cotile riparia*, 4½ in long, forms nesting colonies in sandstone cliffs Purple martins are American

Martin French saint and bishop The son of a Roman soldier, he was born about 316 and became a soldier About 360 he founded a monastery near Poitiers and won a great reputation by his piety and learning He was Bishop of Tours from 371 till his death in 400 His day is Nov 11

Martin Name of five Popes. Martin I was Pope from 649 to 654 He was then deprived of his office and sent into exile He died Sept. 16, 655 and was later regarded as a saint Martin II was Pope 882 84 and Martin III, 942-46 Martin IV, a Frenchman was Pope 1281-85, having previously played an important part in state

affairs in France. Martin V. was Pope, 1417-31. He was elected to put an end to the great schism in the church at the Council of Constance. He restored the power of the Papacy, and died in Rome, Feb 20, 1431.

Martineau Harriet English writer. A sister of James Martineau, she was born in Norwich, June 12, 1802. In 1832 she published her popular *Illustrations of Political Economy*. She also wrote a novel, *Deerbrook, Society in America and Eastern Life*. Her other works include *A History of the Thirty Years' Peace*, translations of Comte, and an autobiography. An invalid for much of her life, an agnostic, and in politics a philosophic radical, she died June 27, 1876.

Martineau James English theologian. A member of a Huguenot family, he was born in Norwich, April 21, 1805, and entered the Unitarian ministry. In 1840 began his long connection with Manchester New College, London. He was professor there from 1841 to 1869, and principal from 1869 to 1885. He was also minister of a chapel in Little Portland Street, London, 1860-73. He died in London, Jan 11, 1900.

Martineau won fame as a preacher and teacher, but especially as a philosopher. His most important book is *The Seat of Authority of Religion*, 1890.

Martin-Harvey Sir John English actor-manager. He was born at Wyvenhoe in Essex in June 22, 1867. Educated at King's College School London and intended for a naval architect, he later studied for the stage and made his first appearance in 1881 at the Court Theatre. He was with Henry Irving's company for 14 years. In 1897 he began work under his own management, and was knighted in 1921.

He has played in Shakespeare, *The Only Way* (achieving remarkable success in the character part of Sydney Carton), *The Corsican Brothers*, *Pelleas and Melisande*, *The Cigarette Maker's Romance*, *The King's Messenger*, etc.

Martini Friedrich Austrian soldier and inventor. Born in Hungary in 1832, he became an officer in the Austrian army, served in the engineers, and later practised as a civil engineer in Switzerland. He invented a rifle taken up by the British Government and called the Martini-Henry. In this he applied a breech mechanism to the rifle of Henry Martini who was also a poet, died in 1897.

Martinique Island of the West Indies. It is situated between Dominica and Santa Lucia and belongs to France. Its area is 385 sq m. A mountainous and volcanic region, it yet contains much fertile soil, whereon sugar, tobacco and coffee are grown. Rum is produced and exported. There are extensive forest areas. Fort de France is the capital and chief seaport. St Pierre, the old capital, was destroyed in 1902 by an earthquake. The island is under a governor, a privy council, and an elected council. Pop 234,695.

Martinmas Festival of St Martin. It is on Nov 11, and was an important date in the Middle Ages. On it fairs were held and oxen killed for food during the winter. It is still a quarter day in Scotland, and if a period of mild weather occurs about this time it is called St Martin's summer.

Martyr Term denoting a witness, especially one who willingly suffers death rather than surrender his religious faith. The first Christian martyr was the deacon Stephen (Acts vii). Under the Roman

Empire many Christian confessors suffered persecutions and, if to the death, were remembered as saints and martyrs. Saint Alban, said to have suffered death at Verulam during the Diocletian persecutions, A.D. 303, giving his name to St Albans, Herts, is honoured as Britain's protomartyr. Martyrdoms occurred in the mediæval church down to the 16th century. Others have attended missionary enterprises in heathen lands. Both Roman Catholics and Protestants have their martyrs, the latter the subject of a once popular work, Foxe's *Book of Martyrs*.

Marvell Andrew English poet. He was born at Winstead, Yorkshire, March 31, 1621, and educated at Hull and Trinity College Cambridge. He was a great friend and colleague of Milton, whom he helped in his blindness. He died in London, Aug. 16, 1678. His "Thoughts in a Garden" gained for him the title of "The Garden Poet." He is also remembered for his "Bermudas," "Ode to Cromwell," and the verses "To His Coy Mistress." He wrote many satires in verse, the popular nursery rhyme "Mary has a Little Lamb," and some vigorous pamphlets.

Marwick Head Promontory of Mainland, one of the Orkney Islands. Near here Earl Kitchener was drowned in the *Hampshire* in 1916, and a memorial tower has been erected on the headland. It was unveiled in 1925.

Marx Heinrich Karl German economist. Born at Trien, May 5, 1818, he was a Jew and was educated at the Universities of Bonn and Berlin. He became a journalist, but his advanced views led to his expulsion from Germany and then from Paris, where he lived in 1843-44. He was again in Germany in 1848, but after the failure of the rising of that year, he went to London. There he lived until his death, March 14, 1883.

Marx exercised an enormous influence on the Socialist and Communist movements, and his doctrines are still accepted by a large number of their adherents. In 1847, at Brussels, he and Frederick Engels issued the manifesto which states the aims of the Communists. These views are more fully developed in his book, *Capital*, published in 1867. Shortly, his ideas are that all wealth is produced by labour and should go to labour and that, as this leaves nothing for the capitalist who can therefore never accept the system, the workers must prepare for a class war in which capitalism will be destroyed.

Mary Mother of Jesus. She was sister consin of Elizabeth, John the Baptist's mother. Mary brought her twelve-year old son to Jerusalem for the Passover, attended the marriage feast in Cana, was committed by our Lord to John's care at the Crucifixion, and traditionally died at Jerusalem. She is the Madonna of Christian art.

Mary Queen of George V. She was born at Kensington Palace, May 26, 1867, the only daughter of the Duke and Duchess of Teck. Through her mother, a daughter of the Duke of Cambridge, she was descended from George III, and was thus a second cousin of her future husband. She was named Victoria Mary Augusta Louise Olga Pauline Claudine Agnes. The Princess May, as she was called, was educated at home, White Lodge, Richmond Park, and passed some three years in Italy. In 1891 she was betrothed to Albert Victor, Duke of Clarence. He died early in

1802, and in May, 1803 the princess was betrothed to George Duke of York. On July 6, 1803, they were married in London.

In 1801 after long tours abroad, they became Prince and Princess of Wales and visited Australia. In 1810 George became king and on June 22, 1811, they were crowned in Westminster Abbey. During the period of the war, and after, Queen Mary filled with great dignity, constant industry and unfailing courtesy, the high position of first lady of the land. Her solicitude for the troops was notable. During the King's illness in 1828-29 she acted as President of the Council of State and when George V died in Jan. 1936, her son, Edward VIII, commanded that she should continue to be styled Queen Mary. Her youngest son, John, died in 1919, and her other children are the Dukes of York, Gloucester and Kent, and Mary, Princess Royal.

Mary I. Queen of England. Daughter of Henry VIII and Catherine of Aragon, she was born at Greenwich, Feb. 18, 1516, and carefully educated in the Roman Catholic faith. She lived a retired life, chiefly in Hertfordshire, until she was 37.

In July, 1553, her half brother, Edward VI, died and Mary was proclaimed queen. In 1554 she married Philip II, king of Spain, but the union was unhappy. The queen, who had no children, died Nov. 17, 1558. Mary's short reign was marked by the restoration of the Roman Catholic religion in England, and the persecution of the Protestants.

Mary II Queen of England. A daughter of James, Duke of York, afterwards James II, and his first wife, Anne Hyde, she was born in London, April 30, 1662. In 1677 she married William, Prince of Orange, and for the next ten years lived in the Netherlands. In 1688 William was invited to take the British throne, and after James II had fled he and his wife became joint rulers of Great Britain. Mary was responsible for managing the affairs of state during her husband's frequent absences. She died of smallpox, Dec. 28, 1694, and was buried in Westminster Abbey. She had no children.

Mary Princess of Great Britain. She was born at Sandringham, April 25, 1897, the third child and only daughter of King George and Queen Mary, her full name being Victoria Alexandra Alice Mary. She was educated at home and went through a course of study in a children's hospital in London. On Feb. 28, 1922, the princess married Viscount Lascelles who in 1929 became Earl of Harewood. They have two sons. The elder, born Feb. 7, 1923 is George Henry Hubert, Viscount Lascelles, and the younger, born Aug. 21, 1924, Hon. Gerald David Lascelles.

The princess has many social and philanthropic interests both in London and Yorkshire where is her country home. One of these is the presidency of the Girl Guides Association. In 1932 she was created Princess Royal.

Mary Queen of Scots. Born in 1542, daughter of James V of Scotland and Mary of Lorraine, Mary became Queen of Scots when only a week old owing to the death of her father at the battle of Solway Moss. She became also Queen of France by her marriage to Francis II and was helpless to the English throne as next of kin to Elizabeth Tudor.

She greatly impressed the French court by her gaiety and beauty. On the death of her husband she returned in 1560 to Scotland.

A staunch Catholic she was opposed to the Calvinistic Protestant movement which had made headway through the teaching of John Knox. She married her cousin, Lord Darnley, who, jealous of her Italian secretary, Rizzio, had him murdered in the Queen's presence and was himself murdered soon afterwards. Mary then married Lord Bothwell, which caused an insurrection among the nobles. They imprisoned her in Loch Leven Castle, from which she escaped and fled to England.

Elizabeth kept her imprisoned for nineteen years. Her presence in England led to a series of Catholic plots in her favour against Elizabeth. In 1586 Mary was accused of complicity in Babington's plot, mainly on the evidence of the Casket Letters (q.v.). She was executed on a charge of high treason at Fotheringhay on Feb. 8, 1587.

Maryborough Market town of Leix (formerly Queen's County), Irish Free State, also the county town. It is 51 m. from Dublin on the Gt. S. Ry. There is a trade in agricultural produce. The town was named after Mary Tudor.

Maryborough Town of Victoria, Australia. It is 113 m. from Melbourne with which it is connected by railway. Here are railway shops, and gold is mined in the neighbourhood. Pop. 5800.

Maryborough Town and port of Queensland, Australia. It is on the River Mary, 20 m. from its mouth and 167 m. north of Brisbane, on the railway line from Brisbane to Rockhampton. It is the trading centre for a district, gold and coal are mined and sugar is grown. Pop. (1931) 12,000.

Maryland State of the United States. It is bounded on the N. by Pennsylvania, on the E. by Delaware, and on the S. and W. by Virginia. Chesapeake Bay divides it into two parts. Its land area is 9,870 sq. m., it is hilly in the west, but flat in the east. Annapolis is the capital, but Baltimore is the largest city. Wheat, maize and tobacco are grown. Mining and fishing are other industries. The state is governed by a general assembly of two houses. It sends two senators and six representatives to Congress. Maryland was founded in 1034 and named after Henrietta Maria. It was one of the 13 original states. Pop. (1930) 1,031,526.

Marylebone Borough of the county of London. It lies between Oxford Street and Hampstead, with Paddington on the west. In it are the districts of St. John's Wood and most of Regent's Park, Cavendish and Portman Squares, Harley Street and Wimpole Street, as well as the railway stations of Marylebone and Baker Street. Here, too, are Lord's Cricket Ground, Bedford College, Queen's Hall and Madame Tussaud's. The full name of the borough is St. Marylebone, or St. Marys on the brook, the brook being the Tyburn. Much of the land forms the Portland estate, now the property of Lord Howard de Walden. The buildings include a fine parish church. Pop. (1931) 97,620.

Marylebone Cricket Club Cricket club, regarded as the governing body of the game. It is popularly known as the MCC, and its headquarters are at Lord's Cricket Ground, St. John's Wood, London. Its committee is responsible for any alteration

in the laws of the game, which must be approved by a two-thirds majority of the members. The club dates from 1787. Each year a prominent public man is elected as president.

Mary Magdalene Woman of Magdala or Magadan, near the Sea of Galilee, mentioned in the New Testament as a devoted follower of Jesus. Seven demons were cast out of her, she witnessed the Crucifixion, found the empty tomb, and first saw the risen Lord. Incorrectly identified in the early Western Church with the unnamed penitent who anointed Christ's feet in Simon's house, the word *magdalen* came to designate fallen women in general, and emotional tearfulness is similarly called *maudlin*.

Maryport Urban district, seaport and market town of Cumberland. It is 28 m from Carlisle, on the LMS Rly. The chief industry is shipping, for which there are good docks. The old name of the place was *Ellenport*. It was named *Maryport* when the harbour was built in 1750, because in 1568 Mary Queen of Scots landed here on her escape from Scotland. The Romans built a fort here. Pop. (1931) 10,182.

Masaccio Italian painter. Born near Florence, Dec. 21, 1401, his name was Tommaso Guidi. Masaccio is a nickname meaning slovenly Tom. There are some notable frescoes by him in Florence and he is represented in the National Gallery, London.

Masai People of Hamitic-negro stock in E. equatorial Africa. Tall, sinowy, thin lipped, chocolate-coloured, with Caucasoid nose, they speak a Nilotic language. Of warlike disposition they long dominated a mountainous region in Kenya and Tanganyika formerly called *Masai-land*, habitually attacking caravans and expeditions. Now under British control, partly in the vicinity of Mt. Kilima-Njaro, partly in Kenya, they number 40,000 nomadic herdsmen, tending 750,000 cattle.

Masaryk Thomas Garrigue. President of the Czechoslovak Republic. Born March 7, 1850, in Moravia, a coachman's son, he was first a blacksmith. After study at Vienna and Leipzig Universities he took to teaching and at 29 became lecturer on philosophy and professor at Prague. He was a member of the Austrian parliament, 1891-93. Re-elected in 1907 he opposed the encroachment of Germany on Austria and the aggressive policy of Austria in the Balkans. While lecturing at King's College, London, during the War, he organised the Czechoslovakian Movement for Independence. He is the author of *The New Europe*, 1918, and *The Making of a State*, 1925. He was made President of Czechoslovakia in 1918, re-elected in 1920 and again in 1927. At the age of 85 he resigned the Presidency in Dec., 1935, and Dr. Benes succeeded him.

Mascagni Pietro. Italian composer and conductor, born on December 7, 1863, at Leghorn. After some public success he entered Milan Conservatoire, abandoning it to learn by experience in an operatic company. His opera, *Cavalleria Rusticana*, 1890, made him world famous. His later works include, *L'Amico Fritz*, *Iris* and a *Rapsodia Salanica*, an experiment in film opera.

Masefield John Edward. English poet. Born at Ledbury, June 1, 1878, the son of a solicitor, he was educated at King's School, Warwick, and trained as

a seaman. After a voyage to Chile as an apprentice he became an officer in the merchant service. He left the sea after a few years and spent some time in New York before returning to England. In 1902 he published *Salt Water Ballads*, and in 1911, *The Everlasting Mercy*. Henceforward he took high rank among the poets of the day. Other notable poems include, *The Widow in the Bye Street* and *The Daffodil Fields*. In 1930 he was appointed poet laureate.

Masefield has also written dramas and a good deal of prose. His dramas include *Pompey the Great*, *The Faithful*, *Good Friday*, *The Trial of Jesus* and *The Coming of Christ*. Among his novels are *Captain Margaret*, *Multitude and Solitude*, *Sard Harker*, and *The Hawbucks*. Other books are *The Old Front Lane* and *Gallipoli* (dealing with the World War) and a study of Shakespeare. He also edited *The Voyages of Captain William Dampier*. At his home at Boar's Hill, near Oxford, he constructed a private theatre.

Masham Market town and urban district of Yorkshire (N.R.). It is 8 m from Ripon on the River Ure, and is reached by the L.N.E. Rly. There is an agricultural trade, and brewing is another industry. A *fair* is held in September. Pop. (1931) 19,000.

The title of Baron Masham was given in 1891 to Samuel Canliffe Lister, the owner of great textile mills at Manningham, Bradford. He died Feb. 2, 1906. The title passed in turn to his sons, but became extinct when the young died in 1924.

Mashonaland District of South Africa. Granted to the British South Africa Company in 1889, it now part of Southern Rhodesia (*qv*). It is the eastern part of the country and is named after the Mashonas, a Bantu tribe, who live in the region.

Mask Lough or lake of Ireland. It is on the borders of counties Galway and Mayo, and is about 12 m long, covering some 39 sq m. In it are many islands.

Maskelyne John Nevil. English entertainer. Born at Cheltenham, Dec. 22, 1839, he became a public entertainer. With a partner he founded in 1865 the firm of Maskelyne and Cooke, and his reputation was increased when he exposed the tricks of some spiritualists. In 1873 the firm moved to London, its first home being the Egyptian Hall, Piccadilly.

Maskelyne had an extraordinary genius for staging optical and other illusions and the secret of some of them baffled all enquirers. In 1905 the firm moved to St. George's Hall, Regent Street. It became Maskelyne and Devant, but after the retirement of David Devant was carried on by Maskelyne's grandson and known simply as Maskelyne's. John Maskelyne died Mar. 18, 1917.

Mason One who cuts, dresses and sets building stones and similar material. The term monumental mason is applied to one who works in stone for memorials, etc.

The trade is represented by the *Masons' Company*, one of the smaller of the London Livery Companies.

Masons' marks used in medieval buildings were devices cut in the stones to identify the responsible mason.

Mason Alfred Edward Woodley. English novelist. Born May 7, 1865, he was educated at Dulwich College and

Mason Trinity College, Oxford After a spell of secretarial work he began to write, and in 1895 *A Romance of Hasldale* appeared. In 1890 he scored a success with *The Courtship of Morrice Bueller* the first of a number of novels in the romantic style in which historical incidents were sometimes used. Perhaps the best are *Miranda of the Balcony*, *Clementina*, *The Broken Road*, *The Four Feathers*, and *Running Water*. He also wrote two excellent detective stories, *At the Villa Rose* and *The Prisoner in the Opal*. These have been dramatized, as have several of his novels. His play, *The Witness for the Defence*, was afterwards made into a novel. His later works include *The Winding Stair*, *The House of the Arrow*, *No Other Tiger*, and *The Dean's Elbow*. From 1900 to 1905 Mason was Liberal M.P. for Coventry and during the Great War he served with the Manchester Regiment on the staff.

Mason Sir Josiah English philanthropist. Born at Kiddermminster, Feb. 23, 1795, of humble parentage he settled in Birmingham and in 1825 began to manufacture hardware. He made a speciality of pen nibs in which he built up an enormous business, and he was also a pioneer in the electroplating industry. Knighted in 1879, he died June 16, 1881. Mason was the founder of Mason College at Birmingham which was the nucleus of the great university there. He also founded an orphanage at Erdington.

Masonry Art or trade of building with stone, concrete blocks or similar material. The blocks are roughly shaped in the quarry (quarry faced), or hammered to give a flat surface and straight edges (pitch faced), and finally dressed or accurately finished. Rubble masonry is where rough blocks are built up with or without mortar, and ashlar masonry where the dressed blocks are carefully set with thin joints of mortar.

Maspero Sir Gaston Camille Charles French Egyptologist. Born at Paris, June 23, 1846, in 1874 he became Professor of Egyptology at the College de France. He was for many years the keeper and director of the museum at Bouak, and carried out notable excavations at Memphis, Karnak, Sakkarah, etc. He was the author of several works on the history of Egypt. He was awarded the KCMG in 1909, and died in Paris, June 30, 1916.

Masque Word used for an occasional entertainment combining drama, songs, dances and spectacles the whole embodying an allegory. Masques were fashionable in England in early Stuart times, the Inns of Court staging many. Ben Jonson, Milton (whose *Comus* is the classic example), and Campion wrote masques.

Masquerade Revel in which the participants disguise themselves with quaint clothing and wear a mask over the eyes. From the early thirteenth century it was popular in England with all classes, particularly in the reigns of Edward III and the Stuarts. It survives, modified, in fancy dress carnivals.

Mass Name used for the celebration of the Holy Eucharist according to the rites of the Roman Catholic Church. It is a commemoration of the Passion, a propitiatory sacrifice, a service of praise and thanksgiving and a means of grace to all its participants and celebrants. A high mass is sung and solemnized with incense. A low mass is said. A requiem mass is one for the dead.

Massachusetts State of the United States. In the N.E., it is one of the original New England states. It has a coastline on the Atlantic, and an area of 8266 sq. m. Boston is the capital and the largest town. Other populous centres are Worcester, Springfield, Fall River, Cambridge and New Bedford. It is governed by a legislature of two houses and sends two senators and 15 representatives to Congress. Massachusetts was founded in 1020 when the Pilgrim Fathers made their first permanent settlement here. Massachusetts Bay is a broad inlet in the coast, Harvard University is one of many educational institutions in the state. Pop. (1930) 4,249,614.

Massage System of treating complaints by rubbing and similar manual movements. It is efficacious for rheumatism, sciatica, arthritis and kindred ailments. It is also used for sprains and other injuries, and to soothe nervous and sleepless persons. It was practised by the Chinese and other peoples in ancient times and was brought into England in the 18th century. It was developed in the 19th, largely by the Swedes, and became a recognised method of treating affections of the joints. The chief English centre for the training of masseurs is the National Hospital, Queen's Square, London. E.C. Those entering the profession usually secure a certificate, given after examination by the Chartered Society of Massage and Medical Gymnastics, Tavistock Square, London W.C.1.

Masséna André French soldier. Born at Nice, May 6, 1758, he is considered to have been Napoleon's greatest general. He served in the Sardinian and French armies and distinguished himself at the battles of Rivoli, Zurich, the siege of Genoa, Essling and Wagram. Made a marshal in 1804, in 1810 he fought against Wellington in Spain (Torres Vedras), and was created Duke of Rivoli and Prince of Essling. At the Restoration he supported the Bonapartes. He died April 4, 1817, leaving seven volumes of memoirs which were published in 1849-50.

Massey William Ferguson New Zealand statesman. Born at Limerick, Ireland, March 26, 1850, he went to New Zealand in 1870 and became a farmer. In 1894 he entered parliament and in 1903 became leader of the Conservative opposition. In 1912 he became prime minister, and his character and ability enabled him to lead New Zealand with success throughout the World War. A member of the Imperial War Cabinet in 1917-18 he represented his country at the Peace Conference in Paris, 1919, and attended the Imperial Conference in London in 1921. He was defeated at the general election in 1922 and died May 10, 1925.

Massillon Jean Baptiste French divine. Born at Hyeres, June 24, 1663, he became a priest. In 1717 he was made Bishop of Clermont and delivered memorable sermons before the king and court in Paris. One of his greatest efforts was his funeral oration over Louis XIV. He died Sept. 18, 1742.

Massinger Philip English dramatist. Born in Nov. 1583, at Salisbury, he was educated at Oxford. Of his many plays 15 remain, including, *A New Way to Pay Old Debts*, *The Maid of Honour*, and *The Bashful Lover*. Massinger died in March, 1640, and is buried in St. Saviour's, Southwark.

Massingham Henry William English journalist. Born at Norwich in 1860, he was educated at the grammar school there. After experience in a newspaper office in Norwich, he settled in London and became editor of *The Star*. As editor of *The Daily Chronicle*, 1895-99 he was a great success until his views on the war against the Boers led to his retirement. He served as London editor of *The Manchester Guardian*, worked for *The Daily News*, and then edited *The Nation* from 1907 till 1921. He died Aug. 27, 1924. Massingham was a great journalist, one who took his calling very seriously. Everything he wrote was charged with his own individuality and was worth reading, although he managed frequently to find a point of view that was antagonistic to the general feeling of his countrymen.

Mast Straight, upright spar of timber or hollow metal. Secured to a sailing vessel's keel, it supports the deck yards, sails and rigging. Originally a single pole, it became a compound or made mast, distinguished from the deck upwards as lower-mast, top mast, top gallant mast and top gallant royal. There are fore, main and mizzen masts and even more. A jury mast is an emergency spar. Masts also serve for supporting cables, aerials, overhead trolleys and airship moorings.

Master of the Horse Official in the royal household. He looks after the stables and kennels and ranks as the third official of the court. Before the Great War the office was a political one and its holder was changed whenever there was a new government.

Master of the Rolls Judge of the High Court of Justice. He appeared in the 15th century as the Keeper of the State Rolls. Later he became judge of the Court of Chancery, and later still the president of the Court of Appeal. He is usually made a peer on appointment and ranks third in the judicial hierarchy. He is the head of the public record office and chairman of the Historical Manuscripts Commission.

Masterton Town of New Zealand. In North Island, it is 66 m from Wellington with which it is connected by railway. It is the centre of a large sheep-rearing district. The town was damaged by the earthquake of Feb. 1931. Pop. 8525.

Mastic Gum resin obtained from incisions in the bark of a small tree, *Pistacia lentiscus*, common in southern Europe. It forms yellow irregular brittle "tears" having a faint aromatic odour. Becoming plastic when heated, it is used as a tooth stopping and for making a colourless varnish for paper.

Mastiff Breed of dog. It is powerful, round-muzzled, short-coated, small-eyed, and thin-tailed, with pendulous upper lips. Brindled or fawn-coloured, it has ears and muzzle of black. The old English strain, bred for sporting purposes in Tudor times, is now used as a watch dog. The modern mastiff is 29 ins. high, with pendulous ears.

Mastodon Extinct mammal of the elephant family, closely allied to the mammoth. It had conical tubercles on its molars, and in some forms tusks were present in both upper and lower jaws. The mastodon was covered with thick woolly hair, and it existed from the Miocene age to the Pleistocene in Europe and North America.

Mastoid Name of a part of the temporal bone in the skull. It is situated immediately behind the ear and contains a number of hollow cells or cavities.

Mastoiditis is a disease of the mastoid bone and is due to suppuration of the ear. It shows itself in pains and tenderness in the affected part, in irregular temperature, especially at night, headache and perhaps giddiness and sickness. There is also a visible discharge from the ear and in the young the neck is usually stiff. There may be a degree of deafness. An operation is usually the only cure.

Matabeleland District of S. Africa. It lies between the Transvaal and Mashonaland. It was granted to the British South Africa Company in 1889, and since then has been part of Rhodesia.

The name is that of the Matabele, a Bantu tribe living in the region. In 1893 the Matabele attacked the Mashonas in Mashonaland, but were defeated by troops sent by the British South Africa Company, which seized their capital, Bulawayo. In March, 1896, they again rose in rebellion, but peace was soon made, the tribe submitting to British rule.

Matador Name in Spanish bull fighting for the chief bull fighter, who is appointed to kill the bull, also one of the three principal cards in ombre and quadrille.

Match Splinter of wood usually aspen or white pine, waxed thread or cardboard, tipped with an inflammable substance which is ignited by friction. The earliest matches were tipped with chlorate of potash and sugar and ignited by dipping in strong sulphuric acid. This type was superseded by friction matches and about 1836 phosphorus came into use. The modern friction matches are tipped with phosphorus sesquisulphide or similar substances. In safety matches the phosphorus is on the box, and the match tip is coated with an oxidising mixture.

Matchlock Form of musket used in England from the 15th to the end of the 17th century, when it was superseded by the flintlock. It was fired by means of a lighted match applied to the touchhole by a cock or lever, released on pressing the trigger.

Maté Roasted and powdered leaves of an evergreen shrub of the holly order, growing wild in Paraguay and S.E. Brazil, and cultivated in plantations (*Ilex paraguayensis*). An aromatic and bitter tea-like infusion, made with boiling water and sweetened with sugar in a cup or calabash, is sucked through a cane or silver tube. See ILEX.

Materialism Theory according to which the ultimate reality in the universe is matter. It is thus the opposite of idealism and is usually regarded as antagonistic to all religious systems. It was taught among the Greeks and has had powerful advocates in modern times. In a more general way, it refers to the belief that there is no future life, and to the tendency to make the fullest use of the opportunities of the present life without regard to the possibility of any other.

Mathematics Term usually applied to the science of numbers and space and the relations between these. A wider and more modern definition is "the science concerned with the logical deduction of consequences from the general

principles of reasoning" (Russell). Mathematics is divided into pure and applied, the former including arithmetic, algebra, theories of numbers, etc. Geometry, both pure and descriptive, also come under this head. Applied mathematics includes mechanics, physical science, geophysics and astrophysics, geodesy, etc. The study of mathematics goes back to early Greek times, and in Egypt the famous Rhind papyrus is mathematical in nature and believed to be a copy of a still earlier document.

Mather Cotton American Puritan. He was born at Boston, Massachusetts, Feb. 12, 1663, a son of Increase Mather (1639-1723), a Puritan preacher, and in 1684 became assistant to his father. He remained in Boston preaching or writing until his death, Feb. 13, 1728. Mather was also known as a linguist and published an enormous number of books. Among them are his *Ecclesiastical History of New England* in seven volumes, and a book on witchcraft.

Matilda Name of two English queens. Matilda, or Mand, was the daughter of Henry I. She was born in 1102 and on the death of her brothers, became heiress to the English throne. When Henry died, however, in 1135 his nephew, Stephen, seized the throne, Matilda being then in France. In 1141 she defeated Stephen at Lincoln and was crowned queen. The civil war continued until 1153 when peace was made and Matilda's son, afterwards Henry II, was recognised as her heir. Matilda died Sept. 10, 1167.

The other Matilda was the wife of William the Conqueror. She was a daughter of Baldwin, Count of Flanders, and was descended from Alfred the Great. She married William in 1063, and was crowned queen of England in 1068. She died Nov. 3, 1083, and was buried at Caen.

Matisse Henri French artist. Born Dec. 31, 1869, he studied in Paris and his work soon attracted attention. He was one of the original Fauvists and his style is noted for its simplicity, its rather violent colouring and its vigorous calligraphic manner of brushwork. With Picasso he came to be acknowledged as the leader of the more mature art movement of Paris. Matisse, who lived for a time in Morocco, is represented in several European galleries and among his pictures are "Toilet" and "The Sisters".

Matlocks The Urban district and in shire land watering place of Derbyshire. It consists of Matlock Bridge, Matlock Bath and Matlock Bank, which until 1927 were separate areas. It stands on the Derwent, and is served by the L.M.S. Rly., is 145 m. from London and 17 from Derby. There are some industries, but the place is chiefly a pleasure and health resort. There are medicinal springs at Matlock Bath. Near Matlock is some of the most beautiful of the Derbyshire scenery, including the High Tor and the Heights of Abraham. Matlock Bath is famous for its caves and its petrifying wells. Pop. (1931) 10,599.

Matoppos Hills Range of hills in Rhodesia. The district lies to the east of Bulawayo and covers about 1000 sq. m. On one of the hills called this World's View is the grave of Cecil Rhodes, a national cemetery and a national park.

Matriarchy Form of social organisation determining per-

sonal rights and obligations from the maternal side. It may govern descent and inheritance, require the husband to live, temporarily or permanently, with the wife's social group, or control the children through the mother or her male relations. All these conditions, exemplified in some American Indian tribes, collectively constitute mother right.

Matriculation Act of admitting a student to membership of a university. Before doing this the universities require the student to pass an examination, exemption from which is granted to those who have passed an examination of the same standard at school. The matriculation examination of London university is a popular educational test. The universities of Manchester, Liverpool, Leeds and Sheffield combine to have a joint examination.

Matrix In mineralogy and mining a term applied to the earthy or stony matter in which a metallic ore is embedded. Often the presence of certain minerals serves as a guide to the occurrence of particular metals.

The term is used also for the mould in type setting machines from which a letter is cast. Some machines use the individual matrix, others, a row giving a line of type. The term is also applied to the paper maché impression used to cast a page of type in stereotyping.

Matron Roman word for a married woman, especially one of high character. It is now used for the woman who is at the head of a workhouse, hospital or orphanage or looks after the health, food and clothing of the pupils in a school. A jury of matrons is a jury summoned in case a woman who is sentenced to death pleads that she is pregnant. Their business is to decide if this is true or false, if the former, the sentence of death is deferred or annulled.

Matsys Quentin Flemish painter. Born at Louvain in 1466, Matsys (or Massys) was at first a blacksmith but took up painting and became one of the great artists of his time. His early work is seen in the "Virgin and Child" in the Brussels Gallery and the "Madonna" in the National Gallery London, but his most famous work is the triptych, "Pieta," now in Antwerp Museum. His paintings show great technical skill, delicacy of touch and religious feeling. He died at Antwerp in 1530.

Matte Term used in metallurgy for the fusible mass of mixed sulphides resulting from the calcination of copper ores, an alternative term being regulus. By this method, adopted for oxides, carbonates and siliceous ores the metal is concentrated in the matte, which usually contains from 25 to 55 per cent.

Matter Term in physics applied to the substance composing the universe and of which we are cognisant by means of our senses. Matter exists in three states, solid, liquid and gaseous, these states differing from one another in the degree of aggregation of the component atoms according to the conditions of temperature and pressure. According to the atomic theory, atoms are the smallest particles of matter, but are grouped together to form molecules in compounds. Recent research has shown that the atom itself is a complex structure formed of electrons and protons, the centres of radiation of waves of energy.

Matterhorn Mountain of Switzerland. With an elevation of

14,782 ft., it is situated 6 m S.W. of Zermatt, on the frontier of Switzerland and Italy. It is the end of a mountain ridge and has a less difficult slope on the Swiss side than on the Italian. It was first climbed by Whimper and his party in 1865.

Matthew Saint and apostle. A Jewish customs officer, usually identified with Levi, he became one of Christ's twelve disciples. Owing to confusion with Matthias, apocryphal legends claim his martyrdom in Ethiopia, commemorated in the Eastern on 16th Nov., and in the Roman Church 21st Sept., on which day the Anglican Church commemorates his call.

Matthew The Gospel of First book of the New Testament, traditionally attributed to the apostle. Modern scholarship tends to hold that Matthew's personal contribution comprised certain lost memoranda or Logia which he compiled in Hebrew. A later compiler expanded them into our complete narrative, using Mark's gospel as a framework. Designed for the Jewish community, the book takes for granted the authority of the Old Testament, from which 65 citations are made claiming our Lord's teaching as fulfilling the Mosala law. See GOSPEL.

Maubeuge Town of France. It is on the Sambre, near the frontier of Belgium. Before the Great War it was a fortified place, but the forts were destroyed by the Germans in Aug., 1914, and the town surrendered, remaining in German possession until the end of the struggle. Pop. 24,221.

Mauchline Town of Ayrshire. It is 9 m. from Kilmarnock and is noted for its cattle and horse fairs. Burns lived near at the farm of Mossiel.

Maud Queen of Norway. The youngest daughter of King Edward VII., she was born Nov. 26, 1869. In July, 1896, she married Charles, Prince of Denmark who, in 1905, became King of Norway as Haakon VII. They have one child, a son, Prince Olaf, born July 2, 1903, who in 1929 married Princess Martha of Sweden.

Maude Cyril. English actor-manager. Born in London, April 24, 1862, and educated at Charterhouse, he began his career on the American stage in 1883. He was co-manager of the Haymarket Theatre from 1896 to 1905, and afterwards sole manager of the Playhouse (built by him) until 1915. He achieved notable successes in *Grumpy*, *Lord Richard in the Pantry* and *These Charming People* (filmed 1931), and he is the author of *The Haymarket Theatre*, 1903, and *Behind the Scenes with Cyril Maude*, 1927. In 1888 he married Miss Winifred Emery (1862-1924).

Maude Sir Frederick Stanley. British soldier. He was born June 24, 1864, son of General Sir Frederick Mando, V.C. He served in the South African War and organised the Territorial Forces of Canada. After service in France, the Dardanelles and Egypt, he was promoted army commander in Mesopotamia and was responsible for a successful forward movement which drove the Turks from Kut. He later occupied Bagdad, and died there of cholera, Nov. 18, 1917.

Maugham William Somerset. English author and playwright. Born in 1874 and educated at King's School, Canterbury, and Heidelberg University, he adopted a medical career, gaining his M.R.C.S. and L.R.C.P., but later took to literature.

His more notable novels include *Liza of Lambeth*, 1897, *The Moon and Sixpence*, 1919, and *Ashenden*, 1928, which is based on his experiences in the secret service during the Great War. *Ah King*, a volume of short stories, appeared in 1933.

His best known plays are *The Land of Promise*, 1914, *The Circle*, 1921, *East of Succ*, 1922, and *Our Belders*, 1923. The last is a brilliant satirical play of modern society. Of his later plays *Cakes and Ale* was produced in 1930, and *The Painted Veil* in 1931.

Maumbury Rings Spot near Dorchester. It is believed to have been in Roman times the site of an amphitheatre which held 12,000 spectators.

Mauna Loa See HAWAII.

Maundy Name meaning "command" given to the Thursday of Holy Week, also the ceremonial ablutions, gift of money and Eucharistic celebration proper to the day. Anciently the pope, royalty and nobility washed the feet of as many poor people as they were years old in fulfilment of Christ's "command" (John xiii 34). In England the custom was abolished in 1754, but maundy money is still given to the poor on this day at Westminster Abbey, a penny for each year in the sovereign's age.

Maupassant Henri René Albert Guy de. French novelist. Born in Normandy, Aug. 5, 1850, he is considered by many as the greatest of short story writers. Many of his stories are the result of his experiences as a soldier in the Franco-Prussian War. His best known books are *La Maison Tellier*, 1881, *Une Vie*, 1883, *Bel-Ami*, 1885, and *Pierre et Jean*, 1888. He became insane in 1892 and died July 6, 1893.

Maurice Sir Frederick Barton. English soldier. Born Jan. 19, 1871, eldest son of Sir J. F. Maurice, he entered the army in 1892 and saw service on the Indian frontier and in South Africa. He distinguished himself during the Great War, being knighted in 1916, but was retired for a breach of discipline in writing to the Press, challenging the accuracy of Ministerial statements concerning the strength of the army in the field in the spring of 1918.

He then became a war correspondent and, after the War, Principal of the Working Men's College, St. Pancras, in 1922. He was Professor of Military Studies at London University, 1927, and Chairman of the Adult Education Committee, 1928. He has published *Forty Days* in 1914, lives of Lord Wolseley, Robert E. Lee, and Lord Rawlinson, *Governments and War*, *British Strategy*, and *The 16th Foot*.

Maurice John Frederick Denison. English theologian. Born at Normanston, Suffolk, Aug. 29, 1805, son of a Unitarian minister, he studied at Trinity College and Trinity Hall, Cambridge. Between 1840-53 he held professorships of literature and theology at King's College, London. In 1854 he helped to found and became first principal of the Working Men's College. In 1860-66 he was incumbent of Vere Street Chapel, London, and in 1866 was appointed to the Chair of Moral Philosophy at Cambridge. He died in London, April 1, 1872. A friend of Charles Kingsley, his forceful personality and sympathy with the oppressed made him a factor in the religious life of his time, and the movement known as

Christian Socialism was an outcome of his teaching

Mauritius Island in the Indian Ocean, sometimes called the Ile de France. It is 500 m east of Madagascar and covers 720 sq m. The capital and chief port is Port Louis. The island is mountainous, but in the fertile valleys the sugar cane and other tropical plants grow freely. The island is a British crown colony, under a governor who is assisted by two councils. Having been a Dutch possession, Mauritius became French in 1715 and British in 1814. In 1931 great damage was done by a hurricane. Pop. (1931) 400,904, the majority being Hindus.

Maurois André, French author, born in Rouen. Many of his books have been translated into English. Among them are *The Silence of Colonel Bramble*, dealing with the War, a *Life of Disraeli*, *Ariel*, an imaginative biography of Shelley, and *Don Juan*, a similar work on Lord Byron. He has written a book on Marshal Lyautey. In 1931 he lectured in London. *The Family Circle*, a novel, was published in 1932, and in 1934 a study of Charles Dickens, and a history, *King Edward and His Times*.

Mausier Rifle Type of magazine rifle invented by a German, Paul Mauser, and adopted as the standard military rifle in Germany. It has a bolt action and is characterised by its durability and accuracy of aim.

Mausoleum Large tomb or memorial. The term is derived from the tomb at Halicarnassus in Asia Minor erected to the memory of Mausolus, King of Caria in 353 B.C. by his widow Artemisia. This ornate building was 140 feet in height and surmounted by colossal statuary. Portions of the sculptures are in the British Museum.

Mawson Sir Douglas, British explorer. Born at Bradford in 1882, and educated at Sydney University, he was appointed to the scientific staff of the Shackleton Antarctic Expedition in 1907. He was also on the staff of the Everest Expedition and the Magnetic Pole journey in 1908. He was leader of the Australasian Antarctic Expedition of 1911-14, when he discovered radium ore at Mount Painter and of the British Australian and New Zealand Antarctic Expedition of 1929. Since 1920 he has been Professor of Geology and Mineralogy in Adelaide University. He was knighted in 1914 and wrote *The Home of the Blizzard*.

Max Adolphe, Belgian patriot. Born in Brussels in 1869, he entered politics in 1894 and became Burgomaster of Brussels in 1909. When the Germans entered Brussels in 1914 he demanded complete freedom of action, and formed a central committee to deal with supplies. Arrested in Sept. 1914, he was sent to Germany but escaped in Nov. 1918, and returned to his native city.

Maxim Sir Hiram Stevens, American inventor. Born in Maline, Feb. 5, 1840, he gained early a wide experience of engineering. He made discoveries of great value in the use of steam and electricity. Having settled in England he was naturalised and in 1901 was knighted. He died Nov. 24, 1916. Maxim's name is perpetuated by the Maxim gun. He was also a pioneer in aeronautics.

Maximilian I Holy Roman Emperor. Son of Frederick III, born in Vienna March 22, 1459, he married

Mary, heiress of Philip, Duke of Burgundy, and thus greatly increased the Habsburg dominions. He became Emperor in 1493. He was a patron of art and letters as well as an administrator of considerable gifts and a good soldier. Much of his reign was occupied with warfare against the French in Italy and against the Turks who were pressing up the valley of the Danube. By the marriage of his son Philip to Juana, heiress of Ferdinand and Isabella of Spain, he brought about the succession of the Habsburgs to the vast Spanish dominions, while the marriage of his grandson Ferdinand to Anna of Hungary brought in also Hungary and Bohemia. Owing to his liberality and extravagant schemes he was always in want of money, and thus failed to achieve most of his grandiose designs. He died Jan. 12, 1519.

Maximilian Emperor of Mexico. A son of Francis Charles, Archduke of Austria, he was born July 6, 1832, his elder brother being the Emperor Francis Joseph. In 1857 he was made Governor of Lombardy and Venetia, then Austrian possessions, and in 1863 accepted the throne of Mexico and was crowned in 1864. The French, who were his chief supporters, left him to struggle with his recalcitrant subjects. The result was that he was betrayed to them, and on June 19, 1867, was shot. Maximilian wrote a book translated as *Recollections of My Life*.

Max Muller Friedrich, German scholar. A son of Wilhelm Müller, a poet, he was born at Dessau, Dec. 6, 1823, and was educated at Leipzig and Berlin. He made a special study of philology and settled in London. In 1854 he was made Professor of Modern Languages at Oxford and in 1866 Professor of Comparative Philology. He died at Oxford, Oct. 28, 1900. Max Müller was the foremost philologist of his day and made the results of his studies very widely known through his volume *The Science of Language*. He translated Kant's *Critique of Pure Reason* and edited the *Sacred Books of the East*.

Maxstoke Village of Warwickshire. It is 12 m. from Birmingham. Here is Maxstoke Castle, built in the 14th century, and notable for its moat, drawbridge and gatehouse. Near are the ruins of a priory.

Maxton James, Scottish politician. Born June 22, 1885, and educated at Barrhead School and Glasgow University, he became a teacher. In 1919 he was appointed organiser for the Independent Labour Party, and in 1922 was elected M.P. for Bridgeton (Glasgow) being returned at later elections. He was a leader of the advanced group who broke away from the official Labour Party in 1931. A biography appeared in 1935.

Maxwelltown With Dumfries a burgh of Kirkcubrightshire. It stands on the Nith, on the L.M.S. Ry. It has an observatory and a museum. Three bridges connect it with Dumfries. Tweeds are manufactured. The old name of the place was Bridgend. It was renamed in 1810 after the Maxwell family.

May Phil, English artist. Born in Leeds, April 22, 1804, he became, while still a boy, a scene painter at a theatre there. By painting portraits of actors in a casual way he revealed an extraordinary genius for caricature, and later he became a popular cartoonist for the press. From 1887 to 1890 he was in Australia working for *The Sydney Bulletin*. After his return to London he worked

for *Pick Me Up*, *The Pall Mall Budget* and *The Graphic*, and finally joined the staff of *Punch*. He died in London, Aug 5, 1903. May published *The Parson and the Painter* and edited *Phil May's Annual*.

May Sir George Ernest English financier. Born in 1871 he became a clerk, and rose to be secretary of the Prudential Assurance Co. During the war period he assisted the Government in connection with the loans from the United States and in other ways. In 1918 he was knighted. He retired in 1930 and in 1931 was chairman of the committee that reported on the condition of the nation's finances and suggested certain economies. In 1932 he was made chairman of the board appointed to advise the government on tariffs.

Maya American Indian people in middle America. A shortish, round-beaded, dark skinned stock, they are unprogressive peasants in Yucatan, Campeche, N. Guatemala and elsewhere. The 15th century, before the Spanish advent, witnessed the collapse of an advanced Maya civilisation, distinct from the Aztec, lasting 2000 years. Marked by impressive architectural remains at Copan, Quirigua, Palenque and, in British Honduras, Lubaantun, this early Maya empire, already decadent by A.D. 600, was followed by a northward migration which ultimately produced great cities like Uxmal and Chichen Itza. A remarkable system of chronology, reaching back to the 6th century B.C., was recorded in a peculiar glyphic script, which has been only partially deciphered.

Maya or Mahamaya. Mother of Gautama Buddha. Legend makes her and her sister, Prajapati, the principal wives of Siddhoda, the wealthy Kshatriya landowner of a small state surrounding Kapilavastu, in S. Nepal. When 45 years old, Maya gave birth to Gautama c. 560 B.C. in a wayside grove visited 300 years afterwards by Asoka, whose commemorative pillar there was discovered in 1895.

Maybole Burgh and market town of Ayrshire. It is 9 m from Ayr and 50 from Glasgow, on the L.M.S. Rly. The town was once a castle in which the Carricks and Kennedys lived. Pop. (1931) 4210.

May Day First day of May. In England in the Middle Ages it was a popular festival, probably a survival of a much older custom of celebrating the opening of spring.

The celebration took the form of dancing round the maypole and crowning a girl as queen of May. The ceremony is still observed in some parts of England. The day is also regarded as Labour Day and is a holiday on the Stock Exchanges.

Mayfair District of London. It lies between Piccadilly and Oxford Street with Park Lane to the west and Bond Street to the east. It is a fashionable residential district and there are many large houses in its streets and squares. It owes its name to a fair which was held here every year until 1708. Much of the land belongs to the Duke of Westminster.

Mayfield Village of Sussex. It is 11 m from Tunbridge Wells, on the S. Rly. The place was a market town in the Middle Ages and here the Archbishop of Canterbury had a palace, of which there are slight ruins.

Mayflower Sailing vessel carrying the Pilgrim Fathers (q.v.).

about 102 men, women and children, from Plymouth, Devon, on Sept. 6, 1620. It reached Plymouth, Massachusetts, on Dec. 21. This double-decked, square-rigged brigantine was accompanied by the *Speedwell* from Southampton, on Aug. 5, but proceeded alone from Plymouth westward when the *Speedwell* proved unseaworthy.

May Fly (*Ephemeroidea*) Family of small insects. Belonging to the order *Neuroptera*, it is distinguished by having four membranous wings, rudimentary mouth parts, large compound eyes, and usually three long filaments at the end of the abdomen. The larval stage is aquatic and predaceous, and in some forms lasts for years. The imago lasts only from a few hours to a few days.

Maynooth Town of the Irish Free State. It is in Co. Kildare, 15 m from Dublin, on the Gt. S. Rly. The chief building is the Roman Catholic training college for priests, designed by A. W. Pugin. This was founded in 1793 and accommodates 500 men. There was once a castle at Maynooth, a stronghold of the Fitzgeralds. The splendid park of Carton seat of the Dukes of Leinster, is near Maynooth.

Mayo County of the Irish Free State. In the province of Connaught, it covers 2158 sq. m. and has a long coastline on the Atlantic Ocean. It contains Loughs Conn, Mask and Carra, and much of it is wild and mountainous. Achill, Clare and other islands belong to it, and Clew, Blacksod and Killala Bays are openings of the sea. The Owenmore and the Moy are among the rivers. Castlebar is the county town, other places are Ballina, Killala and Westport. It is served by the Gt. S. Rly. The soil is poor. The majority of the people live on the land and by fishing. Pop. (1926) 172,690.

Mayonnaise Salad dressing consisting of yolks of eggs beaten up raw, with olive oil and vinegar or lemon juice blended gradually till the mixture is of a creamy consistency. Any particular dish prepared with this dressing is also called Mayonnaise, as salmon mayonnaise, etc.

Mayor Word used for the chief officer of a city or borough. In England he is elected by the council for a year, and in many cases receives a salary. He is a magistrate and presides over the meetings of the council. In London and other cities he is called the Lord Mayor (q.v.). The Scottish equivalent is provost.

Mayweed (*Matricaria inodora*) Plant of the order *Compositae*. It is of branching growth with narrow finely cut leaves and daisy-like scentless flowers. The stinking Mayweed (*Achillea millefolium*) has a malodorous juice which causes skin irritation to persons handling it.

Mazarin Jules Italian cardinal and diplomat. He was born at Pescina, in the Abruzzi, July 14, 1602. Richelieu in dying, recommended him to Louis XIII., whose chief minister he became. Mazarin was naturalised later, and retained his power under Louis XIV. He was made a cardinal in 1641, brought the Thirty Years' War to a successful conclusion with the Treaty of Westphalia in 1648, triumphed over the Fronde, and died March 9, 1661.

Maze Form of labyrinth or series of tortuous paths constructed in a garden. There is one in the grounds of Hampton Court Palace dating from the time of William

III The paths leading to and from the centre are bordered usually by hedges of yew, beech and other close growing trees

Mazeppa Cossack trader Ivan Stepanovitch Mazeppa belonged to a noble Polish family and was born in 1644. He was educated by the Jesuits and after some time at the court of Poland went to the Ukraine and joined the Cossacks. The story goes that he reached them tied naked to a wild horse, a punishment for a love affair. He made a great reputation among the Cossacks by his skill and in 1687 became their leader or hetman. He helped Peter the Great against Turkey and Sweden, but in 1708 transferred his services to Peter's enemy Charles XII. The omnicity of the Tsar was fatal and Mazeppa's power was soon broken. He fled to Turkey and died, probably a suicide at Bender, Sept. 22, 1709. His romantic story has been used by Byron and Victor Hugo.

Mazurka National Polish dance originating in Mazovia in the 16th century. Its vigorous character demands music in triple time with accents on the third beat and an invariable feminine ending. Chopin idealised the musical aspect.

Mazzini Giuseppe Italian patriot and author. He was born at Genoa, June 22, 1805. For forty years (1830-1870) he was the "most untiring political agitator in Europe," preparing the soil and sowing the seed of Italian unity. Banished from Italy in 1830, he went to Marseilles where he organised the society called "Young Italy". In 1837 he came to London, where he worked to enlist English sympathy in the cause of Italian unity. He was one of the triumvirs of the short-lived Roman republic of 1849 and vigorously supported Cavour and Garibaldi in 1859-60. He saw the consummation of his hopes for a united Italy before he died on March 10, 1872. An untiring propagandist he is best known by his *Letters* and his essay, *On the Duties of Man*.

Mead Alcoholic beverage made by boiling honey in water with spices and adding a yeast or other ferment. It is sometimes fortified with brandy and flavoured with hops. Common in mediaeval England and throughout Europe, it is still prepared in rural England.

Meadow Grass General name for the more useful hay and pasture grasses of the genus *Poa* abounding in cold and temperate regions. Usually tall stout perennials, with soft flat leaves and panicles of several flowered spikelets they include the smooth *P. pratensis*, the blue grass of Kentucky, the rough *P. trivialis*, and the wood meadow grass *P. nemoralis*.

Meadow Rue Large genus of perennial herbs of the butercup order natives of N temperate and frigid regions (*Thalictrum*). Among British species *T. flavum* with stout, furrowed stems 2-4 ft. high bears pyramidal clusters of small flowers with yellow perianth leaves, petals being absent.

Meadow Saffron (*Colchicum autumnale*) Bulbous plant of the order Liliaceae. It is a hardy perennial the large crocus-like flowers of lavender purple bloom in September. The leaves are large and fleshy and appear in the spring, dying down before the flowers appear. The plant is poisonous and contains the drug colchicum, which is prepared for medicinal use in gouty and rheumatic affections.

Meadow Sweet (*Spiraea ulmaria*) Perennial herb of the rose order. It is allied to the dropwort, indigenous to N Europe, Asia Minor and N. Asia. Common in waterside meadows in Britain its short rootstock supports much divided toothed leaves, 1-2 ft. long, white and downy beneath and 2-4 ft. furrowed stems with dense clusters of small, fragrant, creamy-white flowers.

Mealies S African colloquial name, derived from Boer Dutch, for ears or cobs of the maize plant. This plant is grown in mealie fields or mealie gardens. See MAIZE.

Mearns Name by which the Scottish county of Kincardine (gr) is sometimes called.

Measles Infectious fever most common in childhood. One attack usually confers immunity.

The symptoms are a feverish cold with running eyes and nose and a general feeling of lassitude. The blotchy rash does not appear until the fifth day. As the first stage is very infectious, the child should be put to bed immediately measles is suspected and kept away from other children. A doctor must be consulted as serious complications such as broncho pneumonia, and after-effects sometimes arise from quite a mild attack. Incubation period is 10-14 days.

Meath County of the Irish Free State. It is in the province of Leinster and has an area of 905 sq. m., with a short coastline on the Irish Sea. Trim is the county town. In the shire are Navan, Kells, Bective and other places of interest, as well as Tara and Newgrange. The soil is fertile and the country level save in the west and the people are chiefly employed in farming. The chief rivers are the Boyne and the Blackwater. Pop. (1926) 62,969.

Meath was the name of one of the kingdoms of Ireland in the Middle Ages. It lasted until the 12th century and later was divided into the counties of Meath, Westmeath and Longford.

Meath Earl of Irish title held by the family of Brabazon. In 1616 Sir Edward Brabazon, M.P. was made Baron Ardee. His son, William the 2nd Baron, was made an earl in 1627. Reginald the 12th earl was known as a philanthropist and for his efforts to make Empire Day a national holiday. He died Oct. 11, 1929. His son the 13th earl, when Lord Ardee, commanded a battalion of the Irish Guards in the Great War.

Mecca City and capital of the kingdom of Hajar. It is 70 miles from Jeddah on the Red Sea and is known as the birthplace of Mahomet and the holy city of the Mohammedan world. Here is the great mosque, containing in its courtyard the Kaaba.

Mechanic One skilled in the use of tools or in the manipulation of machinery. The term has special applications such as motor mechanic or aircraft mechanic.

A Mechanic's Institute was an association of working men to obtain a wider education by means of lectures, classes and libraries. Such institutes have been superseded by technical schools. The first mechanic's institute was founded in 1824 in London by Dr. Blakbeck.

Mechanics Branch of physical science concerned with the motions of bodies and the nature of the forces which

control motion also the effect of these forces upon bodies at rest One section, dynamics deals with the action of force upon moving bodies while another branch, statics, is concerned with bodies and forces in equilibrium

Mechlin City of Belgium, also called Malines It is 13 miles from Brussels on the Dyle The industries include railway shops and printing works The archbishop is the Primate of Belgium The city was long famous for its lace Pop 60,506

Mechnikov Ilya Russian scientist Born May 15, 1845 He studied at the University of Kharkov and then in Germany In 1870 he was made Professor of Zoology at Odessa, and in 1887 he went to Paris to work at the Pasteur Institute He died June 16, 1916 His discoveries are of the greatest importance in the treatment of certain diseases, notably cancer and syphilis They concern chiefly the nature and functions of the blood Mechnikov advocated sour milk as an aid to longevity

Mecklenburg District of Germany It has a considerable coastline on the Baltic Sea and consists of two little republics, Mecklenburg-Schwerin and Mecklenburg-Strelitz, Schwerin and Strelitz being their respective capitals The former covers 5068 sq m and the latter 1131 sq m Pop, Schwerin 674,075, Strelitz 95,558

In the Middle Ages Mecklenburg was divided into several petty states, but in 1701 it took its present form, its dukes being princes of the empire In 1815 they were made grand dukes and in 1871 their states entered the German Empire In 1918 the grand dukes abdicated and republics were set up Each is governed by a landtag and a ministry responsible to it Both are members of the Federal Republic of Germany

Medal Piece of metal resembling a coin, but struck to celebrate an event or service Medals were first struck by the Romans and since their time much artistic skill has been used in their design To day they are chiefly made and awarded for services in time of war, a custom which originated in England in the 16th century Medals are awarded to all who have served through a campaign At the end of the Great War over 5,700,000 victory medals were issued to men of the navy, army and air force

Other medals, such as the Distinguished Service Medal, reward acts of gallantry and others are given to civilians for bravery in saving life Medals are worn in a certain order of precedence and have distinctive ribbons

Medallion Term applied to a large medal of antique character It has been extended to include a rounded bas-relief or a circular design with figures as often met with in early stained glass or mural decoration

Medea In Greek legend the daughter of the King of Colchis She assisted Jason to secure the Golden Fleece and the two were married Later Medea brought about the death of Creusa, who had become the lover of Jason She is said to have married Aegeus, King of Athens, whom later she tried to poison Euripides wrote a play entitled *Medea*

Medes People closely associated with the Persians They lived in Asia Minor and later in Persia, where they gave their name to a district called Media Their greatest king was Darius, who is mentioned

in the Bible (Dan v) Their laws, like those of the Persians, were regarded as unalterable

Medici Famous Italian family Giovanni de Medici was a trader and banker in Florence in the 13th and early 14th century He died in 1429, when his great wealth passed to his son, Cosimo In 1424 Cosimo, having been banished, was recalled to Florence and until his death, August 1, 1464, was the real ruler of the republic His son succeeded to his position and soon members of the family became rulers of Florence by right of birth The greatest of them was Lorenzo, called the Magnificent, who fully earned the epithet by the way he spent his great wealth in beautifying the city and encouraging artists and poets He was one of the greatest figures of the Italian Renaissance

In 1492 the Medici were expelled, but in 1512 they were re-installed In 1530 Alessandro was recognised by the emperor as Duke of Florence and in 1569 his title was changed to that of Grand Duke of Tuscany Three members of the family ruled until the male line died out in 1737 Two of the Medici became popes as Leo X and Clement VII Other notable members of the house were Catherine and Marie, both queens of France

Medicine Art of healing First practised by primeval man with magico-religious methods for counteracting malignant influences, it developed during ancient Euphrates, Indus and Nile civilisations into empirical systems making abundant use of remedial herbs In early Greece rational cures first arose under the Greek physician, Hippocrates c 500 B.C., commonly called the Father of Medicine, whose writings influenced medical theory and practice for 2000 years Anatomical research proceeded, and Galen of Pergamum, in the 2nd century, A.D., made still further collections of knowledge which governed medieval thought

The Renaissance gave birth to the chemical teachings of Paracelsus Harvey accomplished the supreme discovery of blood circulation, 1628 There followed the microscope, the development of clinical practice, Hunter's foundation work in experimental and surgical pathology and the advances of Bell, Abernethy, Virchow and others The 19th century witnessed the work of Darwin, Pasteur, Koch and Lister More recently researches in bacteriology, biochemistry, radiology and mental disease have produced epoch-making results

MEDICINE AS A CAREER The main careers open to members of the medical profession may be listed as follows

- (1) General Practice
- (2) Government Medical Services at Home and Abroad
- (3) Public Health Work
- (4) Poor-Law Medical Service
- (5) Psychological Medicine
- (6) Scientific Research or Teaching
- (7) Consultants and Specialists
- (8) Certain other Careers (as Ship Surgeons)

It will be seen that the scope is very wide for the qualified doctor, and the opportunities especially in branches other than General Practice, are increasing

Since the Act of 1876, which rendered women eligible to obtain degrees and diplomas, more and more women's names have appeared on

the Register of the General Medical Council. The disfavour with which women doctors were originally looked upon, both by their male colleagues and by the public is rapidly disappearing, and generally speaking, women are regarded as eligible for nearly all kinds of medical work, excluding the Services of the Crown.

The two main spheres of work in which they are especially finding opportunities are general practice and posts as maternity and child welfare and School Medical Officers under the local authorities. There is a special organisation for Women's Medical Service in India.

Before medical practice can begin it is necessary under Law for the student to have his or her name entered on the Register of the General Medical Council and for this certain medical degrees or other recognised qualifications are necessary. (It is advisable also for a student after the preliminary examinations have been taken, to have his or her name entered on the Students' Register. A copy of the regulations can be obtained from the G.M.C., 44 Hallam Street London, W. 1.)

The work necessary for a recognised medical degree or qualification falls into three periods.

- (1) A period of about two years at a public or secondary school devoted to the study of Chemistry, Physics, and often Biology.
- (2) A period of two years in the dissecting room and laboratories of a university or medical school.
- (3) A period of three years of clinical study in a hospital.

This is the minimum time taken—illness or failure at examination frequently extends the period.

After the general degree or diploma has been taken, specialised courses for further degrees or special diplomas may be taken.

The Medical Course is therefore a long one and it requires a considerable financial outlay in fees and maintenance before recognised qualifications are obtained. It is advisable to obtain full particulars as early as possible—from the G.M.C. or from the British Medical Association (B.M.A. House, 19 Tavistock Square, London, W.C. 1). The regulations examination syllabuses and fees of the particular university or medical school it is proposed to enter should also be studied before the first examinations are taken.

The prospects before the qualified medical practitioner are good. The doctor in general practice has a high social standing and although a good practice must be developed—or capital must be available to purchase a partnership in one—the remuneration is steady and adequate. Thus an income of £1000 per annum may be expected from an established practice.

The specialist can, of course, command higher fees, and the salaries scale in most of the public services extends above this figure. Full particulars of these salaries scales are available.

Medicine Hat City of Alberta, Canada. It stands on the South Saskatchewan River 165 m from Calgary and 660 from Winnipeg. There are some manufactures and railway shops and the city is the distributing and trading centre for a large district. It is rich in natural gas.

Medicine Man Practitioner of the healing art and kindred mysteries in primitive culture. The

term displacing the older "witch doctor," conventionally denotes the professional exorciser of magical powers in cultural stages up to and including the shaman of N. Asia, beyond which leechcraft and priestcraft diverge. Usually set apart by long initiation, carrying his mysteries in a medicine bag, wearing a distinctive dress, and sometimes operating in a medicine hut, he combines with primitive magic empirical onres and crude surgery, in Africa, America and Melanesia.

Medick (*Medicago falcata*) Perennial leguminous herb found chiefly on waste land and dry gravelly or sandy soil in E. England. The stems are hollow and the stalks, bearing clusters of yellow, or sometimes violet flowers rise from the axils of the leaves which are trifoliate. The flat downy seed pods are stickle-shaped or onrved. A native of Europe the herb is found also in India and parts of Asia. Other varieties include the Black medick (*M. lupulina*) and Lucerne (*q.v.*)

Medina River of the Isle of Wight. It flows into the sea at Cowes, which stands on its estuary and is navigable as far as Newport. The eldest son of the Marquess of Milford Haven bears the courtesy title of Earl of Medina.

Medina City of the Hejaz, Arabia. It is 240 m from Mecca and has a large trade done partly through its port, Yanbna, on the Red Sea. Here the prophet lived for a time, and here in a magnificent mosque, is his tomb. Medina was the residence of the early caliphs. It is much visited by pilgrims, as it ranks after Mecca, as a holy city. During the Great War, when it was a Turkish possession, it was besieged for a long time, but was not surrendered until Jan. 1919. Later it became part of the new state of the Hejaz. Pop. 30,000.

Mediterranean Sea Largest inland sea in the world. It has Europe on the N. and Africa on the S., while at its E. end is Asia. It is over 2000 m long. At the W. end it communicates through the Strait of Gibraltar with the Atlantic Ocean. The E. end is closed, although it connects with the Black Sea. The Nile, the Ebro and the Rhône are the chief rivers that flow into it. The principal arms are the Adriatic and the Aegean Seas.

The Mediterranean contains an enormous number of islands especially in the Aegean. The largest are Sicily, Crete and Cyprus. Malta is important.

Medium Name given by spiritualists to the person used as a channel for establishing communication between inquirers of this world and spirits of another sphere.

In bacteriology a sterilised nutritive substance used in the culture of germs is known as a medium.

Medlar (*Mespilus germanica*) Hardy tree of the rose order, indigenous to Greece and W. Asia. Long naturalised in Britain, it grows as a much branched spiny tree, bearing solitary white 1½ in. flowers and roundish 1 in. fruits. Spineless varieties, cultivated preferably on whitethorn, quince or pear stocks, yield improved fruits, one form being stonless. The Japanese medlar is the Loquat.

Medmenham Village of Buckinghamshire. It is on the Thames, 3 m. from Marlow and is famous for

its abbey. A Cistercian house was founded here in 1204. Later a private house was built on the site. This was the residence of Sir Francis Dashwood (1708-81), and is known because here his Hell Fire Club, a mock order of Franciscans, met and celebrated their blasphemous rites.

Medusa In Greek mythology, one of the three Gorgons. The name is also given to a free-swimming jelly-fish resembling a bell or parachute. Ranging from microscopic to forms 6 ft across, medusae develop pendent filaments bearing organs for stinging and grasping the prey which the tentacles convey to the mouth. Several species abound round British coasts; the largest are tropical. See GORGONS.

Medway River of England. It rises in Surrey and Sussex by two small streams and flows through Kent to the Thames. It is 70 m long, and on its banks are Tonbridge, Maidstone and Rochester. Its mouth forms a fine estuary where are Sheerness and Chatham.

Meerschaut Soft porous hydrous magnesia silicate. Obtained from Asia Minor, Greece, Morocco and elsewhere, it is used chiefly, after steeping in wax, for pipe bowls and cigar-holders.

Meerut City and district of British India. The city is 40 m from Delhi and is an important military station. It was the place where the Indian Mutiny began in 1857. Pop. (1931) 136,709.

The district is extremely fertile, largely owing to the irrigation canals. Its principal crops are wheat, pulse, millet, sugar-cane and cotton. Owing to its comparatively elevated position it is one of the healthiest places in the plains of India.

Megalithic Age Archaeological term for the culture period characterised by the building of massive structures and monuments, and coinciding with the later Stone and Bronze Ages. In Britain the remains of the great stone circles at Avebury and Stonehenge and the numerous barrows, tumuli and earthworks scattered over the country testify to the skill and industry of the megalithic builders.

Megalomania Delusion of grandeur. As a form of insanity it may involve the belief that the sufferer is a king, millionaire or endowed with divine powers. It sometimes attends general paralysis. The word is often used untechnically for the exaggerated idea displayed by some persons of their social importance or mental powers.

Megalosaurus Extinct carnivorous reptile of the order Dinosauria. Fossil remains are found in Jurassic and Cretaceous formations in Europe, Asia and N. America. It was about 20 ft in length and assumed the erect posture support being given by its long thick tail. The hind limbs were large and powerful and the teeth serrated and laterally compressed.

Megaphone Sound amplifier. For speech a cone-shaped trumpet is held to the mouth. For hearing purposes there is an ear trumpet which magnifies distant sounds for capable ears and ordinary sounds for the deaf.

Megara Ancient city of Greece. It stood near the sea about 30 m from Corinth. A colony from Megara founded a city of the same name in Sicily.

Megarasi with Sparta in the Peloponnesian War. The modern village with some 6400 inhabitants is mainly composed of people of Albanian stock.

Megatherium Extinct giant sloth. Its remains are found in Pleistocene deposits in S. America. Probably it was contemporaneous with early man. It was about 20 ft in length, herbivorous in habit and resembled the anteaters in respect of limbs and backbone, and the sloth in skull and teeth. In 1897 the remains of the skin and bones of a species of megatherium were found in a Patagonian cavern.

Megiddo Former city of Palestine. It stood in the plain of Esdraelon, 18 m from Nazareth, and is several times mentioned in the Bible. Its fortifications were restored by Solomon (2 Kings, ix.) It was a flourishing city in Roman times, but had decayed when on Sept. 18, 1918, British troops took possession of it.

Megrims (or Blind Staggers) Disorder occurring in horses. Most frequently occurring in warm weather and due to congestion of the blood vessels in the brain. When straining uphill with a heavy load and tight collar a horse may suddenly exhibit symptoms of giddiness, with loss of will-power, noisy breathing, quivering nostrils and tendency to fall.

Mehemet Ali Turkish soldier. He was born in 1769 in Albania. He became a tobacco dealer, then a soldier, and took a leading part in fighting against Napoleon in Egypt in 1798. At the head of a force of Albanians he brought Egypt under his control and was made viceroy and pasha by the sultan. He crushed utterly the Mamlukes, formed a regular army and did much for the material prosperity of the land. He conquered a good part of Arabia and part of the Sudan and helped the Turks in their struggle with the Greeks. In Egypt he remained powerful until his mind gave way in 1848. He died Aug. 2, 1849, and was succeeded by Ibrahim Pasha, his adopted son.

Meighen Arthur. Canadian politician. Born in Ontario, June 16, 1874, he was educated at the University of Toronto. For a time he was a teacher but later became a barrister in Manitoba. In 1908 he was elected to the House of Commons at Ottawa, and in 1913 was made Solicitor General in the Conservative ministry. In 1917 he became Secretary of State, and a little later Minister of the Interior. In July, 1920, on the resignation of Sir Robert Borden, he succeeded as premier, but he resigned on his party's defeat in 1921. He was again premier for a few months in 1926, having in the meantime been leader of the opposition. On leaving office he took up an important business appointment.

Meissen City of Saxony. It stands on the Elbe, 15 m from Dresden. Its castle is one of the finest in Germany. The city has some industries and an agricultural trade, but is chiefly famous for its china. This was first made here in the 18th century, and the state porcelain factory is one of the sights. Pop. 46,000.

Meissonier Jean Louis Ernest. French artist. Born at Lyons, Feb. 21, 1815, he studied art and soon began to paint. His best works are historical and semi-historical, and there are several in the

Wallace Collection, London "Soldiers," "Gambling" and "Napoleon I and his Staff" may be mentioned. He died in Paris, Jan 31, 1891.

Meistersinger Professional poet of the Middle Ages. Meistersingers were members of guilds of musicians and went about the country singing. Some of them were connected with courts, but later they became more closely associated with the life of the people. There were guilds in many German cities, and at Ulm one lasted until 1839. Wagner aroused interest in their songs by his opera *Die Meistersinger von Nürnberg*.

Mekong River of Asia. It rises in Tibet and flows for 2800 m to the China Sea. From Tibet it enters China, and later forms for some distance the border between Siam and Indo-China. It enters the sea by two great arms, one of which has five mouths. Owing to its many rapids the river is not much used for navigation.

Melampus In Greek legend the first mortal who obtained the powers of a prophet. He reared two serpents, and from them received the gift of understanding the language of beasts and birds. From Apollo he learned something about medicine and he cured the daughters of the King of Argos of their madness.

Melancholia Form of insanity marked by great depression. Simple melancholia is a common form of lethargy and listlessness, sometimes with hallucinations and sleeplessness, not necessarily needing treatment in a mental hospital. In acute forms, observable in mature years, the depression becomes intensified, this may pass into active excitement or into stupor, sometimes leading to suicide. A condition in which excitement and depression occur, not necessarily alternately, is called manic depressive insanity.

Melanchthon Philip German scholar and reformer. Born Feb. 16, 1497, at Bretten in Baden, his real name was Schwarzerd. Educated at Heidelberg, he became Professor of Greek at Wittenberg, where he was Luther's fellow worker. In 1521 he published *Loci Communes*, the first great Protestant work on dogmatic theology. The Augsburg confession was composed by him. He attended the Diet of Worms, and after Luther's death attempted to reconcile all the parties of the Reformation and even the Reformers and the Roman Catholics. He died at Wittenberg, April 19, 1560.

Melanesia Group of islands in the Pacific Ocean. They lie to the W of New Guinea and Australia, and include the New Hebrides, New Caledonia, Solomon, Gilbert and Ellice Islands and others. Most of them are British, but France owns a number. Those that were German before the Great War are now administered by Australia and New Zealand under mandate from the League of Nations.

Melba Dame Nellie. Name taken from her birthplace, Melbourne, by the Australian singer Helen Porter Mitchell. A daughter of David Mitchell she was born May 19, 1859. In 1882 she married Charles Armstrong. Having shown exceptional talent as a singer, she studied in Paris and became a professional. Her first appearance was in Brussels in 1887, and for the next 30 years she was one of the world's leading singers.

In 1918 she was made D.B.E. In 1925 she published *Melodies and Memories*. She died Feb. 23, 1931.

Melbourne Town of Derbyshire. It is 7 m from Derby, on the L.M.S. Rly. It has some textile manufactures and is a market gardening centre. Pop. 3700.

Melbourne Capital of Victoria, Australia. It is situated on Port Phillip, at the mouth of the Yarra, a site selected about 1837 and named after the then Prime Minister. It is noted for its parks, public gardens and flower-decked streets. Collins Street, 1½ m long is famous. Here are the Parliament Buildings and the two cathedrals. It has two broadcasting stations (3135 M, 5 kW and 3128 M, 20 kW).

Other important buildings are Flinders St. Rly. Station, the public library, art gallery and museum, the university and the law courts. The city is connected by rail with neighbouring States and has an excellent electric suburban railway system.

Population (including the 23 suburban areas) (1931), 1,030,750, over 57 per cent of the state.

Melbourne William Lamb, 2nd Viscount English statesman. Born March 15, 1779, he was educated at Eton and Trinity College, Cambridge, and entered Parliament in 1806. He was Irish Secretary from 1827-28, and Home Secretary in 1830. Prime Minister from 1835-41, his influence over the young queen, Victoria, was great, and he impressed on her the sound constitutional principles to which she adhered throughout her reign. He was unable, however, to restrain her from showing a partisanship over Court appointments, which led to the fall of the Whig government and Melbourne's resignation in 1841. He died Nov. 24, 1848.

Melchett Alfred Moritz Mond, Baron industrial magnate. Born at Farnworth Lancashire, Oct. 23, 1868, the son of Dr. Ludwig Mond, F.R.S., he was educated at Cheltenham College, St. John's College, Cambridge, and Edinburgh University. Called to the bar in 1894 he entered his father's firm of Brunner Mond & Co., chemical manufacturers, and became identified with a number of other important industrial concerns, later forming the great Imperial Chemical Industries. His writings on industrial and political problems were reissued in *Questions of To-day and To-morrow*, 1912. As a politician he was Liberal M.P. for Chester, 1906-10, Swansea, 1910-22, and succeeding over the land policy of 1926 became Conservative in 1920 and represented Carmarthen, 1924-28. He was First Commissioner of Works in the Lloyd George Ministry, 1916, and Minister of Health, 1921-22. Made a baronet in 1910 a Privy Councillor in 1913 and a baron in 1928, and F.R.S. He died Dec. 27, 1930.

Melchizedek King and priest of Salem. He is mentioned in Genesis xiv 18.

Meleager In Greek legend a great hunter. He was a son of Oeneus and Althaea, and was a king of Calydon. He went with the Argonauts on their expedition. His great exploit was to kill the boar which the goddess Artemis sent to ravage Actolia.

Melinite Disruptive explosive. It is of the trinitrotoluenic type used in France, and resembles in composition the

British explosive, lyddite It consists essentially of a mixture of trinitrotoluene and picric acid (trinitrophenol), the compound being less sensitive and dangerous to handle and having a lower melting point than its components

Melksham Urban district and market town of Wiltshire It stands on the Avon, 98 m from London, on the G W Rly The industries include flour milling Pop (1931) 3881

Mellon Andrew William American politician and financier Born at Pittsburg, March 24, 1855, he became like his father, a banker, and was closely identified with some of the industries of Pennsylvania A republican in politics, he was made Secretary to the Treasury in 1921, and held that post until 1932, when he was appointed Ambassador to the Court of St James's He had a good deal to do with the negotiations about European debts, and in 1931 expressed the opinion that Great Britain was bearing an undue proportion of the burden He was ambassador in Gt Britain, 1912-3

Melocactus Genus of perennial succulent plants of the cactus order, natives of Mexico, W Indies, Brazil and Colombia It is also called melon-thistle The swollen melon-shaped stems, vertically ridged, are surmounted by cylindrical caps clothed with woolly hairs and spines, bearing rose red tubular flowers

Melodrama Originally a play in which music was introduced to give a more dramatic or emotional effect Melodramas were first produced in France in the 18th century, an example being Rousseau's *Pygmalion* To day the word is used for a play which has a strong emotional appeal of a popular kind Examples are *The Silver King*, played by Wilson Barrett, and *The Sign of the Cross* In London, the Old Surrey and Adelphi and the new Lyceum theatres were long regarded as special homes of melodrama

Melon (*Cucumis melo*) Annual trailing herb of the gourd order, indigenous to S Asia Cultivated from antiquity, it provides important crops in all tropical and sub-tropical lands, being raised for some European markets under glass The size of the fruit, usually globular, ranges from an olive to a giant gourd The edible flesh, white, scarlet or green, is the pericarp's inner layer Water melons, the fruit of the allied *Citrullus vulgaris*, are usually larger and coarser fleshed

Melrose Burgh of Roxburghshire It stands on the Tweed, 37 m from Edinburgh, on the L N E Rly The abbey, once the greatest in Scotland, was associated later with Sir Walter Scott The ruined church contains some magnificent stone work and windows, and in it are some interesting tombs It is much visited by tourists On the other side of the Tweed is the suburb of Gattonside Pop (1931) 2052

Melton Mowbray Market town and urban district of Leicestershire It is 14 m from Leicester and 102 from London and is reached by the L N S Rly Melton is famous for its pork pies, and equally well known as a centre for the Quorn, Cottesmore and Belvoir hounds It has an agricultural trade Pop (1931) 10 437

Melville Island, bay and sound of the Arctic regions It is 200 m long and covers about 20,000 sq m It was discovered in 1819 Melville Sound separates

the island from Victoria Island It is 240 m long An opening of Baslin Bay is called Melville Bay Melville Peninsula is a part of the Canadian mainland It is an eastward extension of the N W territories and is to the N of Hudson Bay It is nearly 300 m long and covers about 30,000 sq m

Melville Andrew Scottish theologian and leader of Presbyterian thought He was born at Baldovie, Forfarshire, Aug 1, 1845 After teaching in France and Switzerland he became Principal of the College of Glasgow (1874), and helped to draw up the Presbyterian *Second Book of Discipline* After preaching against absolute authority and "remonstrating" with James VI he was imprisoned in the Tower for four years On his release he left England and resumed teaching in France He was several times Moderator of the General Assembly He died about 1922

Melville Hermann American author and novelist Born Aug 1, 1819, in New York City, he went to sea when 17, in a whaler, deserted twice, was captured by cannibals in the South Seas and eventually joined a man of war Later he returned to Boston in 1814 and began writing He published *Typee* (1846) and *Moo* (1847), tales of life among the cannibals In 1850 came *White Jacket*, embodying his experience as a sailor, and by its force, largely abolishing corporeal punishment in the navy In 1851 he published his masterpiece, *Moby Dick*, a tale of the sea and whaling He died Sept 27, 1891

Memel or Klaipeda Territory and seaport of Lithuania On the Baltic, near the N end of the Kurische Haß, the town is 74 m from Königsberg Before the Great War, Memel was a province of E Prussia, but by a convention of May, 1924, it was constituted a unit within the sovereignty of Lithuania, with a certain measure of administration and financial autonomy Nazi feeling in Memel, however, is strong as the election of 1935 showed In Sept, 1935, Herr Hitler invited the League of Nations to examine the Memel position "before events that would be regretted" Poland uses the port The harbour is a fine one, and large quantities of timber and grain are handled There are many important industries, including shipbuilding-yards, foundries, chemical works, etc Area of territory 943 sq m Pop territory, 146,000, town, 37,400

Memlinc Hans Flemish religious painter He was born at Mainz about 1430 He had an original style, powerful yet simple He painted beautiful pictures of the Virgin, and panoramic pictures of the life of Christ and St John His "Mystical Marriage of St Catherine" and "Shrine of St Ursula" are in Bruges, where he died Aug 11, 1494

Memnon In Greek mythology the son of Tithonus and Eos He was very beautiful and was beloved of Zeus He helped the Greeks in the Trojan War and was killed by Achilles

Memory Power of retaining and reproducing mental impressions It varies very much in different persons, and there are on record cases of persons who possessed extraordinary powers of memory Several theories have been put forward about its origin and nature, it certainly owes a good deal to the association of ideas

Memory consists of four processes—learning, retention, recall and recognition, and of it there are three kinds—mechanical, which depends on the grouping of ideas in a certain order by repeating the words that represent them, artificial, by the deliberate association of certain ideas with certain words or symbols, and logical, or the association of ideas.

Many schemes have been put forward for improving the memory and some have produced valuable results.

Memphis Ancient city of Egypt. Its site is on the Nile, 14 m from Cairo. It became a splendid city and was for a time the country's capital. It contained magnificent buildings, and a colossal statue of Rameses II. The city, of which some ruins remain, was named after its founder, King Menes.

Memphis City and river port of Tennessee. It is on the Mississippi, and is the largest city in the state, being a great centre for the sale of cotton. Pop. 253,000.

Menagerie Collection of wild animals maintained for study or exhibition. Travelling collections sometimes accompany circus shows. Stationary collections have been formed by conquering monarchs since early times. The collection kept at the Tower of London was removed to the Zoological Gardens in 1831. It received contributions from Queen Victoria's private menagerie in 1901, and now has an open air menagerie at Whipsnade (q.v.). See ZOOLOGICAL GARDENS.

Menai Bridge Urban district of Anglesey. It is on the Menai Strait, near the end of the suspension bridge and has a harbour and a little shipping. Pop. (1931) 1675.

Menai Strait Sea passage of Wales. It is between Carnarvonshire and Anglesey, and is 14 m long and 1 or 2 m wide. Two bridges cross the strait. The suspension bridge, which carries a road, was opened in 1826. The tubular bridge, the property of the L.M.S. Ry., was opened in 1850. It is 1840 ft. long.

Menander Athenian poet. He lived in the 4th century B.C. and won a reputation by his comedies, of which only fragments survive, including some found in Egypt in the 20th century.

Mendeleef Russian chemist. Born in 1834, he observed periodicity in the change of properties of elements when tabulated according to atomic weights. This "periodic law" led to the discovery of new elements. He died Feb. 2, 1907.

Mendelism Term applied to a theory of heredity. It is based upon the experiments made by the Abbé Gregor Mendel, an Austrian solentist (1822-84). Mendel experimented with the breeding and hybridisation of the culinary pea, and from the results of his investigations formulated certain laws of heredity. His work has been carried further during the last 30 years, and his generalisations are found to hold good for plants and animals in general. Mendel found that certain characters are inherited by hybrids, and these he termed dominant, others were not shown by hybrids but occur in their offspring, and these are known as recessive.

Mendelssohn-Bartholdy

Jakob Ludwig Felix German composer. Born Feb. 3, 1809, at Hamburg, he was the grandson of the philosopher, Moses Mendelssohn, and son of Abraham Mendelssohn, a banker. He was baptised and educated as a Christian, his father adding the surname Bartholdy to the family name. He was broadly and thoroughly educated at home. A precocious first appearance as composer-pianist in 1818 led to an uninterruptedly successful and happy career. In 1826 he composed the music for *A Midsummer Night's Dream*. In 1829 he visited London and Scotland. From 1833 onwards he held various conductorships, and in 1843 founded Leipzig Conservatoire. In 1846 he conducted his oratorio *Elijah* at Birmingham, and died on Nov. 4, 1847, having achieved a consummate artistry in every form of music except opera.

Mendip Hills Range of hills in Somerset. It extends from near Wells to the Bristol Channel. The highest point is Blackdown (1068 ft.), and the range includes the Cheddar Cliffs.

Mendoza Daniel English prize fighter. He was born of Jewish parents in London in 1764, and soon made a name as a fighter. In 1787 he beat Sam Martin, and he was successful in encounters with other pugilists, but in 1795 he was beaten by John Jackson. He continued his career until 1820, when he was beaten by Tom Owen. He died Sept. 3, 1836.

Menelaus Greek hero. He was the brother of Agamemnon, and became the husband of Helen. In this way he secured the throne of Sparta. During his absence, Paris visited his court and carried off his wife. The Trojan War was the result. Menelaus went to the war and when Troy was taken, recovered his wife.

Menelek II. Emperor of Abyssinia. Born at Choa, Aug. 18, 1844, he claimed to be a direct descendant of Solomon and the Queen of Sheba. Founder and organiser of the modern Abyssinian state, he made war against the Italians to preserve the independence of his kingdom, and defeated them at Adowa. In 1896 the absolute independence of Abyssinia was recognised. Towards the end of his reign he maintained very friendly relations with both England and France. He died at Addis-Ababa, Dec. 12, 1913.

Ménière's Disease Ear complaint with sudden attacks of giddiness and ringing of a high musical note, followed by deafness. Named from the French physician who described it, 1861, it is usually caused by escaped blood in the labyrinth, due to intense heat or certain diseases. Potassium iodide or bromide is often used remedially.

Menin Town of Belgium. It stands on the Lys, 10 m from Ypres. It was taken by the Germans in Sept. 1914, and there was constant fighting around it during the next four years.

The Menin Gate is a memorial at Ypres to the British who fell in the war. It is at Ypres on the Menin Road, hence its name. Designed by Sir Reginald Blomfield, it is in the form of a Roman arch. It was unveiled on July 24, 1927.

Meningitis Inflammation of the meninges, the membranes investing the brain and spinal cord. It may arise from injuries to the brain, tumours, diseased adjacent parts or sunstroke, or be excited by the bacterial causes of other fevers present. When, as frequently with children, it is due to the tubercle bacillus, it is called tubercular meningitis, acute hydrocephalus or water on the brain. A malignant type, due to another specific micro-organism, is called epidemic cerebro-spinal meningitis, or cerebro spinal fever (q v).

Mensuration Branch of mathematics dealing with the measurement of lengths, areas and volumes, and the formulation of rules for calculation. In general the term mensuration is used only for the measurement of surfaces, solids and regular figures, that of irregular figures coming under other branches of mathematics.

Mental Defective Term used for one whose mind is not fully developed, but who is not insane. Of late years great attention has been paid to the training of mental defectives. For mentally defective children special schools have been opened as have hospitals and other institutions. Proposals for sterilising mental defectives have been put forward, but as yet very little has been done in this direction.

Menthol White crystalline substance obtained from oil of peppermint. It comes chiefly from *Mentha arvensis* or *piperascens* and *glabra*, growing in Japan and China. Menthol is met with either in the form of fine needle-like crystals or in moulded masses, and is used as a local anaesthetic.

Mentmore Village of Buckinghamshire. It is 4 m from Leighton Buzzard. Here is the magnificent seat of the Earl of Rosebery, formerly the property of the Rothschild family.

Mentone Watering place of France. It is on the Riviera, 13 m from Nice. Beautifully situated and with a delightful climate, it has many other attractions for visitors including promenades, gardens and a casino. Pop 18,000.

Mentor Greek hero. Odysseus left him to look after his son Telemachus and his estates when he went to the Trojan War. Thus the word has become a synonym for a wise counsellor.

Mephistopheles In German legend a familiar spirit "not loving light," with whom Faust made a pact bartering away his soul. In Marlowe's tragedy he is the fallen angel of theology combined with the old German kobold. Goethe, influenced by Lessing, changed him into an evil principle with which man's spirit eternally conflicts. See FAUST.

Mercantile Marine Term used for the shipping engaged in commercial purposes. In Great Britain it is controlled by the Board of Trade, which administers the laws that deal with it. The Board has a mercantile marine consultative branch at Great George Street, London, S.W. 1. To unite the service there is a Master of the Merchant Navy, an office created in 1928 and held by the Prince of Wales. On Tower Hill, London, there is a memorial to the 12,649 officers and men of the merchant service and fishing fleets who lost their lives in the Great War. In 1932 the

mercantile marine of Great Britain and Ireland had a tonnage of 19,671,675 gross tons. See SHIPPING.

THE MERCHANT NAVY. As a career the training of a Navigating Officer normally takes place either partly in a recognised Training Ship or Nautical Training College, or by apprenticeship wholly at sea.

In the former case training may begin at 13 years or earlier, and continues until 16 or 17. Evidence of a satisfactory standard of education is required on entry, and after a minimum period of two years' training a certificate is granted to the successful candidate carrying exemption from one of the four years required for the Second Mate's Certificate. Application should be made as below for admission as an apprentice. The fees payable vary, but are of the order of £100 to £170 per annum.

In the latter case the boy should continue his general education until 16 or 17, and apply to be admitted as an apprentice to the shipping companies selected or to the Shipping Federation, Ltd., 52 Leadenhall Street, E.C. 3, through which body a number of the companies customarily recruit. No written examination is required—inquiries take the form of personal interview. It should be remembered that some physical defects, especially defective eyesight, will definitely disqualify a boy when he comes to take the Second Mate's Certificate.

The Board of Trade issues a model form of indenture for apprenticeship. Full particulars of the examinations necessary for Board of Trade Certificates during and after the period of apprenticeship may be obtained from the B.O.T. Regulations (Examination of Masters and Mates).

The prospects may be studied from the rates of pay which will be supplied in detail by the General Secretary of the National Maritime Board, 3/4 Clement's Inn, London, W.C. 2, from The Shipping Federation, or from firms of shipowners. Most officers continue at sea for the whole of their professional life, but there are a few shore appointments, with salaries ranging up to £1500 per annum.

Although a seafaring life may not offer a fortune, it does offer opportunity for saving, a good life and prospects of seeing something of the world, while modern conditions for apprentices are very different from those of the old exacting days of sailing ships. There is little home life, of course, and at present the supply of Officer and Deck ratings is rather more than equal to the demand—with resulting unemployment.

Mercator Gerardus Flemish geographer. Gerhard Kremer, later called Mercator, was born March 5, 1512, and educated at Louvain. He was employed by the Emperor Charles V to draw maps for military purposes, and later made a survey of Flanders. In 1552 he settled at Duisburg and the rest of his life was engaged in drawing maps. In 1568 he first used the system of projection, parallels and meridians at right angles since known by his name. Mercator died Dec. 2, 1594. His maps were published in an atlas, a name for which he was responsible.

Mercer Dealer in small wares, silks, velvets and other rich fabrics. Mediaeval mercers tended to abandon the homelier cloths to the drapers. A London Mercers' Guild existed, 1172, the Mercers.

Company first chartered, 1893, is London's premier livery company. The hall in Cheap side and the adjacent chapel replace a hospital commemorating Thomas à Becket's birthplace, its school is now the Mercers' School, Holborn. The company also governs St Paul's School, Hammorsmith. Corporate income, £53,000, trust income, £58,000, membership, 221.

Mercerisation Name given to a chemical process by which a silky lustre is given to cotton fabrics. The process was invented by John Mercer (1791-1866), whose first patent was taken out in 1850. The yarn is treated with caustic soda solution of a particular strength.

Merchant Taylors London livery company. It is one of the 12 great companies and dates from about 1300. It has a large income and a magnificent hall in Threadneedle Street, London, E.C. The company maintains some almshouses at Lee, London S.E.

The Merchant Taylors' School was founded by the company in London in 1561. It was in Suffolk Lane until 1873 when it was moved to Charterhouse Square. In 1931 it was decided to build a new school at Berkhamstead, and an extensive area of land was bought for the purpose. The school, which has a close connection with St John's College, Oxford, has accommodation for about 600 boys, all day pupils.

There is also a Merchant Taylors' School at Great Crosby, Liverpool. This was founded in 1818, and until 1910 was managed by the Merchant Taylors' Co. The buildings were enlarged in 1913.

Mercia Anglo-Saxon kingdom of England. It came into existence about 600, and was in the centre of the country between the Thames and the Trent, excluding E Anglia. At one time it included London. It became independent when Penda was its king in the 7th century. Under Offa, who died in 795, it was the most powerful of the English kingdoms, but early in the 9th century was conquered by Wessex. Its chief towns were Lichfield, Repton and Tamworth.

Mercier Désiré Joseph. Belgian prelate. Born Nov. 21, 1851, he was educated in Malines and ordained in 1874, afterwards studying at Louvain and Paris. Professor of Philosophy in the University of Louvain, 1882-1906, he was then made Archbishop of Malines and Primate of Belgium. In 1907 he was created a cardinal. When the Germans entered Belgium in Aug., 1914, Mercier boldly upheld the rights of his country. He took a leading part in the conferences with representatives of the Church of England held in Malines between 1920 and 1923 and died in Brussels, Jan. 23, 1926. A noted philosopher, Mercier edited until 1906 *La Revue Néoscholastique*, and in his writings sought to adapt the philosophy of St Thomas Aquinas to the conditions of the modern world. He published his *War Memories* in 1920.

Mercury Smallest of the planets and the nearest to the sun, from which its mean distance is 36 million miles. Its year is a period of 88 solar days in which time it also rotates upon its axis thus bringing the same side always towards the sun. The orbit of Mercury is eccentric and subject to varying perturbations technically known as *anomalies*. The diameter of the planet is

2702 miles and its density about three fifths that of the earth.

Mercury Metallo element. Its atomic weight is 200.61, symbol Hg, and melting point -39.5°C. Commonly known as quicksilver, it occurs in a fluid state and is found as small globules scattered through the gangue of a vein or as an amalgam with silver. It is extracted chiefly from the native sulphide, cinnabar which occurs in Spain, California and Idria in Yugoslavia. Mercury is a heavy silver white metal which readily combines with gold, silver and many other metals to form amalgams. It is used in the extraction of gold, the construction of thermometers and barometers, for silvering mirrors and in medicine.

Mercury Roman god of trade, corresponding to the Greek god Hermes. He was regarded by the Roman traders as their patron. He was also the herald of Jupiter and for this reason the word is used for a journal or newspaper, e.g., the *Leeds Mercury*. See HERMES.

Mercy Sisters of Order of women in the Roman Catholic Church. It was founded in Dublin in 1831, and has a number of houses in England, the U.S.A. and elsewhere. Its members take the usual vows and live in convents. They look after women and girls in trouble or poverty, and maintain homes and orphanages.

Mere Geographical term for a large pool or lake. The word occurs as a suffix in such names as Windermere and Bittermere. In some cases meres are formed by subsidence of the strata due to dissolution of the rocks, as in Cheshire, where the removal of rock salt has caused the formation of broad, shallow meres.

Meredith George. British novelist and poet. Of mixed Irish and Welsh origin he was born in Portsmouth, Feb. 12, 1828. Educated in Germany he was articled to a solicitor in London in 1844, but abandoned the law for journalism. He was for 30 years literary reader to Chapman and Hall. He died on May 18, 1909.

Although never very popular his work shows great beauty of word and phrase, and his descriptions of scenery and emotion are varied and vivid. His poetry, too, reveals much beauty but is intricate and lacks melody. Among his novels are *The Ordeal of Richard Feverel* (his most popular work), 1850, *Adventures of Harry Richmond*, 1871, *Beauchamp's Career*, 1875, *The Egoist*, 1879, *The Tragic Comedians*, 1881, based on the tragedy of Lancelotti, and *Diana of the Crossways*, 1885, recalling the story of the Hon. Mrs. Norton. His verse includes *Modern Love and Poems of the English Roadside*, 1862 and *Poems and Lyrics of The Joy of Earth*, 1883.

Meridian In astronomy the great circle which passes through the poles of the celestial sphere, or the point at which sun or star attains its highest altitude. On the earth's surface a meridian is a great circle passing N and S through the poles. Degrees of longitude are numbered from a meridian passing through Greenwich.

Mérimée Prosper. French novelist. Born in Paris, in 1803, he entered the civil service and in 1853 became a senator. He belonged to the Realist School, but wrote in a style as exquisitely polished as it was precise. He is best known to English readers perhaps for his *Colomba*, so

familiar to school-children learning French and his delightful *Carmen*. He also wrote a *Chronique du Règne de Charles IX* and some historical and archaeological works. His *Lettres d'une Inconnue* and *Lettres à une autre Inconnue* give an amusing picture of society during the Second Empire in France. He died at Cannes, Sept. 23, 1870.

Merino Spanish name for a breed of sheep producing fine white wool. Imported by Louis XVI to Rambouillet, 1783, that and other improved breeds have reached S. Africa, Australia, New Zealand, Argentina and the U.S.A. The word also denotes dress goods of finest wool, but, in hosiery, cotton and wool fibre mixtures, as distinct from all-wool yarns.

Merionethshire County of Wales. Between Caernarvon and Denbigh on the N and Montgomery on the S and E. It covers 660 sq. m. The beautiful scenery includes Cader Idris, the Berwyn Hills and Lake Yrwyry. The valleys of the upper Severn and the Dovey are especially picturesque. Dolgelly is the county town, on the coast are Porthmadoc, Towyn and Harlech. The soil is poor, much of it fit only for sheep. There are slate quarries. Pop. (1931) 43,198.

Merit Order of British order. Founded in 1902, its membership is limited to 24, but it gives neither title nor precedence. The letters O.M. signify membership. An Indian order of merit was founded in 1837 for native officers and soldiers, and there are similar orders in several European countries.

Merlin Traditional Welsh bard and sooth-sayer. His shadowy story, turned into a romantic myth by the 12th-century Geoffrey of Monmouth, represents him as an enchanter of miraculous birth associated with the cycle of Arthurian romance.

Merlin (*Falco aesalon*). Small bird of prey inhabiting Europe and Asia. The smallest of British falcons, 10-12 in. long, the male plumage is bluish-grey above, bluish-red below, the tail being black-banded; the female is brown. Chaucer mentions their use for flying at larks. The wool-lined ground nest shelters 4-6 brick-red eggs.

Mermaid Tavern Inn that formerly stood in Cheapside, London. Here Shakespeare, Ben Jonson and others of their circle are supposed to have met. It stood near Friday Street, and was destroyed in the fire of 1666.

Meroë City of Ethiopia and a district of the Sudan. The district is almost surrounded by the Blue Nile and the Atbara. The city stood near Shenn on the E bank of the Nile. Just before the opening of the Christian era it was the capital of Ethiopia. Excavations conducted by John Garstang have unearthed remains of temples, pyramids, etc., which show evidences of Egyptian and Greek culture.

Merovingians Line of Frankish kings. They began to rule about 500 in the person of Clovis and remained on the throne until 751. In that year Pepin deposed Childeric III, and the Merovingian kings were succeeded by the Carolingians. The name is from Merovech, one of their early princes.

Merriman Sir Frank Boyd English lawyer and politician. Born in 1880, and educated at Winchester, he was called to the Bar in 1904, became a K.C. and served in the European War. Conservative

M.P. for Rusholme since 1924, he was Recorder of Wigan, 1920-28, and Solicitor General, 1928-29. He was knighted in 1928 and in 1931 became Solicitor-General in the National Government. In 1933 he was appointed President of the Probate, Divorce and Admiralty Division in succession to Lord Merrivale. Name taken by the English novelist, Hugh Stowell Scott. He was born at Newcastle-on-Tyne, Mar. 9, 1862, and educated at Loretto. He entered business life in London but soon gave his whole time to literature, and died Nov. 19, 1903. Among his books are *With Edged Tools*, *The Sources*, *Roden's Corner*, *Barlasch of the Guard*, *The Isle of Unrest* and *In Kedar's Tents*.

Mersea Island of Essex, 8 m. from Colchester. A causeway connects it with the mainland. It is 5 m. long and about 2 wide. The chief centres are West Mersea, an urban district, and East Mersea.

Mersey River of England. It rises in Derbyshire, and flows between Lancashire and Cheshire to the Irish Sea. Its total length is 70 m. The estuary, 16 m. long, is a great shipping area. On it, in addition to Liverpool and Birkenhead, are Runcorn, Wallasey, Bootle, Port Sunlight and several watering places, among them New Brighton and Seaforth. The Manchester Ship Canal joins the estuary at Eastham and underneath the river are tunnels serving Liverpool and Birkenhead. Continual dredging keeps the channel clear for the great liners.

The docks at Liverpool and Birkenhead are controlled by the Mersey Docks and Harbour Board.

The Mersey Tunnel for vehicular traffic between Liverpool and Birkenhead was opened by King George V in July, 1934.

Mersey Viscount English lawyer. Born in Liverpool, Aug. 3, 1840, John Charles Bigham was educated there and abroad. He became a barrister and soon won a reputation by his skill in conducting commercial cases. From 1895-97 he represented a Liverpool division in Parliament. In 1897 he was made a judge, and in 1909 he became President of the probate, divorce and admiralty division. In 1910 he retired, but he was chosen to inquire into the wrecks of the *Titanic* and the *Lusitania*, and served the state in other ways. In 1910 he was made a baron and in 1916 a viscount. He died Sept. 3, 1920.

Merthyr-Tydfil Borough and market town of Glamorganshire. It stands on the Taff, 24 miles from Cardiff and 184 from London, on the L.M.S. and G.W. Ryds. The borough includes Dowlais, Plymouth and Cyfarthfa. The chief industries are coal mines and iron and steel works. Pop. (1931) 71,099.

Merton District of London. It is near Wimbledon, on the S. Ry., and is now a residential area. In 1236 a great council was held here.

Merton College, Oxford, founded by Walter de Merton, was first at Malden in Surrey, but was removed to Oxford in 1274.

Meshed Town of Persia. Capital of a province, it is about 200 miles from Herat, is surrounded by walls and has a considerable trade. The magnificent mausoleum of the Imam Riza, son of Ali, is visited yearly by thousands of Mohammedan pilgrims. In 1918-20 Meshed was occupied by a British force. Pop. 85,000.

Mesmer Friedrich Antou German physiol. Born in Badou, May 23, 1733, he studied medicine in Vienna. In 1766 he published a book called *Influence of the Planets on the Human Body*, and later he met with much success when he treated his patients with what is now called hypnotism. He died at Meersburg, March 6, 1816.

Mesmerism Method of sending a person into a trance or sleep by the use of suggestion and movements of the hands. It was called after Friedrich Mesmer, who used these methods and other aids, such as a darkened room hung with mirrors and filled with scents. See HYPNOTISM.

Mesopotamia Region of Asia, corresponding roughly with the basin drained by the Tigris and the Euphrates. It is bounded by Persia, Turkey, Syria and the Nejd, having the mountains of Armenia and Asia Minor to the north and the Persian Gulf to the south. The northern parts are undulating and crops can be grown there, but south of Bagdad is an alluvial plain, 35,000 sq. m. in area, in which cultivation is only possible by irrigation, which has been practised here since the earliest times.

Historical records, revealed by the excavation of ancient cities, go back to the fourth millennium B.C. and the oldest civilisation was that of the Sumerians. Successive Semitic invasions gradually overwhelmed the Sumerian dynasties, the empire of Akkad founded by Sargon at Kish, opening the era of consecutive history which witnessed the rise of Babylon, the great succession of Babylonian dynasties, the conquests of the Assyrians and the passing of Babylonia under the sway of Persia.

Conquered by Alexander the Great, Mesopotamia never became extensively Hellenised, but passed by degrees under the rule of the Parthians and for a short time under Trajan was part of the Roman Empire. Reconquered by Persia. It fell to the Arabs shortly after the rise of Islam, and became the centre of Moslem culture under the Caliphs. Conquered again by the Mongols under Hulagu and by the Tartars under Timur, the country, now laid desolate was the scene of a struggle between Turks and Persians which ended in victory for the former, and Mesopotamia remained in Turkish possession till the growth of Arab nationalism led to its liberation during the Great War and its reconstitution into the kingdom of Iraq after the war.

Mesopotamia is extremely rich in archaeological remains and ancient monuments. Excavations at Ur, Kish, Babylon, Erech, Nippur, Lagash, Nineveh, Asshur and other ancient sites have yielded important results, but much work still remains to be done. Of existing monuments, the arch at Ctesiphon, the ruins of Babylon, and the ziggurat of Ur are worthy of mention. See SUMER, AKKAD, BABYLON, IRAQ.

Messalina Valeria. Wife of the Roman Emperor Claudius. She was noted for her avarice, cruelty and lust. While the emperor was away she publicly married one of her favourites, and eventually Claudius had her executed in A.D. 48.

Messiah Title 'the Anointed,' as ascribed in Hebrew prophecy with the expected advent of one who would restore the kingdom of David. The Messianic hope, still surviving in Jewish theology, profoundly influenced the spread of Christianity.

Messina City and seaport of Italy. It stands on the strait of Messina, 70 m. from Syracuse. It has a fine harbour, but most of the buildings were destroyed by an earthquake in Dec. 1908. Since rebuilt, it contains some imposing structures, both ecclesiastical and secular, and the famous university has been partly reopened. The chief industry is shipping. Silk, muslin, and linen are manufactured. Pop. (1931) 182,508.

The strait of Messina between Italy and Sicily is about 20 miles long.

Messines Village of Belgium. It is in Flanders, 6 miles from Ypres and gives its name to a ridge of hills conspicuous during the Great War. On Nov. 1, 1914, the Germans entered Messines and they held it and the ridge until 1917. On June 7th of that year the British made a determined attempt to capture the ridge. The German lines were captured according to plan and their counter attack failed. The operations were directed by Lord Plumer and 7200 German prisoners were taken. The ridge and the other gains were lost in April 12, 1918, during the German offensive, but they again came into British hands during the advance in Sept. 1918.

Message Legal term for a dwelling-house with the outbuildings and garden that go with it.

Mestrovic Ivan. Croatian sculptor. Born in Dalmatia in 1883, he started life as an apprentice to a master mason at Spalato. He studied art at Vienna and soon attracted attention by his sculptures, first exhibited in 1902. In 1906 and 1915 17 works by him were on view in London and there is a torso by him in the Victoria and Albert Museum, South Kensington. Other works include portraits of Pius XI and President Hoover.

Metabolism Term in biology. It is applied to the constant physical and chemical changes taking place in the protoplasm of all living tissues. One series of processes are concerned in the building up of tissues from simpler substances and are termed anabolic, while the reverse or catabolic process breaks down the protoplasm into simpler bodies.

Metal Larger of the two groups of chemical elements. A few of the metals are widely distributed throughout the earth's crust, others are of more restricted occurrence, while many are only present in small quantities in rare minerals. Iron and aluminium in the form of oxides and silicates, with calcium and magnesium as carbonates, form a considerable portion of rocks, while sodium and potassium compounds are abundant in sea water and certain deposits. The characteristic physical properties of metals are their lustre and opacity, density, malleability, ductility, fusibility and conductivity, although a wide range of variation and degree occurs. Magnetic properties are present in iron, nickel and cobalt.

Metallography Branch of metallurgy. It deals with the microscopic examination of metals and alloys and the effect upon them of micro-chemical reactions in elucidating their physical structure. It was founded by Dr. Sorby of Sheffield in 1864 and has become of great importance in the investigation of causes of fracture and the structure of alloys, both ferrous and nonferrous. A highly polished section of metal is etched by certain chemical

reagents and the characters of the etchings are studied by reflected light under a special type of microscope

Metallurgy Science dealing with the extraction of metals from their ores and their adaption to manufacture. The methods employed are based upon a knowledge of chemistry, electricity, mineralogy, and the physical sciences. Metallurgy is one of the oldest of the arts and has now reached a very high stage of development. The processes by which metals are extracted from their ores are either dry, including smelting, volatilisation or amalgamation; wet, when chemical reagents are used for solution of the ores, or electrolytic.

Metaphysics Science of being. The word is the title given in the 1st century B.C. to certain books of Aristotle, dealing with philosophy, arranged for study "after physics". The metaphysician's problems concern matter and mind, appearance and reality, and schools of thought tend to fall into such categories as materialism, idealism and realism or to deal with their interactions in the form of monism, dualism or pluralism. There is a chair of metaphysical philosophy at Oxford.

Metazoa Term denoting, in the animal kingdom, all many-celled animals. Higher than the one-celled animalcules and colonies of independent cells forming the Protozoa, they possess body-cavities and nervous systems, being composed of cells specialised to perform the functions necessary for life and reproduction. They comprise the many-celled invertebrate sub-kingdoms, from the sponges upward through the jelly-fish, sea-urchins, worms and molluscs to the arthropods, culminating in the vertebrate sub-kingdom. Development occurs by means of male and female germ-cells.

Metempsychosis Belief of ancient origin that the human soul passes through a series of incarnations in a physical body. In its lowest form metempsychosis may imply the passing of a soul into an animal's body, but this view has not been acceptable to more advanced thinkers. In its higher aspect of reincarnation, it was taught by Plato, Pythagoras and other Greek philosophers.

Meteor Small, solid body moving in a regular orbit in space. Meteors usually occur in swarms which, on entering the earth's atmosphere at a great velocity, become incandescent and visible as so-called shooting stars. In November the Leonid Meteors are seen especially at intervals of 33 or 34 years. The Perseids are visible in August and other important streams occur in other months of the year.

Meteorite Metallic or non-metallic body occasionally found on the earth's surface and having its origin in interplanetary space. Meteorites vary in size from small grains to large masses found in Greenland and South Africa, weighing from 50 to 70 tons or more. The metallic kind, or siderites, are composed chiefly of iron and nickel, with some graphite carbon, while the stony kind, or aerolites, are analogous to the ultrabasic rocks of the earth's crust.

Meteorology Science dealing with the study of atmospheric conditions in relation to the weather and climate. It is based upon regular and systematic observations carried out at a number of

stations. Uniformity in recording these observations necessitates a meteorological organisation with a central office where deductions are made and charts drawn up, enabling weather forecasts to be made. These records are concerned with temperature, direction and force of winds, also general weather conditions, and are based upon observation made at the ground level and partly by observation of the condition of the upper atmosphere by means of kites or balloons carrying recording instruments.

Meteorology has become of increased importance owing to the universal use of aviation, and the aeroplane is now a means of gaining direct knowledge of atmospheric temperature. In Great Britain the Meteorological Office is the controlling centre and was founded in 1854 under the supervision of the Board of Trade, but is now under the Air Ministry.

Methane Simplest of the paraffin series of hydrocarbons. It is known also as marsh gas or fire-damp. Its chemical formula is CH_4 , and it is a colourless, odourless gas, which burns with a faintly luminous flame. Methane is a constituent of coal gas and is given off from decaying vegetable matter.

Methodism Term denoting religious communions arising from the 18th-century evangelical revival. It was applied derisively to certain Oxford students, including John and Charles Wesley, who formed a "society" for Bible study and other activities, 1729. John Wesley began evangelistic work in London, 1739, instituted lay-preaching, 1741, and in 1744 held a conference of his followers, who became officially "the people called Methodists". Wesley and his helpers took up open-air preaching, and the movement spread apace, especially among the humbler classes.

Immigrant local preachers in N. America, from 1760 onwards, developed a movement resulting in a conference in Philadelphia, 1773. Coke and Asbury were consecrated for this work, 1784, Coke's adoption of the title "bishop" started the American Methodist Episcopal Church.

After Wesley's death, 1791, various offshoots arose which gradually coalesced. An Enabling Act, 1930, empowered the Wesleyan, Primitive and United Methodist Churches to combine as the Methodist Church, 1933. World statistics aggregate about 10,000,000 members, ministers and local preachers, apart from scholars. See BIBLE CHRISTIANS.

Methuen Baron. English title borne by the family of Methuen. In 1709 Sir Paul Methuen arranged a treaty by which Portugal joined Great Britain in the war against France and received in return a market in England for her wine. In 1838 his descendant, Paul Methuen, M.P., a landowner in Wiltshire, was made a baron.

Paul Sanford Methuen, who became the 3rd baron in 1891, was born Sept. 1, 1845, was educated at Eton and became a Lieutenant in the Scots Guards in 1864. He served in Ashanti in 1874, in Egypt in 1882, and in 1884-85 raised and led Methuen's Horse in Bechuanaland. Meantime he held appointments on the staff. He was appointed to command a division when the war against the Boers broke out in Oct. 1899, and he was on active service until taken prisoner in March, 1902. From 1903-07 he held a command in England, from 1907-09 he was Commander-in-Chief in S. Africa, from 1909-

15, Governor of Natal, and from 1915 19, Governor of Malta. His honours include the rank of field marshal (1911). In 1920 Lord Methuen was made Governor of the Tower of London. He died Oct. 30, 1932.

Methuselah Character in the Old Testament. A son of Enoch and the grandfather of Noah (Gen v), he is said to have lived 969 years.

Methyl Name given to the organic radicle or group of atoms having the chemical formula CH_3 . It does not exist alone, but has many derivatives.

Methyl Alcohol Simplest of the alcohol series of organic compounds having the formula CH_3OH . In its commercial form it is known as wood spirit or naphtha, being obtained by the dry distillation of wood. Like ethyl alcohol, or spirits of wine, it burns with a blue flame and is used as a solvent in varnish making and in preparing methylated spirit.

Methylated Spirit Form of industrial spirit which has been denatured or rendered unfit for drinking. It consists of a mixture of rectified spirit and wood naphtha or methyl alcohol with addition of pyridine or petroleum. Industrial methylated spirit contains 5 per cent. wood naphtha, pyridinised spirit has in addition 0.5 per cent. pyridine, and mineralised spirit for use in spirit lamps contains 0.5 per cent. wood naphtha, 0.5 per cent. pyridine and 1 per cent. petroleum. See ALCOHOL.

Metre Unit of measurement in the metric system. It was chosen as the supposed ten-millionth part of the quadrant of the earth's meridian, but is now taken as the length of a standard platinum bar in Paris.

Metric System System of weights and measures having a decimal scale of numeration and based upon the metre as the unit. The gram or unit of weight and the litre the unit of capacity are both derived from the metre, and in each set of weights and measures numeration is by powers of ten of the unit.

The following prefixes are used: deca=10, hecto=100, kilo=1000, myria=10,000 and deci=1/10, centi=1/100, milli=1/1000.

The metric system is adopted by most nations owing to its simplicity and ease in calculation the leading exceptions being Great Britain and the United States.

Metronome Clockwork device for determining the pace of music. In inverted suspension before a wooden box (which is marked with a graduated speed chart) is a rod kept upright by a bullet. A sliding brass weight causes the rod to make between 40 and 208 oscillations per minute. The modern metronome was the invention of the Dutch mechanician Winkel in 1912, but Maelzel who added the speed-chart, is credited as the inventor.

Metropolis Word used for the chief city of a country. In England the metropolis is London, where some of the organisations and the boroughs are known as metropolitan. The Metropolitan Water Board, set up in 1902 supplies water to some 8,000,000 people in the London area. It consists of 66 members elected by the county councils and other authorities concerned. Its offices are in Rosebery Avenue, E.C.

The police courts in London are called metropolitan, and there are metropolitan police and metropolitan district railways. The Metropolitan Asylums Board existed from 1887 to 1931, when its work was taken over by the London County Council. Its duties were to provide hospitals for infectious diseases, asylums for imbeciles, schools for defective children and so on.

Metropolitan Archbishop or presiding bishop who holds a bishopric of Canterbury and York are metropolitans. The term is also used in the Greek and Roman Catholic churches.

Metternich Clemens Lothar Wenzel, Prince, Austrian statesman. Born at Coblenz, May 15, 1773, he became Austria's Foreign Minister in 1809, and for a period after the end of the Napoleonic wars was "The Master of Europe." A man of iron will but personally kindly, he was without any deep convictions or sympathies. He concluded the Treaty of Fontainebleau and negotiated the marriage of Napoleon and Marie Louise. In 1814 he took a prominent part in the Congress of Vienna, joining with France and Russia against Napoleon. From 1815 he became very powerful and by his founding of the Holy Alliance and consequent suppression of all popular movements contributed largely to the period of reaction in Europe which came to a head in 1848. He lived in retirement from 1849 till his death in Vienna, June 11, 1859.

Metz Town of France, capital of the Moselle department. A Roman fortified town, it was supplied with water by a huge aqueduct, and connected by road with other important centres. It belonged later to the Huns, the Franks and, after a free period under its own powerful bishops, to the French, being strongly fortified by Vauban in 1674. Taken by the Germans in 1870 and made the capital of German Lorraine, it was restored to France in 1919.

The Moselle runs through it, and there are fourteen bridges and ten city gates. The cathedral, built in the 13th and 16th centuries, is mostly Gothic in style. Metz is a great centre of commerce. The chief industries are in shoes, metal work and the preservation of fruits and vegetables. There is a tobacco factory, also some trade in wine and grain. Pop (1931) 78,767.

Meuse River of Europe called by the Dutch the Maas. It rises in E. France, not far from Langres and flows past Verdun and Sedan to Givet, where it enters Belgium. It flows then past Dinant, Namur and Liège into the Netherlands. It falls into the Waal, a branch of the Rhine, near Gorkum. The river is 575 m. long 120 m. being in Belgium and 150 in the Netherlands. The Bar, Sambre and Ourthe are among its tributaries. It is navigable for most of its course, and is linked with other waterways by canals. The Meuse is important from a strategic and a commercial point of view. There was much fighting along its course during the Great War and also in earlier times.

A department of France is called the Meuse. This is a hilly district in the E. Bar-le-Duc is the capital, other places are Verdun and Clermont.

Meux Sir Hedworth, English sailor. Born July 6, 1858, he was a younger son of the 2nd Earl of Durham, and as Hedworth Lambton entered the navy in 1870.

In 1899 he became known for his assistance when commanding the *Powerful* to the defenders of Ladysmith. From 1904-06 he commanded a cruiser squadron, from 1908 he was in charge of the fleet in Chinese waters. From 1912 to 1916, when he retired from the service, he was Commander-in-Chief at Portsmouth. In 1906 he was knighted, and in 1911 he succeeded to the property of Sir Henry Meux and took that name. From 1916-18 he was MP for Portsmouth. He died Sept 20, 1929.

Mevagissey Village and watering place of Cornwall. It is 12 m from Truro and has a good harbour. It is a fishing station.

Mexborough Market town and urban district of Yorkshire (W.R.). It stands on the river Don, 11 m. from Sheffield, on the L.M.S. and L.N.E. Rlys. The industries are connected with coal and iron. Pop (1931) 15,856.

Mexico Country extending from the United States of America to Guatemala in Central America. It was annexed by Spain in 1521, remained a Spanish possession for three centuries and then became a republic passing through violent times, intermixed with periods of tranquillity, notably under President Diaz (1876-1880 and 1884-1911).

Mexico is a Federated Republic of 28 states, 1 federal district and 2 territories; area, 767,198 sq m. It has a high central plateau bounded by coastal mountains, beyond which the land slopes to the coasts. The plateau has a cool dry atmosphere, with large desert areas, and crops need irrigation. The climate in the S is tropical. The chief industry is mining. The oil products are also famous.

Vast areas are suitable for agriculture, but only a fraction has yet been exploited. The crops include sugarcane, sisal, maize, coffee, cotton, tobacco, cocoa, bananas, olives, rice and chicle, the basis of chewing gum. The valuable forests are almost untouched. Great damage was done by a cyclone in 1933. Population (1930) 16,401,030.

Mexico City Capital of Mexico, on the central plateau, about 7400 ft above sea level. Like the old Aztec city, the principal streets lead from a central plaza, with its Parliament House and cathedral. Formerly liable to serious damage by flooding, the city is now adequately drained. It is an industrial centre with many factories and is connected with the United States by rail. It has two broadcasting stations (49.8 and 48.65 M). Pop (1930) 968,443.

Meyerbeer Giacomo, French composer. One of the outstanding figures in French Grand and Comico Opera, he was born in Berlin, of Jewish extraction, in 1791. A prodigy pianist at six, he afterwards studied composition in Venice, and settled in Paris, 1826, where he produced his best work, *Robert le Diable* (1831), *Les Huguenots* (1836) and *Le Prophète* (1843). He died May 2, 1864.

Meynell Name of an English family that gives its name to a famous pack of foxhounds. It was founded by Hugo C. Meynell-Ingram about 1846, and hunts a district on the borders of Staffordshire and Derbyshire. The kennels are at Sudbury.

Meynell Alice, English poetess. She was born in 1850, a daughter of T. J. Thompson and a sister of Lady Butler. In 1877 she married Wilfred Meynell, the author and journalist, and won fame by her poems *The Rhythm of Life* and *The Colour of Life*. She compiled one of the best of English verse anthologies *The Flower of the Mind*, and died Nov. 27, 1922.

Mézières Town of France. It stands on the Meuse, 47 m from Rheims, and is a railway junction. With Charleville on the other side of the river, it forms a municipality. The Germans held it from Aug. 1914, until Aug. 1918, much damage being done when they were driven out. The town, which has been adopted by Manchester and rebuilt, is famous for its defence by the Chevalier Bayard in 1521.

Mezzotint Engraving process in which the design is worked from a dark ground to the high lights. This is done by roughening the surface of the copper or steel plate with a "rocker" tool, giving when inked a deep black surface. The high lights are obtained by scraping and burnishing.

Miami City and pleasure resort of Florida. It is in the south of the state at the mouth of the River Miami and on Biscayne Bay, an arm of the Atlantic Ocean. Owing to its excellent climate, it has become a very popular pleasure resort. In 1926 much damage was done by a hurricane. Pop. 110,600.

Miami is the name of an Indian tribe and of a river in Ohio.

Mica Group of mineral silicates of aluminium and potassium, sodium, lithium, or iron and magnesium, characterised by a pearly lustre and cleavage into thin elastic sheets. The colour varies from white, yellow, green to brown and black. The colourless varieties are used for lamp chimneys and stove doors, also as an electrical insulating material.

Micah One of the Old Testament minor prophets. A contemporary of Isaiah, he prophesied under Jotham, Ahaz and Hezekiah. The Book of Micah contains some Messianic promises.

Michael Name of a "great prince" of the angelic host mentioned in Daniel x. 12. In Jewish theosophy he was a champion of Israel. He is commemorated as a saint on Sept. 29.

Michaelmas Feast of St. Michael and All Angels on Sept. 29, and the day fixed as Quarter Day. Up to 1873 Michaelmas was the first term in law (Nov. 2 to 25).

Michelangelo (Michelangelo Buonarroti) (1475-1564). Italian painter, sculptor, architect and poet. The greatest of the Renaissance artists of Italy. He worked under the patronage of Lorenzo de' Medici and Popes Alexander VI. and Julius II. His most famous works include the colossal statue of David, "The Giant," carved in a block of marble, his sculptured figures "Moses" and "The Slaves," his frescoes on the ceiling of the Sistine chapel at Rome, and "The Last Judgment." His verse is ranked among the finest examples of Italian poetry.

Michelsen Albert Abraham, American scientist. Born at Strelno, Gormany, Dec. 19, 1852, he was educated at the U.S. Naval Academy, 1873.

Leaving the navy he studied in Germany and France, 1880-82, and became professor of physics at the Case School, Cleveland, 1883. While here he invented his Interferometer. In 1880 he became professor of physics at Clark University and in 1892 at the University of Chicago. In 1902 he was appointed distinguished service professor at Chicago. He received the Nobel Prize for Physics in 1907. With E. W. Morley he conducted an experiment to determine the effect of the earth's motion on the velocity of light (1887). In 1925 he repeated this test, both results being negative—fundamental experiments upon which was based Einstein's Theory of Relativity. See ETHER, LIGHT RELATIVITY.

Michigan State of the United States. In the north of the country, it consists of a peninsula between Lakes Michigan and Huron. Nearly 40,000 sq. m. of water belong to it and it has a coastline of 1620 m. on Lake Michigan. The land area is 57,480 sq. m. Lansing is the capital, but Detroit is much the largest city. Other populous centres are Grand Rapids and Flint. The state is governed by a legislature of two houses and sends two senators and 17 representatives to Congress. It is chiefly an agricultural area but a great deal of copper is mined. Pop. (1930) 4,840,000.

Michigan Lake of the United States. It covers 22,450 sq. m. and is the only one of the Great Lakes wholly within the United States. Chicago and Milwaukee are lakeside cities. There is little navigation since the lake is subject to violent storms and lacks good harbours, but its fisheries are valuable.

Micrograph Instrument of the nature of a pantograph used for producing very small writing or drawings also a minute drawing.

Micrometer Instrument used for accurately measuring very small spaces. It takes many forms, the commonest being the screw micrometer in which a screw with a very small pitched thread is provided with a large graduated head and suitably mounted. The movement of the screw during a complete rotation is equal to the pitch of the thread, smaller measurements being determined from the graduated head. Special forms of micrometers are used in telescopes and microscopes.

Microphone Electrical instrument for intensifying sound. The three chief types are the carbon or contact microphone used in telephony, the electrodynamic or magneto phone and the electrostatic or condenser microphone. The action of the carbon type depends upon the varying electrical resistance between carbon particles, contained between two carbon discs upon which the sound waves impinge.

Microscope Optical instrument used for examining minute objects by magnification. The name is usually applied to the compound type consisting essentially of a rigid stand carrying a stage for supporting the object, beneath the stage is a movable mirror for illuminating the object and above is a tube carrying the lenses.

The Royal Microscopical Society, founded in London in 1830 was established to foster microscopical science.

Midas In Greek legend a king of Phrygia. He asked that all he touched might turn to gold and his wish was granted, when even his food became gold he implored

relief, and gained it by bathing in the River Pactolus.

Middelburg Town of the Netherlands. The chief town of the province of Zeeland it stands on the Island of Walcheren 4 m. from Flushing. The town hall is a fine 16th century building. Middelburg was formerly a centre of the cloth trade and has some manufactures. Pop. 19,000.

Middelburg Town of the Transvaal. It is 95 m. from Pretoria, on the railway to the port Lourenço Marques, 284 m. away. Near are coal mines. It is the business centre of a large district. Pop. (white) 2274.

Another Middelburg is a town of Cape Colony. It is 250 m. from Port Elizabeth and is the centre of a farming district.

Middle Ages Term used for the period between ancient and modern history. It is usually regarded as beginning at 476, when the last Roman Emperor was deposed in Italy. Its end may be either the capture of Constantinople by the Turks in 1453 or the discovery of America in 1492.

Middleham Village of Yorkshire (N.R.) It is 2 m. from Leyburn and is famous for the ruins of its castle, one of the strongest fortresses in England, long a seat of the Neville family. There are racing stables in the village.

Middlesbrough County borough, seaport of Yorkshire (N.R.) It stands on the Tees, 238 m. from London on the L.N.E. Ry., and was founded early in the 19th century. The chief industries are the production of iron, steel chemicals and ship building. There is a fine harbour with extensive docks in the river. A transporter bridge crosses the river here. Pop. (1931) 138,480.

Middlesex County of England, the smallest in the country, but densely populated. It covers 233 sq. m. and much of the area is in the London district. Brentford is the county town. Other boroughs are Acton, Faling, Harnsey and Twickenham, the urban districts of Willesden, Edmonton, Enfield, Finchley, Southgate and Tottenham are also in the county. In 1932 the urban districts of Hendon and Heston were raised to the rank of boroughs. It is divided from Surrey by the Thames and from Essex by the Lea. The Colne and Brent are other rivers. Pop. (1931) 1,638,521.

The Middlesex Regiment, consisting of the old 57th and 77th Foot, raised in 1755 and 1787 respectively, has a long record of service and fought in the Great War. They are known as 'The Die hards' from their conduct at Albuera (q.v.).

Middleton Borough and market town of Lancashire. It is 6 m. from Manchester on the L.M.S. Ry. There are cotton mills, engineering and chemical works. Pop. (1931) 29,180.

Middleton Thomas, English dramatist. Born in London about 1570 he studied law. In 1620 he was made city chronologer and he died in 1627. He is known as the author of several once popular plays, notably *A Trick to catch the Old One*, *A Mad World My Masters*, *Women beware Women* and *A Game at Chess*. In collaboration with Rowley he wrote *The Changeling*, *The Spanish Gypsy* and *The Old*

Law, and collaborated with Thomas Dekker in *The Honest Whore* and *The Roaring Girl*. Middleton wrote for some years the pageants for the Lord Mayor's Show

Middleton -in-Teesdale Market town of Durham It stands on the Tees, on the L N E Rly Around are coal mines Pop 1977

Middlewich Borough and market town of Cheshire It is on the River Dane, 6 m from Northwich, on the L M S Rly The chief industry is the extraction of salt, there are also chemical works Pop (1931) 5458

Midge Name denoting indiscriminately two-winged insects of various families The typical plumed midge, *Chironomus plumosus*, swarms in the summer air, its short, soft, non-piercing proboscis distinguishing it from gnats, its larvae are colloquially called blood-worms The black midge which bites the hand is a *Ceratopogon* Some, e.g., the pear midge, are destructive

Midhurst Market town of Sussex. It is 12 m from Chichester and 64 from London, with a station on the S Rly Near are the ruins of Cowdray Castle Midhurst was once a borough Pop (1931) 1890

Midi District of France It is the region around Toulouse and owes its name to the fact that this was once a middle land between France and Spain The Canal du Midi, 148 m long, constructed between 1666 and 1681, extends from Toulouse to the Mediterranean Sea, near Warboune

Midian Arabian region E of the Akabah Gulf, anciently occupied by the Midianites Some were caravan traders, some pastoral nomads They made predatory excursions into Canaan until Gideon defeated them

Midlands Name used for the midland counties of England The district lies between the Thames and the Trent, and between East Anglia and the counties on the border of Wales It includes the counties of Nottingham, Derby, Stafford, Leicester, Rutland, Northampton, Warwick and Worcester

The Midland Regional programme of the British Broadcasting Corporation is run on a wave-length of 393.9 M., 25 kW

Midleton Earl of English politician Born Dec 14, 1856, St John Brodrick was the eldest son of the 8th Viscount Midleton, the holder of an Irish title dating from 1717 In 1880 he was elected M P for Surrey and represented a division of that county until 1907, when he became a peer In 1888-92 and again, 1895-1900, he held office in the Unionist Government and in 1900 became Secretary for War From 1903-05 he was Secretary for India He was created an earl in 1920 The earl lives at Piper Harrow, near Godalming, his eldest son being styled Viscount Dunsford

Midlothian County of Scotland It covers 370 sq m and has a short coastline on the Firth of Forth In it are the Pentlands and other ranges of hills It contains Edinburgh, Leith, Dalkeith, Musselburgh and Penicuik, and such romantic spots as Roslin and Hawthornden Its rivers are the Water of Leith, Gala, Almond and other short streams The title of Earl of Midlothian has been borne by the Earl of Rosebery since 1911. Pop (1931) 526,277

Midnight Sun Term applied in relation to the fact that the sun is visible within the Arctic Circle during the whole 24 hours at midsummer This is principally due to the obliquity of the earth's axis During the season when the North Pole is inclined towards the sun, the day lengthens as one approaches the North Pole

Midshipman Junior officer of the British navy A naval cadet on passing out of the college at Dartmouth becomes a midshipman when his training is continued on board ship He messes in the gun-room and commands small parties of men His rank is shown by a white tab on the collar of the jacket and he wears a dirk

Midsomer Norton Urban district of Somerset It is 12 m from Bath, on the G W Rly, and stands on the little River Somer The chief industry is coal mining Pop (1931) 7490

Midwife Women who attend during childbirth The profession is a very old one and until recently could be practised by anyone Now, however, in Great Britain all midwives must be certificated The Central Midwives Board at 1 Queen Anne's Gate Buildings, London, S W, grants the certificates and has power to revoke them There is a separate board for Scotland at 49 George Square, Edinburgh

Midwifery Properly speaking, the term covers the study and supervision of the whole reproductive cycle in man and is synonymous with obstetrics (q.v.) In terms of general reference, however, midwifery is confined to the attendance on mothers during childbirth and hence to the profession of midwifery as practised by women trained to assist in and supervise delivery It therefore falls under the province of nursing (q.v.)

MIDWIFERY AS A CAREER—Midwifery offers scope to the woman who takes up nursing too late in life to obtain a general hospital training, though here as elsewhere such a training would stand her in very good stead The status of the midwife is much improved since the passing of the Midwives' Acts in 1902 and 1918, enforcing compulsory registration and training The course is a twelve-months' one (or six months for a general nurse) and a certificate is given by the Central Midwives Board, Queen Anne's Gate Buildings, Westminster, London Training can be had at any Maternity or Lying-in Hospital recognised by the Board, to whom application for particulars should be made

Mignonette Genus *Reseda* of annual herbs of the order *Resedaceae*, natives of the Mediterranean region and W Asia The fragrant *R. odorata*, which reached Chelsea from Egypt, 1752, has become a favourite garden plant, developed into compact forms, with giant pyramidal white, red and golden heads, as well as dwarf and double-flowered varieties Tree-mignonette, developed by gardeners, is a short-lived perennial form The two British and several European species, including the white mignonette, are scentless.

Migraine Word derived from *hemicrania*, a neuralgic pain usually beginning or predominating on one side of the head It is also called sick-headache Sometimes occasioned by stomach disturbance and eyestrain, it may recur periodically, and

be attended by numbness, visual disturbances, excessive sensitiveness and vomiting, lasting several hours or the whole day

Migration Periodic mass movement of animals, especially birds from one seasonal habitat to another and back again. The primary stimulus is the food quest. Conditions in the S hemisphere have not been closely studied. In the N hemisphere most birds exhibit mass movements between summer quarters for nesting and breeding and winter quarters for feeding and resting. Britain has summer visitors for breeding, winter visitors from northern breeding places, birds of passage, partial migrants of whom some remain, and non migratory residents. Birds invariably breed in the colder area of their range, those breeding in the tropics sometimes make vertical but never horizontal migrations. The collective movement is remarkably uniform, punctual and constant in direction.

Mikado Sovereign of Japan. The Japanese do not use this title, preferring to call their ruler *tenshi*, or the son of heaven. The *Mikado* is the name of one of Gilbert and Sullivan's most popular operas. It was first produced in 1885.

Milan City of Northern Italy. Situated on the River Olona in the Lombard plain, it is the capital of the province of the same name. Historically it is one of the most interesting of the Italian cities, with many famous and beautiful buildings. These include the cathedral, which took nearly five centuries to complete, the church of San Ambrogio, the Castello Sforza, and the monastery of Santa Maria delle Grazie, where Leonardo painted his "Last Supper" on the refectory wall.

Milan is equally important commercially and financially. Silk is the principal manufacture. Others include machinery, embossed leather, etc. It has a broadcasting station (331.5 M., 7 kW). Pop. (1931) 976,000.

The Duchy of Milan was very powerful in the Middle Ages. It was held first by the Visconti family, then by the Sforzas, and was later in the hands of the Spanish crown.

Mildenhall Market town of Suffolk. It is 12 m from Bury St Edmunds and 76 m from London on the little River Lark, and is served by the L.N.E. Rly. The market cross and the manor house are notable. Pop. 3370.

Mildew Term applied to a group of epiphytic and parasitic fungi belonging to the *Erysiphace*. It is popularly used for moulds and allied types. The mildew fungus forms a cobweb like mycelium on plants while haustoria or suckers penetrate the epidermis of the host. Both summer spores and winter spores are formed, the latter being set free in the following spring. *Erysiphe tuckeri*, the mildew of the grape vine attacks the leaves and fruit doing great damage to the vine.

Mile English measure of length. The statute mile is 1760 yards, but in former days it varied very much in different parts of the country. The nautical mile consists of 2202½ yards. The mile is divided into eight furlongs. It originated with the Romans, being 1000 (mille) paces, or about 1610 yards.

Mile End District of London. It is in the borough of Stepney and gives its name to the great thoroughfare known as Mile End Road, connecting Whitechapel Road and Bow Row. In Mile End are the

Peoples Palace, the East London College, the Great Assembly Hall, St Benet's Church and Trinity Hospital.

Miletus Ancient city and seaport of Asia Minor. Traditionally it was founded by Miletus, a son of Apollo, and it became one of the greatest of the Greek cities of Asia Minor. In 494 B.C. Miletus headed the other Greek cities of this region in their revolt against the Persians, but this resulted in its destruction. Being rebuilt it was destroyed by Alexander the Great, after whose time it was a Roman city.

Milford Seaport and urban district of Pembrokeshire, standing on Milford Haven, 0 m from Haverfordwest, on the G.W. Rly. There is a good harbour and the port is a fishing centre. The town was founded in 1790 to serve as a station for the navy, but this was later moved to Pembroke Dock. Pop. (1931) 10,116.

Milford Haven Opening of the Atlantic Ocean on the coast of Pembrokeshire. It is 10 m long and is one of the finest harbours in Great Britain. The East and West Cleddau rivers flow into it and on it are Milford and Pembroke Docks. St Ann's Head on which is a lighthouse, guards the entrance to the harbour.

The title of Marquess of Milford Haven was given in 1917 to Louis, Prince of Battenberg. Born in Austria, May 24, 1854, he became a British subject and entered the navy. He was Director of Naval Intelligence, 1902-05, Commander-in-chief of the Atlantic Fleet, 1908-10 and First Sea Lord of the Admiralty, 1912-14. He died Sept. 11, 1921.

Military Cross (M.C.) British decoration. It was founded in 1915 and is given to military officers not higher than the rank of captain for services in action. The badge is a silver cross and the ribbon is white, purple and white.

Military Medal (M.M.) Decoration given to non-commissioned officers and men of the British army for bravery under fire. Women are also eligible. Instituted in 1916 it is a silver medal. On the reverse side are the words "for bravery in the field" surrounded by a wreath with the royal cipher and a crown above.

Military Knights of Windsor Body of officers attached to the Order of the Garter. They were at first known as Poor Knights and ranked below the ordinary knights. They are appointed by the king, being wounded or disabled officers of high rank and they occupy quarters in Windsor Castle. Their number is 13.

Military Law Law governing military forces. In Great Britain, the Army Act, passed annually, includes the penal code for discipline in the army, administrative laws and provision of maintenance. Matters of discipline, in addition to the act, are governed by rules of procedure in the King's regulations and in royal warrants.

Militia Name given to a military force in Great Britain until 1908. It was raised in the counties by the lord lieutenants, the men undergoing one month's training each year, for which they received payment. The militia was formed when the country was threatened with invasion. It was called out in 1715 and 1745. During the several wars with France, 1793-62, 1778-83, 1792-1802 and 1803-16; during the Crimean

War, 1854-55, and during the struggle with the Boers in 1899-1902. After 1757, each parish was obliged to furnish men, drawn by ballot, for the militia, but persons on whom the lot fell could pay a substitute. Not being available for foreign service some of them went as volunteers in 1899. In 1907 the militia was merged in the Territorial Force.

Milk Fluid secreted in the mammary glands for the nourishment of the young animal. It is of the nature of an emulsion, minute fat globules being held in suspension in a liquid which consists of water containing, in solution, albuminoids, lactose and mineral salts. Cow's milk consists of about 87 per cent water, 3.5 per cent fat, 3.0 per cent albuminoids, 4.5 per cent lactose or milk sugar, and 0.7 per cent ash. In skim milk 90 per cent is water and in whey about 93.5 per cent. In condensed milk much of the water has been evaporated in a partial vacuum at a comparatively low temperature. Under the Food and Drugs Act milk exposed for sale must conform to a certain standard and must not contain preservatives or colouring matter.

Milkwort Large genus of temperate and tropical perennial herbs typical of the milkwort family (*Polygala*). The common British *P. vulgaris*, formerly supposed to increase the milk-yield in cows, has wiry stems, leathery leaves and small flowers. Several showy Cape species are cultivated. The British sea-milkwort, *Glaux maritima* is of the primrose family.

Milky Way Name given to the starry belt seen on a clear night. It stretches as a luminous band across the sky, especially in autumn, when it stretches east and west close to the zenith. With the aid of the telescope it is seen to consist of a dense belt of stars, but not uniform, however, as dark channels and spaces occur usually near the brighter areas. In the vicinity of Alpha Centauri the Milky Way divides into two branches which reunite near Eta Cygni.

Mill John Stuart, English economist, publicist and philosopher. Born May 20, 1806, he was the son of James Mill, the founder, with Jeremy Bentham, of the Utilitarian philosophy. He entered the India Office and became the foremost exponent of Utilitarianism, but later adjusted his views on more altruistic lines. He did much for the poor, and advocated universal suffrage and franchise. He died May 8, 1873. Mill wrote a *System of Logic, On Liberty, and Principles of Political Economy* amongst other works.

Millais Sir John Everett, English artist. Born at Southampton in 1829, Millais was one of the founders of the Pre-Raphaelite Brotherhood. At an early age he entered the Royal Academy Schools and developed remarkable artistic power and technical skill. His early painting "Christ in the Carpenter's shop" (Tate Gallery) is his best, and other important pictures are "Lorenzo and Isabella" (Liverpool), "Ferdinand and Ariel" (Tate Gallery) and "Ophelia" (National Gallery). In 1885 he was created a baronet and in 1896 became president of the Royal Academy. He died Aug 13, 1896.

Millbank District of London, in the city of Westminster by the side of the Thames. The chief buildings are the Tate Gallery, Queen Alexandra's military hospital and the Royal Army Medical College

and barracks. Between 1812-22 a prison was built here in the shape of a wheel, surrounded by a moat. It was used for various purposes and, in 1903, was pulled down. The site is now occupied by the Tate Gallery. Imperial Chemical Industries have erected large offices here, and another large block is known as Thames House.

Millboard Stout form of cardboard used for bindings, box-making, etc. It is made from various waste fibres and papers. Hemp and flax waste are used for the best grades, waste paper for the lower qualities, and a percentage of pulped leather for leather boards.

Millennium Mediaeval Latin word denoting especially a period when according to long expectation, Christ would return to govern the earth for a thousand years. It is based upon apocalyptic literature, e.g., Daniel and Revelation.

Millerand Alexandre, French lawyer and politician. Born Feb 10, 1859, he became editor of Socialist papers, was elected to the Chamber of Deputies as a Radical Socialist in 1885, and was active in military organisation and the suppression of strikes. At the end of August, 1914, he became Minister for War, and in 1919, as Commissaire Général in Alsace Lorraine, was successful in re-organising these districts under French government. He was elected President of the Republic in 1920, and kept a firm hold on foreign affairs, but was defeated in 1927 and succeeded by Doumergue. Later in the year he was again elected to the Senate.

Milles Carl, Swedish sculptor. Born at Stockholm in 1875, and educated at Stockholm and Paris, he was for a time Professor at the Royal Akademie at Stockholm. He teaches sculpture at the University of Cranbrook, Michigan, U.S.A. His work is represented in the galleries of Europe and America.

Millet General name for many cereal grasses. Common millet, *Panicum mihacum*, and little millet, *P. miliare*, are grown largely in India for food purposes. Italian millet comes from *Setaria italica*, German millet being a dwarf variety. Pearl millet grows in tropical Africa, India and S. Europe. See INDIAN MILLET.

Millet Jean François, French painter. Born at Greville in Normandy, in 1814, Millet was the son of a peasant farmer and showed a natural aptitude for drawing. The town of Cherbourg paid for him to study in Paris under Delaroche. In 1849 he settled at Barbizon and became famous for his paintings of peasant life, his works including "The Angelus," "The Sowers," and "The Gleaners." He died Jan 20, 1875.

Mill Hill Residential district of London. It is 8 m. N.W. of the city, on the L.M.S. and L.N.E. Rlys., in the urban district of Hendon.

Mill Hill School, founded in 1807 for the education of the sons of Nonconformists, has a fine range of buildings and accommodation for about 500 boys. The Society of Jesus have a college at Mill Hill.

Milling Term applied to the process of grinding corn and other material by steel rollers. It is also used for a process in engineering works by which metal parts are planed to true surfaces. In relation to coinage milling refers to the indenting of the rim of coins to prevent slipping or filing.

Millipede Order of the arthropod class *myriopoda*. Allied to the centipedes, the millipedes closely resemble the insects in having air tubes or tracheae opening on the surface by stigmata. The body is long, rounded and segmented, each segment, with the exception of the first four, bearing two pairs of legs.

Millom Urban district and market town of Cumberland. It stands on the estuary of the Duddon, 8 m from Barrow-in-Furness, on the L.M.S. Rly. The town is a centre of the iron and steel manufacture. At one time it had a castle, of which some ruins remain. Pop (1931) 7406.

Millport Burgh and watering place of Bnteshire. It is on the island of Great Cumbrae and is reached by steamer from the Clyde ports. Here is the cathedral for the Roman Catholic diocese of Argyll and the Isles, and there is a marine biological station. Pop (1931) 2083.

Millwall District of London. It is on the north side of the river, in the Isle of Dogs and the borough of Poplar. It contains large docks and has facilities for unloading and storing grain.

Millwall Athletic is a famous association football club. The ground is at New Cross Gate, London, S.E.

Milne Sir George Francis. English soldier. Born Nov. 5, 1866, he entered the army as an artillery officer in 1885. He served in the Sudan in 1898 and in South Africa, 1899-1902. In Aug., 1914, he commanded the artillery of a division in France, and was soon promoted, being in turn chief staff officer of an army, leader of a division and head of an army corps. In 1916 he went to Salonica and commanded the British forces for the campaign that ended in the defeat of Bulgaria. From 1923-26 Milne had a command in England and from 1926-29 he was Chief of the Imperial General Staff. He was knighted in 1918, made a general in 1920 and a field marshal in 1928.

Milner Viscount. British statesman. Born March 23, 1854, at Bonn, he was educated in Germany and at London and Oxford. He became a barrister, was private secretary to the Chancellor of the Exchequer and in 1889 was given a post in Egypt. As Sir Alfred Milner he was made Governor of the Cape of Good Hope and High Commissioner for South Africa in 1897. He was responsible for the negotiations that preceded the outbreak of war with the Boers in 1899 and his actions at that time were severely criticised. He helped to arrange the peace of 1902 and was made Governor of the annexed areas, the Transvaal and the Orange Free State. In 1905 he retired, having been made a baron in 1901 and a viscount in 1902. In 1916 he was made a member of the war cabinet and he helped to direct the final operations against Germany. In 1918 he was made Secretary for War and in 1919 Secretary for the Colonies. He left office in 1921 and died, unmarried, May 13, 1925. Of his books the best known is *England in Egypt*.

Milngavie Town of Stirlingshire, 6 m from Glasgow. It is the terminus of a branch railway line. Near are some waterworks that supply Glasgow. Pop 5056.

Milnrow Urban district of Lancashire. It is 2 m from Rochdale and is a coal mining centre. Pop (1931) 8624.

Milnthorpe Market town and river port of Westmorland, on the River Kent, 7 m from Kendal. It has a coasting trade and is a summer resort. Pop 1025.

Milo Titus Annius. Roman official. His fame is due to his connection with Cicero. In 57 B.C., when he was tribune, he brought about the return of the orator from exile. Later, following a quarrel which brought about the death of one Clodius, Milo himself was sent into exile. He was killed in a fight in 48 B.C. Cicero's speech in defence of Milo, *Pro Milone*, is a popular piece of classical prose.

Milreis Brazilian coin. It is worth about 6d and is issued in gold, silver and paper. It contains 1000 reis. The coin was formerly used in Portugal.

Miltiades Athenian tyrant who was responsible for the battle at Marathon against the Persians. This victory, 490 B.C. was one of the decisive battles of the world. Miltiades attacked the Island of Paros to regain control of the Aegean, but was defeated, and on failing to pay a fine of fifty talents, was cast into prison, where he died, 488 B.C.

Milton Name of several places in England. Milton-next-Sittingbourne is a market town and urban district in Kent. It is 10 m from Chatham and is reached by the S. Rly. Another is a little watering place in Hampshire, 6 m from Lymington. Another is a village, 4 m from Cambridge.

Milton Creek, an arm of the Swale, is famous for its oysters. Paper is made here.

Milton Abbas is a model village, 7 m from Blandford in Dorset. There was once an abbey here and the fine church still stands.

Milton Park, near Peterborough, is a seat of the Fitzwilliam family.

Milton John. English poet. Born in London, Dec. 9, 1608, he was educated at St. Paul's School and Christ's College, Cambridge. His early poems, *L'Allegro*, *Il Penseroso* and *Lycidas*, a lament for the death of his friend Edward King, show the influence of country life, as well as the classical learning and the heauty of language that mark his later works. *Lycidas* is one of the most beautiful elegies in the English language. To this period also belongs the masque of *Comus*, performed at Ludlow Castle in 1634.

After a tour abroad Milton turned to politics and prose writing. His prose works are largely theological in character, for he was a strong Puritan controversialist. *Areopagitica* is the greatest plea for liberty of speech in the English language. In the Civil War Milton espoused the Parliamentary cause. In 1649 he became Latin secretary to the Commonwealth, and in 1655 secretary to Cromwell. The blindness which fell upon him about 1652 led to the writing of the best known of his sonnets, *On his Blindness*.

At the Restoration, he retired from public life and wrote *Paradise Lost* and *Paradise Regained*. The greatness of its theme, the fall of man, as well as the stately heauty of its verse makes *Paradise Lost* one of the great poems of the world, and places Milton as second only to Shakespeare among English poets. *Samson Agonistes*, his last poem, was written three years before his death, Nov. 8, 1674.

Milwaukee City and port of Wisconsin, United States. It is on the western shore of Lake Michigan where it has a good harbour, 85 m from Chicago.

The River Milwaukee and its tributaries flow through the town before entering the lake Milwaukee is a great distributing centre. Other industries are flour milling and tanning. Pop 578,249

Mimeograph Form of flat stencil duplicator for making numerous copies of a document. A wax stencil is made on a typewriter, or otherwise, placed over a sheet of paper when, by passing an inked roller over the stencil and paper a facsimile is obtained

Mimosa Large genus of leguminous plants, natives of the warmer regions of Africa, Asia and America. The leaves, twice divided into leaflets, are in many species sensitive, closing when touched, e.g., the Brazilian *M. pudica*, frequently cultivated in greenhouses. The so-called mimosa, popular in Covent Garden market, is actually a half-hardy *Acacia*

Mimulus Cultivated variety of mnsk (*Mimulus moschatus*) of the order *Scrophulariaceae*. It is both annual and perennial, with large blooms in yellow, golden brown and variegated shades

Min Egyptian god. He was a god of fields and highways, but later he became merged in Amon

Mina (or Mynah). Name of various birds of the starling family, inhabiting India and S.E. Asia. One, *Acridotheres tristis*, regarded by Hindus as sacred to Ram Deo, is often confused with a hill-mina, *Gracula religiosa*, 10 in long, with purplish-black plumage and yellow bill and feet

Minaret Tall slender balconied tower on a mosque. From it at stated times the Muezzin chants the azan, or Mehammedan call to prayer, to the people

Minchinhampton Town of Gloucestershire, 4 m. from Stroud. Minchinhampton Common (600 ft. high) is one of the beauty spots of the Cotswold Hills

Minden City of Germany. It is on the Weser, 44 m. from Hanover, in the district called Westphalia. The cathedral is a fine building with some valuable treasures. The place has some manufactures. In the Middle Ages the Bishop of Minden was a prince bishop ruling over a territory of 400 sq. m. Pop 27,000

Near Minden on Aug. 1, 1759, a British and Hanoverian army defeated the French. The battle is memorable for the advance under fire of six British infantry regiments, since known as the Minden regiments

Mine Excavation for extracting from the earth metallic ores and other mineral substances of economic importance. The character of the mine varies greatly with the nature and position of the deposits. In some cases the mine is an open quarry-like excavation, in others horizontal passages or adits are driven into a hill, or again, deep vertical shafts with a complex system of galleries are sunk, needing provision for ventilation and drainage

Mine Explosive engine used in warfare. A land mine usually consists of a charge of high explosive buried in the ground, capable of being discharged either by pressure upon it or by electrical means. In naval warfare a mine consists of an explosive charge contained in a metal case provided with projecting detonators which fire the mine when touched by a vessel. Numbers are usually laid

some distance below the surface and near one another, forming a mine field

Minehead Urban district of Somerset. It is on the Bristol Channel, 25 m. from Taunton, on the G.W. Rly. There is a small harbour. North Hill overlooks the town. It is a tourist centre, being near Exmoor. Pop (1931) 6315

Mineralogy Study of the mineral constituents of the earth's crust. The term mineral being applied strictly to inorganic substances which have been formed under conditions unconnected with organic agencies, thus excluding coal, petroleum, amber, etc. Mineralogy as a science has only developed during the last 150 years and in its modern form is linked on to chemistry, physics, geology and crystallography, and includes the study of the form, chemical composition, specific gravity, hardness, cleavage, fracture of minerals and their behaviour in relation to light

Mineral Waters Name given to the water of springs containing a high percentage of mineral salts in solution, used on account of their medicinal qualities. Mineral waters may be alkaline or saline, sulphureous or chalybeate. In England the waters at Bath, Harrogate and Buxton are well-known. Among the many Continental springs, those at Baden-Baden, Aix-les-Bains, Spa and Carlsbad are much frequented. In some cases the waters are bottled and exported, and under the name of mineral waters are included artificially prepared aerated waters

Minerva Italian, perhaps Etruscan, deity. The patroness of all arts and handicrafts, she shared with Jupiter and Juno Rome's worship in Tarquin's temple on the Capitol. Her own temple was on the Aventine. Identified with the Greek Pallas Athena, she became the goddess of war, and victors' spoils were dedicated to her. See PALLADIUM

Miniature Term in Art applied to a small painting upon vellum, parchment, ivory or other materials. The word is derived from minium or red lead used in writing the rubrics or initial letters in old manuscripts. Much of the early miniature painting was done on missals, etc., as a branch of illuminating and very fine work was done by Italian, French and Flemish artists. Painting on ivory came into vogue about the 17th century and in England Hilliard, in Queen Elizabeth's reign, and Samuel Cooper, a contemporary of Van Dyck, executed fine miniatures. In France this branch of Art was represented by Isabeau and Augustin in the 18th century

Minimum Wage Wage fixed by law as the lowest that may be paid. The principle of the minimum wage, operative in Australia and New Zealand, has never been put into general practice in Great Britain, though it has been introduced in certain industries. Under the Corn Production Act from 1917 to 1921 a minimum wage was guaranteed to agricultural labourers. In those industries which have a trade board minimum rates of wages are fixed by the board. Minimum wages are fixed to-day for agricultural labourers by joint committees and for coal miners. The trade unions also have their minimum rates of wages, but these are not compulsory

Mining Art of extraction of metallic ores and mineral substances of

economic value from the earth, also the methods of prospecting or searching for minerals. Prospecting entails some knowledge of the principles of geology, and a close acquaintance with mineralogy and some practical knowledge of chemical analysis. In the development of mines much of the work falls under mining engineering and many questions have to be considered, such as the continuity of the lode, proximity of water and fuel, available means of carriage, etc. Within recent years low grade deposits, hitherto unworked, have been exploited by special mechanical methods and found profitable.

In mining, diverse methods are followed according to the character of the ore deposit, in surface mine excavators, steam navvies and hydraulic jigs may be used, while in deeper mines mechanical haulage is needed for transport of material. Another department of mining is concerned with ore dressing involving the crushing of the ore by hand stamps or other grinding machinery. The final stage in ore dressing is that of concentration of the material to obtain the requisite degree of purity preparatory to smelting. Electricity is increasingly employed in mining, and according to the report of H. M. Electrical Inspector of Mines was in use at over 60 per cent of the mines at work during 1934.

Mink (*Putorius*) Name of several semi-aquatic carnivorous mammals of the weasel family. Comprising the European mink or marsh otter, the Siberian, and the American mink, they are trapped for their furs, the finest coming from Nova Scotia. They are also bred in minkeries for use as ferrets. All emit a disagreeable odour.

Minneapolis City and river port of Minnesota. It stands on the Mississippi, 300 m. from Chicago. It covers 53 sq. m. There are many open parks and in one of them are the Falls of Minnehaha, popularised by Longfellow in *Hiawatha*. In the river near the city are the Falls of St. Anthony which are used to generate electricity. Minneapolis is a great trading centre, especially in wheat. The industries include enormous flour mills, meat packing factories and machinery works. On the other side of the Mississippi is St. Paul, the two being known as the twin cities. Pop. (1930) 464,356.

Minnesingers Name given to a class of poets who lived mainly in Germany in the later Middle Ages. They were not unlike the troubadours. Men of good family, they lived at the courts of the princes, composing and singing lyrical verses and the attendant music.

Minnesota State of the United States. One of the north central states, it lies to the west of Lake Superior and has Canada for its northern boundary. It covers 84,682 sq. m. and is chiefly an agricultural area, but a great deal of iron ore is mined and there are some great industrial centres. St. Paul is the capital, but Minneapolis is larger. Another city is Duluth. The government is conducted by a legislature of two houses. Pop. (1930) 2,564,000.

Minnow Small freshwater fish of the carp tribe (*Leuciscus phoxinus*) common in British and European rivers and brooks. Normally 3-4 in. long, sometimes 7 in. It is dark green, with black patches along the interrupted lateral line.

Minor Person under 21 years of age. In English law he or she is unable to enter into a contract. See INFANT.

Minor Name meaning "lesser" applied in music to all intervals one semitone less than major intervals (*See MAJOR*). A diatonic scale progresses in tones but with semitones between the 2nd and 3rd, 5th, 6th, 7th and 8th, and with an augmented 2nd between the 6th and 7th degrees in the minor mode, so is the variant with the raised 6th.

A minor semitone is a chromatic semitone. The minor tone in acoustics is that in the ratio 10 : 9.

Minorca One of the Balearic Islands. It covers about 290 sq. m. Port Mahon is the capital. The surface is hilly, but the soil is fertile, and tropical fruits, such as figs and oranges are grown. It also produces wine and there is some mining. Horses and cattle are reared. On the islands are some remains of early man and some stalactite caves. Pop. 42,000.

A breed of fowl is known as the Minorca. They lay large eggs, but are bad sitters.

Minorites Name taken by the Franciscan friars. It was adopted because they regarded themselves as minors or inferior to members of other orders. About 1212 a female branch was founded by S. Clara. They were called Minorettes but are now known as Poor Clares. They had a house in the Minorities, London, hence this name.

Minorities Groups of people which differ by race or religion from the nation of which they form a part. Sometimes these minorities become absorbed into the majority, but they often aspire to an independent life, either wishing to develop their own traditions, or demanding administrative autonomy. Since the World War, minorities have had the same legal rights as the nationals of their country, free exercise of their religion and their mother tongue, and the right to maintain their own schools and charitable institutions. If any of these rights are violated they can appeal to the League of Nations for redress.

Minos Legendary king of Crete. The son of Zeus by Europa, he was a great ruler, who gave good laws and made his kingdom powerful. After his death he was made one of the judges in Hades. It is probable that there was really a king of Crete named Minos and that the labyrinth at Cnossus was his palace.

Minotaur In Greek mythology, a fabulous Cretan monster, half-man, half bull. It was represented as the offspring of a white bull and Pasiphaë, wife of King Minos. Kept in a labyrinth, it was fed on human flesh, until slain by Theseus. *See CNOSSUS*.

Minster Village of Kent. It is in Thanet, 4 m. from Ramsgate, on the S. Rly. There is an old and beautiful church and the place once had a religious house.

Minster Village of Kent, on the Island of Sheppey, 4 m. from Sheerness. At one time there was a convent here. The place is visited by holiday-makers and has oyster beds.

Minster Word used for a large church. It meant really the church of a monastery, and the older minsters were of this kind. To-day York Cathedral is often called the minster, and there are minsters at Beverley and Wimborne.

Minstrel A mediaeval musician, executant rather than composer, though frequently both. Minstrels came to England with the Normans. They attended the troubadeurs whose works they performed. Unattached, wandering minstrels were always welcomed, though noble families numbered minstrels among their valued retainers. In Elizabethan times minstrelsy declined.

The minstrels' gallery was a feature of the architecture of mediaeval churches and mansions. In Tudor and Plantagenet mansions it communicated with the kitchen.

Mint Place where money is coined under government authority. Formerly there were mints in England at York, Norwich, Chester, Bristol and Exeter, but now money is coined only at the Royal Mint, whose building at Tower Hill, London, was erected in 1810. Mints have been established at Ottawa, Pretoria, Calcutta and elsewhere. Each year a sample of the coinage is weighed and tested by the Goldsmiths' Company, a procedure known as the trial of the pyx.

Mint Genus of perennial labiate herbs (*Mentha*), distributed throughout N. temperate regions. They have creeping root stocks, square stems and whorls of purplish or pink flowers. Ten British species include peppermint, pennyroyal and bozeminat. From this apparently came the garden spearmint, *M. viridis*, grown for culinary purposes.

Minto Earl of. Scottish title, borne since 1813 by the family of Elliot. The first earl was Gilbert Elliot, a Scottish baronet, who was Governor-General of India 1806-14, and died June 21, 1814.

His descendant, Gilbert John Murray-Kynnmound-Elliot, who became the 4th earl in 1891, saw service in Afghanistan, S. Africa, Egypt and Canada. From 1898 to 1904 he was Governor-General of Canada, and from 1905-1910 Viceroy of India. He died March 4, 1914.

The earl's oldest son is called Viscount Melgund, and his seat is Minto House, Hawick.

Minton Name given to a fine porcelain made at Stoke-upon-Trent. It was first made by a potter named Minton early in the 18th century, and is beautifully decorated. Minton works also won a reputation for their encaustic tiles, their della Robbia, majolica and other glazed ware.

Minuet Stately dance in triple time for two persons. It originated in Poitou and was fashionable in Paris about 1650. Lully was the first celebrated composer of minuet music. Musically the importance of the minuet form increased, until, independent of dancing, it was incorporated into sonata form.

Minute Term applied to a measure of time representing a sixtieth part of an hour, a minute is again divided into sixty parts, giving a second minute or second. This division of units into sixtieths dates from very ancient times and was characteristic especially of Babylonian astronomy and chronology.

Minutes Word used in connection with meetings of companies and societies. The minutes are a record of the proceedings of a meeting, made by the secretary in the minute book. They are read out at the next meeting, and if correct are signed by the chairman. Their accuracy can be challenged. By company law limited liability companies must keep minutes at their general meetings, and at those of the directors. A treasury

minute is an order, usually on a financial matter, issued by the treasury.

Miocene Geological term for the Tertiary system between the Pliocene and Oligocene. It is unrepresented in Britain, but occurring in Western, Central and South-East Europe as well as in America, and India. Miocene deposits vary from clay to conglomerates, some being of marine, others of freshwater origin. The climate of the period varied from sub tropical to warm temperate, and animal life included the dinotherium, mastodon, hippopotamus and rhinoceros.

Mir Village community once found in the east of Europe, especially Russia. The land belonged to the people as a whole, and a village meeting decided matters that concerned the community. The mir system existed in the 20th century, but the Bolshevik rule did much to destroy what remained of it.

Mirabeau Honoré Gabriel French politician. Born March 9, 1749, he spent his youth in profligacy, was imprisoned and sentenced to death, but pardoned in 1782. He then lived precariously on writing until, rejected by the nobility, he was elected by Marseilles to the Tiers Etat of the States General. He tried by his great oratory and political sagacity to put the king at the head of the Revolution, by forming a new government on the English plan, but failed through the intervention of Marie Antoinette. He died April 2, 1791.

Miracle Term, "wonderful work," denoting an event transcending the known laws of nature. It is particularly associated with the supernatural factors in Christianity, and pre-eminently the resurrection of Jesus Christ. Modern science, which recognises the miracle of the origin of life as an indisputable if inexplicable fact, no longer opposes a rigid disbelief to the New Testament miracles, the evidence for which was tested at the time. Inquiry is increasingly concerned with those wider laws of nature, hitherto unsuspected, which offer new methods of approach. The view that miracles were primarily designed to attest the truth of the Christian revelation is no longer held.

Miracle Play Type of mediaeval religious drama. Continental usage distinguished representations of gospel events or their Old Testament forshadowings, called mysteries, from miracle plays portraying saintly legends. In England the former term was not used, the miracle play of mediaeval England practically covering both types, to this was added another, the morality play, illustrating similar truths allegorically. The removal of the representations outside the Church, the adoption of the vernacular, and lay acting, led to the Elizabethan drama.

Mirage Word used for optical phenomena that arise from the reflection and refraction of light in unusual circumstances. They are chiefly seen at sea or in deserts where there is calm air that is either extremely hot or extremely cold, but they are also seen elsewhere. The spectre of the Broken in the Harz Mts is a mirage.

Miramichi River of New Brunswick. It flows through the province for 220 m and falls into Miramichi Bay, an arm of the Gulf of the St. Lawrence. It is navigable for small vessels for part of its course and is noted for its salmon.

Mirfield Urban district of Yorkshire (W R) It is on the Calder, 5 m from Huddersfield, on the L M S Rly. Woollen and cotton goods are made, and around are coal mines. Mirfield is the head quarters of the community of the Resurrection, a religious order in the Church of England, founded by Charles Gore in 1892. Pop (1931) 12,099

Miserere Name used for Psalm 51 (God "Have mercy upon me O God") It is the greatest of the penitential psalms and is usually attributed to David. The name is also used for the ledges placed under seats in the choirs of cathedrals and churches. Against this the monks could rest when the seats were turned up and they were standing. There are some fine examples in King Henry VII Chapel, Westminster Abbey.

Misrepresentation In English law a false statement. A misrepresentation of a material fact is sufficient to make a contract void. In certain cases an action can be brought for misrepresentation.

Missal Latin book containing all the liturgical forms prescribed for the due celebration of the Roman Catholic Mass throughout the year. After the Council of Trent it was enjoined universally, except where local liturgies were at least two centuries old, 1670. At the Reformation the Anglican Prayer Book, 1549, superseded the ancient Sarum missal. The Roman missal, last revised in 1884, is now universal in Western Catholicism except for the local Ambrosian, Mozarabic and some monastic rites.

Missel Thrush (*Turdus miscivorus*) Largest British songster, abundant throughout Europe and some parts of W Asia. It is partial to mistletoe berries, hence the name. The male, 11 in., is greyish brown above, black spotted white beneath, golden on the rump. The song notes are loud and sonorous. The grass lined or mud lined nests shelter 4 to 5 red spotted, greenish eggs.

Missenden Great Village of Buckinghamshire. It is 29 m from London and 9 from Aylesbury on the Metro politan and L N E Rlys. It has become a popular place of residence for Londoners. Near is the village of Little Missenden.

Missions Organised efforts for the spread of a religion. In this sense Christianity has always been a missionary religion. The Acts of the Apostles records its progress from Judaea into Europe under the leadership of Paul. Later missionaries from the Celtic and other monasteries went throughout Europe. In the Roman Catholic Church missionary activity has been carried on by the Dominican, Franciscan and Jesuit orders. In the Protestant churches of Great Britain the closing years of the 18th century witnessed a great outburst of missionary enthusiasm. William Carey of Northampton founded the Baptist Missionary Society in 1792, and himself went to India as a missionary the following year. An Important International Missionary Council was held at Jerusalem at Easter, 1928, at which more than one third of the delegates were natives of Oriental or African countries.

Mississippi River of the United States, the most important in the country. It rises in a lake in the state of Minnesota and flows to the Gulf of

Mexico at New Orleans. It is 2460 m long but with the Missouri, its chief tributary, it is 4200 m. After it is joined by the Missouri at St. Louis, it passes Cairo, Memphis, Baton Rouge and Vicksburg. Its tributaries include the Wisconsin, Illinois, Ohio, Des Moines, Minnesota, Arkansas and St. Francis, and its drainage basin covers 1,250,000 sq m. At St. Louis the river is a mile wide.

The Mississippi is used for navigation and ship canals have been cut to make this possible where there are obstructions. It is noted for its floods especially in the lower courses, and tremendous damage was done by them in 1929. Vast sums have been spent on works for regulating the flood water, these including the building of embankments or levees and other works for improving the channel.

Mississippi State of the United States. One of the southern states, it lies to the east of the Mississippi near its mouth and has a coastline on the Gulf of Mexico. It is one of the cotton growing states, but maize is also produced. Jackson is the capital. Meridian and Vicksburg are other towns, but none exceeds 50,000 in population. The area is 46,885 sq m. It is governed by a legislature of two houses, and sends two senators and seven representatives to Congress. Pop (1930) 2,000,821.

Missolonghi Town of Greece. It is on the west coast just north of the Gulf of Patras. In the early part of the 19th century the Greeks fortified it, and three times it was besieged by the Turks. It is better known, however, as the scene of Lord Byron's death in 1824. There is a memorial to him. Pop 9270.

Missouri River of the United States. It rises in the Rocky Mts and flows mainly east and north until it joins the Mississippi 20 m above St. Louis, where it is over half a mile wide. It is 2950 m long, being navigable for over 2000 m. On it are the waterfalls called the Grand Falls. Its chief tributaries are the Milk, Yellowstone, Platte and Kansas. It passes Kansas City, Jefferson City and other towns. The name means "mud river".

Missouri State of the United States, its eastern boundary is the Mississippi which divides it from Illinois. It is crossed by the Missouri. Its area is 69,420 sq m. An enormous quantity of maize is grown in the state which also produces oats, wheat and coal. Jefferson City is the capital, but St. Louis is much the largest place. Kansas City is another populous centre. Other cities are St. Joseph and Springfield. Missouri is governed by a general assembly of two houses, and sends 2 senators and 13 representatives to Congress. Pop (1930) 3,629,367.

Mistletoe Evergreen parasitic shrub of the order *Loranthaceae* (*Viscum album*), indigenous to Europe and N Asia. The smooth pendent yellowish green stem, 1 to 4 ft., bears forking branches with oval lance shaped leaves mostly paired, small green flowers and round white berries containing a viscid pulp. The British host plants include the apple, black poplar, hawthorn, lime and willow. Associations with early Celtic druidical ritual survive in modern Christmas celebrations, whose supply comes mostly from Normandy and Hertfordshire.

Mistral Cold, dry, north wind that blows in the south-eastern parts of France. It comes from the central plateau of

the country and blows to the sea down the valley of the Rhône. It is very damaging to fruit trees.

Mitcham Urban district of Surrey. It is 10 m from London on the S. Rly. The industries are laundrying, the manufacture of sweets and the growing of lavender. The Wandlo passes through the district. The fair held every Aug. is one of the most famous in England. Pop. (1931) 56,856.

Mitchelstown Town of Co. Cork, Irish Free State. It is 11 m. from Fermoy on the Gt. S. Rly. In 1887 there were riots here in which some lives were lost. Pop. 2146.

Mite Name of small eight-legged invertebrate creatures of the class *Arachnida*. It forms with ticks the widely distributed order *Acar*, which pass through a six-legged larval stage. The unsegmented abdomen is usually indistinctly separated from the combined head and thorax. Many are parasitic, such as those causing itch, mange and scab, or those affecting mice, rats and poultry. Gall-mites cause big-bud disease in fruit trees, "red spider" form a family injurious to cultivated plants, others infest cheese, flour, sugar and copra. See HARVEST-MITE.

Mithras God of the Persians. He was the sun god and was regarded as a beneficent spirit. Worshipped in Persia, about 68 B.C., his worship was introduced into the Roman Empire, and there, especially among the soldiers, it flourished for about four centuries. In art the god is represented as a beautiful youth in the act of slaying a bull.

Mitre Headress worn by certain officials of the Christian Church. Originally the headress of the high priest of the Jews, it was worn by bishops in the 10th century and afterwards, and also by the more important of the abbots. Its use was discontinued in the Church of England, but it again came into use in the 19th century, and now most of the Anglican bishops wear mitres on ceremonial occasions.

In jewelry a mitre is a joint of two blocks or mouldings of a similar pattern at an angle, usually a right angle, divided equally between the two.

Mitylene Capital of the island of Lesbos. It is a seaport on the east coast and has a good harbour. Pop. 29,500. See LESBOS.

Mizpah (or Mizpeh) Hebrew name, "watch-tower," of several Old Testament places. (1) The stoneheap raised by Jacob and Laban, perhaps Jephthah's Gilead home (Gen. xxxi), (2) Mizpah of Moab, where David placed his family (1 Sam. xxii), (3) the land of the Hivites who joined Jabin, near Mt. Hermon (Josh. xi), (4) Gedallah's residence after Jerusalem's fall, N.W. of Jerusalem (2 Ki. xxv).

Mnemonics Art of improving the memory, usually by aid of a system of rules, rhythmic lines or other devices. The Greeks used mnemonic methods for training the memory, and in more recent years many mnemonic systems have been invented. Most of them depend upon the association of ideas.

Moa Maori name of a family of flat-breasted flightless birds formerly abundant in New Zealand, and now extinct. Apparently exterminated by the Maoris before European colonisation, they are known from remains collected from beds of Pleistocene

age. They range from the giant moa, *dinornis maximus*, 12 ft. high, down to one 3 ft. high. Pale green eggs, rounded feathers, and mummified heads and legs have been found.

Moab Region anciently occupied by the Moabites, who were traditionally descended from Lot's son Moah (Gen. xix). It is a lofty tableland E. of the Dead Sea and lower Jordan valley, bounded N. by Ammon and S. by Edom, and confronts the eastern desert. Its inhabitants were subdued by David (1000 B.C.).

Moabite Stone Black basalt slab discovered by Klein at Dibon Moab, in 1868. Although subsequently shattered by local Bedouin Arabs, Clermont-Ganneau secured it for the Louvre, Paris. Measuring, after reconstruction, 46 ins. by 24 ins. by 1½ ins., its 34 lines of primitive Hebrew script record victories against Israel of Mesha, King of Moab, c. 850 B.C.

Mobile City and seaport of Alabama, U.S.A. It stands on the Mobile Bay on the south coast at the mouth of the Mobile River, 130 m. from New Orleans. There is a large harbour with extensive docks, and the city has a large overseas trade. It is also a fishing port and has some manufactures. Pop. (1930) 68,202.

Moccasin Algonkin name of the shoe worn by N. American Indians. Made of deerskin or other soft leather, without stiff sole, the upper is often adorned with embroidery, beadwork or coloured sections of porcupine-quills.

Moccasin Snake Venomous North American snake, (1) the upland copperhead, *Ancistrodon contortrix*, 3 ft. long, (2) the fish and frog-eating water moccasin, *A. piscivorus*, 5 ft. long, dreaded by negroes in the rice-fields.

Mocha Seaport of Arabia. It is on the Red Sea and was at one time a great port for the export of coffee. Certain brands of coffee were known as mocha. It was formerly the capital of the state of Yemen. Pop. 5000.

Mocking Bird Popular name of various birds with exceptional powers of mimicry. The common N. American perching song bird, *Mimus polyglottus*, 10 ins. long, is intermediate between the wrens and the babblers. Ashy-grey above, soiled-white beneath, the male has a full, liquid personal note, besides imitating the cries of many birds and other sounds.

Modder River of South Africa. It rises in the Orange Free State and flows through that country until it joins the Vaal in Bechnanaaland. Its length is 186 m. On Nov. 28, 1899, there was an engagement here between the Boers and the British who forced their way across it with some loss.

Modena City of Italy. It is 23 m. from Bologna on a tributary of the River Po. The chief building is the magnificent cathedral. It is a manufacturing town and has a large agricultural trade. Pop. (1931) 92,757. The territory around Modena formed the independent Duchy of Modena until it became part of the kingdom of Italy in 1868. From the thirteenth century it was ruled by the Este family.

Moderator Word used in the Presbyterian churches for a presiding minister. Each year a distinguished minister is elected moderator by the General

Assembly that meets in Edinburgh. In addition every presbytery has a moderator or presiding minister, and one is appointed to look after the affairs of a church that is temporarily without a minister. In England the Congregational church has moderators, each in charge of a district. At Oxford and Cambridge the examiners for certain examinations are called moderators and at Oxford the second examination for a degree is called moderations. At Trinity College, Dublin, moderators are those who take the two highest places in certain examinations.

Modernism School of thought in Christian theology. In the Roman Catholic Church an early 20th century movement sought to adjust dogma to the generally received conclusions of Biblical criticism. Some leaders, notably Tyrrell and Loisy, encountered ecclesiastical censure, culminating in Pius X's encyclical *Pascendi gregis*, 1907. All clerics were enjoined to abjure modernism in 1910.

Modulus Term used in physics. It denotes the measure of an effect produced under certain conditions whose measure is taken as unity. The term is applied in a number of ways: thus the modulus of a machine is the ratio of its load to the power in equilibrium, the modulus of elasticity is the ratio of a stress to the accompanying strain, and the gravity modulus is a modulus of elasticity where the unit of force is taken as the weight of a unit mass.

Moffat Burgh and inland watering place of Dumfriesshire. It is 21 m. north of Dumfries, on the LMS Rly., and stands on the Annan. Pop. (1931) 2008.

Moffat Robert Scottish missionary. Born at Ormiston, in East Lothian, Dec. 21, 1795, he became a gardenor, spending his spare time in study. He was then trained as a missionary and in 1816 went out to South Africa for the London Missionary Society. He was there until 1870 and died at Leigh, near Tunbridge Wells, August 9, 1883. A man of great courage, devotion and resource, Moffat was one of the most successful missionaries of the time. His daughter married David Livingstone.

Mogul Name, a variant of Mongol, given to the empire that existed in India from about 1526 to 1858. It was founded by Baber and continued to exist until after the Indian Mutiny. Its emperor, whose capital was Delhi, was called the Great Mogul.

Mohair Arab word meaning "select," and used for the fleece of the Angora goat. This has been used for many years for making garments and coverings. See ANGORA.

Mohammed Name of six sultans of Turkey. The name is a variant of Mahomet. The best known was Mohammed II, called the Conqueror (1451-1481). The greatest of his exploits was capturing Constantinople in 1453.

Mohawks North American Indian tribe of Iroquoian stock. Encountered between the St. Lawrence and the Catskills they were the first natives to obtain firearms, in exchange for pelts from the Dutch, 1614. Becoming the leaders of the Six Nations confederacy, they sided with England in the War of Independence, and migrated to Canada, where several thousands still remain.

The word was also used for a lawless band of ruffianly youths of fashion who nightly infested

London streets, 1711-12. They atrociously attacked wayfarers of both sexes.

Mohicans North American Indian confederacy of Algonkin stock. First encountered in the upper Hudson valley, Mohawk pressure drove them partly into Massachusetts, 1664, a few now occupying a Wisconsin reservation, partly into Pennsylvania where the Delawares absorbed them. An offshoot, the Mohegans now extant, became the dominant tribe in 17th century New England.

Molasses Sweet syrup produced when sugar is refined. It comes from both cane and beet sugar. It is thick, brown in colour, and has considerable food value. Treacle is made from it and by its fermentation rum is produced.

Mold Market town and urban district of Flintshire also the county town. It is 13 m. from Chester, on the LMS Rly. There are some manufactures and around are coal and lead mines. Pop. (1931) 5133.

Moldavia District of Rumania. It lies between Bessarabia and Wallachia and covers 14,700 sq. m. Jassy is the chief town. It is named after the River Moldava, a tributary of the Dniester.

Moldavia Soviet republic. One of the Russian republics affiliated to Moscow, it is on the left bank of the Dniester. It covers only 3200 sq. m., and its capital is Balta.

Mole Term applied to a form of breakwater. It consists of a stone wall or similar structure built of concrete projecting out into the sea to serve as a protection to shipping and form a haven, or to guide and regulate the currents and tidal flow.

Mole Small permanent congenital spot on the skin more or less unsightly. It is usually slightly raised, often covered with hair and darkly pigmented, and is sometimes called a birth mark.

Mole River of Sussex and Surrey. It rises in Balcombe forest and flows through Surrey into the Thames near Molesey. It is 30 m. long and is noted for its Swallows, places where the river goes underground for a spell. These are near Leatherhead.

Mole Small burrowing, insectivorous mammal of the family *Talpidae*. Distinct from the shrew it is found in the N. hemisphere. The common mole of Europe and Asia, *Talpa europaea*, 6 in. long, with 1 in. tail, widespread in Britain, is a muscular earless, almost eyeless animal, feeding mainly on earthworms and nesting in fortresses not to be confounded with molehills. The velvety bluish black coats are esteemed by furriers.

Molecule Smallest particle of matter composing a compound and consisting of a group of atoms having an independent existence and yet possessing the special properties of the substance in question. A simple example is that of common salt or sodium chloride, where one atom of sodium is combined with one atom of chlorine to form a molecule of salt, the resulting compound having characters quite different to those of the component elements. Molecules are regarded as being in ceaseless movement, this energy of molecular motion being heat. Further there is an attractive force or cohesion which, under different conditions of temperature and pressure, acts upon the molecules, causing matter to assume either a solid, liquid, or gaseous state.

Molesey

Urban district of Surrey. It stands on the Thames where it is joined by the Mole, being 2 m from Kingston-on-Thames and 14 from London, on the S Rly. It consists of East and West Molesey. Pop (1931) 8460.

Molesworth

Mary Louisa. English authoress. Born in May, 1839, she was the daughter of a Cheshire gentleman, C A Stewart. She made her name by her books for children. Among them are *Carrocks*, *The Cuckoo Clock*, *Herr Baby*, *The Rectory Children*, *Tell me a Story*, *Robin Redbreast*, *Carved Lions*, *Uncanny Tales*, *Miss Mouse and Her Boys*, and *The Boys and I*. Some of these were written under the name of Ennis Graham. She died July 20, 1921.

Molière

Name adopted by Jean Baptiste Poquelin, the great French dramatist. Born in Jan., 1622, his whole life was given to the theatre, beginning as a member and then leader of a small touring company and rising to the position of leading dramatic author of France, with the friendship and patronage of Louis XIV.

His work includes every type of comedy from simple farce to subtle satire, and forms a complete commentary on the people and customs of his period.

His greatest works are, *Les Précieuses Ridicules*, *L'École des Femmes*, *Tartuffe*, *Le Misanthrope*, and *Le Bourgeois Gentilhomme*. He died on Feb. 17, 1673.

Mollusca

Sub-kingdom of invertebrate animals, including such forms as cuttle fishes, oysters, whelks and snails. They are soft-bodied, cold-blooded, and lack segments, limbs and internal skeletons, being mostly protected by a shell of one or more pieces, secreted by the mantle or skin-covering. They have an alimentary canal, a mouth, a nervous system, and a heart, the blood being aerated by gills or, in land and most freshwater snails, by a kind of lung. Locomotion is effected mostly by a foot comprising the body's under surface which becomes the mussel's thready byssus, the tooth-shell's borer and the cuttlefish's arms. See BIVALVES, CEPHALOPODA, GASTROPODA.

Moloch

God of the Ammonites. He is called the abomination of the children of Ammon (1 Kings, xi. 7). He was a fire god and children were sacrificed to him. The name means king.

Moltke

Helmuth, Count von Prussian general called "The Silent." Born Oct. 26, 1800, at Parchim, he began his career in the Danish army, but in 1822 he entered the Prussian service. From 1835 to 1839 he was in the Turkish service, acting as adviser to the Turkish commander-in-chief in the Syrian campaign of 1838-9.

From 1858 to 1858 he was Chief of the General Staff in Berlin and reorganised the Prussian army. A master of military strategy, he played an important part in the war with Denmark in 1864, and was largely responsible for the Prussian success in the Seven Weeks' War with Austria (1866). In the Franco-Prussian war he planned the concentration of the Prussian armies on Metz, which resulted in the French capitulation at Sedan and the investment of Paris by the Prussians. He wrote histories of his campaigns for the use of the Prussian General Staff. He died April 23, 1891.

Moltke

Helmuth Johannes Ludwig von. German general and nephew

of the famous field-marshal. He was born May 23, 1848. At the beginning of the European War he was appointed director of the German operations. He relied on the plans handed on to him by his master, General von Schlieffen, strengthening the Metz-Verdun and Marne lines in the west but leaving only a minimum defence against Russia.

He was forced to withdraw troops from the west to meet the Russian advance, and was held responsible for the defeat of the Marne. He was recalled to Berlin at the end of 1914 as chief of the home General Staff. He died on June 18, 1916.

Molton

South Borough and market town of Devonshire. It stands on the River Mole, 12 m from Barnstaple and 197 from London, on the G W Rly. It was once a centre of the woollen and lace manufactures. It is now chiefly a market for farm produce and has flour mills. Pop (1931) 2831.

North Molton is a village, 5 m away.

Moluccas

Group of islands in the Dutch East Indies, also called the Spice Islands. They cover 192,402 sq m. They lie between New Guinea and the Celebes and the chief are Ceram, Halmahé, Buru, Amboyna, Obi, Bachan and other groups. The soil is very fertile, the chief products being spice, coffee, cacao, indigo and rice. Amboyna is the chief town. Pop 893,030.

Molybdenum

Metallic element, having the symbol Mo, atomic weight 96 and melting point probably 2,500° C. Molybdenum though only found in small quantities in nature has become of economic importance owing to its use in the manufacture of tool steels and the employment of its compounds in making ceramic pigments, and in rubber manufacture. The chief source of the metal is molybdenite, a native sulphide occurring in granites and crystalline limestones associated with tin ore, and found in Australia, North America and Norway.

Mombasa

Seaport of Kenya. It is on an island named after it. From here a railway goes to the mainland and it is a terminus of the Uganda Rly. Pop 57,000.

Momentum

Term in physical science applied to the quantity of motion in a moving body. Momentum is measured by multiplying the mass by the velocity, thus, a body having a mass of one pound moving at the rate of 100 ft. per second has the same momentum as another body with a mass of 100 pounds moving at 1 ft. per second.

Mommsen

Theodor. German historian and archaeologist. Born Nov. 30, 1817, he studied at Kiel and then examined Roman inscriptions in Italy and France for the Berlin Academy. In 1848 he was appointed Professor of Law at Leipzig. He occupied chairs at Zurich, Breslau, and Berlin, and was a member of the Prussian parliament. He was awarded the Nobel prize in 1902. His great works were, *Roman History*, published in three volumes between 1854 and 1856, and his *History of the Roman Coinage*, and *Roman Provinces*. He died on Nov. 1, 1903.

Monaco

Principality of Europe. It is on the shores of the Mediterranean, 9 m from Nice and is surrounded by French territory. It covers 370 acres, in it is Monte Carlo. It is governed by a prince who is under the protection of France. The prince

belongs to the family of Gilmaldi, which has ruled Monaco since 988. He obtains his revenue from the gaming tables at Monte Carlo. Pop 25,000.

Monaco, the capital, is the headquarters of the international hydrographic bureau and has a small harbour. Pop 2100.

Monad Term used in metaphysics for the primary element or existence. According to Leibnitz substance exists as monads or atoms each being a self-contained individuality. Further, God is the supreme monad and the soul of man a single monad.

In zoology, a monad is a simple unicellular organism belonging to the flagellate Infusoria.

Monaghan County of the Irish Free State. In the province of Ulster it covers 499 sq. m. The Blackwater and the Finn are the chief rivers. The soil is fairly fertile and the people live mainly by growing oats, flax and potatoes, rearing cattle, sheep, pigs, and keeping poultry. Monaghan is the county town, other places are Castleblayney, Carrickmacross, Clones and Ballyhay. Pop (1931) 65,131.

Monaghan Urban district and county town of Monaghan Irish Free State. It is 52 m. from Dublin by the Gt. Northern (Ireland) Rly. and is also served by a canal. It is an agricultural centre. Pop 4636.

Monarchy Form of government in which supreme power is vested in a single individual. It may be absolute, independent of all other authority, and, according to the analytical school of political theory, incapable of legal limitation, or constitutional, subject to a form of constitution, written or unwritten. The English monarchy is constitutional.

Monash Sir John, Australian soldier. Born at Melbourne, Jan. 27, 1865. He was educated at the University of Melbourne and became an engineer. In 1887 he became an officer in the defence force and when the Great War broke out in 1914, after acting as censor, he led a brigade in Gallipoli. Later he went to France in command of a division and in 1918 became head of the Australian corps. He was knighted in 1918 and took charge of the demobilisation operations. In 1920 he returned to his work as an engineer. Monash, who was a Jew, died Oct. 8, 1931.

Monasticism System of corporate life adopted by persons who retire from the world into religious seclusion. The monastic life, older than Christianity, is exemplified in Buddhism and among the Essenes. In Egypt in the 2nd century solitary asceticism was practised by many hermits, one of whom S. Anthony organised corporate hermitages, c. 306, and founded Christian monasticism. In S. Egypt, a few years later, S. Pachomius founded the first cenobium, although the hermits still lived separately. Still later S. Basil, by prescribing common life under one roof, founded the Orthodox Eastern monastic system.

These practices spread westward, notably to Ireland, until Europe's unregulated asceticism was replaced by the ordered life of self-denial introduced by S. Benedict at Monte Cassino, c. 529. His rule, based on the "three substantials," poverty, chastity, and obedience to a superior, thenceforward governed all Western monasticism. Subsequent reforms introduced the Carthusian, Cistercian and other

systems, a revolt against corporate monastic possessions gave rise to the mendicant orders, whose members are called friars, not monks.

Monastir Town of Yugoslavia. It is 130 m. to the N.W. of Salonika and is chiefly known for its military associations. In Nov. 1912, in the first Balkan War the Serbians defeated the Turks here, and in 1913 the town was formally given to them. In Dec. 1915, it was seized by the Germans. In Oct., 1916, French and Serbian forces attacked the Turks in the region of Monastir and entered the town on Nov. 19. Also called Bitolye, it has some manufactures and does a considerable trade. Pop (1931) 32,982.

Moncton City and seaport of New Brunswick. It is on the Petitcodiac River, 89 m. from St. John, on the C.N. Rly. There is a good harbour and some shipping and here are railway workshops and textile mills. Pop (1931) 20,817.

Mond Ludwig, German chemist. Born at Cassel, Germany, March 7, 1839, he was a pupil of Bunsen, but came to England in 1864 and settled in Widnes, where he perfected his sulphur recovery process. In 1873 he entered into partnership with Sir John Brunner, and founded the great alkali works of Brunner, Mond and Company at Winnington, Cheshire. He made new discoveries in the manufacture of nickel, and in 1876 presented a physico-chemical laboratory to the Royal Institution at a cost of £100,000. He was the father of the late Lord Melchett (Sir Alfred Mond). He died on December 11, 1909.

Monet Claude, French painter. Born Nov. 14, 1840, he was one of the founders of the Impressionist school. A member of the Degas, Cézanne, Sisley group and a "painter of the open air," he was particularly interested in the effect of light on his subjects. He produced a number of studies of cathedrals (1874) and several views of London (1901). He died on Dec. 5, 1928.

Money Primarily coins used for the purchase of commodities. The term also includes pieces of impressed paper used for the same purpose and has been extended to cheques, bills of exchange, etc. The money market is the general term for dealings in money in London, New York, and other centres. A money changer is one who changes the coin of one country into that of another.

The earliest method of exchanging commodities was by barter, but soon pieces of metal and other substances, shells for example, were used for the purpose. Metallic money was first used, it is said, in Lydia. For many centuries silver coins were the chief form of metallic money. Gold coins were also minted, but to no great extent until the 18th century, when they became the generally accepted standard of value. These gold coins, and in their early days silver coins also, had a value equal to that of the goods they bought. Coins which did not possess this intrinsic merit (e.g. the modern silver, nickel and copper coins), were only token coins, their value depending upon the solvency of the country that issued them.

In 1914 it became evident that the gold and silver coinage was inadequate to meet the needs of a world at war, and Governments issued paper money on an enormous scale. The result was that gold coins fell entirely out of use. Paper money continued in use after the end of the war, and silver coins were also used to a certain extent. The

functioning of money in relation to prices, was a matter of dispute during the serious economic crisis of 1931-32, but economists seemed unable to agree as to the utility or otherwise of increasing the supply of money in circulation.

In Great Britain a money bill is one that votes public money for a particular purpose. Such cannot be altered by the House of Lords. The decision as to whether or not a bill is a money bill rests with the Speaker.

Moneylender One who lends money as a business. Special legislation has been passed in England and other countries to protect the public from moneylenders. All moneylenders must be registered at Somerset House, London, W O 2, and take out a licence which costs £15 a year. The law courts have powers to reduce the rate of interest and the amount charged for expenses if they consider such to be excessive. An Act passed in 1927 forbids moneylenders to exact compound interest on loans or to increase the rate of interest because the payments are in arrears.

Money Market Term applied to that market where all transactions can be reduced to the buying and selling of ready money against a promise of settlement at a future, definitely defined date. In this are involved foreign exchange movements, purchase of bills of exchange, dealings in Treasury Bills, and fluctuations of the Bank Rate.

Moneywort (*Lysimachia nummularia*) Perennial creeping herb of the primrose order, allied to the yellow pimpernel, a native of Europe. Its prostrate stems, 1-2 ft long, bear rounded 1 in leaves and solitary, bright-yellow, cup-shaped flowers 2 in across.

Mongolia District of Central Asia. It lies W of Manchuria, S of Siberia, and N E of Chinese Turkestan and China proper. Inner Mongolia belongs to the Chinese Republic. Outer Mongolia has been a republic since 1924. Its area is 1,875,000 sq m. The country is mountainous and much of it is occupied by the Gobi Desert. Its inhabitants belong to various nomadic tribes, and are cattle breeders and itinerant traders. Urga is the capital. The population is in the neighbourhood of 850,000.

Mongoose Indian name applied to various small weasel-shaped carnivorous mammals. They form a sub-family of the civet tribe and are indigenous to Africa and S Asia. The Indian *Herpestes mungos*, 15-18 ins long, with 15 ins tail, is frequently tamed for destroying snakes and rats. The somewhat larger Egyptian mongoose, formerly called the ichneumon, devours crocodile eggs.

Monism Philosophic view which refers all phenomena to a single form of reality, whether material or spiritual. Certain schools of thought consider the dualism of matter and mind, or body and soul to be parallel phenomena indistinguishable in reality. Some, e.g., Spinoza, lean to materialistic, some e.g., Hegel, to intellectual monism.

Monitor Armoured warship intended for coastal or river service and therefore of shallow draught. A monitor has a low freeboard and bulging sides for defence against torpedo attacks. It is designed for moderate speed and carries one or two guns. The first monitor was designed by Ericsson in

1861. Monitors were used to some extent during the Great War, notably on the Belgian coast in 1914.

Monitor Genus of fork-tongued lizards (*Varanus*), inhabiting S Africa, S Asia and Australasia. Long-bodied, with uncrooked back and frequently with flattened tails, the head is covered with small scales. All are predaceous, powerful creatures, with a partiality for eggs, some are semi-aquatic, and may reach 7 ft.

Monk Member of a male monastic order. Usually denoting a Christian recluse, the word, "living alone," is also applied to the members of Buddhist and Mohammedan religious fraternities. It was first used of the Christian hermits of 2nd century Egypt, afterwards extended to those who followed a cenobitic or corporate life in seclusion, the female counterpart is a nun. See FRIAR.

Monk Bretton Urban district of Yorkshire (W R.). It is 2 m from Barnsley on the L M S Rly. There was a monastery here in the Middle Ages, hence the name. Woollen manufacture is the chief industry.

Monkey Name loosely applied to all mammals of the order *Primates* except man and perhaps the larger man-like apes. Distributed throughout the warmer regions they comprise, besides the long-armed gibbons, an extensive Old World family sharing their posterior callosities, the tails when present being never prehensile, and many possessing cheek-pouches. These include the langurs, baboons and macaques, one of which is the Barbary ape of Gibraltar. American monkeys, are recognisable by the absence of callosities and cheek-pouches, by possessing four additional grinding teeth, making 36 altogether, and mostly having prehensile tails. Another family comprises the marmosets.

Monkey Flower (*Mimulus*) Genus of the figwort order. They are natives of extra-tropical America and Australasia. The showy mask-like corollas, sometimes splashed and spotted, yellow, scarlet, purple or white, yield favourite garden flowers, a donkey-flowered "hose-in-hose" form occurs.

Monkey Puzzle Tree. Popular name for the Chile pine (*Q v*).

Monkland Canal in Scotland. It goes from the Clyde at Glasgow to the North Calder at Calderbank. It is 13 m long and is used chiefly for carrying coal. It was opened in 1790 and is now owned by the L M S Rly.

Monkshead (*Aconitum napellus*) Genus of hardy perennials of the order *Ranunculaceae*. The leaves are dark green and the hooded shape of the dull blue flowers, which are borne on a long head, have given the plant its popular name. Another variety (*A. napellus bicolor*) has violet, blue and white blossoms. Wilsoni, a blue monkshead, is a beautiful autumn blooming variety. The whole plant is poisonous.

Monkwearmouth District of Sunderland. It is situated on the north bank of the Wear and is 262 m from London by the L N E Rly. S. Peter's Church includes remains of a Benedictine monastery. See SUNDERLAND.

Monmouth Borough of Monmouthshire, also the county town. It stands where the Monnow falls into

the Wye, 144 m from London. An interesting feature is the bridge with its gateway, over the Monnow. The town possesses a collection of Nelson relics. The borough includes Troy on the other side of this river. The town has an agricultural trade. Pop (1931) 4731

Monmouth James Scott, Duke of Born April 9, 1649, he was the son of Lucy Walters and Charles II. Very much in favour with the king and the people at first he was created Duke of Monmouth, and became Captain General of the Army. As a result of the Rye House Plot he was exiled in 1683. He returned to England in 1685 and led a revolt against James II, whose Catholicism had aroused the fear of a considerable party in England. He was defeated and captured at Sedgemoor soon after landing, and was executed on Tower Hill, July 15, 1685.

Monmouthshire County of England. On the border of Wales, it is treated for many purposes as part of that country. It covers 540 sq m., and has a coastline on the estuary of the Severn. Monmouth is the county town, but Newport is the largest. Other populous centres are Pontypool, Abergillery, Bedwelty and others in the coal mining area. The more picturesque aspect is represented by Chepstow and Abergavenny, while the county also contains Tintern, Raglan and Caerleon. The rivers are the Wye, Usk, Ebbw and Rhymney. The west of the county is on a rich coal field. Monmouthshire contains some of the loveliest scenery in England. There wheat is grown, sheep are reared, and there are many orchards. Pop (1931) 434,821

Monolith Single stone of great size. Monoliths are found in Egypt, India, Peru and elsewhere, and are associated with early man. Some are plain stones, but others are sculptures. One at Baalbek in Egypt weighs 1100 tons.

Monoplane Type of aeroplane in which there is only one set of planes or supporting surfaces. The well-known Fokker three-engined aeroplanes are of this type, also the Dornier flying boats, Junkers and the British Fairey postal aeroplane. See AEROPLANE.

Monopoly Exclusive right to trade in a particular commodity. In the Middle Ages and later, it was a very usual practice for kings to give monopolies to subjects, e.g. the monopoly to sell coal in a certain town. These became very unpopular and in 1614 they were forbidden by law. Certain still exist, however, but these take the form of patents, the monopoly being granted to the inventor for a certain time. In France the sale of matches is a state monopoly, and in Great Britain broadcasting may be described as such.

Monotheism System of religious thought and practice which recognises only one God. Opposed to polytheism, which worships many gods, manifested in physical, animal or human forms, it claims distinction from systems of moral dualism by asserting the ultimate supremacy of good over evil. Differing from deism, it ranks as revealed religion based upon sacred scriptures, and is regarded as theism's highest expression. It is exemplified in Islam, Judaism and, notwithstanding the doctrine of the Trinity, in Christianity. See DEISM.

Monotype Name given to a form of printing machine. It was

invented by an American, Lanston of Washington, for composing lines of movable type, each letter being a separate character. It consists of two machines, one a typewriter like keyboard by which the operator perforates a paper roll, each perforation representing a letter, the other a casting machine which works automatically, casting lines of type from the perforated ribbon and arranging them in their proper order. The monotype machine, which is used for printing *The Times*, has the advantage of a great output and the capacity for printing intricate work, with a very high standard of quality.

Monro Sir Charles Carmichael, 1st Baronet. British soldier. Born June 15, 1860, he joined the army in 1879. He served in South Africa and was later commandant of the Musketry School at Hythe. During the Great War he served on the Western front as commander of the 1st Army Corps, and later of the 3rd Army.

As commander-in-chief of the Mediterranean Expeditionary Force he saved the situation in the Dardanelles by carrying out the evacuation of Gallipoli. He was commander-in-chief in India in 1916 and Governor of Gibraltar, 1923-1928. He was created a baronet in 1921.

Monroe James American president. Born in Virginia, April 28, 1758, he was elected to the legislature of Virginia in 1789 and in 1785 became a member of the House of Representatives of the United States. In 1790 he was elected to the Senate and in 1794 went to France as an ambassador but was recalled in 1796. From 1799 to 1802 he was governor of Virginia and afterwards ambassador in turn in Paris, London and Madrid. In Paris he arranged the purchase of Louisiana by the United States. From 1811-17 Monroe was secretary of state. In 1816 and 1820 he was elected president. In 1825 he retired from public life and died in New York, July 4, 1831.

Monroe is chiefly known as the author of the Monroe doctrine. In 1823 he recognised the independence of the republics in South America, previously under Spanish rule, and in so doing, he declared that the American continents "are henceforth not to be considered as subjects for future colonisation by any European power."

Monrovia Capital and seaport of Liberia. It stands on the mouth of the St. Paul River. Through it much of the seaborne trade of the republic passes. It is connected by motor roads with the interior. Pop 12,000.

Mons Town of Belgium. It stands on the River Trouille, 38 m. from Brussels, and is a coal mining centre and the capital of the district called the Borinage. The chief buildings are a beautiful town hall and a fine Gothic church. The town has some manufactures. Owing to its position Mons was several times taken and retaken during wars with France and until 1862 its fortifications remained. From Aug. 1914 to Nov. 11, 1918, it was in the possession of the Germans.

Mons Battle of. Battle between the British and the Germans, Aug. 23, 1914. At the outbreak of the Great War the British Expeditionary force took up a position from Mons to Condé, and here it was attacked by the Germans. The two British army corps resisted the attack throughout the day, but at nightfall, the French on their left having given way, they were ordered to retire. This they did in good order. Of 65,000

MONSOON

men engaged the British losses were about 5000

Monsoon Seasonal wind blowing from the Indian Ocean over south-eastern and eastern Asia bringing heavy rain. It is caused by the rapid heating and cooling of the atmosphere in the same way as in the case of the diurnal land and sea breezes of low latitudes. The summer monsoon of India is south westerly and blows strongly across the Indian Ocean, becoming south-easterly up the Ganges Valley and condensing in heavy rains, the heaviest rainfall being in the valley of Assam.

Monstrance In the Roman Catholic Church a transparent vessel in which the consecrated host is shown to the people for adoration.

Montagu Lady Mary Wortley English letter writer. Born about 1690, daughter of the Duke of Kingston, she was famous even in youth for her beauty and wit. She was a friend of Alexander Pope, Addison, and other notable literary and society leaders. In 1712 she married Edward Wortley Montagu.

In 1716 Montagu was appointed ambassador at Constantinople, and Lady Mary lived with him in the East from 1716 to 1718. It was from the East that her letters, describing Turkish life, were mainly written. She died on Aug 21, 1762.

Montaigne Michel de French writer, philosopher and moralist. Born Feb 28, 1533, he lived for the most part at the Chateau de Montaigne in Périgord. He was councillor of the *parlement* of Bordeaux, and *maire* of that town. Writer of the *Essays* in which he studies his own nature and that of humanity as a whole, he was particularly interested in the apparently contradictory elements of human nature, which, he said, are so confusing that it is only with the help of the divine revelation that man can arrive at the truth. His essays are notable for the grace and freshness of their style and for the perspicacity and wide tolerance of the author. He died Sept 13, 1592.

Montana North-eastern state of the U.S.A. It is situated on the Canadian border. Its products include wheat, oats and fruit, and, among other minerals, gold, silver, coal and petroleum. Represented in congress by 2 senators and 2 representatives. It joined the Union in 1889. Area, 147,182 sq m. Pop (1930) 537,606.

Mont Blanc Highest mountain peak in the Alps. It reaches the height of 15,781 ft., and is situated on the frontier between France and Italy, the mountain range running in a north-easterly direction. There are a number of smaller associated peaks, such as the Aiguille du Dru, Aiguille d'Argentière, Aiguille Verte, Grandes Jorasses, etc., and below are the Mer de Glace and other glaciers.

Montcalm Louis Joseph, Marquis de French soldier. Born Feb 29, 1712, he was in command of the French troops in Canada and captured the British posts of Oswego and Fort William Henry. After the French had lost Louisburg and Fort Duquesne, Montcalm moved to Quebec and was finally routed in battle by Wolfe on the Plains of Abraham. After trying vainly to rally his forces he was wounded and died the next day, Sept 14, 1759.

MONTEVIDEO

Monte Carlo Pleasure resort of Monaco. It stands on the Mediterranean, 9 m from Nice, and occupies a beautiful position overlooking the sea. It is famous as a gambling centre and the chief building is the casino. Pop 11,055.

Monte Cristo Island of Italy. It is 26 m south of Elba and covers 6 sq m. On it are mineral springs. It gives its name to a famous romance by Dumas, *The Count of Monte Cristo*.

Montenegro Kingdom of Europe, now included in Yugoslavia. It began about 1390 as a principality and was ruled from 1697 by a family called Danilo. It was nominally part of the Turkish Empire until 1878 when it became independent. It received a constitution in 1905 and in 1910 its ruler Prince Nicholas, took the title of king. When the Great War began, Montenegro took the side of Serbia. The land was therefore invaded by the Austrians, and by Jan, 1916, it was completely in their possession. At the end of 1918 they withdrew and the Serbians took their place. The Montenegrins then decided to depose Nicholas and unite with Yugoslavia. The area of the country is about 3630 sq m. Its capital is Cetynje, but Jakova is the largest town. See YUGOSLAVIA.

Monterey City and pleasure resort of California on Monterey Bay, 90 m. to the south of San Francisco. It has a good harbour and the industries include shipping and fishing. Pop 9100.

Another Monterey is a city of Mexico. It is on the San Juan River in the north-east of the country and is famous for the beauty of its surroundings. Pop 81,000.

Montesquieu Charles de Secondat, Baron de la Brède et de French political historian. He was born Jan 18, 1689. In 1721 he published the *Lettres persanes*, in which, in the character of two Persian visitors, he satirised the decadence and insincerity of French society. His great political treatise, *De l'esprit des lois*, was published at Geneva in 1748. He was for a long time the President of the *parlement* of Bordeaux, and then travelled in Europe and became the friend of Lord Chesterfield. He had wide vision and deep insight, and his admiration for the free English constitution had a great influence on the first part of the French Revolution. He died Feb 10, 1755.

Montessori Maria. Italian teacher. Born in 1870, she became a doctor and took a special interest in children of weak intellect. In 1898 she became head of an institution for the education of such children. Her methods spread to other European countries and were taken up as a means of educating normal children. She received the Degree of LL.D at Durham in 1923 and visited England again in 1935.

The Montessori system aims at developing the child's individuality in every possible way. He or she is taught to look after himself or herself in every way. Attention is paid to physical training, work in the garden and in the open air is encouraged as well as manual work of one kind or other. There is a Montessori Society in London.

Montevideo City and seaport, and capital of Uruguay. It stands on the north side of the estuary of the River de la Plata, 132 m from Buenos Aires, and is well served by railways. It developed with great rapidity in the 19th century and is

now a prosperous seaport and trading centre. The port has a fine harbour with ample docks. Pop (1932) 655,972

Montezuma I Mexican emperor. He annexed Chalco and overpowered the Tlaxcalans. He died 1471.

Montezuma II Mexican emperor son of Montezuma I. Born 1468, he waged war against Tlaxcala, Guatemala and Tehuantepec and greatly enlarged his empire. In 1519 the Spaniards, under Cortes landed, marched to the capital, and soon made the emperor a virtual prisoner. In 1520 Montezuma tried to prevent the Mexicans from attacking the Spaniards, but was himself attacked by them and died three days later.

Montfort Simon de. Born about 1206, he came to England in 1230, a great friend of Henry III, who created him Earl of Leicester, he afterwards fell into disfavour and was sent to Gascony to quell a rebellion. He returned in 1253 to find the barons in revolt against the king's foreign counsellors. For many years he led the barons in attempts to make Henry rule wisely, and in 1265 called a parliament which was the forerunner of modern government. He was defeated at Evesham in 1265 by Edward, Prince of Wales, and killed in the battle.

Montgomeryshire County of Wales. In the north of the country, it is wholly inland. In it there are several ranges of hills including the Plynlimmon range in the south. The rivers include the Severn, Dovey, Vyrnwy and Wye and herein is Lake Vyrnwy. The soil, not very fertile, is used chiefly for the rearing of sheep. Montgomery is the county town. Other places are Welshpool, Llanidloes, Llanfyllin, Newtown and Machynlleth. Pop (1931) 48,462.

Month Division of the year. It may represent a period of twenty-eight days or one revolution of the moon round the earth, known as a lunar month, or it may represent the twelfth part of a year and is then termed a calendar month. In the Roman or Julian calendar, which began in March, the months corresponded to our own, with the exception of the fifth and sixth, named Quintilis and Sextilis, which were later renamed Julius and Augustus.

Montmartre District of Paris. It is on a hill to the north of the city proper and is famous for its night life and as a centre of Bohemianism. The chief building is the basilica of the Sacré Coeur.

Montmorency River of Quebec. It rises in Snow Lake, flows south through the province for about 80 m and joins the St. Lawrence just outside the city of Quebec. The falls near the mouth are used to generate electric power. An electric railway links it with Quebec.

Montpellier City of France. It is 31 m from Nîmes, only a few miles from the Gulf of Lyons. The university was a famous medical school in the Middle Ages and the city has a hotanic garden, the oldest in France. The city is a railway junction and has some manufactures. Pop (1931) 86,924.

Montreal Largest city in Canada. It is situated on the island of the same name at the confluence of the Ottawa and St. Lawrence Rivers, in the province of Quebec. It is the commercial capital of the Dominion and between 1844 and 1849 was the political capital also.

Shipping is the principal industry, for the St. Lawrence is navigable during three quarters of the year, and Montreal is a busy port. It is also a great railway centre and the C.P.R. has its shops here. Educationally it is of importance, with its two universities, McGill and Montreal. The population is largely French. The modern city was founded by Maisonneuve, but there was previously an Indian village on the site. Pop (1931) 818,577.

Montreuil Town of France. It is on the River Canche 20 m from Boulogne. At one time Montreuil was on the sea but it is now some miles away. From March 1910 to the end of the war Montreuil was the British general headquarters and near it was the Château de Beaulieu occupied by Sir Douglas Haig.

Montreux Pleasure resort of Switzerland. It stands on the eastern side of Lake Geneva, about 50 m from Geneva. It has a station and from here steamers go to other places on the lake.

Montrose Royal burgh and Seaport of Angus (Forfarshire). It is 31 m N.E. of Dundee on the L.M.S. and L.N.E. Ryds, and stands on the South Esk where it forms the Montrose Basin. The town received its charter from David I. and became a royal burgh in 1352. The staple industry is flax spinning others are fishing, shipping and the manufacture of linen. Pop 10,190.

Montrose Duke of. Scottish title held by the family of Graham. In 1605 William, Lord Graham, a title dating from 1445, was made Earl of Montrose. John, the 3rd earl, was regent of Scotland and chancellor from 1603 to 1608. His grandson, James, the 5th earl (q.v.), was the famous soldier who was made a marquess in 1644. James, the 4th marquess, a supporter of the union between England and Scotland in 1707, was made a duke in that year. He was secretary of state, 1716 to 1733, and from him the present duke is descended. The duke's estates are around Loch Lomond but a good deal of the land has been sold. The duke's oldest son is called the Marquess of Graham.

Montrose James Graham, Marquis of "The Great Montrose". Born in 1612, he helped to form the Scottish Covenant, which he at first defended. After turning against the Covenanters he was imprisoned and went to England, but returned in 1644 when the Highlanders rallied round him. His campaign against the Covenanters was successful, but he was routed by Leslie at Philiphaugh, near Selkirk. He escaped abroad but returned to avenge the execution of Charles I. He was then betrayed to Leslie who had him publicly hanged in Edinburgh, May 21, 1650.

Mont St Michel Island off the coast of Brittany. It is in the Bay of St. Michel, 15 m from Granville. A causeway about a mile long connects it with the mainland. On the highest point of the island is an abbey, now national property. The abbey was founded in 708, and the oldest existing building dates from the 11th century.

Monument Architectural structure, tomb, shrine, sculpture or incised brass used to commemorate some person or important event. Of ancient monumental buildings the famous mausoleum at Halicarnassus is an example. A modern monument of national importance is the Cenotaph in Whitehall. Monumental brasses of varying degrees of technical skill were common in

English churches from the 13th to 17th centuries

Moody Dwight Lyman American evangelist. Born Feb. 5, 1837, he started his work in Chicago in 1856. In 1870 he joined forces with Ira David Sankey and began the "Moody and Sankey" evangelical tour. Their campaigns in England in 1873 and again in 1883 caused a great emotional wave of revivalism due to the preaching of Moody and the singing of Sankey. Moody and Sankey hymns are still sung.

Moon Satellite of the earth. It revolves round the earth in 27 days, 7 hours, 43 minutes, and its average distance is about 238,793 m. The moon's diameter is about 2160 m., and its mass is estimated at $\frac{1}{80}$ of that of the earth. Owing to the time taken by its axial rotation being the same as that of its revolution round the earth, the moon always presents the same aspect to us. It shines by reflected light from the sun and when opposite the sun is called full moon, a fortnight later when between the earth and sun it is nearly invisible and is called new moon. The effect of the lunar attractive force upon tides is well known. The moon's surface shows signs of former volcanic activity in its vast craters and plains.

Moonstone Precious stone. Sometimes called wolf's eye, fish's eye, or water opal, it reflects a bluish milky light. It is a translucent, colourless felspar, chiefly orthoclase.

Moonwort (*Botrychium lunaria*) Fern of the adder's-tongue order, native in Britain and all cold and temperate regions. The single stout and fleshy frond, 3-6 ins. long, bears close-set pairs of crescent-shaped leaflets.

Moore George Irish novelist. Born in Ireland in 1852, he first studied art in Paris, but turned to literature, beginning with verse, *Flowers of Passion* (1878). His three great novels are *Esther Waters* (1894), *Evelyn Innes* (1898), and *Sister Theresa* (1901). In these he imitated the French philosophical novel and "restored in England the Fielding tradition." *Heaven and Farewell*, *The Brook*, *Kerth* and *Heloise and Abelard* are other outstanding works. He returned later to drama with *The Coming of Gabrielle* (1920), and the successful *Making of an Immortal* (1923). *Aphrodite in Aulis* appeared in 1931. Died Jan., 1933.

Moore Sir John Scottish soldier. Born in Glasgow, Nov. 13, 1761, he entered the army and from 1794 onwards saw active service in Ireland, the Netherlands, Egypt and elsewhere. He was sent to Spain in 1808 at the head of an army, and was soon given command of the forces there. He marched from Lisbon into Spain, but the advance of a large French army forced him to retreat and to fall back on Corunna, to which port he ordered his ships. The retreat was a difficult march of 250 m., but nevertheless Moore, on reaching Corunna, was able to defeat the pursuing French. During the battle on Jan. 16, 1809, Moore was fatally wounded by a cannon-ball.

Moore Thomas Irish poet. Born May 28, 1779, his best known works include the *Irish Melodies* (1807), the *Tucopenny Post Bag* (1813), a satire on the Regent and his friends, *Lalla Rookh* (1817), for which he received £3,000, *The Pudge Family Abroad* (1818), and his very fine *Life of Byron* (1830). He died Feb. 25, 1852.

Moorfields District of London. To the north of the city, it was marshland until it was drained about 1500. It later became known as Finsbury Fields, and was built over Finsbury Square and Finsbury Circus now occupy the site.

Moor Hen Water-fowl. The European *Gallinula chloropus* (*Rallidae*) is common in England on rivers, ponds, etc. Iron grey with greenish wings, white at the edges it swims in a jerky manner, and can run and fly rapidly.

Mooring Mast Mechanism to which airships anchor. It is so arranged that the airship with its nose fastened to the top of the mast, can swing in any direction with the wind. Inside the mast are steps for passengers and crew to ascend, and it contains also mechanism for taking up petrol, water and other supplies. There are large mooring masts at Cardington, Bedford.

Moor Park Residence in Surrey. It is 2 m. from Farnham, and is noted as the residence of Sir William Temple, who bought it in 1682. Here Dorothy Osborne lived and Jonathan Swift met his Stella.

Another Moor Park is in Hertfordshire, near Rickmansworth on the Met. Riv. The house, built about 1670, was a seat of Lord Ebury, but after the Great War he sold it, and the park has been cut up for building land.

Moors Name of a people who live in the northern parts of Africa. They are descended from the Berbers or the Arabs, and gave their name to Morocco. Some of them crossed into Spain and conquered a good part of that country. There they set up a kingdom which lasted from 711 until 1492, and the southern parts of Spain still bear extensive traces of their influence, especially in architecture. They were of no mean repute as scholars. Other Moors helped to people, not only Morocco, but also Algiers and Tunis, where they are still found. See MOROCCO. SPAIN.

Moose Algonkin name, "wood-creeper," of the world's largest species of deer (*Alces machilis*). Ranking as an American variety of the elk of N. Europe and Siberia, it formerly ranged from 43° N. lat. northward to the so-called Arctic barren-grounds. It is disappearing from the northernmost of the United States, but is still found in Alaska and in various parts of Canada, especially towards the N.W., being protected in Alberta and elsewhere. See ELK.

Moose Jaw City of Saskatchewan. It is on Moose Jaw River, 400 m. to the west of Winnipeg and the same distance from Calgary. It is served by both the transcontinental lines, C.P.R. and C.N.R., and is the centre of an agricultural district. Pop. 24,000.

Moraine Term used in geology. The rocky material carried along the side of a glacier forms a lateral moraine. A median moraine is formed when two glaciers meet. The terminal moraine is found where a glacier ends.

Morality Play Form of drama that was popular in the 15th century. It grew out of the miracle play, the distinguishing feature being to personify the virtues and vices and so inculcate a moral lesson. The most famous of these plays is *Eccryman*. It tells how human beings enter upon the journey to which they are called by death. Another of these plays is *The Castle of Perseverance*, which tells how the human

race is tempted by luxury but is saved by penitence

Moratorium Postponement of a debt or other liability, usually for a definite period. In Aug., 1914, on the outbreak of war, the government declared a moratorium of one month for bills of exchange. In Dec., 1931, Hungary, faced with serious financial difficulties, declared a partial moratorium. During the depression of 1930-32 some public companies secured a moratorium for the payment of their debenture interest.

Moravia Part of the republic of Czechoslovakia. It is in the centre of the country with Bohemia to the west. Brunn is the capital and the March, also called the Morava is the chief river. It was united with Austria-Hungary in 1849 and from then until 1918 was a province of that empire.

Moravian Brethren Protestant religious body. Founded originally after the death of John Huss (1415), an organisation was set up at Berthelsdorf in Saxony in 1727, its leaders being Count Zinzendorf and Christian David. Some of its members were Lutherans, but others were persons who had fled from Bohemia to Saxony and were the successors of the Hussites of the 15th century. The new faith obtained a footing in England and had chapels in Chelsea and in Fetter Lane, London. The churches are governed by bishops and elders. The Moravians do a great deal of missionary work. They have about 40 churches in England and over 3000 members. The headquarters are in Fetter Lane, London, E.C.4. The whole church is divided into four provinces, Germany, Britain, North America and South America.

Moray Former name for the county of Elgin (gr). It is the name of one of the earldoms into which Scotland was divided in the later Middle Ages. This covered the modern counties of Elgin, Banff, Nairn and part of Inverness.

Moray James Stewart, Earl of. Born in 1531, the natural son of James V of Scotland, he opposed Mary, Queen of Scots in her marriage to Darnley, and was partly responsible for the murder of Rizzio, her secretary. When Mary was imprisoned in Loch Leven by the rebellious nobles, Moray was appointed Regent. He was known as the "Good Regent" and did much to restore civil and religious peace in Scotland. He was shot on Jan. 23, 1570, by one of Mary's supporters.

Mordant Substance used in dyeing to fix a dye in a fabric by forming an insoluble compound with the colouring matter, or by acting as a medium for absorbing the dye. Alumina and aluminium salts, ferrous oxide, and salts of tin and chromium are used as mordants, also oil mordants in Turkey red dyeing.

Mordecai Jewish exile. He figures in the Old Testament Book of Esther as the queen's protector and relative, who co-operated with her in frustrating the vizier Haman's anti-Jewish plots.

More Hannah. English authoress. Born at Stapleton, Gloucestershire, Feb. 2, 1745, she came to London in 1774, and became a friend of Dr Johnson and of Burke. Garrick produced her tragedy, *Percy*, in 1777, but after his death she renounced the theatre and became a philanthropist, starting Sunday Schools in Cheshire, and organising a movement of which the outcome was the Religious

Tract Society. She wrote many religious books, and bequeathed all her money to charity and religious institutions. She died Sept. 7, 1833.

More Sir Thomas. English scholar and lawyer. Born in London, Feb. 7, 1478, he was a son of a judge, Sir John More. He went to Oxford and then settled in London, where he studied and then lectured on law. He obtained an official position in the city and was elected to the House of Commons. Thomas Wolsey formed a high opinion of him and appointed him Treasurer of the Exchequer and Chancellor of the Duchy of Lancaster, whilst the Commons chose him as Speaker. He went to France and Germany on public business, and in 1520, succeeded Wolsey as Lord Chancellor. In 1532 he resigned that office and in 1534, for refusing to recognise the king as head of the church, he was accused of high treason. On July 7, 1535, he was beheaded. He was beheaded in 1886.

More is one of the most attractive characters in English history, and has a permanent place in English literature. He was a member of the circle of scholars and humanists that included Erasmus and Colet. He wrote a *History of Richard III* as well as the immortal *Utopia*.

Morecambe Borough and watering place of Lancashire. It stands in Morecambe Bay, 3½ m. from Lancaster, on the L.M.S. Ry. Fishing is the chief occupation. Pop. (1931) 24,600.

Morecambe Bay Opening of the Irish Sea. It cuts into the coasts of Lancashire and Westmorland and is 10 m. across. At low tide it is largely sand. The Lune, Wyre, Kent and other rivers flow into it.

Moresnet District of Belgium. It is on the border of Germany just outside Aix la Chapelle. In 1816 it was placed under the joint control of Germany and the Netherlands. In 1841 it was put under a burgo-master and council, and the inhabitants could be either German or Belgian citizens at choice. In 1910 it was handed over to Belgium. Here are zinc mines. Pop. 3000.

Morgan John Pierpont. American financier and banker. Born at Hartford, Connecticut, on April 17, 1837, he was the son of a banker and entered the family firm in 1864. This later became the firm of J. P. Morgan and Company, and, largely through his financial ability, became one of the most powerful banking houses in the world. It organised the Steel Trust, formed an Atlantic Shipping Combine, controlled railways, etc. He was a yachtman, collector and philanthropist and died a multi-millionaire on March 31, 1913 in Rome. His son John Pierpont, placed contracts and raised loans for the British Government during the War.

Morland George. British painter. Born June 26, 1763, he was the son of the crayonist Henry Morland who brought him up with such strictness that when he became his own master, he went steadily downwards through drink and debt. He painted chiefly country subjects, such as gipsies and farm interiors. His pictures are remarkable for their beauty of conception and harmony of colouring. "The Inside of a Stable" in the National Gallery is one of his finest works. He died of brain fever, and in poverty on Oct. 29, 1804.

Morley Borough and market town of Yorkshire (W.R.). It is 4 m.

from Leeds and 183 from London, by the L N E. Rly. The place is a centre of the woollen manufacture, and machinery is made Pop (1931) 23,397

Morley Viscount English writer and statesman Born at Blackburn, Dec 24, 1838, John Morley was the son of a doctor. He went to Cheltenham College and then to Lincoln College, Oxford. In 1867 he became editor of *The Fortnightly Review*. During the next 10 years he wrote his studies on Voltaire, Rousseau, Diderot and other French thinkers, and a book, *On Compromise*. These and the writings published as *Critical Miscellanies*, reveal him as a thinker, a scholar and a stylist. He wrote also *Lives of Burke and Cobden* and was recognised as the leading exponent of philosophic radicalism. In 1880 he became editor of *The Pall Mall Gazette*, but he resigned in 1883, the year after he had given up *The Fortnightly*.

In 1883 Morley entered the House of Commons as M.P. for Newcastle-on-Tyne, and when Gladstone declared for Home Rule, he was one of his leading supporters. He was Chief Secretary for Ireland in 1886 and again, 1892-95. In 1895 he lost his seat at Newcastle, but in 1896 was returned for the Montrose Burghs. Soon after Gladstone's death, he withdrew from public life, while he wrote the monumental life of that statesman, published in three volumes. In 1904. In 1905, when the Liberals returned to power, he became Secretary for India, a post he held until 1910. In 1908 he was made a viscount, and he was Lord President of the Council from 1910 until he resigned on the outbreak of war in Aug. 1914. He died Sept. 23, 1923, when his title became extinct. His many honours included the O.M. His writings, in addition to those mentioned, include *Studies in Literature* and a *Life of Walpole*. He edited the *English Men of Letters* series.

Mormons Religious organisation entitled the Church of Jesus Christ of Latter-Day Saints, founded by Joseph Smith in New York State, 1830. So-called divine revelations included a pretended history of primitive America, *The Book of Mormon*, claimed as of equal authority with the Jewish and Christian scriptures. The church spread rapidly to Ohio, Missouri and Illinois, secured many proselytes in England and sent missionaries elsewhere. In 1843 the prophet received a "revelation" permitting polygamy, during the "Gentile" indignation thereby aroused, he was shot. Brigham Young, who succeeded, led the church in 1847 to Great Salt Lake, afterwards constituted the Utah Territory. Prolonged controversies concerning plural marriages culminated after Young's death in their ostensible abandonment, 1890. The community now exceeds 600,000, with 82 churches in Great Britain. The Reorganised Church of Latter-Day Saints, after Smith's death, distrusted Young and repudiated polygamy, accepting the founder's son as president, 1860. Now numbering about 100,000, their headquarters are in Independence, Missouri.

Morning Glory Popular name of various twining herbs of the bindweed order. It refers especially to the tropical American *Ipomoea purpurea* which gardeners call alternatively *Convolvulus major*. It has alternate, toothless, heart-shaped leaves and large five-lobed, funnel-shaped corollas, purple, azure blue, crimson, striped or white. Ivy-leaved and other forms occur.

Morocco Country of N. Africa. It has a coastline on the Mediter-

anean Sea and Atlantic Ocean, while Algeria lies to the West. The total area is 213,350 sq. m. which is divided into three territories, French, Spanish and International.

The native population consists largely of Berbers and Arabs, and there are also many Jews. The European population is chiefly French, and there are British colonies at Casablanca and Tangiers.

Agriculture is the main industry in all territories. A great irrigation scheme was begun in 1927. There is some mining, phosphate being the most important mineral so far exploited. The chief towns are Fez, Marrakesh and Rabat. The country is ruled by a sultan under French protection. Pop 5,300,000.

Morpeth Borough and market town of Northumberland. It is 284 m. from London and 17 from Newcastle-on-Tyne, by the L N E. Rly., on which line it is a junction. The industries included brewing, malting and coal mining, while cattle fairs are held. Near are the Bothal Castle and the ruins of Newminster Abbey. Pop (1931) 7390.

Morphia (or Morphine) Name given to the principal alkaloid in opium, morphia was isolated in 1816. It occurs either as a white amorphous powder or as transparent acicular crystals soluble in alcohol but insoluble in water. Morphia is used in medicine on account of its soporific and anodyne properties, although excessive doses are poisonous and fatal. Its import and export is regulated by licence under the Dangerous Drugs Act.

Morris William English poet. He was born March 24, 1834. He first tried painting as the result of his close friendship with Burne-Jones, but in 1858 published *The Defence of Guenevere*, and in 1867 *The Life and Death of Jason*. His best known work is *The Earthly Paradise*. He contributed to the movement which tried to bring about a revival in decorative art in England and started the Kelmscott Press in 1890. In his later years he was a pronounced socialist, and showed sympathy with the poor by lectures and writing, but he was always more writer, poet and artist than politician. He died Oct. 3, 1896.

Morris Dance Dance very popular in the 16th century. Its name shows that its originators were the Moors, and it may have been introduced into England by Eleanor of Castile, the wife of Edward I. It was danced at village festivals. The characters included Robin Hood and Maid Marian, and a hobby horse was usually introduced. There has been a revival of the Morris dance in the 20th century.

Morrison Herbert Stanley English politician. Born Jan. 3, 1888, he worked in a shop as a telephone operator. Later he became connected with the newspaper industry and came to the front as a socialist politician. He was elected to the London County Council and rose to be the leader of his party there. In 1923-24 and 1929-31 he was M.P. for South Hackney, and from 1929-31 he was Minister of Transport. He conducted the Road Act of 1930 through the House of Commons, and was regarded as one of the most successful of the Labour ministers. He lost his seat at the General Election of 1931 but regained it in 1935. In 1920 Morrison was Mayor of Hackney, in 1928-29 chairman of the Labour Party, and has been leader of Labour Party in the L.C.C. since 1934.

He published *Socialism and Transport* (1933), *How Greater London is Governed* (1935).

Morrison River of Scotland. It is only 19 m. long and enters Loch Ness in Inverness shire at Invermoriston. A suburb of Swansea is named Morrison. On the G.W. Rly., it has tinplate works and other industries.

Morse Code System of signalling primarily intended for use by telegraph operators, but since extended and modified for army and navy signalling. It was devised by Samuel F. B. Morse, in collaboration with Alfred Vail, in 1837 for telegraphic purposes, and consists of a series of dot and dash symbols representing letters of the alphabet, numerals, punctuation marks and conventional phrases, these signs being combined in various ways. In signalling the code is used by day by means of flags or the heliograph, and by night by lamp signals. A modified code known as American Morse is used to some extent in Canada and the United States.

Mortar Cementing material used for binding together bricks or stones in buildings. Mortar for brickwork consists of quicklime and clean grit or sharp sand mixed with water, and for courses of ashlar masonry, a mixture of slaked lime and water known as mason's putty. The term mortar is applied also to a vessel of porcelain, iron, agate or other materials in which substances are reduced to a powder by means of a pestle, or in ore dressing by a steel shoe.

Mortar Type of cannon formerly much in use for throwing shot or shell at a short range and at a high angle. The barrel was thick walled with a smooth bore and loaded at the muzzle, the whole being mounted on a strong frame or bed. In the Great War modifications of the older type of mortar were used by both combatants, these taking the form of weapons which could be thrown into the opposing trenches.

Mortgage Name for a charge on land and houses. It is a loan secured on the property in question and a great deal of money is lent in this way by building societies. The lender or mortgagee can give notice, usually six months, that he wants his money repaid. If this is not done he can sell the property, and after taking what is owing to him, hand over the balance to the mortgagor who is the legal owner of the house, as he possesses what is called the equity of redemption. Alternatively he can apply to the court for an order permitting him to foreclose, or take over the property entirely. The details of a mortgage are contained in a deed which must bear a stamp. This costs 2s. 6d. for every £100 or part of a hundred. Mortgages can be sold, a transfer stamp being required.

Mortise Term in joinery and masonry for a cavity cut in a piece of wood or block of stone to receive a shaped end or tenon of another piece. This form of joint is used to give stability and strength, and an example of mortised work in stone is seen in the trifoliate arch at Stonehenge.

Mortlake District of Surrey. It is on the Thames, near Richmond, 6½ m. from London, on the S. Rly. It is known as the place where the Oxford and Cambridge boat race finishes. In the 17th century it was famous for its tapestries, and in the 18th for an enamelled stoneware called Mortlake ware.

Mortmain Word meaning "dead hand." It was used in the Middle Ages by lawyers for land that was

given to the church and so never became liable to the dues payable on death, as other land did, because its holders, being a corporation, never died. Landowners sometimes made over their lands to the church, but retained the revenues, thus avoiding taxation. In 1279 a law was passed forbidding persons to pass any land into mortmain. To day there are many exceptions in English law to the rule that corporations may not hold land. Public companies, railway and other companies formed by act of Parliament, and local authorities can buy and own land. Charitable trusts can also own it, but if the amount is over two acres they must obtain a licence from the Board of Trade.

Morton Earl of Tiltmore by the family of Douglas since 1458. The most important of the 20 earls was James Douglas, the 4th holder of the title. He became earl in 1553, and was one of the leaders of the party opposed to Mary, Queen of Scots. He was concerned in the murder of Rizzio and Darnley and fought against Mary at Langside. He was made Regent of Scotland in 1572. For complicity in the murder of Darnley, years previously, he was condemned by an assize, and executed on June 2, 1581. The earl's eldest son is called Lord Abington.

Morton John, Archbishop of Canterbury, cardinal and statesman. Born about 1420, he began as an ecclesiastical lawyer and took a prominent part in the Wars of the Roses on the Lancastrian side. After the victory of the Yorkists, he was reconciled to Edward IV and became Master of the Rolls in 1474. Arrested by Richard III., he escaped and supported the Earl of Richmond, later Henry VII. He was principal advisor to Henry, Archbishop of Canterbury in 1486 and Lord Chancellor in 1487. He was created cardinal in 1493 and died on Oct. 12, 1500.

Mosaic Term applied to a surface formed of small pieces of various stones, tiles, metal or glass, and used for making floors or for covering walls, vaults and columns. Roman mosaic was used chiefly for flooring, but in Byzantine architecture the art of mosaic work reached its height as mural and pictorial decoration. Inlaid onyxes of many-colored marbles, glass and enamels being used. Fine mosaics of the early period are to be seen in St. Mark's, Venice, and the churches of Ravenna.

Moscow Ancient capital of Russia, now the capital of the Russian Union of Socialist Soviet Republics. It has a fine situation on seven hills, and is full of historic interest. The Kremlin is the ancient citadel. Here is the Great Palace and other famous buildings, including the Uspenski Cathedral, the coronation place of the Tsars.

Moscow is an important commercial and railway centre, being the starting point of the Trans-Siberian Rly. Its industries, temporarily hindered by the Revolution, have revived again, and the population has increased with astonishing rapidity. In 1930 it was 2,781,300. It has nine broadcasting stations. The two most powerful operate on 181 M., 100 kW., and 1504 M., 100 kW.

Moselle River of France and Germany. It rises in the Vosges and flows through Alsace-Lorraine into Germany, where at the Coblenz it falls into the Rhine. It is 320 m. long and much of its course is navigable. Its chief tributaries are the Meurthe and the Saar. It gives its name to a light wine that is made from grapes grown in the valley.

Moses Hebrew law-giver and leader. Son of Amram and Jochebed, and younger brother of Aaron and Miriam, he was adopted by Pharaoh's daughter, educated as an Egyptian prince, and undertook pastoral pursuits in Midian. Returning to Egypt, he became the leader of the Israelites and after the Exodus, led them to the outskirts of Canaan, dying near Mt Pisgah. Posterity ascribed to him the first five Old Testament books and the legislative code embodied therein.

Mosley Sir Oswald Ernald English politician. Born Nov 16, 1896 a son of Sir Oswald Mosley he was educated at Winchester and Sandhurst, and entered the army. Having served in France, he was elected Unionist M.P. for Harrow in 1918. In 1924 he joined the Labour Party. In 1926 he was elected M.P. for Smethwick. In 1929 he became Chancellor of the Duchy of Lancaster in the Labour ministry, but differed from his colleagues and resigned. In 1931 he formed the New Party, but at the General Election of that year he and his colleagues failed to secure election. For a short time he controlled a paper called *Action*. Since then his speeches as leader of the Black Shirt Movement have attracted much notice. In 1928 he succeeded to the baronetcy. In 1920 Mosley married Cynthia, daughter of the Marquess Curzon. She was Labour M.P. for Stoke-on-Trent, 1929-31. She died in 1933.

Mosque Mohammedan house of prayer. Normally an open quadrangular court with a fountain for ceremonial ablutions surrounded by an arcaded sanctuary, with a wall niche indicating the direction of Mecca a pulpit and sometimes a lecture, it is completed externally with a dome and minarets.

Mosquito General name given to insects belonging to the *Culicidae* or gnat family. A number of species occur in Great Britain. These insects pass their larval stage in stagnant water, and the female only is provided with biting mandibles, the male being quite harmless. The tropical genus, *Anopheles*, is a carrier of the malarial parasite, and other species of the parasite of yellow fever.

Mosquito Coast Low lying territory along the W coast of Nicaragua, fronting the Caribbean Sea. About 225 m long, averaging 40 m wide, it bears an aboriginal name, corrupted by early European settlers. Great Britain exercised a protectorate, 1855-1860, when Nicaragua acquired suzerainty, the Indians retained autonomy, withdrawn in 1906, and resided in the Mosquito Reserve since renamed.

Moss Group of cryptogam plants forming a division of the class *Bryophyta* and closely related to the liverworts. While their structure is cellular, vascular tissue being absent, a conducting tissue is present and the plant body is differentiated into an apparent stem and leaves. Like the ferns, alternation of generations occurs, the moss plant representing the sexual stage bearing the sexual elements or "flowers," with the spore capsule borne upon the moss stem as the asexual generation.

Mossel Bay Seaport of Cape Province, South Africa. It is 318 m to the east of Capetown, and is connected with that city and other places by railway. It is a port of call for ocean steamers and has a harbour protected by a breakwater. It is noted for its oysters. Pop 5700.

Mossley Borough and market town of Lancashire. It is 10 m from Manchester, on the L.M.S. Rly., and is situated on the Tame. Here are engineering works and textile factories. Pop (1931) 12,041.

Most Favoured Nation

Clause inserted in many commercial treaties between countries. It means that the two nations making the treaty will not give to any other nation advantages in the matter of tariffs greater than they give to one another. There were cases in 1932 of the violation of this principle, but protests were promptly made by Great Britain.

Mosul City of Iraq. It is on the right bank of the Tigris, 220 m north of Bagdad, and, being on the road to Persia, has long been an important trading centre. Under the Turks it was also a military station. The word *muslin* is a corruption of Mosul. Opposite the city, across the Tigris, are the ruins of Nineveh. Mosul was occupied by the British in Nov., 1918. Pop 80,000.

The vilayet of Mosul is rich in oil and an international company has been formed for working it. The construction of a pipe line arranged.

The ownership of the vilayet was a matter of dispute after the Great War, as it was claimed by both Turkey and Iraq, the latter then controlled by Great Britain. In 1925, negotiations between them having failed, the League of Nations decided in favour of Iraq, and the boundary line was fixed, with a neutral zone of 50 m on each side. The inhabitants accepted this decision, but they were not altogether satisfied when the mandate given to Great Britain came to an end and Iraq became an independent state.

Motet Short piece of musical composition set to sacred words. It was used largely in the church music of Tallis, Palestrina and other composers. The music is contrapuntal in style with great delicacy of expression.

Moth Lepidopterous or scale-winged insect of the division *Heterocera*. It has variously-shaped feelers, as distinct from a butterfly of the division *Rhopalocera*, with club-like feelers. Their feelers may be thread-like, spindle-shaped, comb-like or feathery, but never club-like. Moths usually fly during twilight or at night, but this characteristic is neither scientific nor invariable. Most have the fore and hind-wing on each side linked in flight by a bristle and catch, which butterflies lack. Both butterflies and moths have spiral probosces for imbibing food, and scales covering body and wings, except in the clear wings. The most important economically, are those whose larvae produce silk.

Mother-of-Pearl Nacreous or inner lining of the shell of the pearl oyster, used in the manufacture of buttons, ornamental articles and for inlaying. Of the several trade varieties, white mother-of-pearl from Thursday Island and the Great Australian Barrier Reef is the best, other grades are the yellow edged shell from Burma and the black-edged from various Polynesian Islands.

Mother of Thousands

Popular name applied to two unrelated flowering herbs. (1) The European ivy-leaved toad-flax of the figwort order, long naturalised in Britain (*Linaria cymbalaria*). Its yellow

lipped bluish purple flowers like miniature antirrhinums, suit hanging baskets (2) The creeping sailer or strawberry geranium of the saxifrage order, from E Asia (*Saxifraga sarmientosa*), is a favourite cottage window plant.

Motherwell Burgh of Lanarkshire. It is on the Clyde 13 m from Glasgow, on the LMS Rly. The chief industries are coal mining and engineering. Since 1920 the burgh has included Wishaw Pop (1931) 64 700

Motherwort Perennial labiate herb (*Leonurus cardiaca*) Growing in British hedgerows and waste places, it is indigenous throughout Europe and N and W Asia. It is a downy, aromatic plant with erect stem 2-4 ft. high, much divided lobed and toothed leaves, and dense whorls of small pale rose flowers

Motion Act of moving, or change of position of a body. It is a fundamental condition of matter, as the smallest particles, atoms and molecules, are in a state of constant movement. Consequently motion has not to be maintained, but may be accelerated, retarded or changed in direction under certain conditions. To explain the nature of motion, Newton framed three fundamental laws, the first being that all bodies remain in a state of uniform motion in a straight line, except under the action of an external force, the second law states that under this action acceleration of the body occurs in proportion to the force, and according to the third law the action of every force is opposed by an equal and opposite reaction

Motley John Lothrop American historian and novelist. Born on April 15, 1814, he achieved fame with his *Rise of the Dutch Republic* (1856), a work that had taken him 10 years to write. This was followed by a *History of the United Netherlands* (1860-69). In 1861-67 he was minister of the American Government to Austria, and in 1869-70 minister to Great Britain. He died on May 29, 1877

Motor Term used in a general sense for different forms of machines employed as prime movers. Examples are the various types of engines—steam gas, oil or petrol, hydraulic motors and electric motors. Electric motors for converting electrical energy into mechanical energy are classified as direct current and alternating current motors, the latter type being the most extensively used. The direct current type is still, however employed for many purposes, being most suitable for high speed passenger lifts, rolling mills, colliery winding and certain kinds of machine tools. Direct current motors are either series, shunt or compound wound machines, according to the method of winding the insulated coils on the armature and magneto

Motor-Car Name given to a self propelled road vehicle driven, at the present day by a petrol engine. Steam driven vehicles came into use in the early 19th century, but the invention of the petrol motor in 1884 brought in a new type of engine which rapidly superseded the old type.

A motor-car consists of a metal frame work or chassis, which supports the body the driving mechanism engine, wheels, axles, brakes, etc. The engine, fixed usually in the fore part of the chassis has a friction clutch

joining it to the transmission gear, but the power is transmitted to the driving wheels in various ways, and the arrangement of the engine, transmission, mechanism and driving axle also varies in different types of car. In ordinary motor-cars transmission is by the shaft drive, but many commercial vehicles still retain the older chain drive. The body varies considerably according to the type of car. In some makes there is a folding hood, in others the seating accommodation is permanently enclosed. The racing car type has a specially designed body with wedge shaped radiator and conical rear end to give the minimum of air resistance.

Private motor-cars are taxed at a rate of 15s per horse power per annum, the minimum tax payable being £1, 10s. Commercial vehicles are taxed according to their type, and coaches and omnibuses according to their seating accommodation.

Motor-Cycle Two wheeled vehicle. It is propelled by an internal combustion engine of either one, two, three or four cylinder power, with belt or chain transmission, and with or without a sidecar. The term also includes in a broader sense certain kinds of three wheeled cars.

A motor-cycle not exceeding 8 cwt. in weight unladen is taxed according to the cylinder capacity of the engine—150 cubic centimetres or less, 12s., 150-250 c.c., £1, 2s. 6d., over 250 c.c. and not over 224 lbs weight, £1, 2s. 6d. If taken out before Jan 1, 1933 in all other cases £2 5s. There is an extra 15s in each case for a sidecar. These licences now may be taken out in quarterly payments of 27½ per cent of the full annual tax.

Motor Mark Identification mark on motor vehicles. It is allotted to motor vehicles on registration. It consists of index letters, representing the county or borough council followed by a number. Motor marks are displayed on plates in a prominent position on the vehicle, the rear plate being illuminated. In motor-cycles plates are carried at the front and rear both being illuminated. Recently the size of the letters and figures has been increased to render identification easier.

Motor Racing Competitions for motor vehicles commenced in 1894 on the continent, especially in France, on suitable circuits on roads. Among the first were the Gordon Bennett races for reliability and speed for teams of touring cars from each competing country. The Grand Prix was established in France 1906, to enable individual makes to compete with one another. Brooklands track was constructed in 1907 to remedy the fact that England, having no suitable testing place, suffered in these competitions. Races and tests are now common events in England on the continent and in America and extend to motor-cycles, on the road—the Tourist Trophy races, and on special tracks—speedway racing and to motor boats.

Mottram Ralph Hale English author. He was born in 1883. As a result of his war experiences, he produced the *Spanish Farm* trilogy, which brought him immediate fame. He has written since then *Our Air Dörmer*, *The English Miss*, *A History of Financial Speculation*, *Europa's Beast*, *Castle Island*, *The Lame Dog and Flower Pot End*.

Mouflon Species of wild sheep now confined to Corsica and Sardinia (*Ovis musimon*). Standing 28 in. at the withers.

it has short, non-woolly hair, with abundant under wool, the ram's curved horns may attain a length of as much as 29 in. With the Asiatic urial it was probably the ancestor of the domesticated sheep, with which it interbreeds freely.

Mould Loose, fine, crumbly earth, such as constitutes surface soil. Leaf-mould is rich in organic matter. The word also denotes furry growths of minute fungi, developed on animal and vegetable substances exposed to damp.

Moulding Term applied in architecture and joinery to a concave or convex surface on wood or stone. It forms a continuous uniform groove or projection ("staff"), or a combination of both. Of Greek and Roman mouldings there are eight types which can be geometrically constructed—the fillet, astragal, torus, ovolo, scotia, cavetto, cyma recta and cyma reversa. In Renaissance architecture the moulding was confined chiefly to the cornice, but in Gothico it became very elaborate, especially on arches.

Moulmein Seaport of Burma, at the mouth of the Salween River. There is a harbour protected by an island, and from it a great quantity of teak is shipped. Pop. 61,300.

Moulting Periodical shedding of the outer covering of animals, especially the feathers of birds. It occurs at least once annually, after the breeding season, a second moult occurs in the cases of some birds with a special breeding plumage, e.g., ducks, while there may be even a third for the white winter dress, e.g., ptarmigans. Snakes slough their skins correspondingly. The name denotes also analogous, but not identical, processes in various invertebrates, e.g., the external shell of crustaceans and the skin of insects during growth.

Moulton John Fletcher, Baron British lawyer. He was born on Nov. 18, 1844, and in 1874 was called to the Bar, where he established a practice in patent law, on which he became a supreme authority. In 1906 he was appointed a Lord Justice of Appeal, and in 1912 a Lord of Appeal with the title of Baron Moulton of Bank. He was first chairman of the Medical Research Committee under the National Insurance Act (1912), and was Director General of Explosive Supplies during the war. He died March 9, 1921.

Mountain Term used for an elevation of the earth's crust. There are two types: tectonic mountains, which are due to accumulation or deformation of the earth's crust, and subsequent or relief mountains, representing the remains of ancient elevated areas. There is no standard height for a mountain. In Great Britain the name is applied to peaks over 2000 ft. high.

Mountain Name used for a political party that arose during the French Revolution. They were a group of Jacobins, which included Danton and Robespierre. The name was given because its members sat on benches somewhat higher than the others in the chamber. About 100 in number, they were responsible for the Reign of Terror.

Mountain Ash Urban district and market town of Glamorganshire, on the River Cynon, 18 m. from Cardiff on the G.W. Ry. The district includes, in addition to Mountain Ash itself, Aberpennar, Cwmpennar and Abercynon.

The principal occupation is coal mining. Pop. (1931) 38,381.

Mountaineering Climbing of mountains as a pastime or adventure. It developed in the 19th century, when Frenchmen, Englishmen and others began to climb some of the peaks of the Alps. One by one the summits were reached, clubs were formed, a technique of climbing was developed, a literature came into being—and mountaineering had become a widely practised sport. The Alpine Club was founded in 1857. Mountaineers went to Africa and America, where mountains of over 20,000 ft. were climbed, these including Aconcagua, Mt. St. Elias and Kilimanjaro, until almost the only unclimbed mountains were the highest peaks of the Himalayas. The three greatest are Everest, Kanchenjunga and Godwin-Austin, and attempts to reach the summits of these have so far failed. A further expedition to conquer Everest set out in the spring of 1936 under Mr. Hugh Rattledge.

Mountbatten Name taken in 1917 by the members of the royal family until then known as Battenberg. One became the Marquess of Milford Haven. See BATTENBERG.

Mount Edgcombe Headland in Cornwall, near Plymouth. From it the old Cornish family of Edgcombe takes the title of earl, which dates from 1789. The family seat is Mount Edgcombe, and the earl's eldest son is called Viscount Valletort.

Mount Grace Ruined abbey in Yorkshire. About 4 m. from Northallerton. It was once a house of the Carthusian monks. It was destroyed at the Reformation, but considerable ruins remain, including monks' cells, each with its oratory and garden, and parts of the church and the chapter house.

Mountmellick Market town of Leix, Irish Free State, 9 m. from Maryborough and 50 from Dublin, on the G.S. Ry. It is an agricultural centre. Pop. 2280.

Mounts Bay Arm of the sea off the coast of Cornwall. It is 21 m. across, and Penzance is the chief place on its shores. It also includes St. Michael's Mount.

Mountsorrel Town of Leicestershire on the Soar, 7 m. from Leicester. The chief industry is the mining of granite from its famous quarries.

Mount Stephen George Stephen, 1st Baron. Railway director. Born in Scotland on June 5, 1829, he went to Canada in 1850 and became in turn Director, Vice-President and President of the Bank of Montreal. He was also director of several railways, and President of the C.P. Ry., which opened up trans-continental traffic in Canada. He died on Nov. 29, 1921.

Mount-Temple William Francis Cowper-Temple, Lord English politician. He was born in 1811. He was Lord of the Admiralty, 1846-52. President of the Board of Health and Privy Councillor, 1855, and in 1865-66 Commissioner of works. He died in 1888.

Mount Vernon Town of Virginia, 15 m. from Washington. It is famous as the home of George Washington, whose house there became a

national memorial in 1850. Nearly 18 1/2 m. N. of New York. There are several other places of this name in the United States, the largest being a city in New York state, on the Bronx River, 18 m. from New York. Pop 61,500.

Mouse Name of various small rodents. British species include the common house mouse (*Mus musculus*), the tiny nest building harvest mouse (*Micromys minutus*), and the long tailed field mouse (*q v*).

Moustierian Name given to an epoch of the Palaeolithic age. It is derived from the Cave of La Moustier in Dordogne, where flint implements as well as bones of the mammoth, woolly haired rhinoceros, cave bear and musk-ox were found. The climatic conditions appear to have been cold and damp, but the tools found show an advance upon those of the previous period.

Mouth Median opening in the head of an animal. It leads to the mouth cavity into which open the alimentary canal, the respiratory organs and salivary glands. The mouth or buccal cavity in the higher types is provided also with organs for prehension and retention of the prey, or the tearing and grinding of food, namely the teeth. Salivary glands are present and in mammals the tongue, a highly muscular upgrowth from the floor of the mouth, reaches its highest development.

Moynihan Lord English surgeon. Berkeley George Andrew Moynihan was born in Malan, Oct 2, 1865 and, having trained as a doctor, began to practise in Leeds. He was appointed professor at the university there and made a great reputation. He served with the R.A.M.C. throughout the Great War, and in 1922 was made a baronet, becoming a baron in 1929. He has written several books on surgical subjects.

Mozambique District of Portuguese E. Africa. A small island, 3 m. from the coast, was named San Sebastian de Mozambique and became known by the latter part of the name. On this island the Portuguese founded a settlement in 1508, and this became the seaport of Mozambique. It has a harbour.

The name was extended from the island to the mainland, where a large district of Portuguese E. Africa is called Mozambique. This covers 297,657 sq. m. between Tanganyika and S. Africa, and contains the port of Lourenço Marques. It comprises 245,776 sq. m. of territory administered by the State and 51,881 sq. m. governed by the Mozambique Co., where is the port of Beira. Mozambique has railway connections with the interior of Africa, and produces sugar, maize and cotton. Pop 4,309,758.

Mozart Wolfgang Amadeus Chrysostom Austrian musician and composer. Born on Jan 27, 1756, he made his first professional European tour when six years old. After a period of financial difficulty he produced, with tremendous success, the *Marriage of Figaro* (1786) and in 1787 *Don Giovanni*, which was equally successful. He was appointed Kammer Musicus to the Emperor Joseph II, for whom he wrote *Così fan Tutti*. His financial difficulties continued and while making money for others his generosity and carelessness kept him poor. *The Magic Flute* was produced in 1791. He combines the richness and melody of the Italian school with a knowledge of harmony and instrumentation

gained by his strict training in the German school. He died on Dec 5, 1791.

Mucilage Name given to a viscous solution of a gum, occurring naturally in many seeds, tubers, stems and other plant tissues. Commercial mucilage, adhesive in character, is a solution of gum arabic, or of British gum, a form of dextrin. A mucilage of less adhesive power is made from gum tragacanth, and used in calico printing, pharmacy and the manufacture of oil emulsions. Another type of mucilage is the pectin, prepared from fruits and used in jelly and jam making.

Mucous Membrane Term applied in zoology to the membrane lining the stomach and other parts of the alimentary canal, bladder and various ducts of the body. It consists of a layer of loose connective tissue or submucosa over which is an epithelium containing glandular cells secreting mucus or digestive juices.

Mudfish Name given to certain fishes having the peculiar habit of burying themselves in the mud during a dry season. Among the ganoid fishes, the bowfin (*Amia calva*) of N. America can survive drought for a time by inhaling air into its swim-bladder. Several other mudfishes belong to the dipnoi or lung fishes, characterised by a lung like organ for air breathing, these are the protopetters of S. Africa and lepidosteids of Australian rivers.

Mudie Charles Edward English publisher and founder of Mudie's Lending Library. Born on Oct 18, 1818, the son of a second hand bookseller, he started a stationery and book-selling business in Bloomsbury, London, and in 1842 began to lend books. This innovation proved so successful that in 1852 he transferred his "select library" to larger premises in New Oxford St., and branches were also established elsewhere in 1860. In 1864 Mudie's became a limited company. He died on Oct 28, 1890.

Mudros Town and port of Lemnos. It is on the S. coast of the island and was used as a base by the British during the campaign in Gallipoli in 1915. Here on Oct 30, 1918, was signed the armistice between the allies and the Turks.

Muezzin Official in a Mohammedan mosque. He is appointed by the imam to proclaim from the platform of the minaret, or from the side of the mosque, the regular hours of prayer. These are at dawn, noon, 4 P.M., sunset and nightfall.

Mugwort Perennial composite herb indigenous to Europe, Asia and N. Africa (*Artemisia vulgaris*). Woolly aromatic, with erect, angled grooved reddish stems 2-4 ft. high, it has large alternate leaves, silky beneath and crowded sprays of small reddish yellow flower heads.

Muirkirk Town of Ayrshire, 26 m. from Ayr on the River Ayr. The chief industries are the mining of coal and iron ore.

Mukden City of Manchukuo, the capital of a province and an important trading centre. The city is surrounded by outer and inner walls and has a university. Pop 250,000.

Near Mukden in Feb. Mar. 1905 the Japanese gained a decisive victory over the Russians.

Mulatto Word, diminutive of mule, denoting in Spanish-America a half breed, the offspring of a white and a negro parent. The skin-colour and hair are usually intermediate. The offspring of a mulatto and a white is a quadroon (one-fourth black), that of a quadroon and a white an octoroon (one-eighth black).

Mulberry Genus of deciduous trees or shrubs, allied to the nettle order, natives of the N hemisphere (*Morus*). They have toothed leaves, often three-lobed and bear collective fruits each formed of many coalesced flowers. The black mulberry, of Persian origin, with purplish-black fruit, was cultivated in antiquity and reached Tudor England. The Chinese white mulberry, with white fruit, whose leaves silkworms prefer, grows extensively in Mediterranean lands. The N American red mulberry, 40-70 ft high, with red fruit, yields useful timber.

Mulch Gardening operation. It consists of placing material upon the soil for the purpose of protecting tender plants from frost, or preventing evaporation in hot weather, or of supplying nourishment to plants.

Mule Name given to the hybrid offspring of the union of a male ass and a mare, resulting in an animal of considerable strength and hardness. Mules are more suitable than horses for certain kinds of work, such as draught and pack work in arid or mountainous country. They are much used for army work. Large mules are usually the progeny of Spanish or French asses.

Mule Machine used in cotton spinning. It was invented by Samuel Crompton in 1779, its name being given because it was a cross between the spinning jenny of Hargreaves and the throstle of Arkwright. The mule was improved later by Richard Roberts, and in its modern form is self acting, functioning as an intermittent spinner and winder. Some mules are of considerable size carrying up to 1400 spindles borne on steel carriages. Mule spun yarn is even and regular, and of fine quality.

Mulheim City and river port of Germany, on the Ruhr, 16 m from Düsseldorf, and a centre of the coal and iron industries. There is a good harbour and many manufacturing establishments. Pop 127,400.

Another Mulheim is a town on the Rhine opposite Cologne. It is a large manufacturing centre with a good harbour in the river. Pop 51,000.

Mulhouse Town of Alsace, France, on the Ill, 56 m from Strasbourg. Also served by the Rhine-Rhône Canal, it is a manufacturing town, the industries including the production of textiles. Mulhouse was a free city from 1198 to 1797, when it was taken by France, and in 1871 was handed over to Germany. The French entered it in Aug. 1914, but were soon driven out. Pop (1931) 99,534.

Mull Island of Argyllshire, 7 m from Oban. It covers 351 sq m and is the second largest island of the Inner Hebrides. Tobermory is the chief town. The interior is mountainous, some peaks being over 3000 ft. high. The coast is very much indented. The inhabitants are engaged in grazing cattle. Pop 4000.

The Sound of Mull separates the island from the mainland. It is 20 m long and from 2 to 3 m wide.

Mullah Mohammedan word for a teacher or official. In Egypt and other Mohammedan countries it is used especially for one who administers the law. In India the word is used for a schoolmaster. In Somaliland leaders called "mad mullahs" have on several occasions raised rebellions.

Muller George. Preacher and philanthropist. Born near Halberstadt on Sept 27, 1805, he came to London in 1829, and became the minister of a nonconformist chapel at Teignmouth, where he abolished pews, gave up his own salary, and depended on voluntary gifts. In 1836 he founded an Orphan House at Ashley Down near Bristol, and in 20 years, through "prayer to God" and without appeals, had received £84,441 for the orphans. He wrote *The Lord's Dealings with George Muller*. He died on March 10, 1898.

Muller Hermann. German politician. He was born May 18 1876. A strong socialist, he was made editor of a socialist newspaper in Silesia, and in 1906 was chosen one of the leaders of the socialist party in Germany. In July, 1914, he visited Paris and Brussels in the interests of peace, but his efforts were futile, and he gave his support, somewhat reluctantly, to the war policy of Germany. He undertook the editorship of *Vorwärts*, and in 1917 was made an Under Secretary of State.

In June, 1919, when Germany was enraged by the terms of the peace treaty, he joined the Cabinet founded by Gustav Baner as Minister for Foreign Affairs and as such signed the treaty at Versailles. This made him very unpopular, but he held on his way and in 1920 was elected for the first time to the Reichstag. In Jan of that year he had succeeded Baner as Chancellor, and during the next few months he carried out hurriedly some important social reforms. In June, 1920, however, he was forced to resign, and for the next eight years he led the socialist party in the Reichstag. In May, 1928, he again became Chancellor, with Stresemann as his Foreign Secretary, and he remained in power until March 1930. He died March 20, 1931.

Muller Max. See MAX MÜLLER.

Mullet Name of two unrelated kinds of food fishes. Two forms of each occur on British coasts. Of red mullets (*Mullus*), the striped or surmullet, 6-16 in long, is commoner than the smaller plain red. Of grey mullets, (*Mugil*), the thin-lipped, 12-20 in long species, frequenting brackish estuaries, is commoner than the smaller thick-lipped.

Mulligatawny (Tamil, *mīlagu-tan-nar*, pepperwater). East Indian soup. Made with boiled meat or chicken and rice, it is highly seasoned, and contains sufficient curry powder to render it very hot to the palate.

Mullingar Market and county town of Co Westmeath, Ireland, on the River Brosna, 50 m from Dublin. The town has an agricultural trade, and horse and cattle fairs are held. Pop 4500.

Mullion Architectural term for the vertical division in a window, usually of stone or wood in England but sometimes of brick. It arose from the gradual reduction of the pier or piers between two

coupled lancet windows. The mansion is not seen in pure Renaissance architecture, but is chiefly late Gothic.

Mulready William Irish painter. He was born at Ennis on April 30, 1786, and later removed to London. He entered the Royal Academy in 1800, and found his most successful sphere in such subjects as "A Roadside Inn," "The Barber's Shop" and "Punch." His "Idle Boys" procured him his A.R.A. in 1815, and he was made R.A. in 1816. He is perhaps best known for his illustrations to the *Picar of Wakefield*. He died on July 7, 1863.

Mumbles Watling place of Glamorgan, on Swansea Bay, 202 m from London. Nearby are Mumbles Head and two small islands.

Mummy Dead body prepared for burial according to processes devised in ancient Egypt. To postpone natural decay, it was at first soaked in crude natron subsequently methods employing bitumen, spices, honey and drugs were introduced. From the 21st dynasty onwards, brain and entrails were removed, the body-cavities repacked, the whole ensnathed in smeared linen bandages inscribed with ritual texts and enlarded with amulets and talismanic statuettes in a mummy case. The practice extended to cats, crocodiles and other sacred animals. It ceased about A.D. 700.

Mumps Infectious fever with involvement of the parotid salivary glands.

The symptoms are pain and swelling of the glands under the ear, with feverishness and loss of appetite. The patient should be kept in bed on a liquid diet until the temperature is completely normal, and should be isolated for about three weeks. A doctor should always be called. Incubation period is 14 to 21 days.

Munchhausen Baron Von Gorman soldier and storyteller. Karl Friedlob Hieronymus Münchhausen was born in Hanover in May, 1720, and fought for the Russians against the Turks. He won a great reputation by the wonderful stories he told ostensibly about his warlike and other adventures, but largely the products of his imagination. These were collected, and in 1785 they were published in English as *Baron Münchhausen's Narrative of his Marvellous Travels and Campaigns in Russia*. He died in 1797.

Mundesley Village and holiday resort of Norfolk, 7 m from Cromer and 135½ from London. Pop 770.

Mungo Scottish saint, believed to have lived in the 6th century A.D. The patron saint of Glasgow, his name means in Gaelic "dear one." He is known more usually as Kentigern (q.v.).

Munich City and capital of Bavaria. Known to the Germans as München, it is situated on the Isar, and is the fourth largest city in the German republic. It is an important art centre, the Perla Rothen and the Glyptothek containing fine collections of paintings and sculpture.

The chief industry is brewing Munich beer being world famous while there are also manufactures of machinery and scientific instruments and wood-carving is much practised as a local craft. It has a broadcasting station (533 M, 1.5 kW). Pop 680,704.

Municipality Term used for a town or city, which is organ-

ised for self government under a municipal corporation. It is also used for the governing body. In Great Britain, a corporation consists of a mayor or provost, at the head, aldermen and councillors. By its seal, it acts as a person, and can sue and be sued, and it has powers to hold lands and to make by laws and enforce by penalties, as long as they are reasonable, and do not violate the charter.

Municipal Trading In some towns, as in Blackpool, where municipal enterprise provides amusement and Birmingham where there is a Municipal Bank, the Socialist idea of a municipal authority acting as a private enterprise is carried out, but mostly, the towns confine themselves to housing and town planning, water works, highways, electric light supply, sewers, tramways, elementary education, gas works, small holdings and parks, including tennis-courts and golf-courses.

Housing was undertaken, largely after Wheatley's Act of 1924, by the local authorities when the building was executed under the Joint Town Planning committees.

The water supply is in the hands of about two thirds of the public authorities and the electric supply, complicated by the appointment of the National Electricity Commission, and the Central Electricity Board, has only been undertaken by about half the local authorities.

Munitions Term applied to the materials used in warfare. It includes both guns and ammunition, while the development of trench warfare and the use of poisonous gases has widened the range of materials to include grenades, bombs, mortars, steel helmets, various chemicals, etc. In the Great War the production of munitions being on a large scale, a government department, the Ministry of Munitions, was created in 1915 to control production and co-ordinate the various industries concerned. For this purpose the metal, engineering and chemical industries were mobilised, and national factories set up with the result that production was increased with an economy of materials. The ministry came to an end on March 31, 1921.

Munster Province of Ireland. In the SW of the country, it is wholly within the Irish Free State. It contains six counties, Clare, Kerry, Cork, Tipperary, Limerick and Waterford, and covers 9300 sq m. At one time it was a separate kingdom, and was divided into Thomond, in the N and Desmond in the S.

The title of Earl of Munster is borne by the family of Fitzclarence. The 1st earl (created 1831) was a son of William IV and Dorothea Jordan.

Münster City of Westphalia on the Aa, 78 m from Cologne. The industries include the manufacture of textile goods and beer, printing works and sugar refineries. An event in the history of the city was the kingdom set up by the Anabaptists under John of Leiden in 1535. Pop 90,300.

Another Münster is a town of Alsace, in the Vosges district, 11 m from Colmar. Pop 6000.

Muntz Metal Widely used non-ferrous alloy of the group of brasses. Called also yellow metal it contains from 60 to 82 per cent. of copper and 40 to 38 per cent. of zinc. It is an alloy of high tensile strength, and resists corrosion well. Formerly used for sheathing ships, it is

employed now for propellers, and also for bowls, trays, etc.

Murat Joachim King of Naples Born on Nov 25, 1767, he distinguished himself as cavalry general under Napoleon by his fearlessness at the battle of the Pyramids, and later at Marengo, Friedland and Moscow. He was brother-in-law to Napoleon, who made him King of Naples in 1808. Murat abandoned Napoleon in 1814, to ally himself with Austria and England, but was himself abandoned later by his allies, and forced to flee his kingdom. Trying to recover it, he was captured and shot on Oct. 13, 1815.

Murcia City of Spain on the River Segura, in the S. of the country, 25 m. from Cartagena. It is a large manufacturing and trading centre. Near the city are the celebrated gardens of Almolia, where vines, mulberries, olives etc. grow in great profusion. Pop. (1931) 160,478.

Murcia was the name of a Moorish kingdom which existed in the 13th century.

Murillo Bartolomé Esteban Spanish painter Born at Sevilla in 1617, he studied under local painters and, struggling to earn a living by peddling pictures at fairs, he saved sufficient money to enable him to visit Madrid where he became a pupil for a time of Velasquez. He returned later to Sevilla and obtained commissions from the clergy, and developed his own style of painting. He interpreted religious subjects in homely realism understood by the people, but his work in general suffered from lack of restraint and selective power. A number of his pictures are in the Louvre, at Madrid, and the London Galleries. He died April 3, 1682.

Murman Name given to the coast of the Kola Peninsula. In the extreme N. of Russia, this lies between the Kola Bay and the White Sea, and is 200 m. long. On Kola Bay is the port of Murmansk, which is the terminus of a railway from Leningrad.

Early in 1918 a force composed of British, French and American troops occupied Murmansk and the neighbourhood, this being part of an operation that included the expedition to Archangel. During 1919 the troops gained possession of about 400 m. of the railway and, winning several successes over the Bolsheviks, advanced as far as Lake Onega. The enterprise, however, offered no prospect of permanent success and towards the end of the year the force was withdrawn.

Murray River of Australia, rising in the Australian Alps and flowing to the sea through Lake Alexandrina. At the mouth are sand-dunes which make the navigation of the river possible only for small vessels. The water of the Murray is used for irrigation purposes, being held up at the dune reservoir where the Milla falls into the Murray, so that it is available in the dry season. Improvements have also been made in its lower course to facilitate navigation. For the greater part of its course it forms the boundary between the states of New South Wales and Victoria. It is 1500 m. long, and its chief tributaries are the Darling and Murrumbidgee.

Murray Sir David Scottish painter Born at Glasgow, 1849, he was elected A.R.A. in 1891, and R.A. in 1905. In 1917 he was made President of the Royal Institution of Painters in Water Colours, and was knighted in the following year.

Among his finest pictures are "In the Country of Constable," "Young Wheat," "River Road," "Marigolds," "Hampshire" and "Gorse." He died in Nov., 1933.

Murray George Gilbert Aimé English scholar Born in Sydney, June 2, 1866, he had a remarkable career as a classical scholar at Oxford. He was made a fellow of New College, Oxford and in 1889 Professor of Greek at Glasgow. In 1908 he returned to Oxford as Professor of Greek. To scholars Murray is known as the author of *A History of Ancient Greek Literature*, *The Origin of Tragedy*, *The Rise of the Greek Epic* and other books and to a wider public for his translations of the plays of Euripides. He is one of the leading supporters of the League of Nations.

Murray Sir James Augustus Henry Scottish lexicographer, born at Denholm, Scotland, on Feb. 7, 1837. He founded his reputation as a philologist with *Dialects of the Southern Counties of Scotland* in 1873. His great work was the editing of the Philological Society's *New English Dictionary* which was begun at Mill Hill in 1879 and continued at Oxford with several successive joint-editors. He died on July 26, 1915.

Murren Pleasure resort of Switzerland, in the Bernese Oberland, 3 m. from Lauterbrunnen. It is 5000 ft. high, and is a good centre for the ascent of the Jungfrau and other peaks.

Murrumbidgee River of New South Wales, rising in the Australian Alps and flowing first N. and then W. to the Murray. Its length is 1350 m., for about 500 of which it is navigable. Its chief tributary is the Lachlan.

Muscat Seaport of Arabia, the chief port of Oman. It is on the Gulf of Oman, and from it some of the products of the country are exported. It was a Portuguese possession from 1508 to 1650. Pop. 20,000.

Muscatel General name for wines derived from muscat and similar grapes. Sometimes red, but mostly white with musky flavour and more or less sweet and elegant taste, they are produced in Languedoc and other French wine growing districts, on the slopes of Vesuvius, in Capri, Sicily, Crete, Switzerland, Australia, S. Africa and elsewhere.

Muscle Tissue in an animal's body concerned in the power of movement, and consisting of bundles of fibres, each fibre being a thin thread of muscle substance about $\frac{1}{16}$ inch in diameter and surrounded by a delicate sheath or sarcolemma. The muscle substance is probably of more or less fluid consistence, and has the special property of contractility on the application of a stimulus. Muscles controlled by the will are termed voluntary, others not under the will involuntary.

Muscovy Former name for Russia. The district around Moscow constituted the realm, until the time of Peter the Great. It was ruled by princes who became known later as tsars. See RUSSIA.

The Muscovy Duck is found in America. It nests in the trees and lives in marshy districts. The bird has been introduced into Britain.

Muse Goddess of song. Greek legend represented the Muses as nine in number, presiding over the different kinds of

poetry, arts and sciences. They were the daughters of Zeus and Mnemosyne and the companions of Apollo. The nine were Clio, the muse of history, represented with an open roll of paper or a chest of books, Erato, the muse of lyric poetry, represented with a lyre, Thalia, the muse of comedy and idyllic poetry, represented with a mask, a shepherd's staff or a wreath of ivy, Melpomene, the muse of tragedy, represented with a crook, the club of Hercules or a sword, with vine leaves on her head and wearing the citharus, Terpsichore, the muse of dance and song, represented with the lyre, Erato, the muse of erotic poetry, also with a lyre, Polymnia, the muse of the hymn, Urania, the muse of astronomy, represented with a staff pointing to a globe, and Calliope, the muse of epic poetry, represented with a tablet and stylus. Mount Helicon, with its sacred fountains, and Mount Parnassus were sacred to the muses.

Museum Building or part of a building appropriated as a repository for preserving and displaying objects of antiquity, science, natural history and art. The first great national museum was the British Museum, London, 1753, the Louvre Museum, Paris, was founded 1793. There now exist many important general collections, e.g., the Metropolitan Museum of New York, special collections, e.g., the Wellcome Historical Museum, London and open air museums, e.g., Skansen, Stockholm.

Mushroom Name indefinitely applied to several of the larger fungi especially if edible, although indistinguishable by any rough and ready means from non-edible forms. The common edible mushroom or agaric (*Psalliota campestris*), successfully cultivated especially in France, for more than 200 years, comprises a cylindrical stalk supporting an umbrella shaped cap, 3-5 in across with coloured gills beneath which ultimately blacken. Other recognisable edible fungi include the fairy ring champignon and the morel. A toadstool (*Amanita phalloides*) causes nine tenths of all deaths from so-called mushroom poisoning. See KITCHEN.

Music Melody of harmony, a tone or tones having any or all of the features of melody, rhythm or consonance. The first idea of music was that it was any art over which the muses presided, but after a time it was narrowed down by the exclusion of poetry, dancing and other arts, although music was still closely associated with them.

Among the Greeks music was generally subordinate to verse and was rather limited in the direction of expression, because the instruments used, chiefly lyre and flute, were simple. Nevertheless, it set up the diatonic scale or modes and the rudiments of key relationships. There had been music before the time of the Greeks, indeed, from the very beginning of human life but it was of the same simple kind. Among the Jews, however, as detailed in the Bible, the use of musical instruments seems to have been somewhat more advanced. Music played a great part in their religious and other ceremonies, as it did in the festivals of Greece.

Music owes much to the church and great advances were made in the art during the Middle Ages. The ecclesiastical modes were taken from the Greeks, and once to indicate the pitch of tones were invented and staff notation was developed. The tetra-chordal, or fourfold, unit was superseded by the hexa-

chordal or six fold, descendant, or simultaneous melody, was replaced by mensurable music and thence came counterpoint. Very elaborate settings for the mass and psalms were composed, especially by the great Italian masters culminating in Palestrina. Concomitantly in the 10th-16th centuries secular music was making great advances. It was the age of the minstrels, the troubadours and the minnesingers.

Modern music owes a vast debt to Bach, who was largely instrumental in developing polyphony. The establishment of the major and minor scales, with the octave as a unit, and of equal temperament, made modulation in any key possible, and so harmony was developed.

Since the time of Bach there have been great advances in both vocal and instrumental music. Vocal music has broadened out into the opera, oratorios and the lyric instrumental music has been aided by improvement in the instruments which gave scope for the superb productions of Haydn and especially of Beethoven. Other great masters are Mozart and Wagner in opera and Handel in oratorio.

With the 20th century, the outstanding development of music has been the widespread use of the gramophone and other mechanical devices for reproducing it and its transmission by wireless.

MUSIC AS A CAREER Though an overcrowded profession, music, which now comprises so many branches, still offers considerable scope for performers and teachers of real talent and personality. Success in either capacity, however, is by no means easy to achieve, and requires many years of training.

Orchestral players for broadcasting, theatres, cinemas, dancing, etc., should be steadily in demand, and have fixed rates of pay. Organists, with city or cinema appointments may obtain as much as £500 per annum, and whole time cathedral posts are worth about £300-£500 with a house as well as allowing opportunity for pupils to be taken.

The Royal Academy of Music and the Royal College of Music in London are the most famous centres of study for all branches of the profession, the fees being fourteen guineas a term at the former and twelve at the latter. Other well known training schools are the Royal Manchester College of Music, the Guildhall School, Trinity College, and London Academy of Music.

For Music Teachers, courses are provided at the Royal Academy of Music, York Gate, Marylebone Road, N.W.1, the Royal College of Music, Exhibition Road, S. Kensington, Trinity College of Music, Mandeville Place, W.1, and the Guildhall School of Music, John Carpenter Street, E.C.4. Courses are also provided at certain reputable institutions in the provinces.

Musk Perennial herb of the figwort order, native of Oregon (*Mimulus moschatus*). The nearly regular yellow flowers, diffuse hairy stems, and thin oblong leaves, exuding a musky odour, make it a favourite plant for window-boxes and hanging baskets. The name also denotes a native British musky smelling stork's bill, *Erodium moschatum*, with rose purple flowers. See MONKEY FLOWER.

Musk Strong-smelling substance secreted in a sac-like gland by the male musk deer. The animal is killed and the gland removed, the dried secretion being sent to market "in pod" or, after extraction, "in grain." The perfume is powerful and enduring.

Musk Deer Small ruminant inhabiting the mountains of Central Asia (*Moschus moschiferus*). Clumsily-built, 20 in high at the shoulder, the males have projecting sabre-like upper-jaw tusks 3 in long and bear an abdominal gland containing the perfume before-mentioned. The thick, coarse, brittle hair is greyish-white, the hind legs long, and the toes splayed. Neither sex bears antlers.

Musket Term employed for a firearm of the smoothbore type. It was used chiefly for arming infantry. Muskets were either matchlocks fired by applying a match to the powder, flintlocks, or breech loaders.

Musk Ox Arctic American bovine ruminant (*Oribos moschatus*). The male has wide flattened horns, and a long thick brownish coat, its flesh has a musky odour. It is now confined to N.E. Canada and Greenland, from 64° N lat to Grinnell Land.

Muslin Fine, plain-weave cotton fabric used for dresses, hangings, curtains, etc. Named from Mosul, Indian muslins were introduced into Stuart England, and still come from Madras and other famous centres. The invention of mule spinning developed a great industry in Lancashire, Scotland, Switzerland and N. America.

Musquash N. American rodent of the vole subfamily (*Fiber zibethicus*). It is also called musk rat, a musky smelling gland being present in both sexes. Stoutly built, 12 in long, with compressed 10 in tail, and partly-webbed hind feet, it is of amphibious habit. Its soft, velvet, dark-brown fur is extensively used by furriers.

Mussel Popular name for bivalve molluscs constituting large marine and freshwater families of world-wide distribution. The common sea-mussel of British coasts, *Mytilus edulis*, as well as being much prized for human food, is also a valuable bait for deep sea fishing. British freshwater mussels include the river-mussel and pearl-mussel, *Unio*, and the swan mussel, *Anodonta*.

Musselburgh Burgh and seaport of Midlothian, at the mouth of the Esk, 6 miles from Edinburgh. There is a harbour at Fisherrow for the fishing fleet, while an important industry is paper making. Home is Loretto School (q.v.). Pop (1931) 16,996.

Musset Alfred de, French romantic poet, author and playwright. Born on Dec 11 1810, he was admitted to the circle of French Romantics after leaving school, and published in 1830 with success his first poems, *Contes d'Espagne et d'Italie*. Extremely sensitive, his life was a series of emotional crises, the greatest of which came after his break with George Sand. As the result of his suffering at her unfaithfulness, he wrote his greatest lyric poems, *Les Nuits*, which mark the highest point in French lyric verse. He wrote also several successful light comedies, some of which are still produced. He died on May 2 1857.

Mussolini Benito, Italian statesman. Born at Varano di Costa, Doria, in the province of Forlì July 29, 1883, the son of a blacksmith, he attended an elementary school and later a boarding-school at Faenza, and gained a teacher's certificate at Forlìpopoli, after which he taught for a year at Guastalla, Reggio Emilia. He went to Switzerland in 1902, and while doing manual

labour, studied French at Lausanne University, read widely, made speeches, organised unions and strikes, and was expelled from one canton after another.

In 1905 he carried out his military service with the Bersaglieri. He founded the weekly paper, *La Lotta di Classe*, in 1910 at Forlì, and was imprisoned for his articles. He became secretary of the Socialist Society at Trent, and was banished for his "irredentism" in *Il Popolo*. He then became editor of the Milan social paper, *Avanti*. When war broke out he wished Italy to remain neutral, but was converted to the Allies' cause, and for this was expelled at a Socialist Congress at Milan in Nov. 1915. He founded the paper *Il Popolo d'Italia*, and, when Italy entered the War in 1915, volunteered as a private soldier in the Bersaglieri. He fought in the trenches until Feb. 22 1917, when he was seriously wounded by the explosion of a mortar.

The following September he again became editor of *Il Popolo*, now preaching against pacifism. The end of the war found Italy in such a state of disorder that Mussolini judged the time for his counter-revolution rapidly approaching, and on March 23, 1919, founded the Fascist Institution. (See FASCISM).

When the Fascists marched on Rome, Victor Emmanuel dismissed his Prime Minister, Facta, and invited Mussolini to enter Rome on Oct. 30, 1922. Since then Mussolini has been the dictator of Italy, holding the premiership, and at one time the ministries of Foreign Affairs, Interior, Colonies, War, Marine, Air and Labour.

Through the Fascist system Mussolini has put down all opposition, and led a united and re-vitalised Italy into the forefront of progress. Dissenters have been summarily dealt with and centralised methods of government, backed by extensive social legislation, have increased the material well-being of the country, while Fascist education has increased the national solidarity. He has encouraged excavation and research into the antiquities of Rome to inspire the nation with a sense of its glorious heritage, and an extensive scheme for rebuilding Rome was launched in 1932 as part of his policy.

No less remarkable was his achievement in 1929 of the treaty which finally settled the Roman Question, the Pope thereby becoming sovereign of the newly created state of the Vatican City. Subsequent differences with the Vatican were satisfactorily composed.

Mussolini's foreign policy has been directed to maintaining the influence of Italy in the Mediterranean and strengthening her position as a European power. In 1924 he negotiated a settlement with Yugoslavia in which the Italian claim to Fiume was recognised. In 1926 he placed Italian relations with Greece on a friendly footing, and vigorously supported the independence of Albania.

In 1933 he published *The Political and Social Doctrine of Fascism*, and became Minister of War. He signed a pact between Italy, Austria and Hungary in March, 1934, and urged on military preparations till by Aug. 1935, Italy had 1,000,000 men under arms, and all male Italians between 8 and 55 were to be considered as soldiers. After the Wal Wal incident in Nov. 1934, Mussolini's intentions in Abyssinia became plain, and in Oct. 1935 Italy was declared aggressor by the League of Nations and subjected to the operation of economic sanctions by 50 members.

Mustang Semi-wild horse of the American prairies. Descended from

European horses of 16th-century introduction, mustangs live in troops, are very hardy, and are often broken in for riding.

Mustard Name of several species of annual plants of the genus *Brassica*. They belong to the order *Cruciferae*, and are natives of Europe, Asia, and North Africa. The dark brown seeds of the black mustard, *B. nigra*, are ground with those of the white mustard, *B. alba*, with or without the addition of starches, to form the well known condiment.

Mustard Oil is an acrid pungent oil distilled from black mustard and used medicinally for external application.

Mustard gas is the name given to a noxious gas—dichlorodithyl sulphide—used in the Great War. It causes when inhaled, severe inflammation of the lungs.

Muswell Hill District of London, about 6 m. to the north of the city, and reached by the L.N.E.R. A residential area. It is outside the county, being in the Borough of Hornsey.

Mutation Term applied in the study of heredity to one of the types of variation which occurs in the offspring of both animals and plants. This type is known as discontinuous variation or mutation and is characterised by the appearance of new forms differing considerably from their parents and having no intermediate forms. According to some modern biologists, mutation is the basis of evolution affording a means by which the unfit are eliminated by natural selection.

Mweru Lake of Africa, 90 miles to the west of Lake Tanganyika, discovered by David Livingstone in 1867. It is 76 miles long, and the River Luapula falls into it, while around it is a marsh district which is a game preserve for the elephant. The lake belongs to Belgium and Rhodesia.

Mycenae Ancient Greek city in the Peloponnese. Here on a natural rock in N.E. Argolis, Bronze age immigrants developed a remarkable civilisation marked by Cretan fashions in art. After the fall of Crete this civilisation dominated the E. Mediterranean culminating in the dynasty to which Agamemnon belonged. The city was destroyed 468 B.C. Explored by French archaeologists, 1832, Schliemann 1876, and Wace, 1920-23, innumerable gold and silver ornaments, utensils, weapons and pottery objects have been revealed.

Myelitis Term applied to the inflammation of the spinal cord but used loosely for various spinal affections. True myelitis may arise from exposure to cold and wet, wounds or injuries to the cord or from infectious diseases. Paralysis of the limbs is followed by muscular atrophy and high fever, ending in death.

Mynyddislwyn Urban district of Monmouthshire. A colliery centre, it is 8 m. from Newport, and has chemical and tinplate manufactures. Pop. (1931) 16,201.

Myopia Condition of the eye resulting in shortsightedness. Weakness in the accommodating mechanism of the eye causes the visual focal point to be in front of the retina. The range of distinct vision therefore is nearer to the eye and distant objects appear indistinct—a defect remedied by the use of concave lenses.

Myrmidon In ancient Greece a Thesalian tribe who fought in the Trojan war under their leader, Achilles. Their fidelity and devotion to Achilles has made their name a symbolic term for one who gives a blind, unquestioning obedience to a superior.

Myrrh Gum resin, obtained as an exudation from the stem of a tree, *Balsamodendron myrrha*, growing in Arabia and Abyssinia. Myrrh is imported as irregular tears or reddish brown masses, having an aromatic odour and bitter taste. It is used medicinally as a tonic and also in mouth washes, gargles and tooth powders.

Myrtle Evergreen shrub of Asiatic origin, long naturalised in the Mediterranean region, and hardy in S.W. England (*Myrtus communis*). Its thick, shining opposite leaves and fragrant white flowers largely used in perfumery, yield an aromatic medicinal oil. The berries are used in cookery and turners esteem the hard, mottled wood.

Mysore Native state of S. India. It has an area of 29,483 sq. m. and is situated on the Deccan Plateau surrounded by British territory. It is ruled by a Hindu maharajah, under British protection. Coffee planting is the principal industry and gold is mined. Pop. (1931) 6,123,189. Mysore City is the capital with a population of 83,932, while Bangalore is another large town.

Mystery Secret rite. Early social and religious institutions affecting the emotional life of settled agricultural peoples, display widespread observances, perhaps derived from ceremonial dances in neolithic culture, still traceable in primitive survivals. They comprised the initiation of selected persons by processes of purification and sacrificial offering into a secret formula, and their presence at the revolution or commemoration of a dramatic event. The most renowned mysteries in ancient Greece were held each September at Eleusis, based upon the veneration of the corn goddess Demeter with whom the youthful Dionysus was afterwards associated. In the Graeco-Roman world Orphic, Mithraic, and other mysteries maintained a long rivalry with early Christianity. Medieval Christendom developed a type of religious drama or mystery collections of those performed at York, Coventry, Chester and Towneley survive. See MIRACLES PLAY.

Mysticism Mode of thought or feeling which seeks, in Dean Inge's words, to realise the immanence of the temporal in the eternal and the eternal in the temporal. Traces of it occur in many diverse religions, notably in theosophical Hinduism, Persian Sufism, and Platonism. It marks some N.T. writings particularly the Johannine and Pauline. Medieval mysticism is represented by such examples as Eckhart and S. Teresa. In Protestant thought Boehme influenced William Law, certain Quaker and Methodist tenets have mystical affinities.

Mythology Term denoting the sacred stories of a people or their study. Myths are primitive stories, perpetuated by oral tradition, subserving the purposes of religion and morality, and bringing home to the community what must be believed and obeyed. When there is an historic background they rank as legends.

N AAS Market town and urban district of Co Kildare, Irish Free State. It is 20 m from Dublin on the G S Rlys. Pop 3440.

Nabob Word used in India in the time of the Mogul Empire for high officials, and later for any person of rank. It had a temporary vogue in England in the 18th century.

Naboth Landowner in Jezreel whose vineyard, adjoining the royal palace, was coveted by Ahab, King of Israel. He was stoned on a false charge arranged by Jezrebel (1 Ki xxi). See JEZEBEL.

Nadir Term used in astronomy for that part of the heavens directly opposite to the zenith, or point of the heavens vertically above any place on the earth. The zenith and nadir, therefore, form the two poles, superior and inferior respectively, of the horizon.

The term nadir cup or basin is applied to the vessel of mercury attached to a meridian circle used for observing the nadir as the zero point for measuring declinations.

Naevus or Mole. Term applied to certain outgrowths of the skin, usually congenital and, therefore, sometimes called a "mother's mark." One form of naevus is due to an enlargement of the cutaneous blood vessels, and is known as a "port wine mark." Pigmented and hairy naevi may occur on various parts of the body.

Nagasaki Town and seaport of Japan, on the west side of Kiusiu Island. It has a magnificent harbour. For about 300 years it was the only port in Japan open for trade with Europe. The town has some engineering works and other industries, and there is a European quarter. Pop 204,626.

Nagpur City of India, the capital of the Central Provinces, 450 m from Bombay. The town has some manufactures. Pop (1931) 215,165.

Nahum One of the Old Testament minor prophets. A native of Elkosh, identified by Jerome in the 4th century A.D. with a Galilean village, but later with a locality near Nineveh where his alleged tomb is shown. His book predicts the fall of Nineveh, which occurred in 606 B.C.

Naiad In ancient Greek legend a female deity. Naiads were nymphs of rivers and springs. See NYMPH.

Nail Horny layer growing on the ends of fingers and toes. A thickening of the epidermis, it corresponds to claws and hoofs in other animals. Living on a nail-bed of sensitive skin, it forms near the root an opaque lunula. It grows continuously throughout life, being worn away or cut at the free end.

Nainsook (Hindu, *nain*, eye, *sukh*, delight). Thin muslin-like material of fine texture, with a specially soft finish. It is a variety of jaconet, and was originally made in India.

Nairn Burgh and watering place of Nairnshire. It stands on the Moray Firth and a little river of the same name, 15 m from Inverness. There is a harbour and some fishing. Nairn is the county town. The quarter

inhabited by the fisherfolk is called Fishertown. Pop (1932) 5282.

Nairnshire County of Scotland. It covers only 162 sq. m., and has a short coastline on the Moray Firth. Nairn is the county town; other places are Auldearn and Cawdor. The rivers are the Findhorn and the Nairn. The land is hilly and unfertile, and the chief industry is the rearing of sheep. Pop (1931) 8294.

Nairobi Capital of Kenya Colony, East Africa, on the Uganda Rly., 327 m from Mombasa. It stands on a plateau over 5000 ft high. The climate is excellent, and many Europeans visit the town as a starting point for expeditions into the colony. It has a broadcasting station (49.5 M). Pop 70,960.

Namaqualand District of South Africa. It is divided into two parts, Great and Little Namaqualand, which are separated by the Orange River. Great Namaqualand, part of the South-West Africa protectorate, is a desert region. Little Namaqualand is part of the Cape Province. The name is that of a Hottentot tribe, the Namaqua.

Name That by which a person or thing is denoted. The choice or bestowal of personal names is governed by social usage, and in primitive culture is often attended by measures designed to counteract their malvolent misuse. Nowadays one or more Christian or given names and a surname, usually the father's, are usual in Britain and elsewhere in Christendom. Under English law a woman on marriage takes her husband's surname. In Scotland, for all legal purposes, she usually retains her maiden name. Members of the British royal family sign their baptismal names only, peers of the United Kingdom only their surnames or peerage designations. See PLACE-NAME, SURNAME.

Namur City of Belgium, standing where the Sambre falls into the Meuse, 35 m from Brussels. A bridge across the Meuse leads to the suburb of Jambes. There are some manufactures. Pop (1931) 31,611.

Owing to its position Namur has long been a fortified place. In 1692 it was taken by the French and in 1695 by the English, after a long siege. It was fortified by the Belgians in the 19th century, and was regarded as almost impregnable. In 1914, however, the forts were quickly reduced by the Germans, who entered the town on August 25th.

Nanaimo Seaport and town of British Columbia, on the Island of Vancouver, 73 m from Victoria. It is a fishing centre, but is more important for its shipping. There is a good harbour.

Nancy Town in N.E. France. The capital of the Moselle-et-Moselle department, it has a population of (1931) 120,578, and was formerly the capital of Lorraine. The older quarter of the town is picturesque, the modern city has buildings and open streets. It is an important railway junction, and manufactures lace goods. During the World War, in August, 1914, its suburbs were invaded.

Nankeen Strong cotton fabric, originally made in China from native cotton of a yellowish drab tint. Nankeen, or

cotton twill is now manufactured in other countries from ordinary cotton and dyed to the requisite shade

Nanking Capital city and river port of China. It is on the Yangtze Kiang, about 200 m from the mouth. The industries include shipping and various manufactures. Nanking was at one time the capital of China, and in 1028 with the setting up of a national government, it replaced Peking as the nation's metropolis. Near is an avenue of gigantic statues, leading to the tombs of the Ming dynasty. Pop. (1931) 633,452.

Nansen Fridtjof Norwegian explorer. Born Oct. 10, 1861, after an arctic voyage in 1882, and the first crossing of Greenland in 1888, he attempted, unsuccessfully, in 1893 to reach the North Pole by letting his ship freeze in the ice and drift with a current setting towards Greenland. He wintered away from his ship, the *Fram*, at a latitude of 86° 14' North, only returning to civilisation in 1896. He was a professor of zoology at Christiania University, and a strong nationalist. He was Norwegian ambassador at London in 1906-08, when he returned to academic life, making several oceanographic expeditions. His relief work in the post-war famine in Russia and other work as high commissioner for refugees to the League of Nations earned him a Nobel Peace Prize in 1923. He was instrumental in securing the entry of Germany into the League. He wrote among other books *Exkimo Life in Northern Alaska and Russia* and *The Peace*. He was elected Lord Rector of St. Andrews in 1925. He died May 13, 1930.

Nantes Town in Western France. The capital of the department of Loire Inférieure, on the river Loire, it stands where the river divides into several branches, and has a population of (1931) 187,343.

It has played a prominent part in Breton history from the time of its commercial expansion under the Romans, and rivalled Rennes for the sovereignty of Brittany. Though, in feeling it has always been and Protestant, it was here that the Edict of Nantes was signed in 1598, giving religious freedom to the Huguenots.

Nantes possesses a large and important port on the Loire, as well as a great maritime port, both accessible to big ships. It exports slate and machinery, pit props and soaps, and imports coal, petroleum, sugar and grain.

Nantucket Island of Massachusetts. Its area is 48 sq. m., and the town of Nantucket is at the north end of the island. The light from Nantucket light house is familiar to travellers approaching New York. The island was long the home port of the great whale fisheries.

Nantwich Market town and urban district of Cheshire. It stands on the Weaver, 161 m from London and 4 m. from Crewe. At one time Nantwich was a centre of the salt industry, but this no longer flourishes. There are brine baths. Clothing and shoes are made. Pop. (1932) 7132.

Nantyglo Market town of Monmouthshire part of the urban district of Nantyglo and Blaenau, 162 m. from London on the G.W. Rly. The chief occupations are in the coal mines and ironworks. Pop. (1931) 13,100.

Naomi Old Testament character portrayed in the Book of Ruth. With her husband Elimelech and their two sons, she went from Bethlehem Judah to Moab

in time of famine. Returning a childless widow, accompanied by her Moabitish daughter-in-law Ruth (qv) she reached Bethlehem, exclaiming to old friends "Call me not Naomi (pleasant) call me Mara (bitter)".

Nap (or Napoleon) Game of cards, of French origin. To each player, usually three to five, five cards are dealt from a full pack. Each plays for himself. The player calling the highest number of tricks proposed to be won leads, a declaration of five tricks being called "going nap". The trump suit is that of the declarer's first card played. On making his declaration, the player is paid by each of his opponents should he fail to make it; he must pay each of them the amount of his stake. If the player declaring Nap succeeds he usually receives double stakes.

Naphtali Israelitish tribe named after Jacob's younger son by Bilhah. Their territory lay in the mountainous district of upper Galilee.

Naphtha Term applied to derivatives either of petroleum coal tar, or wood. Petroleum naphtha, a product of the distillation of petroleum, has a specific gravity about 0.700 and is used as a solvent and cleaning material. Coal tar naphtha or light oil "is the first product of coal tar distillation, and when refined is used under the name of solvent naphtha for dissolving rubber. Wood naphtha is a form of methyl alcohol (qv).

Naphthalene Solid white hydrocarbon which crystallises out from the "middle oils" formed in the distillation of coal tar. It occurs as glittering plates having a peculiar tarry odour, and is soluble in hot alcohol and also benzene. Naphthalene is used as an antiseptic for enriching water gas and coal gas, and it forms the basic substance for a large number of important intermediate dyestuffs by nitration and sulphonation, the most important being α -Naphthol, β -Naphthol and phthalic acid.

Naphthol Alpha and Beta. Solid hydrocarbon derivatives of naphthalene, used as basic substances in the preparation of a large number of aniline dyestuffs. Alpha naphthol is employed in making Martius yellow for silks and wool, as well as brown dyes for soaps and spirit varnishes. Beta naphthol is of still greater importance in the manufacture of intermediates and dyestuffs.

Napier Town and seaport of North Island, New Zealand. Standing on Hawke's Bay, 200 m from Wellington there is a good harbour from which wool and meat are exported. Napier was seriously damaged by earthquake in 1931. Pop. (1932) 19,300.

Napier John Scottish mathematician. Born at Edinburgh in 1550. In 1593 he published his *Plain Discovery of the whole Revelation of Saint John*. He devised warlike machines for use against Philip of Spain, and recommended salt as a fertiliser of the land. He described his famous invention of logarithms in *Munifici Logarithmorum Canonis Descriptio* (1614) and the calculating apparatus called *Napier's Bones* in another Latin work in 1617. He died April 4, 1617.

Napier Celebrated Scottish family. Sir Charles Napier, British admiral, was born March 6, 1786, near Falkirk. He took part in the capture of the West Indies, 1806-08. After commanding the Portuguese fleet, and winning the title Count Cape St. Vincent, he stormed Sidon in the Syrian War of 1840, and

In 1854 was commander-in-chief in the Baltic against Russia. He was M.P. for Marylebone 1842-46, and for Southwark, 1855-60. He died Nov. 6, 1860.

His uncle, Sir Charles James Napier, British general and statesman, was born in London, Aug. 10, 1782. He served in the Irish rebellion of 1798, in Denmark, and at Corunna. He took part in the Chesapeake expedition, and became Governor of Cephalonia in 1822. In 1841 Napier went to India and subdued the rulers of Sind by his victory of Meeanee. He died Aug. 29, 1853.

His brother, Sir William Francis Patrick Napier, British soldier and military historian, was born near Dublin, Dec. 17, 1785. He fought in Denmark in 1807 and the Peninsula 1808. He wrote *History of the War of the Pyrenees*, (6 vols., 1828-40), and *History of the Conquest of Scinde* (1845), among other books. He died Feb. 12, 1860.

Napier of Magdala. Robert Cornelius Napier, 1st Baron. British field-marshal. Born at Colombo, Ceylon, Dec. 6, 1810, he distinguished himself in the two Sikh wars, was present at the relief of Lucknow, and later defeated Tantia Topi on the plains of Jaora Allpur in 1858. He served for a time in China, taking part in the entry into Peking, and in 1868 he commanded the Abyssinian expedition, and was given a peerage as a reward for his brilliant storming of Magdala. He was afterwards successively Chief of the Forces in India, Governor of Gibraltar, and Constable of the Tower. He was made Field-marshal in 1883, and died Jan. 14, 1890.

Naples City and seaport of Italy. It is beautifully situated on the Bay of Naples, 135 m. from Rome, and has a fine anchorage. On the north-east shore of the bay are the sites of Herculaneum and Pompeii, overshadowed by Vesuvius (q.v.), and near are the Bay of Baiae, the Lucrine Lake and Lake Avernus. The islands of Ischia and Capri (q.v.) lie off the coast.

Built on volcanic slopes, Naples has many well-known streets and buildings, the former including the Toledo and the Corso Vittorio Emanuele, and the latter the Museo Nazionale containing the Farnese and other art treasures, the castle of S. Elmo (1537-46), the Castle Nuovo (1279-82), the royal palace, National Library, the cathedral of S. Januario (1294-1323), and over 230 churches. The new university buildings date from 1906.

The industries include silk, cotton, jute and wool manufactures, railway plant and automobile making, shipbuilding, etc. After the cholera epidemic of 1884 extensive slum-clearance was carried out, and the city was largely reconstructed. It has a broadcasting station (319 M., 15 kW). Pop. (1931) 839,390.

Founded by the Greeks, Naples remained Greek in culture under the Romans, suffered during the Gothic wars, and finally became independent in the 8th century. It remained independent till the 12th century, when it became the seat of the kingdom of Naples.

The Kingdom of Naples existed from the 12th to the mid-10th century, and was ruled in turn by the Hohenstaufens, the Angevins, and the kings of Aragon and Spain until it passed to Austria under Charles VI. In 1713, after Garibaldi's liberation of Italy, it became part of the Sardinian kingdom (1860).

Napoleon Eugene Louis Jean Joseph French prince, usually called

the Prince Imperial. Born March 16, 1856, he was the only son of Napoleon III and the Empress Eugénie, and left France with his parents in 1870. He was trained as a soldier, and went out with the British army to Zululand, where he was killed, June 1, 1879.

Napoleon French gold coin, first issued by Napoleon. It consisted of 20 francs, and was worth about 16s.

Napoleon I. Bonaparte. Emperor of the French. Born at Ajaccio in Corsica, Aug. 15, 1769, and educated at military schools in Brienne and Paris, he soon rose to fame as an artillery officer of the new French Republic and in 1796 was in command of the French army in Italy. A series of spectacular victories made him the idol of France. After a brief campaign in Egypt he returned, and by the *coup d'état* of 18 Brumaire (9th Nov. 1799), made himself First Consul under a new constitution which gave him autocratic power.

His ambition now knew no limits, and he contrived to make himself Consul for life in 1802 after another successful Italian campaign. In 1804 he became Emperor as Napoleon I. Then followed a period of despotic government at home, with an almost constant succession of campaigns abroad.

He destroyed Austrian opposition at the battles of Jena and Austerlitz, threatened England with invasion from Boulogne and defeated the Russians at Eylau and Friedland, but his ambition then led him into adventures which brought about his downfall, beginning with the unsatisfactory campaign in Spain, and later the disastrous march into Russia and the retreat from Moscow (1812). The end came with the battle of Leipzig (the "Battle of the Nations") and the invasion of France by the allies, which resulted in the abdication of Napoleon (1814) and his exile to Elba.

On Feb. 26, 1815, he made one desperate effort, returned to France, and was decisively beaten at Waterloo on June 16, 1815. Surrendering to the British, he was exiled to St. Helena, where he died May 5, 1821.

He was married first to Josephine Tascher de la Pagerie, whom he divorced in 1809 in favour of Marie Louise of Austria.

"The greatest adventurer in the world," his genius showed itself not only on the battlefield, but in his detailed reorganisation of France, much of which still remains.

Napoleon III. Charles Louis Napoleon Bonaparte. Emperor of the French, nephew of Napoleon I. Born April 20, 1808, the son of Louis Bonaparte, King of Holland, he made two unsuccessful attempts to displace Louis Philippe and the Bourbons, and restore the Napoleonic dynasty (1836 and 1840). After the Revolution of 1848 he accepted the Republic and was elected President. In 1851, by a *coup d'état*, he dissolved the Constitution, and in the following year became Emperor. He carried out a policy of administrative centralisation and remodelled Paris.

His foreign policy was unsuccessful. Though he gained glory for France by his participation in the Crimean War, his support of the disastrous attempt to make Maximilian of Habsburg Emperor of Mexico and his intervention in Italy on behalf of unification alienated various sections of French opinion. The Franco-Prussian War, into which he was drawn by Bismarck, resulted in the total defeat of the French and the collapse of the Second

Empire. The Emperor sought refuge in England, where he died Jan. 9, 1878.

Napoleonite Alternative name for ball-diorite, an igneous rock found in Corsica and composed of an aggregate of spherical masses of radially and concentrically arranged feldspar and hornblende.

Narcissus Genus of bulbous herbs of the amaryllis order, natives of central Europe and the Mediterranean region, one species extends eastward to Japan. The special feature of the tubular perianth is the cup springing from the base of the flower-segments. Various species have furnished hundreds of cultivated and hybridised forms, sometimes double-flowered, often fragrant, including polyanthus or bunch flowered and pheasant-eye types. These present innumerable variations of size, and white or yellow colouring, sometimes with a scarlet-edged or frilled corona (q v) See DAFFODIL, JONQUIL.

Narcissus In Greek mythology, a beautiful youth, son of the river-god, Cephissus, beloved by the nymph Echo. He ignored her passion so that she pined away in grief, while he, seeing his own reflection in a fountain, became so enamoured of it that he too pined away, changing into the flower bearing his name.

Narcotics Name applied to drugs such as opium, chloral, cocaine, etc., which have a sedative effect and are therefore of value in relieving pain.

Nares Owen Ramsey English actor. Born Aug. 11, 1888, he trained with Miss Rosina Filippa, and first appeared in *Her Father*, at the Haymarket Theatre, in 1909. After touring provincially for two years, he played in London for eleven. In 1926 he toured in S. Africa. His best known parts have been Julian Beauchamp in *Diplomacy*, Philip in *The Boy Comes Home*, Peter Beavans in *The Charm School*, Mark Sabre in *If Winter Comes*, and Cary Linton in *Two White Arms*. In 1935 he appeared in *YOUTH at the Helm* and *Call it a Day* at the Globe Theatre.

Nares Sir George Strong English explorer. Born in 1831, he entered the navy in 1846, and as mate of the *Resolute*, sailed on the Arctic Expedition of 1852. After service in the Crimea he was in command of the *Challenger*, in her world voyage of deep sea exploration. He commanded the Arctic Expedition in the *Discovery* and the *Alert* in 1875, and in 1878 surveyed the Magellan Strait. He was promoted Vice Admiral in 1892, and died Jan. 15, 1915.

Narwhal Scandinavian name of a cetacean of the dolphin family, inhabiting the Arctic regions (*Monodon monoceros*). It is also called sea-unicorn. The male possesses a tapering tusk, spirally grooved, sometimes as much as 8 ft. long. This projects horizontally forwards, usually from the left upper jaw, the corresponding right tooth sometimes develops also. It is of compact ivory, with a central cavity. In colour it is black grey above, white beneath, and frequents polar seas, usually in schools of 15-30.

Naseby Village of Northamptonshire. It is 7 m. from Market Harborough, and is famous for the battle fought here on June 14, 1645. Charles I., with an army, was marching towards Leicester pursued by his enemies. He waited for them at Naseby, and won an initial success. Cromwell's men, however, turned the scale, and in the end the

Royalists were routed. Charles escaped to Leicester, but his private papers were captured, as well as a large number of his men. An obelisk marks the site of the encounter.

Nash Paul. British painter. Born in London, May 11, 1889, he was educated at St Paul's School and the Slade School. He held his first exhibition in 1911, but it was not until 1918, when his work as an official war artist (1917-18) was shown, that he attracted attention. He developed charm and individuality as a landscape painter, and held an important exhibition in London in 1924. He also produced woodcuts, and book illustrations, of which the series of wood-engravings, "Genesis" (1924), are the most important.

Nash Richard English dandy, known as Beau Nash. Born at Swansea, Oct. 18, 1674, he entered the army, and in 1693 the Middle Temple, but forsook the law for society. He made a precarious living by gambling, but in 1704 was made master of ceremonies at Bath. He conducted the public balls with a sumptuous splendour, and gained great prestige. He died in poverty at Bath, Feb. 3, 1762.

Nash Thomas English dramatist and satirist. Nash, who was called by Lowell "The English Rabelais," was born in 1667. He wrote amongst other works, *Pierce Penniless*, his *Supplication to the Devil* (1692), full of keen satire and mainly autobiographical. Other works were *The Terrors of the Night*, *The Unfortunate Traveller* and *The Isle of Dogs*, which was at once suppressed and is now lost. He completed Marlowe's unfinished tragedy, *Dido*. He died in 1691.

Nashville City and capital of Tennessee, on the Cumberland River, 185 m. from Louisville. In Centennial Park is a replica of the Parthenon at Athens. It has a great trade in cotton, lumber, and tobacco, while there are also printing works and textile mills. Pop. 163,900.

Near Nashville, on Dec. 15-16, 1864, there was a great battle during the American Civil War. The Confederates, or Southerners, were utterly defeated by the Federals in possession.

Nasmith James Scottish engineer. Born at Edinburgh, Aug. 19, 1808, he started business in Manchester in 1834, and was soon head of the Bridgewater foundry at Patricroft, from which he retired with a fortune in 1866. He invented the steam hammer in 1839, to forge large paddle-wheel shafts for steamships, also many other appliances, among them a planing machine (*The Nasmith Steam-Arm*). He died May 7, 1880.

Nasturtium (1) Genus of British and temperate cruciferous herbs, called watercress (q v). (2) Popular name for a genus of S. American herbs of the geranium order, *Tropaeolum*.

Natal Province of the Union of South Africa. It lies between the Indian Ocean and the Drakenberg Mts., N.E. of Cape Province, and has an area (including Zululand) of 35,984 sq. m. Pietermaritzburg is the capital, and Durban the principal port. The province is rich in minerals, of which the most important are coal and iron. Gold is also found, and marble is quarried. There is considerable trade in timber, while coffee and sugar are grown, and cattle and horses reared. The name was given to it because it was discovered on Christmas Day, 1497, by Vasco da Gama. The white population (1931) was 177,224, and there are about 1,300,000 blacks.

Nathanael One of Jesus Christ's first disciples. Belonging to Cana of Galilee, he was introduced to our Lord by Philip (John i). He is variously identified with Bartholomew and others.

National Anthem Term used for the official song of a nation. *God save the King*, the British national anthem, is attributed to Henry Carey and also to John Bull, but its exact authorship is doubtful. Among other national anthems are the French, *La Marseillaise*, the Belgian, *La Brabançonne*, and the Canadian, *The Maple Leaf for ever*. The U.S.A., though without an official national anthem, have *Hail Columbia*, and *The Star Spangled Banner*, for popular use.

National Debt Phrase used for money owing by a state in its collective capacity. Most of it consists of money borrowed to carry on war. Almost every country in the world has a national debt, and during the financial crises of 1931-32 several found it impossible to meet the interest payments thereon. The Dominions of the British Empire have each a national debt.

In Great Britain the national debt, as distinct from the liabilities of the king, originated in the time of William III. The amount was greatly increased during the 18th century, and in 1785 it amounted to £244,000,000. A good deal was borrowed to finance the war against France, and in 1816 it had reached £858,000,000.

During the rest of the 19th century, except for the short period of the Crimean War, the debt was steadily reduced in amount until in 1899 the total was only £635,000,000. The South African War, however, added another £150,000,000, and in 1914 the total was £706,000,000. The Great War increased enormously the amount of the debt, and in 1920 it amounted to nearly £8,000,000,000, much of which had been borrowed at 5 per cent. interest. Attempts were made to reduce the total, but on the whole they were not very successful, and in March, 1934, the total amount owing was £8,030,400,000.

This debt is divided into external and internal. The external debt amounts to £1,066,660,000, chiefly owing to the United States. The internal debt is divided into funded and unfunded debt. The total funded debt in 1934 consisted chiefly of consols and a 3½ per cent conversion loan, and amounted to £3,374,300,000. The bulk of the debt is therefore unfunded. It includes the 3½ per cent war loan of £2,087,000,000, the 4½ per cent conversion loan, victory bonds, savings certificates, treasury bonds and treasury bills. The 3½ per cent war loan was a 5 per cent. loan until 1932, when a successful conversion scheme was carried out. Of the total amount about £500,000,000 is held by the Post Office Savings Bank on account of depositors, and about £750,000,000 by departments of state.

On the other hand there are assets which may be set off against the enormous total of the national debt. Nominally these are worth £2,445,500,000, nearly half consisting of debt owing by Russia. The remainder is owed by the Dominions and foreign countries, and there are certain other assets such as the shares in the Suez Canal and the Anglo-Persian Oil Co. The interest on the national debt, and the cost of managing it, together with the New Sinking Fund, amounted in 1933-34 to £224,000,000. To meet these payments, and also to reduce the amount, an annual sum of

£360,000,000 is set aside, so that there is about £66,000,000 for repayment, this sum being known as the sinking fund. There is also a national debt redemption fund, which receives donations and legacies for the same purpose.

National Gallery A collection of pictures belonging to the state, but particularly the one in Trafalgar Square, London. This dates from 1824, and the building from 1838, the latter has been enlarged several times. It contains a wonderful collection of paintings, nearly all the great masters being represented. It is under trustees and a director, and is open free, except on Thursday and Friday, when a small charge is made.

Connected with it is the National Gallery at Millbank, founded by Sir Henry Tate and usually called the Tate Gallery (*see* TATE, SIR HENRY). It was opened in 1897 and is chiefly used for British pictures, although it has a foreign gallery. It contains a fine collection of the works of Turner, and a special gallery for those of Sargent presented by Sir Joseph Duveen.

The National Portrait Gallery adjoins the National Gallery in Trafalgar Square. It was opened in 1896 and has since been enlarged. There is a National Gallery of Scotland at the Mound, Edinburgh, and a Scottish National Portrait Gallery in Queen Street, Edinburgh. Other great national galleries are the Prado in Madrid and the Louvre in Paris.

Nationalisation Acquisition by the state of land or any other public utility, usually by purchase. In Canada and Sweden some or all of the railways have been nationalised. The nationalisation of the land has been proposed in Great Britain, and a society exists to forward the idea, while the nationalisation of the coal mines and the railways has also been suggested. Nationalisation has been extensively carried out in Russia under the Soviet, but in other countries it has been confined to public utilities, such as telegraphs and telephones.

National Mark In Great Britain a mark placed on certain articles of food to show that such are produced at home. The scheme was introduced in 1928 and is used for beef, flour, eggs, apples and other articles of food. *See* GRADING.

National Trust Society for preserving places of historic interest and natural beauty. It dates from 1895, and now holds a great deal of land and a number of buildings all over the country, some having been given to it and some purchased by subscription. The property held by the trust includes a large area of Exmoor, Minchinhampton Common and several castles. The acquisitions in 1931 include Frankley Beeches, near Birmingham, Haresfield Beacon, Longshaw Moor, near Sheffield, and land in the New Forest. The offices are at 7 Buckingham Palace Gardens, London, S.W. 1.

Nativity Name of several Christian festivals. For Christ's Nativity, commemorated on Dec. 25 *see* CHRISTMAS. The Nativity of the Virgin Mary on Sept. 8, established in Rome in the 7th century, was adopted by the Eastern Church in the 12th. The Nativity of John the Baptist, on June 24, dates from the 5th century.

Our Lord's birth has been commemorated in art throughout the ages, nativity plays occurred in early mediaeval drama.

Natrolite Fibrous mineral belonging to the zeolite group and found in

basalts, usually in cavities, as beautiful tufts of white, transparent acicular crystals or in more massive form and as slender prisms. It is a hydrated silicate of alumina and soda and is so fusible as to be melted in a candle flame.

Natron Natural form of sodium carbonate, occurring usually in white or greyish efflorescent incrustations near certain lakes in Egypt, in Konya Colony (Lake Magadi), and in British Columbia, having crystallised out from a concentrated brine. In some instances the carbonate is mixed with the bicarbonate, as in the trona of certain Californian lakes.

Natterjack Toad indigenous to W. Europe (*Bufo calamita*). Found in parts of England, Scotland and Ireland, it is smaller than the common toad, with shortened hind limbs short and nearly webbed toes, and a yellow line along the back. The male has a vocal throat sac which, when distended, is larger than the head.

Natural Gas Name given to various gaseous hydrocarbons occurring in rocks of varied geological age in Canada, the United States and elsewhere due to the natural destructive distillation of carbonaceous rocks. Accumulations of the gas are, in America, tapped by deep borings and collected for purposes of illumination and heating. Carbon black, used extensively in the manufacture of printing ink, paints, gramophone records, etc., also is obtained by the incomplete combustion of natural gas in special furnaces.

Natural History Term once used for the study of nature generally but later confined to zoology. The Natural History Museum, opened in 1881, is in Cromwell Road, South Kensington, London, S.W. 7, and is a branch of the British Museum. It contains botanical, geological, mineralogical, zoological and other collections.

Nature Word of manifold senses derived from its original meaning of birth or origin. It may denote the metaphysical principle of life, or the forces and processes of the material world, often personified, and regarded as the agency through which the Creator works. Again it may denote the essential constitution or quality of a being or thing, its original uncultivated condition, or its innate character or disposition.

Nature-study is a modern educational method of bringing children into sympathetic contact with common natural objects. By stimulating the powers of observation it forms an invaluable foundation of scientific knowledge.

Nature-worship Ritual expression of reverence for physical phenomena deemed capable of affecting human life. In some stages of primitive culture these phenomena—rivers, mountains, animals, plants, storm, thunder, moon and sun etc.—are variously deemed to be animated by powers akin to man's, or to be the abode of supernatural beings amenable to control by spell or to propitiation by prayer.

Naucratis Ancient Greek settlement in Lower Egypt. Midway between Cairo and Alexandria, it monopolised Greek trade in Egypt from Achaemenes II. to the Persian invasion 520 B.C. Ptolemy (1885) 6 and later excavations revealed much local and imported pottery and the remains of fort sanctuaries.

Nausicaa In Greek fable, daughter of Alcinoos, King of the Phae-

acians, whose court was on the Island of Scheria (perhaps Corfu). Homer describes how the shipwrecked Ulysses found her on the shore playing ball with her maidens, and was led by her to the king, to whom he related his adventures.

Nautch Girl Indian professional ballet dancer. Many are attached to Hindu temples, performing sacred dances in bejewelled dresses before the gods, although private secular dances alone are strictly called nautches. Moslem nautch girls engage solely in secular dances, as on the festival evening terminating the Ramadan fast.

Nautilus Genus of cephalopods or head-footed molluscs which produced in remote geological ages ammonites and other remarkable fossil forms. The spiral shell is divided by thin walls or septa into a series of chambers, of which only the outermost is occupied. Of the three or four species confined to Indo-Pacific waters, the best-known is the pearly nautilus. The female of the two-gilled argonaut, making a temporary shell cradle, was formerly called the paper nautilus. See CEPHALOPODA.

Naval Cadet Youth undergoing training for a commission in the Royal Navy. Cadets pass into the Royal Naval College, Dartmouth, when in their fourteenth year. After 3 years' training, if satisfactory, they are appointed to ships where, if still satisfactory, they become midshipmen (qv). A limited number of cadets may enter the College at the age of 17, direct from public schools, being transferred to ships after one year's training.

Naval Reserve Royal Unit of the British Navy. Formed in 1853, it consists of officers and men enrolled from the mercantile marine and fishing fleets and called up to serve with the navy in times of national emergency. The Royal Naval Volunteer Reserve, formed in 1902, affords facilities for using the services of yachtmen and others not connected with organised maritime work at similar times. The Royal Fleet Reserve consists of those who have already served in the navy.

Navan Market town and urban district of Co. Meath, Irish Free State, 30 m. from Dublin on the G.S. Rlys. Here the Blackwater falls into the Boyne. The town is an agricultural centre. Pop. (1926) 3650.

Navarino Seaport of Greece now called Pylos. Here, on Oct. 20, 1827, a combined British and French fleet so decisively destroyed the ships supporting an army that the Turks had landed, that the battle ended the attempt of Turkey to prevent Greece from securing her freedom.

Navarre Formerly a kingdom between France and Spain, in the west of both countries with a coastline on the Bay of Biscay. It arose in the 11th century and, after 1284, was ruled by the kings of France, who secured it by the marriage of Philip IV. with its heiress. In 1316 the two were again separated, and Navarre had a queen, the daughter of Louis X. After being connected with Aragon Navarre came to another queen, Catherine de Foix, the grandmother of that Henry who became King of Navarre and later, in 1589, King of France as Henry IV. This once more united Navarre with France, except for a portion which had previously been included in Spain.

Nave Architectural term for the central and largest part of a church. The nave in many cathedral and monastic churches included the choir at the east end, though in later buildings the choir was cut off by a screen from the nave. The clorestory, or upper part of the wall of the nave, was pierced with windows.

Navigation Term applied to the art of sailing or directing a ship on its course from one port to another. For this purpose charts for determining the course, and plotting the position of the vessel at any given point, are necessary, as well as the mariner's compass for taking bearings.

From the time of Cromwell onwards a number of laws known as the Navigation Acts were made for the regulation of shipping and the fostering of British trade. These acts increased the prices of imported goods and led to the early wars with the Dutch, and were repealed in 1849.

Navy Ships and personnel of a nation, used for purposes of war. Early navies were built less for war than for commerce, though fighting craft were specially designed by the Phoenicians, Athenians, Carthaginians, Romans, Norsemen and others. The first English navy was built by Alfred the Great to fight the Danes, while the Normans requisitioned ships from coastal towns and counties. Later the navy was maintained entirely by the state. Under Henry VIII and the Stuarts the navy was greatly improved, but received little further impetus till the time of Nelson (q.v.).

Marked improvements are comparatively modern—the introduction of iron, first as a protection and, about 1860, for constructional purposes and later replaced by steel, and the introduction of steam propulsion. The development of the water-tube boiler, oil fuel, turbine electric and hydraulic power have revolutionised shipbuilding, of which full advantage has been taken in the navy. The introduction of submarines and aircraft added considerably to the range of naval activities, while refrigeration, wireless, range-finders and many other scientific devices have helped to maintain efficiency and to improve conditions on the ships.

THE NAVY AS A CAREER The commissioned ranks in the Royal Navy and Royal Marines may be divided as follows:

(1) Executive and Engineer Officers in R.N. —Entry is through R.N. College, Dartmouth, at the approximate age of 13½, or through H.M.S. *Erebus* between ages of 17½ and 18½. The period spent at Dartmouth is approximately four years and one year in H.M.S. *Erebus*. Fees at Dartmouth are £150 a year, with reduced rates of £40, £70, and £100 a year in selected cases. No fees are payable for training in H.M.S. *Erebus*.

Pay ranges from about £90 a year as Midshipman to about £1100 a year as Captain or Engineer Captain, plus allowances. Higher rates are paid to officers on the Flag List.

(2) Accountant Officers in the R.N. Entry as Paymaster Cadets between the ages of 17 and 18. Pay ranges from about £90 a year as Paymaster Midshipman to about £1400 a year as Paymaster Rear-Admiral plus allowances.

(3) Commissioned Officers in the R.M. Entry between the ages of 18 and 19. Pay ranges from about £135 a year as Probationary Second Lieutenant to £1100 as Colonel plus allowances. Higher rates are paid to Officers on the General List.

Candidates entered under these systems must

satisfy an Interview Committee and pass the prescribed educational and medical examinations. Full particulars as to entry may be obtained from the Secretary, the Admiralty, Whitehall, London S.W. 1.

The R.N. or R.M. offers an attractive life to an active man, good pay and conditions, and a pension on retirement.

Navy Board Organisation formerly existing to manage the English navy. It was set up in the time of Henry VIII and remained in existence until 1832 when it was abolished. It was one of several departments responsible for managing the navy. Samuel Pepys was its secretary. At that time the office was in Seething Lane, London, E.C.

Naxos Island of Greece. Covering 175 sq. m., it is the largest of the Cyclades. Naxos, a seaport on the west coast is the capital. Vines grow freely, although the land is mountainous, and the island is also famous for its marble. In ancient times it was a centre for the worship of Bacchus. Pop. 15,000.

Nazareth Town of Palestine, situated in a hollow of the hills bordering the plain of Esdraelon, midway between the Mediterranean and the Sea of Galilee. Its association with Christ's early life made it a place of pilgrimage from early times.

Nazarites (or Nazirites). Name meaning "separated" and denoting certain Jews under a personal vow. This included abstinence from wine and strong drink, from cutting of the hair and from contact with the dead. It might be temporary, for a month or more, or lifelong, e.g., Samson, and John the Baptist. Regulations are prescribed in Numbers vi.

Naze The Cape of England. It is in Essex, 5 m. from Harwich and is a prominent landmark.

Nazi Shortened form of National Socialist Party, the party which under Adolf Hitler has gained supreme control in Germany. Its aims are similar to those of the Fascists in Italy, and its rule has had far-reaching effects. (See HITLER).

Neagh Lake or lough of Ireland. The largest lake in the British Islands, it covers 153 sq. m. It lies between the counties of Armagh, Londonderry, Down, Tyrone and Antrim, and is noted for its fish.

Neanderthal Man Extinct palaeolithic race. With heavy brow-ridges and receding forehead they inhabited Pleistocene Europe during the Mousterian culture-period. Fossilised remains were found in the Neanderthal ravine near Düsseldorf, 1856. Similar remains have come from Belgium, France, Jersey, Malta, Galicia and Gibraltar. The race is generally considered to be unrelated ancestrally to modern or Aurignacian man.

Neasden District of Middlesex forming part of the urban district of Kingsbury, 5 m. from London, to the N.W. of the city. See KINGSBURY.

Neath Borough, market town and river port of Glamorganshire. It stands on the River Neath, 183 m. from London, by the G.W. Rly. The chief industry is smelting, and there are tinplate and chemical works. Pop. (1931) 33,322.

Neat's Foot Oil Oil prepared by boiling the feet of oxen, sheep and horses, and used as a lubricant for delicate machinery and in the dressing of leather.

Nebraska State of the United States. In the centre of the country, it is an agricultural area, producing great quantities of maize, wheat, oats and fruit. Its area is 77,510 sq m. Lincoln is the capital but there are no very populous cities. It is governed by a legislature of two houses and sends two senators and five representatives to Congress. Pop (1930) 1,377,963.

Nebuchadnezzar (or Nebuchadrezzar) Name of three Babylonian kings. Nebuchadnezzar II, Nabopolassar's son, reigned 604-561 B.C., having as crown prince defeated Pharaoh Necho at Carchemish. He took Jerusalem, carrying many Jews into captivity, 586 B.C., besides capturing Tyre after 12 years' siege, and invading Egypt. He carried out much temple and civic building at Babylon, Ur and elsewhere.

Nebula Astronomical term for cloudy or misty patches in the heavens which are unresolved by powerful telescopes into stars or star-clusters. Many of the so-called nebulae of early observers have been shown by the aid of photography to be globular clusters of stars, but others are found to be composed of gases of very feeble density. Nebulae may be divided into two classes, regular and irregular, the former consisting of luminous and dark nebulae, the latter of planetary, spiral, and the globular and spindle nebulae. One of the best known examples is the Great Nebula in the constellation of Orion.

Nebulium Provisional name formerly given to a hypothetical substance supposed to exist in nebulae, and to be the cause of the greenish appearance they show when seen through a telescope, and of the presence of two bright lines in the green part of the spectrum. Recently, however, nebulium has been shown to be only ionised oxygen and nitrogen.

Neck That portion of an animal's body joining the head to the trunk and having in all mammals, with few exceptions, seven cervical vertebrae, whether the neck is long or short. The muscular covering consists chiefly of the sternomastoid and trapezius muscles. The carotid arteries and jugular veins are the chief blood vessels in this region and internally there is placed the oesophagus, trachea, larynx and the thyroid glands, the latter situated in the lower part of the neck.

Necker Jacques French financier. Born at Geneva Sept. 30, 1732, he became a banker in Paris. In 1777 he was made a director general of finance, but this was too late for him to save the country from bankruptcy. He published the famous *Compte Rendu* (Account Rendered) in 1781, and left office the same year. In 1788 after a period of exile, he was recalled, and on his advice the states general was brought together. Necker was again director general in 1790. He died in Switzerland, April 9, 1804.

Necromancy Divination by pretended conversation with a departed spirit. A professional sorcerer usually summons the spirit on the would-be consultant's behalf, as the witch of Endor did the spirit of Samuel for Saul (1 Sam. xxviii). Circe, in Homer's *Odyssey*, sent Ulysses to Hades to consult the dead seer Tiresias. Mediaeval Europe corrupted the word to nigromancy, as if denoting 'the black art' or sorcery in general. Necromancy still occurs in primitive cultures including negro and Bantu Africa and Melanesia.

Necropolis Greek word, "city of the dead," an ancient designation of an extensive cemetery in the suburbs of Alexandria, and now commonly used for any large burial ground found near an important centre of early civilisation. It also occasionally denotes a modern cemetery in actual use, e.g., the London Necropolis at Brookwood, near Woking.

Necrosis Term applied usually to the death of bony tissue. It is also used for the death of a circumscribed portion of any tissue, and is due to lack of nutrition of the part.

Nectar Term used by the Greeks for the drink of the gods. Supposed to give life and beauty, it was forbidden to mortals, as to drink it conferred immortality. The honey of flowers is poetically called nectar.

Nectarine Smooth skinned variety of peach (*q.v.*). The skin of the ripe fruit is shinier, tenderer, and generally more crimson tinted, the flesh is firmer. The method of culture is identical. No essential difference between the two exists, they sometimes grow side by side on the same tree, and peach-seeds will produce nectarines.

Needles Three rocks off the west coast of the Isle of Wight. On the outmost stands a lighthouse. They were part of the island until the intervening land was washed away early in the 19th century.

Needwood District of Staffordshire between Burton and Lichfield. It was once a royal forest and covers approximately 100 sq m. It was formerly full of deer and other wild animals. Most of it has been disforested but some parts remain woodland and the name is used. Much of the land belongs to the Duchy of Lancaster.

Negative In photography a term used for the plate or film on which a picture is developed with its lights and shades the reverse of what occurs in nature. Paper negatives were first used but were superseded by glass in the wet plate of the collodion process and the later dry plate, these in turn being largely displaced by the roll film.

Negligence Term used in law, meaning want of reasonable care. Those guilty of negligence are liable to be summoned before the courts and made to pay damages. Negligence occurs in connection with the driving of motor cars, the keeping of property in repair, failure to erect fences, etc. If any person is injured by negligence of this, or any other kind, he can, if he proves his case, recover damages. It is for the jury to say whether or no an accident is due to negligence. See ACCIDENT.

Negotiable Instrument Document which, by the act of transferring it, conveys the legal right to the property it represents. Cheques, bills of exchange and promissory notes are negotiable instruments, as are dividend warrants and bills of lading and bonds payable to bearer. On the other hand share certificates and the deeds relating to real property are not negotiable instruments. Custom has a good deal to do with the distinction. If it can be shown that a particular class of document has been regarded, in the trade concerned, as a negotiable instrument, the courts will uphold this view.

Negrito Spanish name denoting diminutive peoples of the black race in S.E. Asia, and the allied negrito pygmies of

equatorial Africa. Dark-skinned, black-haired, the adult male stature never exceeding 4 ft. 11 in., the Asiatic section comprises the Andamanese of the Bay of Bengal, the Semang of Malaya, the Aeta of the Philippines and the Tapiro of Dutch New Guinea. The African pygmies, usually shorter, even down to 4 ft. 4 in., yellowish or reddish-brown, include such groups as the Bambante, Akka and Batwa.

Negro Name denoting dark-skinned, woolly-haired African peoples. A branch of the negroid division of mankind which includes the E Asiatic Papuo-Melanesians, the pure negro race inhabits W Africa, S of the Sahara, an eastern or Nilotic section, betraying more ethnic intermixture, extends from the E Sudan to the Kenya coast. They have narrow heads, broad noses, prominent jaws, large teeth and thick lips. Displaying in places much Caucasian contact, they shared in forming the Bantu peoples. Agricultural or pastoral, they live an unprogressive social life marked by magic religious beliefs. There are large populations of negroes in the W Indies and America, whither their ancestors were transplanted as slaves before the abolition of slavery.

THE AMERICAN NEGRO The negroes in U.S.A. now number over 12,000,000, mostly descendants of slaves imported from West Africa, but some immigrants from the British West Indies. They were all slaves in the North and South until 1863, working as family servants, artisans and agricultural labourers. In 1865-69 laws were passed giving full civil rights to the negro, although since then the negro in the South has become more or less disfranchised and is treated as a separate race.

Under the influence of Booker T. Washington the negroes rose steadily, becoming good farmers and artisans, with efficient educational and religious institutions of their own. Negroes have risen to prominence in all walks of life.

The negro question, however, is still a major problem in the U.S.A., and occasional lynchings testify to the acuteness of feeling against miscegenation, while social recognition of the educated negro is the exception rather than the rule.

Nehemiah Jewish cupbearer to the Persian King Artaxerxes Longimanus. Commissioned, in 444 B.C., to rebuild the walls of Jerusalem which Zerubbabel, when restoring the temple, had neglected, he overcame local opposition, encouraged all to co-operate and accomplished the task in 52 days. The Book of Nehemiah, supplementary to Ezra, describes the events at Shushan preceding the return, rebuilding, dedicating the wall and restoring the temple service. After sojourning in Persia for 12 years he revisited Jerusalem.

Nehru Pandit Motilal Indian Swarajist leader. Born May 6, 1861, he became an advocate in the High Court of Allahabad. In 1919 he turned his magnificent residence into a free school, and founded the *Independent*, an aggressively nationalist paper. He presided over Congress in 1919 and 1928, supported Gandhi in his non-co operative campaign, and was imprisoned. He was president of the Swaraj party in 1928, presided over the "All-Parties Conference" at Bombay, which formulated the Nehru Report, laying down a scheme for Dominion status for India. He endorsed Gandhi's "civil disobedience" campaign in 1930, was sentenced to six months' imprisonment, and died at Lucknow, Feb. 6, 1931.

Nehru Pandit Jawaharlal Indian Congress leader and Socialist. Born November 14, 1889, son of Pandit Motilal Nehru, he was educated at Harrow and Trinity College, Cambridge. He is a Bar-at-Law of Inner Temple and Allahabad High Court. Since 1918 he has been a member of the All-India Congress Committee. He was President of the Indian National Congress, 1929-30, and was again elected for 1936. Participated in Non-Cooperation Movement, Salt Satyagraha in 1930, O.D. Movement in 1932, and has been imprisoned five times. His wife Kamala, an active Congress-woman, died in February, 1936.

Neilston Town of Renfrewshire, on the Glasgow L.M.S. Rly., 10 m. S.W. of Glasgow. It has various industries connected with cotton. Pop. 16,200.

Nejd Kingdom of Eastern Arabia. A lofty plateau, it is largely desert, with numerous fertile oases in the north and east, supporting a large settled population. The products include dates, barley, wheat, hides, fruit, camels, and horses. Riyadh is the capital. Pop. (estimated), 3,000,000.

Becoming a Turkish dependency in 1871, Nejd retained a measure of independence till its liberation by Ibn Sa'ud (q.v.) between 1905 and 1914. After the Great War Ibn Sa'ud and his Wahhabi followers extended their dominions to include the Hejaz (q.v.).

Nelson Borough of Lancashire, 30 m. from Manchester on the L.M.S. Rly. The chief industries are cotton mills and engineering works. Pop. (1931) 38,306.

Nelson Town of British Columbia, 1102 miles from Winnipeg and reached by both the C.P.R. and C.N.R. lines. It stands on Kootenay lake and is the chief town of a district in which lumber is cut and silver mined. There are saw mills and smelting works. It is also a port for the shipping on the lake. Pop. (1931) 7000.

Nelson City and seaport of New Zealand, on Tasman Bay, on the north coast of South Island. There is a fine harbour and the town has some manufactures. Nelson is the capital of a district which has an area of 10,000 sq. m. Pop. (1932) 12,700.

Nelson River of Canada. It flows from Lake Winnipeg in a N.E. direction into Hudson Bay, where at its mouth is Port Nelson. It is 400 m. long, but is of little use for shipping owing to its rapids. The chief tributary is the Burntwood.

Nelson Horatio, Viscount. British admiral. Born at Burnham Thorpe, Norfolk, Sept. 29, 1758, he entered the navy in 1770, and in spite of bad health saw continuous service until 1787 when he married and retired with his wife to Burnham Thorpe.

Returning to the navy in 1793, he fought in the Mediterranean and while commanding the Naval Brigade at Calvi, Corsica, lost his right eye. He continued his service in the Mediterranean, and as Commodore was responsible for the victory off Cape St. Vincent in 1797. In the same year he lost his right arm in an engagement at Santa Cruz.

In 1798 he won an overwhelming victory over the French in Aboukir Bay (see *NILLY*, Battle of the). His rewards for this victory included a barony, large sums of money, and the Dukedom of Bronté in Sicily. He formed in this year a liaison with Emma, Lady Hamilton, which lasted until his death, their daughter, Horatia, being born in 1801. In 1801 he won another

victory at Copenhagen, and in Oct. 1805, Nelsen, now a viscount and Commander in Chief, sailed to his last victory. The Battle of Trafalgar ended in the annihilation of the Franco-Spanish fleet, but Nelsen, mortally wounded, died as victory was assured, on Oct. 21.

The most famous of British seamen, he was a great leader of men, well known for his humanity and kindness, and an unrivalled strategist. In recognition of Nelson's services to his country, his brother was made Earl Nelson of Trafalgar.

Nemesis In Greek mythology, the personification of retribution. She was regarded as the goddess charged with readjusting immoderate good fortune and checking the presumption attending it.

Nemi Lake of Italy. Supposed to be the crater of an extinct volcano. It is situated in the Alban Hills, 20 m from Rome. In the hope of finding valuable treasures, in 1929 the lake was partly drained, but the finds, which included remains of two galleys, did not come up to expectation.

Nen River of England. It rises in Northamptonshire and flows through that county and Lincolnshire to the Wash. It is 90 m long and on its banks are Northampton, Wellingborough, Peterborough and others.

Nenagh Urban district and market town of Tipperary, Irish Free State. It stands on the river of the same name, 06 m from Dublin. The industries include slate quarrying. Pop 4500.

Neolithic Term denoting the highly finished and polished stone implements characterising the later phase of the prehistoric Stone Age, contrasted with the ruder workmanship of the earlier or palaeolithic phase. They are found scattered throughout Europe and elsewhere, associated with other evidences of a well marked civilisation, to which the same term is now applied. During this cultural stage mankind started on agriculture, and introduced plant and animal domestication, pottery, basketry and weaving. The grinding of stone edge tools led to carpentering, improved navigation, megalithic building, settled homes and ever-increasing refinement, which culminated in the development of metal smelting. Neolithic conditions still persist among various backward peoples.

Neon Gaseous element occurring in minute proportions in the atmosphere. It is associated with argon from which it was isolated in 1898 by Sir William Ramsay. Its symbol is Ne, atomic weight 20.2 and its spectrum shows red, orange and yellow lines. Neon is used in special lamps for producing an orange red light by passing an electric discharge through the gas.

Neophyte Term "newly planted" denoting in early Christianity a newly baptised person. Neophytes passed through a pre-baptismal stage as catechumens. St Paul enjoined Timothy not to select bishops from neophytes (1 Tim. iii). The Roman Church designates as such newly converted heathens or heretics, and sometimes newly ordained priests or novices of a religious order.

Neo-Platonism Last school of pagan philosophy. Combining elements of Platonism and Stoicism with Oriental doctrines, it was influenced by the philosophy of Philo and the Gnostics, emerged in 3rd century Alexandria under Ammonius Saccas, and was profoundly re-

modelled by Plotinus, whose views were popularised by Porphyry and modified in the direction of mysticism by Iamblichus. It influenced Clement, Origen, Augustine and other early Christian fathers, but succumbed to the rival teaching of Christianity.

Neoptolemus (or Pyrrhus) In Greek legend, son of Achilles and Deidamia. Handsome and brave he proceeded to Troy in the last year of the war, entered the city with the heroes concealed in the wooden horse, slew King Priam and afterwards his daughter Polyxena, and took to Epirus Hector's widow Andromache, awarded to him by lot. He plundered the Apollo temple at Delphi, wedded Hermione, and was slain by her promised consort, Orestes.

Nepal Kingdom of Asia, in the Himalayas. It has Tibet on the north, Sikkim on the east and India on the south and west. It is 54,000 sq m in extent and is governed by a maharajah. Katmandu is the capital. The inhabitants are mainly Gurkhas and the state has an army of 45,000 men. Cattle are reared and wheat, rice and other crops are grown. There are large forest areas. The country is quite independent. Its autonomy having been recognised by Great Britain in a treaty signed in 1923. Pop 5,600,000.

Nepheline A rock forming mineral consisting of a silicate of alumina, soda and potash, and occurring as hexagonal prisms, usually white or colourless, in lavas, phonolite and other eruptive rocks, associated with potash felspar or with garnets, mica and hornblende. A dark coloured greasy variety, elaeolite, occurs in certain syenites.

Nephrite A compact variety of either tremolite or actinolite, two closely allied minerals of the amphibole group. Nephrite or jade is white or green in colour, very hard and tough. White nephrite is a tremolite mineral consisting of silicate of calcium and magnesium, while green nephrite or greenstone has, in addition, iron as in actinolite.

Nephritis Inflammation of the kidneys. Its most prominent symptom is the presence of albumin in the urine, dropsy frequently supervenes. Acute nephritis commonly arises from exposure to cold, especially after alcoholic intemperance, from irritant poisons, or as a complication of various other acute diseases. Local means of relieving congestion, such as hot fomentations, and confinement to a warm bed are important, should the disease reach the chronic stage the patient may have to anticipate a semi-invalid future. See BRIGHT'S DISEASE.

Neptune Roman god identified with Poseidon (q.v.), god of the sea. He is represented as holding a trident, the emblem of his power.

Neptune Outermost of the larger planets of the solar system. It was discovered by Galle at Berlin Observatory in 1846, its position having been indicated by Leverrier. Its distance from the sun is 2794 million miles and its year equals 165 of ours. The diameter of the planet is about 31,225 m, slightly exceeding that of Uranus, and its mean density is 1.54. It has one satellite which moves in a retrograde orbit in about five days, twenty-one hours.

Nereus In Greek legend a god of the sea, son of Pontus and Gaia. He had 50 daughters who were called the Nereids, one being Thetis, the mother of

Achilles He was supposed to possess prophetic powers and in art is shown as an old man holding a trident.

Neri Philip Italian saint Born at Florence, July 21, 1515, at the age of 13 he went to Rome In 1564 he became a priest, and after gaining a number of disciples he instituted the religious exercises for which he is famous He encouraged musical and religious entertainments at holiday times, the origin of the Oratorio (*q v*) In 1564 he established the Oratory, a community which was approved by the Pope He died May 26, 1595, and was canonised in 1622

Nernst Walter German chemist Born at Briesen, Germany, June 25, 1864, he became Director of the Physical Institute at Charlottenburg until 1924, after studying and assisting at different universities In 1925 he took up the same position in the University at Berlin

Nernst is known for his invention of an electric glow lamp and for his statement of the third law of thermodynamics He also initiated important measurements in specific heats at low temperatures In 1920 he received the Nobel prize for physics

Nero Roman emperor Born at Antium, Dec 15, A D 37, he was adopted by the Emperor Claudius in 50, and succeeded him in 54, displacing Claudius' son, Britannicus His reign was marred by a series of murders attributed to him His mother, two successive wives, and Britannicus were among the victims He blamed the Christians for the burning of Rome, and had many put to death, afterwards building a magnificent new city In 68 his troops revolted in favour of Galba, and Nero fled from Rome, saving himself from execution by suicide on June 9

Nerve White glistening cord-like structure consisting of a bundle of numerous nerve fibres, each measuring about $\frac{1}{16}$ inch in thickness and forming part of the nervous system controlling and regulating the movements and functions of the body Each consists of an axis surrounded by a fatty layer and a delicate membrane All nerves are outgrowths from the cerebral spinal system, those conveying impulses from the brain are termed motor or efferent nerves, while those conveying impulses to the central system are known as afferent or sensory nerves and upon their nerve roots are ganglia or masses of nerve fibres and cells

Ness Loch and river of Inverness shire The loch is 22 m long and is used to form the course of the Caledonian Canal Its waters are carried to the Moray Firth by the River Ness which is 7 m long

Nessus In Greek legend one of the centaurs He was shot by Hercules with a poisoned arrow and, in revenge, he gave to Deianeira, the wife of Hercules a poisoned cloak Hercules put this on and met a painful death The phrase "Nessus shirt" is derived from this incident

Neston District of Cheshire, 12 m from Chester and 191 from London by the L M S Rly Situated on the estuary of the Dee, it is in a coal mining area Neston forms part of the urban district of Neston and Parkgate Pop 5191

Nestor In Greek legend, son of Neleus and Chloris Sharing in youth the Argonaut adventure and the hunt for the Caledonian boar, he took part as the aged King of Pylos in the Trojan war His wise counsels were highly valued by the other Greek chieftains

Net-Ball (or Basket Ball) Had its origin in the United States in 1892, where its vogue as an indoor game quickly spread, though in England it is frequently played outdoors upon grass or asphalt by English women and girls It is played on a court 95 ft long, at each end is a goal consisting of a small bottomless net suspended on posts 10 ft high The aim is to throw the ball through the opponents' net, by passing from one player to another A team may comprise from six to nine players

Netherfield Town of Nottinghamshire, 2 m from Nottingham It has factories for the manufacture of lace and hosiery, and is part of the urban district of Carlton

Netherlands (or Low Countries) Former designation of the countries now known as Belgium and Holland In modern speech it refers to the eleven provinces of Holland See NETHERLANDS, Kingdom of the

The Netherlands has had a stormy and heroic history, being a long struggle against the supremacy of Spain and the burden of Roman Catholicism which that country laid upon it William the Silent is the dominating figure of the struggle, and his successors include our own William III The Dutch Republic emerged from the struggle at the end of the 16th century, and for the next century was a maritime and commercial power of prime importance At the end of the 18th century it became the Batavian Republic, and the modern kingdom came into being in 1813 Belgium became a separate kingdom in 1831 See BELGIUM, HOLLAND

Netherlands Kingdom of the Country of north-western Europe, commonly known as Holland It is bounded on the east by Germany, on the south by Belgium, and on the north and west by the North Sea The country is mainly low-lying, and is drained by the Rhine, the Maas (Mouse) and the Schelde The Zuider Zee has now been separated from the sea by a dike, and has already been partially reclaimed Dikes have been constructed at different times to protect the country from inundation by the sea, and the rivers have been largely canalised Of the total area (12,761 sq m) nearly half is below sea-level Pop (1933) 8,290,389

The kingdom, set up in 1814 as a bulwark against France, at first included the Belgian Netherlands, but Belgium broke away 1830-31 Thereafter Holland played little part in European history, remaining neutral throughout the Great War In 1932 Holland entered into a tariff union with Belgium and Luxembourg

Holland is ruled by a constitutional monarch (Wilhelmina) and the States General, consisting of an upper chamber of 50 members and a lower chamber of 100 deputies The Prince Consort died in 1934 There is universal suffrage over 25 years of age The political capital is the Hague, and the commercial capitals Amsterdam and Rotterdam Other large towns are Utrecht, Groningen and Haarlem

The country is primarily agricultural, intensive stock breeding, general agriculture and flower-growing being carried on The chief manufactures are shipping, bricks, margarine, cocoa, linen, cottons, etc Coal is produced, and there is a great diamond-cutting industry at Amsterdam

The country has extensive possessions in the East Indies and the West Indies See JAVA SUMATRA, BORNEO, MOLUCCAS, SURINAM

Netley Village of Hampshire It stands on Southampton Water opposite Southampton The large military hospital at Netley, opened in 1858, is called the Royal Victoria Hospital Near are the extensive and beautiful ruins of a Clisterian abbey

Nettle Typical genus of herbs of the nettle order, scattered over temperate and subtemperate regions (*Urtica*) The stem and leaves bear stinging hairs Of the three British species the tender shoots of the great perennial downy *U. dioica*, 2 to 4 ft. high, are used as a pot herb The strong black fibres of the stem have been fashioned into yarn and paper The smaller annual species is smooth leaved except for the stinging hairs, the coarser Roman nettle, long naturalised, is the most virulent.

Nettlerash (*Urticaria*) Diffuse redness of the skin accompanied by wheals, raised and pale in colour, causing great irritation and itching The rash is produced by some article of diet, such as shell fish, which does not suit the individual, and will disappear when the cause is removed. An aperient should be given, and a cooling lotion or dusting powder will allay the irritation

Nettle Tree Handsome tree of the elm order, indigenous to the Mediterranean region eastward to China (*Celtis australis*) It is straight trunked, 30 to 40 ft. high, with toothed, lance-shaped leaves and small, sweet blackberries The wood is dense and fine grained the tough, pillant branches make good hayforks The allied N. American *C. occidentalis* is the hackberry

Neuchâtel Capital of the Swiss canton of that name, it is at the north-eastern end of Lake Neuchâtel It is built partly on the slope of the Chaumont, and partly on new alluvial land Pop. 23,152

Lake Neuchâtel, the largest in Switzerland, has an area of 92½ sq. m. is 23½ m. long, and from 3½ to 5 m. broad It receives the River Thièle and several others The chief places on its shores are Estavayer, Yverdon, Serrières and La Tène

Neuilly District of Paris, on the Seine It is noted for its midsummer fair On Nov. 27, 1919, Bulgaria and the Allies signed a treaty of peace here

Neuralgia Term, literally "nerve pain," often used loosely for any pain of obscure origin It strictly denotes pain in the whole or part of a sensory nerve without recognisable structural change It may be *tic douloureux*, pain in the fifth facial or trigeminal nerve, *margine*, referred to half of the head, *intercostal*, pain in the nerves running from the spinal cord between the ribs to the front, or *sciatica* It sometimes results from pressure by a tumour, or indirectly from decayed teeth

Treatment—Neuralgia will often yield to aspirin tablets, two at a time if they suit the individual, and to the application of external heat Facial neuralgia is sometimes due to decayed teeth or to defective eyesight, and sufferers should have these matters attended to A run down condition and exposure to sudden cold is often the cause

Neurasthenia Term, literally "nerve weakness," denoting a condition of nerve exhaustion which renders the sufferer incapable of sustained exertion It may arise from physical or mental overstrain, hardship, worry or self-indulgence, and may be attended by constipation, loss of appetite, sleeplessness, irritability and depression. It

may affect the brain, heart, stomach or the sexual life

Neuritis Inflammation of one or more bundles of nerve fibres Exposure to cold or injury may affect a single nerve, this localised neuritis impairs muscular action, occasioning, if the facial nerve be affected, facial paralysis Multiple neuritis, due to general or constitutional causes, results in the breaking down of the smaller nerves It may arise from acute or chronic poisoning by alcohol, lead, arsenic and other substances, or the toxins of acute infective diseases, e.g., diphtheria and influenza

Neurosis Nervous disorder not associated with recognisable organic changes It may take the form of hypochondriasis, hysteria, neurasthenia, phobias or obsessions (q.v.) It is distinguishable from psychoses mental disorders such as delusional insanity or melancholia, the generic term psychoneurosis conveniently embraces various borderline cases Occupational neurosis is any nervous disorder caused by the sufferer's occupation, such as writer's cramp The adjective neurotic frequently applied to sensitive women, may loosely indicate tendencies not referable to a distinct neurosis

Neutrality Condition of a state, abstaining from participation in a war between other states and maintaining an impartial attitude in its dealings with the belligerent states, with the recognition of this impartiality by the warring states The neutral state cannot supply any ships, munitions, food or money to those at war, nor erect special wireless stations, through which news can be transmitted

Neuve Chapelle Village of France in the department of Nord During the Great War it was a strategic position of great importance, lying at the junction of several roads

The Battle of Neuve Chapelle was fought on March 10-12, 1915, between the British and the Germans, and was an Allied victory, though not carried out to its desired conclusion Casualties were heavy on both sides, the British losing a total of 12,811 Indian troops took a share in this battle

Neva River of Russia It rises in Lake Ladoga and flows past Leningrad to the Gulf of Finland, which it enters by several mouths Although only 45 m. long, it is important from the commercial point of view, as it unites Leningrad with the Baltic, and by means of other waterways with the Caspian

Nevada Western state of the United States It is chiefly a mining area and produces a good deal of gold and silver The soil is on the whole unfertile, but irrigation works have improved it, and a certain quantity of wheat, barley and other crops are grown The state area is 110,690 sq. m., and the capital is Carson City It is governed by a legislature of two houses, and sends two senators and one representative to Congress Pop. (1930) 91,058

Neville English family In the Middle Ages it had great estates in the N. of England, and its members were Earls of Westmorland and held other titles The most prominent of the Nevilles was Richard, Earl of Warwick, the king-maker The great castles at Raby and Middleham once belonged to the Nevilles, who lost their power in the north during the reign of Elizabeth To-day the

Norilles are represented in the peerage by the Marquess of Abergavenny and Lord Braybrooke

Neville's Cross Spot near Durham There on Oct 17, 1346, the English army defeated a Scottish army under King David II, who was among the prisoners There is an old cross here

Nevin Village and seaside resort of Caernarvonshire It is 6 m. north-east of Pwllheli, and was formerly a considerable town Fishing is carried on

Nevinson Christopher Richard Wynne English artist Born on Aug 18, 1889, he was educated at Uppingham, the Slade School and Paris He first exhibited work in London in 1910, and has exhibited in London, Paris, New York, Washington and Chicago continually since then He served in Flanders in 1914-15, and was discharged from the army in 1916 He exhibited war paintings at the Leicester Galleries, and on his appointment as Official Artist, returned to France in 1917 His works have been purchased by the British War Museum and the Canadian War Memorials Fund In 1920 he was the official representative of British Art at Prague, by invitation of the Czechoslovakian Republic

Nevis One of the Leeward Islands, British W Indies Its area is 50 sq m, and its capital Charlestown Sugar and cotton are exported

Nevis Ben See BEN NEVIS

Newark Borough and market town of Nottinghamshire It is on the Trent, 19 m from Nottingham and 120 from London, on the L.N.E. Ry The town is an important agricultural centre, but has also engineering works, malt houses, breweries and other industries Its castle withstood three sieges in the Civil War, and the church of S Mary Magdalene has an octagonal spire 223 ft high Pop (1931) 18,058

Newark is called Newark-on-Trent to distinguish it from other Newarks One of them is near Woking and another near Port Glasgow

Newark City of New Jersey, the largest in the state It stands on the Passaic River, 9 m from New York There are manufactures of chemicals, clothing and other articles Pop 442,337

Newbattle Village of Midlothian It is on the South Esk, adjoining Dalkeith Here is Newbattle Abbey, the seat of the Marquess of Lothian

Newbolt Sir Henry Jehn English author and poet Born June 6, 1862, he was educated at Clifton College and Corpus Christi College, Oxford He was called to the Bar in 1897 and practised until 1899 He created his literary reputation with the ballads *Admirals All* (1897), followed by other stirring sea poems—including *Drake's Drum* He wrote two novels—*The Old Country* and *The New June* *St George's Day and Other Poems* appeared in 1918, other publications are *Naval History of the Great War* (1920), *Studies in Green and Gray* (1926), *New Paths on Helicon* (1927) He was Controller of Wireless and Cables during the war, and was knighted in 1915.

New Brighton Watering place of Wexford, 4 m. from Birkenhead, it forms part of the Borough of Wallasey It has steamer connection with Liverpool and elsewhere

New Britain Island of the East Indies It is near New

Guinea, from which it is divided by St George's Channel It covers 9600 sq m and Rabaul is the capital another port is Kokopo, formerly known as Herbertstoko The island is mountainous and has volcanoes It produces rubber, coffee, etc. The only part that is settled and cultivated is the Gazelle Peninsula in the north Pop (1931) 88,000

New Brunswick Province of Canada Lying east of Quebec, with the state of Maine on the south-west, it borders the Gulf of St Lawrence on its north east shore, and on the south connects with Nova Scotia and with the Atlantic by the Bay of Fundy Mainly undulating, it is mountainous in the north west, is well forested, and has many lakes The chief rivers are the St John, Miramichi and Restigouche Lumbering, agriculture, fisheries and mining are the chief industries, and the tourist and hunting business is extensive There are considerable water powers

New Brunswick, once part of Acadia, was ceded by France in 1713 and settled by the English in 1764 Separated from Nova Scotia in 1784, it joined the Canadian federation in 1867 and sends 11 members to the Dominion House of Commons, and 10 senators Fredericton is the capital and the seat of the provincial government, but St. John (q v) is the largest city Pop (1931) 408,255

Newburgh Borough and seaport of Fifeshire It is 7 m from Ladybank by the L.N.E. Ry and is on the Firth of Tay There is a harbour for the fishing, and some manufactures Pop (1931) 2152

The title of Earl of Newburgh, dating from 1660, is now held by the Italian family of Giustolanti-Bandini The earl's oldest son is known as Viscount Kynnaid

Newburn Urban district of Northumberland A colliery centre It is 6 m west of Newcastle, and 276 m. from London by the L.N.E. Ry The town stands on the Tyne, and has metal works and some manufactures Pop (1931) 19,539

Newbury Borough and market town of Berkshire It stands on the Kennet, 17 m from Reading and 63 from London by the G.W. Ry, on which it is a junction. The chief trade is in agricultural produce and sheep At one time Newbury was noted for its wool It is on the main road from London to the west The borough includes Speenhamland Pop (1931) 13,336

During the Civil War, Sept 20, 1643, the royalists were defeated near Newbury, but on Oct. 26 1614, the parliamentary forces were defeated here

New Caledonia Island of Australasia, in the S Pacific Ocean It has an area of 7650 sq m. and was discovered by Captain Cook in 1774 In 1853 it became French, and some ten years later was founded as a penal settlement which it continued to be until 1895. Pop 47,505

Newcastle City and river port of New South Wales It stands at the mouth of the river Hunter, 73 m. by railway from Sydney A mining centre, it has accommodation for shipping the coal Iron and steel works were established here in 1915 and the city is the largest in the state after Sydney Pop (with suburbs) (1931) 103,700

Newcastle Duke of English title borne by the family of Pelham-Clinton The first duke was William Cavendish (1592-1676) His title became

extinct when his son died in 1691. From 1691 to 1711 his son in law, John Holles, was Duke of Newcastle.

In 1715 Thomas Pelham, who had inherited the estates, was made Duke of Newcastle upon Tyne and in 1756 he was made Duke of Newcastle under Lyme. He died in 1768 when the first dukedom became extinct, but the second passed to a nephew, Henry Flannes Clinton. From him the present duke is descended. Henry, the 5th duke (1811-64) was a secretary of state, 1832-54 and 1859-64.

The duke's eldest son is called the Earl of Lincoln. He owns valuable estates in the city of Nottingham. In 1931, following the death of Henry the 7th duke the family seat, Clumber, near Mansfield, was closed.

Newcastle Market town of Co Limerick, Irish Free State. It is 27 m south west of Limerick, on the G S Rlys. It is an agricultural centre.

Newcastle Seaside resort of Co Down, Northern Ireland. It is 36 m south of Belfast and is reached by the G N of Ireland and Belfast and Co Down Rlys. Pop 1800.

Newcastle Town of Natal. It is 160 m from Durban by rail way, and stands under the Drakenberg Mts. The principal industry is the mining of coal. Others are iron and steel works, a creamery and trading in wool and grain. Pop 4860.

Newcastle-under-Lyme Borough and market town of Staffordshire. It is 10 m from Stafford, by the L M S Rly on the little river Lyme. The industries include the making of chemicals, pottery and clothing and around are coal mines. The district near was once the forest of Lyme. Pop (1931) 23,246.

Newcastle-upon-Tyne City, municipal county and port of Northumbria. It is on the Tyne, 8 m from the sea and is an important colliery and shipbuilding centre. Other industries are engineering, electrical works and chemical manufactures. Originally a Roman station Newcastle has a castle built by Henry II, and its cathedral the seat of a bishop dates from the late 14th century. There are colleges of medicine and science belonging to Durham University. The borough sends four members to Parliament. It has a broadcasting station (288.5 M, 1 kW). Pop (1931) 283,145.

Newchwang Seaport of Manchuria. It refers both to the town and the port, although these are 40 m from each other. The town proper is on the Liao river, the port which is closed by ice for three months in the year, is one of the treaty ports, and from it large quantities of the soya bean are exported. Pop (1931) 106,040.

Newdigate Sir Roger English anti-quary. Born May 30 1719, he had an active political career but is chiefly remembered for his collection of antiquities. Among other gifts to the University of Oxford he founded the Newdigate prize of twenty one guineas for English verse which is open for competition annually to undergraduates of Oxford University. It was first awarded in the year of his death which took place at Albury on Nov 23, 1806.

Newel Term in architecture for the pillar or post forming the central support of a spiral staircase of wood or stone,

and from which the steps radiate. In modern carpentry a newel is the more or less ornamented post at the head, foot or angles of a staircase, and giving support to a handrail.

New England Name given to six north eastern states of the United States. They are Maine, New Hampshire, Connecticut, Massachusetts, Rhode Island and Vermont. The first settlement was made here in 1620 and the colonies remained an English possession until 1783. They formed themselves into a confederation in 1643.

Newent Market town of Gloucestershire. It is 10 m north west of Gloucester and 124 from London by the G W Rly. Pop (1931) 2325.

New Forest District of Hampshire. In the south west of the county it covers about 150 sq m, and is the largest stretch of woodland in the country. In it are several towns among them Lyndhurst, Brockenhurst, Ringwood and Minstead. Beaulieu Abbey and Rufus Stone are objects of interest. The trees are chiefly oak and beech and the scenery is of great beauty. The forest has its own breed of ponies. It is usually believed that the forest was created by William the Conqueror.

Newfoundland British dominion of N America. It lies E of the Gulf of St. Lawrence, and has an area of 42,754 sq m, including Labrador (qv). It is the oldest British colony having been formally annexed by Sir Humphrey Gilbert in 1583 less than a century after the discovery by John Cabot.

It is the centre of the cod fishing industry, and has also important herring and other fisheries. Next in importance comes the pulp and paper making industry. The country is rich in minerals, silver, nickel, copper, asbestos, iron and coal. St. John's is the capital. Other towns are Harbour Grace, Bonaville, Placentia and Carbonear. The government consists of an executive council under the Governor, a legislative council of 24 members, and a house of assembly of 27 members. In 1933, however, the financial situation was such as to warrant an appeal to the British government, and the constitution was temporarily suspended. Meanwhile full administrative powers were vested in the Governor, advised by a commission (Newfoundland 3 members U K 3 members) appointed in 1934. Pop 267,330.

Newfoundland Dog Large breed of dog. Imported into Britain in the 18th century, it has become a favourite companion and guard. Broad backed, deep-chested, it has a massive head, muscular hindquarters and thick, well-covered tail. Dogs should average 27 in in height, bitches 25 in. Essentially a large retriever, it is specially trained to rescue drowning persons. The shaggy, oily coat is preferably black with one or two white patches. The smaller black Labrador dog is a part ancestor of the black retriever.

Newgate London gaol, demolished in 1903. The name derives from the fact that the prison was originally in the gate house of the New Gate. There was a prison on this spot for more than a thousand years. The Central Criminal Court now occupies the site.

New Glasgow Town of Nova Scotia. It is on the East River, 105 m from Halifax and 3 m from its port, Pictou Harbour, by the C.N.R. There are steel works and coal mines. Pop 8974.

Newgrange Monuments

Irish bronze age cemetery in the Boyne Valley, Co Meath. There are 17 grave-mounds, the largest, at Nowgrange, being a truncated cone, 70 ft. high, and 315 ft across at the base. It contains a corbelled chamber 19½ ft high with three side-cells, displaying spiral and other designs, and approached by a 63 ft covered gallery.

New Guinea Island of the Eastern Archipelago, the largest after Australia and Greenland. 330,000 sq m in area, it is partly British and partly Dutch. With a long coastline it is mountainous, thickly forested and largely unexplored, and has several navigable rivers. Rubber, valuable woods, pearls, copra and agricultural products are the chief exports, and cocoa and coffee are grown. Gold, copper and phosphates have been found. The natives are Papuan negroes with a mixture of Malay and Polynesian blood. Some are given to cannibalism. Pop (estimated), 480,000.

New Hampshire State of the United States. In the east of the country, it is one of the New England states and has a short coastline on the Atlantic Ocean. Its area is 9,411 sq m. Concord is the capital, but Manchester is the most populous town. Mainly agricultural. It has a considerable extent of forest land, and was one of the 13 original states of the Union. The University of New Hampshire is at Durham. Pop (1930) 465,293.

New Hanover now Lavongai Island of the Bismarck Archipelago, off the coast of New Guinea, area 460 sq m. Coffee, rubber, cotton and other tropical products are grown. The island was taken by the British from the Germans in 1914 and is now governed by Australia under mandate from the League of Nations.

Newhaven Urban district and seaport of Sussex. It is 56 m from London by the S Ry. It stands at the mouth of the Ouse, and is chiefly important since the most direct sea route from London to Paris is from Newhaven to Dieppe. Pop (1931) 67,900.

New Haven City of Connecticut, U.S.A. It is the seat of Yale University, which was transferred here in 1716, sixteen years after its foundation. It has manufactures of iron and steel goods, firearms, hardware, cutlery, etc., and is also the chief seaport of the state, owing to its position on New Haven Bay. Pop (1930) 162,655.

New Hebrides Island group of the S Pacific, belonging to France. They lie between the Santa Cruz Islands and the Loyalty Islands, and are about 30 in number, only 20 being inhabited. The principal ones are Malekula, Sandwich, Erromanga and Espiritu Santo. They trade in copra fruits, sandalwood and similar produce. The total area is 5,700 sq m. Pop 55,000.

New Ireland Island of the Bismarck Archipelago. As Neumecklenburg, it was a German possession but in 1914 it was taken by the British, and is now governed by Australia under a mandate from the League of Nations. The chief town is Kavirangi, and the chief industry the growing of coconuts.

New Jersey State of the United States. It lies to the south of New York State and has a long coast-

line on the Atlantic Ocean, but its area is only 8,224 sq m. Trenton is the state capital, but other cities, Newark, Jersey City and Paterson, are larger. Another populous city is Camden, while it contains Atlantic City and Hoboken on the Hudson. The state is largely an agricultural area and has valuable fisheries. It was one of the 13 original states of the Union. Pop (1930) 4,041,334.

Newlands Corner Beanty spot of Surrey. It is on the downs, 3 m from Guildford, and from it wonderful views of the surrounding country can be obtained. Its height is 570 ft.

Newlyn Seaside resort of Cornwall. It is 2 m from Penzance, beautifully situated on Mounts Bay. It has a good harbour and is a fishing port, but it is better known for its association with artists. About 1880 a number of artists made their homes here and the group became known as the Newlyn School, the distinctive feature of which was the amount of work done in the open. Stanhope Forbes was a member.

Newmains Town of Lanarkshire. A coal mining centre, it is 2 m from Wishaw, by the LMS Ry. Here are ironworks. Pop (1931) 2,800.

Newman John Henry, English Cardinal, theologian and writer. Born Feb 21, 1801, he was educated at Trinity College, Oxford, where he formed a friendship with Pusey, Hurrell Froude and others. After ordination he turned from Evangelicism and became one of the leaders of the Oxford Tractarian Movement, or the High Church Movement. The movement resulted in the conversion of many to Roman Catholicism, including Newman who resigned his living at Oxford, and became converted in 1845. From 1854-58 he was rector of the Catholic university in Dublin, and in 1859 founded a school in connection with Birmingham Oratory. He was made a cardinal in 1879 and died at the Oratory, Aug 11, 1890.

He wrote in verse and prose, and was famous as a lecturer and preacher. Of his works, his *Grammar of Assent*, (1870) on the philosophy of faith, and his *Apologia pro Vita Sua*, a history of his own religious life, are the best known, and he will always be remembered as the author of the hymn "Lead, Kindly Light." His epic poem, *The Dream of Gerontius*, has been set to music by Sir Edward Elgar.

Newmarket Urban district and market town of Cambridgeshire and Suffolk. It is 13 m from Cambridge and 70 m from London, and is the chief centre of horse racing in the country. The races are held on the heath where there are eight courses. Eight meetings are held in the year. The industries are all connected with racing. In the High Street are the headquarters of the Jockey Club and a house once owned by Charles II. The Astley Institute and the King Edward VII Memorial Hall are notable. Pop (1931) 97,553.

New Mexico State of the United States. In the south-west of the country, it is bounded on the south by Mexico and on the west by the ocean, represented by the Pacific and the Gulf of California. It includes the southern part of California and covers 122,634 sq m. Santa Fé is the capital, but Albuquerque is larger. It is mainly agricultural, and maize, wheat, cotton, potatoes and fruit are grown. Much of the soil is unfertile, but irrigation works have made it more productive. The state produces a good deal

of silver and copper, and there are large forest areas Pop (1930) 423,317

New Mills Market town and urban district of Dorsetshire, on the L.M.S. Rly. It is 8 m. from Stockport on the Little Rivers Gt. and Kinder Cotton is manufactured and in the neighbourhood are coal mines Pop (1931) 8551

Newmilns Borough of Ayrshire. It is 7 m. east of Kilmarnock, on the L.M.S. Rly. The River Irvine divides it from Greenholm, which is part of the burgh. The chief industry is the manufacture of cotton goods Pop (1931) 3979

New Model Term used for the army raised in 1645 to fight for the cause of the Parliament. It was raised and trained on a new plan and consisted of about 14,000 infantry and 7000 cavalry. Sir Thomas Fairfax was appointed general and Cromwell led the cavalry. It was responsible for the victory of Naseby and was in a sense the foundation of the standing army of to day.

Newnes Sir George English publisher. A son of Rev. T. M. Nownes, a Congregational minister, he was born at Matlock, March 13 1851. He was educated at Wakefield and in London and entered business in Manchester. In 1881 he started *Tit Bits* in that city, but three years later he moved it to London, and on it the firm of George Newnes, Ltd. was built. Under his direction this had many successes, the most notable being *The Strand Magazine*. In 1890 Newnes founded *The Westminster Gazette*, which ceased publication in 1927. In 1919 the firm founded *John o' London's Weekly*. From 1885 to 1895 he was Liberal M.P. for the Newmarket Division and from 1900 to 1910 for Swansea. In 1895 he was made a baronet and he died June 9, 1910. His only son Frank, who succeeded him, was a short time a Liberal M.P.

Newnham College for women at Cambridge. It was opened in 1871 and consists of several halls. There is accommodation for about 200 students.

New Orleans City and port of Louisiana, U.S.A., the commercial capital of the state. It is situated on the Mississippi, rather more than 100 m. from the mouth, and is the great cotton mart of the country, as well as a busy manufacturing centre. The principal industry after the shipping, is sugar refining. Cotton goods are manufactured, also cigars, footwear and furniture. The Tulane University is here, also the Ursuline Academy and a Jesuit College. There is also a university for negroes Pop (1930) 458,762

Settled by the French in 1718, New Orleans was ceded to Spain in 1763. It fell to France in 1800 and was purchased with Louisiana by the U.S.A. in 1803. There was a battle here between England and the U.S.A. in the war of 1812.

New Plymouth Town and seaport of North Island, New Zealand. It is 160 m. by railway from Auckland. It has a good harbour and shipping is the chief industry. Pop (1932) 18,660

Newport Borough, market town and capital of the Isle of Wight. It stands on the Medina, 10 m. from Ryde, and is the centre of the railway system. God's Providence House and the Castle Inn are of interest. Owing to its nearness to Calishrooke, Newport has associations with Charles I. who

made here the Treaty of Newport with his enemies in Sept. Dec. 1648. Pop (1931) 11,313

Newport Borough of Flintshire. It stands on the Firth of Tay and is reached by the L.N.E. Rly. It is opposite Dundee with which it is connected by a ferry Pop (1931) 3275

Newport County borough, seaport and market town of Monmouthshire. It stands near the mouth of the Usk, 12 m. from Cardiff and 133 from London, on the G.W. and L.M.S. Rlys. A transporter bridge crosses the Usk to the suburb of Maidee. It has extensive docks and a large shipping trade. Other industries are connected with the manufacture of iron and steel. There are also chemical and glass works. Pop (1931) 89,198

Newport Seaport of Pembrokeshire. It stands at the mouth of the River Neven, 6 m. from Fishguard. It has a small harbour.

Newport Urban district and market town of Shropshire. It is 145 m. from London and 17 from Shrewsbury, on a joint line of the G.W. and L.M.S. Rlys. The town is an agricultural centre and here is the Harper Adams Agricultural College. Pop (1931) 5499

Newport Pagnell Urban district and market town of Buckinghamshire. It is on the Great Ouse, where it is joined by the Ousel, 50 m. from London, by the L.M.S. Rly. The Grand Union Canal passes the town. The town has an agricultural trade and motor car works. Pop (1931) 3957

New Providence Chief island of the Bahamas. It is 19 m. long and on it is Nassau the capital of the group. It produces pineapples and in it are a number of lagoons. Pop (1931) 19,756. See **BAHAMAS**

Newquay Urban district and seaside resort of Cornwall. It is 14 m. north of Truro, and 281 m. from London by the G.W. Rly. There is a small harbour for the fishing. Pop (1931) 5958

New River Artificial waterway. It is in the Counties of Hertford and Middlesex and was made to supply London with water. It is 27 m. long and extends to New River Head at Clerkenwell. It dates from 1609-13, having been made by Sir Hugh Myddleton and is now the property of the Metropolitan Water Board. The river obtains its water from springs and from the Lea.

New Ross Urban district and market town and river port of Co. Wexford, Irish Free State. It stands on the Barrow, 100 m. from Dublin, on the G.S. Rly. There is a harbour in the river and the industries include shipping and fishing. The urban district includes Roshercon in Co. Wexford. Pop 5011

Newry Urban district and port of Co. Down, Northern Ireland. It is on the River Newry, 35 m. from Belfast and 63 from Dublin, on the G.N. (I.) Rly. The newer part is called Ballybot. Here flax is spun and there are some manufactures, but the chief industry is shipping. Pop (1926) 11,963

New South Wales The oldest Australian state, situated on the east coast. Discovered by Captain Cook in 1770, settlement commenced in 1788. Under an excellent climate agricultural and pastoral pursuits are established on a vast scale. Mining is important. The

Bank of New South Wales, an important local institution, is largely interested in the development and progress of the country. There is a variety of coastal and mountain scenery, the Jenolan Caves are in the Blue Mountains. The harbour of Sydney, the capital, is famous. Area 310,372 sq m Pop 2,500,486

Newspaper Periodical publication that gives the news of the day or the week. The chief newspapers are published daily in the morning, but there are evening and weekly newspapers, the latter including the Sunday papers. In England the earliest newspapers were the news sheets of the 16th century and the pamphlets of the 17th. In 1704 Daniel Defoe started *The Review*, and in 1785 John Walter founded *The Times*. In the 19th century an enormous number of papers were established all over the country.

The outstanding events of the end of the 19th and the beginning of the 20th century were the arrival of a new kind of newspaper marked by the foundation of *The Daily Mail* in 1896 and the speeding up of the means of communication, which made it possible to distribute the London newspapers over a large part of the country early in the day. Some important dailies, however, still cater for the needs of the provinces, e.g., *The Yorkshire Post*, which was founded in 1754 and *The Manchester Guardian*, which was founded in 1821. At the same time enormous improvements were made in printing machinery, and the advertising side of successful newspapers became of paramount importance. London dailies of to-day, such as *The Daily Mail*, *The Daily Express*, *The Daily Herald*, have an enormous circulation. From March, 1930, to July, 1933, the circulation of the last named increased from about 300,000 to over 2,000,000.

The production of newspapers is now a highly organised business. Guides are published giving the names and addresses of all the newspapers. The owners have their trade organisations, as have the journalists and the compositors who form their staffs. The Newspaper Press Fund exists to help indigent and aged journalists. Newspapers can be sent through the post for a penny, providing the weight does not exceed six ounces.

Newstead Village of Nottinghamshire. It is 8 m from Nottingham, on the L M S Rly., and has coal mines. Here is Newstead Abbey, originally an Augustinian house. It passed in the 16th century to the family of Byron and was the residence of the family until 1818, when it was sold. Some parts of the old abbey remain. In 1932 the house and park were presented by Sir Julius Cahn to the City of Nottingham.

Newt Genus of the order *Urodela* or tailed amphibia, comprising 18 species of which three are natives of Great Britain. The newts are characterised by having a compressed tail and usually a dorsal fin most marked in the breeding season and amongst the males. They frequent moist places but live in the water when breeding, and like the salamanders, hibernate in winter. The common newt or elf, *Molge vulgaris*, is about 3 in in length.

New Testament One of the two divisions of the Bible. The books therein record the life and teaching of Jesus Christ and the foundation of the Christian Church. Written within the 1st century, A.D., some of them received early recognition and were read publicly in churches, sometimes associated with books like the

Clementine Epistle and the Shepherd of Hermas. The 2nd century gradually formed an authoritative list of those recognised as valid in controversy by orthodox and heretic alike. By 365 Athanasius issued a list, comprising the existing New Testament books, the Synod of Carthage, summoned by Augustine, 397, gave final sanction to the New Testament canon.

Newton Sir Isaac English mathematician, astronomer and philosopher. One of the leading pioneers of scientific discovery, he was born at Grantham, Dec 25, 1642, and educated at the grammar school there and at Trinity College, Cambridge. In 1686, it is said, the fall of an apple suggested to him the law of gravitation ($q v$), but he did not conclude his calculations on this subject until 1684. He sat in Parliament twice, and was Master of the Mint from 1698 until his death. Queen Anne knighted him in 1705. He was a student of alchemy, but is chiefly remembered for his study of gravitation, his work on the spectrum ($q v$) showing the composition of white light, his statement of the laws of dynamics ($q v$), the construction of telescopes, his work in geometry and the differential calculus, the first rules of which he laid down at the same time as Leibnitz. His two chief works were the famous *Principia* and the *Optics*. He died Mar 20, 1727.

Newton 2nd Baron. British author. Born Mar 19, 1857, Thomas Vodehouse Leigh was educated at Eton and Christ Church, Oxford. After six years in the diplomatic service he sat in the House of Commons for the Newton division of Lancashire from 1886 until he succeeded to his father's barony in 1899. In 1915-16 he was Paymaster General and from 1916-19 was Controller of Prisoners of War. Newton wrote a *Life* of his old chief, Lord Lyons, 1913, and in 1929 appeared his *Life of Lord Lansdowne*. Lady Newton wrote *The House of Lyme*, this being the Cheshire seat of the family.

Newton Abbot Market town and urban district of Devonshire. It is 20 m from Exeter and 194 from London, on the G W Rly., being situated at the head of the estuary of the River Teign. Beer and pottery are made and there are railway repairing shops. Pop (1931) 15,003.

Newton-in-Makerfield Urban district of Lancashire. It is 15½ m east of Liverpool and is a junction on the L M S Rly., which has repairing shops here. It is also a colliery centre. The town is sometimes called Newton-le Willows. Pop (1931) 20,150.

Newton Stewart Burgh and market town of Scotland. It is 24 m E of Stranraer, by the L M S Rly., and is on the borders of Wigtownshire and Kirkcudbrightshire. The textile industry is carried on and the town which stands on the Cree, is also a tourist centre. Pop (1931) 1914.

Newtown Market town and urban district of Montgomeryshire. It is 12½ m S of Welshpool and 186 from London by the G W Rly. Woollen goods are manufactured here, notably flannel. The urban district includes Llanllwchaearn. Pop (1931) 6152.

Newtownards Market town of Co Down, Northern Ireland. It is 14 m from Belfast by rly., and is near Strangford Lough. The industries centre round the linen manufacture. Pop (1926) 9587.

Newtown Stewart Market town of Co Tyrone, Northern Ireland. It is on the River Mourne, 24 m from Londonderry, on the G N (I) Ry.

New Westminster City and port of British Columbia. It is 12 m from Vancouver, near the mouth of the Fraser River. It is reached by the C N R., which has a ferry service to Victoria. The chief industries are shipping and salmon canning. Pop 18,000.

New Year's Day First day of the year. The Julian Calendar, introduced by Julius Caesar, made it Jan 1. In Anglo-Saxon England it was Dec. 25, and in medieval Christendom Mar 25. This became Jan 1 in Scotland in 1600, and in England in 1752, when the new style was adopted.

New York State of the United States. In the east of the country. It has a coastline on the Atlantic Ocean and includes the island of Manhattan, on which New York City stands, and Long Island. It stretches from the sea to the border of Canada. Area, 49,200 sq m. Albany is the capital. The largest cities after New York are Buffalo, Rochester, Syracuse, Yonkers and Albany. The staple industry is agriculture, especially the growing of vegetables and the production of milk and butter for the metropolis. Iron and gypsum are mined. New York is one of the 13 original states of the Union. Pop (1930) 12,588,000.

New York City of the U.S.A. It is the financial and commercial capital of the country, and was originally founded by Dutch settlers in 1621 and called New Amsterdam. Captured by the English in 1664 it was renamed New York after the Duke of York (James II.). It is situated at the mouth of the Hudson River, occupies an area of 305 sq m and has a population of 5,873,356. It has a magnificent harbour formed by the rivers Hudson and North, at the entrance to which stands the famous Statue of Liberty.

New York centres on Manhattan Island, but greater New York includes Brooklyn, Bronx, Richmond and other boroughs. Broadway, Wall Street and Fifth Avenue are famous thoroughfares. Bowery is the Jewish and Harlem the negro quarter. Ferries connect Manhattan Island with Brooklyn and Hoboken, and four great bridges cross the East River to Brooklyn. The city has also elevated and underground railways. Two railways, the New York Central and the Pennsylvania, have their termini here. The several airports include Curtis Field and Roosevelt Field, both on Long Island. The buildings are famous, including the Empire State Building (1,000 ft.), the Chrysler and Woolworth Buildings, vast hotels and apartment houses, the cathedral of St John the Divine and many well-known churches.

A cosmopolitan city, New York has many daily newspapers, printed in many languages. Its educational institutions include Columbia University and New York University, and there is a great public library. The Metropolitan Art Museum is one of the greatest in the world. There are over 130 hospitals. Amusements and theatres centre on Broadway, apart from Coney Island (q.v.). Central Park has 840 acres, Bronx Park contains the great New York Zoo, and the beautiful driveway of Riverside Park borders part of the bank of the Hudson. Long Island (q.v.) has a garden suburb.

New York City manufactures about a tenth of the nation's products, besides being a great importing and exporting centre and a great grain port. Wall Street is the financial centre, and the city has many great private banks and a Federal Reserve Bank.

The city is governed by a mayor, five borough presidents and 66 aldermen. The finance department has a controller at its head. It has two broadcasting stations, Brooklyn (54.52 M) and Richmond Hill (49.02 M, 0.6 kW). Pop 6,930,446.

New Zealand Dominion of the British Empire. It is 1200 m east of Australia, consisting of two large islands—North and South Islands—a small one—Stewart Island and several others. Discovered by Tasman in 1642 the coastline was explored by Captain Cook in 1769. It was ceded in 1840 by the Maori chiefs to the British Crown becoming a colony. It became the Dominion of New Zealand in 1907. It is governed by a Legislative Council under a Governor General appointed by the crown, and there is a House of Representatives with 80 members.

The country has a healthy temperate climate, is mountainous, and has numerous lakes and rivers providing facilities for the generation of electricity. Numerous thermal springs and geysers exist and the country is famous for the variety and beauty of its scenery.

Having large areas of well watered, fertile land, New Zealand is well settled and possesses many excellent towns. Agricultural and pastoral pursuits constitute the principal industries, but mining and working the forests are important. The Maoris are specially provided for and are now increasing.

The road and railway systems are extensive and there are many ports, facilitating the use of sea transport from almost all parts of the Dominion. Wellington is the capital but Auckland also on North Island, is the largest city.

Area 103,722 sq m. Pop (1932) (Maori, 69,893) 1,524,921.

New Zealand Flax Perennial herb of the lily order, indigenous to New Zealand and Norfolk Island (*Phormium tenax*). Its sword-shaped leaves, 4-8 ft long, 2-4 in broad, yield a strong fibre used for hinders twine and rope.

Next Friend In Great Britain a person who brings an action in a court of law on behalf of a minor or a person of unsound mind. As neither of these classes can take legal action, a next friend is essential. Such is usually a kinsman and must consent to his name being used.

Ney Michel, French soldier and Marshal of France. Born at Sarrelouis, the son of a cooper, Jan 10, 1769, he enlisted in 1788, and distinguished himself at Jena, Eylau, and Friedland, and chiefly in the Russian campaign of 1812. As commander of the rearguard during the retreat from Moscow, he saved the remnants of the Grande Armée. Louis XVIII made him peer of France, but, sent to oppose Napoleon on his return from Elba, he rejoined him, and fought bravely at Waterloo. At the second restoration he was condemned for high treason and shot, Dec 7, 1816.

Niagara River, forming part of the boundary between Canada and the U.S.A. It flows from Lake Erie to Lake Ontario, and is 36 m long. It is famous because about half of its 326 ft. of fall takes place at Niagara Falls (q.v.).

Niagara Town and pleasure resort of Ontario. It stands where the River Niagara falls into Lake Ontario. At one time it was called Newark, and was the capital of Ontario, or Upper Canada. Pop 1400.

On the American side of the river is Fort Niagara, which was first built by the French in 1675 and was an important frontier port in the various wars down to the one of 1812-15.

Niagara Falls Waterfall on the Niagara River, North America. The river flows between the United States and Canada, and the Falls, perhaps the most celebrated in the world, are divided between the two countries. The American falls are 167 ft. high and are separated by Goat Island from the Canadian or Horseshoe Falls, which are 158 ft. high. The latter are 3100 ft. across, but the American falls are only 1080 ft. It is said that 100,000,000 cubic ft. of water pass over the falls in an hour. The fall is used to generate electric power, and there are treaties between the two countries to prevent the flow from being depleted. The water is gradually wearing away the rock so that the falls are moving slowly backwards at the rate of 6 ft. a year.

Niagara Falls City and river port on the Niagara River, 82 m. from Toronto, and just below the Falls. It is served by the two main railway lines, C.N.R. and C.P.R., and also by American lines. An electric railway connects it with Toronto. Pop 19,046.

The American city of Niagara Falls is on the other side of the river, 18 m. from Buffalo. It is a river port and has many manufactures and an enormous plant for generating electric power. Pop 75,500.

Nibelungenlied German poem. It was composed about 1200 and tells of the deeds of the hero, Siegfried, and his wife, Siglinde, other characters being Brunhilda and Gunther. The Nibelungs are a people to which some of the characters in the poem belong.

Nicaea City of Asia Minor. It was in Bithynia and was one of the capitals of that kingdom. It was founded in 316 B.C. by King Antigonus. Here, in 325, a famous church council was held. This condemned the teaching of Arius and formulated the creed called the Nicene. Arius and his opponent Athanasius both attended the council which also fixed the date of Easter.

The Nicene Creed is used to day in the services of both the Roman and Anglican Churches and in the Orthodox Church of the East, though without the *filioque* clause. In the Church of England it is repeated during the communion service. Its famous *filioque* (also the son) clause, has been the cause of much controversy.

Nicaragua Republic of Central America. It lies south of Honduras, and stretches from the Pacific to the Caribbean Sea, area 51,660 sq. m., pop (1930) 750,000. Managua is the capital. Corinto and San Juan del Sur the principal Western ports. On the E. are Bluefields and other ports, mainly interested in the fruit trade.

Nicaragua produces coffee, fruit, sugar and India-rubber. Mahogany grows in the forests, and among other minerals gold and silver are mined.

Nice City of France. Situated on the Mediterranean Sea, it is the most important town in the department of Alpes

Maritimes. Founded over two thousand years ago, Nice was a busy seaport, frequently under different rule until 1860, since when it has been French. There are fine promenades, notably the Promenade des Anglais. The commercial part lies to the east of the hill upon which the town is built. It is one of the most important towns on the French "Riviera," and is a fashionable winter resort for English people. The main industries are perfumery factories, distilleries, factories for silk, straw, leather goods and tobacco. Pop (1931) 219,549.

Nicholas I, pope from 858-868, asserted the supremacy of the Roman curia, and restored her rights to Thioherga, the divorced wife of Lothaire, King of Lorraine.

Nicholas II (1058-61) had Robert Guiscard as vassal. Nicholas V, born at Pisa in 1398, distinguished himself at the Councils of Basel and Florence and was elected Pope in 1447. By persuading the anti-pope Felix to abdicate, he procured peace for the Church in 1449. He founded the Vatican Library, and sent scholars far and wide to buy and copy Latin and Greek manuscripts. He tried to enlist the aid of Europe in the cause of the Greek Empire, but failed. He died in 1455.

Nicholas Patron saint of Russia and of children, seafarers and merchants. Archbishop of Myra, Lycia, he attended the Council of Nicaea, 325. His remains were taken to Bari, Apulia, 1087. The pilgrimage then originated which popularised his memory. Nearly 400 English churches bear his name. The widespread making of gifts on St. Nicholas Eve, afterwards transferred to Christmastide, accompanied early Dutch colonists to America, where the name was corrupted to Santa Claus. He is commemorated on Dec. 6.

Nicholas I, Tsar of Russia and son of Paul I. Born June 5, 1796, he succeeded his brother, Alexander I, as Emperor in 1825. He waged a successful war against the Persians in 1826 and increased his dominions. He suppressed a rising of the Poles in 1830 and strove to extinguish Polish nationality. In 1848, during the "Revolutionary Year," he assisted in quelling the Hungarian revolt against Austria. In 1855, in the Crimean War, Turkey, supported by the British and French, defeated Russia. Nicholas died during this campaign, Mar. 2, 1855.

Nicholas II, Tsar of Russia. Born May 18, 1868, he succeeded his father, Alexander III, in 1894. He formed an alliance with France and an entente with Great Britain. In 1899 he caused the first meeting of the International Peace Congress at the Hague. At home he refused the people a share in internal administration and opposed the growth of social democracy, but showed liberal leanings in establishing the Duma in 1905, at the end of the Russo-Japanese War of 1904-5. Early in the Great War he closed all liquor shops and influenced by the Empress, who was dominated by Rasputin (a r.), showed a reactionary tendency. The conduct of the war was mismanaged, and in March, 1917, he was forced to abdicate and was imprisoned. He was shot with his family at Ekaterinburg, July 16, 1918.

Nicholson John. British soldier. Born in Ireland, Dec. 11, 1821, he joined the East India Company in 1839, and saw service in Afghanistan. He did excellent work during the Sikh Rebellion of 1848 and was appointed Deputy-Commissioner of the Punjab

in 1851 During the Indian Mutiny he was responsible for the holding of the Punjab, and was mortally wounded at the siege of Delhi in the same year, Sept. 23, 1857

Nickel Metallo element having the symbol Ni, atomic weight 58.69, and melting point between 1450° and 1660°C Nickel is a white, lustrous metal having great hardness and tensile strength, but is malleable, ductile and magnetic It is little affected by air and unattacked by all acids, but is dissolved by mineral acids and after long contact by organic acids

Nickel forms alloys with steel, copper and zinc, all of which are of great economic importance, and it may be deposited electrolytically on metals, constituting nickel plating The chief nickel ores are pyrrhotite or magnetite pyrites from Canada and garnierite from New Caledonia

Nicobar Group of Islands in the Bay of Bengal They are 21 in number and cover 635 sq m The largest are Great Nicobar, Camorta and Car Nicobar There is a good harbour at Nankauri and the chief product of the islands is coconuts The islands became British in 1869 and are governed with the Andaman group, 75 m to the N Pop 9300

Nicomedia Ancient city of Asia Minor now represented by Ismid It was on the Sea of Marmora and was founded by a king of Bithynia Nicomedes I, who made it the capital of his country Diodotus made it his capital, and here Hannibal committed suicide

Nicosia City and capital of Cyprus also called Levkosia It is 25 m from the sea and still has traces of Venetian rule The walls built then still stand Its port is Larnaca Nicosia was one of the centres of disturbance in the Cypriot rebellion of 1931 Pop (1931) 23 507

Nicotine Colourless volatile liquid alkaloid obtained from the leaves of the tobacco plant, *Nicotiana tabacum* It has a strong disagreeable odour, is soluble in water and alcohol, and darkens with age About 2 to 7 per cent is present in tobacco, but the amount varies according to the kind, climatic and soil conditions, and cultural methods Nicotine is highly poisonous, but being decomposed by burning is absent from tobacco smoke, whose harmful effects are due to the presence of carbon monoxide, pyridine and other substances It is used also as an insecticide for plants in the form of a vaporising compound

Nidd River of Yorkshire (W R) Rising on Great Wharfedale, it flows in a northerly direction past Pateley Bridge to the Ouse north of York

Niemen River of Europe It rises in Russia and flows through Lithuania to the Kurisches Hafl, an opening of the Baltic Sea, which it enters by two mouths Grodno and Kovno are on its banks and it is 550 m long It is navigable to Grodno and canals connect it with the Bober and the Vistula The Lithuanians call it the Memel

Nietzsche Friedrich Wilhelm German philosopher Born at Rothenburg, Oct 15, 1844, he studied at Bonn and Leipzig He is the author of several philosophical works beginning in 1878, which have as their main theme a new doctrine of morality Man should concentrate on the development of vital energy and develop into

a "superman," caring only for his own strength and advancement This seemingly anti-Christian doctrine has been wrongly interpreted as meaning "Might is Right," and Nietzsche was long regarded by the world with horror More recently, however, he has been recognised as a constructive, even religious, thinker, and only in part destructive Nietzsche's mind faded 11 years before his death He died Aug 25, 1900

Nieuport Town of Belgium in the province of Flanders It is situated on the River Yser, and was the port of Ypres In the Middle Ages it was strongly fortified, and was besieged by the French in 1488-80 It contains a cloth market, an old town hall and church, and a lighthouse dating from 1280 The locks of Palingbrug here drain the Low country, and in 1914 they were reversed so that water flooded the front on the Yser, thus impeding the German invasion Pop 3016

Nigella Name of the flower popularly called "Love in a Mist" (q v)

Niger River of Africa Parts of it, known before the complete course had been traced, were associated with the Nile and the Congo Rising near Sierra Leone, it flows N E to Timbuctu then E and later, S E, entering Nigeria where important tributaries join It splits into a net work of channels emptying through numerous mouths, scattered over 200 m of coast into the Gulf of Guinea It is an important means of communication and transport in Nigeria It is 2600 m long

Nigeria British Crown Colony and Protectorate in W Africa, originating out of the trading depôts established as far back as the 17th century and later concerned with oil palm products The north is inhabited principally by Mohammedan tribes, in the south pagans predominate The tribes are largely governed through their chiefs. The people are agriculturalists and pastoralists, their surplus produce forming considerable exports Tin and coal mining are established A railway and motor roads have facilitated transport beyond the navigable reaches of the Niger The extreme 'damp heat' of the climate renders it very unhealthful for English people, Area, 372,674 sq m Pop (1931) 19,928,171

Nighthawk Insectivorous bird Closely related to the goatsuckers, it has a wide skull, soft plumage, and can see at night and fly noiselessly like the owl It wanders from the Arctic Ocean to the south of South America, and lays its eggs on the ground or flat roofs

Night Heron Widespread genus of the heron tribe (*Nycticorax*), specially active in twilight and night hours The common European species, 23 in long, with greenish-black plumage and pale straw underparts, bearing three long, thread-like, white plumes behind the head, visits Britain in spring and autumn

Nightingale Bird of the thrush family (*Philomela luscinia*), ranging over Europe and N Africa Arriving in S E England about April 15, the males, 6½ in long, with russet-brown plumage, greyish white beneath, and bright rufous tail utter their melodious song by night as well as day The loosely built nest, placed in a thick hedge near the ground, shelters 4-5 olive brown eggs, after whose hatching the

cock's song ends, and presently the departure southward for the winter quarters begins

Nightingale Florence English nurse and hospital reformer Born May 12, 1820, after training as a nurse she went out during the Crimean War with a staff of 38 women to nurse the wounded In four months the death-rate in the hospitals was reduced from 42 per cent to 2 per cent She made her hospitals efficient throughout, but still found time to go round the wards at night with a lamp comforting the sick She became known as "The Lady of the Lamp"

She was responsible for the founding of hospital schools of nursing In 1907 she was awarded the O M She died Aug 13, 1910

Nightjar Migratory swift-like bird (*Caprimulgus europaeus*) belonging to a numerous cosmopolitan subfamily It breeds in Britain and Europe, spending the northern winter at the Cape The male, 10½ in long, has white-spotted rufous plumage They make a churring note when heating for insect food, sometimes round the udders of goats and cattle, hence called goatsuckers

Nightmare Oppressed state during sleep, accompanied by feelings of fear The word perpetuates the ancient belief that the state is caused by an evil spirit It is sometimes precipitated by stomachic disorder, but Freud's theory of dreams ascribes it to the emergence of repressed wishes from the subconscious into the conscious mind

Nightshade Popular name of several species of British plants The common nightshade, *Solanum nigrum*, bears black berries, occasionally red or yellow The bittersweet or woody nightshade, *S dulcamara* bears scarlet berries The deadly nightshade, *Atropa belladonna*, highly poisonous, bears black berries, cherry sized Enchanter's nightshade, *Circaea lutetiana*, bears tiny fruit

Nihilism Term used in the 19th century for a movement in Russia whose adherents aimed at overturning the existing order The Nihilists were responsible for the murder of the tsar, Alexander II, in 1881, and for other outrages

Nijmegen Town of Holland, in the province of Gelderland It is a railway junction, and has manufactures of pottery, brewing, leather, etc Pop 81,034

The Treaty of Nijmegen was signed on Aug 11, 1678, and concluded the war between France and the Dutch, Spanish and Imperial coalition

Nijni-Novgorod Government and city of central Russia The province has an area of 19,797 sq m and a population of about 2 millions The city, which is the capital of the province, lies at the confluence of the Volga and the Oka and is a great commercial centre It has an annual fair which is held from July 25 to Sept 10 There is trade in metals, cereals and fish In 1918 a university was opened here It has two broadcasting stations (761 4 M, 1 8 kW, and 500 8 M) Pop 185,274

Nike Greek goddess of victory, called by the Romans, Victoria Daughter of the giant Pallas she aided Zeus in his struggle with the Titans and was raised to Olympus She was represented as a winged figure, wreathed or palm-bearing, sometimes

guiding victors' steeds The Roman Victoria bore a shield or wand

Nile River of Africa Rising in the Victoria Nyanza, 3000 ft. above sea-level, it flows north-west, then north into the Sudan, as the White Nile, being joined by the Blue Nile at Khartum Between Khartum and Aswan there are six cataracts, but the river is navigable from above Khartum Below Cairo the river, which is 4000 m long, divides into a delta of 8500 sq m Alexandria is at one of the mouths

The Nile is the source of Egyptian prosperity, which depends entirely on the extent of the annual inundation Irrigation has been practised since 1842, when the Cairo barrage was built The Assuan Dam, completed in 1902 and heightened in 1912, conserves the river water for 200 miles There is another barrage at Assut, and the dam at Semmar on the Blue Nile has brought 300,000 acres under fresh cultivation

Nile Battle of the Naval engagement It was fought Aug 1, 1798, in Aboukir Bay between the British and French fleets The French ships were anchored in the bay, to support Napoleon, who had landed in Egypt They were found by Nelson, who attacked them, and won a conspicuous victory The French lost 13 ships out of 17 engaged

Nilgai Kind of antelope (*Boselaphus tragocamelus*) It is found in the lowland district of India It is fairly large, standing as high as 5 ft The horns of the male are short and straight In colour the animal is brown or brownish grey

Nilgiri Range of hills in India They are in the Deccan, to the S of Mysore The highest peak, Dodabetta, is nearly 9000 ft high, others are over 8000 ft Places in the hills are visited by Europeans during the hot weather The name means "blue mountains"

Nilsson Christine Swedish singer Born at Wederalöf, Sweden, Aug 20, 1843, of poor parents, she studied singing at Paris, where she made her début at the Théâtre Lyrique in 1864 as Violetta She appeared in London as leading prima donna in 1867, and went to America in 1870 After her marriage in 1872, her appearances were rare, and ceased altogether after her second marriage in 1887 She died Nov 22, 1921

Nimbus Term in art for a form of halo surrounding the head of a saint or divine personage It is of ancient origin occurring in Greek and Buddhist art and adopted as a Christian symbol for saintliness in square, rectangular or circular form

Nîmes A city of S France, the capital of the Gard Department, which has a population of 74,102 It was founded and built by the Romans, who built its great amphitheatre, a temple known as the Maison Carrée and the famous aqueduct, the Pont du Gard

Nîmes lies at the foot of the Garrigue Hills and overlooks the plain of the Vistre, which is rich in vineyards It is an important market for wine and brandy, and its chief industry is the manufacture of silk It has a broadcasting station (237 2 M, 1 kW) Pop (1931) 89,215

Nimrod Son of Cush, "a mighty one of the earth," and the founder of Babel (Gen x) A mighty hunter and warrior, his name is used as a symbol for any great hunter

Nineveh City of Assyria Situated on the left Tigris bank opposite

Mosul, 275 m N N W of Babylon, it occupied a walled enclosure of 1800 acres. Metal using peoples displaced an earlier neolithic population (Gon x). After centuries of political activity under Hammurabi and later monarchs it became the royal capital especially under Sennacherib and Ashurbanipal, whose cuneiform library and massive monumental remains excavated by Sir H. Layard (q.v.), are in the British Museum. The Medes aided by Nabopolassar, King of Babylon, brought about its fall, 612 B.C.

Ningpo City and port of China. It stands on the River Yang 16 m from its mouth and 95 m from Hangchow. There are some manufactures and a considerable trade. Since 1842 Ningpo has been open to foreign trade. Pop. (1931) 218,774.

Ninian Saint Apostle of Christianity in N. Britain. Of Welsh birth, and trained in Rome, he was consecrated bishop. Founding at Whithorn, on Wigton Bay, a church dedicated to S. Martin of Tours, about 397, he evangelised the S. Picts up to the Grampians. He is commemorated on Sept. 16. He died about 432.

Niobë In Greek mythology, wife of Amphion, King of Thebes. Taunting Leto with having borne only two children, Apollo and Artemis, whereas she herself had twelve, her six sons fell to Apollo's darts, her daughters to those of Artemis. Niobë became a stone shedding incessant tears, a fruitful theme in ancient art.

Niobium A rare metallic element having the symbol Nb, atomic weight 93.1 and colour steel grey. Discovered by Hatchett in 1801 in the mineral columbite from which the metal receives its alternative name of "columbium". It is associated also with tantalum, uranium and yttrium in other rare minerals.

Nipissing Lake of Ontario. Covering 330 sq. m., it is 50 m long and contains many islands. It is connected by the French River with Lake Huron. The district around which is rich in minerals, is called the Nipissing district.

Nippon Variant of the native name for Japan (q.v.).

Nippur Ancient city of Sumeria. About 100 m to the S.E. of Bagdad. It was a large and flourishing city and a centre of the worship of the Sumerian god Enlil. It was later a city of Assyria and a residence of the kings of Parthia. The site was excavated between 1889-1900.

Nish Town of Yugoslavia. A departmental capital 130 m S.E. of Belgrade, on the Sava tributary of the Morava. It is an important railway junction second only in strategic and commercial importance to Belgrade. It was Constantine the Great's birthplace. Captured by Bulgaria, 1915, it was recovered by Serbia, 1918. Pop. 35,384.

Nith River of Scotland. It rises in Ayrshire and passes through Dumfrieshire to the Selkirk birth, flowing through a beautiful valley called Nithsdale.

The title of Earl of Nithsdale was held by the border family of Maxwell until 1715. William, the 5th earl, a Jacobite, was taken prisoner at the Battle of Preston and condemned to death. He escaped, however, from the Tower of London owing to the skill and devotion of his wife. He died March 20, 1744, his title having been taken from him in 1715.

Nitre Common name for potassium nitrate or saltpetre which occurs in nature as a white incrustation or as crystals in the porous soil in many parts of the world. Commercial nitre is prepared chiefly from nitrate of soda or Chilean saltpetre which occurs over a wide area in S. America as an impure saline incrustation or "caliche". Nitre is used in the preparation of gunpowder, for salting meat and in medicine. Nitre cake is a trade term for the refuse nitre from the manufacture of nitric acid.

Nitric Acid Compound of nitrogen with hydrogen and oxygen commonly known as aqua fortis. It is a colourless fuming liquid when pure, but is yellowish in its commercial form, and is very corrosive, acting upon organic matter and many metals but not upon gold or platinum. It is prepared by heating Chile saltpetre with sulphuric acid in retorts or by oxidation of atmospheric nitrogen by means of the electric arc. It is used in the manufacture of dyestuffs explosives etc.

Nitrification Process by which nitrates are formed in the soil and decaying organic matter by the action of bacteria and other micro organisms. These nitrifying organisms convert the protoids in the soil into ammonium carbonate, then into nitrites and finally into nitrates. These changes take place in the presence of lime or other basic substances moisture and freely circulating air. Free atmospheric nitrogen in the soil also is fixed by bacteria present in the root tubercles of leguminous plants.

Nitrobenzol Derivative of benzol or benzine. It is known also as essence of mirbane and is used largely as a substitute for the natural oil of almonds in the perfuming of soap. It is employed also in the production of aniline and a number of important intermediate dyestuffs. Nitrobenzol is prepared by treating benzene with a mixture of strong nitric and sulphuric acids and is a yellowish liquid having a strong odour of oil of bitter almonds.

Nitrogen Gaseous element having the symbol N and atomic weight 14.008. It forms four fifths by volume of the atmosphere and occurs in nature in the form of nitrates also as a constituent of many animal and vegetable compounds. It is a colourless odourless, tasteless and inert gas which does not support combustion or animal life. It is prepared commercially chiefly from ammonia or by distillation methods from the air, and from atmospheric nitrogen many compounds are now being made.

Nitroglycerin Explosive substance prepared by treating glycerin with a mixture of cold concentrated nitric and sulphuric acids. It is a colourless or pale yellow oily liquid insoluble in water, and while burning harmlessly in an open vessel, explodes violently by concussion or when quickly heated. It is a valuable medicine in the treatment of angina pectoris, Bright's disease and other diseases, for this purpose being often given in a fatty or oily solution and in tablet form when it is quite safe and stable. Its chief use, however, is as an ingredient of cordite, dynamite and other high explosives.

Nivelle Robert George, French general. Born at Tulle, Corrèze, Oct. 15, 1856. After service in China and Algeria, he was appointed General of Brigade in 1911, and fought successfully on the Aisne. In

March 1916, he successfully and gloriously held Verdun against the German Crown Prince, and is famous for his unforgettable words, "Ils ne passeront pas." As commander-in-chief in 1916 he failed and was succeeded by General Pétain (q.v.). He took over the French troops in N. Africa in 1917. He was a member of the Supreme War Council in 1920, and represented France at the Tercentenary of the Mayflower in America (1921). He died Oct. 11, 1924.

Nizam Title of the ruler of Hyderabad, India. It comes from an Arabic word meaning "administration."

Noah Old Testament patriarch. Son of Lamech, and father of Shem, Ham, and Japheth, he built the Ark in which he, his family and some representative animals were saved from the Flood. After its subsidence he became the ancestor of all mankind. Another legend claims him as the first to cultivate the vine (Gen. v-x). See DELUGE.

Nobel Alfred Bernhard, Swedish chemist and inventor of dynamite. He was born at Stockholm, Oct. 21, 1833. His father had manufactured nitroglycerin, and the son continued research in explosives, inventing also blasting jelly and smokeless powder. He died Dec. 10, 1896.

NOBEL PRIZE On his death Nobel left a fortune of £2,000,000, most of which he ordered to be used to found the five Nobel prizes which are awarded annually for the most important discoveries and works for the benefit of humanity in physics, chemistry, medicine, literature and the furtherance of peace in the world. A Nobel Prize for literature was awarded to Rudyard Kipling in 1907, to W. B. Yeats in 1923, to Bernard Shaw in 1925, and to John Galsworthy in 1932. Other British prize-winners have been Sir J. J. Thomson (physics), Sir Ernest (now Lord) Rutherford (chemistry), Sir Ronald Ross (medicine), and Sir Austen Chamberlain, Sir Norman Angell and Mr. Arthur Henderson (peace).

Nobile Umberto, Italian explorer. He was born at Avellino in 1885. In 1926 together with Amundsen, he successfully carried out a polar expedition on the airship *Norge*. In May 1928, he passed over the Pole in the dirigible *Italia* but crashed shortly afterwards. He was rescued a month later by a Swedish search party, but Amundsen and others lost their lives in the search.

Nocturne Dreamy, musical composition, suggestive of night. Introduced by Field and perfected by Chopin, as pianoforte literature. Mozart's "Notturmo" is a piece in three movements for horns and strings, and that of Mendelssohn (in *A Midsummer Night's Dream*), truly an Intermezzo.

Node Astronomical term for the place where the orbit of the moon or a planet intersects the plane of the ecliptic. The position where the planet passes from S to N of the ecliptic is the ascending node, and where it passes from N to S the descending node.

Noel-Buxton Lord English politician. A son of Sir T. Fowell Buxton. Edward Noel Buxton was born in 1869 and educated at Eton and Trinity College, Cambridge. He devoted his time to public affairs and spent some years in Greece and the Balkans. In 1905-06 he was a Liberal M.P., as he was from 1910-18. In 1922, having joined the Labour Party, he was again sent to Parliament for N. Norfolk, his old constituency. In 1924 he was Minister

of Agriculture and he returned to that office in 1929. In 1930 he resigned his office and was made a peer.

Nomad Member of a tribe or community who roam from place to place for their subsistence. They may be hunters, e.g., Australian blackfellows, S. African bushmen or quasi-industrial gipsy vandwellers. Nomadism especially characterises pastoral tent-dwellers on grasslands and steppes who follow their flocks and herds from summer-pastures to winter-pastures.

Nome Town in N.W. Alaska. It is situated on Norton Sound, 13 m. W. of Cape Norton. On the discovery of gold in 1899 it became the centre of a famous mining area, but its population, which in 1900 was 12,500, had decreased in 1930 to 1213.

Nonconformity Dissent from the practices and doctrines of the Established Church. In Great Britain the first secession was made in 1537 by the Puritans whose influence was increased by the misgovernment of the early Stuarts. After the restoration, however, they suffered severe penalties under the Act of Uniformity (1662), the Conventicle Act (1664), the Five Mile Act (1665) and the Corporation Act (1661). Some disabilities thus inflicted were not removed till the Toleration Act was passed (1689) after the accession of William and Mary. But the movement, which included Baptists, Independents and Presbyterians, received fresh strength about 1760 through the secession of the Methodists. In 1892 the National Council of the Evangelical Free Churches was established to protect the rights of the Nonconformists. Recently movements have taken place in the direction of closer unity between the various Free Churches.

Nonjuror One who refuses to take an oath of allegiance. It applies particularly to the bishops, clergymen and others who, for conscience sake, declined to take the oath to William and Mary in 1689. They were therefore deprived of their offices. They included William Sancroft, Archbishop of Canterbury, Thomas Ken, Jeremy Collier, William Law, and about 400 others. They formed a church of their own under their own bishops.

Nonpareil Name of a size of printing type. It is between minion and pearl and is sometimes called six point. Twelve lines go to the inch.

Non sequitur In logic a conclusion that is incorrectly drawn, or does not follow from the premises. They are very common in ordinary life. A man argues "gales cause slates to become loose, a slate on my house has become loose, therefore it was caused by a gale." Logicians say this false assumption is due to an undistributed middle term, the middle term here being gales.

Norbiton Urban district of Surrey. It is 12 m. from London, on the S. Ry. Pop. (1931), 12,652.

Norbury District in Croydon in the county of Surrey. It is 7 m. from the city, just outside the boundary of the county of London, and has a station on the S. Ry.

Norbury in Derbyshire, 7 m. from Uttoxeter, has a church with memorials of the Fitzherbert family, and a station on the L.M.S. Ry. Pop. (1931), 365.

The Irish title of Earl of Norbury has been

borne since 1827 by the family of Toler. The 1st earl, John Toler, was a successful Irish lawyer.

Nordenskiöld Baron Nils Adolf Erik Swedish explorer. Born at Helsingfors, Nov. 18, 1832. He began his exploration and topographical research at Spitzbergen in 1864. In 1879 he discovered and navigated the N.E. passage from the Atlantic to the Pacific along the N. coast of Asia. As a reward he was made Baron of Sweden (1880). He later made two expeditions to Greenland. He published several books giving accounts of his exploration and seafaring work, notably *The Voyage of the Vega* (1881). He died Aug. 12, 1901.

Nore River of the Irish Free State. It rises in the northern part of Co. Tipperary and flows S.E. through Leix Co. and Co. Kilkenny until it falls into the River Barrow just above New Ross. It is 70 m. in length.

Nore Sandbank at the N. of the Thames. It is 3 m. from Sheerness and is considered to be the mouth of the Thames. It has a lighthouse and is famous for the mutiny in the navy that took place here in 1797.

Norfolk County of England. It lies on the E. coast, with an extensive coastline, and is the fourth largest of the counties. Area 2119 sq. m. It is mainly agricultural, while there is a flourishing fishing industry on the coast, centering in Yarmouth. Much stock is raised and Norfolk red pigs are a well-known breed of cattle. Norwich is the capital, and Yarmouth is another large town. There are some popular watering places among them Cromer, Sheringham, Hunstanton and Mundesley. It was the centre of a vigorous woolen and silk trade from the 12th century when the Flemings established themselves in the county. It sends five members to Parliament. Pop. (1931) 504,293.

Norfolk City of Virginia, U.S.A. It is situated on Elizabeth River and is an important port. Its industries include coffee roasting, cotton and silk goods, fertilisers, tobacco and cigars. The shipping trade is extensive. Pop. (1930), 129,710.

Norfolk Island in the Pacific Ocean. It is 900 m. from Sydney and was discovered in 1774 by Captain Cook. It covers about 14 sq. m. and on it fruit is grown. In 1856 the descendants of the mutineers of the Bounty were brought here from Pitcairn Island. Since 1914 it has been part of the Commonwealth of Australia, being governed by New South Wales. It is the headquarters of the Melanesian Mission. Pop. 1000.

Norfolk Dukes of English title held since 1483 by the family of Howard. It is the senior dukedom in the peerage.

In 1312 Thomas of Brotherton was granted the earldom of Norfolk. After his death his daughter was created Duchess of Norfolk, and her grandson Thomas Mowbray became the first Duke of Norfolk in 1337. He tried to lessen the power of Richard II and was banished from England and attainted. Nor was his son, Thomas (1325-1405) allowed to resume the title. In 1435 John Mowbray (1415-61), brother of Thomas, regained the dukedom which became extinct at the death of his son in law Richard in 1483.

It was then granted to John Howard (1430-85), a member of the powerful Howard family. John lost the title because of his support of

Richard III, but it was restored to his son, Thomas (1443-1524) after his defeat of the Scots at Flodden, 1513. Thomas Howard, 3rd duke (1473-1554), served Henry VIII in opposition to Wolsey. When Catherine Howard, his niece, was executed he was accused of treason and remained in prison during the reign of Edward VI, only regaining his dukedom in 1553. Thomas Howard, 4th duke (1536-72) intrigued with Spain so that he might marry Mary, Queen of Scots, but this was discovered and he was beheaded. The dukedom was restored in 1660, and bestowed on Thomas Howard (1622-77) 4th Earl of Arundel.

Later dukes were Charles Howard, 11th duke (1740-1815), an important Whig, Henry Charles Howard, 13th duke (1791-1856), a Roman Catholic, who, as a member of the House of Commons, did much to further Roman Catholic education. Henry Fitzalan Howard, 14th duke (1847-1917), was Postmaster General, 1895-1900. The first Lord Mayor of Sheffield, he served in the South African War, and was a notable figure in public affairs.

Norfolk Thomas Howard, 3rd Duke of English nobleman and soldier. Born in 1473, he became Lord High Admiral in 1513, and in 1514 led the English Army against the Scots at Flodden. He was created Earl of Surrey the same year. He went to Ireland as Lord Deputy.

He succeeded his father in 1524, and with this added prestige led the anti-Wolsey party. He favoured the marriage of Anne Boleyn to Henry VIII, and in spite of her execution, remained in favour. He put down the rising known as the "Pilgrimage of Grace" in 1536 and led armies in France and Scotland. He was put in prison for his share in his son's treason in 1547, and kept there till 1553, when his position was restored. He tried unsuccessfully to suppress the rebellion under Sir Thomas Wyatt and died on Aug. 25, 1554.

Norham Village of Northumberland. It is 8 m. from Berwick-on-Tweed, and 340 m. from London by the L.N.E. Ry. It is visited for its castle, which, mentioned in *Marmion*, was a border fortress belonging to the Bishop of Durham. It is the centre of a small district called Northumberland, which was part of the county of Durham until 1844.

Norman Inhabitant of Normandy. The Normans were really Northmen who settled in the northern part of France and also in Italy and Sicily where they have left extensive traces of their presence and where they developed a somewhat remarkable civilisation. In 1066 there was a Norman invasion of England in which William, Duke of Normandy, known as "William the Conqueror," overcame the Saxons and ruled England.

The form of architecture called Norman preceded the Gothic. It is distinguished by the rounded arch and to it belong some of the oldest buildings in England.

Norman Montagu Collet British financier. He was born in 1871 and educated at Eton and King's College, Cambridge. He served with distinction in the Boer War and was awarded the D.S.O. He became governor of the Bank of England in 1920, and a member of the Privy Council in 1923. He has since taken an active part in public affairs, notably during the financial crisis of 1931.

Normanby Village of Yorkshire (N.R.). It is 5 m. W. of Pickering. From here the family of Phipps takes the title

of marquess, given to the 2nd Earl of Mulgrave in 1838. The family seat is Mulgrave Castle, near Whitby, where the marquess conducts a private school.

Normandy District of France formerly a province. In the north of the country, Normandy is now divided into the departments of Seine Inférieure, Eure Orne, Calvados, and Manche. It was taken by Rollo and his Norsemen in 912, and was an English possession from 1066, but was lost finally in 1449. The chief towns are Rouen, the capital, Dieppe, Havre Caen, Bayeux, Cherbourg and Mont-St-Michel.

The ground is fertile, producing corn, hemp, flax and fruit (chiefly elder-apples). There is iron near Caen. It has large fisheries, and sheep and dairy-farming in the interior.

Normanton Urban district and market town of Yorkshire (W R). It is 10 m from Leeds on the River Calder and is a junction for the LMS and LNE Rlys. The industries include coal mines and chemical works. Pop (1931) 15,684.

Norn In northern mythology, a divinity of fate. Three are usually reckoned, two of them kindly, one malignant, they controlled human destiny in the manner of the classical Fates (*g v*). In some forms of the myth they are called Past, Present and Future, dwelling beside the well of fate by the world-ash, Yggdrasil.

Norse Adjective preferably denoting the old language of Norway. Pertaining to the N Germanic group of Indo-European languages, it was carried in the Viking age to Iceland where, down to the 15th century, it became enshrined in imperishable sagas. It also reached Greenland, the islands of N Britain and remote parts of Scotland, especially Caithness, surviving in Orkney and Shetland down to the 18th century. The word also denotes synonymously all the early Scandinavian civilisation.

Northallerton Urban district and market town of Yorkshire (N R). It is 30 m from York on the LNE Ry. The chief town of the north riding. Its industries include brewing and malting and some manufactures. The Battle of the Standard (*q v*) was fought near here in 1138. Pop (1931) 4787.

Northam Market town and urban district of Devonshire. It stands on the Torridge about a mile from Bideford, and includes the watering place, Westward Ho'. There are golf links on Northam Barrows. Pop (1931), 5561.

Another Northam is a district in the city of Southampton, on the S Ry. Pop (1931) 11,591.

North America Term applied to the whole of the northern portion of the American continent, including the United States, Canada, Alaska, Newfoundland and Mexico. It has an area of some 8,200,000 sq m, the length being approximately 5600 and the breadth varying from 200 to 3000 m. Pop 138,000,000 (approx).

The chief physical features are the Laurentian Plateau in the north of Canada, the hilly Appalachian area from Newfoundland to Alabama, the western highland which includes the Rocky Mts., and the vast central plains or prairies. Important rivers are the Mississippi, St Lawrence, Mackenzie, Columbia, Colorado, Hudson, and others.

It is an area of great fertility and considerable mineral wealth. Gold is plentiful in many districts, oil, coal, iron and most of the essential minerals are also found here. Fur-bearing animals are a source of considerable wealth, and large stretches of country have such rich soil that agriculture is a profitable industry.

The original inhabitants were the American Indians of different tribes. These have tended to decrease until quite recent years when some increase in the Indian population has been observed. The history of the continent starts with its discovery by Christopher Columbus in 1492, though earlier voyagers had undoubtedly sighted parts of it, and there had been European settlers in Greenland.

Northampton County town of Northampton, England, 68 m NW of London. The town is situated on the River Nene. Famous for the manufacture of shoes it has also tanning and textile works, hawkeries, iron foundries, brick works and an extensive cattle market. Both early British and Roman remains are found. In the 6th century it was the chief settlement of the Angles, and in the time of Edward the Elder was occupied by the Danes. Its charter was granted in 1460. S Sepulchre's, one of England's four round churches, was built by the Templars, and S Giles' and S Peter's are both ancient. It played an important part in the Wars of the Roses and in the Civil War.

Northampton Marquess of A title borne by the Parr family, the most important of whom was William, who was born in 1513, and was the brother of Catherine Parr, 6th wife of Henry VIII. He was created Earl of Essex in 1543, and Marquess of Northampton four years later. During the reign of Edward VI, he supported the cause of Somerset and Northumberland, and after Edward's death favoured the accession of Lady Jane Grey. For this he was sentenced to death, but the sentence was reduced to forfeiture of his title and estates. On the accession of Elizabeth, however, he returned to favour, and was again created marquess in 1559. He died on Oct. 28, 1571.

The second Marquess was Spencer Joshua Alwyne Compton, who received the title in 1812. He was a distinguished politician and man of letters, who assisted Wilberforce in the cause of negro emancipation and held the office of President of the British Association. The present Marquis (William Bingham Compton) succeeded in 1913. His heir, Edward Robert Compton, was born in 1891.

Northamptonshire County of England. In the E of the country, it covers 998 sq m. Northampton is the county town. Other places of importance are Peterborough, Kettering, Wellingborough and Higham Ferrers. The chief rivers are the Welland, Nene and Great Ouse. Places of interest are Burghley House and Althorp, and there are remains of the forests of Witlebury and Rockingham. Northamptonshire is a hunting county and a first-class county in cricket. It is in the diocese of Peterborough, and has two county councils, the county proper and the soke of Peterborough. Pop (1931) 307,428.

The Northamptonshire Regiment was formerly the 48th and 58th of the line. The former was raised in 1741 and the latter in 1755. The depot is at Northampton.

North Bay Town and pleasure resort of Ontario In the N of the province, it is on Lake Nipissing, 360 m from Montreal and 190 from Toronto, by the C.N.R. and C.P.R., and also by the Temiskaming and Northern Ontario Rly., and is the centre of a mining district. There are some manufactures. Pop (1931) 15,628

North Berwick Burgh and seaside resort of East Lothian It is 23 m E of Edinburgh by the L.N.E. Rly., and is situated on the Firth of Forth It is a famous golfing centre, and here is Tantallon Castle Pop (1931), 3,173

Northbrook Earl of British states man Born Jan 22, 1826, Thomas George Baring was the son of Francis Thornhill Baring, First Lord Northbrook. The father had held several successive posts in Whig ministries and the son was in turn Lord of the Admiralty, Under Secretary for India, Under-Secretary for War, Governor General of India (1872-1876), and First Lord of the Admiralty After his term of office as Governor General in India he was created an earl (1876) He died Nov 15, 1904, being succeeded by his son, Francis George

Northcliffe Viscount. English journalist Alfred Charles William Harmsworth was born in Dublin July 16, 1865, the eldest son of Alfred Harmsworth, a barrister In 1880 he entered a news paper office, and in 1882 he was made assistant editor of a journal called *Punch* In 1885 he went to Coventry and here he worked on papers owned by Messrs. Milford & Sons returning later to London to serve in the office of Sir George Newnes

In 1888 Harmsworth founded a weekly paper called *Answers*, which soon proved a success Other papers were started and the foundation was laid of the great publishing business now known as The Amalgamated Press After some years of success in launching weekly publications, he and his brother Harold bought, in 1894, *The Evening News*, a London daily paper In 1896 they founded *The Daily Mail* a halfpenny daily paper, the first issue appearing on May 4

For the next 25 years Harmsworth was the most influential newspaper proprietor in the country Continually acquiring new interests he founded *The Daily Mirror* in 1903 and in 1905 bought *The Observer* In 1908 he became chief proprietor of *The Times* In 1911 he sold *The Observer* and later *The Daily Mirror*, but he kept control of *The Daily Mail* and *The Times* to the end

In 1895 Harmsworth stood unsuccessfully for Parliament for Portsmouth In 1904 he was created a baronet and in 1905 Baron Northcliffe He took a great interest in motoring, and by the prizes he offered did a great deal to encourage aviation He also financed an expedition to the North Pole In 1914, on the outbreak of the Great War, he devoted all his energies to the furtherance of the cause of the Allies, and was continually urging more vigorous measures In 1917 he went to the United States as head of the British mission and on his return was made a viscount In 1918, having declined the office of Minister for Air, he became director of propaganda in enemy countries He died after a long illness on Aug 14, 1922 His widow, who married Sir Robert Hudson in 1923 was Mary Elizabeth, daughter of Robert Milner He left no children, and his title died with him

North-East Passage Route through the Arctic Ocean from Europe to the Pacific Ocean In the 16th century and later several navigators tried to find it, but not one of them succeeded until 1878-79 In those years A. E. Nordenskiöld made the full voyage

Northern Ireland Part of the United Kingdom of Great Britain and Northern Ireland. Under the Government of Ireland Act, 1920 Northern Ireland consists of the six counties of Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone, with the two cities of Londonderry and Belfast, the capital Its constitution is federal in type, certain powers being reserved to the Imperial Parliament The Northern Irish Parliament has a House of Commons of 52 elected members and a Senate of 28 senators The executive power is vested in the Governor now (1936) the Duke of Abercorn, who was elected in 1934 for a further term of six years The principal industries are linen manufacture, shipbuilding (Belfast being the chief industrial centre), and agriculture Roughly a third of Northern Ireland's total acreage (3,351,444) is under cultivation, the chief crops being oats, potatoes, flax and hay Of the total population (1½ millions) there is a Catholic and Nationalist minority of 420,000

Northern Territory Part of the Commonwealth of Australia, on the N coast between Queensland and W Australia and extending to S Australia lying almost entirely within the tropics A central plateau, with grassy areas, slopes gradually to the low coastline Further south the Territory is sandy and dry Some cattle are raised but little development has taken place Gold was discovered at Tennant's Creek in 1933 The capital is Port Darwin, the area 523,620 sq m Pop—native, 21,242 others, 4,193

Northern Union League or association that exists to control a game of football that has developed from the Rugby game The clubs belonging to it are composed of professionals and are chiefly in Lancashire and Yorkshire The union came into existence in 1895 when the Rugby Union refused to allow professionalism The number of players is 13 a side, and there is no line out Six players form the scrummage The clubs form leagues to play matches for a championship against one another

Northfleet Urban district of Kent It is 2½ m from London, and stands on the Thames just above Gravesend Here are paper mills, and also chemical and cement works Pop (1931) 16,429

North Foreland Chalk headland on the E coast of Kent about 1½ m N of Broadstairs It forms the N.E. corner of the Isle of Thanet, and has a lighthouse whose light is visible 20 m away

North Island Northern of the two chief islands of New Zealand It covers 44,281 sq m, and the chief cities therein are Auckland and Wellington It is divided into four provincial districts—Auckland, Hawke's Bay, Wellington and Taranaki It is famous for its sheep, and its warm climate is very suitable for the growing of fruit Pop (1932) 984,277 See NEW ZEALAND

North Pole Northern terminus of the axis of the earth It is at a latitude 90° N and is in the Arctic regions

Attempts to reach the pole failed until April 6, 1909, when Robert E. Peary (qv) reached it. Since then it has been reached by other explorers, while some of them have flown over it. See ARCTIC EXPLORATION

North Sea Sea bounded by Norway and Denmark on the E, England on the W, Germany and the Netherlands on the S and the Arctic Ocean on the N. It is part of the continental shelf on which the British Isles stand. It is shallow, averaging about 60 fathoms, and slopes from N to S. It is a rich fishing ground. The most productive fisheries are the Dogger Bank in winter and the Continental coasts in summer.

North Sydney Seaport of Nova Scotia. It is on an arm of Sydney Harbour, 18 m from Sydney, by the C.N. Rly. Around are coal mines, and from here coal is exported. Fishing and tanning are other industries, and it is a centre for the trade with Newfoundland. Pop 6585.

Northumberland Most northerly county of England. Separated from Scotland by the Cheviot Hills and the Tweed, it has a coastline on the North Sea. Newcastle upon-Tyne is the county town, other towns being Alnwick, Berwick-on-Tweed, Wallsend and Hexham. The county is rich in coal and contains large industrial areas centering largely on the Tyne, where are iron-works, blast-furnaces, shipbuilding yards and factories producing glass, electrical goods, pottery and machinery. Barley and oats are the chief agricultural crops, but sheep-rearing is the most important form of agriculture. Ten members are returned to Parliament.

The county has considerable Roman remains including Hadrian's Wall. The abbey of Hexham and Lindisfarne are famous, as are the castles of Alnwick and Warkworth.

Northumberland Duke of English title held by the family of Percy. In 1377 Henry Percy was made Earl of Northumberland and the title was held by his descendants until 1670 when it became extinct. Concurrently from 1551 to 1553 John Dudley was Duke of Northumberland. In 1683 George, a natural son of Charles II, was made Duke of Northumberland, but he died without heirs in 1716.

In 1749 Algernon Seymour, 7th Duke of Somerset, who had married the heiress of the Percies, was made the Earl of Northumberland. His son-in-law, Sir Hugh Smithson, succeeded, by special arrangement to his titles, taking the name Percy. In 1766 he was made a duke and the present duke is his descendant.

Alan Ian, the 8th duke, who died in 1930 was one of the proprietors of *The Morning Post*. The duke's chief seat is Alnwick Castle and his estates are in Northumberland. His eldest son is called Earl Percy.

Northumbria Name of one of the kingdoms of England in Anglo-Saxon times. It consisted of two smaller kingdoms, Bernicia and Deira, and came into existence about 600. For a time it was the strongest of the English kingdoms, but in less than a century it was subordinate to Mercia or Wessex. Its kings, however, remained until about 900. Later it was one of the great earldoms and was ruled for a time by Tostig.

North Walsham Market town and urban district of

Norfolk. It is 14 m from Norwich, and 131 from London, by the L.N.E. Rly and a joint line. The Paston Grammar School is associated with Nolson. Pop (1931) 4137.

North-West Frontier

Province. Most northerly district of British India. It is situated roughly north of Baluchistan, between the Indus and Afghanistan. The capital is Peshawar, which, except for Dera Ismail Khan, is the only town of note in a province, which is mainly agricultural. The inhabitants are mostly Pathans, Mohammedans in religion, and speaking the Pushtu language. The province was created on Oct. 25, 1901. Its area is 13,419 sq m and its population (1931) 2,425,076.

North-West Passage

Route from the Atlantic through the Arctic round the north coast of America to the Pacific. Its discovery was the object of many British explorers. In 1714 Parliament offered a reward of £20,000 to the first discoverer of the Passage. It was in the attempt to find this route that Sir Benjamin Franklin and his associates perished in 1845. The Cahots, Gilbert, Davis, Baffin and others attempted the passage, it was first navigated in 1903-05 by Roald Amundsen.

North-West Territories

Administrative district of Canada. Originally Rupert's Land and the North West Territory, it was purchased from the Hudson's Bay Co. in 1867 by the Dominion Government. Diminished in size by the formation of Manitoba (1870) and Saskatchewan and Alberta (1905), it now consists of the mainland west of Hudson Bay, east of the Rockies and north of latitude 60°N, including the northern archipelago. Its area is 1,258,217 sq m, and it is divided into the districts of Mackenzie, Keewatin and Franklin. The population consists mostly of Indians and Eskimos. Fur is the chief product.

Northwich Market town and urban district of Cheshire. It is 18 m from Chester on the L.M.S. and Cheshire Rlys. Here the River Dane falls into the Weaver, which is navigable. The chief industry is salt mining, and there are chemical works. The town has some picturesque, half-timbered houses. Pop (1931) 18,728.

Northwood Part of the urban district of Ruislip. Northwood. Greatly developed in the 20th century, it has become a residential suburb of London, from which it is 14 m distant by the L.N.E. and Metropolitan Rlys. Here is the Mount Vernon Consumptive Hospital. Pop (1931) 16,038.

Norton St. Philip Village of Somerset. Here is the George, which dates from the 15th century, and is said to be the oldest inn in England. Here Monmouth spent the night before Sedgemoor. It may be reached from Bath, which is 6 m away.

Norway Country of N. Europe. A kingdom, it forms the W. portion of the Scandinavian Peninsula and has an area of 124,588 sq m. Bounded on the N. by the Arctic Ocean, S. by the Skagerrak, E. by the frontiers of Sweden and Finland, its W. seaboard is on the North Sea and the Atlantic. The land forms a lofty plateau (altitude 1600 ft.), the N. and W. coasts deeply indented by fjords, and the E.

portion marked by valleys. There are numerous lakes. Owing to the rocky and mountainous nature of the terrain, the arable land is only a small proportion of the area, limited to the vicinity of the lakes and floods, and the valleys.

The capital is Oslo (pop., 1930, 253,124) on the Oslo fiord. Important towns include Bergen (98,303), Stavanger (46,780), and Trondheim (54,458). There are important fisheries. Natural water power has been extensively exploited, coal deposits being scanty. There are immense supplies of timber.

The present kingdom dates from 1005 when the union with Sweden (existing from 1814) was ended. The ruler is Haakon VII, formerly Prince Charles of Denmark, born 1872. In 1806 he married Princess Maud of England. The legislative assembly or Storting has two branches, the Odelsting and the Lagting.

Norwich City and county borough of Norfolk. The county town, it is on the River Wensum, close to its junction with the Yare. It is 116 m. from London on the L.N.E. Ry. Formerly a centre for the manufacture of worsteds, it still produces crapes and other textiles. Boot and shoe making is a leading industry, and there are engineering works, foundries, hewerworks and tanneries. Starch, mustard, cornflour, etc., are manufactured on a large scale. The cathedral (1090-1800) has two Norman chapels. St Peter Mancroft Church and the Guildhall are 15th-century buildings, and St Andrew's Hall, used for music festivals, dates from the same period. The castle with a Norman keep, is now a museum. Pop. (1931), 126,207.

Norwood District of London. It is on the S. side of the river, mainly in the borough of Lambeth, and is divided into Upper, West and South Norwood, with stations on the S. Ry. The buildings include the Royal Normal College of Music for the Blind. There is a large cemetery at West Norwood and on Beulah Hill there was a spa.

There are several other places of this name in England. One is Norwood Green near Southall in Middlesex and another is a village in Derbyshire famous for its church.

Norwood Cyril, English educationist. The son of a clergyman, he was born Sept. 15, 1875, and was educated at the Merchant Taylors' School and St John's College, Oxford. After a brilliant career he passed first into the civil service, and for two years was a clerk at the Admiralty. In 1901 he left the Service and became a master at Leeds Grammar School, in 1906 he was elected head master of Bristol Grammar School, and in 1916 he went to Marlborough where he introduced some rather drastic reforms. He was headmaster of Harrow from 1926 to 1934. Dr Norwood has written on educational subjects.

Nose Organ concerned with smell and respiration. In man it forms above the mouth a facial prominence whose shape varies racially and individually. Two bony cavities divided by a partition or septum, partly of bone, partly of cartilage, are lined with specially modified mucous membrane constituting the essential organ of smell. This communicates with the olfactory nerves passing through perforations in the roof bones. For respiration, openings outwards

NOSE-BLEEDING Slight bleedings from the nose in young persons need not cause alarm. If the flow of blood persists, place the patient in an upright position with his mouth open, his arms above his head and an ice bag or cold compress at the back of his neck and on the bridge of his nose.

Notary Official usually a solicitor or other law agent who attests or certifies documents especially bills of exchange. To become a notary a man must pass an examination, and in England be admitted by the representatives of the Archbishop of Canterbury, a reminder of the time when the notary was an ecclesiastical official. There is a Society of Notaries in London.

Notation Written symbolisation of musical sounds. Notation may be phonetic or diastematic. The Ancient Greek system was phonetic, also the modern Arabian system, the old tabularies certain 'break' systems and the Paris Galin Chevè and Tonio Solfa methods of today. Sound, scale relationship and key-distance are their bases. The diastematic system of "Notation by Intervals" comprised the "names," figures, and notes of ecclesiastical practice from which our present notation has evolved. The pitch of sounds is now expressed by the positions of notes and the presence of clefs on sets of five lines called "staves." Their relative duration is defined by variously shaped notes. Key and rhythm are shown by signatures. The rhythmic scheme is shown by barlines which also affect the accentuation of the notes.

Notification Act of giving notice. It is chiefly used in Great Britain in connection with infectious diseases as in tuberculosis. Certain diseases are notifiable, that is, the doctor attending the case must notify it to the medical officer of health for the district. The Ministry of Health can declare any disease notifiable, and a local authority has the same authority within its area. Since 1901 certain diseases that arise from occupation, such as lead poisoning and anthrax, have been notifiable.

Notre Dame French term meaning "Our Lady." Many churches are dedicated to the Virgin and called by this name. The most famous is the cathedral in Paris. Begun in 1163 and finished 200 years later, it is a magnificent Gothic building standing on an island in the river. Its stained glass is one of many notable features. Another is the Sainte Chapelle.

Nôtre Dame de Paris is a novel by the 19th-century French author Victor Hugo, and deals historically with Notre Dame Cathedral. It has been translated into English under the title of *The Hunchback of Notre Dame*.

Nottingham City and market town of Nottinghamshire. The county town, it stands on the River Trent, 123½ m. from London on the L.M.S. and L.N.E. Ry. St Mary's Church (Perpendicular, 15th century), St Nicholas and St Peter's are ancient buildings. There is a Roman Catholic cathedral. The castle is a museum and picture gallery. A new university building was opened in 1928 and the new Civic Hall in 1920. The city sends four members to Parliament. The leading industry is lace manufacture, others deal with clothing and hosiery. There are

two noted association football clubs—Notts Countr and Notts Forest. Pop (1931) 268,801
Nottingham Earl of English title held by the families of Mowbray, Howard and Finch successively. The most important holders were—

(1) Charles Howard (Lord Howard of Effingham), English admiral and general. He was born in 1536 and in 1588 had charge of the preparations against the Spanish Armada as Lord High Admiral of England. He served as one of the commissioners for the trial of Mary, Queen of Scots (1586), and was ambassador to Spain in 1605. He was created Earl of Nottingham in 1599, and died in 1624.

(2) Daniel Finch, English politician. He was born in 1647 and entered Parliament in 1679. He became leader of the Jacobite Tories, and was appointed Secretary of State under William and Mary, but was forced to retire after the naval failures of 1692-3. He was in office again from 1702-4, and died in 1730.

Nottinghamshire County of England in the north midlands, it is wholly inland and covers 844 sq m. Nottingham is the county town, other boroughs are Newark, Mansfield, Worksop, and E Retford. Southwell is the seat of the bishop whose see embraces the county. The chief rivers are the Trent and the Idle. The county is mainly agricultural in the E and industrial in the W, where are extensive coal mines. A feature of the county is the woodland district called the Dukeries in which are Clumber, Thoresby and Rufford. Another fine house is Welbeck Abbey. Newstead is a place of interest. The county has a first-class cricket team, which won the county championship in 1929. It is also a hunting area. It sends 5 members to Parliament. Pop (1931) 712,681.

Novarro Ramon Film actor. Born at Durango, Mexico, in 1900, he received a thorough education in violin-playing, dancing and opera-singing, and is noted for his handsome face and pleasant voice. He acted in *Scaramouche*, *Ben Hur*, *The Student Prince*, He visited Britain in 1935-36.

Nova Scotia Maritime province of Canada. It has an area of 21,428 sq m and a pop (1931) 512,027. The island of Cape Breton at the N.E. end of the peninsula from which it is parted by the Gut of Canso, has an area of 3120 sq m. The peninsula is joined to the part of New Brunswick by the Isthmus of Chignecto, 11-12 m wide. The capital is Halifax. Sydney, on Cape Breton, ranks next in importance. There are many lakes in both portions. The island has extensive coal deposits, and on the peninsula are found also copper, iron and gold. There are important fisheries. First settled by the French, Nova Scotia passed to England in 1621, its possession being contested by both nations thereafter till 1713 when by the Treaty of Utrecht it was ceded to Britain. It is governed by a ministry responsible to a House of Assembly of 35 members. The province sends 10 senators and 14 M.P.'s to the Dominion Parliament.

Novatianism Schism which arose in 3rd-century Christendom. Novatian, Bishop of Rome, protested against the lax readmission of communicants who, during the Decian persecution, relapsed into paganism. His followers spread over the Empire, calling themselves Catharists or Peritans, by the 6th century they were reabsorbed.

Novaya Zemlya Group of islands in the Arctic Ocean belonging to Russia. It consists of two large islands and many smaller ones between Barents Sea and Kara Sea. Area is 35,000 sq m. There are a few inhabitants, but the interior is largely unknown.

Novel Work of prose fiction, prima facie one that has a background of life. It developed from the romance which deals with legendary matter and origins in the novella of Boccaccio and other writers in the 18th century English and French writers began to express their ideas in novel, and in the 19th and 20th centuries became the most popular form of literature.

The history of the English novel has been summarised as follows: "In the 150 years that were the flowering time of English fiction, between the publication of Fielding's first novel and Meredith's and Hardy's, the novel has been adapted to an infinite number of different shapes, domestic, sentimental, realistic, philosophical, didactic, propagandist. But all great novels have this in common that they are an interpretation as well as a presentation of life, that they view the temporal against a background of the eternal, and that they are an attempt to reconcile the known with the unknown. Since the Great War the literary novel in Europe has concerned itself very largely with the problems of psychology."

Novello Ivor British actor and composer. Born Jan 15, 1893, was educated at Magdalen College, Oxford, was a chorister of Magdalen College and studied composition under Dr. Brewer, Gloucester. He wrote many songs, including "Keep the Home Fires Burning." He has been in management on the stage with *The Roar* 1924. He has acted in several of his plays—*The Rat*, *Symphony in Two Flats*, *Lived with You*, *Glamorous Night* (1935). He has also acted star parts in many films.

Novello Vincent English musician and publisher. Born in London Sept 6, 1781, the son of an Italian father and an English mother, he was a chorist at the Sardinian Chapel where he learnt organ. He was organist in several churches in London and was a founder of the Philharmonic Society in 1813. He wrote much sacred music, and introduced into England many unknown compositions by the great masters. His first work in 1811, a collection of sacred music, marked the founding of the publishing house of Novello. He died Aug 9, 1861.

Novocaine Crystalline salt which is very soluble in water. Novocaine is known also as ethocaine hydrochloride. It is a highly complex substance prepared in several stages from glycol ether, and is used as a local anesthetic in surgery, particularly by dentists, as a toxic though less efficient substitute for cocaine.

Noyes Alfred. English poet. Born in Staffordshire, Sept 16, 1880. First volume of poems was *The Loom of Y* (1902), but his *Forty Singing Seamen* (1908) established his fame as a poet of the sea. He lectured in America in 1913 on *The Sea in English Poetry*, and from 1923 he was Professor of English Literature at Princeton. Amongst his other publications are *A Salute from the Fleet* (1915), *Wa*

Shadows (1917) *Robin Hood* (1927) *The Immortal Legions* (set to music by Sir Edward Elgar), the *Last Voyage* (1930), *The Torchbearers* (1931) and (prose) *The Unknown God* (1934)

Noyon City of France. It is 67 m from Paris on the little River Verso. The chief building is the cathedral, a beautiful edifice which was damaged during the Great War, when the city was occupied by the Germans. Noyon was one of the capitals of the Frankish kings and here John Calvin was born. Pop 7000

Nubia Region in Africa. Extending from the Red Sea to the Nile and from Egypt to Abyssinia it was important in ancient times, later being known as Ethiopia. It is now largely in the Anglo Egyptian Sudan, where the name is preserved as the Nubian Desert.

Nucleus Latin word, meaning "kernel," denoting the central mass round which matter gathers. In physics, it denotes a central particle, constituting with its electrons an atom, or the densest region of a comet's head or sun spot. In biology, it denotes a roundish body included in and essential to the growth of an animal or vegetable cell (*q v*)

Nudism and Nudist Movement. See SUN BATHING

Nuisance In law something that causes injury, loss or inconvenience to another. Public nuisances include the carrying on of offensive or dangerous trades, the depositing of rubbish in a public place, keeping a disorderly house, the ownership of foul drains and other things likely to damage the health or morale of the community. There are also private nuisances, such as making continuous noises near a dwelling house. The sanitary inspectors and other officials have power to stop public nuisances which they do by obtaining an order from a Court of Law.

Nullity Word used in a legal sense in connection with marriage. The courts of law have power to declare a marriage null and void on several grounds. These include insanity or impotence on the part of one of the partners, a prior marriage or consanguinity. A marriage may also be declared null if the consent of one of the parties was obtained by fraud.

Numbers Book of. Fourth book of the Old Testament. The title indicates its statistical records of two national censuses, beginning and ending the wilderness wanderings (I iv, xxvi). Notices of outstanding events include the rebellion of Korah, Dathan and Abiram, the visit of the twelve spies to Canaan and the Baalam mission. Much legislation is interspersed, and lost volumes of early poetry are quoted.

Numeral Figure used to express a number. The use of letters for expressing numbers was adopted by the Greeks and some other ancient nations, and later by the Romans, who used the seven letters—M D C L X V I—in various combinations, a cumbersome method still in use to some extent. From about the 12th century European nations adopted the so-called Arabic system of notation, a modification of Hindu numerals, as being more convenient for use than the Roman numerals.

Numidia Name given by the Romans to a district now part of Algeria. It was seized by the Romans about 200 B.C. but remained under its own kings

A century later one of them, Jugurtha, revolted, and the land was conquered. In 46 B.C. Julius Caesar made it a province.

Numismatics Science of coins and medals. It deals with the history and art of coinage among ancient and modern nations and has its value as a historical record and as a study of the mythology art of ancient peoples. Apart from coinage proper, the art of casting medals reached a high level in Italy in the 15th century.

Nunc Dimittis Psalm or canticle used in the worship of the Christian Church. It is the Song of Simeon (Luke II) after he had seen the child Jesus and begins, "Lord I dismiss Thee Thy servant depart in peace." It is in the Prayer Book of the Church of England for use at evensong, and is used in the Roman Catholic Church at compline.

Nuncio (Latin *nuntius*, messenger). Term used for one sent from the Vatican on Papal business. He is thus the equivalent of an ambassador.

Nuneaton Municipal borough and market town of Warwickshire. On the River Anker, 9 m from Coventry, and 97 from London, on the L.M.S. Rly., it has manufactures of ribbons, etc., glazed bricks, tiles and sanitary pipes. Here was born the novelist whose pen name was George Elliot. Pop (1931) 46,305.

Nunhead District of London. It is 6 m from the city by the S. Rly., and is part of the borough of Camberwell.

Nuremberg (Nürnberg) City of Bavaria. On the River Pegnitz, 95 m from Munich, it is a centre for toy manufacture. Optical electrical and other apparatuses are made, and there is a large production of pencils and allied articles. Printing is a leading industry. An ancient town, it still has the old walls and moat, with many buildings of the Middle Ages. Albrecht Dürer was born here, and a number of his works are in the picture gallery. The high school was founded by Melanchthon. The castle, dating from 1050 was an imperial residence. It has a broadcasting station (239 M, 2 kW). Pop 392,500.

Nursery School Institution which provides for the healthy development of children between the ages of 2 and 5, thus bringing the gap (in England) between the Infant Welfare Centre and the Elementary School. The establishment of state Nursery Schools in 1920 was due largely to the pioneer work of Miss Margaret McMillan at Deptford. In them great stress is laid on the value of open air, sunlight, play, rest and cleanliness.

Nursing Sick nursing owes its development primarily to three factors—religion, war and science. Long as its history is however, it was not until the 19th century that regular training was started in Germany—a movement which was to gain impetus from the work of Florence Nightingale (*q v*) in the Crimean War, and to be furthered by the needs of the sick and wounded in the American Civil War.

NURSING AS A CAREER Since the passing of the Registration Act in 1919 nurses have been recognised as essential servants of the State.

The nursing profession may be divided into the following branches: institutional, state

services, local government, independent, educational, industrial, overseas, and district nursing

Training in a hospital recognised by the General Nursing Council, under the Nurses' Registration Acts, is essential in all branches of the profession with the exception of that of Midwifery, which is organised by the Central Midwives' Board

In choosing a training school the candidate must inform herself whether it be a training school approved by the General Nursing Council. She usually has a short period in a preliminary training school and a trial period in the wards, before signing her contract with the hospital authorities for three or four years' training

During her three or four years' training she takes the State Examinations, the preliminary after eighteen months' training, and the senior at the end of three years (fees, five guineas in all). She may then place her name on the State Register. At the completion of her contract with her hospital she receives the hospital certificate and has the status of a trained nurse

The rate of pay for probationers varies from £18 a year to £40 in the senior year

Training may also be taken at various specialised hospitals for particular branches of the profession, but the general training certificate is usually required in addition

The types of hospitals providing training are

For young girls, 18-21
Sick Children's Hospitals—preparing candidates for registration as sick children's nurses

Fever Hospitals—preparing candidates for registration as fever nurses

Orthopaedic Hospitals

Babies' Hospitals

Eye Hospitals

Children's Convalescent Hospitals

For candidates of 21 and over

General training at approved General

Hospital Training Schools (see above)

Mental Hospitals—preparing candidates for registration as mental nurses

Skin Diseases Hospitals

Women's and Children's Hospitals

Tuberculosis Hospitals

Convalescent Hospitals

Midwifery Training Schools

The salaries for Institutional Nursing vary from about £60 for a staff nurse to £500 for a superintendent

In the State Services rates of pay are usually higher, but regulations are more rigid, and army nurses may be called upon to do a period of service abroad

District Nursing—The work of the District Nurse is the nursing of the poor in their own homes. Appointments are made by District Nursing Associations, organised by Voluntary Committees, most are affiliated to the Queen's Institute of District Nursing, 58 Victoria Street, S.W.1

Other Public Health Nursing work includes Health Visiting, Tuberculosis Nursing, and School Nursing. These appointments are made by local Maternity and Child Welfare and Education Committees, and some by voluntary committees. Health Visitors must undertake a special training and obtain the Certificate of the Royal Sanitary Institute approved by the Ministry of Health

Private Nursing—A nurse engaged in private as distinguished from hospital nursing

usually resides in or belongs to a Nurses' Co-operation which may or may not be connected with a private nursing home. Cases are then taken in turn by the nurses, who make use of the "home" while not employed on a case

Full information regarding the Nursing profession can be obtained from the College of Nursing (Henrietta Street, Cavendish Square, London, W.1)

Nutcracker Bird of the raven and crow family (*Nucifraga caryocatactes*). It has a brown body plumage speckled with white, black wings and tail, the beak is long and nearly straight. They are common in northern Europe and Asia

Nutmeg Seed-kernel of the fleshy fruit of a bushy evergreen tree, (*Myristica fragrans*) indigenous to the Dutch E. Indies. It is used as an aromatic condiment, in cookery and in medicine. The fibrous network enclosing the nutshell is the spice called mace. The trees grow widely in Penang, the W. Indies and tropical S. America

Nux Vomica Disk-shaped seeds of a small deciduous tree of the strychnos family (*Strychnos nux-vomica*), indigenous to India, and growing also in Farther India and N. Australia. They and the allied Ignatius beans of the Philippines yield most of the bitter alkaloid poisons, strychnine and its derivatives, employed medicinally as tonics and heart stimulants

Nyasa Lake of Africa, the largest in the continent, discovered by David Livingstone in 1859. It is in the south-east and covers 15,000 sq. m., being 350 m. long. The western shores are British and the eastern British and Portuguese. Fort Johnston and Karonga are ports on the lake. A number of rivers flow into it and its waters are carried by the Shire to the Zambesi

Nyasaland British Protectorate in Central Africa, bounded by Lake Nyasa, Tanganyika, Rhodesia and Portuguese East Africa. The climate is tropical but cooler in the Shire Highlands. Large areas are fertile and plantations of coffee, cotton, tobacco, tea, etc., are established. Native education is provided by Missionary Societies under Government grants. Blantyre, the chief settlement, is connected by rail with the port Beira. The railway now crosses the Zambesi by a bridge, over 12,000 feet long, opened in 1935 between Sena and Dona Anna Capital, Zomba.

Area (land) 37,596 sq. m. Pop. (1931) 1,498,336 natives, 3447 others

Nymph In classical mythology, a localised nature-spirit or minor divinity, to whom offerings of milk and honey might be made. They were classed as water nymphs, Nereids and Naiads, mountain nymphs, Oreads, tree-nymphs, Dryads, and the like

Nystagmus Medical term for an involuntary movement of the eyeball, due to a nervous spasm of the muscles of the eye. It is either congenital, acquired or a symptom of some cerebrospinal disease. When the movement is horizontal the nystagmus is termed oscillatory, other movements are either rotary or oblique. It is frequently observed in minors who are constantly working in a dull light. This form of nystagmus is regarded as an occupational neurosis

OAK Genus of deciduous or evergreen trees (*Quercus*) and shrubs of the hecch order, natives of N temperate regions. Their nuts, called acorns, have cup like receptacles. Of nearly 300 species one only, *Q robur*, is indigenous to Britain. It is found in all temperate regions.

Two forms occur, with stalked leaves and acorns, they may attain 120 ft. in height. The timber was largely used, notably in 16th-18th century Britain, for shipbuilding, roof construction, wall panelling and furniture. Home grown oak still provides railway wagons, church furniture and wood block flooring. Oak bark is a source of tannin, acorns a favourite swine food. See BOG OAK, CORN, HOLM OAK.

Oak-Apple Day In England name given by royalists to May 29th, the birthday in 1630 of King Charles II. On this date, in 1660, he returned to England, the Restoration. Oak leaves and boughs were then used as decorations by the royalists, in remembrance of the king's escape at Boscobel, by concealing himself in an oak tree after the Battle of Worcester in 1651.

Oakengates Market town and urban district of Shropshire. It is 13 m east of Shrewsbury and 140 from London, by the G.W. Rly. Coal and iron industries are carried on. Pop (1931) 11,189.

Oak Gall Excrecence on the surface tissues of oak trees. Varying in size and form, from oak apples to oak spangles, they occur on leaves, flower stalks, bark and rootlets. They are mostly due to gall wasps, *Cynips*, whose eggs are deposited with an irritant fluid which occasions the abnormal cell growth. Some, especially the Levantine, yield tannin and gallic acid.

Oakham Urban district of Rutland, also the county town. It is 11½ m west of Stamford, and 94 from London, by the L.M.S. Rly., being also served by the L.N.E. Rly. It has footwear manufactures. Pop (1931) 3191.

Oaks The English horse race. It is run at Epsom, two days after the Derby and is open to fillies of three years old. It is named after a house near Epsom, once the residence of the Earl of Derby.

Oakum Substance obtained from old tarry ropes and ships' cordage, untwisted and picked into separate loose hempen fibres. It is employed in caulking the seams of wooden vessels and the deck planking of steel ships, and is an emergency wound dressing. Oakum plying was formerly exercised in convict prisons and workhouses. Untarred ropes furnish white oakum.

Oakworth Urban district of Yorkshire. It is 3 m from Kettlewell and 215 m from London by the L.M.S. Rly., and has textile manufactures. Pop 4170.

Oamaru Town and port of South Island, New Zealand. It is 156 m from Christchurch. Its industries are connected with the meat and wool produced. Pop 7510.

Oar Fish Genus of large deep sea spiny finned ribbon fishes (*Regalecus*). The scaleless body 12 to 20 ft. long, is sur-

mounted by a continuous dorsal fin whose foremost rays are enlarged into a crest, the ventrals become long paddle tipped filaments. During the past 150 years examples have been stranded on British coasts.

Oasis Geographical term for a fertile area in a desert. Oases are due either to the presence of wells or subterranean water, or again to the sinking of artesian wells as practised in North Africa and Australia. Usually in Africa doum and date palms are characteristic of oases, but in larger areas various cereals are cultivated.

Oates Lawrence Edward Grace, English explorer. Born in 1880, he was educated at Eton and became a soldier. He served with the cavalry in South Africa (1901-02) and later wars in India and Egypt. In 1910 he went with Scott on the expedition to reach the South Pole. On March 17, 1912, when they were returning and in dire straits, Captain Oates who was crippled with frost, walked out into the open and met his death in order to make the task of his comrades easier. His epitaph is 'a very gallant gentleman'. A district in Antarctica is named after him.

Oates Titus, English conspirator. Born in 1649, he took Anglican orders, and after being dismissed from several posts, posed as a Roman Catholic in order to get inside knowledge of supposed Catholic plots. With the aid of Tongo, he pieced together the true and the false and informed the king through his confidential servants. Charles II did not believe his story, although the populace did and acclaimed him as saviour of the country. By his unscrupulousness thirty five people were wrongly executed. He was later found out, disgraced, flogged, and imprisoned for life but after the Revolution of 1688 he was set at liberty. He died July 12, 1705.

Oath Solemn declaration attested by the name of God. In English Law nearly all evidence must be given on oath, save that since the Oaths Act of 1888 any one who objects to an oath on the ground of religious belief may make an affirmation instead. By the Oaths Act of 1909, the witness, when being sworn in, may hold a copy of the Scriptures in his hand, instead of "kissing the book."

Oatlands District of Surrey. It is near Weybridge and was once a park in which Henry VIII built a palace. This was used by James I and Charles I but was destroyed by the Parliamentarians. It was rebuilt by the Duke of York, a son of George III, and is now an hotel.

Oats Annual cereal grass (*Avena sativa*), apparently first cultivated in bronze age Europe. It is grown extensively in Central and N. Europe, Russia, the U.S.A., Canada, Argentina and elsewhere. The world production is 66 million tons of which Great Britain raises 3 million and Canada 6½ million tons. Mostly grown for horse fodder, oats are also an important human food. Kiln dried and freed from husks they become groats, are ground into oatmeal for porridge or prepared as breakfast cereal e.g., rolled oats, oat flakes etc.

Obadiah Hohreiv Minor prophet. The first sixteen verses of his Book

announce Edom's destruction, the last five, post-exilic, predict Israel's restoration and the coming of the Day of the Lord

Oban Burgh, seaport, market town and pleasure resort of Argyllshire. It is 113 m from Glasgow and is reached by the L.M.S. and L.N.E. Rlys., and also by steamer. It stands on a bay protected by the Island of Kerrera, which makes a fine harbour. It is a yachting centre, and here the Argyllshire Gathering is held in September. The scenery around is very beautiful. Pop. (1931) 5750.

Obelisk Tall four-sided monolithic pillar tapering towards the summit and having a pyramidal apex often covered by a copper sheath. Obelisks were used chiefly in Ancient Egypt and were erected either as memorials by some monarch or as pillars in relation to the entrance of a temple. One obelisk, erected by Queen Hatshepsut and still standing at Karnak, is over 107 ft in height and weighs about 300 tons. The so-called Cleopatra's Needle in London is an obelisk brought from Heliopolis, where one erected by Senusert I still remains. Others from the same locality have been brought to Rome and New York.

Oberammergau Village of Upper Bavaria, Germany. Situated in the Ammer valley, 45 m S.S.W. of Munich, with electric railway connection, its peasant inhabitants are wood and ivory carvers, producing toys, crucifixes and other religious objects. After a plague in 1633 the villagers vowed to present every tenth year, as an act of devotion, a living representation of Christ's Passion, as already done from mediaeval times. This has been done ever since, almost without exception, the last occasion being in 1930. See PASSION PLAY.

Oberon King of the Fairies. He appears in a French romance of the 13th century, but is better known as a character introduced by Shakespeare into *A Midsummer Night's Dream*. Oberon is the title of a masque by Ben Jonson.

Obesity Condition of the body marked by over accumulation of fat. It usually occurs immediately beneath the skin, as in the neck and thighs, or around the abdomen and various internal organs. Sometimes hereditary. It may betoken a luxurious, inactive life, with over-indulgence in sleep, food or malt liquors. Dieting sometimes affords relief.

Oblates In the Roman Catholic Church, secular persons devoted to a monastery without monastic vows. The term denotes also congregations of fathers or sisters at the bidding of the bishop in whose diocese they live, for preaching, educational or missionary work, e.g. Oblates of St Charles, 1578, Oblates of Mary Immaculate, 1815.

Oboe (or Hautboy) Treble reed-woodwind instrument, with a conical bore and a double-reed mouthpiece. It is usually made of ebony, silver or boxwood, has fifteen keys and two octave keys. The compass is from B flat below the treble staff, to E in alt, with all chromatic semitones. It gives rich, if penetrating notes, and is, technically, very efficient.

Obregon Alvaro Mexican president. Born in 1880 with Villa and Gonzalez he took a leading part in Carranza's revolution, 1913. As head of the constitutional forces, he entered Mexico City, Aug. 15, 1914. When in 1915 Villa turned against Carranza,

Obregon led the campaigns against Villa. Chosen President in Sept. 1920, he held that office till 1924. Succeeded then by Calles, he was again elected President four years later to follow Calles, but was assassinated on July 17, 1928.

Observatory Building where observations are made. There are of two main kinds, astronomical and meteorological, although some, Greenwich, for example, do both kinds of work.

There are three royal observatories in the British Empire, at Greenwich, Edinburgh and the Cape of Good Hope. In addition there are some 30 others scattered all over the Empire, one being at Canberra and another at Apia in Samoa. Some of these observatories are especially for the study of solar physics.

The finest astronomical observatories in the world are probably those of the United States. Among them are the Lick Observatory in California with the most powerful telescope in the world, the Lowell Observatory in Arizona, on a mountain 7000 ft. high, and the Carnegie Solar Observatory on Mt. Wilson, California.

Great Britain has eight meteorological observatories.

Observer Rank in the Royal Air Force. The observer accompanies the pilot, and his duties are indicated by his name. The equivalent rank in the navy is that of sub-lieutenant, or mate, and in the army that of lieutenant.

Obstetrics Branch of medical science covering treatment previous to and during child-birth and the after-treatment. Although an ancient science, marked improvements are comparatively modern as in the use of specialised instruments, the introduction of chloroform and hypodermic injections as anaesthetics. Improvements in surgical technique have removed most of the danger of major operations such as the Caesarean which may occasionally be necessary. The provision of properly qualified midwives in industrial and other areas has proved notably beneficial.

Occam William of English schoolman. Known as Doctor Singularis et Inevincibilis, he was born at Ockham, Surrey, about 1300. He joined the Franciscans and studied and taught at Merton College, Oxford, between 1312-24. He was one of the most important figures in the struggle between Pope and Emperor, and advocated the independence of civil rule, and attacked the temporal power of the Papacy. He also wrote much in philosophy, metaphysics and theology, and his chief work, summarising his views, was the *Dialogus*. He died at Munich in 1349.

Occlusion Term, "shutting up," denoting (1) fitting together of the masticating surfaces of the upper and lower teeth in biting, (2) absorption of gases by certain elements. Palladium absorbs 800-900 times its own volume of hydrogen when heated as a cathode for decomposing water, finely-divided charcoal absorbs deleterious gases, a power utilised for disinfection.

Occultation In astronomy, the hiding behind another of one celestial body of another. It may be the eclipse of a fixed star or planetary body by the moon or a planet, e.g. that of one of its own moons by Jupiter. Occultations are utilised for determining longitudes, or measuring the occulting body's angular diameter.

Ocean Geographical name for the largest expanses of water which together

occupy about 72 per cent. of the earth's surface. Of these the Pacific Ocean is the largest, being equal to about three eighths of the total oceanic area and having the greatest depths. Fringing the ocean basins are shallower marginal seas covering a continental shelf or platform over which at various periods in geological history the oceanic waters have encroached or even receded to the edge of the submerged shelf. See ATLANTIC, PACIFIC, etc.

Oceania Name applied to the islands in the Pacific Ocean from Australia to the Marquesa Islands and the Low Archipelago, and from New Zealand to the Hawaiian Group. The main divisions of the region are the three large islands, Australia, Tasmania and New Guinea, and three island groups, Molanesia, including the Solomon Islands and the New Hebrides and partly New Caledonia, Micronesia including the Caroline Islands and the Ladrone Group and Polynesia, extending from New Zealand to Hawaii, and from the line from New Caledonia and the Gilbert Islands eastward.

Oceanus In legend, the name of the river supposed to enclose the earth. It was originally the name of a god.

Ocelot Handsome American cat (*Felis pardalis*), ranging from Arkansas to Paraguay. Corresponding to the clouded leopard of S.E. Asia, it is 3 to 4 ft. long, with 11 to 15 in. tall. Normally tawny yellow, spotted with black-edged, fawn coloured markings. Several varieties occur. A forest animal of savage disposition, it preys on small mammals and birds.

Ochil Range of hills in Perthshire and neighbourhood. They are in the south-east of the county and extend also into the counties of Stirling, Fife, Clackmannan and Kinross. The range is about 25 m. long and the highest points are just over 2000 ft.

Ochre Name given to certain earthy or clayey varieties of the oxides of iron. Yellow and brown ochres are forms of the hydrated oxide, limonite whilst red ochre, or reddie, is a variety of the peroxide haematite. These ochres when ground and washed are used as pigments but much of the commercial material is prepared artificially from iron oxides, although the manufactured pigment is inferior to the natural one. Ochres are obtained from France, Holland and the midland counties of England.

O'Connell Daniel, Irish patriot and politician, nicknamed "The Liberator". Born near Cahirciveen County Kerry, on Aug. 6, 1775. He was called to the Irish Bar in 1798 and displayed a great gift for oratory. In 1828 he entered Parliament, and in 1829 the Irish Catholics were emancipated. He organised the Irishmen into the "Catholic Association" and began in 1841 his agitation for the repeal of the Union. The Tory cabinet, under Peel, was not sympathetic, and mass meetings were held everywhere. O'Connell was imprisoned for rebellion on the eve of success and a few months later set free. He died on May 15, 1847.

Octave In music (1) The perfectly consonant interval of an eighth formed by the sounding of any scale note with that above it bearing the same name. (2) An organ stop of 8 ft. on the pedals (or 4 ft. on manuals).

In poetry (1) An eight lined stanza. (2) The first two quatrains of a sonnet written on the same pair of rhymes.

The octave of a church feast occurs on the same name day of the following week.

Octavia Roman matron. She was the sister of the Emperor Augustus (Octavian) and a niece of Julius Caesar. She married first Gaius Marcellus and secondly Mark Antony, who left her for Cleopatra and so brought about the renowned quarrel with Augustus which ended in Antony's death. Octavia died in 11 B.C.

Octavo Term used in bookbinding for a book or sheet of printed paper which has been folded three times or one-eighth of its original size thus forming eight leaves or sixteen pages. The word octavo is usually abbreviated to 8vo and certain sizes of books are named foolscap 8vo, demy 8vo, royal 8vo etc.

Octopus Widespread group of eight armed, head footed molluscs. They have rounded hag like bodies, large eyes and central mouths with horny jaws like parrot beaks. Besides the common octopus, with double rows of suckers to each tentacle, a lesser one also occurs on British coasts, belonging to another genus, with single rows of suckers. See CEPHALOPODA.

Oddfellow Name given to members of certain friendly societies. The first was founded in London early in the 19th century. It ceased to exist about the end of the century, but in 1810 the Independent Order of Oddfellows, Manchester Unity, was founded, and this is now one of the largest of the friendly societies. It has about 1,100,000 members and funds amounting to over £25,000,000.

Ode Form of stately and elaborate lyrical verse, in astrophic arrangement. It derives from the Greek choir song, and was originally a poem written to be sung to an instrumental accompaniment, supported by a chorus. Pindar the master of the ode, developed it in a consciously elaborate form. Modern poets follow the lyrical ode of Sappho and Alcaeus.

Odense City and seaport of Denmark. It is on the river of the same name on the Island of Funen 27 m. from Copenhagen. A ship canal connects it with the fjord of Odense. There is a good harbour and the city is one of the country's chief seaports. It has a beautiful Gothic cathedral, and the house in which Hans Andersen was born is now a museum. Pop. (1930) 56,759.

Oder River of Europe. It rises in Czechoslovakia, but soon enters Germany and flows mainly in a northerly direction to Stettin on the North Sea. It is 600 m. long, and most of its course is navigable for small vessels. Canals connect it with the Elbe and the Vistula. Its chief tributary is the Warta.

Odessa Seaport of the Ukraine. On the Black Sea, about 26 m. from the mouth of the Dniester and 90 m. south west of Kherson, in the government of that name. Odessa is in the midst of a grain district. When the Dardanelles were closed by Turkey, in 1914, Odessa was cut off from the allies, and was bombarded by the Turks. Captured by German forces in March, 1918, it was taken by the Bolsheviks in 1920. It has a broadcasting station (450 k M., 4 kW.) Pop. 497,000.

Odin Chief god of the Northern pantheon, the Anglo Saxon Woden. Originally a storm god "the frenzied one," he was represented as venerable, one-eyed, and attended by two ravens and wolves. He was worshipped

chiefly by the warrior nobles and their retainers, and called the All-father and receiver of the souls of the slain in Valhalla

O'Donnell Ancient Irish family. They were lords of Tyrconnel, whose rivals were the Ulster O'Neills. They were descended from King Niall of the Nine Hostages, who reigned at the beginning of the fifth century. Tyrconnel comprised the greater part of modern Donegal.

The first great chieftain was Goffraidh, in the thirteenth century who was the first to be called "The O'Donnell" and who successfully raided Tyrone and Connaught. Manus O'Donnell ruled Tyrconnel when his father pilgrimaged to Rome in 1511, but retained his authority after his return, with the help of the O'Neills. Later father and son fought the O'Neills, but they joined together with the O'Briens to form the Geraldine League, to restore the earldom of Kildare to Gerald, the stepson of Manus. He died in 1564.

Calvagh O'Donnell, eldest son of Manus, was captured by Shane O'Neill, tortured for three years, and when released, appealed to Elizabeth. He was restored to his rights, but died the following year.

Hugh Roe ("Red Hugh") O'Donnell was born in 1571 and fought against the English in Ireland. In 1602 he fled to Spain, leaving everything to his brother, Rory O'Donnell, born 1575. He paid allegiance to the king, but later plotted to seize Dublin Castle in 1607, was found out, fled to Rome, and died there in 1608.

Odysseus Alternative name for the Greek hero Ulysses (qv).

Oedipus In Greek legend, son of Laius, King of Thebes, and Jocasta. An oracle having warned Laius that Jocasta's offspring would cause his death, Oedipus was exposed, but was found by shepherds, and brought up ignorant of his parentage. Unwittingly he slew his father and wedded his own mother. The gods demanded the discovery of the king's slayer, and the result of the investigation led Jocasta to hang herself and Oedipus to become self-blinded. The story inspired two tragedies by Sophocles.

Oenolin Name given to the colouring matter of wines. It is a violet red or brownish red powder obtained from wine by precipitation with basic lead acetate.

Oesophagus Name given to the gullet, the straight tubular portion of the alimentary canal leading from the pharynx to the stomach in an animal. It has no digestive function but merely serves to carry food from the mouth. In the higher crustacea the hinder end of the oesophagus forms a kind of gizzard.

Offa King of Mercia. Of royal blood, he objected a rival and obtained the crown, 757. He restored Mercia's shrunken condition, and by vigorous campaigns secured virtual control of Britain. S of the Humber. He was described as King of the English by the Pope who sanctioned a new archbishopric at Lichfield. He died in 796.

Offal Refuse or waste. Butcher's offal comprises all besides the hanging carcase. During the Great War, when meat was rationed, liver, sweetbread, etc., were ranked as offal and unrationed. A hide's prime parts form the butts, shoulder and belly pieces being offal. In flour-milling, bran, with some flour attached, is offal, furnishing cattle-food.

Offaly County of the Irish Free State, formerly called King's County. It covers 733 sq m and is wholly inland. The Shannon, which flows along its boundary, the Brosna and the Barrow are the principal rivers. There are hills in the south, and the shore contains much of the Bog of Allen. Tullamore is the county town. Other places are Bllr or Parsonstown, Banagher, Edonderry and Phillipstown. An agricultural area, the Grand Canal passes through it. Pop (1926) 52,600.

Offa's Dyke Ancient earthwork forming a boundary between Mercia and the Welsh. Built by King Offa, about 779, its remains still traverse discontinuously for 140 m portions of four Welsh and three English counties from the Dee to the Severn estuaries. Mostly a rampart, seldom exceeding 12 ft in height, its ditch lies on the W side.

Offenbach Jacques, German-Jewish composer. Born at Cologne Jan 21 1819, in 1833 he went to Paris where he conducted the orchestra of the "Théâtre Français" in 1848, and was manager of the "Beufes Parisiens" in 1855. He was the composer of many light operas, including *La Belle Hélène*, *La Grande Duchesse*, *Orphée aux Enfers* and *Les Contes d'Hoffmann*, which is still popular. He died Oct. 5, 1880.

Officer Person holding a commission in the fighting forces. Army officers were at first required to collect and maintain, at the public expense, the men forming their troops, but now they only command and lead them. Training institutions include the Royal Staff College, the Royal Military Academy, Woolwich, and the Royal Military College, Sandhurst. The Officers' Training Corps is an organisation among the universities (senior branch) and schools (junior branch) whereby students receive training in military drill, musketry, signalling, etc., with the object of teaching them obedience, discipline and self-control. See NAVY, AIR FORCE, etc.

Official Receiver Legal official appointed to look after the affairs of bankrupts. They were first appointed in 1883. Some of the receivers are at the bankruptcy court in Carey St, London, W C 2, while others are in the large cities and towns of the provinces.

Offset In printing, a process in which the impression of a design is transferred to a rubber cylinder from which it is printed or offset. It is specially suitable for reproducing designs on rough paper. In surveying, offsets are lines drawn perpendicular to a given straight line for the measurement of distances.

Ogive Architectural term used in France for the pointed type of arch which occurs in some early churches such as the Abbey of Cluny and some late Romanesque buildings, although it did not become common until the period of Gothic architecture. The pointed arch was used in Syrian, Persian and Saracenic buildings and probably was introduced into Europe by way of Sicily. In English architecture the term ogive ribs is applied to the main intersecting ribs of a vault.

Oglethorpe James Edward, English general and philanthropist. Born in London Dec. 21 1696, he was aide-de-camp to Prince Eugene in his campaign against the Turks (1716-17) distinguishing himself at the siege of Belgrade. He later entered Parliament, and was responsible for the settling of a

colony in America between Carolina and Florida, as a refuge for insolvent people and oppressed Protestants on the continent. This he called Georgia (q v)

Ogmore Urban district of Glamorgan shire in full Ogmore and Garw. It is 3 m from Bridgend. It is a coal mining area. The place is named from the river Ogmore which flows through Glamorganshire to the Bristol Channel. Pop (1931) 20,979

O'Higgins Bernardo Chilean soldier and statesman, the son of the Irishman, Ambrosio O'Higgins, Governor of Chile, he was born Aug. 20, 1776, and educated abroad. O'Higgins returned to Chile in 1803, and fought against the Royalists. As commander he superseded Carrera, whose rivalry caused him to flee to Mendoza. Here he met José de San Martín with whom he began a long and loyal association, which resulted in the decisive victory of Chacabuco (1817). In 1822 O'Higgins called a congress, which adopted a constitution giving him dictatorial powers over Chile. Discontent and risings occurred, and in 1823 O'Higgins resigned his post of director-general and retired to Peru. He died Oct. 24, 1842.

O'Higgins Kevin Christopher Irish statesman. Born in 1892, after the Easter rebellion of 1916 he joined the Sinn Féin Movement, and was interned. While in gaol, he was elected member for Queen's County. In 1922 he became Minister of Justice in the New Free State Government, and established the Civil Guard which put down disorder firmly. While the controversy with de Valera on the taking of the Oath in the Dáil was proceeding, O'Higgins was assassinated by unknown men, July 10, 1927.

Ohio State of the U.S.A., in the N.E. of the country, Lake Erie forming most of its northern boundary. The capital is Columbus, and there are several other very populous centres, including Cleveland, Cincinnati, Toledo, Akron, Dayton, Youngstown, Canton and Springfield. The state is largely an agricultural area and great quantities of wheat and maize are produced. The rearing of livestock is also conducted on a large scale. Iron and coal are mined and the shipping on Lake Erie is an important industry. Ohio is governed by a legislature of two houses. It sends two senators and 24 representatives to Congress. Ohio covers 41,040 sq m. Pop (1930) 6,646,700.

Ohio River of the U.S.A. It rises near Pittsburg, being a union of the Monongahela and the Allegheny, and flows to the Mississippi, which it enters at Cairo. It is 975 m long and is navigable by large vessels, being perhaps the most important waterway in the country. Its tributaries include Tennessee, Cumberland, Wabash and Kentucky. Pittsburg and Cincinnati are the largest cities on its banks.

Ohm Term applied to the practical unit of electrical resistance defined as the resistance of a column of mercury 106.3 cms long of a constant area in cross section and weighing 14.521 grams at the temperature of melting ice. A megohm is one million ohms and a microhm one millionth of an ohm.

Ohm's law states that in a circuit carrying a constant current, the current is directly proportional to the electromotive force and inversely proportional to the resistance of the circuit.

Ohmmeter Form of electrical instrument used for measuring

ing electrical resistance directly in terms of ohms and megohms. There are many forms of ohmmeters one type consisting of two fixed coils with another coil placed at right angles to the other two and carrying a pointer which moves freely over a graduated scale, these coils being of low and high resistance. For testing the insulation resistance of cables etc. some type of magneto generator is combined with the instrument.

Oil Fluid substance having a more or less viscous character and of either mineral, vegetable or animal origin. The mineral oils, consisting of hydrocarbons, are derived from the decomposition of organic matter in rocks and are represented by petroleum and its derivatives.

The vegetable oils consist of fixed or fatty oils and essential or volatile oils the former being again divided into drying and non-drying oils. The fixed oils, composed of mixtures of glycerides of fatty acids, vary in consistency some being solid fats above 68° F., and others which remain liquid at ordinary temperatures. The drying oils undergo oxidation on exposure to light and air forming a tough film, and consequently are used in paint and varnish manufacture. Such oils are, linseed, poppy, cottonseed and rape. The non-drying oils such as olive, palm, coconut and almond oils are used as lubricants, edible oils, and in soap manufacture. Essential oils are volatile odorous liquids distilled from plants and used in pharmacy and perfumery.

The animal oils comprise fish and whale oils, seal oils, tallow, butter, etc., and are used as food or in soap and margarine manufacture or as lubricants.

For oil fuel see FUEL.

Oilcake Food given to cattle. It consists of compressed seeds, from which the oil has been expressed.

Oilcloth Type of floor covering. It comprises coarse canvas covered with successive coats of thick oil paint, each passed between heavy rollers, dried and rubbed smooth with pumicestone before the next is applied. The surface may finally receive an ornamental pattern in oil colours derived from wooden blocks or analogous printing devices. See LINOLEUM.

Oil Palm See PALM OIL.

Oise River of Belgium and France. It rises in the Ardennes flows through France, and joins the Seine at Compiègne. It is 187 m long and about half its course is navigable. The chief tributary is the Aisne. Others are the Ailette and the Buche and it passes Guise, Compiègne and other places. The Oise gives its name to a department of north-east France, of which Beauvais is the capital.

Ojibwas (or Chippewas) North American Indian tribe of Algonquian stock. The name, "roast till puckered" may allude to their puckered moccasins. In early colonial times they occupied the Sioux and Fox territory, W and S of Lake Superior, and sided with Britain in the War of Independence. They number 30,000 peacefully settled in the lake region of Canada and the U.S.A.

Okapi Native name of an African ruminant of the giraffe family (*Okapia johnstoni*). Sir Harry Johnston discovered it in the Semliki forest near Lake Albert in 1901. It stands 5 ft. high at the

shoulder, with limbs and neck shorter than the giraffe's. The purplish peit is varied on buttocks and legs with horizontal black and buff stripes. An Okapi, presented to the London Zoo by the King while Prince of Wales, died in Nov., 1935.

Okehampton Borough and market town of Devonshire. About 17 m east of Launceston it is situated at the junction of the East and West Okement rivers. Pop 3450.

Oklahoma State of the United States. It is in the south of the country, lying wholly inland just to the north of Texas. Oklahoma City is the capital and the largest place. Tulsa is next in size. The chief industries are the growing of wheat, oats, cotton, etc., and the mining of oil, of which an enormous quantity is produced in the state. Government is by a legislature of two houses. The state sends two senators and nine representatives to Congress. It has a large Indian population. Pop (1930) 2,396,000.

Olaf King of Norway and saint. Born in 993, he terrorised the coasts of Normandy and England, and secured the throne of Norway in 1016. He tried to exterminate paganism, with such severity that his subjects abandoned him for Canute, King of Denmark. Olaf fled to his brother-in-law, Jaroslav of Russia, who gave him 4000 men, and in 1030 Olaf fought Canute at Stiklestad, but was defeated and killed. He was later proclaimed patron saint of Norway.

Old Age Pension In Great Britain and other countries a pension paid by the state to all persons who reach a certain age. In Great Britain it is paid to persons with certain exceptions on reaching the age of 70, but persons who are insured under the national health insurance scheme, and also the wives of the men, can obtain a pension on reaching the age of 65. Blind persons can claim at 50.

To be entitled to a pension at the full rate of 10s a week, a person's income from investments and the like must not exceed £26 5s a year, but before calculating this, he or she is entitled to deduct the first £39 of unearned income. In practice, therefore, a person can obtain a full pension if his unearned income is £65 5s a year or less. If the income is in excess of this sum a smaller pension is paid, until a person with £88 17s. 6d a year cannot claim one of any kind. In the case of a married couple living together these sums are doubled. Thus a man whose unearned income is under £130 10s a year can claim a full pension for himself and his wife. To obtain a pension a person must apply for a form at a post office. The pensions are paid at the post offices every Friday. See HEALTH INSURANCE.

Old Bailey Street in London. It goes from Ludgate Hill to Newgate Street, and at its junction with the latter is the Central Criminal Court, usually called the Old Bailey. A court was built here in 1834 and in 1902-07 this was rebuilt. The hall contains mural paintings by Sir W. B. Richmond.

Oldbury Market town and urban district of Worcestershire. It is 5 m. north-west of Birmingham. There are manufactures of hardware and chemicals. Pop (1931) 35,918.

Oldcastle Sir John Leader of the Lollards. He served in the fighting on the Welsh marches, where he formed a friendship with Henry, Prince of

Wales, afterwards Henry V. Espousing the Lollard cause, he had the works of Wycliff transcribed and distributed. After good service in France in 1411, he was condemned as a heretic in 1413. He escaped from the Tower, but was recaptured after four years, and hanged and burnt as a heretic.

Oldenburg Republic of Germany. Formerly it was a grand-duchy of the German Empire, comprising, besides the grand-ducal territory with a seaboard on the North Sea, the former principalities of Lübeck, north of the state of that name and Birkenfeld, situated in the midst of the Rhine province. The capital is Oldenburg, 27 m from Bremen. Eutin and Birkenfeld are the capitals of the other divisions of the republic. Area, 2480 sq m. Pop 545,200. See LÜBECK.

Oldham County borough and market town of Lancashire. On the Medlock, 188 m from London and 6 m. from Manchester, it is a leading centre for cotton spinning and other branches of that industry. Textiles produced include satins, satens, fustians, sheetings. There are engineering works and collieries near by. The town sends two members to Parliament. Pop (1931) 140,309.

Old Red Sandstone Name given by geologists to palaeozoic rocks between the Silurian and Carboniferous, to distinguish them from the New Red Sandstone above the Carboniferous, now renamed. Represented in Scotland by beds of great thickness, their fossil remains attest lagoon formation. With contemporary marine deposits occurring elsewhere, as in S.W. England they constitute the widespread Devonian system.

Old Testament Collection of 39 books of the Bible, recording Jewish history and religion from the beginning down almost to the times of Jesus Christ and his apostles. Written between the 8th and 2nd century B.C., in Hebrew or Aramaic, the Jewish grouping Law, Prophets and Writings, marks the stories which established the Hebrew canon. The Law or Pentateuch was canonised first, probably under Ezra, c. 444 B.C. The Prophets, all except Daniel with Joshua, Judges, Samuel and Kings, gained acceptance, c. 200 B.C. The writings, comprising the rest, were subsequently admitted all receiving final sanction at the Jewish synod of Jamnia, c. A.D. 90. See APOCRYPHA.

Old Trafford District of Manchester. To the west of the city. It is chiefly known because it is the headquarters of the Lancashire county cricket club.

Oleander Evergreen shrub of the dogbane order (*Nerium oleander*), native of the Mediterranean region. The erect stems bear leathery willow-like leaves which exude a poisonous milky juice when bruised. The showy clustered flowers, resembling those of the periwinkle, but rose-coloured or white, are greenhouse favourites in Britain, with double-flowered varieties.

Oleaster Genus of deciduous or evergreen shrubs and small trees (*Elaeagnus*) akin to the spurge laurel order, natives of Europe, Asia and N. America. Several ornamental species are cultivated. The common oleaster *E. angustifolia*, 15-20 ft. high, is grown round the Mediterranean for its edible berries.

Olein Trade name for triolein, the triglyceride of oleic acid. This is a colourless oil, with almost imperceptible smell and taste, liquid above 21° F, and soluble in alcohol. With tripalmitin and tristearin, solid at ordinary temperatures, it enters into most animal and vegetable oils and fats. These are usually natural species of varying chemical composition, the so-called olein expressed from palm oil and especially coconut oil contains various other glycerides. Much olein is converted into stearin by hydrogenation.

Oleograph Name given to a picture done in oil colours by a chromolithographic process, the print being mounted on canvas and varnished to imitate an oil painting.

Oléron Island of France. It is off the west coast, at the mouth of the Charente, and has an area of 66 sq. m. The chief towns are Chateau d'Oléron and St. Pierre.

Oléron is famed because it gave its name to a code of law for seamen. This consisted of the decisions of the maritime court in the island and the accepted rules of the sea. It was introduced into England in the 12th century.

Olfactory System See Nose.

Olga Saint of Russia. The daughter of a peasant, she married the Grand Duke Igor in 913. After the death of her husband in 945, she acted as regent for her son for a period of ten years. She went to Constantinople where she became a Christian. Olga was canonised, her feast being July 11.

Oligarchy Word of Greek origin, meaning the rule of the few. It is generally regarded as a bad form of government, the idea being that the few rule in their own interests. It was so classed by Aristotle. Since the time of the Greek states the most notable oligarchy has been the republic of Venice.

Oligocene System Geological term for the second division of the Cainozoic or Tertiary period following the Eocene system. In England these strata form an estuarine series in the Hampshire Basin and are seen well on the coast of the Isle of Wight. The system is divided into four subdivisions, the Hamstead, Bembridge, Osborne and Headon Beds, consisting of marls, clays and limestones containing marine, estuarine, freshwater and land fossils. Oligocene beds are widely distributed over central and southern Europe.

Olive Small evergreen tree typical of the olive order (*Olea europaea*). Cultivated in antiquity, it abounds in the Mediterranean region and flourishes also in Australia, California and S. Africa. Its small fleshy berry, when unripe, is pickled or salted. The ripe pericarp yields under pressure 60-70 per cent of an edible oil which replaces in S. Europe butter and animal fats and is used farther north for salads and various culinary and medicinal purposes. Inferior grades serve for soap-making.

Olives Mount of Limestone ridge E. of Jerusalem. Rising about 300 ft. above the city beyond the Kidron valley, it was closely associated with the final scenes of Our Lord's life. On one of its four summits he wept over Jerusalem, some part of it, probably not the traditional summit, was the

scene of the Ascension. See GETHESEMANE, KIDRON.

Ollerton Town of Nottinghamshire. It is 9 m. from Mansfield and 139 from London by the L.N.E. Ry. and adjoins Sherwood Forest.

Olney Town of Buckinghamshire. It stands on the Ouse, 60 m. from London on the L.M.S. Ry. The place is known for its associations with Cowper.

Olympia Religious centre of ancient Greece famous as the scene of the Olympic games. It stands on the banks of the Alpheus in the Peloponnese. The modern Olympia is a place of amusement in London. It is in Addison Road, Hammersmith and is used for exhibitions of all kinds. There Captain Bertram Mills has his annual circus and the Naval and Military Tournament is also held here.

Olympiad A period of four years, in Greek chronology, used for dating for literary purposes. The four years were reckoned between celebrations of the Olympic games, the first Olympiad beginning in 776 B.C. and the last A.D. 394. Ptolemy of Sicily was the first writer to start using this system, about 264 B.C.

Olympic Games Athletic contests held at Olympia in Greece in ancient times. The festival took place every four years and had a religious basis. Candidates were tested at Elis and had to train for some ten months. The games were open to competitors from all Greece, and the contests included chariot racing, horse racing, running, wrestling, boxing, and the pentathlon, a contest involving jumping, quoit throwing, javelin throwing, running and wrestling. The list of Olympic victors goes back to 776 B.C., and the classical games ceased to be held probably about A.D. 393.

To the Baron de Coubertin a Frenchman, who organised the Games at London in 1908, much of the credit is due for these four yearly contests. They represent a revival of the old Greek games, which were first held at Athens in 1396 and have been staged every four years since, save for a break occasioned by the war. Those in 1928 were held at Amsterdam and those of 1932 at Los Angeles, while the 1936 Games will be held at Berlin. The United States are the most successful country.

Olympus Name of a mountain range in Greece. It separates Thessaly from Macedonia and the highest point rises to about 10,000 ft. Olympus is famous in Greek legend and literature.

Omagh Market town and urban district of Co. Tyrone, Northern Ireland, also the county town. It is 34 m. from London. The industries are flour mills and linen factories. Pop. (1926) 5124.

Omaha City of Nebraska, U.S.A. On the Missouri River, it is an important railway centre. Here are railway works of the U.P. Ry., and other engineering and machinery works. Smelting and refining is carried on extensively and there are many manufacturing industries. South Omaha, formerly a separate city, and united to Omaha in 1915, has large meat canning works. Pop. (1930) 214,006.

Oman State of Arabia. It lies on the east of the Arabian desert, a narrow strip of maritime land, bordering on the Persian Gulf, the Gulf of Ormuz and the Arabian Sea. The total coast-line is 900 m.

in length with an area of 82,000 sq m. Its sultan Sayid Taimur rules over a population of 550,000. The chief port and capital is Muscat (q v).

Omar Successor of Mahomet. He became a follower of the prophet, and in 634 was chosen caliph in succession to Abu Bekr. He held the position until his murder in 644 and continued the policy of conversion by force, conquering Palestine, Syria and Egypt. He was called the commander of the faithful.

Omar Khayyám Persian mathematician, astronomer and poet. He was the son of a tent maker (Khayám). At the order of the Sultan, he reformed the Moslem calendar. His treatise on Algebra made him famous as a mathematician even in the Western world. He died A.D. 1123.

In Europe he was unknown as a poet until 1859, when Edward Fitzgerald (q v) translated several of his "Rubáiyát" or quatrains. The beauty of the "translation" is to be attributed more to the genius of Fitzgerald than to the original Persian.

Omdurman Town of Egypt. It is situated on the Nile opposite Khartoum in the Sudan. Here on Sept. 2, 1898, Kitchener, at the head of an Anglo-Egyptian force defeated the Dervishes and avenged the death of General Gordon (q v).

Omnibus Name given to a public conveyance first introduced into London in 1829 by Shillbeer. Previous to this, stage coaches had been employed for some time for conveying passengers, and in Paris three-horse public coaches had been popular for many years. Shillbeer's omnibuses carried 22 persons inside, and were drawn by three horses, but in 1849 smaller vehicles were introduced followed by roof accommodation in 1857. Further developments came with the formation of the London General Omnibus Company. Under the London Passenger Transport Act (1933), Omnibuses, with tramways, tubeways, etc., were transferred to the London Passenger Transport Board.

Omsk Town of West Siberia. It stands at the junction of the Irtysh and Om rivers, and is 265 m from Akmolinsk, on the Trans-Siberian Railway.

Onager Name of several races of wild ass ranging from Syria Arabia and Persia to Baluchistan and N.W. India (*Equus onager*). Standing 11 hands high, sandy or chestnut-coloured and broadly striped along the back, they are remarkably fleet-footed, being seldom run down by horsemen.

Onega Lake of Russia. The lake covers 3800 sq m and is the largest in Europe save only Ladoga. It is 150 m long. Its waters are carried to Lake Ladoga and it is connected by means of canals with both the White and the Baltic Seas.

Onega River of North Russia. It rises in Lake Ladoga and flows N.E. and N.W. to the Gulf of Onega, on the south of the White Sea. It is about 240 m long. The town of Onega is at the mouth of the river, on the bay of the same name, 84 m S.W. of Archangel.

O'Neill Ancient Irish family. They were descended from King Niall of the Nine Hostages, who were Lords of Tyrone and the hereditary enemies of the O'Donnells of Tyrconnel. Con O'Neill (1464-1559) was a warlike chieftain who, on making submission to Henry VIII in 1542, was made Earl of Tyrone. Shane O'Neill, born about 1530, the eldest legitimate son of Con, was second earl,

and nominally paid allegiance to Elizabeth, but fought against the Scots, and continually against the O'Donnells. He died in 1567.

Hugh O'Neill, the son of an illegitimate son of Con, born about 1540, succeeded to the title in 1587, but intrigued with the Irish rebels and with Spain against Elizabeth. He was defeated at Kinsale, and made submission, but later intrigued against James I with Spain, and in 1607 fled to Rome, and died there in 1616.

Owen Roe O'Neill, born about 1590, went to Spain, and fought in the Spanish army with distinction, later coming to Ireland in 1642, when he fought against Scotland and England with great success, until his death in 1649.

Phelim O'Neill was the leader of the insurrection against the English and Scots settlers in Ulster, in which occurred the Ulster massacre of 1641.

O'Neill Eugene Gladstone. American dramatist. Born in New York, Oct. 16, 1888, he tried commerce, the sea and other callings before he began to write. He went to Harvard University, 1914-1915, and in 1916 spent the summer at Provincetown, where he met the group who produced nearly all his short plays. He rapidly became the most famous of the younger American dramatists. He has written, *Beyond the Horizon* (1920), *Anna Christie* (1922), *Emperor Jones* (1922), *The Hairy Ape* (1922), *The Great God Brown* (1926), and *Strange Interlude* (1928), amongst others. *Days Without End* was produced in London in 1935.

One Thousand Guineas

English horse race. It is an event of the Newmarket spring meeting, and is open to three-year old fillies.

Ongar Market town of Essex, known officially as Chipping Ongar. It is 23 m from London by the L.N.E. Ry., and is situated on the Roding. Pop. 10,140.

Onion Hardy bulbous biennial herb of the lily order (*allium cepa*). It is now widely grown for culinary purposes, usually raised annually from seed. Some forms are produced for pickling, some for storing. The potato onion is a variety throwing out lateral bulbs developed underground. The Welsh, a bulbous form of Siberian origin introduced into mediaeval Europe, is grown for spring salads. See LEER, SHALLOT.

Ontario Lake of North America. One of the Great Lakes, it is the smallest of the five, covering 7260 sq m. It is also the most easterly and the lowest of the five. The waters of Lake Erie are brought to it by the Niagara River and the Trent, Oswego and other rivers enter it. Its waters go to the St. Lawrence. Canals connect it with two important waterways of Canada and the United States. The lake is 185 m long, its northern shores are Canadian, and its southern, American. On the former are Toronto, Hamilton, Kingston, Oshawa and some smaller ports. On the latter are Oswego and Charlotte.

Ontario Province of Canada. With an area of 412,262 sq m, it extends from Detroit, U.S.A., to Hudson Bay, and includes part of Lakes Ontario, Erie, Huron and Superior, which separate the province from the U.S.A. The area known as the Lakes Peninsula is the most thickly settled region. It has the greatest output of any province in manufactures (the chief industry), mining and agriculture, the principal crops including, besides grain, apples, grapes, peaches and other

fruit, tomatoes and tobacco Gold is the most valuable metal mined, and the province produces silver and copper in large quantities and dominates the world's market for nickel Petrol is also found There are very large timber resources. Pientiful electric power is obtained from Niagara and other natural sources Toronto on Lake Ontario is the capital of the Province Ottawa is the Dominion capital, London and Hamilton are the chief towns Pop 3,426,488

Champlain (qv) was the first European to visit Ontario, followed by Jesuit missionaries and fur traders It became British in 1763 and in 1774 became part of the province of Quebec In 1792, however, it was separated from Quebec, becoming the province of Upper Canada with its own legislature John Graves Simcoe (qv) was the first governor Little development took place until after the war of 1812, when the Americans took and burned the capital, York (now Toronto) Following a rebellion in 1837-38, it was once again united with Quebec under a common parliament In 1842 remaining thus till the achievement of Confederation in 1867 Since then the province has been governed by its own legislature of 112 members under a lieutenant-governor, assisted by an executive council

Ontology Name given to a branch of metaphysics dealing with the nature and principles of pure being and the essence of things, or, as defined by Hegel, the doctrine of the abstract characteristics of being The different problems of ontology are concerned with such theories as those of monism, dualism and pluralism.

Onyx Name given to certain kinds of agate in which there is a parallel banded structure, the milky white layers alternating with dark or coloured chalcedony Owing to this structure onyx is used for cameos, the white later being cut in relief upon the darker material In the sardonyx the coloured bands are red, consisting of carnelian or sard

Onyx marble is a stalagmitic form of marble from Mexico, S America and Algeria, used as an ornamental stone

Oolite Geological term for the upper and middle divisions of the Jurassic system The Oolite consists of hard limestones alternating with sands, sandstones and calcareous clays and containing chiefly marine fossils It is divided into Upper, Middle and Lower Oolite, which stretch across central England from Dorset to Yorkshire, and yield many important building stones such as the Portland, Purbeck and Bath stones

Oology Name given to a specialised branch of ornithology dealing with the study of the eggs of birds especially with regard to the methods of collection, also the study of their shapes markings and colouration, characters which are of importance as a means of identification

Ooze Name given to organic deposits occurring on the floor of the ocean basins An ooze is almost entirely composed of the remains of minute organisms and is more plastic and coherent than muds The best known of the oozes is the globigerina ooze of the Atlantic Ocean, consisting of the remains of foraminifera

Opal Mineral consisting of hydrated silica and occurring in non-crystalline form as layers nodules, stalactitic masses or filling cavities in rocks It has a greasy

lustre and hardness lower than that of quartz, while the colour of common opal is bluish white, milky or yellowish In the precious opals there is a remarkable play of colours due to reflection and diffraction of light from thin laminae

Opera Virtually drama set to music After early picturesque attempts, the *Euridice* of Peri (1600) must be considered as the forerunner of opera Early writers of opera were mainly German and Italian as for example Mozart, Monteverde and Rossini, but France owes its earlier operas to M6hul and Meyerbeer and England to Purcell With Wagner (qv) the opera actually became a distinct genre of music, and those to follow this more dramatic style were Bizet (*Carmen*), Strauss and Debussy (*Pell6as*) To Sir Thomas Beecham's efforts to put it on a firm footing we owe the presentation of works by D6mo Eithel Smyth Vaughan Williams Holst, Boughton and Delius Other modern writers of opera include Stravinsky and Puccini The various forms of opera include Recitative (often introductory) Opera Buffa (Italian comic opera with recitative), comic opera and grand opera where every word is sung

Ophir Country mentioned in the Old Testament It was famous for its gold which was brought to Jerusalem in the time of Solomon It was probably in Africa

Ophthalmia Inflammation of the eye, usually the mucous membrane in front of the eyeball and inside the lids. New born babes are liable to purulent ophthalmia sometimes epidemic among school children Sympathetic ophthalmia is inflammation of one eye consequent on disease or injury of the other

Ophthalmoscope Instrument introduced by Helmholtz in 1851 for examining the interior of the eye by means of reflected light There are several forms, but the one commonly used consists of a small concave mirror of 10 ins focus, pierced with a central hole, and having a series of lenses attached

Opium Narcotic drug consisting of the dried latex obtained by incision of the walls of the unripe capsules of the white poppy (*Papaver somniferum*) The latex which rapidly coagulates, is scraped off and dried in the sun, forming dark brown masses Opium contains the alkaloids morphine, codeine, narcotine and narceine each of which is used in medicine as a sedative The opium poppy is grown in Asia Minor, Persia India and China In 1928, an international convention came into force to suppress the illicit traffic in opium and other narcotic drugs From 1935 exports from India were greatly restricted by the Government

When eaten or smoked as a narcotic, the first effect of opium is a pleasant stimulation of the mental activity, followed by sleep The after-effects are unpleasant and harmful and the opium habit, once acquired, is very difficult to relinquish The opium produced in India and consumed in China formerly provided one of the main sources of Indian revenue

Oporto Seaport of Portugal On the north bank of the Douro, it is 209 m from Lisbon by rail Oporto is the centre of the port wine trade, and is also a great manufacturing district, producing textiles, paper and pottery There are tanneries, distilleries and sugar refineries. The

Shipping is handled by the harbour at Leixoes, four miles north Pop (1930) 232,380

Opossum Family of American marsupial mammals. They inhabit central and S America except the largest, the cat sized Virginian opossum, which ranges northwards. The pouch is sometimes rudimentary or wanting, the tail often long, scaly and prehensile. They are nocturnal and arboreal, except the web-footed yapok or water-opossum. Australian phalangers are also called opossums.

Optician Name of a trade concerned with the manufacture and sale of lenses and optical instruments such as telescopes, microscopes, spectacles, etc., also one branch of the trade which specialises in the testing of eyesight and prescribing suitable spectacles. The work presupposes a training in the principles of optics and the practical application of the science especially in the cutting and grinding of lenses. For sight testing a knowledge is required of refraction in relation to eyesight, and the methods adopted to overcome errors of refraction.

Optics Term applied to the science of light and the principles underlying the various phenomena of light and vision. The science is divided into two main divisions, physical and geometrical optics. In physical optics a study is made of the nature of light and the phenomena of colour, refraction, reflection, interference, diffraction and polarisation, while geometrical or mathematical optics is concerned with the laws governing these phenomena, the formation of images and the principles underlying lenses, etc. The Greeks and later the Arabs were conversant with the laws of reflection, but the science did not assume its present form until the days of Kepler, Newton and Huygens.

Optophone Name given to an instrument invented by Fournier D'Albe for changing light rays into their equivalent sounds for use by the blind in reading books. The instrument consists essentially of a revolving disc having eight holes proportional to the vibrations of the notes of an octave. Light directed upon the printed page is interrupted and passes through the apertures of the disc on to a selenium tablet connected with a telephone receiver, each letter being heard with a characteristic sound.

Oracle Response, supposedly divine, given by an inspired priest or priestess to the inquiry of a votary, or the sacred place of utterance itself. As a ritual of divination, oracles profoundly influenced public life in ancient Greece, the most renowned being those of Zeus at Dodona and Apollo at Delphi. At the latter the attendant priests communicated in hexameter verses the utterances of a young woman seated on a tripod over a cave from which a vapour arose.

Oran Seaport of Algeria. It is on the Gulf of Oran, 260 m. from Algiers by railway. A naval station, it is the capital of the department of Oran. Wine and grain are exported, and the production of esparto grass, a raw material of paper manufacture, is important. Cattle and minerals are shipped, also hides and cork. Pop (1931) 163,743.

Orange French family settled in the Netherlands. It takes its name from the town of Orange which was the capital of a little state. In 1500 this came to a member of the family of Nassau who had lands in the

Netherlands and were known as the House of Orange-Nassau. William the Silent and his descendant who became William III of Great Britain belonged to this family. Another branch is now represented by the Queen of the Netherlands.

Orange Fruit of an evergreen tree (*Citrus aurantium*) emanating from the Indo-Chinese peninsula, and cultivated in ancient India. Arabs introduced it into S W Asia before the 9th century, and thence into Spain. Its introduction from the Levant into 15th century Italy preceded its importation direct from the East into 16th century Portugal. It is now cultivated in many localities outside the Mediterranean region, including S Africa, the W Indies, Florida, California and Australia. The sweet or China orange occurs in many forms, including Malta blood-oranges and flattened thin peeled mandarins and tangerines. It is a valuable food, being rich in mineral salts and vitamins A, B, and especially C. See CITRUS.

Orange Town of New South Wales. It is 190 m. by railway from Sydney, and is the centre of a district where wheat and fruit are grown. Pop (1931) 8640.

Orange River of South Africa known also as Gariep or Groote River. Rising in the Drakensberg Range, Basutoland, it flows 1300 m. to the Atlantic, which it reaches 45 m. N W of Port Nolloth. Its principal tributary is the Caledon, about 200 m. long. During part of its course, the Orange River constitutes the north boundary of Cape Province.

Orange Free State Province of the Union of South Africa. It has an area of 49,647 sq m., and joins Cape Province on its West and South borders, Natal and Basutoland on the East, and the Transvaal on the North. Bloemfontein is the capital (Eur pop, 1931, 28,496). The province has a pop of 628,900, Eur pop (1931) 205,324. The Cape to Cairo Railway runs through the province. In 1899 the Orange Free State joined with the Transvaal in the war against Great Britain. Annexed by the latter in 1900, and named the Orange River Colony, in 1910 it entered the Union of South Africa and resumed its earlier name, which dated from the proclamation of an independent republic in 1854, when British sovereignty terminated.

Orange Society Irish political society. Founded in 1795, the first lodge was formed at Armagh, and the movement spread rapidly, gaining adherents in England and elsewhere. The professed objects were the defence of the Protestant faith and succession. The society was named after William III. It drew upon itself Parliamentary action at different times. See IRELAND.

Orang-Utang Malay name, "man of the woods," of the reddish-brown manlike ape of Borneo and Sumatra (*Simia satyrus*). Powerfully built, standing 4 ft 4 ins., when erect the long arms almost touch the ground. This and other anatomical characters render it less manlike than the gorilla and chimpanzee. The males often have warty cheek callosities and enormous pouch-like neck distensions. Inhabiting low-lying forests, which they traverse from tree to tree, they construct family sleeping platforms 20-50 ft. above the ground. They subsist mainly on fruits.

Oratorians Familiar term applied to Roman Catholic Congregations of the Oratory. That of S Philip Neri, founded in a hall or oratory in Rome, in 1564, received papal sanction in 1575. It comprises simple priests under no vows. J H Newman, becoming an Oratorian in Rome founded in England the Edgbaston Oratory 1847 the Brompton Oratory, with F W Faber as first rector, followed. The Oratory, of our Lord Jesus Christ, founded by Cardinal de Berulle in Paris, 1611, was overthrown at the Revolution another arose 1852

Oratorio Sacred counterpart to secular opera. Originally, as devised by S Philip Neri, and used in his Little Oratory about 1574, oratorio was a dramatic representation of sacred history (with scenery and costumes) used as a devotional exercise. The oldest surviving Italian example is Cavallero's "The Soul and the Body" of 1600. In Germany, as a congregational devotion oratorio survived and flourished after the Reformation. Schütz's "The Resurrection" in 1585 founded a tradition which culminated in the masterpieces of Bach. Christ mas Oratorio" and "Passion Music" dispensing with theatrical properties, combined solos, chorus, double chorus, orchestra and congregation into a musical and devotional whole. With Handel began the era of oratorio as a musical entertainment. Handel, Haydn, Mendelssohn and Elgar are the greatest composers in this form.

Orbit Term used in astronomy to denote the path of a celestial body in the heavens, as for example, the earth's whose annual orbit round the sun is elliptical in form.

In zoology the term orbit is applied to the bony cavity containing the eye in vertebrate animals and arched over above the skull. In some mammals the orbit is enclosed completely by bones as in the primates, but in other types the back of the cavity is less ossified.

Orchardson Sir William Quiller Scottish painter. Born at Edinburgh, March 27, 1832, his work was exceptionally quiet in colour, and it was some time before he became popular. Among his more popular works are, "On Board H.M.S. *Bellerophon*" (1880), (In the Tate Gallery) "Marriage de Convenience (1884), "After" (1886), and "The Young Duke" (1889). He was elected A.R.A. in 1868, R.A. in 1877, and knighted in 1907. He died April 13, 1910.

Orchestra Term applied originally to the central circular space in the ancient Greek theatre and used for dancing by the chorus. Later the orchestra became semi-circular and in Roman theatres, choric dancing being no longer in fashion, it was merged into the stage. In more modern times the term has become applied to the band of musicians.

Orchid Herb of an extensive natural order of plants with one seed leaf growing in all climates except the very cold. Orchids comprise many genera, with 5000 species some terrestrial, with fleshy or tuberos roots, some growing on other plants with pseudo bulbs. Many, perhaps all have a specific partner fungus or mycorrhiza essential to the orchid's growth. The one or more flowers have perianths of six coloured segments, that forming the lip being sometimes spurred. Transfer of pollen by insects from one plant

to another for cross fertilisation is secured by various ingenious mechanisms. About 40 species are British including the hee orchis, twayblade, and lady's slipper. See VANILLA.

Orczy Baroness Emmusca. Pen name of Mrs Montagu Barstow, novelist and playwright. Born at Tarnaors in Hungary, she was educated at Brussels and Paris and began writing in 1900 with *The Old Man in the Corner*, a series of detective stories. In 1905 she wrote *The Scarlet Pimpernel*. Two other plays appeared in 1910 and 1918, *Beau Brocade* and *The Legion of Honour*. She is the author of numerous novels, several being sequels to *The Scarlet Pimpernel*, which has been dramatised.

Ordeal Form of trial for detecting guilt or innocence. In primitive culture an aspect of divination administered under priestly direction and relying upon Providence, mediaeval Europe called it the judgment of God. Tests of innocence by ordeal are exemplified in Num v and incidentally in Dan iii. Early England recognised ordeals by hot iron, boiling water, plunging into a stream to sink or swim, consecrated bread and personal combat. Trial by ordeal ceased in 1218, except by combat, which lasted until 1818.

Order-in-Council In Great Britain and other parts of the British Empire an order issued by the sovereign on the advice of the Privy Council. They were first used in the 18th century, and are of two kinds. Some are issued when great urgency is essential, as during a war or a general strike, when there is not time to pass legislation through Parliament. More usually they are issued to carry out the details of legislation. Acts are often passed giving powers to ministers to do certain things, for instance, raise the school age or prohibit the export of old horses by Order in Council.

Ordinance Decree or order that is not strictly speaking a law. Such were issued by the kings of France, and in England in the time of Charles I the Long Parliament passed the Self Denying Ordinance. These ordinances, although not fully laws, had the force of law.

Ordination Ecclesiastical ceremony. It is the special service for the setting apart of Christian ministers to their life work. In the Greek, Roman and Anglican churches the rite is carried out by a bishop and is regarded by the two former as sacramental. In the Free Churches it is administered by one or a number of senior ministers. In each case ordination is by "laying on of hands" in conformity with the New Testament (Acts vi, 17, xiii, 1-4).

Ordinance General term for all kinds of cannon or other forms of firearms (other than small arms) and their ammunition. It was used originally to include the organisation as well as the equipment of artillery and its staff. The ordinance department in the army is charged with the provision, care and distribution of military stores, arms and ammunition as well as the miscellaneous equipment of the army. For the training of officers for these duties there is an Ordinance College at Woolwich. A similar Ordinance Department is established for naval purposes to provide and maintain armaments for ships.

The Ordnance Survey is a topographical survey of Great Britain for the preparation of official maps of the country, and is carried out by the Royal Engineers, with headquarters

at Southampton The original maps were on a scale of 1 in to the mile, but later a 6 in survey was started, followed by maps on a scale of 6 ins and 25 ins, also 5 ft and 10 ft to the mile The maps in most general use are on the 1 in scale and are issued in 3 forms showing the contours, etc., either uncoloured, or in relief and hatchings in colour

Ordovician Word used by geologists for a formation in the earth's crust between the Cambrian and the Upper Silurian Found in Europe, Asia, and the Americas, it contains iron, lead, silver and other minerals, as well as the fossils of the less developed forms of life and of fishes. The stones found include shales, limestones, grits and slates The formation is best seen in Wales where it is in three divisions known as Arenig, Llandello and Bala

Ore Term used in mining for mineral deposits containing metals in sufficient quantity for profitable extraction Metals occur in ores as oxides, sulphides, carbonates, silicates, etc., and in a few in the metallo state, such as gold, platinum, iridium, silver, mercury and copper Ores occur either in veins or lodes, beds, irregular masses or pockets, or superficial deposits, and before they are ready for smelting or other methods of extraction, they usually undergo considerable treatment or "ore dressing" See **LODE**

Ore Coin of Norway, Sweden and Denmark It is a one-hundredth part of the krone and is coined in both bronze and silver, the silver coins being 5, 10, 25 and 50 ore pieces

Oregon State of the U.S.A. On the Pacific coast, it is 96,699 sq m in area West of the Cascade Range is a fertile valley region drained by the Willamette, Regue and Umpqua Rivers, and separated from the Ocean by a coastal range East of the Cascade Range is a prairie region with many peaks Other rivers are the Snake (E) and Columbia (N) constituting the frontiers to some extent Agriculture, cattle raising, lumbering and fisheries are the main industries, and mineral deposits comprise coal, iron, copper, silver, nickel and gold The capital is Salem, and the principal commercial city Portland, both on the Willamette River Pop (1930) 953,786

Orestes In Greek legend, son of Agamemnon and Clytemnestra When his father, returned from the Trojan War, was murdered by his mother and her paramour Aegisthus, Orestes' nurse, or his sister Electra, saved him from a like fate Returning to revenge his father's death, he escaped to the Tauric Chersonese with his friend Pylades to seize the heaven-sent statue of Artemis They were shipwrecked, but were saved by his sister Iphigenia (q.v.) He is the hero of tragedies by Aeschylus and Euripides

Orford Village of Suffolk. It is near the coast, 20 m from Ipswich An object of interest is the ruined Norman castle Orford Ness is a cape on the coast nearby with a lighthouse

The title of Earl of Orford was borne by the family of Walpole and earlier by the family of Russell In 1697 the sailor, Edward Russell, was made Earl of Orford but the title became extinct when he died in 1727 In 1742 Sir Robert Walpole was made Earl of Orford, but the title again became extinct when his noted son Horace, died in 1797 In 1806 Horatio, Baron Walpole, a kinsman, was created Earl of Orford The earldom became extinct in 1931

Organ Complex musical instrument Originally a svinx, the early organ became "a box of whistles," consisting variously, or in combination, of stopped, open and reed pipes, and later adding a wind chest. It was played by the lips and breath of one performer Next came the pneumatic or hydraulic organ with bellows worked by hand or by the weight of boy assistants Its pipes were of copper The first key boards were really systems of levers which were struck with the fists or forearms of the player Present day pedals and reed pipes first appeared in the 15th century Modern organs consist of (1) Pipes (fine and reed), (2) Bellows, wind-trunks and wind chest, (3) The Console (including manuals, pedals, stops, swell pedal, great swell, choir, sole, echo, couplers and accessories), (4) The Action (comprising the tracher, pneumatic, electric and connecting mechanisms)

To modern cinema organs are added stops registering orchestral and naturalistic effects

Oriel Architectural term applied to a bay window in a Tudor or Gothic building, either on the ground floor or projecting from an upper floor, in this case supported on corbels Many examples of oriel windows are seen in manor houses of the Tudor period and at Christ's College, Cambridge

Oriel College, Oxford, takes its name from a tenement, La Orlele, granted to the college in 1327

Orient Region where the sun rises, i.e., the east The word denotes more specifically the geographical region E and S E of Europe, including Turkey, Persia, India and China, whose inhabitants are collectively called Orientals

Orientation Setting of a building or person with reference to the compass points It refers especially to the placing, at the E end, the main entrance, as in ancient Greek and other temples, or of the altar as in various Christian churches after the 6th century

Origen Greek father of the church Born at Alexandria, of Christian parentage about A.D. 185, he himself taught in the catechetical schools at 18 His learning was such, especially on the philosophical side, that he influenced the course of church history for centuries, formulating its dogmas and founding Biblical criticism He suffered at intervals during the Imperial persecutions, and died at Tyre about 254 His works include *Hexapla*, the first polyglot of the Old Testament, and a defence of Christianity against Celsus

Original Sin Corruption of man's nature inherited from Adam's fall This doctrine, generally accepted in 5th century Western Christianity under St Augustine's guidance, asserted the need of baptism for remission of sins, and of divine grace for attaining goodness. It was confirmed by the Council of Trent Actual Sin is defined as the individual's voluntary act. See **SIN**

Orillia Town of Ontario, Canada On Lake Couchiching, 86 m from Toronto, it is a summer resort. There are foundries, motor vehicle works, and an important industry is the manufacture of agricultural implements Pop 7700

Orinoco River of Venezuela Rising in the Parima Mts on the Brazilian border, it flows round the range, and thence East to the Atlantic, following a course of about 1500 m and reaching the sea near

Trinidad A tributary, the Cassiquiare, communicates with Rio Negro, a tributary of the Amazon. Other rivers entering the Orinoco are the Apure, Guaviare and Meta. Between the two last are the falls of Maipures and Atures.

Oriole Family of perching birds, natives of temperate and tropical regions of the Old World. The golden oriole *Oriolus galbula*, 9 ins long, with brilliant male yellow plumage and black wings and tail is a regular spring visitant to Britain, formerly breeding there. It now breeds in Europe and S W Asia, spending the northern winter in S Africa.

Orion In Greek mythology, a handsome giant and hunter. Clearing Chios of wild beasts for its king, Oenopion whose daughter he desired he was inebriated and blinded, regaining his sight when confronting the rising sun. He was slain hunting in Crete in company with Artemis, and became the constellation bearing his name. This, mentioned in the Old Testament, is a conspicuous constellation near the equinoctial line, containing, among others, three brilliant stars forming Orion's belt, and a majestic nebula.

Orkneys Group of islands forming a county of Scotland. Separated from the mainland by the Pentland Firth they number 68, with a total area of about 370 sq m. Less than half are inhabited. The largest is Pomona, on which are the capital Kirkwall, and Stromness. The most important islands in the group are Hoy (parted from Pomona by Scapa Flow), N and S Ronaldshay, Flotta, Stronsay, Rousay, Westray, Shapinsay, Eday and Sanday. Fishing and agriculture are the chief pursuits. Pop (1931) 22,075.

Orlando Vittorio Emanuele Italian statesman. Born in Sicily, Mar 19, 1866 he became Professor of Constitutional Law at Palermo, and in 1916 was Minister of the Interior. He was criticised for his lenience with pacific agitators, and changed his policy. In 1917 he succeeded Boselli as Premier, and raised Italy to the pitch of high enthusiasm and strong resistance, in spite of the disastrous defeat of General Cadorna at Caporetto. He was one of the "Big Four" at the Paris Peace Conference in 1919, and seceded from it on the Fiume question, but returned with a compromise, and helped with the Yugo-Slavian question. On the growth of Fascism, he retired from politics.

Orleans French town. Chief town of the department Loiret, it stands on the right bank of the Loire. The cathedral (begun in 1601) is one of the noblest Gothic edifices in the country. In May, 1429, Joan of Arc defeated the English under the Duke of Bedford and raised the siege of the town. Her house may still be seen there as well as three different statues of the heroine. Orleans manufactures hosiery, cotton etc., and receives some commercial importance from the canal which joins the Loire and the Seine. Its Roman name was Civitas Aureliani. Pop (1931) 71,666.

Orleans House of French noble family of royal blood. The title Duke of Orleans was created by Philip VI, who conferred it on his natural son Philip in 1344. On the accession of the third Duke to the throne in 1498 as Louis XII, the title lapsed. It was next held by Jean Baptiste Gaston, a son of Henry IV who received it from his brother Louis XIII in 1626. On his death it was not revived till Louis XIV conferred the

dukedom on his brother Philippe in 1660. The latter's grandson, of the same name, who succeeded to the title, was regent of France during the minority of Louis XV. Louis Philippe Joseph (1747-93) a man of liberal views, acquired in England through his friend ship with the Prince of Wales (afterwards George IV), joined the *tiers état* at the head of the seceding noblemen but perished by the guillotine. Henri (1867-1901) was a distinguished traveller and explorer. Louis Philippe Robert (1869-1926) was born in England and served with the British army in India.

Orme's Head Great Rocky promontory near Llandudno in Caernarvonshire. It is 679 ft high and the top is reached by a cable tramway. A marine drive has been constructed round the cliffs. On the hill are S Tudno's church, a 15th century building, and a lighthouse.

On the other side of Llandudno is **Little Orme's Head**, famous for its caves.

Ormolu Name given to an alloy resembling gold in colour and composed of copper, tin and zinc, the first metal predominating. It is used for making statuettes and clocks, also as a metal base for a form of champlevé enamel work. The name ormolu is sometimes used as a general term for bronzed articles.

Ormonde Duke of. Irish title held by the family of Butler. James Butler was born in 1610 and succeeded to the earldom of Ormonde in 1632. He distinguished himself in the service of Charles I, and was rewarded with the ducal title of Ormonde at the Restoration. Colonel Blood tried to take his life in 1679, but he escaped, and lived until 1688. James Butler, second Duke of Ormonde, grandson of the above, was born in Dublin in 1665. He commanded William's life-guards at the Battle of the Boyne, and in 1702 commanded the troops in Rooke's expedition to Cadiz. He was Lord Lieutenant of Ireland in 1763 and in 1711, commander-in-chief against France and Spain. Impeached in 1715 for high treason against George I, his estates were attainted, and he spent the rest of his life in France intriguing for the Pretender, until his death in 1746.

Ormskirk Market town and urban district of Lancashire, 12 m N E of Liverpool and 269 from London by the L.M.S. Rly. Its industries include the making of gingerbread and market gardening. Pop (1931) 17,121.

Ormuz Name of the strait that connects the Persian Gulf with the Gulf of Oman, also the name of an island in the strait. In the 4th century a city was founded on this island and became very prosperous as the meeting place of great trade routes. In 1515 the Portuguese took it and in 1622 it was seized by the Persians aided by an English force, about this time its importance declined and it no longer exists.

Ormuzd Aryan deity. In the teaching of Zoroaster, this god under the name of Ahura Mazda is regarded as the principle of good in opposition to Ahriman (q.v.) the principle of evil. The dualism is only apparent for the final victory of Mazda over the forces of evil is assured. Zoroaster, says Dean Inge "is to all intents and purposes a monotheist."

Ornithology Systematic study and knowledge of birds (q.v.).

It deals with the classification of birds, their habits, migrations, economic uses, etc. Societies devoted to the study or culture of birds include the American Ornithologists' Union, Washington, D.C., the British Ornithologists' Union, London, and the Avicultural Society, London. These publish quarterly or monthly journals. There are also societies for the protection of birds, provision of bird sanctuaries etc.

Ornithorhynchus Generic name of the duck-billed platypus or water-mole, a mammal restricted to S and E Australia and Tasmania. It forms with the *echidna* (*q v*) the lowermost mammalian order, distinguished by having a single outlet for both solid and liquid excretions, as in birds. Although it is usually described as egg-laying, some authorities question whether the eggs are hatched within or without the body of the female. See DUCK-BILL.

Orontes River of North Syria. Other names are Axios and Nahel Asl. Rising in the Anti-Lebanon, it flows 250 m. to the Mediterranean, passing near Antioch and entering the sea 40 m. N of Latakia.

Orpen Sir William British artist. Born in County Dublin, Nov. 27, 1878, he was educated at Dublin Metropolitan School of Art and the Slade School. He was President of the International Society and several other Art Societies. During the Great War he was appointed an official artist, and in 1918 he held a great exhibition of his war pictures, many of which he presented to the nation. Elected A.R.A. in 1910 and R.A. in 1919, he was perhaps best known as a portrait painter. He wrote *An Onlooker in France* (1921) and *Stories of Old Ireland and Myself* (1924). He died Sept. 29, 1931.

Orpheus In Greek legend, son of Oeagrus, King of Thrace, and the muse Calliope. He played so exquisitely upon a lyre presented by Apollo as to charm all Nature. He accompanied the Argonauts on their quest of the Golden Fleece, wedded the nymph Eurydice, and followed her to Hades, but failed to bring her back to earth. His constancy to her memory so angered the Thracian women that they slew him. His lyre, carried to heaven, was placed among the stars.

Orpington District of Kent. It is 9 m. from Chislehurst, on the S. Ry. It is a fruit-growing district. Pop. 7047.

Orpington fowls were originated by W. Cook, and are excellent utility birds, big in frame, good layers and sitters, and good table birds. The varieties are white, black, buff, spangled, blue, cuckoo and jubilee. See POULTRY.

Orrell Urban district of Lancashire. A centre of the cotton industry, it is 3 m. from Wigan and 192 from London, by the L.M.S. Ry. Pop. (1931) 6957.

Orris-Root Rhizome, or underground stem, of various species of iris which when dried has a delicate violet like smell. It furnishes so-called essence of violets, "violet-powder," and some scented dentifrices. It has medicinal and breath-sweetening uses also. Exported from N. Italy and Mogador, the best comes from the Florentine iris.

Orsay Comte d' French dandy. The son of General d'Orsay, he was born at Paris in 1801, and was for 20 years the intimate friend of Lady Blessington, the English author, and friend of Lord Byron. An authority on fashion and a brilliant conversationalist, he

also showed talent as a painter and sculptor. He was a friend of Louis Napoleon (Napoleon III.) who made him Director of the Beaux Arts at Paris before his death in 1852.

Orthoclase Mineralogical name for potash felspar, a common rock forming mineral consisting of silicate of aluminium and potassium. It occurs in monoclinic prisms of a lustrous white, grey or reddish colour in granites and other crystalline igneous rocks. Its pearly variety, moonstone, and the spangled variety, sunstone, are cut *en cabochon* for use as gem stones.

Orthodoxy Term meaning "right opinion." It denotes soundness of belief, especially religious. It involves the formulation of a standard generally accepted. Protestant orthodoxy is deemed heterodox by Roman Catholics. The Eastern Church claims the title of Holy Orthodox Apostolic Church.

Orthography Art or practice of writing words with the proper letters according to accepted usage. The same applies to the representation of tones and effects in proper musical notation. In draughtsmanship it denotes the geometrical representation of a building's elevation or of a section through it.

Orthopaedic Surgery Branch of medical science dealing with deformities. Modern methods owe much to the developments during and after the Great War, when constructive operations and repairs to soft tissue and bone were so frequently necessary. Special mechanical instruments, which have been developed, enable excisions to be made and material for renewal purposes to be applied with comparatively little serious shock to the patient. The use of X-rays is an important adjunct.

Ortolan Species of bunting (*Emberiza hortulana*). It spends the summer in Europe and W. Asia, wintering in Africa. The male, 6½ in. long, is attractively plumaged. Hardly ever visiting Britain, it acquired reputation among 18th-century openers, and is still noted in S. Europe during its southward migration, and fattened on grain for the table.

Orwell Estuary of the river known as the Orwell, or the Gipping. The river rises in the N. of Suffolk and flows past Ipswich to the North Sea.

Osaka City of Japan. It stands on the bay of the same name at the mouth of the River Yodo. Numerous canals and steamers ply between Osaka and Kobe, for which the harbour was constructed. It has an electric railway service, and its industries include sugar refineries, iron works, cotton spinning mills, as well as a trade in tea, rice, etc. Among its buildings are the university, arsenal, and Shinto and Buddhist temples. The most populous city of Japan, its boundaries were extended in 1915. Pop. (1930) 2,453,57.

Osborne Judgment Judicial decision of the House of Lords. It was given on Dec. 21, 1909, in the case of W. V. Osborne against the Amalgamated Society of Railway Servants, after the decision of the King's Bench had been reversed in the Court of Appeal. The judgment declared void a Trades Union rule, which provided for an enforced levy from its members towards the payment of M.P.'s salaries and dealt a blow at the political activities of the Trade Unions. See TRADE UNION.

Oscar Name of two kings of Norway and Sweden. Oscar I, born in 1799, was the son of General Bernadotte, who afterwards became Charles XIV. He became king in 1844 and established the freedom of the press but refused reform of the obsolete constitution. In 1848 he supported Denmark against Germany and was one of the guarantors of the integrity of Denmark. He died July 8, 1859.

Oscar II, a son of Oscar I, born at Stockholm Jan. 21, 1829, succeeded his brother, Charles XV, on July 18, 1872, and was crowned on July 18, 1873. His remarkable intelligence and great diplomacy in dynastic matters affecting European sovereigns resulted in Great Britain, Germany and America requesting him to appoint the chief justice of Samoa in 1889, and he became umpire in the Anglo-American arbitration treaty of 1897. His works include *Memoirs of Charles XII*. He died at Stockholm, Dec. 8, 1907.

Oscillograph Electrical instrument for showing and recording the form of the waves of alternating currents and high frequency oscillations. In the Duddell oscillograph and the Irwin hot wire oscillograph, the record is shown by a spot of light reflected from a mirror.

Oshawa City and port of Ontario. On Lake Ontario. It is 33 m. from Toronto, on the C.P. and C.N. Ry's. Its chief industries are carriage and motor works, foundries, flour and woolen mills, etc. Pop. 11,940.

Osier Name applied to those native or cultivated forms of willow trees and shrubs whose tough, flexible branches serve for basketry and wickerwork. Besides the common osier, *Salix viminalis*, with forty varieties, British osier heds also contain the brown or French willow, *S. triandra*, much hybridised, the red *S. purpurea*, and the golden osier, a yellow variety of the white willow.

Osiris Ancient Egyptian deity. Originally the local god of Busiris. Interred at Abydos, he was during the Old Kingdom revered as the legendary source of Egypt's well being and a centre of widespread worship. Around him grew up mythical stories making him the husband of Isis and brother of Set, the god of darkness. Later religion made him the judge of the dead and god of the after life, represented in mummified form with a plumed crown.

Oslo Capital city of Norway. It is picturesquely situated on the S.E. coast at the head of the Christiania Fjord. Its Danish name of Christiania was changed to Oslo on Jan. 1, 1925, in deference to national sentiment. The city was designed and laid out by Christian IV in 1624 and possesses several ancient buildings as well as a university, museum and state theatre. Its harbour is ice bound during the winter. Its manufactures include iron, wool, cotton, paper, tobacco and matches. It has a broadcasting station (1063 M., 60 kW.). Pop. 258,341.

Osman Sultan of Turkey. Founder of the Ottoman Empire, he ruled in Asia Minor from about 1298 to 1326. Osman II reigned from 1616 to 1621.

Osman Turkish pasha and soldier. Born at Tokat in Asia Minor in 1832, he distinguished himself at Plevna in 1877. With the help of his engineer, Tewfik Pasha, Osman entrenched himself in such a formidable position that he delayed the Russians for five months before capitulating, thus causing them to cross the Balkans in mid winter. He was

richly rewarded on his return from imprisonment, and in 1878 became War Minister, which post he held until 1885. He died on April 14, 1900.

Osmium Rare metal, having the symbol Os, atomic number 76, and atomic weight 190.8. It is bluish-white with a brilliant lustre. The metal is very hard and has a higher density than any other known substance. It is associated with platinum and occurs as a natural alloy with iridium as osmiridium in Russia, Tasmania, South Africa and elsewhere. The alloy, osmiridium, is used for tips of fountain pen nibs and electrical contacts. Osmic acid is of value as a microscopic stain for nerve tissue.

Osmosis Term applied to the process of diffusion of two liquids of different density through a permeable but non porous membrane, the pressure controlling this diffusion being known as osmotic pressure. To illustrate this, a bladder filled with strong sugar solution is suspended in a vessel of water and it is found that the water rapidly passes through the membrane into the bladder (endosmosis), and a small quantity of the syrup diffuses outwards (exosmosis). Osmosis is an important factor in the root absorption of plants.

Osmond English saint. As a chaplain he accompanied his uncle, William the Conqueror, to England, and in 1072 became Chancellor. Bishop of Salisbury from 1078, he built the cathedral of Old Sarum, introduced a form of church service, engaged in the preparation of Domesday Book, and died 1099. He was canonised in 1457.

Osnabrück Town in the Prussian province of Hanover, on the Hase, 70 m. from Hanover, and 31 from Münster. It was a member of the Hanseatic League, and contains, besides the cathedral and the Gothic Marienkirche, examples of Gothic and Renaissance domestic architecture. Here in Oct., 1648, the peace Treaty of Westphalia was signed. Important manufactures include machinery, iron, steel, paper and chemicals. Its linen trade in the 18th century helped to restore the ravages of the Thirty Years' War. Pop. (1933) 91,277.

Osprey Cosmopolitan bird of prey, distantly related to the honey buzzards, *Pandion haliaetus*. Also called fish-hawk, it feeds solely on fish. The male, 24 in. long, has dark brown plumage laced with white, and white underparts. The birds nest on trees or lonely rocks near water. Two or three red blotched eggs are laid. The so called osprey plumes of the feather trade come from the egret (*q.v.*).

Ossa Mountain of Greece. Its modern name is Kisvaya and it is 6400 ft. high. It is in Thessaly near Olympus and is chiefly known because here the gods and the giants engaged in warfare. The giants are said to have built the neighboring mountain of Pelion on Ossa in order to reach the sky.

Ossett Borough and market town of Yorkshire, 180 m. from London and 3 m. from Wakefield, on the L.M.S. and L.N.E. Ry's. Its industries are cloth manufacture and coal mining. Pop. (1931) 14,838.

Ossian Legendary Irish hero and bard. Associated with Fionn and other 3rd-century warriors at the court of Tara, he and his followers traditionally suffered defeat at Gabhra. 293. Mythically spending many years in fairyland, he eventually encountered

S. Patrick, who baptised him. His literary work has disappeared, unless it be embodied in the poems which James Macpherson, a student of Gaelic, claimed to have discovered and "translated".

Ossification Bone-formation. Cartilage is normally converted into bone, both before birth and during childhood, at various centres of ossification, or around fractures. In old age certain cartilages, e.g. the larynx, may become unnaturally ossified. The word is incorrectly extended to morbid processes simulating bone-making, e.g. the thickening of the arterial walls. See BONE.

Ossington Viscount English politician. John Evelyn Denison was born at Ossington, Notts, Jan 27, 1800, commenced his political career in 1823, and soon came to the fore as an orator. He was chosen Speaker of the House of Commons in 1857, a position he retained until his retirement in 1872, when he was created Viscount Ossington. He died March 7, 1873. *The Speakers' Commentary of the Bible* was undertaken at his instigation.

Ossory Former kingdom of Ireland. It covers the counties of Leix, Offaly, Kilkenny and Carlow. The term is used to-day for dioceses in the Roman Catholic and Anglican Churches, both of which have their cathedral at Kilkenny. The Marquess of Ormonde holds the title of Earl of Ossory, given to one of his ancestors in 1527.

Osteitis Inflammation of the substance of bone. That of the marrow-filled cavities of long bones is called osteomyelitis, it often arises from septic conditions in young children. Chronic osteitis may be rarefying, when the bone substance diminishes, or condensing, when it increases. It may be due to injury, syphilis or inflammation.

Ostend Town, seaport and watering place of Belgium, 77 m from Brussels and 60 E. of the Kentish coast. It has com- modious modern docks to accommodate the ships of heavy tonnage which cope with the enormous passenger, food produce and other traffic with England and elsewhere. The promenade, 3 m long, is constructed of granite, with a casino and the Royal Châlet. Its manufactures include linen and sailcloth.

From 1914-18 Ostend was occupied by the Germans as a submarine base, but aerial bombardment made it indefensible and the sinking of the *Vindictive* in 1918 practically blocked the entrance to the harbour. A light-house, replacing the one destroyed in 1916, was completed in 1924. Pop (1931) 47,313.

Osteology Branch of anatomy dealing with the bony framework of the body. See SKELETON, ANATOMY.

Osteopathy Method of medical treatment based on the belief that health can be maintained by attention to the proper mechanical adjustment of the body rather than by the use of drugs. It includes surgical treatment for fractures and wounds, attention to diet, hygiene, etc. In some states in the U.S.A. practitioners are legally on the same basis as other qualified medical men.

Ostia Ancient town and harbour of the city of Latium, Italy. At the mouth of the Tiber, 14 m from Rome, it became an important harbour during the Punic Wars. The Emperor Claudius had a new harbour constructed 2½ m to the N., about A.D. 40, connected with the Tiber by a canal, and

Trajan, in A.D. 103, made still further extensions. The canal became blocked in the Middle Ages until the beginning of the 17th century.

Ostia gradually declined until it was abandoned. In the 15th century a castle was erected E. of the ancient city by Guilianno della Rovere. In 1875 extensive draining of the marshes around Ravenna took place.

Ostracism Greek equivalent for banishment. Votes were recorded on fragments of pottery (*ostraka*), and in Athens, if 6000 citizens voted against a man he was ostracised or exiled for 10 years, or for 5. Miltiades, Themistocles and Alcibiades were all ostracised.

Ostrich Two-toed flightless bird (*Struthio camelus*), with keelless breast-bone, indigenous to Africa and S.W. Asia. It is the largest living bird. The males, 8 ft high, have short black body-feathers and long white rump and wing-feathers, those of the female are dusky grey. Dwindling in S.W. Asia, they still occur wild in Africa, and are reared in extensive ostrich-farms in S. Africa, Kordofan, Argentina, California and elsewhere.

Ostrogoths Eastern branch of the Goths. They flourished in the 4th and 5th centuries and were one of the branches into which the Goths were divided, the other being Visigoths or West Goths. See GOTHS.

Ostwald Wilhelm German chemist. Born at Riga, Sept 2, 1853, he was educated at the University of Derpat, after which he spent five years in Riga. In 1887 he became Professor of Physical Chemistry at the University of Leipzig and then Director of the Physico-Chemical Institute there. In 1906 he retired, and in 1909 was awarded a Nobel prize. He wrote a number of books on chemistry, including *Principles of Inorganic Chemistry*. His work lay chiefly in the field of electrochemistry and solutions. He devised the viscometer known by his name, and discovered a method of oxidising ammonia to form oxides of nitrogen. His knowledge greatly assisted the manufacture of explosives in Germany during the Great War.

Oswald King of Northumbria. A son of Ethelfrith, King of Bernicia, he succeeded his brother as king in 635. He was successful as a soldier and united Bernicia and Deira into the kingdom of Northumbria which, during his short reign, was the strongest in England. He was killed at Oswestry in 642 in a battle against Penda, the heathen king of Mercia. Oswald is known for the work he did for Christianity, and was made a saint.

Oswaldtwistle Urban district of Lancashire, on the Leeds and Liverpool Canal and the L.M.S. Ry. Its chief industries are cotton mills, chemical works and printing works. Near are collieries and stone quarries.

Oswego City and port of New York State. On Lake Ontario at the mouth of Oswego River, it is well served by railways, canal barges and lake steamers. The city has a fine modern harbour, miles of quays and extensive accommodation for its gigantic trade in grain and lumber with Canada and elsewhere. Its river water power is also well developed and utilised in its manufactures, which include cotton, woollen goods, cocoa, etc. The Oswego Canal was completed in 1828. Pop (1930) 22,652.

Oswell William Cotton English explorer. Born April 27, 1818, at Leyton.

stone, he was educated at Rugby and the East India Co's College at Haileybury. In 1837 he went to Madras and became known for his prowess as an elephant catcher, whilst he took up the study of surgery, medicine and languages. He next went to S Africa and explored parts hitherto untraversed by Europeans, including the expedition with David Livingstone and Mingo Murray, when they discovered Lake Ngami and found that it was possible to cross the Kalahari desert with the aid of oxen and wagons. In 1853 he returned to England and served in the Crimean War. He visited N and S America and died May 1, 1893.

Oswestry Borough of Shropshire, 20 m from Shrewsbury, on the G W Rly. It is in an agricultural area and one of its chief industries is tanning. Pop (1931) 9754. Old Oswestry is a strongly fortified encampment about a mile away.

Otago Provincial district at the S end of South Island, New Zealand. First settled in 1848, it has an area of 25,220 sq m, and a population of (1932) 222,600. The capital is Dunedin, and it has two seaports: Oamaru in the N and the Bluff in the S. It produces oats, rye, fruit, and one third of New Zealand's gold.

Otariu Seaport on the W coast of Yezo, Japan. 100 m N of Hakodate. It is a centre for herring fishing. Pop 144,887.

Oxford Village of Kent, on the Darent 3 m from Sevenoaks and 24 from London, by the S Rly. Here are ruins of a castle. Pop 1785.

Otho Marcus Salvius Roman emperor. Born April 28, A.D. 32, he was sent in 58 by Nero, whom he had displeased to govern Lusitania. In 69 he supported Galba in a revolt against Nero. He next rose against Galba who was slain. He then proclaimed himself Emperor and reigned only three months, when Vitellius completely overthrew his forces. He committed suicide on April 16, 69.

Otitis Inflammation in the organ of hearing. It may concern the skin of the external ear, and be acute or chronic, sometimes with discharge and more or less deafness. Earache frequently consists of inflammation of the middle ear also acute or chronic, with or without the formation of pus, which may involve drum perforation or discharge. Inflammation of the inner ear, producing nerve-deafness, may be due to an affection of the drum or to disease within the brain.

Otley Urban district and town of Yorkshire (W R) on the River Wharfe, 10 m from Bradford on the L N E and L M S Rlys. Its industries include spinning, tanning, leather dressing and the manufacture of printing machines, and here also are stone quarries. S of the town is the ridge of Chevin, famous for its extensive views. Pop (1931) 11,020.

Otley is also the name of a village in Suffolk, 6 m from Woodbridge.

Otranto Seaport and town of Apulia, Italy, 45 m from Brindisi. Founded by Greek colonists in the Middle Ages it was the principal trading port with Greece. It has ruins of a castle which Horace Walpole used in the title of his romance. It has a small harbour. Fishing is its principal industry.

The Strait of Otranto is 44 m across. Here is a lighthouse, a cable runs to Corfu and elsewhere.

Ottawa River of Canada. The most important tributary of the St

Lawrence, it rises 300 m N of the capital of Ottawa and has important tributaries on each bank, the largest being the Gatineau. Its total course is about 685 m, of which only a third is navigable. At Ottawa the river forms the Chaudière Falls, 40 ft high. The Rideau Canal connects it with Lake Ontario.

Ottawa Capital of the Dominion of Canada, on the Ottawa River, between the Chaudière and Rideau Falls. Champlain describes the site in his *Voyages* as early as 1613, but no settlement was attempted, owing to the hilly nature of the district, until well on in the 19th century, when a canal was built from the Chaudière Falls to Lake Ontario. This settlement soon developed into a wealthy and important factor in the lumber trade. Ottawa was incorporated as a city in 1854 and in 1858 was chosen as the capital of Canada.

Finely situated, Ottawa numbers among its important buildings, the Parliament buildings, Royal Mint, National Museum and National Art Gallery. It is served by the C N and O P Rlys and is cut in two by the Rideau canal. Pop (1931) 124,988.

An important conference was held at Ottawa in 1932, when representatives of the self-governing states of the British Empire met to discuss the possibilities of increasing intra-imperial trade.

Otter Widely distributed subfamily of carnivorous mammals of the weasel family. The common European river otter, *Lutra vulgaris*, 27 in long, with 15 in tail, has short limbs, rounded webbed feet and small external ears. It hunts fish, especially by night swimming horizontally through the water. Common throughout Britain, it rests in river-banks or in seashore caves. The larger American *N. canadensis* furnishes the most valuable of N American furs. Otters occur in India, the Cape and S America. The sea otter (*O. t.*) forms a distinct subfamily.

Otterburn Village of Northumberland, 44 m from Woodburn station, on the L N E Rly. Near is an obelisk marking the spot where the battle of the Chevy Chase (*q.v.*) was fought between the Douglases and the Percies on Aug 19 1388. Pop 350.

Otter-Hound Breed of dog maintained for otter hunting. Descended from the old southern breed, it is distinguishable from the rough Welsh harrier only by its broad, spayed feet and its abundant oily waterproof undercoat. Standing 23 in high, with sweeping ears, deep set eyes and long neck, it is essentially a water dog. Several packs exist in W England. Otter-hunting lasts from mid April to mid September. See HARRIFF.

Ottery St Mary Urban district of Devonshire, 12 m NE of Exeter and 163 from London, by the S Rly. The town has lace manufactures. The fine Church of St Mary is a replica on a smaller scale, of Exeter Cathedral. Here S T. Coleridge was born. Pop (1931) 3713.

Otto Name of four emperors of the Holy Roman Empire. Otto I, called the Great, was born Nov 23, 912 the son of Henry I, and crowned German King in 936. He spent some years subduing his dissatisfied nobles, the Bohemians, Danes and Wends. In 951 he defeated Berengar II, and in 955 the Magyars. His first wife was Edith, daughter of Edward the Elder, his second wife, Adolphe, Queen of Lombardy. He died May 7, 973.

Otto II Born 955, son of Otto the Great, was crowned German King in 961 and joint Emperor of Rome in 967. During his reign he subdued a revolt of the Duke of Bavaria, expelled the French from Lorraine, and unsuccessfully laid claim to part of S Italy. He died Dec 7, 983. **Otto III**, called The Wonder of the World, born July, 980, the son of Otto II, was chosen king as his father's successor and crowned in Dec, 983. His mother, Theophano, governed until her death in June, 991, and he took over the reins of government on May 21, 996. His ambition was to make Rome an empire surpassing in greatness anything hitherto conceived, but he died before accomplishing this, Jan 23, 1002. **Otto IV** Born about 1174, the son of Henry the Lion, was chosen German King, Nov 11, 1208, and crowned Emperor in Rome, Oct 4, 1209. He quarrelled with the Pope who excommunicated him, and in 1212 declared him deposed, upholding Frederick II in opposition to him. Otto espoused England's cause against France, and defeated in 1214, escaped with difficulty to Cologno. He died May 19, 1218, at Harzburg.

Otto I. King of Greece. The son of Louis I of Bavaria, he was born June 1, 1815. Elected by the Conference of London to occupy the newly created throne of Greece when only 17, he was forced to rely on Bavarian troops and ministers to maintain his position. With the help of Ludwig, Count of Armanberg, his Bavarian Chancellor, he kept the Greeks in subjection. In 1861 the nation revolted after an attempt to murder the Queen Amalia, and in 1862 Otto and Amalia were forced to leave Greece and return to Bavaria. He died July 26, 1867.

Otto, or Attar, of Roses

Essential oil obtained by distilling or macerating the petals of damask and other fragrant-flowered roses. Most otto on the market comes from the Balkans, where 20,000 Bulgarian peasants cultivate small plots of roses, 150 lb of petals yield 1 oz of pale yellow oil. The distillate water, treated with fresh flowers, furnishes the rosewater of perfumers.

Ottoman Name of a Turkish people Osman, or Othman (1258-1326) was the leader of a tribe which was called the Ottoman Turks. They became very powerful and in 1453 took Constantinople.

The name Ottoman is applied to a form of cushioned seat without a back, which originated in Turkey.

Ottoman Empire

See TURKEY

Otway, Thomas English dramatist Born 1652, he was educated at Winchester and Christ Church, Oxford. He failed as an actor, but had some success with his tragedy, *Albiades* (1675). He followed this success with a series of comedies and tragedies including translations of Racine and Molière. His greatest work is *Venue Preserved* (1682). He died April 16, 1685.

Oudenarde Flemish town, on the Schelde, 17 m. SSW of Ghent. On July 11, 1708, it was the scene of a battle in the War of the Spanish Succession, when the Duke of Marlborough and Prince Eugene defeated a superior French force, and drove Louis XIV to make peace overtures, which were not accepted.

Oudh Province of NW India occupying the basin of the Gumti, Gogra and Rapti rivers. It stretches from the N bank of the Ganges to the lower Himalayas. Entirely agricultural, it exports crops of wheat and rice. Its largest town is Lucknow. In the 12th century Oudh became subject to the Empire of Delhi, previous to which it was one of the earliest centres of Aryan civilisation. It was annexed by the British in 1856 after being an independent state for about a century. The population is one of the densest in the world. Pop 12,833,000.

Ouida Pseudonym of Louise Ramée, the English novelist. Born at Burr St Edmunds, Jan 7, 1839, she lived in London for a time and then made her home in Italy. Of her many novels *Under Two Flags* and *Moths* are considered her best productions. She died Jan 25, 1906.

Oulton Lake or broad of Suffolk. It is near Lowestoft, and on it is the village of Oulton, famed for its connection with George Borrow. Also called Lake Lothing, it is visited for boating and fishing.

Ounce (or Snow Leopard) Large spotted cat (*Felis uncia*) inhabiting the mountainous regions of Central Asia. Obtuse-muzzled, 7 ft long, including 3 ft tail, the long, woolly fur, greyish above, pure white beneath, has large black irregular spots. It preys on wild sheep, goats and rodents, descending to 6000 ft in winter, and ascending to 18,000 ft. in summer. See LEOPARD.

Oundle Urban district and market town of Northamptonshire, on the Nen, 13 m from Peterborough, on the LMS Ry. Its chief industry is lace making. Pop (1931) 2001.

Oundle School was founded by Sir William Laxton in 1550. It is controlled by the Grocers' Company and in the 19th century became a great public school under F W Sanderson.

Ouse River of East Anglia, known as the Great Ouse, 160 m long. It rises in the hills between the counties of Oxford and Northampton and flows for 160 m to the Wash. It flows past Buckingham, Newport, Pagnell, Bedford, Huntingdon, St Ives and King's Lynn, and is navigable to Bedford. Its tributaries include the Little Ouse, Cam, Lark, Ouzel and Tove. Two artificial channels called the Bedford rivers take some of its water across the district.

Ouse River of Yorkshire. It is formed by the union of the Ure and the Swale at Boroughbridge. It passes York, Selby and Goolo and then joins the Trent to form the Humber estuary. It is 60 m long and is tidal to Selby. Its tributaries include the Nidd, Aire and Don, Derwent and Wharfe, by means of canals it is connected with other waterways in the N of England.

Ouse River of Sussex. It rises near Horsham and flows to the English channel at Newhaven, 30 m long. It passes Lewes, to which town it is navigable by small vessels.

Outlawry Art of placing a person outside the protection of the law. It was a very common punishment in the Middle Ages, but is never employed to-day. An outlaw, having no rights, could be killed by any one and his property taken. Outlawry was not, therefore, quite the same as banishment.

Outram Sir James. English soldier. Born at Butterley Hall in

Derbyshire, Jan. 29, 1803, he began his service in India with the Bombay native infantry in 1819. Almost his whole career was spent in India and Afghanistan. Returning from his successful command of the Persian expedition, he was one of the heroes of the Indian Mutiny. With Havelock he relieved Lucknow and then held it until relieved by Sir Colin Campbell. Created G.C.B. in 1857, he was made Lieutenant-General in that year, and a baronet in 1858. He died March 11, 1863.

Ouzel Name denoting the blackbird in Anglo-Saxon times, and still occasionally so used in N. Yorkshire. The word appears in compound forms, such as the ring ouzel, *Turdus torquatus*, an allied thrush which reaches Britain every spring for breeding, mostly going southward in October, the water ouzel, *Cinclus aquaticus*, is better known as the dipper (q.v.).

Ovary Organ of the female in which reproductive cells are developed. The operation known as ovariectomy consists of the removal of cysts and tumours, or of the complete organ itself. Previous to the introduction of antiseptic and aseptic surgical methods this operation was a most serious one, but is now accompanied by lower mortality than other major operations.

Over District of Cheshire. It is on the L.M.S. and Cheshire Lines Rlys. The chief industry is the mining of salt. Over is part of the urban district of Winsford (q.v.) and Over.

Overload Term used in engineering for an excessive mechanical load on an electric motor preventing the economical working of the machine. An overload may cause a slowing down of the armature, thus reducing the electromotive force and causing waste of energy by the heating of the coils due to the passing of an increased amount of current.

Oversea Settlement Committee. British government committee appointed in 1909 to bring the government into closer touch with the settlement of British subjects in the Dominions and elsewhere. It is non-political and widely representative and advises on land development, settlement schemes, assisted passages, training, etc. The government's contribution in any one year is limited to three million pounds.

Overseas Trade Name given to a department of the British Government that exists to promote trade with foreign countries. It was set up in 1917 and is under the joint control of the Board of Trade and the Foreign Office. The offices are at 35 Old Queen Street, London, S.W. 1 and 9-12 Basinghall Street, London, E.C. 2.

Overseer Officer formerly appointed by justices of counties or boroughs, parishes and townships. There could not be less than two or more than four for one parish or township. The duties of an overseer included the appropriation, distribution and collection of poor rates, but after the passing of the Poor Law Amendment Act of 1834 such duties as the distribution of poor relief, etc., were transferred to the boards of guardians. The office was abolished in April, 1927, by Order of Council.

Overture A musical composition, primarily intended to introduce a play, opera or other larger work. Originally consisting only of some introductory

bars, it was developed by Lull into the fixed form of a slow introduction followed by a quick fugal *Allegro*. Gluck made the overture analogous to what succeeded it, and in *Iphigene en Tauride* made no break between the overture and the opening scene. Later composers incorporate in the overture themes from the main work.

Ovid Roman poet. Publius Ovidius Nason was born at Sulmo, in the Paeninsula, March 20, 43 B.C. Destined for the law, he early abandoned public life for poetry, and became a master of the elegiac couplet. He enjoyed the favour of the Emperor Augustus, and was a friend of Propertius and Tibullus. In A.D. 9 he was banished to Tomi on the Black Sea where he died A.D. 17. The *Amores* contains his work.

Owen Sir Richard. English biologist. Born on July 20, 1804 at Lancaster, after studying medicine at Edinburgh and London, he was influenced by Abernethy to take up scientific research and in 1856 he became superintendent of the Natural History Department of the British Museum. In 1884 he completed his scheme of making a separate National Natural History Museum, which was established at South Kensington. He wrote profusely on zoology and anatomy. He died on Dec. 18, 1892.

Owen Robert. British social reformer. Born at Newtown, Montgomeryshire, May 14, 1771, when 10 years old he started work, at 19 he was the manager of a cotton mill, and at 28 part owner of the New Lanark cotton mills. He encouraged his workpeople in thrift and cleanliness, helped to establish infant education and endeavoured unsuccessfully to run experimental communities on co-operative lines. In 1828 he left New Lanark, and his wealth exhausted spent the rest of his life in socialistic and spiritualistic propaganda, establishing an unsuccessful colony at New Harmony, U.S.A. He died Nov. 17, 1858.

Owen Sound Town and lake port of Ontario. It stands on the Sydenham River, where it falls into Owen Sound, an arm of Georgian Bay and therefore of Lake Huron. It is 120 m. from Toronto, and is served by both the trans-continental lines and lake steamers. There is a good harbour and the industries include flour mills and lumber mills. Pop. (1931) 12,839.

Owl Generic name for nocturnal birds of prey. They have large heads, shortened faces, hooked bills and large forward-looking eyes, usually set in a ruff of feathers, many having feathered ear tufts or horns. The softness of the plumage enables very noiseless flight. They feed on small mammals, birds and reptiles. Of about 200 species four, the barn owl, the tawny, the long-eared, and the little owl, are resident in Britain. Two others, the short-eared and the snowy, are regular summer visitors, there are other occasional stragglers.

Oxalic Acid Organic acid occurring in the wood sorrel, *Oxalis acetosella*, as a free acid and acid potassium oxalate. It is a white crystalline and poisonous substance, prepared commercially by fusing sawdust with a mixture of caustic soda and potash. Oxalic acid is used in dyeing, calico printing, straw and flax bleaching, and the cleaning of metals.

Oxford County town of Oxfordshire. It is situated on the River Thames, 51 m. W.N.W. of London. In Saxon times it was an

important military fortification, and its academic associations begin as early as the 12th century with Theobald of Etampes' School and, in 1185, the establishment of a guild of wandering scholars by Giraldus Cambrensis. The 13th century marked the beginning of a long period during which Oxford played a prominent part in English history. Several parliaments, notably the Mad Parliament, were held here, and a charter was granted in 1248. The power of the University has hindered Oxford's growth as a town, but it has developed considerably, and the establishment of the Morris Motor Works at Cowley has made Oxford an important industrial centre. Pop (1931) 80,540. See OXFORD UNIVERSITY.

Oxford Robert Harley, 1st Earl of English statesman. Born in London, Dec 5, 1661, he entered Parliament as a Whig, but later seceded from the Whigs and led the Tories. In 1704 he was Secretary of State, and in 1710, Chancellor of the Exchequer. In 1711 he was Lord High Treasurer, and was raised to the peerage. He fell into disfavour with Anne and Lord Bolingbroke before her death, and soon after the accession of George I, he was impeached for treason. Imprisoned for 2 years he died on May 21, 1724.

Oxford and Asquith Earl of English politician. Born at Morley, Yorkshire, Sept. 12, 1852, Herbert Henry Asquith was educated at the City of London School and at Oxford, where he had a distinguished career. He was called to the Bar, entered Parliament for East Fife, in 1886, and represented that constituency until 1918. He became Home Secretary in the Liberal Government of 1892, on the fall of the Salisbury Government, and was attacked vigorously for his conduct in sending troops to suppress the Featherstone Colliery strike. In 1905 he became Chancellor of the Exchequer in the Campbell-Bannerman Government, and succeeded Campbell-Bannerman as Premier in 1908. In 1911 an Insurance Act was passed, and in 1912 there followed the famous constitutional struggle with the House of Lords. Asquith tried to give Southern Ireland Home Rule, while pacifying Ulster, and on the outbreak of war, in 1914, he appointed Lord Kitchener War Minister. Differences arose on the conduct of the war and a coalition cabinet was formed, but Asquith resigned the premiership in Dec., 1916.

In 1918 he was defeated for Fife, but returned for Paisley. The Coalition fell, and the Labour and Liberal parties later ousted the Tory Government under Baldwin. After the defeat of the first Labour Government in 1924, he was again without a seat, but was made Lord Oxford and Asquith in 1925. In 1926 he quarrelled with Lloyd George over the General Strike. In his last years he wrote his reminiscences *Fifty Years of Parliament*. He died on Feb. 15, 1928. Asquith's second wife Margot, née Tennant, is known as the witty and brilliant author of *The Autobiography of Margot Asquith* and several other books.

Oxford Group Religious movement in the Church of England. Founded by the Rev. Frank Buchman, an American Methodist minister, it first took root in England at Oxford and represents an attempt to revive the spirit of 1st century Christianity. Stress is laid upon confession, self-dedication and guidance. The movement has spread rapidly over the British Isles and in

America, and has been extended to the Continent, South Africa and India.

Oxford House Settlement in Bethnal Green, London, E.C. It was founded in 1884 by members of the University of Oxford to carry on religious and social work among the poor under the auspices of the Church of England. The original building is in Mape Street, but the settlement includes several others, among them S. Margaret's House, a centre for work among women.

Oxford Movement Movement for the reform of the Church of England, called sometimes the Tractarian movement. The Rev. E. B. Pusey is usually regarded as its founder, and its principles were laid down in sermons which he preached in Oxford in 1833 and in the *Tracts of the Times* published in 1834. The movement aimed at bringing more reverence and order into the worship of the church, but its proposals were disliked by many. The centenary of the Oxford movement was celebrated in 1933.

Oxford University One of the great English universities. Founded about the 12th century, it has 21 colleges: University, Balliol, Merton, Exeter, Oriel, Queen's, New College, Lincoln, All Souls, Magdalen, Brasenose, Corpus Christi, Christ Church, S. John's, Trinity, Jesus, Wadham, Pembroke, Worcester, Keble, and Hertford. There are four women's colleges: Somerville, Lady Margaret Hall, S. Hugh's and S. Hilda's, one academic hall, S. Edmund's, and four independent theological foundations: Pusey House and Wycliffe Hall (Anglican) and Mansfield and Manchester colleges (Nonconformist). Non-collegiate students are called members of S. Catherine's college, and women home students are admitted.

Among other buildings are the Bodleian Library, the University Schools, Sholdonian theatre, Ashmolean museum and the university church of S. Mary. The university has other museums, an observatory, and a botanical garden. The Oxford Union Society is the chief debating society, and there is a well-known dramatic society, the O.U.D.S.

The university has about 4600 students of whom about 800 are women. At its head is a chancellor, but the acting head is the vice-chancellor, nominated annually by the chancellor. Two proctors are appointed annually. The university legislates through convocation, controlled by the Hebdomadal Council (q.v.). Degrees in a variety of subjects are granted by the ancient house of congregation. Individual colleges are ruled by a head, whose title varies from college to college, and fellows, the disciplinary officer of the college being the dean.

Among its famous alumni may be mentioned Sir Philip Sidney, Pitt, Wesley, Cardinal Newman, Cecil Rhodes, and more recently, Lord Asquith, Lord Birkenhead, Sir John Simon and others.

The university has a famous press, the Clarendon Press with offices in Oxford and London. The university sends two members to Parliament.

Oxfordshire County of England. In the south of the country, it is wholly inland and has the Thames as its southern boundary. The chief town and the largest is Oxford, others are Banbury, Bicester, Henley, Woodstock, Thame, Chipping

Pahang One of the Federated Malay States under British protection. It is on the east coast of the Malay Peninsula within 200 m by sea from Singapore. Pop (1931) 180,111. It is one of four protected native states administered by a Chief Secretary and under agreement to furnish a contingent of troops for service in the colony should the British Government be at war with any foreign power.

Paignton Watering place of Devon shire, on the Tor, 1 m to the west of Torquay. The new town is on the sea, the old one behind. Here are the remains of a bishop's palace, in the tower of which Miles Coverdale (1487-1563) is said to have made his translation of the Bible. There is a considerable production of elder in the town. Pop (1931) 18,405.

Pain Uncasiness or distress of body or mind. In the medical sphere it may be cautionary, corrective, local, general, acute, chronic, throbbing, stabbing, gnawing or burning. To dull pain by bromides, opiates or other anodynes is often harmful.

RELIEF OF PAIN Pain in the stomach, or bowel, arising from congestion or other disturbance, will be relieved by hot water bottles or hot fomentations. A dose of castor oil will often give immediate relief to pain and will help to cure the condition, or a soap and water enema (1.2 pints at 100° F) may be used to clear the bowel if the pain is in the lower part of the abdomen. If a more serious cause is suspected (i.e., ulcer, appendicitis, etc.) consult a doctor. See INDIGESTION, COLIC.
